Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Combined Statement of Receipts, Expenditures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1, 1948, and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve banks. However, noncash debt transactions are included.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily state-

ment with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures were classified by type of account, and the budget results shown in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions handled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

Note: Details of figures may not add to totals because of rounding.

Treasury Financing Operations

August Cash Offering

The Treasury announced on August 17 a cash offering of $2.5 billion, or thereabouts, of 3-1/2 year 5-3/8% Treasury Notes of Series C-1971 at a price of 99.92 (to yield 5.40%).

Subscriptions were received on Tuesday, August 22, and totaled $6,004 million, of which $2,509 million was accepted. Subscriptions for $100,000 or less were allotted in full and those for more than $100,000 were allotted 38 percent with a minimum allotment of $100,000 per subscription.

The payment date for the notes was August 30. Payment by credit in Treasury tax and loan accounts was permitted. The notes are dated August 30, 1967, and will mature February 15, 1971. They were issued in bearer and registered form. Interest is payable on August 15 and February 15.

Subscriptions from banking institutions for their own account, Federally-insured savings and loan associations, States, political subdivisions or instrumentalities thereof, public pension and retirement and other public funds, international organizations in which the United States holds membership, foreign central banks and foreign States, dealers who make primary markets in Government securities and borrowings thereon, and Government investment accounts were received without deposit. Subscriptions from all others had to be accompanied by payment of 2 percent of the amount of notes applied for, not subject to withdrawal until after allotment. Commercial bank subscriptions for their own account were restricted in each case to an amount not exceeding 50 percent of the combined capital (not including capital notes or debentures), surplus and undivided profits of the subscribing bank.

Commercial banks and other lenders were requested to refrain from making unsecured loans, or loans collateralized in whole or in part by the notes subscribed for, to cover the deposits required to be paid when subscriptions were entered, and banks were required to make the usual certification to that effect. All subscribers were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of the notes subscribed for at a specific rate or price, until after midnight August 22, 1967.

9-Month and One-Year Bills

On August 17 tenders were invited for $500 million, or thereabouts, of 274-day Treasury bills, representing an additional amount of bills dated May 31, 1967, maturing May 31, 1968, to be issued August 31, 1967, and for $1 billion, or thereabouts, of 366-day Treasury bills, to be dated August 31, 1967. These issues were to refund $1.5 billion of bills maturing August 31. Tenders were opened on August 24.

Tenders received for the 274-day bills totaled $1,297 million, of which $501 million was accepted, including $21 million of noncompetitive tenders. The average bank discount rate was 5.097 percent.

Tenders received for the 366-day bills totaled $1,901 million, of which $1,000 million was accepted, including $42 million of noncompetitive tenders. The average bank discount rate was 5.100 percent.

Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of $1,000, $5,000, $10,000, $50,000, $100,000, $500,000, and $1,000,000 (maturity value). Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for $200,000 or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, 9-month, and one-year bills may not be made by credit in Treasury tax and loan accounts.

CONSOLIDATED CASH TRANSACTIONS

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1968 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget documents as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Seasonally adjusted summary data are shown in table 3. The adjusted data have been derived by applying a seasonal adjustment formula developed by the Bureau of Census, Department of Commerce.

Note: Because of administrative and legislative changes in tax payment schedules, the seasonally adjusted figures have been erratic in recent years. For this reason a study leading toward revision of the seasonal adjustment factors is underway.

1/ Includes accelerated corporate tax payments for 1964, 1965, and 1966. Also, in 1966 includes initiation of graduated withholding of personal income taxes and adjustment for the change in the schedule for depositing withheld and OASI taxes.

ADMINISTRATIVE BUDGET OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories which are based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies and firms often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In table 1, obligations that are incurred within the Government are distinguished from those incurred outside the Government. Tables 2, 3, and 4 show only those incurred outside.

Data on obligations on a monthly basis have been collected during the past four years for the administrative budget accounts. The data now available are published in this issue of the Treasury Bulletin. Subsequent issues will carry data for additional months as the information becomes available. Data for the trust fund accounts are now being collected and will be published in the near future.

1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follows. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget presentation and therefore may differ somewhat from the Budget document.)

Gross obligations incurred (as above)	$135,773
Advances, reimbursements, other income, etc.	36,431
Net obligations incurred	99,342

1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follows. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget presentation and therefore may differ somewhat from the Budget document.)

Gross obligations incurred (as above)	$143,846
Advances, reimbursements, other income, etc.	38,725
Net obligations incurred	105,121

* Less than $500,000.

1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follows. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget presentation and therefore may differ somewhat from the Budget document.)

Gross obligations incurred (as above)	$170,073
Advances, reimbursements, other income, etc.	49,259
Net obligations incurred	120,813

* Less than $500,000.

Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).

2/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.

3/ Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1/ Guaranteed securities included are those held outside the Treasury.

2/ Total includes "Other bonds" through 1960; see Table 3.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table 3.

2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.

3/ Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.

4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.

5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.

6/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.

7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.

8/ Includes exchanges of Series 1950 F and G bonds for 3-7/8% marketable bonds of 1968.

9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.

10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

* Less than $500,000.

TREASURY SURVEY OF OWNERSHIP, JULY 31, 1967

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1967 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

1/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrence are the latest dates.

2/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.

3/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

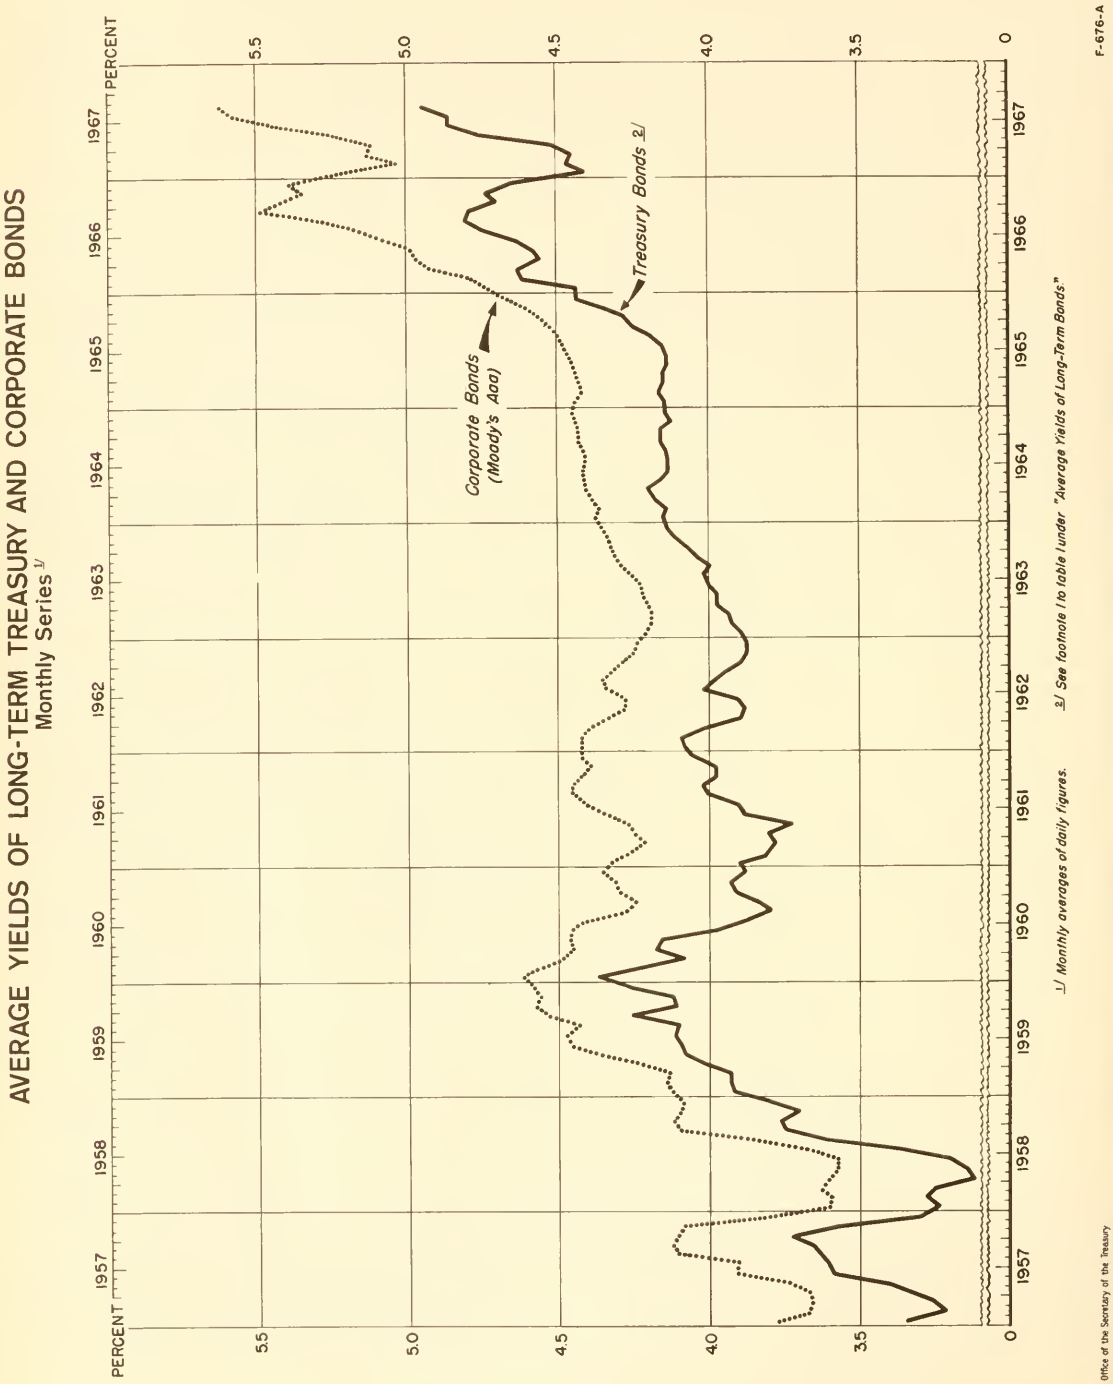
Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aaa corporate bonds.

1/ Series includes bonds on which the interest income is subject to normal tax and surtax which are neither due nor callable before a given number of years as follows: April 1953 to date, 10 years; April 1952 - March 1953, 12 years; October 1941 - March 1952, 15 years. For bonds currently in the series, see Table 4 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.

2/ One or more new long-term bonds added to the average (see footnote 1).

3/ An existing bond dropped from the average (see footnote 1).

AVERAGE YIELDS OF LONG-TERM BONDS



1/ Monthly averages of daily figures.

2/ See footnote 1 to table under "Average Yields of Long-Term Bonds."

The tables in this section are designed to provide data on United States reserve assets and liabilities and other statistics related to the United States balance of payments and international financial position. A number of changes were introduced in the May 1967 Bulletin to increase the usefulness of this section.

Table 1 has been revised to include in the reserve assets of the United States its reserve position in the International Monetary Fund. In accordance with Fund policies the United States has the right to draw foreign currencies equivalent to this amount virtually automatically if needed. (Under appropriate conditions the United States could draw additional amounts equal to the United States quota of $5,160 million.) This revised presentation corresponds to the treatment of United States monetary reserves in the United States balance of payments accounts.

Table 2 brings together the various statistical components of the liabilities which enter into the United States balance of payments calculated on the liquidity basis. The inclusion of the United States reserve position in the International Monetary Fund in Table 1 requires that the "holdings of dollars" of the Fund be excluded from the data on liabilities to foreigners, in order to avoid double counting. For further explanation of this change in the liabilities statistics, see headnote to "Capital Movements" section.

Table 3 (formerly Table 5), presenting an area breakdown of United States liquid liabilities to official institutions of foreign countries, has been revised to include holdings of convertible nonmarketable United States Government securities with an original maturity of more than one year.

Table 4 (formerly Table 2) is virtually unchanged and shows United States Treasury nonmarketable bonds and notes issued to official institutions of foreign countries.

Table 5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table 6 (formerly Table 3) presents United States net monetary gold transactions with foreign countries and international and regional organizations. The former Table 4, which presented the estimated gold reserves and dollar holdings of foreign countries and international institutions, was discontinued in the May 1967 Bulletin.

1/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, and gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases. For corresponding liabilities see Table 2.

2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. See "Account of the Treasurer of the United States," Table 4.

3/ Includes holdings of Treasury and Federal Reserve System.

4/ In accordance with Fund policies the United States has the right to draw foreign currencies equivalent to its reserve position in the Fund virtually automatically if needed. Under appropriate conditions the United States could draw additional amounts equal to the United States quota. See Table 5.

5/ Reserve position includes, and gold stock excludes, $259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

Note: Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States. Data correspond to statistics following in this section and in the "Capital Movements" section, except for minor rounding differences. Table excludes International Monetary Fund "holdings of dollars," and holdings of U.S. Treasury letters of credit and nonnegotiable, noninterest-bearing special U.S. notes held by other international and regional organizations. The liabilities figures are used by the Department of Commerce in the statistics measuring the balance of international payments of the United States on the liquidity basis; however, the balance-of-payments statistics include certain adjustments to Treasury data prior to 1963 and some rounding differences, and may differ because of varying timing in incorporating revisions of Treasury data. The table does not include certain nonliquid liabilities to foreign official institutions which enter into the calculation of the official reserve transactions balance by the Department of Commerce.

1/ Represents liability on gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases.

2/ U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets. Upon termination of investment, the same quantity of gold can be reacquired by the International Monetary Fund.

3/ Includes Bank for International Settlements and European Fund.

4/ Derived by applying reported transactions to benchmark data; breakdown of transactions by type of holder estimated 1960-1963. Includes securities issued by corporations and other agencies of the United States Government, which are guaranteed by the United States.

5/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank.

6/ Includes difference between cost value and face value of securities in IMF gold investment account. Liabilities data reported to the Treasury include the face value of these securities, but in this table the cost value of the securities is included under "Gold investment." The difference, which amounted to $32 million as of the end of 1966, is included in this column.

7/ Includes total foreign holdings of U.S. Government bonds and notes, for which breakdown by type of holder is not available.

8/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

Note: The initial U.S. quota in the International Monetary Fund was $2,750 million. The U.S. quota was increased to $4,125 million in 1959, and to $5,160 million in February 1966. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 percent in gold and 75 percent in dollars.

1/ Represents net Fund sales of gold to acquire U.S. dollars for use in Fund operations. Does not include transactions in gold relating to gold deposit or gold investment (see Table 2).

2/ Represents purchases from the Fund of currencies of other members for equivalent amounts of dollars. The United States has a commitment to repay drawings within 3-5 years, but only to the extent that the Fund's holdings of dollars exceed 75 percent of the U.S. quota. Drawings of dollars by other countries reduce the U.S. commitment to repay by an equivalent amount.

3/ Represents the United States gold tranche position in the Fund (the United States quota minus the Fund's holdings of dollars), which is the amount that the United States could draw in foreign currencies virtually automatically if needed. Under appropriate conditions, the United States could draw additional amounts equal to the United States quota.

4/ Represents $600 million IMF gold sale to United States (1957), less $6 million gold purchase by IMF from another member with U.S. dollars (1948).

5/ Includes $259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is published monthly in the "Treasury Bulletin." Reports by banks, bankers, securities brokers and dealers, and nonbanking business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision became effective with reports covering data as of May 31, 1963.1/ A detailed description of the content of the statistics, including the changes instituted in 1963, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," "Latin American regional," or "Asian regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude U.S. Treasury letters of credit, and nonnegotiable, noninterest-bearing special notes of the United States held by the Inter-American Development Bank and the International Development Association.

Beginning with the May 1967 Bulletin, data on short-term liabilities to foreigners have been revised to exclude the holdings of dollars of the International Monetary Fund derived from payments of the United States subscription and from the exchange transactions and other operations of the Fund. (Liabilities representing the "gold investment" of the Fund continue to be included.) This change in the treatment of the Fund's "holdings of dollars" is related to the revision of the table on United States monetary reserve assets (see "International Financial Statistics" section, Table 1) to include the United States reserve position in the International Monetary Fund.

The Fund's "holdings of dollars" do not represent United States liabilities to foreigners in the same sense as do other reported liabilities to foreigners. They are more accurately viewed as contingent liabilities, since they represent essentially the amount of dollars available for drawings from the Fund by other member countries. Changes in these holdings (arising from United States drawings and repayments of foreign currencies, from drawings and repayments of dollars by other countries, and from other dollar operations of the Fund) give rise to equal and opposite changes in the United States gold tranche position in the Fund, which in the absence of United States lending to the Fund, is equal to the United States reserve position. Since the reserve position is included in United States reserve assets, it is necessary, in order to avoid double-counting, to exclude the Fund's "holdings of dollars" from United States liabilities to foreigners. This revised presentation conforms to the treatment of these items in the United States balance of payments and the international investment position of the United States.

The data on securities transactions and on foreign holdings of U.S. Government bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds and notes, foreign currency series (see "International Financial Statistics" section, Table 4).

Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Beginning with the May 1967 Bulletin, publication of the former Section I, Table 1, "Net Movements of Banking Funds and Transactions in Long-Term Securities with Foreigners" was discontinued. Due to numerous breaks in the statistical series, the usefulness of this table had become increasingly limited in recent years. Time series of the significant categories of data reported on the Treasury Foreign Exchange Forms, from which this table was derived, are available elsewhere in this section.

Section IV presents supplementary data which are reported less frequently than monthly but which are published monthly.

1/ Copies of the reporting forms and instructions may be obtained from the Office of Balance of Payments Programs, Operations and Statistics, Office of the Assistant Secretary for International Affairs, Treasury Department, Washington, D.C. 20220 or from Federal Reserve Banks.

6/ Differs from 1961 end of year data on the preceding line by inclusion of liabilities and claims reported by a number of banks included in the series beginning December 31, 1961.

7/ Includes reported liabilities to foreign official institutions beginning October 1961. Figures for selected dates are as follows: end 1961, $46.3 million; end 1962, $47.9 million; end 1963, $30.1 million; end September 1966, $517.7 million; end December 1966, $516.5 million; end March 1967, $444.2 million; end June 1967, $428.7 million; end July 1967, $428.7 million.

8/ Includes claims previously held but first reported as of May 31, 1963; as of that date such claims amounted to $85.6 million. Also includes claims amounting to $193.2 million reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported.

9/ Short-term liabilities include a net increase of $50.8 million arising from changes in reporting coverage, distributed as follows: "Official institutions" -$4.0 million, "Foreign banks" +$60.3 million, "Other foreigners" +$22.5 million, and "Payable in foreign currencies" -$27.9 million.

10/ Data on claims below the line differ from claims above the line because of the exclusion as of December 31, 1964 of $58.1 million of short-term U.S. Government claims previously included; and because of the addition of $545.9 million of short-term claims and $313.3 million of long-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.

11/ Data on claims below the line differ from claims above the line because of the addition of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 31, 1965, and short-term claims reported by banks reporting for the first time.

12/ See footnote 13.

13/ Data on liabilities and claims below the line differ from data above the line because of changes in reporting coverage and classification effective December 31, 1966.

14/ Data on claims below the line differ from claims above the line because of revisions of figures on collections outstanding.

1/ Excludes convertible foreign currencies held by U.S. monetary authorities.

2/ The second column for 1965 differs from data in preceding column because of the addition of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 31, 1965, and short-term claims reported by banks reporting for the first time.

3/ Data in the first column are comparable in coverage and classification to data for previous date, and do not reflect changes in reporting arrangements effective December 31, 1966. Data in the second column reflect changes in reporting arrangements effective December 31, 1966.

4/ The second column for June 1967 differs from data in preceding column because of revisions of figures on collections outstanding.
