Dividends Received by Corporations

Since 1917 the Federal income tax laws have accorded special treatment to the income of corporations derived from dividends.¹ As a result, the statistics compiled from corporation income tax returns contain significant information on the volume and distribution of dividends received by corporations. This information is here summarized for the taxable years 1926-1937, or for available years within this period.

It should be noted that these data do not include all dividends received by corporations. Some corporations, for example, those not organized and operated for profit, are exempt from the Federal income tax.² Since they do not file income tax returns, their dividend receipts are necessarily excluded from these statistics. Moreover, in the case of corporations filing tax returns, not all dividend receipts are accorded special treatment and, therefore, not all are separately tabulated.

Variations from year to year in the tax treatment of some of the special categories of dividend receipts, and other factors affecting the comparability of the data, are noted below and in the footnotes to the tables.

¹Under the Act of August 5, 1909 also intercorporate dividends were accorded special treatment, but under the Revenue Acts of 1913 and 1916 they were not differentiated from other corporate income.

²For an enumeration of exempt classes of corporations, see Section 101 of the Internal Revenue Code as amended by Section 217 of the Revenue Act of 1939.

Federal tax treatment

Under the Revenue Acts of 1913 and 1916 intercorporate dividends were fully taxable; under the acts of 1918-1934 they were fully exempt. The act of 1917 provided the transition by stipulating that dividends received in 1917 from earnings of the period March 1, 1913, through 1915 were taxable at the rate imposed by the 1913 act, and those received in 1917 from 1916 and 1917 earnings were taxable at the rate of the 1916 act. Dividends received in the taxable year 1918 and in all subsequent taxable years beginning prior to January 1, 1936 were exempt from tax.

In the 1936 act intercorporate dividends were made partially taxable by requiring the inclusion of 15 percent of such dividends in the income tax base for taxable years beginning after December 31, 1935.³ For purposes of the 1936 and 1937 surtax on undistributed profits, intercorporate dividends were fully taxable.

Under the Revenue Act of 1938, intercorporate dividends received by corporations with net incomes of not more than \$25,000 were exempt from tax to the extent of 85 percent of such dividends received (but not more than 85 percent of adjusted net income). For

³The Revenue Act of 1935 provided for the inclusion of 10 percent of such dividends. This provision was superseded before it became effective, however, by the above-mentioned provision of the 1936 act.

corporations with net incomes of more than \$25,000 a similar exemption was allowed with respect to what in effect was a basic tax rate of 16½ percent. The entire amount of intercorporate dividends, however, was included in the tax base subject to what in effect amounted to an undistributed profits tax of 2½ percent on undistributed net income.⁴

The tax on undistributed profits does not apply to any taxable year beginning after December 31, 1939. Under the Revenue Act of 1939, 85 percent of intercorporate dividends (but not in excess of 85 percent of adjusted net income) continues to be exempt from the normal corporation income tax.⁵

The special tax treatment summarized above has not been accorded all dividends received by corporations. For varying periods, some minor classes of dividends received by corporations have been taxable as ordinary income. These include (1) dividends received in taxable years 1918-1920, inclusive, and 1932 to date on the stock of domestic corporations which are themselves exempt from the Federal income tax;⁶ (2) dividends received in taxable years 1921 to date on the stock of corporations deriving their gross income chiefly within a possession of the United States and taxable only on income from sources within the United States; (3) dividends received on the stock of corporations organized under

the China Trade Act, 1922; and (4) dividends received on the stock of foreign corporations, excepting (a) foreign corporations subject to the Federal income tax, in taxable years 1918-1920, inclusive,⁶ and (b) foreign corporations deriving a major portion of their gross income from sources in the United States, in taxable years 1921-1933, inclusive.⁷

Volume of dividends received

During the twelve-year period 1926-1937, the volume of dividends received annually by corporations ranged from approximately one to three billion dollars. (Table 1.) Receipts were at a minimum in 1933 and reached a maximum in 1935. The record high of \$3,014 million for the taxable year 1935 is partially due to the discontinuance of the privilege of filing consolidated returns, except for railroads, under the Revenue Act of 1934.⁸ Because corporations (with some exceptions) are no longer permitted to file consolidated returns, the amount of reported dividend receipts includes intercompany dividend transfers between affiliated corporations, some of which did not enter into the statistics for earlier years when consolidated returns were permitted. In 1936, the amount of dividends received by corporations declined, despite a substantial increase in cash dividends paid, reflecting possibly some simplification of corporate structure through elimination of subsidiary companies.

In the course of the twelve years under examination, the division of dividend receipts between corporations with net incomes and corporations with deficits has undergone

⁴The 1938 act taxed corporations with net incomes of more than \$25,000 in general at a rate of 19 percent, but allowed a tax credit of 2½ percent for dividends paid (as defined by the act). As indicated above, this procedure was equivalent in result to the imposition of a basic tax of 16½ percent and a surtax on undistributed profits of 2½ percent.

⁵Under the 1936 act and subsequent acts, corporations qualifying as mutual investment companies are not allowed the 85 percent credit for dividends received, but are allowed to deduct dividends paid in computing taxable net income.

⁶Under the 1909 act also, dividends received from exempt domestic corporations were taxable as ordinary income, and dividends received from foreign corporations subject to the Federal excise tax were deductible.

⁷The amount of dividends received by corporations on the stock of foreign corporations in the year 1937 was reported at \$209,000,000. The amount of dividends received from the other above-enumerated categories of corporations is not known.

⁸For the treatment of consolidated returns under the Revenue Acts of 1913-1939 see Bulletin of the Treasury Department, April, 1940, pages 1-4.

radical change. Between 1929 and 1932 the proportion of dividend receipts accounted for by deficit corporations increased from 15.6 percent to 65.3 percent. Thereafter, the share of deficit corporations declined to 6.2 percent in 1937. In this connection it should be pointed out that a marked re-grouping of net income and deficit corporations occurred in 1936 as a result of a change in the definition of net income. Beginning in 1936, dividends received were included in the statutory definition of net income, and both dividends received and partially exempt interest on Government obligations (formerly excluded) were included in the definition of net income employed in "Statistics of Income" tabulations.⁹ As a result of this change in definition, some corporations previously in the deficit class were shifted to the class of net income corporations.

Size of recipient corporations

Large corporations, which receive a sizable proportion of every item of corporation income, receive a particularly large proportion of intercorporate dividends. In 1937, when corporations submitting balance sheets reported \$2,601 million dividend receipts, those with assets of \$50,000,000 or more accounted for 65.2 percent of the total. With one exception (1933) the corresponding percentages for the years 1931-1936 were each in excess of 60 percent. Corporations with assets of \$1,000,000 or more have in most years accounted for roundly 95 percent or more of all dividends received by corporations. (Table 2.)

The aggregate amount of dividends of specified size received by corporations with different sizes of net incomes and deficits is shown in Table 3.

⁹United States Treasury Department, Bureau of Internal Revenue, Statistics of Income, Part 2, compiled annually from corporation income and excess-profits tax returns.

These data also indicate that the bulk of dividends is received by the larger corporations. In 1937, for instance, corporations with net incomes of \$5,000,000 and over accounted for \$1,348 million or 53.6 percent of the \$2,515 million dividends received by all net income corporations. The corresponding percentage for 1936 was 51.3 percent. (Table 5.)

Number of recipient corporations

Only a relatively small number of corporations receive dividends from other corporations. In 1936, when 478,857 active corporations filed income tax returns, only 44,947, or less than 10 percent of the total number, reported dividend receipts. The percentage for 1937 was substantially the same. (Table 4.) The proportion of corporations reporting dividend receipts is higher for net income than for deficit corporations, and for both groups of corporations increases markedly with the size of net income or deficit. (Table 6.)

Size of dividend receipts

Most of the corporations receiving dividends do so in small amount. In 1937, 70.3 percent of all net income and 87.5 percent of all deficit corporations receiving dividends reported less than \$5,000 each. (Table 7.) Quantitatively, these small dividend receipts account for only a small fraction of the total amount of dividends received by all corporations. The aggregate amount of dividends reported in amounts of \$1,000,000 and over, as a percent of the amount of all dividends received by corporations with different sizes of net incomes and deficits, is shown in Table 8.

Dividends received by industrial groups

Three industrial groups of corporations--(a) finance, (b) public utili-

ties, including transportation, and (c) manufacturing--have generally accounted for some 90 percent or more of the dividends received by corporations. Finance corporations alone, the most important recipients of dividends, have in recent years received around 60 percent of all dividends paid to corporations. For 1937 next in importance are manufacturing, with 19.6 percent, and transportation and other public utilities, with 12.1 percent. The distribution of dividend receipts by industrial groups for corporations reporting net incomes is similar to that for all corporations. (Table 9.)

The enhanced relative importance of the dividend receipts of the finance group since 1934 and the collateral decrease in the importance of dividends received by transportation and other public utility corporations appear in part to be the result of the shifting of corporations from one industrial group to another after the substitution of separate for consolidated returns. Whereas in 1933 and prior years parent holding companies

included in consolidated returns were classified in the industry in which the principal business activity of the consolidated companies lay, in 1934 and thereafter such holding companies, filing separate returns, were classified in the finance group.

Importance of dividends received by industrial groups

The relation of dividends received to compiled net profit for corporations with net incomes in the several industrial groups is shown in Table 10. For 1937, dividends received amounted to 64.9 percent of compiled net profit for finance corporations, 19.7 percent for agricultural corporations, 19.2 percent for transportation and other public utilities, and 18.8 percent for the mining and quarrying group. It should be emphasized that year to year comparisons of the percentages in this table are seriously affected by the lack of comparability of the corporations included in the group of net income corporations due to changes in the statutory definition of net income and in business conditions.

Dividends Received by Corporations - (Sources and Footnotes)

Sources: Except for Table 3, the tables are based upon data published in United States Treasury Department, Bureau of Internal Revenue Statistics of Income, compiled from corporation income and excess-profits tax returns.

Table 3 is based upon unpublished tabulations prepared by the Bureau of Internal Revenue, Income Tax Unit, Statistical Section.

- 1/ The dividends tabulated in Statistics of Income comprise through 1935 those allowed as a deduction in computing net income, and beginning 1936 those allowed as a base upon which to compute the 85 percent dividends received credit against net income. Hence, the figures shown above exclude dividends received from special classes of domestic corporations, not allowed as a deduction or as a basis for credit against net income, as follows: in 1932 and subsequent years, dividends received on the stock of domestic corporations exempt from the Federal income tax; and in all years shown, dividends received on the stock of corporations organized under the China Trade Act and on the stock of corporations deriving a large percentage of their gross income within a possession of the United States. Conversely, the amounts shown include through 1933, though not thereafter, dividends received from foreign corporations deriving more than half their gross income, over a three-year period closing with the taxable year, from sources within the United States. The figures include dividends received by mutual investment companies, though for taxable years beginning after December 31, 1935, such companies have not been allowed the dividends received credit.
- 2/ Amounts are rounded to the nearest thousand, and will not necessarily add to totals.
- 3/ Prior to 1926 the totals are incomplete, primarily because before that year returns of railroads and public utility companies, and probably some consolidated returns in other industrial groups, were not fully tabulated as respects particular receipts and deductions. Furthermore, variation in the number of filed returns tabulated appears to have affected the comparability of the data for some of the earlier years, notably 1919.
- 4/ In interpreting these data it should be recalled that in 1933-1935 corporations filing consolidated returns were subject to a higher rate of tax than other corporations; and further, that the privilege of filing consolidated returns was restricted to railroads by the Revenue Act of 1934.
- 5/ For 1936 the classification of returns between net income corporations and deficit corporations is based on net income for income tax computation which, unlike the net income employed for classification in former years, includes dividends received on the stock of domestic corporations subject to the Federal income tax and interest received on certain Government obligations subject to the excess-profits tax, and excludes contributions or gifts (to the extent allowed) and the excess-profits tax. For 1937, the classification is based upon net income for excess-profits tax computation, which differs from the 1936 "net income for income tax computation" by not excluding the excess-profits tax.
- 6/ Corporations with total assets of \$50,000,000 and over. The breakdown between corporations with assets of \$50,000,000 - \$100,000,000 and those with assets of \$100,000,000 and over is not available for years prior to 1936.

Note: The amount of customs duties and taxes is calculated on the basis of reports of the Bureau of Foreign and Domestic Commerce, showing the quantity and value of merchandise imported.

1/ Figures are rounded to nearest thousand, and will not necessarily add to totals.

2/ Includes taxable sugar from the Philippine Islands.

3/ Duty-free commodities taxed under the Revenue Act of 1932 and subsequent acts.

4/ Articles dutiable under paragraph 1615 and repairs on vessels dutiable under Section 465 of the Tariff Act of 1930; the taxable copper content of dutiable articles taxed under the Revenue Act of 1932 and taxes on articles composed in chief value of manufactured sugar under the Sugar Act of 1937, which cannot be allocated to appropriate schedules. Taxes collected on other dutiable commodities under the revenue acts and the Sugar Act of 1937 are included in appropriate schedules.

Estimated Receipts from Taxes Imposed by Various Revenue Acts
on Imports into the United States

Note: Figures in this and four preceding tables are rounded to nearest tenths of millions and will not necessarily add to totals.

1/ Includes only expenditures from appropriations made specifically for administrative expenses relating to the Social Security and Railroad Retirement Acts. Does not include administrative expenses payable from other appropriations. The principal agencies in the latter group are the Bureau of Internal Revenue of the Treasury Department, and the Public Health Service and the Office of Education of the Federal Security Agency.

2/ Second Deficiency Appropriation Act, fiscal year 1938, approved June 25, 1938, carried an appropriation of \$40,561,886.43, pursuant to authorization of August 24, 1937, for making refund to certain States of portions of Federal employers' tax for 1936 collected under Title IX of the Social Security Act. Other refunds are on account of Employment taxes (Title VIII) and tax on employers of 8 or more (Title IX, Sec. 901) "Other than to States."

3/ Under Section 201 (f) of the Social Security Act amendments of 1939.

4/ Includes balance of appropriation available for transfers.

5/ Includes in 1938 the proceeds of refunds to States of taxes collected under Title IX, Sec. 901 of the Social Security Act, amounting to \$40,561,886.43.

6/ Advanced to Railroad Unemployment Insurance Account, pursuant to Section 10 (4) of the Railroad Unemployment Insurance Act of June 25, 1938. Such amounts advanced to be repaid on or before January 1, 1941.

7/ Receipts exclude transfers from States. Expenditures exclude those items which are transferred to Railroad Unemployment Insurance Account. For details see Treasury daily statement for 10th of month.

8/ Transfers from general fund were not reflected until July 1, 1937.

9/ Includes balance of appropriation available for transfers subsequent to June 30, 1937.

* Excess credit.

Internal Revenue...	4	5/	5/	5/	-	2,000	8,000

^{1/} Internal Revenue cases are those referred by the Penal Division to the Department of Justice with recommendation for criminal prosecution.

^{2/} Includes cases transferred to state, local, or other authorities for prosecution and cases closed because of duplicate prosecutions. These cases are not included in calculating percentages.

^{3/} Cases in which no arrests were made are not included in calculating percentages.

^{4/} Cases disposed of by lunacy hearings not included in calculating percentages.

^{5/} Too few cases to show comparative percentages.

^{6/} Percent probated based on cases in which a suspended or probationary sentence only was imposed.
