Treasury Financing Operations

\$17.3 Billion Bond and Note Refunding

On November 18, 1954, the Treasury Department announced that in exchange for its three December bond and note maturities (including the 2 percent bonds of 1951-55 called for redemption on December 15, 1954) it would offer on November 22 three securities: 8-year and 8-month 2-1/2 percent Treasury bonds, one-year 1-1/4 percent certificates of indebtedness, and an additional amount of 1-1/8 percent certificates of indebtedness, Series D-1955, which will mature in August 1955. Holders of the maturing issues were given the option of subscribing for any or all of the securities offered and exchanges were made par for par. The subscription books were closed at the close of business on November 24.

Exchanges amounted to \$17.0 billion, more than 98 percent of the total, leaving \$316 million to be paid in cash. The results of the refinancing are summarized in the following table.

The 1-1/4 percent certificates, Series E-1955, are dated December 15, 1954, and bear interest at the rate of 1-1/4 percent per annum, payable at their maturity on December 15, 1955. They were issued in bearer form only, in the same denominations as the new bonds except that the denomination of \$500 was not made available.

The additional amount of the 1-1/8 percent certificates, Series D-1955, are part of the series first issued in August 1954 (with which they are freely interchangeable) and are identical except for authorization of their issuance in the two additional denominations of \$100,000,000 and \$500,000,000. These certificates are dated August 15, 1954, and bear interest at the rate of 1-1/8 percent per annum, payable at their maturity on August 15, 1955. For exchange into this issue, the full six months' interest due on December 15, 1954, on the securities surrendered was credited,

^{1/} Owned by reporting commercial banks and Federal Reserve Banks. The ownership figures for September 30 are the latest published for holdings of commercial banks reporting to the Treasury on the ownership of Government securities.

The new bonds are dated December 15, 1954, and bear interest from that date at the rate of 2-1/2 percent per annum, payable on a semiannual basis on August 15, 1955, and thereafter on February 15 and August 15 in each year until the principal amount becomes payable at maturity on August 15, 1963. They were issued in registered and coupon form, in denominations of \$500, \$1,000, \$5,000, \$10,000, \$100,000, \$1,000,000, \$100,000,000, and \$500,000,000.

accrued interest from August 15 to December 15 on the new certificates was charged, and the subscribers were paid the difference.

Call before Maturity

On November 15, 1954, the Treasury Department issued notice that the 2-7/8 percent Treasury bonds of 1955-60, dated March 15, 1935, due March 15, 1960, are called for redemption on March 15, 1955, when

interest on these bonds will cease. There are \$2,611 million of the issue outstanding.

The announcement stated that holders may, in advance of the redemption date, be offered the privilege of exchanging all or any part of their called bonds for other interest-bearing obligations of the United States, in which event public notice will be given.

Treasury Bills Refunded

November maturities of Treasury bills amounting to \$6.0 billion were refunded in full by four weekly issues of approximately \$1.5 billion each. New 91-day bills, dated November 4 and 18, refunded like maturities and new 90-day bills, dated November 12 and 26, refunded maturing 92-day bills. The average rates of discount on the new issues were 1.023 percent for November 4; 0.940 percent for November 12; 0.931 percent for November 18; and 0.897 percent for November 26.

Note: Details of Treasury market financing operations are shown elsewhere in this issue of the "Treasury Bulletin", in the tables on "Offerings" and "Dis-

position", respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills".

BUDGET RECEIPTS AND EXPENDITURES

Footnotes to Tables 1 through 5

- 1/ For further detail, see tables under "Internal Revenue Collections."
- 2/ Breakdown was not made in the Daily Treasury Statement for years prior to 1954.
- 3/ Beginning January 1951, the distribution of receipts between individual income taxes and old-age insurance taxes is made in accordance with provisions of Sec. 109 (a) (2) of the Social Security Act Amendments of 1950, for appropriation to the Federal Old-Age and Survivors Insurance Trust Fund (see footnote 9).
- 4/ Taxes on employers and employees under the Federal Insurance Contributions Act, as amended (26 U.S.C. 1400-1432) and, beginning with the taxable year 1951, tax on self-employed individuals under the Self-Employment Contributions Act (26 U.S.C. 480-482).
- 5/ Taxes on carriers and their employees under the Carriers Taxing Act, as amended (26 U.S.C. 1500-1503).
- 6/ Tax on employers of 8 or more under the Federal Unemployment Tax Act, as amended (26 U.S.C. 1600-1611).
- 7/ As announced February 17, 1954 (see April 1954 "Treasury Bulletin", page A-2). See also page 1, footnote 6. Final figures for the fiscal years 1953 and 1954 are shown in this issue of the Bulletin.
- 8/ Includes proceeds from sale of surplus property and from Government-owned securities; escheat; deposits resulting from renegotiation of war contracts (see "Treasury Bulletin" for February 1948, page 5); and railroad unemployment insurance contributions for administrative expenses through 1953, after which they are carried as trust account receipts under the Railroad Retirement Board.
- 9/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance (42 U.S.C. 401 (a)). The Social Security Act Amendments of 1950, approved August 28, 1950 (64 Stat. 477), changed in certain respects the basis of transferring the appropriated funds to the trust fund. Beginning January 1951, the amounts transferred currently as appropriations to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury pursuant to the provisions of Sec. 109 (a) (2) of the Amendments of 1950, and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.
- 10/ Excludes the Government's contribution for creditable military service under the act of April 8, 1942 (56 Stat. 204). Beginning 1952, amounts are appropriated to the Railroad Retirement Tax Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscal year (65 Stat. 222 and 66 Stat. 371), and transfers are made currently. Previously, annual appropriations were based, in effect, on estimated tax collections, with any necessary adjustments made in succeeding appropriations.
- 11/ Interest on refund is included in Table 5 under "Other".
- 12/ Expenditures are "net", after allowance for reimbursements to appropriations, receipts of revolving fund appropriations, and receipts credited to disbursing accounts of corporations and agencies having authority to use collections without formal covering into the Treasury. The figures include transfers to trust accounts. They exclude net investments of wholly owned Government corporations and agencies in public debt securities beginning 1951 (when these investments were grouped with those of trust funds and accounts), and public debt retirements chargeable to the sinking fund, etc., under special provisions of law. Payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and disposition of earnings are excluded from both receipts and expenditures. Further information on these capital transfers may be found in the 1953 Annual Report of the Secretary of the Treasury, page 332.
- 13/ Beginning November 1949, interest on the public debt is reported as an expenditure when such interest becomes due and payable, as distinguished from the previous practice of showing the expenditure on the basis of interest paid by the Treasurer of the United States.
- 14/ Consists of Veterans' Administration expenditures, including the direct loan program.
- 15/ Includes transactions relating to the Foreign Economic Cooperation Trust Fund (see page 1).
- 16/ Net transactions by the Departments of the Air Force and the Army relating to "Deposit fund accounts" are included under "Trust Account and Other Transactions" instead of "Budget Receipts and Expenditures" beginning 1952.
- 17/ Includes interest on refunds of taxes and on uninvested trust funds, for which separate estimates are not available.
- 18/ Includes retired pay for the military services beginning September 1949.
- 19/ Excludes certain expenditures made on behalf of the Department of the Air Force out of appropriations to the Department of the Army.
- 20/ Includes certain expenditures on behalf of the Department of the Air Force (see footnote 19).
- 21/ Consists of expenditures from funds appropriated to the President under the Mutual Security Act, approved October 10, 1951 (22 U.S.C. 1651), and the preceding Economic Cooperation Act; and Greek-Turkish assistance.
- 22/ Consists of expenditures of the Atomic Energy Commission.
- 23/ Consists of payments under the Armed Forces Leave Act, expenditures for surplus property disposal, and in 1947 also national defense expenditures of the Reconstruction Finance Corporation and certain other agencies.
- 24/ Excludes Bank expenditures under the Mutual Security Act and the preceding Economic Cooperation Act of 1948, as amended.
- 25/ Consists of expenditures from funds appropriated to the President under the Mutual Security Act, and the preceding Economic Cooperation Act.
- 26/ Consists of expenditures under the Bretton Woods Agreements Act (1947); credit to the United Kingdom (1947 and 1948); expenditures of the United Nations Relief and Rehabilitation Administration; relief to countries devastated by war; various other foreign relief programs; international children's emergency funds; and loan for construction and furnishing of United Nations Headquarters.
- 27/ Expenditures for this purpose by the Department of State are included under "Department of State" in this table; expenditures by other agencies, no longer shown separately in monthly reports to the Treasury, are not included in this table.
- 28/ Consists of expenditures of the Department of Health, Education, and Welfare except the Office of Education, and of the corresponding component organizations prior to the establishment of this department on April 11, 1953; the Government's contribution under the Railroad Retirement Act for creditable military service and certain other Railroad Retirement Board expenditures through 1953; and also, beginning 1950, the school lunch program under the Department of Agriculture.
- 29/ Consists of expenditures of the Housing and Home Finance Agency, and of component organizations prior to the establishment of this agency on July 27, 1947; Federal Civil Defense Administration; and disaster relief.
- 30/ Consists of expenditures of the Department of Agriculture except the Forest Service and the school lunch program; and of the Farm Credit Administration.
- 31/ Consists of expenditures of the Department of the Interior; the Tennessee Valley Authority; the Corps of Engineers in the Department of the Army (river and harbor works and flood control); and the Forest Service in the Department of Agriculture.
- 32/ Consists of expenditures of the Civil Aeronautics Administration, Civil Aeronautics Board, Maritime activities and predecessor agencies, and Bureau of Public Roads, all now in the Department of Commerce; the Coast Guard in the Treasury Department; and the Post Office Department. Figures prior to 1954 are revised in this issue to include net expenditures of certain working funds of the Department in addition to the Postal Service Fund (advances to cover the postal deficit). In the final figures for the fiscal year 1954, net expenditures of the Department, including the Postal Service Fund, are on the basis of cash receipts and expenditures recorded in the accounts of the Department, which is consistent with the basis for other agencies of the Government. The same basis will be continued in subsequent years, but for the fiscal year 1955 to date no expenditures are included for the Post Office Department, pending completion of reporting arrangements now in progress.
- 33/ Consists of expenditures of the Department of Commerce except those included under "Transportation and communication"; the Reconstruction Finance Corporation (as in liquidation by the Treasury Department beginning July 1954); Federal Facilities Corporation beginning July 1954; the Small Business Administration; the Economic Stabilization Agency; and funds appropriated to the President for the expansion of defense production.
- 34/ Includes expenditures for executive departments and other agencies not included elsewhere and for legislative and judicial functions. The National Advisory Committee for Aeronautics, formerly included in Table 3, is now included here instead of under "Transportation and communication" in Table 5 because expenditures are no longer shown separately in monthly reports to the Treasury.

TREASURY CASH INCOME AND OUTGO

The cash income and outgo of the Treasury shown in Table 1 consist of cash deposits and withdrawals in the account of the Treasurer of the United States. This is in line with the new reporting basis of the "Daily Statement of the United States Treasury". Effective February 17, 1954, the Daily Treasury Statement shows deposits and withdrawals in the account of the Treasurer of the United States. Budget results and trust account and other transactions are now reported once each month in the "Monthly Statement of Receipts and Expenditures of the United States Government" (see page A-2 in the April 1954 issue of the "Treasury Bulletin").

Figures for previous fiscal years heretofore published have been revised to the basis of deposits and withdrawals by eliminating corporation and agency transactions included in the old Daily Statement but not cleared through the Treasurer's account. The cash borrowing or repayment of borrowing as now shown is likewise based only on transactions cleared through the Treasurer's account.

In Tables 2, 3, and 4 is given the reconciliation of the cash transactions with the budget and other transactions which formerly appeared in the old Daily Statement and now appear in the new Monthly Statement. These tables

follow the method used previously for deriving cash income and outgo from the transactions carried in the old Daily Statement. Some rearrangement has been made in the table setup, principally to combine all receipts and all expenditures instead of deriving separately the cash budget and trust account transactions.

Reporting bases for the two statements differ in two respects. Certain corporation and agency transactions in securities which are not effected through the account of the Treasurer of the United States are included in the Monthly Statement but excluded from the Daily Statement. These are eliminated from the Monthly Statement figures in arriving at the cash transactions shown in the tables which follow. Other differences arise because of the differences in timing, as between checks issued (Monthly Statement) and checks paid (Daily Statement) for expenditures or between collections (Monthly Statement) and clearances (Daily Statement) for receipts. Thus an individual transaction near the end of a month may be included during that month in one statement but not until the following month in the other. These differences tend to correct themselves over a period of time, but for a given reporting date it is necessary to include an adjustment figure to cover them.

Source: Actual figures through 1953 on the old basis are based on the old Daily Treasury Statement; actual figures on the new reporting basis are based on the New Daily Treasury Statement, except the memorandum item, which is from the new "Monthly Statement of Receipts and Expenditures of the United States Government"; estimates are based on the "Review of the 1955 Budget", released September 14, 1954.

1/ Consists of seigniorage on silver and increment resulting from reduction in weight of the gold dollar. This item is part of the cash budget receipts shown in these tables, but is excluded from the Bureau

of the Budget figures for "Receipts from the public".
2/ In addition to this decrease in the balance in the Treasurer's account, the Exchange Stabilization Fund was drawn down by \$1,800 million for subscription to the capital of the International Monetary Fund.

3/ For explanation, see headnote. Final figures for the fiscal years 1953 and 1954 are shown in this issue of the Bulletin.

Source: Actual figures through 1953 on the old basis are based on the old Daily Treasury Statement; actual figures on the new reporting basis are based on the new "Monthly Statement of Receipts and Expenditures of the United States Government"; estimates are based on the "Review of the 1955 Budget", released September 14, 1954. The Monthly Statement figures for a given month appear in the Bulletin issued following that which carries corresponding Daily Statement figures in Table 1.

1/ For further detail, see "Budget Receipts and Expenditures", Table 1.
2/ Figures have been revised to treat appropriations of receipts to the Railroad Retirement Account as deductions from receipts instead of transfers to trust accounts.

3/ Deduction from budget receipts of the tax refunds represented by these bonds is treated as a noncash deduction at the time of issuance of the bonds and as a cash deduction at the time of redemption of the bonds (see Table 4); net issuance, or redemption (-).

4/ See Table 1, footnote 3.

5/ By Federal Old-Age and Survivors Insurance Trust Fund through October 1948. Thereafter includes also reimbursements from the District of Columbia, etc.

6/ Includes proceeds of ship sales carried in trust accounts pending allocation to budget receipts from sale of surplus property, transfers between trust accounts, and payment of earnings or repayment of capital stock to the Treasury by corporations not wholly owned. Figures for 1947 and 1948 include \$53 million and \$8 million, respectively, of armed forces leave bonds redeemed for insurance premiums; after August 31, 1947, these bonds were redeemable for cash.

7/ For explanation, see headnote. Excess of receipts on Monthly Statement basis is deducted.

* Less than \$500,000.

- 1/ Accrued discount on savings bonds and bills less interest paid on savings bonds and bills redeemed.
- 2/ The issuance of these securities is treated as a noncash budget expenditure at the time of issuance and as a cash budget expenditure at the time of cash redemption; net issuance, or redemption (-).
- 3/ See Table 3, footnote 3.
- 4/ The issuance of these securities is treated as a noncash deduction from budget receipts at the time of issuance and as a cash deduction at the time of cash redemption; net issuance, or redemption (-).
- 5/ Net investments of Government agencies in public debt securities and

net sales of obligations of Government agencies in the market.

6/ Includes borrowing through Postal Savings System.

7/ See Table 1, footnote 3.

8/ Breakdown not available between net investments in public debt securities and net sales of obligations of Government agencies in the market. (See Table 3). The combined effect in Table 4 is represented by a deduction of \$2,480 million from total net borrowing through public debt operations.

Footnotes to Table 3

- 1/ For further detail, see "Budget Receipts and Expenditures", Table 2.
- 2/ Includes net investments of Government agencies in public debt securities and net redemptions in the market of securities of Government agencies (see "Trust Account and Other Transactions", Table 1).
- 3/ The United States subscription to the capital of the International Monetary Fund was paid in part from the Exchange Stabilization Fund (see Treasury Bulletin for September 1947, page 17).
- 4/ Accrued discount on savings bonds and bills less interest paid on savings bonds and bills redeemed.
- 5/ Prior to 1951, consists of net investments of corporations not wholly owned; beginning with that year, includes also those of wholly owned corporations and agencies which for prior years are included in budget expenditures.
- 6/ See Table 1, footnote 3.
- 7/ Treated as noncash expenditures at the time of issuance and as cash expenditures at the time of redemption; net issuance, or redemption (-).
- 8/ For explanation, see headnote. Excess of expenditures on Monthly

Statement basis is deducted.

9/ As shown in the "Monthly Statement of Receipts and Expenditures of the United States Government"; consists of changes in checks and interest coupons outstanding and telegraphic reports from Federal Reserve Banks, and beginning with the fiscal year 1954, also changes in deposits in transit and cash held outside the Treasury.

10/ Net investments of Government agencies in public debt securities and net redemptions of obligations of Government agencies in the market.

11/ Since deposit funds (net) are included under trust account expenditures, the interest received by corporations not wholly owned is carried there as a negative expenditure. Thus when budget expenditures and trust account expenditures are combined, the payment and receipt of this interest offset each other. Payment of interest to wholly owned Government corporations is offset because it is treated as a negative budget expenditure when received by the corporations.

* Less than \$500,000.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between March 1935 and the end of April 1941, and Series E, F, and G were first offered in May 1941. When Series E began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redeem the bonds in cash in accordance with the original terms; to retain them with an extended maturity of 10 years at specified rates of interest accrual; or to exchange them for Series G bonds. A number of changes became effective May 1, 1952. The principal ones were: The rate of interest accrual on Series E was increased, especially for the near term, with corresponding changes in extended Series E; and Series F and G were replaced by two new issues, Series J and K, also at higher interest rates. A new new current-income bond, Series H, similar in interest return to Series E, was offered beginning June 1. For

details of these changes see "Treasury Bulletin" for May 1952, page A-1. Series F and G began to mature on May 1, 1953. For the exchange offering made to holders of these bonds maturing through December 31, 1953, see the May 1953 issue, page A-1. The Treasury invited holders of Series F and G which began to mature in January 1954 to reinvest the proceeds in other series of savings bonds. In the tables which follow, Series A-F and J sales are included at issue price and total redemptions and amounts outstanding at current redemption values. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured F and G bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the "Treasury Bulletin".

2/ Includes exchanges of matured Series E bonds for Series G bonds beginning May 1951 and for Series K bonds beginning May 1952.

3/ Includes both matured and unmatured bonds; see Table 4.

4/ Includes total value of redemptions not yet classified between matured and unmatured bonds.

5/ A change in procedure, beginning in June 1954, for processing redeemed savings bonds has resulted in a high level of redemptions not yet classified between matured and unmatured bonds. This increase tempo-

rarily obscures the relationship between the redemption columns showing sales price and accrued discount in Tables 2 through 4 and also the relationship between the matured and unmatured sections of Table 4. (See also footnote 4.) The subsequent distribution of this high level of unclassified redemptions may be large enough in any month to show redemptions of matured bonds for a series in Table 4 which are greater than the total redemptions of that series as shown in Table 3.

6/ Sales began June 1, 1952.

7/ Comparable data are not available prior to January 1950.

8/ Includes exchanges of Series 1941 F and G savings bonds for Treasury 3-1/4% bonds of 1978-83.

* Less than \$500,000.

TREASURY SAVINGS NOTES

Treasury tax and savings notes have been issued as follows: Tax Series A from August 1, 1941, through June 22, 1943; Tax Series B from August 1, 1941, through September 12, 1942; Savings Series C (originally designated Tax Series C) from September 14, 1942, through August 31, 1948; Savings Series D from September 1, 1948, through May 14, 1951; Savings Series A from May 15, 1951, through May 14, 1953; Savings Series B from May 15, 1953, through September 25, 1953; and a new Savings Series C from October 1, through October 23, 1953, when sale of these notes was suspended. Details concerning terms and conditions for purchase and redemption and information on investment yields of Savings Series C appear in the October 1953 issue of the "Treasury Bulletin", page A-1.

Similar information with respect to the offering of the earlier series was published currently in the "Treasury Bulletin", and appears also in the "Annual Report of the Secretary of the Treasury" for appropriate years.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

^{1/} Includes certain obligations not subject to statutory debt limitation. For amount subject to limitation, see page 1.

^{2/} Excludes trust departments.

^{3/} Includes trust companies and, beginning with figures for July 1949, also includes stock savings banks. Formerly these banks were shown as a separate classification, but they are no longer so reported.

^{4/} Includes those banks and insurance companies not reporting in the Treasury Survey.

^{5/} Consists of corporate pension trust funds and profit sharing plans which involve retirement benefits. The data are compiled from quarterly reports by trustees of funds which account for an estimated three-fourths of United States Government securities held by all corporate pension trust funds. Since the data are not available each month, the regular monthly Survey includes holdings by these funds under "Held by all other investors". The quarterly data are presented as supplemental information in a memorandum column accompanying the Survey for each reporting date, beginning with December 31, 1953. The corresponding information from earlier reports, beginning with December 31, 1949, is summarized on page 30 of the March 1954 "Treasury Bulletin".

^{6/} United States saving bonds, Series E, F, and J, are shown at current redemption value. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption value for use in this statement.

^{7/} Holdings by reporting agencies not available.

^{8/} Excludes guaranteed securities held by the Treasury.

^{9/} Issues which commercial banks may not acquire prior to specified dates (with minor exceptions); see "Debt Outstanding and Treasurer's Account", Table 2, footnote 1.

^{10/} Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly" tax-exempt securities are those with the income exempt from both normal tax and surtax. "Partially" tax-exempt securities are those with the income exempt from the normal tax except that in the case of partially tax-exempt Treasury bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to normal tax and surtax.

^{11/} Includes Federal Housing Administration debentures; see footnote 12.

^{12/} A small indeterminate amount of those debentures is partially tax-exempt.

^{13/} Includes \$114.4 million depository bonds held by commercial banks not included in the Treasury Survey.

^{14/} The proprietary interest of the United States in these banks ended in July 1951.

^{15/} Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in these banks ended in June 1947.

* Less than \$500,000.

MARKET QUOTATIONS ON TREASURY SECURITIES, OCTOBER 29, 1954

Current market quotations shown here are over-the-counter closing bid quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York. The securities listed include all regularly quoted

public marketable securities issued by the United States Government except Panama Canal bonds. Outstanding issues which are guaranteed by the United States Government are excluded because they are not regularly quoted in the market.

^{1/} Tax Anticipation Series.^{2/} Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows in case of recurrence are the latest dates.^{3/} Excess of price over zero yield.^{4/} Called on August 12, 1954, for redemption on December 15, 1954.^{5/} Yield to maturity. Yields are computed to call date when the price is above par and to maturity when the price is at or below par.^{6/} Included in the average of taxable Treasury bonds due or callable from 12 to 20 years beginning April 15, 1953; as shown under "Average Yields of Long-Term Bonds".^{7/} First quoted April 15, 1953. This issue is listed under a new long-term taxable Treasury bond class due or callable 20 years and after as shown under "Average Yield of Long-Term Bonds".^{8/} For definition, see "Debt Outstanding and Treasurer's Account", Table 2, footnote 1.

YIELDS OF TAXABLE TREASURY SECURITIES, OCT. 29, 1954

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange after has been made or which are due or callable in less than 3 months are excluded.

- ^{1/} Excludes collections for credit to certain trust accounts for island possessions; includes corporation income tax on Alaska Railroad (repealed by Public Law 386, approved June 10, 1952, for taxable years ending after that date).
- ^{2/} Includes excess profits taxes on Army and Navy contracts imposed by the Vinson Act as amended (34 U.S.C. 496), and income tax on business income of exempt organizations imposed by the Revenue Act of 1951, approved October 20, 1951.
- ^{3/} Includes old-age insurance tax on self-employment income, imposed by the Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950. The tax is levied and collected as part of the individual income tax beginning with the taxable year 1951. For estimated fiscal year breakdown, see Table 1.
- ^{4/} Beginning January 1951, withheld income tax and social security employment taxes on employers and employees are paid into the Treasury in combined amounts, pursuant to the Social Security Act Amendments of

1950. For estimated fiscal year breakdown, see Table 1.

- ^{5/} Under revised accounting procedures effective July 1, 1954, tax payments made to banks under the depository receipts system are included in Internal Revenue Service reports of collections in the month in which the depository receipts are issued instead of the month in which tax returns supported by the depository receipts are received in internal revenue offices, as was the previous practice. The "Undistributed depository receipts" included in the collections represent the amount of depository receipts issued during the period less the amount received with returns. In the case of excise taxes, it is not possible to classify the depository receipts by type of tax until the returns are received. Accordingly, the amount of such undistributed depository receipts is included only in the total of excise taxes.
- ^{6/} Collections in fiscal year 1954 are not comparable month by month with those in the prior year because of the institution of quarterly returns, effective with the quarter beginning July 1953.
- ^{7/} Applies to diesel oil used in highway vehicles.
- ^{8/} See Table 1, footnote 2.
- ^{9/} New reporting basis; for explanation, see footnotes on page 1.
- * Less than \$500.

CAPITAL MOVEMENTS

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information covering the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin". Supplementary information is published at less frequent intervals. Reports by banks, bankers, securities brokers and dealers, and industrial and commercial concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. Beginning April 1954, data reported by banks in the Territories and possessions of the United States are included in the published data.

The term "foreigner" as used in these reports covers all institutions and individuals domiciled outside the United States and its Territories and possessions, the official institutions of foreign countries, wherever such institutions may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 issue of the "Treasury Bulletin", pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

The first three sections which follow are published monthly. They provide summaries of the principal data

by periods and by countries and present detailed breakdowns of the latest available preliminary data.

Section IV provides supplementary data which appear at less frequent intervals. The five tables included in this section, under the revised presentation begun in the June 1954 issue of the Bulletin, and the dates of their publication are as follows:

Table 1.- Short-term foreign liabilities and claims reported by nonfinancial concerns - published quarterly beginning July 1954 - previously published October 1949 and 1950, July 1951, 1952, and 1953.

Table 2.- Long-term foreign liabilities and claims reported by banks and bankers - published quarterly beginning June 1954 - previously published December 1949 and 1950, June 1951, 1952, and 1953.

Table 3.- Estimated gold and short-term dollar resources of foreign countries - beginning June 1954, published quarterly.

Table 4.- Foreign credit and debit balances in brokerage accounts - published semiannually beginning September 1954 - published as part of regular monthly series through May 1954.

Table 5.- Short-term liabilities to foreigners in countries and areas not regularly reported separately by banking institutions - published annually since April 1950.
