1/ Beginning July 1940, amounts representing appropriations equal to collections of Social Security taxes under the Federal Insurance Contributions Act for old-age insurance (less reimbursements to the General Fund of the Treasury for administrative expenses) have been deducted from total budget receipts in the Daily Treasury Statement to arrive at a figure called net receipts. Such deduction items are reflected under trust account receipts as net appropriations to the Federal Old-Age and Survivors Insurance Trust Fund. In the above statement, similar treatment has been accorded net transfers to the Federal Old-Age and Survivors Insurance Trust Fund (formerly Old-Age Reserve Account) made during the fiscal years 1936 to 1940, in order to facilitate comparison with later periods.
2/ Excludes public debt retirements.
3/ Total expenditures less net receipts.

Basis of Computation: (1) Treasury bond yields are computed on the basis of the mean of bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Back Figures: See "Treasury Bulletin" for July 1941, pages 21-26, and subsequent issues.

Back Figures: Annual Report of the Secretary of the Treasury for 1941.

1/ The "total amount outstanding" of the several issuers differs from the gross indebtedness of these issuers in that the former excludes non-interest-bearing debt. The "total privately-held securities" differs from the net indebtedness of the borrowers in several additional respects. The former is derived by deducting from the total amount of interest-bearing securities outstanding, the amount of all securities held by the United States Government, Federal agencies, Federal Reserve Banks, and by all public sinking, trust, and investment funds. Net indebtedness, on the other hand, is derived by deducting from the gross indebtedness an amount equivalent to the total volume of sinking fund assets of the respective borrowers, but makes no allowance for any other public assets.

2/ Securities the income from which is exempt from both the normal rates and the surtax rates of the Federal income tax.

3/ Securities the income from which is exempt only from the normal rates of the Federal income tax. In the case of partially tax-exempt Treasury bonds and United States savings bonds, interest derived from $5,000 aggregate principal amount owned by any single holder is exempt from the surtax rates as well as the normal rates of the Federal income tax.

4/ Securities the income from which is subject to both the normal rates and the surtax rates of the Federal income tax.

5/ Includes Exchange Stabilization Fund.

6/ This figure is taken from Treasury Form 774, "Statement of the Public Debt of the United States". It differs from the corresponding figure in the Daily Treasury Statement which is used elsewhere in the "Treasury Bulletin" by including certain items in transit.

7/ Includes $302 millions of guaranteed obligations sold directly to the Treasury, and $8 millions of Tennessee Valley Authority bonds issued "on the credit of the United States" and held by the Reconstruction Finance Corporation.

8/ Includes bonds of joint stock land banks, the only Federal instrumentalities which are not Federal agencies but which have tax-exempt securities outstanding.

2/ Comprises cases transferred to state, local, or other authorities for prosecution and cases closed because of duplicate prosecutions.
3/ Cases "otherwise disposed of" consist of Customs and Narcotics cases in which no arrests were made and Secret Service cases which were disposed of by lunacy hearings.
4/ Insufficient cases to warrant showing comparative percentages.
5/ Percentages do not add to 100 because a single conviction may involve more than one type of sentence.
6/ Alcohol Tax Unit figures are based on cases in which a suspended or probationary sentence only was imposed.
