TREASURY ISSUES

The Role of Saving in a Dynamic U.S. Economy

The following paper summarizes a range of background material prepared for the administration's Economic Policy Council in 1989, when saving and investment issues were being examined. Statistical material has been updated to reflect the 1990 revisions to the National Income and Product Accounts.

Why Saving is Important

The United States faces three major economic challenges for the future: We must maintain the strong growth that has characterized the economic expansion of the past 7-1/2 years; we must be able to compete successfully in an increasingly integrated world economy; and we must prepare for the coming "demographic twist," when the large baby-boom population moves out of the workforce and into retirement, leaving a smaller working-age population to support economic growth.

The key to addressing these challenges successfully is to improve the productivity performance of the United States. A higher rate of national saving is a crucial component of that effort.

Productivity, or the output per unit of labor input, is what shapes our standard of living. Primary among the factors that determine productivity growth is the rate of investment--in capital equipment, technology, and human resource development. Saving provides the funds to support that investment. To improve the rate of investment, and thereby productivity growth, saving should be raised. The basic issue is one of reallocating resources away from current consumption and toward investment in the future. Evidence of the relationship between a nation's rate of saving and its growth of productivity is shown in exhibit 1.

The Historical Record

National saving as a share of gross national product has generally been stable throughout most of this century. The major exceptions were during the Depression and World War II. (See exhibit 2.) Over the past decade there has been a downward trend in the U.S. saving rate, associated with the inflow of foreign capital to maintain even the current inadequate rate of investment. The national saving rate has fallen from an average of 16.4 percent from 1950 to 1979 to 14.1 percent during the past decade. In the first quarter of 1990, the rate was only 12.4 percent. There is a well-founded consensus that the United States needs to save more.

Not only is the recent performance of U.S. saving low in historical perspective, it is poor in comparison with foreign countries. According to a recent Organization for Economic Cooperation and Development calculation, during the period 1981 to 1988, the United States gross national saving rate

ranked 18th out of 21 major countries, while the U.S. net national saving rate ranked last.

Components of Saving

National saving is the sum of government, household, and business saving. Total national saving must be raised to influence investment. Different factors affect saving in each sector, leading to different trends in recent years.

Most of the decline in the national saving rate that occurred during the past decade represented increased dissaving in the government sector due to the growing Federal deficit. The Federal deficit widened from an average of 1.7 percent of GNP in the 1970s to 3.7 percent during the 1980s. State and local governments have generally run a surplus due to pension fund balances. The Federal deficit has narrowed substantially from close to 5 percent in the mid-1980s to about 3 percent in the first quarter of this year, but deterioration in other components of saving (including deficits in the operating accounts of State and local governments) has caused the national saving rate to remain low.

The personal saving rate (saving as a share of after-tax income of households) was also a major source of the weakness in national saving during the past decade. The personal saving rate has fallen from an average of 7.2 percent in the 1950 to 1979 period to a post-Depression low of 2.9 percent by 1987. Personal saving has since risen to 5 percent of disposable personal income in early 1990 but still remains well below the long-term average, as shown in exhibit 3.

Business saving--undistributed profits and depreciation--accounts for more than three-fourths of private saving, with depreciation contributing by far the largest part. Although retained earnings declined from an average of 2.5 percent of GNP in the 1970s to 1.7 percent during the 1980s, depreciation allowances increased from 9.6 percent to 11.1 percent over that span, causing total business saving to advance.

A saving concept net of depreciation would be theoretically preferable to the gross business saving figures cited above since depreciation represents saving for replacement, rather than expansion of capital. Because of difficulties in properly measuring depreciation, and because depreciation is frequently used to replace worn-out capital with more productive assets, the gross saving figures are probably the

ECONOMIC POLICY

more relevant measures of saving from a practical point of view.

On balance during the past decade, the combination of the large government deficit claims and lower personal saving rates has reduced the national saving rate well below the historical pace.

Foreign saving has augmented the declining pool of national saving. During the years 1950 through 1979, Americans invested the equivalent of 0.3 percent of our GNP abroad on average, building up a large creditor position which provided us with considerable interest and dividend income. During the 1980s this situation was reversed. U.S. borrowing from abroad far exceeded our investment there, so that on average we were net borrowers of amounts equivalent to 1.6 percent of GNP.

Determinants of Saving

The saving behavior of the different sectors of the economy reflects responses to factors important to the individual sectors.

Personal saving provides resources to finance retirement, to ensure against bad times, to purchase big-ticket items, and to leave a bequest. The major factors affecting saving include the expected length of retirement, the rate of return on saving, other sources of retirement income (e.g., Social Security), and uncertainty about costs during retirement.

Tax policy affects personal saving by altering the after-tax returns to saving. A reduction in the tax on capital gains increases the rate of return and, therefore, should increase saving. Similarly, the President's proposal for Family Savings Accounts would also promote saving by eliminating tax on returns to saving held longer than 7 years.

Business saving is driven largely by the incentive to finance investment internally rather than externally. Therefore, it is responsive to tax policy toward capital gains, dividends, and interest.

- Reducing capital gains taxes would increase equity finance and reduce debt finance. It would also increase the incentive to retain earnings. Both effects imply that lower capital gains taxes will raise business saving.

- Reducing taxes on dividends also would increase

equity finance and cause business saving to rise if some of the additional equity earnings were retained.

Government saving can be increased by reducing the budget deficit and, perhaps, eventually running a budget surplus. Given the importance of government saving, this is the single most effective and direct way to raise national saving. To raise national saving, however, deficit reduction cannot rely on policies that reduce private saving or government infrastructure investments. Therefore, deficit reduction efforts should be concentrated first of all on lowering government consumption, rather than increasing tax rates. Reduced government consumption would free up more resources for productive private sector investment--the ultimate goal of higher national saving.

Consequences of the Low U.S. Saving Rate

The low saving rate in the United States creates the risk that our future standard of living will be curtailed if we fail to provide the resources needed to meet important investment goals. Low saving increases the cost of capital in the United States, which restricts investment. The lack of domestic savings has caused the United States to rely on borrowing from foreign investors to support public and private consumption, as well as investment. Over time, the earnings on investment made by foreigners will flow overseas, rather than being returned to the U.S. economy. Already, the imbalance on our current account has created pressure for protectionism at home.

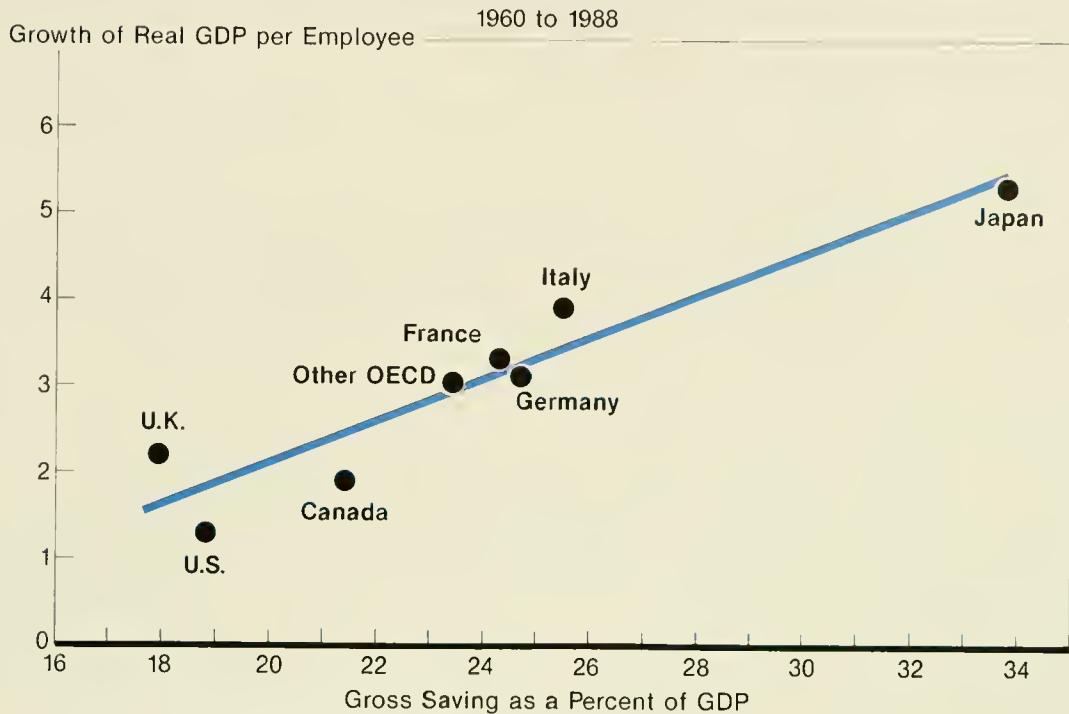

Preparation for a changing world economy and the future needs of an aging population requires more investment in modern plant and equipment, more investment in technology, and more investment in our people.

The implications for the future are clear: We should allocate more of our national resources to saving and investment priorities. Preparation for a changing world economy and the future needs of an aging population requires more investment in modern plant and equipment, more investment in technology, and more investment in our people. ◇

TREASURY ISSUES INDEX

Previous articles appearing in the "Treasury Issues" section of the *Treasury Bulletin* are listed below by title, issue, and page number.

DOMESTIC FINANCE

"Issues in the Securities and Futures Markets." Glauber, Robert R. June 1990, pp. 3-6.

A discussion on regulatory fragmentation and related issues in the securities and futures markets, stressing the importance of integrating the U.S. fragmented system so as to gain significant benefits in innovation, enforcement, coordinated market mechanisms, and globalization.

ECONOMIC POLICY

"Direct Revenue Effects of Capital Gains Taxation: A Reconsideration of the Time-Series Evidence, The." Darby, Michael R., Robert Gillingham, and John S. Greenlees. June 1988, pp. 2-2.8.

A report presenting results that indicate the time-series data, like the cross-section data, provide considerable evidence supporting the likelihood of direct revenue gains from reductions in capital gains tax rates.

"Fiscal 1991 Budget, The." Brady, Nicholas F. March 1990, page 3.

A statement by the Secretary of the Treasury on the elements of the family savings account, the capital gains tax reduction, and the home ownership initiative contained in the administration-proposed Savings and Economic Growth Act.

"Outlook for the Savings and Loan Industry after the Financial Institutions Reform, Recovery, and Enforcement Act of 1989." Glauber, Robert R. December 1989, pp. 4-6.

A discussion of the savings and loan industry's future as it relates to provisions in the Financial Institutions Reform, Recovery, and Enforcement Act of 1989.

"Solution to the Savings and Loan Problem, The." Excerpted. Brady, Nicholas F. September 1989, page 3.

Remarks by the Secretary of the Treasury on the administration's comprehensive reform plan proposed for the overhaul of the savings and loan industry.

FISCAL SERVICE

"Status Report on the Fiscal Operations of the Government, A." Murphy, Gerald. December 1988, pp. 3-7.

A sweeping look by the Fiscal Assistant Secretary of the Treasury at each of nine major responsibilities making up the Fiscal Service's financial leadership role in Government.

TREASURY ISSUES INDEX

INTERNATIONAL AFFAIRS

"International Debt Strategy, The." Brady, Nicholas F. June 1989, pp. 3-4.

Remarks by the Secretary of the Treasury on the debt problem and the direction needed to be provided to international efforts to strengthen the debt strategy.

"Strengthened Debt Strategy, The." Brady, Nicholas F. December 1989, page 3.

An update from the Secretary of the Treasury on the international debt strategy to improve the quality of creditors' assets and creditworthiness in debtor countries.

"U.S. Policy Toward Direct Foreign Investment." Robson, John E. March 1990, pp. 4-7.

An exploration into the position that the United States is taking on foreign trade and investment policy matters.

TAX POLICY

Congressional Reports and Staff Working Papers by the Office of Tax Policy. March 1988, pp. 3-4.

A listing of research studies pertaining to important contemporary and anticipated tax policy issues, particularly related to the 1986-7 tax reform effort.

"Effect of the Tax Reform Act of 1986 on Commercial Banks, The." Excerpted. Neubig, Thomas S., and Martin A. Sullivan. June 1988, pp. 3-7.

An analysis of the overall effect of tax reform on the banking industry, which, the study concludes, benefits from tax reform.

"Impact of the Tax Reform Act of 1986 on Trade and Capital Flows, The." Excerpted. Grubert, Harry, and John Mutti. March 1988, pp. 5-8.

An analysis of the international implications of tax reform, based on a general equilibrium model of the United States and the rest of the world.

"New Estimates of Capital Gains Realization Behavior: Evidence from Pooled Cross-Section Data." Summary. Gillingham, Robert, John S. Greenlees, and Kimberly D. Zieschang. September 1989, pp. 4-5.

A paper developing and estimating a behavioral model of taxpayer response to capital gains taxation. Using the econometric approach, the pooled cross-section data represents a set of independent observations from a taxpayer sampling extending over the period 1977-85.

"Noncorporate Business Taxation: Before and After the Tax Reform Act of 1986." Excerpted. Nelson, Susan C. December 1988, pp. 8-12.

An analysis of the effects that the Tax Reform Act of 1986 might have on noncorporate business in terms of tax revenue, incentives for noncorporate versus corporate investment, and individual marginal tax rates on different types of income from noncorporate business.

TREASURY ISSUES INDEX

Operation and Effect of the Domestic International Sales Corporation Legislation: July 1, 1981, to June 30, 1983. June 1988, page 8.

An announcement of the Department of the Treasury's release of the 11th report in a series on domestic international sales corporations, special corporations eligible for deferral of Federal income tax on part of their export profits.

"Tax Expenditure Budget Before and After the Tax Reform Act of 1986, The." Excerpted. Neubig, Thomas S., and David Joulfalan. March 1989, pp. 3-10.

Findings from a recent study showing changes made by the Tax Reform Act of 1986 led to significant reductions in Government subsidies provided through tax expenditures.

Taxation Studies, Abstracts of Recent. September 1988, page 3.

Summaries of four major papers and reports, ranging from an examination of trends in noncorporate business taxation to a study of certain employee benefits not subject to Federal income tax.

Taxation Studies, Abstracts of Recent. June 1989, page 5.

A brief look at four reports covering the taxation of insurance syndicate income, Social Security benefits, and Americans working overseas; and the possessions corporation system of taxation.

Taxation Studies, Abstracts of Recent. September 1989, pp. 6-8.

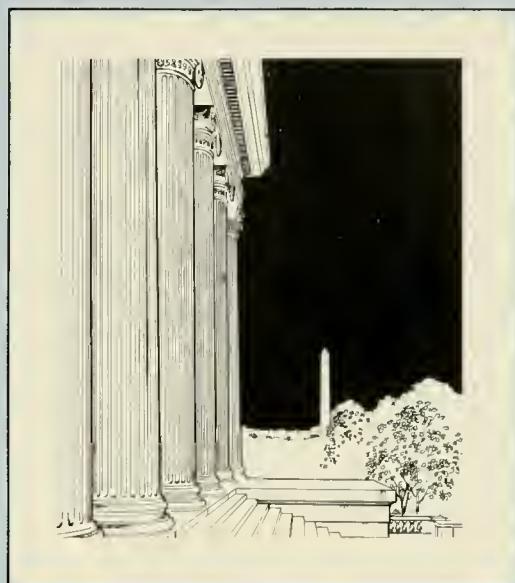

A summation of the reports to Congress on life insurance taxation and the depreciation of clothing held for rental, and various OTA papers on issues running from transfer pricing to capital gains realization behavior.

Taxation Studies, Abstracts of Recent. June 1990, pp. 9-10.

A summation of reports on tax studies on financing health and long-term care, widely held partnerships, life insurance company products, and reinsurance excise tax and the depreciation of horses, scientific instruments, and fruit and nut trees.

"Trends in Corporate Tax Receipts." Rosen, Harvey S. June 1990, pp. 7-8.

A discussion of recent trends in corporate tax receipts, the importance of the corporate tax in foreign countries, and the effect of the Tax Reform Act of 1986 on corporate tax receipts.

FINANCIAL OPERATIONS

FEDERAL FISCAL OPERATIONS

INTRODUCTION

Background

Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 3513a) requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government.

The first three Federal fiscal operations (FFO) tables are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. The tables are designed to provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the Federal Reserve banks. These reports detail accounting transactions affecting receipts and outlays of the Federal Government and off-budget Federal entities, and their related effect on the assets and liabilities of the U.S. Government. Data used in the preparation of tables FFO-1, FFO-2, and FFO-3 is derived from the Monthly Treasury Statement of Receipts and Outlays of the United States Government.

Budget authority usually takes the form of "appropriations" which permit obligations to be incurred and payments to be made. Most appropriations for current operations are made available for obligation only during a specified fiscal year (annual appropriations). Some are for a specified longer period (multiple-year appropriations). Others, including most of those for construction, some for research, and many for trust funds, are made available for obligation until the amount appropriated has been expended or until the objectives have been attained (no-year appropriations).

Budget authority can be made available by Congress for obligations and disbursement during a fiscal year from a succeeding year's appropriations (advance funding). For many education programs, Congress provides forward funding--budget authority made available for obligation in one fiscal year for the financing of ongoing grant programs during the succeeding fiscal year. When advantageous to the Federal Government, an appropriation is provided by Congress that will become available 1 year or more beyond the fiscal year for which the appropriation act is passed (advance appropriations). Included as advance appropriations are appropriations related to multiyear budget requests.

When budget authority is made available by Congress for a specific period of time, any part not obligated during that period expires and cannot be used later. Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire are known as reappropriations. The amounts involved are counted as new budget authority in the fiscal year of the legislation in which the reappropriation action is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Outlays.--Obligations generally are liquidated by the issuance of checks or the disbursement of cash; such payments are called outlays. In lieu of issuing checks, obligations also may be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in the redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments. Refunds of collections generally are treated as reductions of collections, rather than as outlays. However, payments for earned-income tax credits in excess of tax liabilities are treated as outlays rather than as a reduction in receipts. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and in part from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting

collections.

Receipts.--Receipts reported in the tables are classified into the following major categories: (1) budget receipts and (2) offsetting collections. Budget receipts are collections from the public that result from the exercise of the Government's sovereign or governmental powers, excluding receipts offset against outlays. These collections, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve System. Refunds of receipts are treated as deductions from gross receipts.

Offsetting collections are from other Government accounts or the public that are of a business-type or market-oriented nature. They are classified into two major categories: (1) offsetting collections credited to appropriations or fund accounts, and (2) offsetting receipts (i.e., amounts deposited in receipt accounts). Collections credited to appropriation or fund accounts normally can be used without appropriation action by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without being appropriated. They are subdivided into two categories: (1) proprietary receipts--these collections are from the public and they are offset against outlays by agency and by function, and (2) intragovernmental funds--these are payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts. The transactions may be intrabudgetary when the payment and receipt both occur within the budget or from receipts from off-budget Federal entities in those cases where payment is made by a Federal entity whose budget authority and outlays are excluded from the budget totals.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions, where the payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions, where the payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions, where the payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, by subfunction, or by agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by off-budget Federal entities) as employers into employees' retirement funds, (2) interest received by trust funds, (3) rents and royalties on the Outer Continental Shelf lands, and (4) other interest (i.e., interest collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

Off-budget Federal entities.--The Federal Government has used the unified budget concept as the foundation for its budgetary analysis and presentation since 1969. This concept calls for the budget to include all of the Government's fiscal transactions with the public. Starting in 1971, however, various laws have been enacted under which several Federal entities have been removed from the budget or created outside the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social

FEDERAL FISCAL OPERATIONS

Security trust funds, Federal old-age and survivors insurance and Federal disability insurance.

The off-budget Federal entities are federally owned and controlled, but their transactions are excluded from the budget totals under provisions of law. When an entity is off-budget, its receipts, outlays, and surplus or deficit are not included in budget receipts, budget outlays, or the budget deficit; its budget authority is not included in the totals of budget authority for the budget; and its receipts, outlays, and surplus or deficit ordinarily are not subject to the targets set by the congressional budget resolution.

Nevertheless, the Balanced Budget and Emergency Deficit Control Act of 1985 (commonly known as the Gramm-Rudman-Hollings Act) included the off-budget surplus or deficit in calculating the deficit targets under that act and in calculating the excess deficit for purposes of that act. Partly because of this reason, attention has focused on the total receipts, outlays, and deficit of the Federal Government instead of the on-budget amounts alone.

Table FFO-1.--Summary of Fiscal Operations

This table summarizes the amount of total receipts, total outlays, total surplus or deficit, transactions in Federal securities and monetary assets, and transactions and balances in Treasury operating cash.

Table FFO-2.--On-budget and Off-budget Receipts by Source

Budget receipts are taxes and other collections from the public that result from the exercise of the Government's sovereign or governmental powers. The amounts in this table represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties,

and net miscellaneous receipts by source.

Table FFO-3.--On-budget and Off-budget Outlays by Agency

Congress [usually] provides budget authority which is [generally] in the form of appropriations, then Federal agencies obligate the Government funds to make outlays. The amounts in this table represent a breakdown of on-budget and off-budget outlays by agency.

Table FFO-4.--Summary of Internal Revenue Collections by States and Other Areas

This annual table provides data on internal revenue collections classified by States and other areas and by type of tax. The amounts reported are for collections made in a fiscal year beginning in October and ending the following September.

Fiscal year collections span several tax liability years because they consist of prepayments (e.g., estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), of payments made with tax returns, and of subsequent payments made after tax returns are due or are filed (e.g., payments with delinquent returns or on delinquent accounts).

It is also important to note that these data do not necessarily reflect the Federal tax burden of individual States. The amounts are reported based on the primary filing address furnished by each taxpayer or reporting entity. For multistate corporations, this address may reflect only the State where such a corporation reported its taxes from a principal office rather than other States where income was earned or where individual income and social security taxes were withheld. In addition, an individual may reside in one State and work in another State.

FEDERAL FISCAL OPERATIONS

Budget Results for the Third Quarter, Fiscal 1990

Summary

The Federal budget deficit in the third quarter of fiscal 1990 totaled \$12 billion, a deterioration from a surplus of \$23 billion in the third quarter of fiscal 1989. For the first 9 months of fiscal 1990, the deficit was \$163 billion, or \$58 billion wider than for the same period of fiscal 1989 when the deficit for the full fiscal year was \$152 billion. Outlays during the first 9 months of fiscal 1990 were up over 10 percent from a year earlier, while receipts increased by 3-3/4 percent. The midsession review of the budget, released in mid-July, projected a deficit of \$220 billion for full-year fiscal 1990, including Resolution Trust Corporation (RTC) outlays.

Receipts in the third quarter of fiscal 1990 totaled \$319-1/2 billion, up 3-3/4 percent from the year earlier third quarter. Outlays in the third quarter totaled \$331-1/2 billion, up over 16 percent from a year earlier, boosted by sharply

higher spending by the RTC.

Outlays in most major functional budget categories for the first three quarters of fiscal 1990 were up from year earlier figures, with only spending for national defense and a few other categories in the negative column. The sharpest increase by far was posted by the commerce and housing credit function, reflecting a surge in spending by the RTC (beginning in March). Spending for the health and medicare functions during the first three quarters of fiscal 1990 was up appreciably (15-1/2 percent) from the year earlier period. Spending for income security rose by 9-1/2 percent from the year earlier period. Outlays for national defense during the first three quarters of fiscal 1990 were off by 1/2 percent from the year earlier figure.

Second-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the second quarter of fiscal 1990 supplements fiscal data earlier reported in the spring issue of the *Treasury Bulletin*. At the time of that issue's release, not enough data was available to analyze adequately collections for the quarter.

Individual income taxes.--Individual income tax receipts were \$97.5 billion for the second quarter of fiscal 1990. This represents an increase of \$7.7 billion over the same quarter for fiscal 1989. Refunds were up \$4.2 billion mainly due to faster IRS processing. Withheld receipts were up \$10.2 billion; however, \$4.8 billion of the increase was due to accounting adjustments for FICA. Nonwithheld receipts increased \$1.7 billion over the same quarter of fiscal 1989.

Corporate income taxes.--Net corporate receipts for the second quarter of fiscal 1990 were \$17 billion, \$0.4 billion higher than the second quarter of fiscal 1989. The \$0.4 billion increase was mainly attributable to an increase in final payments of \$0.8 billion. Offsetting this were a decrease in estimated payments of \$0.2 billion and an increase in refunds of \$0.2 billion.

FEDERAL FISCAL OPERATIONS

Employment taxes and contributions.--Although the Social Security payroll tax increased from 15.02 percent to 15.3 percent on January 1, 1990, employment taxes and contributions increased only slightly from the second quarter of fiscal 1989 to the second quarter of fiscal 1990. Employment taxes and contributions were \$89.9 billion during the second quarter of 1989. For the comparable period in 1990, employment taxes and contributions were \$90.6 billion.

The negligible increase in employment taxes and contributions reflected the large negative adjustments made to the Social Security trust funds during the quarter. The old-age survivors, disability, and health insurance (OASDHI) trust funds were adjusted to reflect actual withholding data from calendar 1989. As a consequence, \$2.3 billion was returned to the withheld individual income tax account. In the previous year, the trust funds received \$2.6 billion on the basis of actual calendar 1988 withholding data. Adjustments based on self-employment earnings were not significantly different over the two quarters. Based on self-employment earnings reported on tax returns from 1987 and prior years, the OASDHI trust funds were increased by \$0.3 billion, and the nonwithheld individual income tax account was decreased accordingly. In the prior year, the adjustment to the trust funds for self-employment taxes was \$0.3 billion.

Unemployment Insurance.--Unemployment insurance receipts for the January-March 1990 quarter were \$3.1 billion, compared with \$3 billion for the same quarter of fiscal 1989. State deposits of unemployment insurance declined slightly as a result of the decrease in average State unemployment insurance tax rates. However, total unemployment insurance receipts for the quarter were \$0.2 billion above the comparable quarter of the prior year as the result of adjustments made to previously reported Federal Unemployment Tax Act taxes.

Contributions for other insurance and retirement.--Contributions for other retirement were \$1.1 billion for the second quarter of fiscal 1990. This is basically unchanged from the second quarter of fiscal 1989. This general trend has been evident over the past fiscal year due to the displacement of employees covered under the civil service retirement system (CSRS) by those covered under the Federal employees retirement system. Contributions under the latter system are lower than under the older CSRS.

Excise taxes.--Excise tax receipts for the January-March 1990 quarter were \$7.7 billion, compared with \$7.9 billion for the same quarter of fiscal 1989. Year-to-year comparisons of excise tax receipts are affected by month-to-month differences in the processing and reporting of gross receipts and refunds. The decrease of \$0.2 billion in net excise receipts from the comparable quarter of the prior year is primarily the result of these timing factors.

Estate and gift taxes.--Estate and gift tax receipts were \$2.2 billion in the January-March quarter of fiscal 1990. This represents a decline of \$0.2 billion over the previous quarter and an increase of \$0.3 billion over the same quarter in the previous fiscal year.

Customs duties.--Customs receipts net of refunds were \$4.1 billion for the second quarter of fiscal 1990. This is a decrease of \$0.7 billion from the same quarter of the prior fiscal year. The decline is due to a decrease in imports.

Miscellaneous receipts.--Net miscellaneous receipts for the second quarter of fiscal 1990 were \$6.2 billion. This represents an increase of \$1.1 billion over the comparable quarter of the prior fiscal year. Deposits of Federal Reserve earnings increased by \$0.9 billion, while net other miscellaneous receipts increased by \$0.2 billion.

* Less than \$500,000.

¹ Data for the period do not reflect postyear adjustments published in the Monthly Treasury Statement of Receipts and Outlays of the United States Government, the source for this table.

Note.--Outlays consist of disbursements less proprietary receipts from the public and certain intrabudgetary transactions. On-budget and off-budget estimates are based on the midsession review of the 1991 budget, released July 16, 1990, by the Office of Management and Budget.

FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, and consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its

order, but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In table FO-1, obligations incurred within the Government are distinguished from those incurred outside the Government. Table FO-2 shows only those incurred outside.

Table FO-1.--Gross Obligations Incurred Within and Outside the Federal Government by Object Class, as of Mar. 31, 1990

[In millions of dollars. Source: Standard Form 225, Report on Obligations, from agencies]

Object class	Gross obligations incurred		
	Outside	Within	Total
Personal services and benefits:			
Personnel compensation	69,527	-	69,527
Personnel benefits	5,501	15,067	20,568
Benefits for former personnel	427	-	427
Contractual services and supplies:			
Travel and transportation of persons	2,597	316	2,913
Transportation of things	3,397	782	4,179
Rent, communications, and utilities	6,636	2,750	9,386
Printing and reproduction	447	340	787
Other services	82,673	22,566	105,239
Supplies and materials	22,558	12,760	35,318
Acquisition of capital assets:			
Equipment	38,443	3,414	41,857
Lands and structures	6,876	1,176	8,052
Investments and loans	10,298	18	10,316
Grants and fixed charges:			
Grants, subsidies, and contributions	89,673	17,524	107,197
Insurance claims and indemnities	214,616	82	214,698
Interest and dividends	103,850	40,029	143,879
Refunds	355	-	355
Other:			
Unvouchered	47	2	49
Undistributed U.S. obligations	3,203	1,441	4,644
Gross obligations incurred¹	661,124	118,267	779,391
Gross obligations incurred (as above)			
Deduct:			
Advances, reimbursements, other income, etc.		-101,107	
Offsetting receipts		-101,065	
Net obligations incurred.....			577,219

¹ For Federal budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (Data are on the basis of Reports on Obligations presentation and therefore may differ somewhat from the Budget of the U.S. Government.)

Gross obligations incurred (as above)	779,391
Deduct:	
Advances, reimbursements, other income, etc.	-101,107
Offsetting receipts	-101,065
Net obligations incurred.....	577,219

FEDERAL OBLIGATIONS

GROSS FEDERAL OBLIGATIONS AS OF MAR. 31, 1990

GROSS FEDERAL OBLIGATIONS INCURRED OUTSIDE THE FEDERAL GOVERNMENT

As of Mar. 31, 1990

ACCOUNT OF THE U.S. TREASURY

SOURCE AND AVAILABILITY OF THE BALANCE IN THE ACCOUNT OF THE U.S. TREASURY

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. Major information sources include the Daily Balance Wire received from the Federal Reserve banks and branches, and electronic transfers through the Letter of Credit Payment, Fedline Payment, and Fedwire Deposit Systems. As the balances in the accounts at the Federal Reserve banks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on Nov. 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate in the program. Depositaries that wish to retain funds deposited in their tax and loan accounts in interest-bearing obligations participate under the Note Option; depositaries that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remittance Option.

Deposits to tax and loan accounts occur in the normal course of

business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same financial institution. On occasion, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the accounts of their customers. Also, Treasury can direct the Federal Reserve banks to invest excess funds in these accounts directly from its account at the Federal Reserve banks.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and the economy.

* Less than \$500,000.

¹ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.

² Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

³ Special depositories are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues. Effective Oct. 1, 1989, public debt securities, including U.S. savings bonds, will no longer be settled through the tax and loan note accounts.

⁴ Includes U.S. savings bonds, savings notes, retirement plan and tax and loss bonds. U.S. savings notes first offered for sale as of May 1, 1967, and were discontinued after June 30, 1970. Retirement plan bonds first offered for sale as of Jan. 1, 1963; tax and loss bonds first issued in March 1968.

⁵ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositories, as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after Mar. 15, 1968; FUTA taxes beginning April 1970, and individual estimated income taxes beginning October 1988.

FEDERAL DEBT

INTRODUCTION

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the remainder. In addition to the data on the Federal debt presented in the tables in this section of the quarterly *Treasury Bulletin*, the Treasury publishes detailed data on the public debt outstanding in the Monthly Statement of the Public Debt of the United States and on agency securities and the investments of Federal Government accounts in Federal securities in the Monthly Treasury Statement of Receipts and Outlays of the United States Government.

Table FD-1.--Summary of Federal Debt

The Federal debt outstanding is summarized as to holdings of public debt and agency securities by the public, which includes the Federal Reserve, and by Federal agencies, largely the social security and other Federal retirement trust funds. Greater detail on holdings of Federal securities by particular classes of investors is presented in the ownership tables, OFS-1 and OFS-2, of the *Treasury Bulletin*.

Table FD-2.--Interest-Bearing Public Debt

Interest-bearing marketable and nonmarketable Treasury securities are presented as to type of security. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities on which interest has ceased to accrue. The Federal Financing Bank (FFB) is under the supervision of the Treasury, and FFB securities shown in this table are held by a U.S. Government account.

Table FD-3.--Government Account Series

Nonmarketable Treasury securities held by U.S. Government accounts are summarized as to issues to particular funds within the Government. Many of the funds invest in par-value special series nonmarketables at statutorily determined interest rates, while others whose statutes do not prescribe an interest rate formula invest in market-based special Treasury securities whose terms mirror the terms of marketable Treasury securities.

Table FD-4.--Interest-Bearing Securities Issued by Government Agencies

Federal agency borrowing has been declining in recent years, in part because the Federal Financing Bank has been providing financing to other Federal agencies. This table does not cover Fed-

eral agency borrowing from the Treasury, which is presented in the Monthly Treasury Statement of Receipts and Outlays of the United States Government. The Government-sponsored entities, whose securities are presented in the memorandum section of table FD-4, are not agencies of the Federal Government, nor are their securities presented in table FD-4 guaranteed by the Federal Government.

Table FD-5.--Maturity Distribution and Average Length of Marketable Interest-Bearing Public Debt Held by Private Investors

The average maturity of the privately held marketable Treasury debt has increased gradually since it hit a trough of 2 years, 5 months, in December 1975. In March 1971, the Congress enacted a limited exception to the 4-1/4-percent interest rate ceiling on Treasury bonds that permitted the Treasury to offer securities maturing in more than 7 years at current market rates of interest for the first time since 1965. The exception to the 4-1/4-percent interest rate ceiling had been expanded since 1971 to authorize the Treasury to continue to issue long-term securities. The 4-1/4-percent interest rate ceiling on Treasury bonds was repealed on November 10, 1988. The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes, and bonds, and the average length comprises an average of remaining periods to maturity, weighted by the amount of each security held by private investors (i.e., excludes the Government accounts and Federal Reserve banks).

Table FD-6.--Debt Subject to Statutory Limitation

The statutory debt ceiling is compared with the outstanding debt subject to limit. The other debt category includes certain Federal debt that the Congress has designated by statute to be subject to the debt ceiling. The changes in non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, such as weekends and holidays. In that event, Treasury securities are redeemed on the first business day following a non-business day.

Table FD-7.--Treasury Holdings of Securities Issued by Government Corporations and Other Agencies

Certain Federal agencies are authorized by statute to borrow from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. The Treasury finances such loans to the Federal agencies with issues of public debt securities.

TREASURY FINANCING OPERATIONS, APRIL-JUNE 1990

APRIL

Auction of 7-Year Notes

On April 4 the Treasury announced that it would auction \$7,500 million of 7-year notes to refund \$4,831 million of notes maturing April 15, 1990, and to raise about \$2,675 million of new cash. The notes offered were Treasury Notes of Series E-1997, dated April 16, 1990, due April 15, 1997, with interest payable on October 15 and April 15 until maturity. An interest rate of 8-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, April 11, 1990, and totaled \$19,442 million, of which \$7,520 million was accepted at yields ranging from 8.62 percent, price 99.379, up to 8.63 percent, price 99.328. Tenders at the high yield were allotted 47 percent. Noncompetitive tenders were accepted in full at the average yield, 8.62 percent, price 99.379. These totaled \$414 million. Competitive tenders accepted from private investors totaled \$7,106 million.

In addition to the \$7,520 million of tenders accepted in the auction process, \$100 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$223 million was accepted from Federal Reserve banks for their own account.

Auction of 2-Year Notes

On April 18 the Treasury announced that it would auction \$10,500 million of 2-year notes to refund \$9,826 million of notes maturing April 30, 1990, and to raise about \$675 million of new cash. The notes offered were Treasury Notes of Series Y-1992, dated April 30, 1990, due April 30, 1992, with interest payable on October 31 and April 30 until maturity. An interest rate of 8-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, April 25, and totaled \$26,124 million, of which \$10,503 million was accepted at yields ranging from 8.88 percent, price 99.991, up to 8.91 percent, price 99.937. Tenders at the high yield were allotted 71 percent. Noncompetitive tenders were accepted in full at the average yield, 8.90 percent, price 99.955. These totaled \$1,906 million. Competitive tenders accepted from private investors totaled \$8,597 million.

In addition to the \$10,503 million of tenders accepted in the auction process, \$757 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$1,434 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

On March 30 tenders were invited for approximately \$9,750 million of 364-day Treasury bills to be dated April 12,

1990, and to mature April 11, 1991. The issue was to refund \$9,075 million of maturing 52-week bills and to raise about \$675 million of new cash. Tenders were opened on April 5. They totaled \$25,184 million, of which \$9,766 million was accepted, including \$1,110 million of noncompetitive tenders from the public and \$2,360 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 7.72 percent.

MAY

May Quarterly Financing

On May 2 the Treasury announced that it would auction \$10,500 million of 3-year notes of Series T-1993, \$10,000 million of 10-year notes of Series B-2000, and \$10,000 million of 30-year bonds of 2020 to refund \$18,130 million of Treasury securities maturing May 15 and to raise about \$12,375 million of new cash.

The notes of Series T-1993 were dated May 15, 1990, due May 15, 1993, with interest payable on November 15 and May 15 until maturity. An interest rate of 8-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, May 8, and totaled \$37,327 million, of which \$10,574 million was accepted at yields ranging from 8.73 percent, price 99.728, up to 8.75 percent, price 99.676. Tenders at the high yield were allotted 13 percent. Noncompetitive tenders were accepted in full at the average yield, 8.74 percent, price 99.702. These totaled \$2,448 million. Competitive tenders accepted from private investors totaled \$8,126 million.

In addition to the \$10,574 million of tenders accepted in the auction process, \$770 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,702 million was accepted from Federal Reserve banks for their own account.

The notes of Series B-2000 were dated May 15, 1990, due May 15, 2000, with interest payable on November 15 and May 15 until maturity. An interest rate of 8-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, May 9, and totaled \$30,042 million, of which \$10,026 million was accepted at yields ranging from 8.87 percent, price 100.033, up to 8.88 percent, price 99.967. Tenders at the high yield were allotted 63 percent. Noncompetitive tenders were accepted in full at the average yield, 8.88 percent, price 99.967. These totaled \$659 million. Competitive tenders accepted from private investors totaled \$9,367 million.

In addition to the \$10,026 million of tenders accepted in the auction process, \$200 million was accepted from Federal Reserve banks as agents for foreign and international

TREASURY FINANCING OPERATIONS, APRIL-JUNE 1990

monetary authorities, and \$250 million was accepted from Federal Reserve banks for their own account.

The notes of Series B-2000 may be held in STRIPS form. The minimum par amount required is \$1,600,000.

The bonds of 2020 were dated May 15, 1990, due May 15, 2020, with interest payable on November 15 and May 15 until maturity. An interest rate of 8-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the bonds were received until 1 p.m. EDST, May 10, and totaled \$19,948 million, of which \$10,008 million was accepted at yields ranging from 8.83 percent, price 99.162, up to 8.85 percent, price 99.954. Tenders at the high yield were allotted 58 percent. Noncompetitive tenders were accepted in full at the average yield, 8.84 percent, price 99.058. These totaled \$463 million. Competitive tenders accepted from private investors totaled \$9,545 million.

In addition to the \$10,008 million of tenders accepted in the auction process, \$150 million was accepted from Federal Reserve banks for their own account.

The bonds of 2020 may be held in STRIPS form. The minimum par amount required is \$160,000.

Auction of 2-Year and 5-Year 2-Month Notes

On May 16 the Treasury announced that it would auction \$10,800 million of 2-year notes of Series Z-1992 and \$8,500 million of 5-year 2-month notes of Series L-1995 to refund \$8,916 million of publicly held 2-year notes maturing May 31, 1990, and to raise about \$10,375 million of new cash.

The notes of Series Z-1992 were dated May 31, 1990, due May 31, 1992, with interest payable on November 30 and May 31 until maturity. An interest rate of 8-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, May 23, and totaled \$37,566 million, of which \$10,883 million was accepted at yields ranging from 8.51 percent, price 99.982, up to 8.53 percent, price 99.946. Tenders at the high yield were allotted 10 percent. Noncompetitive tenders were accepted in full at the average yield, 8.52 percent, price 99.964. These totaled \$1,665 million. Competitive tenders accepted from private investors totaled \$9,218 million.

In addition to the \$10,883 million of tenders accepted in the auction process, \$667 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$761 million was accepted from Federal Reserve banks for their own account.

The notes of Series L-1995 were dated June 1, 1990, due August 15, 1995, with interest payable on February 15 and August 15 until maturity. An interest rate of 8-1/2 percent was set after the determination as to which tenders were

accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, May 24, and totaled \$21,930 million, of which \$8,502 million was accepted at yields ranging from 8.52 percent, price 99.847, up to 8.56 percent, price 99.681. Tenders at the high yield were allotted 93 percent. Noncompetitive tenders were accepted in full at the average yield, 8.54 percent, price 99.764. These totaled \$593 million. Competitive tenders accepted from private investors totaled \$7,909 million.

In addition to the \$8,502 million of tenders accepted in the auction process, \$340 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities.

52-Week Bills

On April 27 tenders were invited for approximately \$10,000 million of 364-day Treasury bills to be dated May 10, 1990, and to mature May 9, 1991. The issue was to refund \$9,057 million of maturing 52-week bills and to raise about \$950 million of new cash. Tenders were opened on May 3. They totaled \$30,408 million, of which \$10,036 million was accepted, including \$1,068 million of noncompetitive tenders from the public and \$2,630 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 8.05 percent.

Cash Management Bills

On May 25 tenders were invited for approximately \$6,000 million of 20-day bills to be issued June 1, 1990, representing an additional amount of bills dated December 21, 1989, maturing June 21, 1990. The issue was to raise new cash. Tenders were opened on May 30. They totaled \$29,598 million, of which \$6,024 million was accepted. The average bank discount rate was 7.93 percent.

In the same announcement on May 25, tenders were invited for approximately \$6,000 million of 111-day bills to be issued June 1, 1990, representing an additional amount of bills dated March 22, 1990, maturing September 20, 1990. The issue was to raise new cash. Tenders were opened on May 30. They totaled \$43,455 million, of which \$6,008 million was accepted. The average bank discount rate was 7.78 percent.

JUNE

Auction of 2-Year and 4-Year Notes

On June 20 the Treasury announced that it would auction 11,250 million of 2-year notes of Series AB-1992 and \$8,250 million of 4-year notes of Series N-1994 to refund \$17,324 million of Treasury notes maturing June 30 and to raise about \$2,175 million of new cash.

TREASURY FINANCING OPERATIONS, APRIL-JUNE 1990

The notes of Series AB-1992 were dated July 2, 1990, due June 30, 1992, with interest payable on December 31 and June 30 until maturity. An interest rate of 8-3/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, June 26, and totaled \$24,848 million, of which \$11,252 million was accepted at yields ranging from 8.38 percent, price 99.991, up to 8.42 percent, price 99.919. Tenders at the high yield were allotted 10 percent. Noncompetitive tenders were accepted in full at the average yield, 8.41 percent, price 99.937. These totaled \$1,494 million. Competitive tenders accepted from private investors totaled \$9,758 million.

In addition to the \$11,252 million of tenders accepted in the auction process, \$692 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,328 million was accepted from Federal Reserve banks for their own account.

The notes of Series N-1994 were dated July 2, 1990, due June 30, 1994, with interest payable on December 31 and June 30 until maturity. An interest rate of 8-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, June 27, and totaled \$44,780 million, of which \$8,313 million was accepted at yields ranging from 8.49 percent, price 100.033, up to 8.50 percent, price 100.000. Tenders at the high yield were allotted 20 percent. Noncompetitive tenders were accepted in full at the average yield, 8.50 percent, price 100.000. These totaled \$796 million. Competitive tenders accepted from private investors totaled \$7,517 million.

In addition to the \$8,313 million of tenders accepted in the auction process, \$342 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$500 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

On May 25 tenders were invited for approximately \$10,000 million of 364-day Treasury bills to be dated June 7, 1990, and to mature June 6, 1991. The issue was to refund \$8,587 million of maturing 52-week bills and to raise about \$1,425 million of new cash. Tenders were opened on May 31. They totaled \$25,562 million, of which \$10,009 million was accepted, including \$869 million of noncompetitive tenders from the public and \$2,450 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$630 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 7.65 percent.

On June 22 tenders were invited for approximately \$10,250 million of 365-day Treasury bills to be dated July 5, 1990, and to mature July 5, 1991. The issue was to refund \$9,030 million of maturing 52-week bills and to raise about \$1,225 million of new cash. Tenders were opened on June 28. They totaled \$31,663 million, of which \$10,264 million was accepted, including \$834 million of noncompetitive tenders from the public and \$2,700 million of the bills issued to Federal Reserve banks for their own account. An additional \$265 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 7.52 percent.

PUBLIC DEBT OPERATIONS

INTRODUCTION

Background

The Second Liberty Bond Act (31 U.S.C. 3101, et seq.) provides the Secretary of the Treasury with broad authority to borrow and to determine the terms and conditions of issue, conversion, maturity, payment, and interest rate on Treasury securities. Data in the "Public Debt Operations" section, which have been published in the *Treasury Bulletin* in some form since its inception in 1939, pertain only to marketable Treasury securities, currently bills, notes, and bonds. Treasury bills are discount securities that mature in 1 year or less, while Treasury notes and bonds have semiannual interest payments. New issues of Treasury notes mature in 2 to 10 years, and bonds mature in over 10 years from the issue date. Each marketable Treasury security is listed in the Monthly Statement of the Public Debt of the United States.

Table PDO-1.--Maturity Schedule of Interest-Bearing Marketable Public Debt Securities Other than Regular Weekly and 52-Week Treasury Bills

All unmatured Treasury notes and bonds are listed in maturity order, beginning with the earliest maturity. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks, so that the "All other investors" category includes all private holdings.

Table PDO-2.--Offerings of Bills

The results of weekly auctions of 13- and 26-week bills and auctions of 52-week bills every fourth week are presented in table PDO-2. Treasury bills mature each Thursday. New issues of 13-week bills are reopenings of 26-week bills. The 26-week bill issued every fourth week to mature on the same Thursday as an existing

52-week bill is a reopening of the existing 52-week bill. The high, low, and average yields on accepted tenders and the dollar value of total bids is presented, along with the dollar value of awards on a competitive and a noncompetitive basis. The Treasury accepts noncompetitive tenders of up to \$1 million in each auction of Treasury securities in order to assure that individuals and smaller institutions are able to participate in offerings of new marketable Treasury securities. Noncompetitive bids are awarded at the average yield on accepted competitive bids.

Table PDO-3.--Public Offerings of Marketable Securities Other than Regular Weekly Treasury Bills

The results of auctions of marketable Treasury securities, other than weekly bills, are listed in the chronological order of the auction dates over approximately the most recent 2 years. This table includes notes and bonds presented in table PDO-1, 52-week bills in table PDO-2, and data for cash management bills. Treasury offers cash management bills from time to time to bridge temporary or seasonal declines in the cash balance. Cash management bill maturities generally coincide with the maturities of regular issues of Treasury bills.

Table PDO-4.--Allotments by Investor Classes for Public Marketable Securities, Parts A and B

Data on allotments of marketable Treasury securities by investor class are presented in chronological order of the auction date for approximately the most recent 2 years. These data have appeared in the *Treasury Bulletin* since 1956. Tenders in each Treasury auction of marketable securities other than weekly auctions of 13- and 26-week bills are tallied by the Federal Reserve banks into investor classes described in the footnotes to the table.

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the average bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings see table PDO-2.

² From date of additional issue in case of a reopening.

³ In reopenings the amount issued is in addition to the amount of original offerings.

⁴ Includes securities issued to U.S. Government accounts and Federal Reserve banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

⁵ Eligible for STRIPS.

⁶ Interest began to accrue before the issue date (settlement date) of this loan.

⁷ Yields accepted ranged from 8.04% (price 99.927) up to 8.06% (price 99.891) with the average at 8.05% (price 99.909).

⁸ Yields accepted ranged from 8.35% (price 99.666) up to 8.37% (price 99.599) with the average at 8.36% (price 99.632).

⁹ Yields accepted ranged from 8.90% (price 99.872) up to 8.92% (price 99.769) with the average at 8.91% (price 99.821).

¹⁰ Yields accepted ranged from 8.40% (price 99.955) up to 8.42% (price 99.919) with the average at 8.41% (price 99.937).

¹¹ Yields accepted ranged from 8.76% (price 99.974) up to 8.77% (price 99.948) with the average at 8.77% (price 99.948).

¹² Yields accepted ranged from 9.24% (price 100.064) up to 9.29% (price 99.743) with the average at 9.27% (price 99.871).

¹³ The low, high, and average yield was 8.72% (price 99.829).

¹⁴ Yields accepted ranged from 9.03% (price 99.800) up to 9.04% (price 99.759) with the average at 9.04% (price 99.759).

¹⁵ Yields accepted ranged from 8.52% (price 99.964) up to 8.53% (price 99.946) with the average at 8.53% (price 99.946).

¹⁶ Yields accepted ranged from 8.74% (price 100.033) up to 8.77% (price 99.934) with the average at 8.76% (price 99.967).

¹⁷ Yields accepted ranged from 8.72% (price 99.510) up to 8.75% (price 99.356) with the average at 8.73% (price 99.459).

¹⁸ Yields accepted ranged from 8.31% (price 99.891) up to 8.34% (price 99.837) with the average at 8.33% (price 99.855).

¹⁹ Yields accepted ranged from 8.58% (price 99.792) up to 8.60% (price 99.740) with the average at 8.59% (price 99.766).

²⁰ Yields accepted ranged from 8.93% (price 99.641) up to 8.94% (price 99.576) with the average at 8.94% (price 99.576).

²¹ Yields accepted ranged from 9.09% (price 99.072) up to 9.11% (price 98.869) with the average at 9.10% (price 98.970).

²² Yields accepted ranged from 8.86% (price 100.027) up to 8.89% (price 99.973) with the average at 8.88% (price 99.991).

²³ Yields accepted ranged from 8.95% (price 99.616) up to 8.98% (price 99.493) with the average at 8.97% (price 99.534).

²⁴ Yields accepted ranged from 9.21% (price 99.848) up to 9.24% (price 99.795) with the average at 9.23% (price 99.813).

²⁵ Yields accepted ranged from 9.19% (price 99.787) up to 9.22% (price 99.689) with the average at 9.22% (price 99.689).

²⁶ Yields accepted ranged from 9.29% (price 99.798) up to 9.30% (price 99.747) with the average at 9.30% (price 99.747).

average at 9.30% (price 99.747).

²⁷ Yields accepted ranged from 9.06% (price 99.892) up to 9.08% (price 99.857) with the average at 9.08% (price 99.857).

²⁸ Yields accepted ranged from 9.17% (price 99.884) up to 9.19% (price 99.833) with the average at 9.18% (price 99.859).

²⁹ Yields accepted ranged from 8.90% (price 99.837) up to 8.92% (price 99.706) with the average at 8.91% (price 99.771).

³⁰ Yields accepted ranged from 8.90% (price 99.740) up to 8.95% (price 99.223) with the average at 8.91% (price 99.636).

³¹ Yields accepted ranged from 9.47% (price 99.831) up to 9.50% (price 99.777) with the average at 9.49% (price 99.795).

³² Yields accepted ranged from 9.48% (price 99.996) up to 9.49% (price 99.955) with the average at 9.49% (price 99.955).

³³ Yields accepted ranged from 9.84% (price 99.840) up to 9.88% (price 99.769) with the average at 9.87% (price 99.787).

³⁴ Yields accepted ranged from 9.69% (price 99.789) up to 9.70% (price 99.756) with the average at 9.70% (price 99.756).

³⁵ Yields accepted ranged from 9.38% (price 99.975) up to 9.40% (price 99.874) with the average at 9.39% (price 99.924).

³⁶ Yields accepted ranged from 9.30% (price 99.911) up to 9.35% (price 99.822) with the average at 9.34% (price 99.839).

³⁷ Yields accepted ranged from 9.11% (price 99.717) up to 9.12% (price 99.691) with the average at 9.12% (price 99.691).

³⁸ Yields accepted ranged from 9.17% (price 99.709) up to 9.19% (price 99.581) with the average at 9.18% (price 99.645).

³⁹ Yields accepted ranged from 9.10% (price 97.653) up to 9.12% (price 97.453) with the average at 9.11% (price 97.553).

⁴⁰ Yields accepted ranged from 8.83% (price 99.856) up to 8.85% (price 99.820) with the average at 8.84% (price 99.838).

⁴¹ Yields accepted ranged from 8.70% (price 99.619) up to 8.72% (price 99.537) with the average at 8.72% (price 99.537).

⁴² Yields accepted ranged from 8.25% (price 100.000) up to 8.27% (price 99.964) with the average at 8.26% (price 99.982).

⁴³ Yields accepted ranged from 8.19% (price 99.782) up to 8.20% (price 99.749) with the average at 8.19% (price 99.782).

⁴⁴ Yields accepted ranged from 7.88% (price 99.974) up to 7.90% (price 99.868) with the average at 7.89% (price 99.921).

⁴⁵ Yields accepted ranged from 7.73% (price 100.036) up to 7.75% (price 100.000) with the average at 7.75% (price 100.000).

⁴⁶ Yields accepted ranged from 7.92% (price 99.882) up to 7.94% (price 99.829) with the average at 7.93% (price 99.856).

⁴⁷ Yields accepted ranged from 8.02% (price 99.864) up to 8.05% (price 99.661) with the average at 8.03% (price 99.796).

⁴⁸ Yields accepted ranged from 8.13% (price 99.944) up to 8.15% (price 99.721) with the average at 8.14% (price 99.833).

⁴⁹ Yields accepted ranged from 8.35% (price 99.819) up to 8.38% (price 99.765) with the average at 8.37% (price 99.783).

[Subsequent data not yet available]

* Less than \$500,000.

¹ Includes trust companies, bank dealers, and stock savings banks.

² Includes partnerships and personal trust accounts.

³ Exclusive of banks and insurance companies.

⁴ Consists of trust, sinking, and investment funds of States and local governments and their agencies.

⁵ Includes savings and loan associations, nonprofit institutions, and foreign and international investments. Also included are certain Government deposit accounts and Government-sponsored agencies.

Note.--For detail of offerings see table PDO-3.

¹ Includes trust funds and accounts that comprise Government accounts under the unified budget concept.

² Exclusive of banks and insurance companies.

³ Included with all other investors are certain Government deposit accounts and

Government-sponsored agencies, formerly included with Government accounts.

Note.--For detail of offerings see table PDO-3.

U.S. SAVINGS BONDS AND NOTES

Series EE bonds, on sale since Jan. 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for series E and EE savings bonds and savings notes. Series A-D were sold from Mar. 1, 1935, through Apr. 30, 1941. Series E was on sale from May 1, 1941, through Dec. 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through Apr. 30, 1952. Series H was sold from June 1, 1952, through Dec. 31, 1979. Series HH bonds were sold for cash from Jan. 1, 1980, through Oct. 31, 1982. Series J and K were

sold from May 1, 1952, through Apr. 30, 1957.

U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds. The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the *Treasury Bulletins* of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal year 1974.

Table SBN-1.--Sales and Redemptions by Series, Cumulative through June 30, 1990

[In millions of dollars. Source: Monthly Statement of the Public Debt of the United States; Market Analysis Section, United States Savings Bonds Division]

Series	Sales ¹	Accrued discount	Sales plus accrued discount	Redemptions ¹	Amount outstanding	
					Interest-bearing debt	Matured non-interest-bearing debt
Savings bonds:						
Series A-D ²	3,949	1,054	5,003	5,002	-	1
Series E, EE, H, and HH.....	275,411	121,692	397,103	275,554	120,059	1,488
Series F and G.....	28,396	1,125	29,521	29,519	-	2
Series J and K.....	3,556	198	3,754	3,753	-	1
Savings notes	862	509	1,371	1,055	316	-
Total	312,174	124,578	436,752	314,883	120,375	1,492

¹ Sales and redemption figures include exchange of minor amounts of (1) matured series E bonds for series G and K bonds from May 1951 through April 1957; (2) series F and J bonds for series H bonds beginning January 1960; and (3) U.S. savings notes for series H bonds beginning January 1972; however, they exclude exchanges of series E bonds for series H and HH bonds.

² Details by series on a cumulative basis and by period of series A-D combined will be found in the February 1952 and previous issues of the *Treasury Bulletin*.

Note.—Series E and EE include U.S. savings notes (Freedom Shares) on sale from May 1, 1967, through June 30, 1970, to E bond buyers.

OWNERSHIP OF FEDERAL SECURITIES

INTRODUCTION

Federal securities presented in these tables comprise public debt securities issued by the Treasury and debt issued by other Federal agencies under special financing authorities. See the Federal debt (FD) series of tables for a more complete description of the Federal debt.

Table OFS-1...Distribution of Federal Securities by Class of Investors and Type of Issues

Holdings of Treasury marketable and nonmarketable securities and of debt issued by other Federal agencies are presented for Government accounts, the Federal Reserve banks, and private investors. Government account holdings largely reflect investment by the social security and Federal retirement trust funds. The Federal Reserve banks acquire Treasury securities in the market as a means of executing monetary policy.

Table OFS-2...Estimated Ownership of Public Debt Securities Held by Private Investors

Privately held Treasury securities are those held by investors other than the Government accounts and Federal Reserve banks. Treasury obtains information on private holdings from a variety of sources, such as data gathered by the Federal financial institution regulatory agencies. State and local holdings and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts, as well as municipal and foreign official and private holdings of marketable Treasury securities. Data on foreign holdings of marketable Treasury securities are presented in the capital movements tables in the *Treasury Bulletin*. See the footnotes for descriptions of the investor categories.

¹ U.S. savings bonds, series A-F and J, are included at current redemption value.

² Includes domestically chartered banks, U.S. branches and agencies of foreign banks, New York investment companies majority owned by foreign banks, and Edge Act corporations owned by domestically chartered and foreign banks.

³ Includes partnerships and personal trust accounts.

⁴ Includes U.S. savings notes. Sales began May 1, 1967, and were discontinued June 30, 1970.

⁵ Exclusive of banks and insurance companies.

⁶ Includes State and local pension funds.

⁷ Consists of the investment of foreign balances and international accounts in the United States. Estimates reflect 1978 benchmark through December 1984 and 1984 benchmark to date.

⁸ Includes savings and loan associations, credit unions, nonprofit institutions, mutual savings banks, corporate pension trust funds, dealers and brokers, certain Government deposit accounts, and Government-sponsored agencies.

MARKET YIELDS

INTRODUCTION

The tables and charts in this section present yields on Treasury marketable securities and compare long-term Treasury market yields with yields on long-term corporate and municipal securities.

Table MY-1.--Treasury Market Bid Yields at Constant Maturities: Bills, Notes, and Bonds

The Treasury yield curve, presented in the chart that accompanies table MY-1, is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. each business day. The Treasury obtains quotations from the Federal Reserve Bank of New York, which composites quotations provided by five primary dealers. This yield curve reflects yields based on semiannual interest payments and is read at constant maturity points to develop

a consistent data series. Yields on Treasury bills, which are discount securities, are the coupon equivalent yields of bank discount rates at which Treasury bills trade in the market. The Board of Governors of the Federal Reserve System also publishes the Treasury constant maturity data series in its weekly H.15 press release.

Table MY-2.--Average Yields of Long-Term Treasury, Corporate, and Municipal Bonds

The long-term Treasury rate is the 30-year constant maturity rate presented in table MY-1. The corporate and municipal bond series are developed by the Treasury, using reoffering yields on new long-term securities rated Aa by Moody's Investors Service. See the footnotes for further explanation.

¹ On Apr. 30, 1986, the Treasury announced that it would no longer issue 20-year bonds. Consequently, the 20-year constant maturity became an interpolation between rates on 10- and 30-year securities. The 20-year series was discontinued at the end of 1986.

¹ The Treasury long-term bond series has been revised to reflect 30-year maturities rather than the previously used 20-year maturity. The 30-year series was initiated in March 1977.² Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service and having an original maturity of at least 20 years.³ Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service.

FEDERAL AGENCIES' FINANCIAL REPORTS

INTRODUCTION

Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 3513a) requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government and provides that each executive agency must furnish the Secretary of the Treasury such reports and information relating to the agency's financial condition and operations as the Secretary may require. The provisions do not apply to the legislative and judicial branches of the Federal Government; however, these entities are encouraged to submit the prescribed reports so the Secretary of the Treasury can prepare comprehensive reports on all the financial activities of the U.S. Government.

The Treasury Financial Manual (I TFM 2-4100) sets the criteria for the submission of annual and quarterly financial reports in accordance with the Reporting Entities Listing (Bulletin No. 88-11). Reports are provided for six fund types: Revolving funds, trust revolving funds, 15 major trust funds, all other trust funds, all other activity combined, and consolidated reports of an organizational unit. The financial transactions supporting the required reports are to be accounted for on the accrual basis. The Report on Operations can be submitted on a cash basis under certain circumstances (see I TFM 2-4180.20). Reports are to be prepared from a budgeting and accounting system which contains an integrated data base that is part of the agency's integrated financial management system as required by the Office of Management and Budget (OMB) Circular No. A-127.

The required reports should include all assets, liabilities, and equities relating to all programs and activities under control of the reporting entity, except for the assets of disbursing officers, which are reported by the Treasury. Reports should include transfer appropriation accounts from other agencies, foreign currencies, opera-

tions conducted in the territories or overseas, and any monetary assets or property received, spent, or otherwise accounted for by the reporting entity. Amounts are reported to the dollar.

Requirements provide that Federal agencies submit to Treasury four financial reports supplemented by three supporting reports. These reports are: Report on Financial Position (SF 220), Report on Operations (SF 221), Report on Cash Flow (SF 222), and Report on Reconciliation (SF 223). The three supporting reports are: Direct and Guaranteed Loans Reported by Agency and Program Due from the Public (SF 220-8), Report on Accounts and Loans Receivable Due from the Public (SF 220-9), and Additional Financial Information (SF 220-1). The report on Direct and Guaranteed Loans is submitted to Treasury quarterly, and annually for publication in the *Treasury Bulletin*. The Report on Accounts and Loans Receivable Due from the Public is submitted quarterly on a selected basis, and by all entities annually. Information captured in the SF 220-8 is shown in the following table:

Table FA-1--Direct and Guaranteed Loans

This report reflects the direct loans and guaranteed loans to the public through the Federal Credit Program to support credit activities. Actual control of credit program levels remains with authorizing legislation and appropriations acts. The report on Direct and Guaranteed Loans also provides the Federal Reserve Board information to monitor the flow of funds. An accompanying chart depicts direct loans and guaranteed loans for the second quarter of fiscal 1990.

Wholly owned Government Enterprises--U.S. Dollar Loans

INTERNATIONAL STATISTICS

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.

Table IFS-3 shows U.S. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-4 presents a measure of the general foreign exchange value of the U.S. dollar.

Table IFS-1.--U.S. Reserve Assets

[In millions of dollars]

End of calendar year or month	Total reserve assets ¹	Gold stock ²	Special drawing rights ^{1,3}	Foreign currencies ⁴	Reserve position in International Monetary Fund ^{1,5}
1985.....	43,186	11,090	7,293	12,856	11,947

Apr.....	76,283	11,060	10,103	46,433	8,687
May.....	77,028	11,065	10,396	46,803	8,764
June.....	77,298	11,065	10,490	47,294	8,449
July.....	77,906	11,064	10,699	47,457	8,686

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

² Treasury values its gold stock at \$42,222 per fine troy ounce and pursuant to 31 U.S.C. 5117(b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account in the International Monetary

Fund, plus or minus transactions in SDRs.

⁴ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be agreed upon by the parties to the transactions.

⁵ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota.

¹ Includes Bank for International Settlements.² Derived by applying reported transactions to benchmark data.³ Beginning in March 1988, includes current value of zero-coupon, 20-year maturity Treasury bond issue to the Government of Mexico. Beginning March 1990, also includes current value of zero-coupon, 30-year maturity Treasury bond issue to the Government of Mexico. Also see footnote 1, table IFS-3.⁴ Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.⁵ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."⁶ Includes marketable U.S. Government bonds and notes held by foreign banks.⁷ Includes nonmarketable U.S. Government bonds and notes held by foreign banks.⁸ Principally the International Bank for Reconstruction and Development, the Inter-American

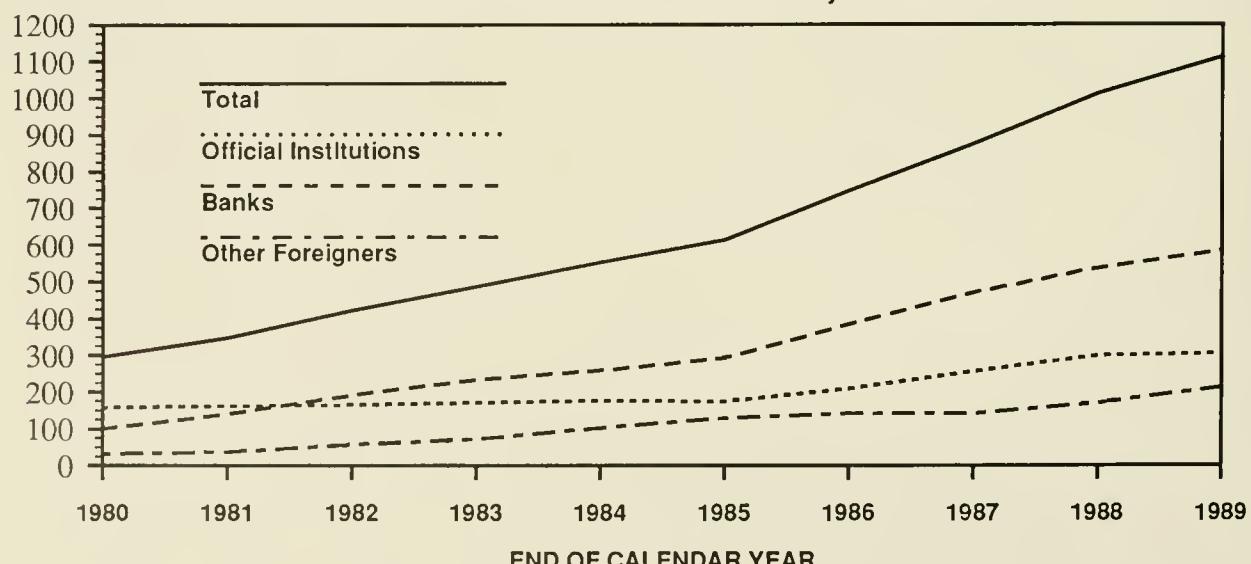

Development Bank, and the Asian Development Bank.

⁹ Data on the two lines shown for this date reflect different benchmark bases for foreigners' holdings of selected U.S. long-term securities. Figures on the first line are comparable to those for earlier dates; figures on the second line are based in part on a benchmark survey as of end-year 1984 and are comparable to those shown for following dates.

Note.-Table is based on Treasury Department data and on data reported to the Treasury Department by banks, other depository institutions, and brokers in the United States. Data correspond generally to statistics in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

SELECTED U.S. LIABILITIES TO FOREIGNERS, 1980-89

In Billions of Dollars. Data 1984-89 Based on Benchmark Survey as of Yearend 1984.

30-year maturity Treasury bond issue to the Government of Mexico. Face value of issue is \$30,220 million.

INTERNATIONAL FINANCIAL STATISTICS

These indices are presented to provide measures of the general foreign exchange value of the dollar that are broader than those provided by single exchange rate levels. They do not purport to represent a guide to measuring the impact of exchange rate levels

on U.S. international transactions. The indices are computed as geometric averages of individual currency levels with weights derived from the share of each country's trade with the United States during 1982-83.

Table IFS-4.--Trade-Weighted Index of Foreign Currency Value of the Dollar

¹ Each index covers (a) 22 currencies of countries represented in the Organization for Economic Cooperation and Development (OECD): Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the

United Kingdom; and (b) currencies of 4 major trading economies outside the OECD: Hong Kong, Korea, Singapore, and Taiwan. Exchange rates are drawn from the International Monetary Fund's "International Financial Statistics" when available.

² Index includes average annual rates as reported in "International Financial Statistics."

CAPITAL MOVEMENTS

INTRODUCTION

Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by commercial banks, other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the *Treasury Bulletin*.

The reporting forms and instructions¹ used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. The most recent, general revision of the report forms became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31, 1978. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

Basic Definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements, which is included in the classification "Other Europe."

Reporting Coverage

Reports are required from banks, other depository institutions, bank holding companies, International Banking Facilities (IBFs), securities brokers and dealers, and nonbanking enterprises in the

United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks, other depository institutions, and some brokers and dealers file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies *vis-a-vis* foreigners. Effective January 31, 1984, the specified exemption level applicable to the monthly and quarterly banking reports was raised from \$10 million to \$15 million. There is no separate exemption level for the semiannual reports.

Banks, other depository institutions, securities brokers and dealers, and other enterprises report monthly their transactions in long-term securities with foreigners. The applicable exemption level is \$500,000 with respect to the grand total of purchases and to the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks, other depository institutions, brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated foreigners at quarter-end exceed specified exemption levels. Effective March 31, 1982, this exemption level was set at \$10 million, up from \$2 million. Nonbanking enterprises also report for each monthend their U.S. dollar-denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, other depository institutions, brokers, and dealers in the United States. Beginning April 1978, the following major changes were made in the reporting coverage: Amounts due to banks' own foreign offices are reported separately; a previous distinction between short-term and long-term liabilities was eliminated; a separation was provided of the liabilities of the respondents themselves from their custody liabilities to foreigners; and foreign currency liabilities are only available quarterly. Also, beginning April 1978, the data on liabilities were made more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners. Effective as of January 31, 1985, savings and loan associations and other thrift institutions began to file the TIC banking forms. Previously they had reported on TIC forms for nonbanking enterprises.

Section II presents the claims on foreigners reported by banks, other depository institutions, and brokers and dealers in the United States. Beginning with data reported as of the end of April 1978, a distinction was made between banks' claims held for their own account and claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, the distinction in reporting of long-term and short-term components of banks' claims was discontinued. Maturity data began to be collected quarterly on a time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency claims are also collected on a quarterly basis only. Beginning March 1981, this claims coverage

¹Copies of the reporting forms and instructions may be obtained from the Office of Data Management, Office of the Assistant Secretary for International Affairs, Department of the Treasury, Washington, D.C. 20220, or from district Federal Reserve banks.

CAPITAL MOVEMENTS

was extended to certain items in the hands of brokers and dealers in the United States. See notes to section I above concerning the reporting of thrift institutions.

Another important change in the claims reporting, beginning with new quarterly data as of June 30, 1978, was the adoption of a broadened concept of "foreign public borrower," which replaced the previous category of "foreign official institution" to produce more meaningful information on lending to the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departments; State, provincial, and local governments of foreign countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section III includes supplementary statistics on U.S. banks' liabilities to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the TIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. banks' dollar liabilities to, and banks' own dollar claims on, countries not regularly reported separately are available semiannually in the June and December issues of the *Treasury Bulletin*.

Section IV shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns; financial institutions other than banks, other depository institutions, and brokers; and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data

also exclude claims held through banks in the United States. Beginning with data reported as of December 31, 1978, financial liabilities and claims of reporting enterprises are distinct from their commercial liabilities and claims; and items are collected on a time remaining to maturity basis instead of the original maturity basis used previously.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks, brokers, and other entities in the United States (except nonmarketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, table IFS-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

FOREIGN CURRENCY POSITIONS

INTRODUCTION

Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U.S. banks and nonbanking firms. Reports cover five major foreign exchange market currencies and U.S. dollars held abroad. Reporting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of March 16, 1983, for the weekly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of March 1983.

Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions," and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majority-owned subsidiaries of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or indirectly, own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

Reporting Threshold

The exemption level applicable to banks and banking institutions was \$10 million equivalent through January 1982, when it was raised to \$100 million. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 million equivalent on all nonbank forms from March 1975 through November 1976. It was raised to \$2 million equivalent on the monthly reports of positions held in the United States from November 1976 through September 1978. The exemption level was raised to \$3 million on foreign subsidiary positions on June 30, 1977, and for positions held in the United States on September 30, 1978. The exemption level for nonbanking firms was raised to \$100 million on positions in the United States in January 1982 and on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries, U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

Description of Statistics

Data collected on the Treasury foreign currency forms are published in the *Treasury Bulletin* in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

FOREIGN CURRENCY POSITIONS

Footnotes to Tables FCP-I through FCP-VII

SECTION I

¹ Worldwide net positions on the last business day of the calendar quarter of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. Excludes receivables and installment paper which have been sold or discounted before maturity, U.S. parent companies' investment in their majority-owned foreign subsidiaries, fixed assets (plant and equipment), and capitalized leases for plant and equipment.

² Foreign branches and majority-owned partnerships and subsidiaries only.

³ Weekly worldwide net positions of banks and banking institutions in the United States, and their foreign branches and majority-owned foreign subsidiaries. Excludes capital assets and liabilities.

⁴ Foreign branches and majority-owned subsidiaries only.

² Excludes receivables and installment paper sold or discounted before maturity, fixed assets (plant and equipment), and parents' investment in majority-owned foreign subsidiaries.

³ Capitalized plant and equipment leases are excluded.

⁴ Includes both spot and forward exchange rates.

⁵ Columns 1 and 3 less columns 2 and 4.

⁶ Representative rates on the report date. Canadian dollar and United Kingdom pound rates are expressed in U.S. dollars per unit of foreign currency, all others in foreign units per U.S. dollar. The source of the automated representative rates changed as of June 30, 1988.

⁷ Banks and banking institutions in the United States and their foreign branches and majority-owned subsidiaries. In section VII, foreign branches and majority-owned subsidiaries only.

⁸ Excludes capital assets.

⁹ Excludes capital liabilities.

¹⁰ Includes both spot and forward exchange contracts.

¹¹ Columns 3 and 9 less columns 6 and 12.

¹² See footnote 6.

SECTIONS II THROUGH VII

¹ Positions of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. In section VII positions of foreign branches and majority-owned partnerships and subsidiaries only.

EXCHANGE STABILIZATION FUND

INTRODUCTION

Background

The Exchange Stabilization Fund (ESF) was established under the Gold Reserve Act of January 30, 1934 (31 U.S.C. 822a). This act authorized the establishment in the Department of the Treasury of a stabilization fund to be operated under the exclusive control of the Secretary of the Treasury, with the approval of the President, for the purpose of stabilizing the exchange value of the dollar. Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

The resources of the fund consist of dollar balances, partly invested in U.S. Government securities, special drawing rights (SDRs), and balances of foreign currencies.

The principal sources of income or losses for the ESF have been profits or losses on holdings of and transactions in SDRs and foreign exchange, and the interest earned on assets.

Definitions

Special drawing rights.--International assets created by the International Monetary Fund (IMF). They serve to increase international liquidity and provide additional international reserves, and may be purchased and sold among eligible holders through the IMF.

SDR allocations.--The counterpart of SDRs issued by the IMF based on members' quota in the IMF. Although shown in ESF state-

ments as liabilities, they must be redeemed by the ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR Department of the IMF or cancellation of SDRs.

SDR certificates.--Issued to the Federal Reserve System against SDRs when SDRs are "monetized" and the proceeds of the monetization are deposited in an ESF account at the Federal Reserve Bank of New York.

Description of Tables

Table ESF-1 presents the assets, liabilities, and capital of the ESF. Data are presented in U.S. dollars or U.S. dollar equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the ESF by Congress of \$2 billion, less a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the IMF. Subsequent gains and losses since inception are reflected in the cumulative net income (loss) account.

Table ESF-2 presents the results of operations by quarter. Data are presented in U.S. dollars or U.S. dollar equivalents computed according to the accrual method of accounting. The "Profit (loss) on foreign exchange" includes realized profits (losses) on sales of foreign currencies as well as revaluation gains (losses) on currencies held. "Adjustment for change in valuation of SDR holdings and allocations" reflects the net gain (loss) on revaluation of SDR holdings and allocations for the quarter.

Table ESF-2.--Income and Expense

[In thousands of dollars]

	Current quarter Jan. 1, 1990, through Mar. 31, 1990	Year to date Oct. 1, 1989, through Mar. 31, 1990
Income and expense:		
Profit (loss) on:		
Foreign exchange	(722,204)	(395,451)
Adjustment for change in valuation of SDR holdings and allocations 1	(40,177)	53,006
Interest (net charges) on:		
Special drawing rights	82,960	157,910
U.S. Government securities	15,411	33,419
Foreign exchange	222,322	420,547
Income from operations	(441,688)	269,431
Net income	(441,688)	269,431

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SDRs) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

² Excludes foreign exchange transactions for future and spot delivery.

³ A non-interest-bearing liability to the U.S. Treasury resulting from the transfer to the Exchange Stabilization Fund of foreign currencies drawn from the IMF by the United States.

Note.--Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the *Treasury Bulletin*. Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 *Treasury Bulletin*.

SPECIAL REPORTS

***CONSOLIDATED FINANCIAL STATEMENTS
OF THE UNITED STATES GOVERNMENT
FISCAL YEAR 1989/PROTOTYPE***

INTRODUCTION

The fiscal year 1989 edition of the Consolidated Financial Statements of the United States Government was recently released. The statements and accompanying information, prepared and published annually by Treasury's Financial Management Service, are unique since they are developed on the accrual basis of accounting and modeled after corporate-type reports.

This general purpose report provides, for instance, a snapshot of what the Federal Government owns and owes in presenting summary information on its financial condition and operations. Data originate in program agency accounting systems Governmentwide and are captured in the five consolidated statements of: Financial position, operations, changes in financial position, receipts and outlays, and reconciliation of accrual operating results to the cash basis budget. The customary notes to financial statements and several broad supplemental tables, ranging from accounts and loans receivable due from the public to Federal obligations, complete the publication's content.

An extract of the 1989 statements is published in this issue of the *Treasury Bulletin*. The excerpts will give readers a view of some of the most noteworthy information in the statements. The entire 40-page document is for sale through the Superintendent of Documents, U.S. Government Printing Office. An order form is printed at the end of the *Bulletin*.

CONSOLIDATED FINANCIAL STATEMENTS

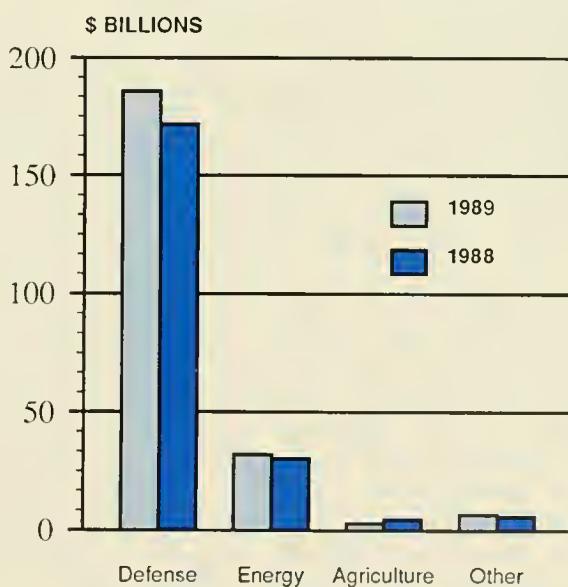

**United States Government Consolidated Statement
of Financial Position as of September 30, 1989 and 1988**
(\$ billions)

	1989	1988

INVENTORIES BY MAJOR AGENCY

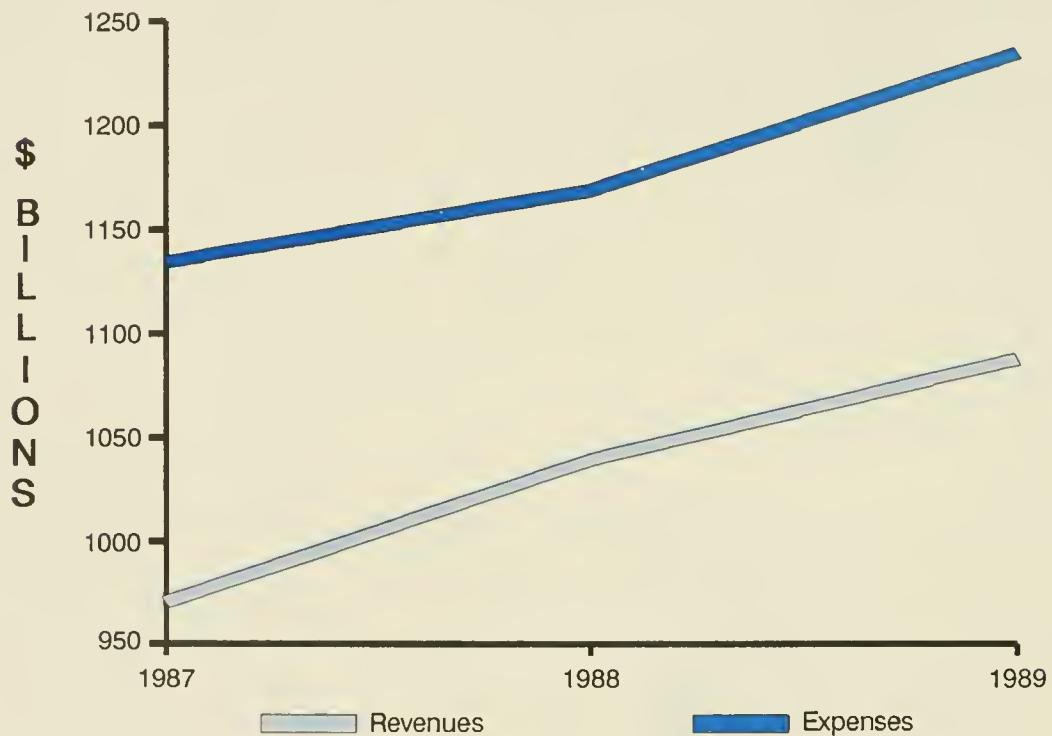

FINANCIAL HIGHLIGHTS

Revenues and expenses

The following graphs show revenues and expenses for fiscal years 1987 through 1989, and the major categories of revenues by source and expenses by agency for fiscal 1989. Certain revenue amounts have been reported on the accrual basis and differ from those reported on the cash basis. The data supporting the graph of expenses by agency are also reported on the accrual basis and differ from those reported on the cash basis.

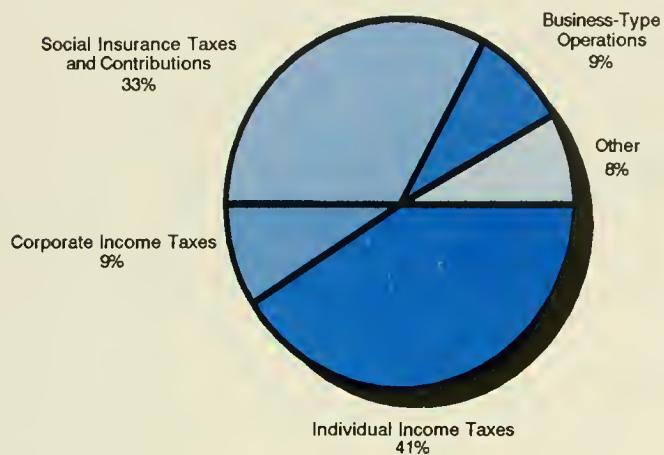

**TOTAL REVENUES AND TOTAL EXPENSES
FISCAL YEARS 1987-89**

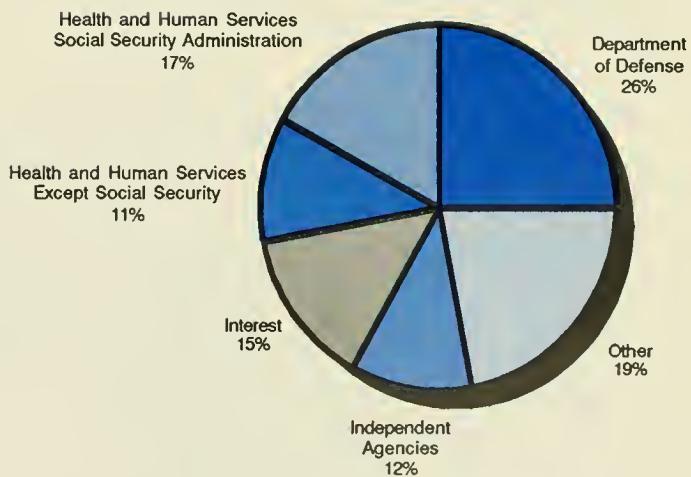

Revenues and expenses

FISCAL YEAR 1989

MAJOR SOURCES OF REVENUES

MAJOR CATEGORIES OF EXPENSES

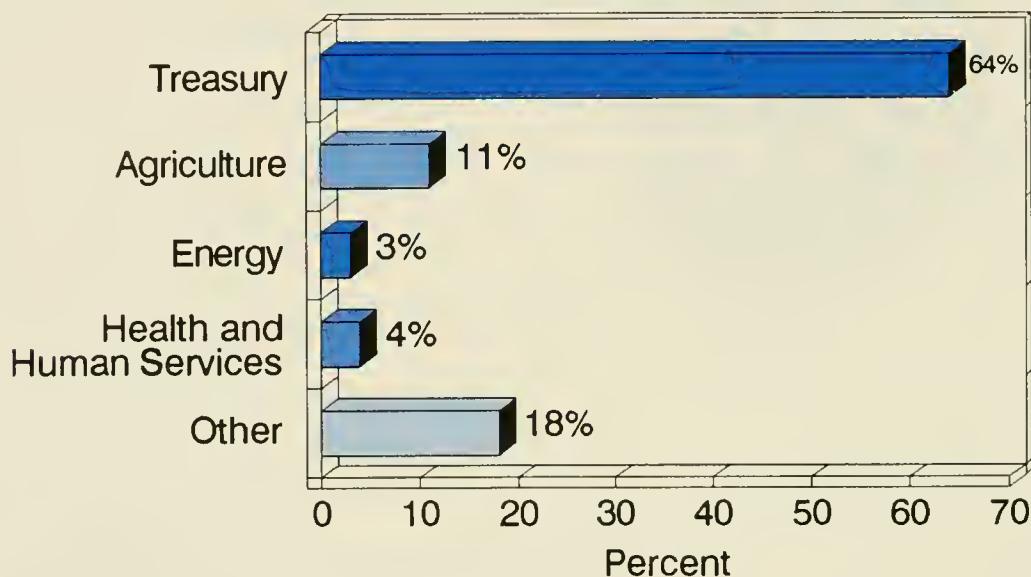

SUPPLEMENTAL TABLES

SUMMARY OF ACCOUNTS AND LOANS RECEIVABLE DUE FROM THE PUBLIC

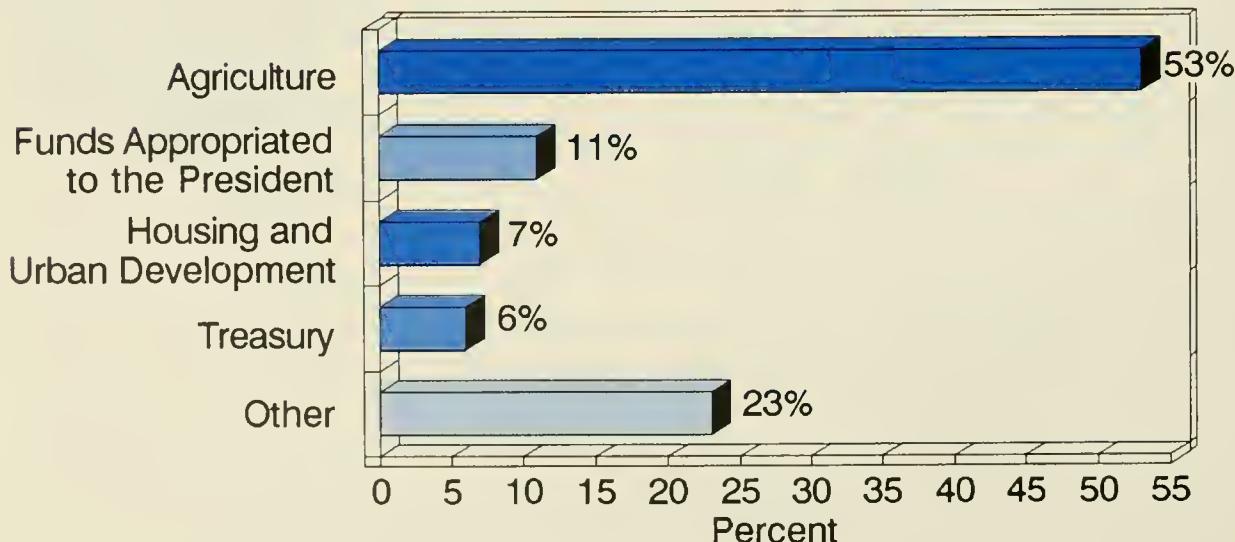

Total accounts receivable amounted to \$98.5 billion in FY 1989, an increase of \$0.4 billion over FY 1988. Total loans receivable amounted to \$211.8 billion in FY 1989, a decrease of \$2.3 billion from FY 1988. Graphically depicted below are summaries by selected agencies of accounts and loans receivable data.

ACCOUNTS RECEIVABLE \$98.5 billion

LOANS RECEIVABLE

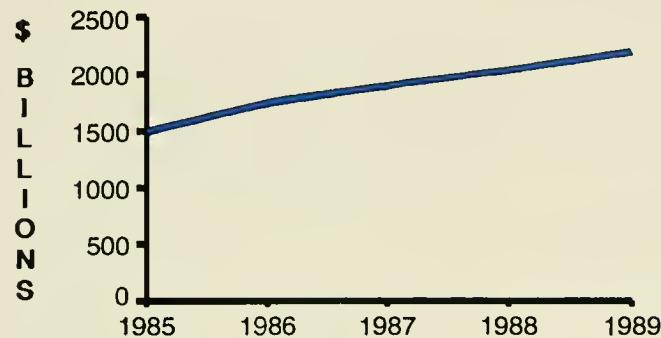

\$211.8 billion

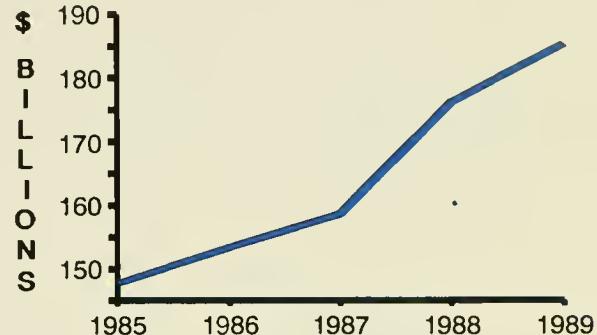

FEDERAL DEBT

Total Federal debt held by the public amounted to \$2,188.8 billion in FY 1989, an increase of \$138.8 billion from FY 1988. These charts have been presented to graphically show the increase in Federal debt and the interest expense.

**FEDERAL DEBT HELD BY THE PUBLIC
FY 1985-89**

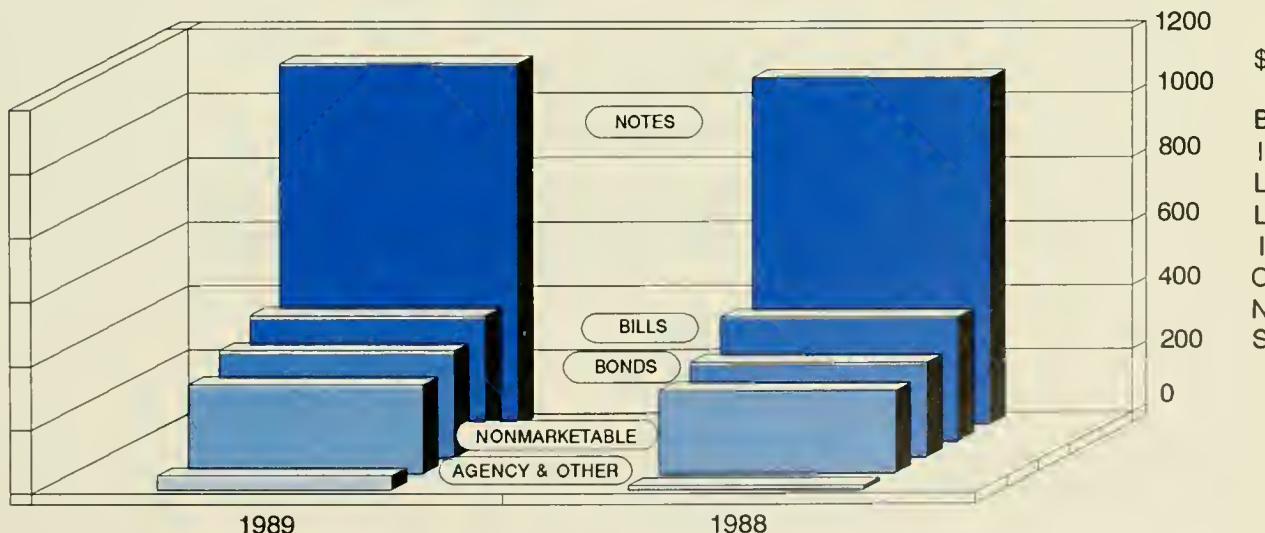

**INTEREST EXPENSE
FY 1985-89**

The distribution of 1989 and 1988 net debt from the public by major type of securities is graphically depicted.

NET DEBT BY TYPE OF SECURITIES

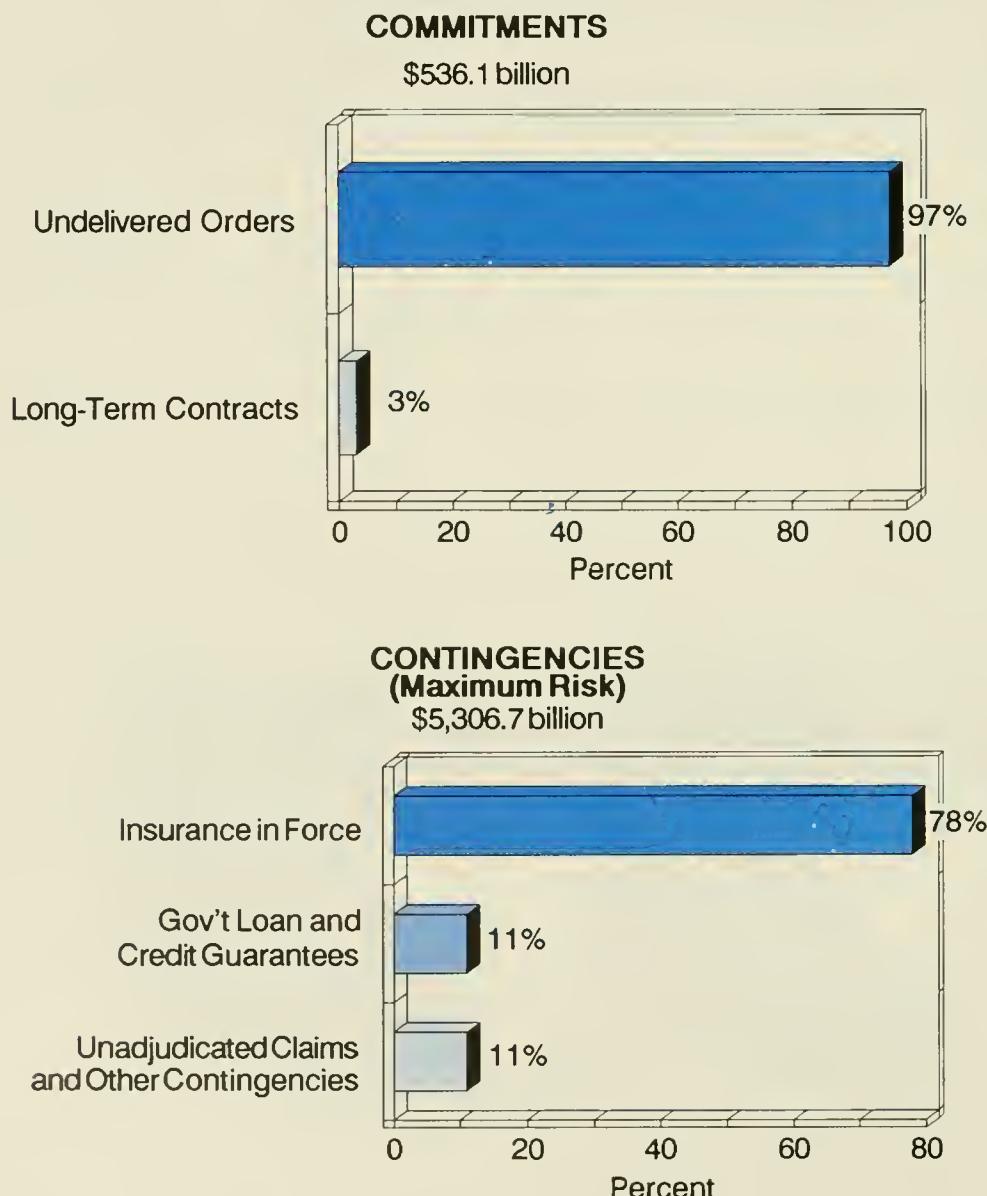

COMMITMENTS AND CONTINGENCIES

Commitments are long-term contracts for which appropriations have not been provided by the Congress and undelivered orders which represent obligations.

A contingency is a liability involving uncertainty as to a possible loss to the Government that will be resolved when one or more future events occur or fail to occur. If the future event or events are likely to occur and the amounts can be reasonably estimated, the liabilities are reported in the Statement of Financial Position under "Other liabilities." Contingencies within the Federal Government result from a number of sources including loan and credit guarantees, insurance programs, and unadjudicated claims.

In FY 1989, total commitments amounted to \$536.1 billion and total contingencies amounted to \$5,306.7 billion. Total contingencies represent the maximum risk of exposure without regard to probability of occurrence and without deduction for existing and contingent assets which would be available to offset potential losses. The charts below show the percentage distribution of 1989 commitments and contingencies by source category.

***U.S. CURRENCY AND COIN OUTSTANDING
AND IN CIRCULATION***

U.S. CURRENCY AND COIN OUTSTANDING AND IN CIRCULATION

INTRODUCTION

Purpose and Scope

The U.S. Currency and Coin Outstanding and in Circulation Statement is prepared to inform the public of the face value of currency and coin which are used as a medium of exchange and the total thereof, as of the end of a given accounting month.

The statement defines the total amount of currency and coin outstanding and the portion of which is deemed to be in circulation. Although it still includes some old and current rare issues of coin and currency which do not circulate or may do so to a limited extent, Treasury policy is to continue their inclusion in the statement since such issues were originally intended for general circulation. The statement also provides a brief description of the various issues of U.S. paper money and further presents a comparative amount of money circulated in relation to population.

History

Statements of currency and coin outstanding and in circulation have been published by the Department of the Treasury since 1888. These statements were originally prepared monthly by the Division of Loans and Currency, which was then under the Office of the Secretary of the Treasury but later became part of the Public Debt Service (currently known as the Bureau of the Public Debt) in 1929. The statement was published with the title "Circulation Statement of United States Money" from 1923 through December 31, 1965. Concurrently, from December 31, 1919, to September 30, 1951, the Office of the U.S. Treasurer published a statement entitled "Monthly Statement—Paper Currency of Each Denomination Outstanding." Two months after the Office of the U.S. Treasurer assumed publication of the "Circulation Statement of United States Money," a revision was made to the statement to include denomination detail of the currency in circulation. Publication of the "Monthly Statement—Paper Currency of Each Denomination Outstanding" was discontinued, and the revised version which combines information from both statements became known as the United States Currency and Coin Outstanding and in Circulation Statement. The statement in 1983 ceased to be published as a separate, monthly release and instead was incorporated into the quarterly *Treasury Bulletin* as a special report.

Definition of Terms

The classification "Amounts outstanding and in circulation" includes all issues by the Bureau of the Mint which are purposely intended as a medium of exchange. Therefore, coins sold by the Bureau of the Mint at premium prices are excluded. However, uncirculated coin sets, sold by the Mint at face value plus a handling charge, are included.

The term "Federal Reserve notes" refers to issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. These notes represent U.S. Government obligations. Currently, the item "Federal Reserve notes—amounts outstanding" consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

"U.S. notes" are also known as legal tender notes and were issued in five different issues; namely, (a) First Issue—1862 (\$5 to \$1,000 notes), (b) Second Issue—1862 (\$1 to \$2 notes), (c) Third Issue—1863 (\$5 to \$1,000 notes), (d) Fourth Issue—1863 (\$1 to \$10,000 notes), and (e) Fifth Issue—1901 (\$10 notes).

The column for "Currency no longer issued" consists of gold certificates (old and new series), silver certificates (old and new series), Federal Reserve notes (old and new series), national bank notes (old and new series), and Treasury notes (1890 series).

"Dollar coins" include standard silver coins and nonsilver coins.

"Fractional coins" include subsidiary coins in denominations of 50 cents, 25 cents, and 10 cents and minor coins (5 cents and 1 cent).

Reporting Sources

Data used in the preparation of the U.S. Currency and Coin Outstanding and in Circulation Statement is derived from monthly reports required from Treasury offices, various U.S. Mint offices, the Federal Reserve banks, and the Federal Reserve Board. Such reports convey information about the amount, class, and denomination of new issues of currency and/or coin, of destroyed and replaced currency, and of currency and coins withdrawn from circulation. Estimates of population from the Bureau of the Census are used in the calculation of money circulated per capita.

Information about the Superintendent of Documents Subscription Service

Current Subscribers

To know when to expect your renewal notice and keep a good thing coming . . . to keep subscription prices down, the Government Printing Office mails each subscriber only one renewal notice. You can learn when you will get your renewal notice by checking the number that follows ISSDUE on the top line of your label as shown in this example:

When this digit is 0, a renewal notice
..... / will be sent.

.....
TRBU SMITH212J ISSDUE000 R 1
JOHN SMITH
212 MAIN ST
FORESTVILLE MD 20747
.....

When that number reads ISSDUE000, you have received your last issue unless you renew. You should receive your renewal notice around the same time that you receive the issue with ISSDUE000 on the top line.

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402-9372 with the proper remittance, and your service will be reinstated.

To change your address . . . please SEND YOUR MAILING LABEL, along with your new address, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402-9373.

To inquire about your subscription service . . . please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402-9375.

New Subscribers

To order a new subscription . . . please use the order form provided below.
