* Less than \$500,000.

Note.—Outlays consist of disbursements less proprietary receipts from the public and certain intrabudgetary transactions. Budget estimates are based on current budget estimates released Apr. 15, 1985, by the Office of Management and Budget.

FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, and consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order, but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In table FO-1, obligations incurred within the Government are distinguished from those incurred outside the Government. Table FO-2 shows only those incurred outside.

Table FO-1. -- Gross Obligations Incurred Within and Outside the Federal Government by Object Class, as of Mar. 31, 1985

[In millions of dollars. Source: Standard Form 225, Report on Obligations, from agencies]

Object class	Gross obligations incurred		
	Outside	Within	Total
Personal services and benefits:

1/ For Federal budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (Data are on the basis of Reports on Obligations

presentation and therefore may differ somewhat from the Budget of the U.S. Government.)
 Gross obligations incurred (as above)..... 643,326
 Deduct:
 Advances, reimbursements, other income, etc..... -93,402
 Offsetting receipts..... -80,229
 Net obligations incurred..... 469,695

ACCOUNT OF THE U.S. TREASURY

SOURCE AND AVAILABILITY OF THE BALANCE IN THE ACCOUNT OF THE U.S. TREASURY

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. Major information sources include the Daily Balance Wire received from the Federal Reserve banks and branches, and electronic transfers through the Treasury Financial Communications System. As the balances in the accounts at the Federal Reserve banks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on Nov. 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate in the program. Depositaries that wish to retain funds deposited in their tax and loan accounts in interest-bearing obligations participate under the Note Option; depositaries that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remittance Option.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same financial institution. On occasions, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the accounts of their customers.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuation operations on Note Option financial institution reserves and the economy.

Table UST-1. — Elements of Changes in Federal Reserve and Tax and Loan Note Account Balances

* Less than \$500,000.

1/ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.

2/ Represents checks paid, wire transfer payments, drawdowns on letter of credit, redemptions of securities other than Government account series, etc.

3/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.

4/ Includes U.S. savings bonds, savings notes, retirement plan and tax

and loss bonds. U.S. savings notes first offered for sale as of May 1, 1967, and were discontinued after June 30, 1970. Retirement plan bonds first offered for sale as of Jan. 1, 1963; tax and loss bonds first issued in March 1968.

5/ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositaries, as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after Mar. 15, 1968, and FUTA taxes beginning April 1970.

1/ Pursuant to Public Law 98-371, dated July 18, 1984, all principal and interest for the Government National Mortgage Association was canceled effective Oct. 1, 1984.

Note.--These securities were issued to the Treasury in exchange for advances by the Treasury from public debt receipts under congressional authorizations for specified Government corporations and other agencies to borrow from the Treasury.

TREASURY FINANCING OPERATIONS, APRIL-JUNE 1985

APRIL

Auction of 2-Year Notes

On April 17 the Treasury announced that it would auction \$9,000 million of 2-year notes to refund \$8,225 million of notes maturing April 30, 1985, and to raise about \$775 million new cash. The notes offered were Treasury Notes of Series U-1987, dated April 30, 1985, due April 30, 1987, with interest payable on October 31 and April 30 until maturity. An interest rate of 9-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, April 24, and totaled \$20,622 million, of which \$9,026 million was accepted at yields ranging from 9.80 percent, price 99.911, up to 9.82 percent, price 99.876. Tenders at the high yield were allotted 86 percent. Noncompetitive tenders were accepted in full at the average yield, 9.81 percent, price 99.893. These totaled \$1,216 million. Competitive tenders accepted from private investors totaled \$7,810 million.

In addition to the \$9,026 million of tenders accepted in the auction process, \$523 million was awarded at the average price to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$347 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

52-Week Bills

On April 4 tenders were invited for approximately \$8,300 million of 364-day Treasury bills to be dated April 18, 1985, and to mature April 17, 1986. The issue was to refund \$8,282 million of 364-day bills maturing April 18. Tenders were opened on April 11. They totaled \$25,224 million, of which \$8,337 million was accepted, including \$741 million of noncompetitive tenders from the public and \$1,525 million of the bills issued at the average price to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 8.44 percent.

Cash Management Bills

On April 11 tenders were invited for approximately \$4,000 million of 3-day bills to be issued April 15, 1985, representing an additional amount of bills dated April 19, 1984, maturing April 18, 1985. The issue was to raise new cash. Tenders were opened on April 12. They totaled \$28,858 million, of which \$4,001 million was accepted. The average bank discount rate was 8.43 percent.

MAY

May Quarterly Financing

On April 30 the Treasury announced that it would sell to the public at auction, under competitive and noncompetitive bidding, up to \$8,000 million of 3-year notes of Series 5-1988, \$6,500 million of 10-year notes of Series 8-1995, and \$6,000 million of 29-3/4-year 11-1/4 percent bonds of 2015 to refund \$10,623 million of publicly held Treasury securities maturing May 15 and to raise \$9,875 million new cash.

An interest rate of 10 percent was set on the notes of Series 5-1988 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series 5-1988 were dated May 15, 1985, due May 15, 1988, with interest payable on November 15 and May 15 until maturity.

Tenders for the notes of Series 5-1988 were received until 1 p.m. EDT, May 7, and totaled \$17,974 million, of which \$8,005 million was accepted at yields ranging from 9.98 percent, price 100.051, up to 10.03 percent, price 99.924. Tenders at the high yield were allotted 46 percent. Noncompetitive tenders were accepted in full at the average yield, 10.00 percent, price 100.000. These totaled \$1,352 million. Competitive tenders accepted from private investors totaled \$6,653 million.

In addition to the \$8,005 million of tenders accepted in the auction process, \$470 million was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,400 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

An interest rate of 11-1/4 percent was set on the notes of Series 8-1995 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series 8-1995 were dated May 15, 1985, due May 15, 1995, with interest payable on November 15 and May 15 until maturity.

Tenders for the notes of Series 8-1995 were received until 1 p.m. EDT, May 8, and totaled \$15,225 million, of which \$6,501 million was accepted at yields ranging from 11.28 percent, price 99.823, up to 11.32 percent, price 99.587. Tenders at the high yield were allotted 24 percent. Noncompetitive tenders were accepted in full at the average yield, 11.30 percent, price 99.705. These totaled \$721 million. Competitive tenders accepted from private investors totaled \$5,780 million.

In addition to the \$6,501 million of tenders accepted in the auction process, \$5 million was awarded at the average price to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$600 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

The notes of Series 8-1995 may be held in STRIPS form. The minimum par amount required is \$160,000.

The 11-1/4 percent bonds of 2015 were an additional issue of the bonds dated February 15, 1985, due February 15, 2015, with interest payable on August 15 and February 15 until maturity.

Tenders for the bonds were received until 1 p.m. EDT, May 9, and totaled \$15,870 million, of which \$6,020 million was accepted at yields ranging from 11.36 percent, price 98.990, up to 11.39 percent, price 98.739. Tenders at the high yield were allotted 36 percent. Noncompetitive tenders were accepted in full at the average yield, 11.38 percent, price 98.822. These totaled \$554 million. Competitive tenders accepted from private investors totaled \$5,466 million.

In addition to the \$6,020 million of tenders accepted in the auction process, \$405 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

The bonds of 2015 may be held in STRIPS form. The minimum par amount required is \$160,000.

Auction of 2-Year Notes

On May 15 the Treasury announced that it would auction \$9,000 million of 2-year notes to refund \$8,141 million of publicly held notes maturing May 31, 1985, and to raise about \$850 million new cash. The notes offered were Treasury Notes of Series V-1987, dated May 31, 1985, due May 31, 1987, with interest payable on November 30 and May 31 until maturity. An interest rate of 9-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDT, May 22, and totaled \$22,739 million, of which \$9,000 million was accepted at yields ranging from 9.11 percent, price 100.027, up to 9.14 percent, price 99.973. Tenders at the high yield were allotted 47 percent. Noncompetitive tenders were accepted in full at the average yield, 9.13 percent, price 99.991. These totaled \$1,029 million. Competitive tenders accepted from private investors totaled \$7,971 million.

In addition to the \$9,000 million of tenders accepted in the auction process, \$745 million was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$540 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

Auction of 5-Year 2-Month Notes

On May 21 the Treasury announced that it would auction \$7,000 million of 5-year 2-month domestic notes and up to \$1,000 million of 5-year 2-month foreign-targeted notes to raise new cash.

The domestic notes were Treasury Notes of Series K-1990, dated June 4, 1985, due August 15, 1990, with interest payable on February 15 and August 15 in each year until maturity. The foreign-targeted notes were Treasury Notes of Series L-1990, dated June 4, 1985, due August 15, 1990, with interest payable on August 15 in each year until maturity. An interest rate of 9-7/8 percent was set on both issues after the determination as to which tenders were accepted on a yield auction basis.

The foreign-targeted notes were sold, under competitive bidding only, to foreign institutions or to foreign branches of U.S. financial institutions. The notes were issued in book-entry form and were eligible for exchange into registered notes of the companion domestic issue, Series K-1990, or for conversion into registered foreign-targeted notes after July 14, 1985.

Tenders for the domestic notes were received until 1 p.m. EDT, May 29, and totaled \$15,196 million, of which \$7,012 million was accepted at yields ranging from 9.92 percent, price 99.729, up to 9.96 percent, price 99.570. Tenders at the high yield were allotted 67 percent. Noncompetitive tenders were accepted in full at the average yield, 9.95 percent, price 99.610. These totaled \$610 million. Competitive tenders accepted from private investors totaled \$6,402 million.

In addition to the \$7,012 million of tenders accepted in the auction process, \$155 million was awarded at the average price to Federal Reserve banks as agents for foreign and international monetary authorities.

Tenders for the foreign-targeted notes were received until 1 p.m. EDT, May 29, at the Federal Reserve Bank of New York, and totaled \$2,464 million, of which \$1,000 million was accepted. The interest rate of 9-7/8 percent was established in the auction of the companion domestic issue. Accepted yields, based on an annual interest payment, ranged from 9.93 percent, price 99.684, up to 10.03 percent, price 99.293. Tenders at the high yield were allotted 67 percent. The average yield of the accepted competitive tenders was 10.00 percent, price 99.410. Noncompetitive tenders were not accepted.

52-Week Bills

On May 3 tenders were invited for approximately \$8,500 million of 364-day Treasury bills to be dated May 16, 1985, and to mature May 15, 1986. The issue was to refund \$8,111 million of 364-day bills maturing May 16 and to raise about \$400 million new cash. Tenders were opened on May 14. They totaled \$29,742 million, of which \$8,519 million was accepted, including \$645 million of noncompetitive tenders from the public and \$1,800 million of the bills issued at the average price to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$5 million was issued to foreign official institutions for new cash. The average bank discount rate was 7.94 percent.

Cash Management Bills

On May 28 tenders were invited for approximately \$7,000 million of 17-day bills to be issued June 3, 1985, representing an additional amount of bills dated December 20, 1984, maturing June 20, 1985. The issue was to raise new cash. Tenders were opened on May 30. They totaled \$40,833 million, of which \$7,052 million was accepted. The average bank discount rate was 7.33 percent.

TREASURY FINANCING OPERATIONS, APRIL-JUNE 1985

J U N E

Auction of 2-Year Notes

On June 12 the Treasury announced that it would auction \$9,250 million of 2-year notes to refund \$8,000 million of publicly held notes maturing June 30, 1985, and to raise about \$1,250 million new cash. The notes offered were Treasury Notes of Series W-1987, dated July 1, 1985, due June 30, 1987, with interest payable on December 31 and June 30 until maturity. An interest rate of 8-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, June 19, and totaled \$17,168 million, of which \$9,252 million was accepted at yields ranging from 8.48 percent, price 100.036, up to 8.54 percent, price 99.928. Tenders at the high yield were allotted 59 percent. Noncompetitive tenders were accepted in full at the average yield, 8.51 percent, price 99.982. These totaled \$924 million. Competitive tenders accepted from private investors totaled \$8,328 million.

In addition to the \$9,252 million of tenders accepted in the auction process, \$535 million was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$799 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

Auction of 4-Year Notes, 7-Year Notes, and 20-Year 1-Month Bonds

On June 18 the Treasury announced that it would sell to the public at auction, under competitive and noncompetitive bidding, up to \$6,500 million of 4-year notes of Series M-1989, \$6,000 million of 7-year notes of Series F-1992, and \$4,250 million of 20-year 1-month bonds of 2005 to refund \$3,116 million of publicly held 4-year notes maturing June 30 and to raise about \$13,875 million new cash.

An interest rate of 9-5/8 percent was set on the notes of Series M-1989 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series M-1989 were dated July 1, 1985, due June 30, 1989, with interest payable on December 31 and June 30 until maturity.

Tenders for the notes of Series M-1989 were received until 1 p.m. EDST, June 25, and totaled \$16,586 million, of which \$6,542 million was accepted at yields ranging from 9.70 percent, price 99.756, up to 9.72 percent, price 99.691. Tenders at the high yield were allotted 87 percent. Noncompetitive tenders were accepted in full at the average yield, 9.72 percent, price 99.691. These totaled \$741 million. Competitive tenders accepted from private investors totaled \$5,801 million.

In addition to the \$6,542 million of tenders accepted in the auction process, \$410 million was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$500 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

An interest rate of 10-3/8 percent was set on the notes of Series F-1992 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series F-1992 were dated July 2, 1985, due July 15, 1992, with interest payable on January 15 and July 15 until maturity.

Tenders for the notes of Series F-1992 were received until 1 p.m. EDST, June 26, and totaled \$15,674 million, of which \$6,025 million was accepted at yields ranging from 10.37 percent, price 100.006, up to 10.41 percent, price 99.810. Tenders at the high yield were allotted 76 percent. Noncompetitive tenders were accepted in full at the average yield, 10.40 percent, price 99.859. These totaled \$740 million. Competitive tenders accepted from private investors totaled \$5,285 million.

An interest rate of 10-3/4 percent was set on the bonds of 2005 after the determination as to which tenders were accepted on a yield auction basis. The bonds of 2005 were dated July 2, 1985, due August 15, 2005, with interest payable on February 15 and August 15 until maturity. The bonds will become eligible for STRIPS on February 18, 1986.

Tenders for the bonds of 2005 were received until 1 p.m. EDST, June 27, and totaled \$13,533 million, of which \$4,510 million was accepted at yields ranging from 10.73 percent, price 100.098, up to 10.76 percent, price 99.852. Tenders at the high yield were allotted 92 percent. Noncompetitive tenders were accepted in full at the average yield, 10.75 percent, price 99.934. These totaled \$503 million. Competitive tenders accepted from private investors totaled \$4,007 million.

52-Week Bills

On May 31 tenders were invited for approximately \$8,500 million of 364-day Treasury bills to be dated June 13, 1985, and to mature June 12, 1986. The issue was to refund \$8,354 million of 364-day bills maturing June 13 and to raise about \$150 million new cash. Tenders were opened on June 6. They totaled \$22,482 million, of which \$8,511 million was accepted, including \$461 million of noncompetitive tenders from the public and \$2,085 million of the bills issued at the average price to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 7.18 percent.

/ The 13-week bills represent additional issue of bills with an original maturity of 26 weeks or 52 weeks.

/ For bills issued on or after May 2, 1974, includes amounts exchanged on noncompetitive basis by Government accounts and Federal Reserve banks.

/ For 13-week bills 26-week and 52-week bills tenders for \$1,000,000 or less from any one bidder are accepted in full at average price or accepted competitive bids; for other issues, the corresponding amount is stipulated in each offering announcement.

/ Equivalent coupon-issue yield.

/ Except \$3,680,000 at 8.56 percent.

6/ Except \$2,500,000 at 8.45 percent.

7/ Except \$600,000 at 7.97 percent and \$90,000 at 7.99 percent.

8/ Except \$40,000 at 7.80 percent.

9/ Except \$270,000 at 8.08 percent.

10/ Except \$105,000 at 7.88 percent and \$500,000 at 7.89 percent.

11/ Except \$2,200,000 at 7.33 percent.

12/ Except \$1,500,000 at 7.11 percent and \$1,500,000 at 7.12 percent.

13/ Except \$1,000,000 at 7.89 percent.

1/ Currently, all issues are sold at auction. For bill issues, the rate shown is the average bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings see table PDO-2.

2/ From date of additional issue in case of a reopening.

3/ In reopenings the amount issued is in addition to the amount of original offerings.

4/ Includes securities issued to U.S. Government accounts and Federal Reserve banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

5/ Foreign-targeted issue.

6/ Yields accepted ranged from 10.48% (price 99.975) up to 10.50% (price 99.897) with the average at 10.50% (price 99.897).

7/ Yields accepted ranged from 10.00% (price 100.000) up to 10.12% (price 99.788) with the average at 10.09% (price 99.841).

8/ Yields accepted ranged from 10.61% (price 99.649) up to 10.62% (price 99.617) with the average at 10.62% (price 99.617).

9/ Yields accepted ranged from 10.76% (price 99.936) up to 10.84% (price 99.550) with the average at 10.80% (price 99.743).

10/ Yields accepted ranged from 11.18% (price 99.497) up to 11.24% (price 99.024) with the average at 11.22% (price 99.181).

11/ Yields accepted ranged from 10.57% (price 100.097) up to 10.66% (price 99.838) with the average at 10.62% (price 100.009).

12/ Yields accepted ranged from 11.38% (price 99.988) up to 11.46% (price 99.789) with the average at 11.43% (price 99.864).

13/ Yields accepted ranged from 11.94% (price 99.626) up to 11.96% (price 99.512) with the average at 11.96% (price 99.512).

14/ Yields accepted ranged from 12.05% (price 99.597) up to 12.10% (price 99.198) with the average at 12.08% (price 99.357).

15/ Yields accepted ranged from 10.69% (price 99.886) up to 10.75% (price 99.780) with the average at 10.73% (price 99.815).

16/ Yields accepted ranged from 11.77% (price 99.802) up to 11.82% (price 99.726) with the average at 11.79% (price 99.726).

17/ Yields accepted ranged from 10.87% (price 100.009) up to 10.94% (price 99.886) with the average at 10.91% (price 99.939).

18/ Yields accepted ranged from 11.14% (price 99.953) up to 11.17% (price 99.858) with the average at 11.16% (price 99.889).

19/ Yields accepted ranged from 11.58% (price 99.605) up to 11.64% (price 99.323) with the average at 11.61% (price 99.464).

20/ Yields accepted ranged from 11.89% (price 99.813) up to 11.90% (price 99.737) with the average at 11.90% (price 99.737).

21/ Yields accepted ranged from 10.48% (price 100.035) up to 10.55% (price 99.912) with the average at 10.51% (price 99.982).

22/ Yields accepted ranged from 11.00% (price 100.00) up to 11.12% (price 99.701) with the average at 11.11% (price 99.726).

23/ Yields accepted ranged from 11.80% (price 99.711) up to 11.86% (price 99.366) with the average at 11.84% (price 99.480).

24/ Yields accepted ranged from 11.75% (price 101.791) up to 11.82% (price 101.387) with the average at 11.80% (price 101.553).

25/ Yields accepted ranged from 10.55% (price 99.912) up to 10.64% (price 99.754) with the average at 10.62% (price 99.789).

26/ Yields accepted ranged from 11.36% (price 99.934) up to 11.37% (price 99.896) with the average at 11.37% (price 99.896).

27/ Yields accepted ranged from 10.83% (price 100.079) up to 10.90% (price 99.956) with the average at 10.89% (price 99.974).

28/ Yields accepted ranged from 11.35% (price 99.686) up to 11.36% (price 99.655) with the average at 11.35% (price 99.686).

29/ Yields accepted ranged from 11.74% (price 100.028) up to 11.75% (price 99.981) with the average at 11.75% (price 99.981).

30/ Yields accepted ranged from 11.92% (price 99.538) up to 11.96% (price 99.237) with the average at 11.95% (price 99.312).

31/ Yields accepted ranged from 10.64% (price 99.974) up to 10.67% (price 99.921) with the average at 10.66% (price 99.938).

32/ Yields accepted ranged from 10.94% (price 99.837) up to 10.96% (price 99.788) with the average at 10.96% (price 99.788).

33/ Yields accepted ranged from 11.70% (price 100.203) up to 11.71% (price 100.145) with the average at 11.70% (price 100.203).

34/ Yields accepted ranged from 11.87% (price 101.059) up to 11.88% (price 100.977) with the average at 11.88% (price 100.977).

35/ Yields accepted ranged from 10.92% (price 99.921) up to 10.95% (price 99.868) with the average at 10.94% (price 99.886).

36/ Yields accepted ranged from 11.82% (price 99.609) up to 11.85% (price 99.495) with the average at 11.84% (price 99.533).

37/ Yields accepted ranged from 11.52% (price 99.965) up to 11.58% (price 99.861) with the average at 11.55% (price 99.913).

38/ Yields accepted ranged from 12.06% (price 99.814) up to 12.08% (price 99.752) with the average at 12.07% (price 99.783).

39/ Yields accepted ranged from 12.40% (price 99.863) up to 12.42% (price 99.771) with the average at 12.41% (price 99.817).

40/ Yields accepted ranged from 12.34% (price 100.180) up to 12.50% (price 99.008) with the average at 12.39% (price 99.811).

41/ Yields accepted ranged from 11.81% (price 99.896) up to 11.83% (price 99.861) with the average at 11.83% (price 99.861).

42/ Yields accepted ranged from 12.53% (price 99.927) up to 12.54% (price 99.902) with the average at 12.54% (price 99.902).

43/ Yields accepted ranged from 13.12% (price 100.027) up to 13.18% (price 99.699) with the average at 13.16% (price 99.808).

44/ Yields accepted ranged from 13.29% (price 99.705) up to 13.34% (price 99.339) with the average at 13.32% (price 99.485).

45/ Yields accepted ranged from 12.60% (price 100.043) up to 12.70% (price 99.871) with the average at 12.68% (price 99.905).

46/ Yields accepted ranged from 13.85% (price 99.911) up to 13.96% (price 99.511) with the average at 13.93% (price 99.620).

47/ Yields accepted ranged from 13.08% (price 99.863) up to 13.11% (price 99.812) with the average at 13.10% (price 99.829).

48/ Yields accepted ranged from 13.65% (price 99.925) up to 13.71% (price 99.745) with the average at 13.69% (price 99.805).

49/ Yields accepted ranged from 13.80% (price 99.765) up to 13.84% (price 99.589) with the average at 13.83% (price 99.633).

50/ Yields accepted ranged from 13.71% (price 100.185) up to 13.82% (price 99.441) with the average at 13.76% (price 99.846).

51/ Yields accepted ranged from 12.63% (price 99.991) up to 12.75% (price 99.785) with the average at 12.69% (price 99.888).

52/ Yields accepted ranged from 12.42% (price 99.890) up to 12.48% (price 99.744) with the average at 12.46% (price 99.793).

53/ Yields accepted ranged from 12.61% (price 100.084) up to 12.68% (price 99.693) with the average at 12.65% (price 99.860).

54/ The low, high, and average yield was 12.52% (price 99.844).

55/ Yields accepted ranged from 12.41% (price 99.940) up to 12.45% (price 99.871) with the average at 12.43% (price 99.905).

56/ Yields accepted ranged from 12.77% (price 99.780) up to 12.78% (price 99.742).

57/ Yields accepted ranged from 11.91% (price 99.939) up to 12.97% (price 99.836) with the average at 11.94% (price 99.887).

58/ Yields accepted ranged from 12.30% (price 99.770) up to 12.35% (price 99.541) with the average at 12.34% (price 99.587).

59/ Yields accepted ranged from 11.69% (price 99.887) up to 11.75% (price 99.783) with the average at 11.73% (price 99.818).

60/ Yields accepted ranged from 11.55% (price 100.554) up to 11.75% (price 99.016) with the average at 11.69% (price 99.473).

61/ Yields accepted ranged from 1

/ Includes trust funds and accounts that comprise Government accounts under the unified budget concept.
/ Exclusive of banks and insurance companies.

3/ Included with all other investors are certain Government deposit accounts and Government-sponsored agencies, formerly included with Government accounts.

Note.—For detail of offerings see table P00-3.

U.S. SAVINGS BONDS AND NOTES

Series EE bonds, on sale since Jan. 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for series E and EE savings bonds and savings notes. Series A-D were sold from Mar. 1, 1935, through Apr. 30, 1941. Series E was on sale from May 1, 1941, through Dec. 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through Apr. 30, 1952. Series H was sold from June 1, 1952, through Dec. 31, 1979. Series HH bonds were sold for cash from Jan. 1, 1980, through Oct. 31, 1982. Series J and K were sold from May 1, 1952, through Apr. 30, 1957.

U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds. The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the Treasury Bulletins of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal year 1974.

Table SBN-1. — Sales and Redemptions by Series, Cumulative through June 30, 1985

[In millions of dollars. Source: Monthly Statement of the Public Debt of the United States; Market Analysis Section, United States Savings Bonds Division]

Series	Sales 1/	Accrued discount	Sales plus accrued discount	Redemptions 1/	Interest-bearing debt	Amount outstanding	Matured non-interest-bearing debt
Savings bonds:							
Series A-D 2/.....	3,949	1,054	5,003	5,002	-	—	1
Series E, EE, H, and HH.....	234,299	87,496	321,796	245,371	75,426	1,001	
Series F and G.....	28,396	1,125	29,521	29,517	-	4	
Series J and K.....	3,556	198	3,754	3,753	-	—	1
Savings notes.....	862	388	1,250	988	267	—	
Total.....	271,061	90,262	361,324	284,629	75,693	1,007	

1/ Sales and redemption figures include exchange of minor amounts of (1) matured series E bonds for series G and K bonds from May 1951 through April 1957; (2) series F and J bonds for series H bonds beginning January 1960; and (3) U.S. savings notes for series H

bonds beginning January 1972; however, they exclude exchanges of series E bonds for series H and HH bonds.

2/ Details by series on a cumulative basis and by period of series A-D combined will be found in the February 1982 and previous issues of the Treasury Bulletin.

1/ Treasury series is the 20-year constant maturity rate read from daily Treasury yield curves and averaged for the month.

2/ Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service and having an original maturity of at least 20 years. Prior to June 1973, this series reflected bonds without call protection. From June 1973 to July 1976, the

series was adjusted to reflect 5 years call protection. Since that time, the series reflects bond yields regardless of the call protection offered.

3/ Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service. Prior to June 1970, the series was compiled by Securities Industries Association. Since then, the series has been compiled by Treasury.

1/ As of Sept. 30, 1984.

Note.--If the maximum authority is indefinite, an amount equal to direct loans outstanding or guaranteed loans outstanding is shown in the maximum authority columns.

International Statistics

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.

Table IFS-3 shows U.S. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-4 presents a measure of weighted-average changes in exchange rates between the U.S. dollar and the currencies of certain other countries.

1/ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

2/ Includes gold held by the Exchange Stabilization Fund.

3/ Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 U.S.C. 5117(b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

4/ Includes allocations of SDR's in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR's.

Allocations of SDR's on Jan. 1 of respective years are as follows: 1970, 867 million; 1971, 717 million; 1972, 710 million; 1979, 874 million (in SDR terms); 1980, 874 million (in SDR terms); and 1981, 857 million (in SDR terms).

5/ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be agreed upon by the parties to the transactions.

6/ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota.

1/ Includes Bank for International Settlements.

²/ Derived by applying reported transactions to benchmark data.
³/ Includes debt recognition of U.S. Government obligations for

3/ Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.
4/ Includes liabilities payable in dollars to foreign banks, and

-4- includes liabilities payable in dollars to foreign banks, and liabilities payable in foreign currencies to foreign banks and to "other foreigners."

5/ Includes marketable U.S. Government bonds and notes held by foreign banks.

b/ Includes nonmarketable U.S. Government bonds and notes held by foreign banks.

7/ Principally the International Bank for Reconstruction and

— principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.

Note.--Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States.

Data correspond generally to statistics following in this section and in the "Capital Movements" section, except for the inclusion of investments by foreign official reserve agencies in debt securities of U.S. federally sponsored agencies and U.S. corporations. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury Letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

1/ This table presents calculations of weighted average percentage changes in the rates of exchange between the dollar and certain foreign currencies, in order to provide a measure of changes in the dollar's general foreign exchange value broader than a measure provided by any single exchange rate change. Calculations are provided for two sets of countries that account for a major share of U.S. foreign trade. U.S. bilateral trade patterns in 1972 are used as a convenient, readily available proxy for the assignment of relative weights to individual exchange rate changes, although such weights do not provide a full measure of individual currencies' relative importance in U.S. international transactions because they take no account of factors other than trade. The calculations do not purport to represent a guide to measuring the impact of exchange rate changes on U.S. international transactions.

Exchange rate data used in constructing the indices reported here differ somewhat from those used in earlier calculations to more accurately reflect end-of-period currency values.

The equations used are as follows:

Equation one is used to calculate a trade-weighted average of changes in the dollar cost of foreign currencies:

$$(EQ1) \quad E_m = \sum (\Delta \$/fc_i * M_i/\Sigma M)$$

Where: E_m is the weighted average of percentage changes in the dollar cost of individual foreign currencies;

$\Delta \$/fc_i$ is the percent change in the dollar cost of foreign currency i ; and

$M_i/\Sigma M$ is U.S. imports from country i , as a proportion of total U.S. imports from all countries in the set.

Equation two is used to calculate a trade-weighted average of changes in the foreign exchange cost of dollars:

$$(EQ2) \quad E_x = \sum (\Delta fc_i/\$ * X_i/\Sigma X)$$

Where: E_x is the weighted average of percentage changes in the foreign currency cost of dollars;

$\Delta fc_i/\$$ is the percent change in the foreign currency i cost of dollars; and

$X_i/\Sigma X$ is U.S. exports to country i , as a proportion of total U.S. exports to all countries in the set.

Equation three combines the above export-weighted and import-weighted averages to provide an overall measure of exchange rate change:

$$(EQ3) \quad E = [(E_m * m/m+x) * (-1)] + [E_x * x/m+x]$$

Where: $m/m+x$ is U.S. imports as a proportion of its total trade with all countries in the set; and

$x/m+x$ is U.S. exports as a proportion of its total trade with all countries in the set.

2/ Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and United Kingdom.

3/ The currencies of 46 IMF member countries which account for approximately 90 percent of U.S. total trade.

CAPITAL MOVEMENTS

INTRODUCTION

Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by commercial banks, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the Treasury Bulletin.

The reporting forms and instructions 1/ used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. The most recent, general revision of the report forms became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31, 1978. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

Basic Definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements which is included in the classification "Other Europe."

Reporting Coverage

Reports are required from banks, bank holding companies, International Banking Facilities (IBF's), securities brokers and dealers, and nonbanking enterprises in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks and some brokers and dealers file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Beginning with reports due as of June 30, 1978, quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies vis-a-vis foreigners. Effective January 31, 1984, the specified exemption level applicable to the monthly and quarterly banking reports was raised from \$10 million to \$15 million. There is no separate exemption level for the semiannual reports.

Banks, securities brokers and dealers, and in some instances nonbanking enterprises report monthly their transactions in securities with foreigners; the applicable exemption level is \$500,000 on the grand total of purchases and on the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated foreigners exceed a specified exemption level on a two quarter-end average basis. Effective March 31, 1982, this exemption level was set at \$10 million, up from \$2 million. Nonbanking enterprises also report for each month their U.S. dollar-denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, brokers, and dealers in the United States. Beginning April 1978, the fol-

lowing major changes were made in the reporting coverage: Amounts due to banks' own foreign offices are reported separately; a previous distinction between short-term and long-term liabilities was eliminated; a separation was provided of the liabilities of the respondents themselves from their custody liabilities to foreigners; and foreign currency liabilities are only available quarterly. Also, beginning April 1978, the data on liabilities were made more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners.

Section II presents the claims on foreigners reported by banks in the United States. Beginning with data reported as of the end of April 1978, a distinction was made between banks' claims held for their own account and claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, the distinction in reporting of long-term and short-term components of banks' claims was discontinued. Maturity data began to be collected quarterly on a time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency claims are also collected on a quarterly basis only. Beginning March 1981, this claims coverage was extended to certain items in the hands of brokers and dealers in the United States.

Another important change in the claims reporting, beginning with new quarterly data as of June 30, 1978, was the adoption of a broadened concept of "foreign public borrower," which replaced the previous category of "foreign official institution" to produce more meaningful information on lending to the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departments; State, provincial, and local governments of foreign countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section III includes supplementary statistics on U.S. banks' liabilities to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the TIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. banks' dollar liabilities to, and banks' own dollar claims on, countries not regularly reported separately are available semiannually in the May and November issues of the Treasury Bulletin.

Section IV shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data also exclude claims held through banks in the United States. Beginning with data reported as of December 31, 1978, financial liabilities and claims of reporting enterprises are distinct from their commercial liabilities and claims; and items are collected on a time remaining to maturity basis instead of the original maturity basis used previously.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, table IFS-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

1/ Copies of the reporting forms and instructions may be obtained from the Office of Data Management, Office of the Assistant Secretary for International Affairs, Department of the Treasury, Washington, D.C. 20220, or from district Federal Reserve banks.

1/ Includes Bank for International Settlements.

2/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank.

3/ Data as of preceding quarter for non-quarter-end months.

4/ Establishment of International Banking Facilities (IBF's) permitted beginning December 1981.

Note.—Total liabilities include liabilities previously classified as either "short term" or "long term" on the Treasury reports filed by banks. The maturity distinction was discontinued with new reports filed as of Apr. 30, 1978, and historical series adjusted accordingly. See introductory text to Capital Movements tables for discussion of changes in reporting.

FOREIGN CURRENCY POSITIONS

INTRODUCTION

Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U.S. banks and nonbanking firms. Reports cover five major foreign exchange market currencies and U.S. dollars held abroad. Reporting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of March 16, 1983, for the weekly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of March 1983.

Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions," and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majority-owned subsidiaries of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or indirectly, own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

Reporting Threshold

The exemption level applicable to banks and banking institutions was \$10 million equivalent through January 1982, when it was raised to \$100 million. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 million equivalent on all nonbank forms from March 1975 through November 1976. It was raised to \$2 million equivalent on the monthly reports of positions held in the United States from November 1976 through September 1978. The exemption level was raised to \$3 million on foreign subsidiary positions on June 30, 1977, and for positions held in the United States on September 30, 1978. The exemption level for nonbanking firms was raised to \$100 million on positions in the United States in January 1982 and on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries, U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

Description of Statistics

Data collected on the Treasury foreign currency forms are published in the Treasury Bulletin in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

FOREIGN CURRENCY POSITIONS

Footnotes to Tables FCP-I through FCP-VII

SECTION I

1/ Worldwide net positions on the last business day of the calendar quarter of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. Excludes receivables and installment paper which have been sold or discounted before maturity, U.S. parent companies' investment in their majority-owned foreign subsidiaries, fixed assets (plant and equipment), and capitalized leases for plant and equipment.

2/ Foreign branches and majority-owned partnerships and subsidiaries only.

3/ Weekly worldwide net positions of banks and banking institutions in the United States, and their foreign branches and majority-owned foreign subsidiaries. Excludes capital assets and liabilities.

4/ Foreign branches and majority-owned subsidiaries only.

SECTIONS II THROUGH VII

1/ Positions of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. In section VII positions of foreign branches and majority-owned partnerships and subsidiaries only.

2/ Excludes receivables and installment paper sold or discounted before maturity, fixed assets (plant and equipment), and parents' investment in

majority-owned foreign subsidiaries.

3/ Capitalized plant and equipment leases are excluded.

4/ Includes both spot and forward exchange rates.

5/ Columns 1 and 3 less columns 2 and 4.

6/ Representative rates on the report date. Canadian dollar and United Kingdom pound rates are expressed in U.S. dollars per unit of foreign currency, all others in foreign units per U.S. dollar.

7/ Banks and banking institutions in the United States and their foreign branches and majority-owned subsidiaries. In section VII, foreign branches and majority-owned subsidiaries only.

8/ Excludes capital assets.

9/ Excludes capital liabilities.

10/ Includes both spot and forward exchange contracts.

11/ Columns 3 and 9 less columns 6 and 12.

12/ See footnote 6.

^{1/} Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SDR's) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

^{2/} Excludes foreign exchange transactions for future and spot delivery.

^{3/} A non-interest-bearing liability to the U.S. Treasury resulting from the transfer to the Exchange Stabilization Fund of foreign currencies drawn from the IMF by the United States.

Note.--Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the Treasury Bulletin. Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 Treasury Bulletin.

Cash Management/ Debt Collection

CASH MANAGEMENT INITIATIVES

Collection and Deposit Legislation—Update

As noted in the last issue, the final rule will be published on September 1, 1985, and go into effect as of fiscal 1986. Training on the application of the new Treasury Financial Manual chapter 6-8000, and the supplement to the chapter, the Cash Management Review Guide, will be conducted by the Financial Management Service over the course of the upcoming fiscal year.

Twelve comments were received in response to the notice of proposed rulemaking, published March 28, 1985. Changes made to the final rule by the Commissioner in response to commentors include:

- * A formal process to appeal charges against an agency has been included in the final rule;
- * The final rule on receipt of funds extends to that of donations, and deposits received in foreign countries and international territories;

- * Deposits not only to the Treasury general fund, but to any type, such as a special, trust, or revolving fund, are subject to the requirements of the rule;
- * When no other method is available, deposits may be mailed to any financial institution; and
- * Agencies need not submit an annual cash management plan. A primary cash management review is expected by each agency to identify improvement opportunities.

Reform '88 Cash Management

Treasury's Financial Management Service/Federal Finance has lead agency responsibility by monitoring and reporting progress on Reform '88 cash management initiatives undertaken by 20 Federal departments and agencies. The overall goal of the project is to improve Government's payments and collection systems, with special attention being directed toward identifying additional application for state-of-the-art technology and expanding the use of other mechanisms, such as lockboxes, automated clearinghouses, and cash concentration systems.

Agencies are providing monthly reports to Treasury on the status of 426 initiatives. For fiscal years 1983 and 1984, interest savings totaled \$176 million and \$334 million, respectively.

Projected figures for fiscal 1985 and semiannual figures for fiscal 1985 for each of the participating agencies are shown below.

Special Reports

**CONSOLIDATED FINANCIAL STATEMENTS
OF THE UNITED STATES GOVERNMENT
FISCAL YEAR 1984/PROTOTYPE**

THE SECRETARY OF THE TREASURY
WASHINGTON 20220

May 24, 1985

Statement of the
Secretary of the Treasury

The Department of the Treasury is pleased to present these consolidated financial statements, an annual effort begun nearly a decade ago to apply the principles of business accounting to the business of government. Because we recognize the importance of financial management, Treasury is committed to improving the governmentwide systems for collecting and disclosing the results of federal operations. Full disclosure of financial information is critical to the effective management of Government's assets and liabilities and as a measure of accountability to the electorate. This objective is shared by the Office of Management and Budget and the General Accounting Office in our common goal of managing the taxpayers' dollar wisely.

Over the past four years, these agencies have renewed Government's commitment to effective financial management. By focusing federal attention on standard financial structures, new technology, and internal controls, Government has charted a new course towards cost effective operations. Toward this end, Treasury will complete the development of a fully automated financial reporting network that will integrate the results of agency operations into comprehensive governmentwide reports. These reports will provide timely and meaningful financial information to a broad spectrum of users in the public and private sectors.

Reader reactions and comments on this prototype report are welcome.

James A. Baker III
James A. Baker III

COMPTROLLER GENERAL OF THE UNITED STATES
WASHINGTON D.C. 20548

May 24, 1985

STATEMENT OF THE UNITED STATES
GENERAL ACCOUNTING OFFICE

The need for sound financial management is one of the most critical issues facing the federal government today. With an annual spending budget approaching \$1 trillion and a current budget deficit approximating \$200 billion, the federal government must develop modern financial management systems. These systems are necessary for efficient and effective management of the government's programs and for producing financial reports which accurately portray the government's operations and financial condition.

This consolidated financial report provides useful information about the financial condition and operations of the federal government as a whole that is not available elsewhere; it is supplementary to information contained in the budget documents. The consolidated statements disclose the magnitude of the government's assets and future claims on resources not fully disclosed in the budget, such as the government's inventories and fixed assets as well as its pension and social security liabilities, and public debt.

Although this report is a prototype, it demonstrates a goal we strongly support--the annual publication of formal audited consolidated financial statements of the United States government. Achieving this goal will be a significant milestone towards building strong viable financial management systems that will serve the needs of government and the public in the last decade of the 20th Century and beyond.

The General Accounting Office (GAO) is committed to achieving this goal. During the past year, we have completed three major efforts and are involved in a number of other efforts bearing on this consolidated report. First, we issued a two-volume report, Managing the Cost of Government, Building an Effective Financial Management Structure. This report identifies the key issues in federal financial management that must be dealt with and proposes a conceptual framework for comprehensive reform of financial management, of which consolidated reporting is a part. Second, we issued revised accounting principles and standards federal agencies are to follow. One of the standards specifically addresses these consolidated financial statements and requires their formal issuance in the future. Third, we

continued our efforts in monitoring implementation of the Federal Managers' Financial Integrity Act which requires agencies to annually assess the quality of their internal controls and their accounting systems (which directly impact on the quality of these consolidated statements) and to report to the President and the Congress.

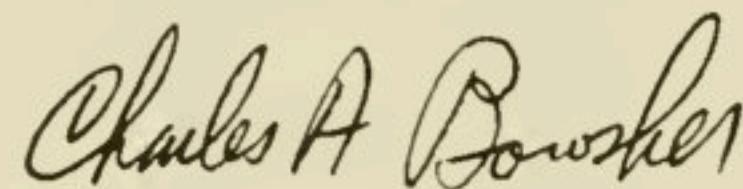

Finally, we are participating in a project with the Auditor General of Canada to determine the needs for federal government information by users of such information, focusing on consolidated financial reporting.

Agency summary level statements, along with additional supplemental information, form the basis for preparing this consolidated report. Our longer term objective is to audit these consolidated statements and render an opinion on their fair presentation. To achieve this, however, we must first audit the underlying agency statements; we are beginning pilot audits at selected agencies.

We are convinced that the need for such an audit is critical since it would give assurance that the information is reliable as well as adding discipline to the overall financial management systems. Our limited audit work thus far has indicated that some of the numbers in these consolidated statements can be more accurately stated. A primary example of this is the receivables and related allowances in the consolidated statement of financial position. Based on the work we have recently done we believe the allowance for losses is substantially understated resulting in a significant overstatement of net receivables and a significant understatement of the costs of the related programs. Likewise, based on recent work, we believe the estimated losses on loan guarantees and insurance is significantly understated.

In spite of its current shortcomings, this consolidated report is critical to improving financial management. Although improvements have been and are being made, much still remains to be done to formalize these consolidated statements and audit them. We at GAO are committed to achieving the goal of audited consolidated federal financial statements and we are working with the Treasury and the Office of Management and Budget to help make it a reality in the near future.

As with earlier reports of this nature, we have not audited the accompanying statements and accordingly, we do not express an opinion on them.

Charles A. Bowsher
Comptroller General
of the United States

INTRODUCTION

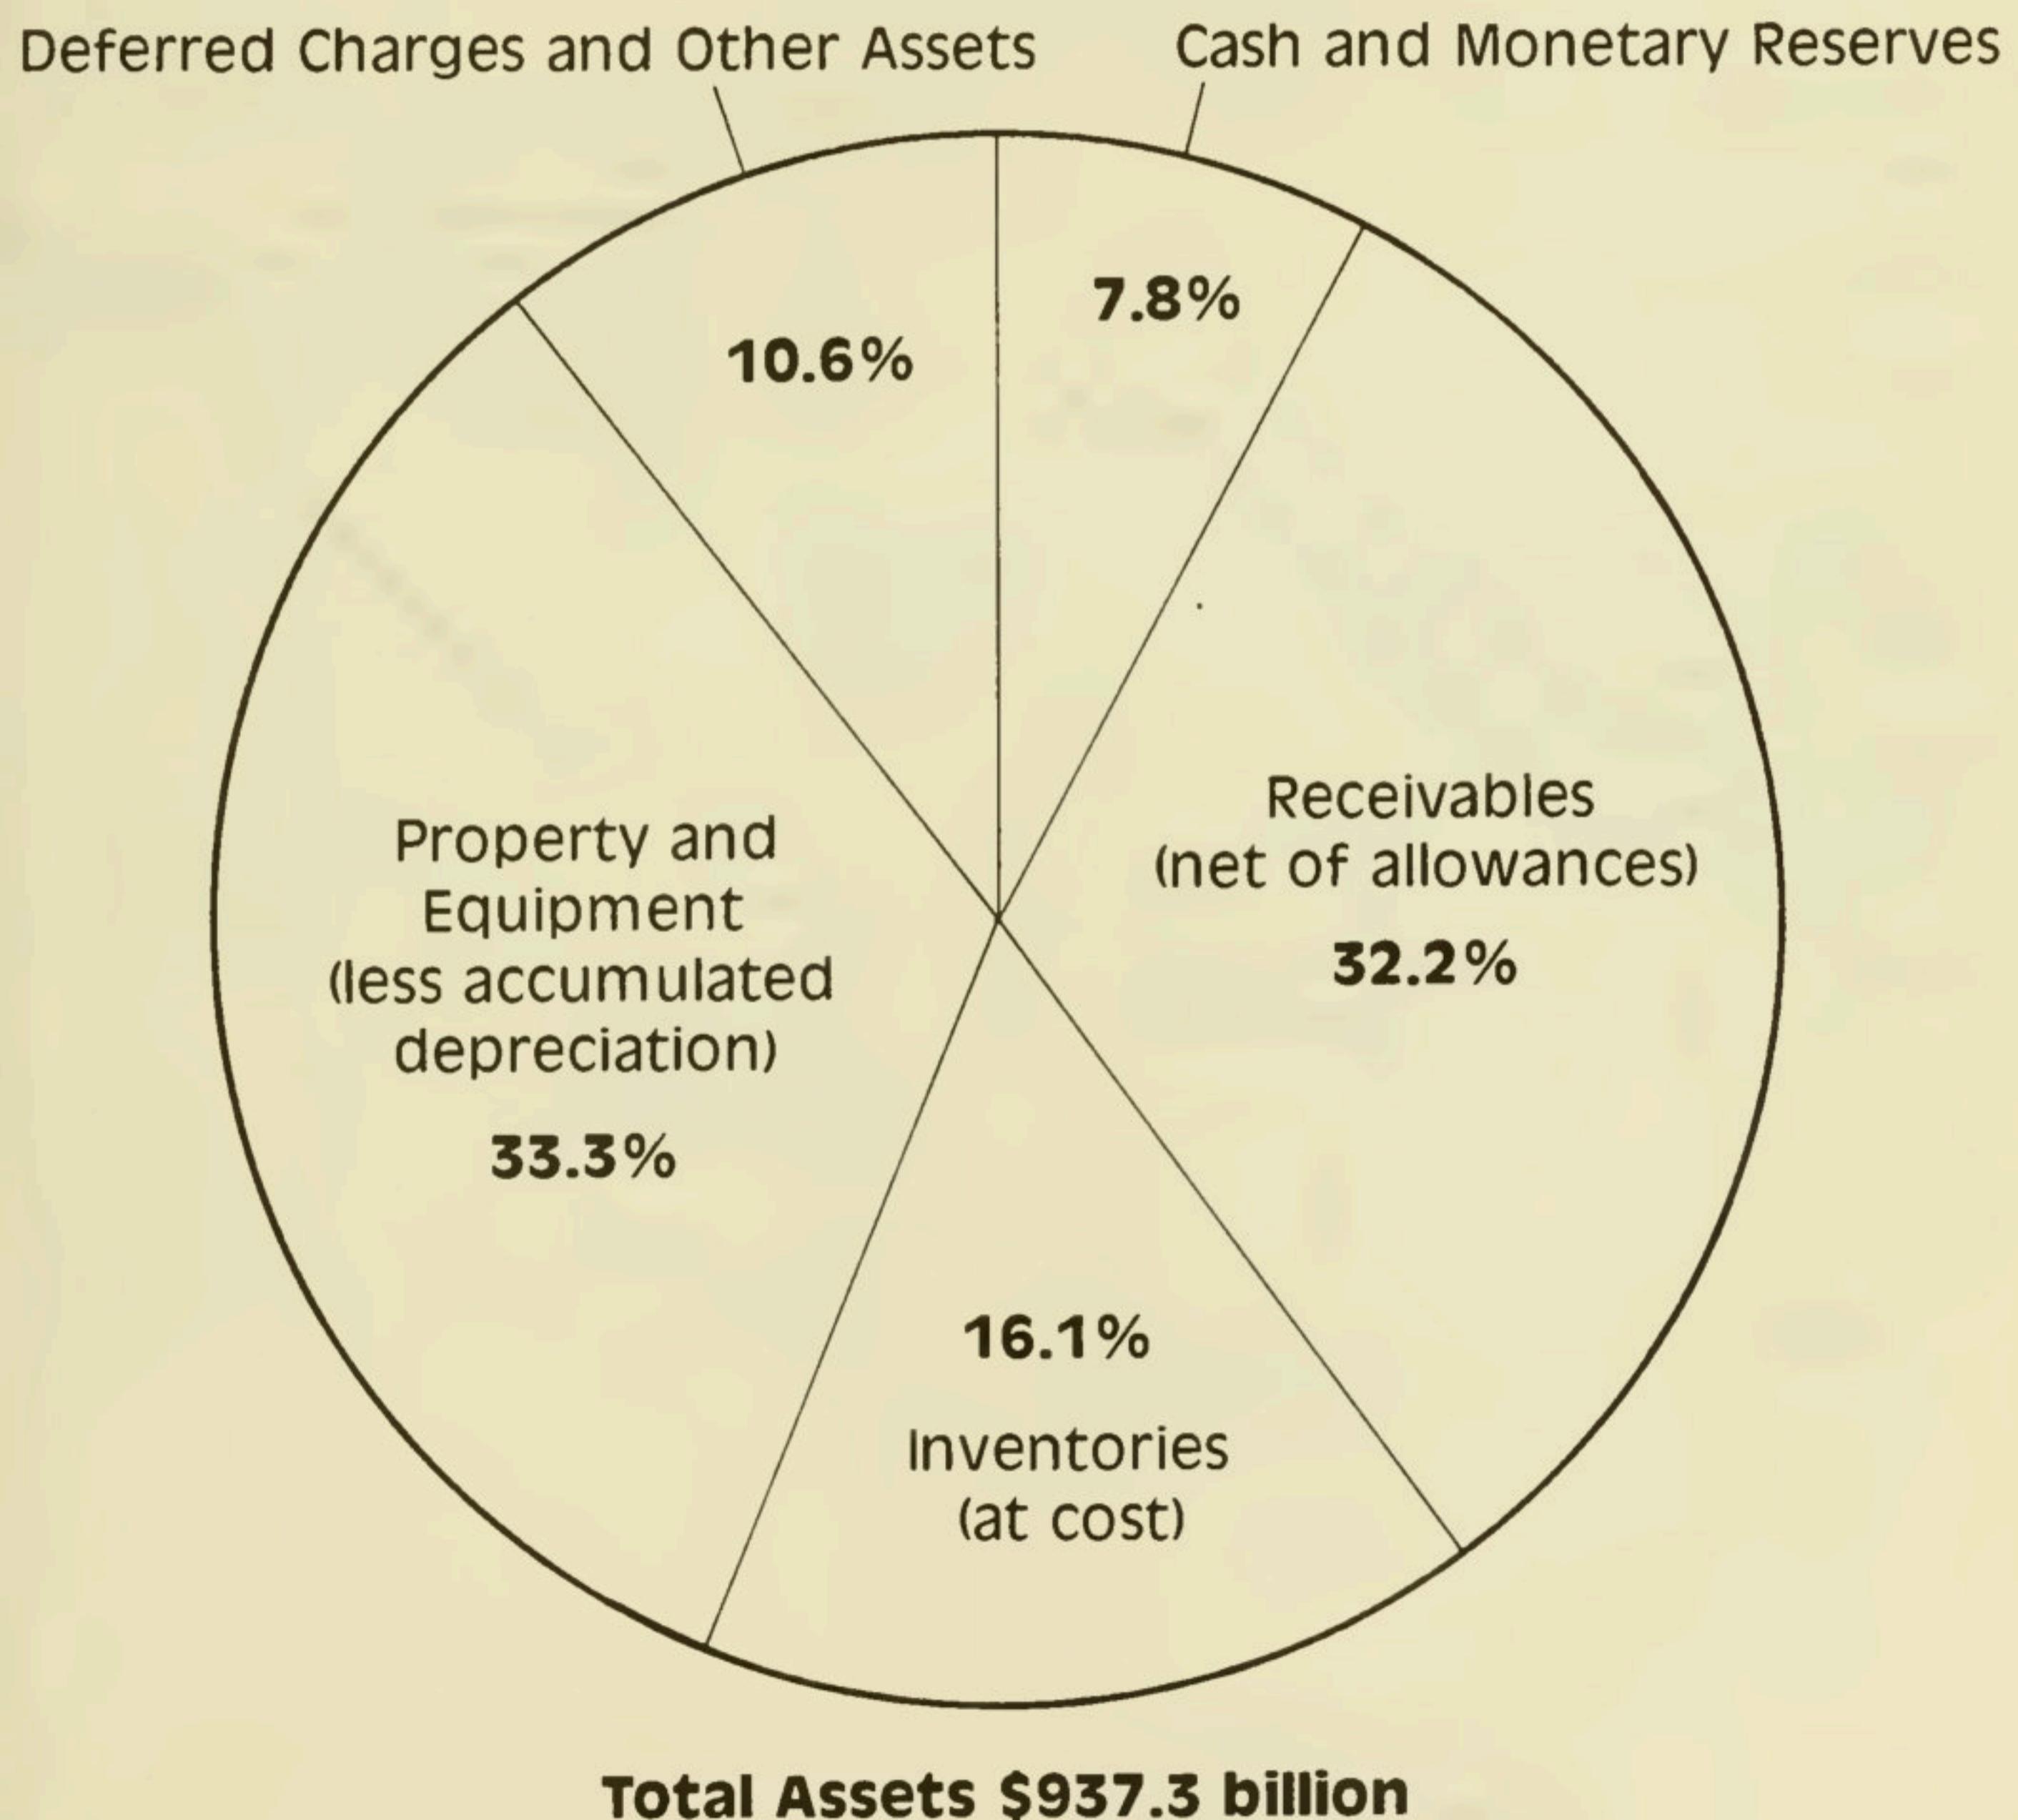

Since the first set of Consolidated Financial Statements of the United States Government was released in 1976, the content of the report has not changed significantly. Several Supplemental Tables have been added and the Alternative Statements have been discontinued; however the core of the CFS, the Financial Statements and the Notes to Financial Statements, has remained unchanged.

The CFS has been reformatted to more closely approximate corporate annual reports to stockholders. Graphic material based upon data from the CFS has been added to the Financial Highlights section as well as to the supplemental Tables. Additional analytical material will be included in future reports using data from current and prior years.

FINANCIAL HIGHLIGHTS

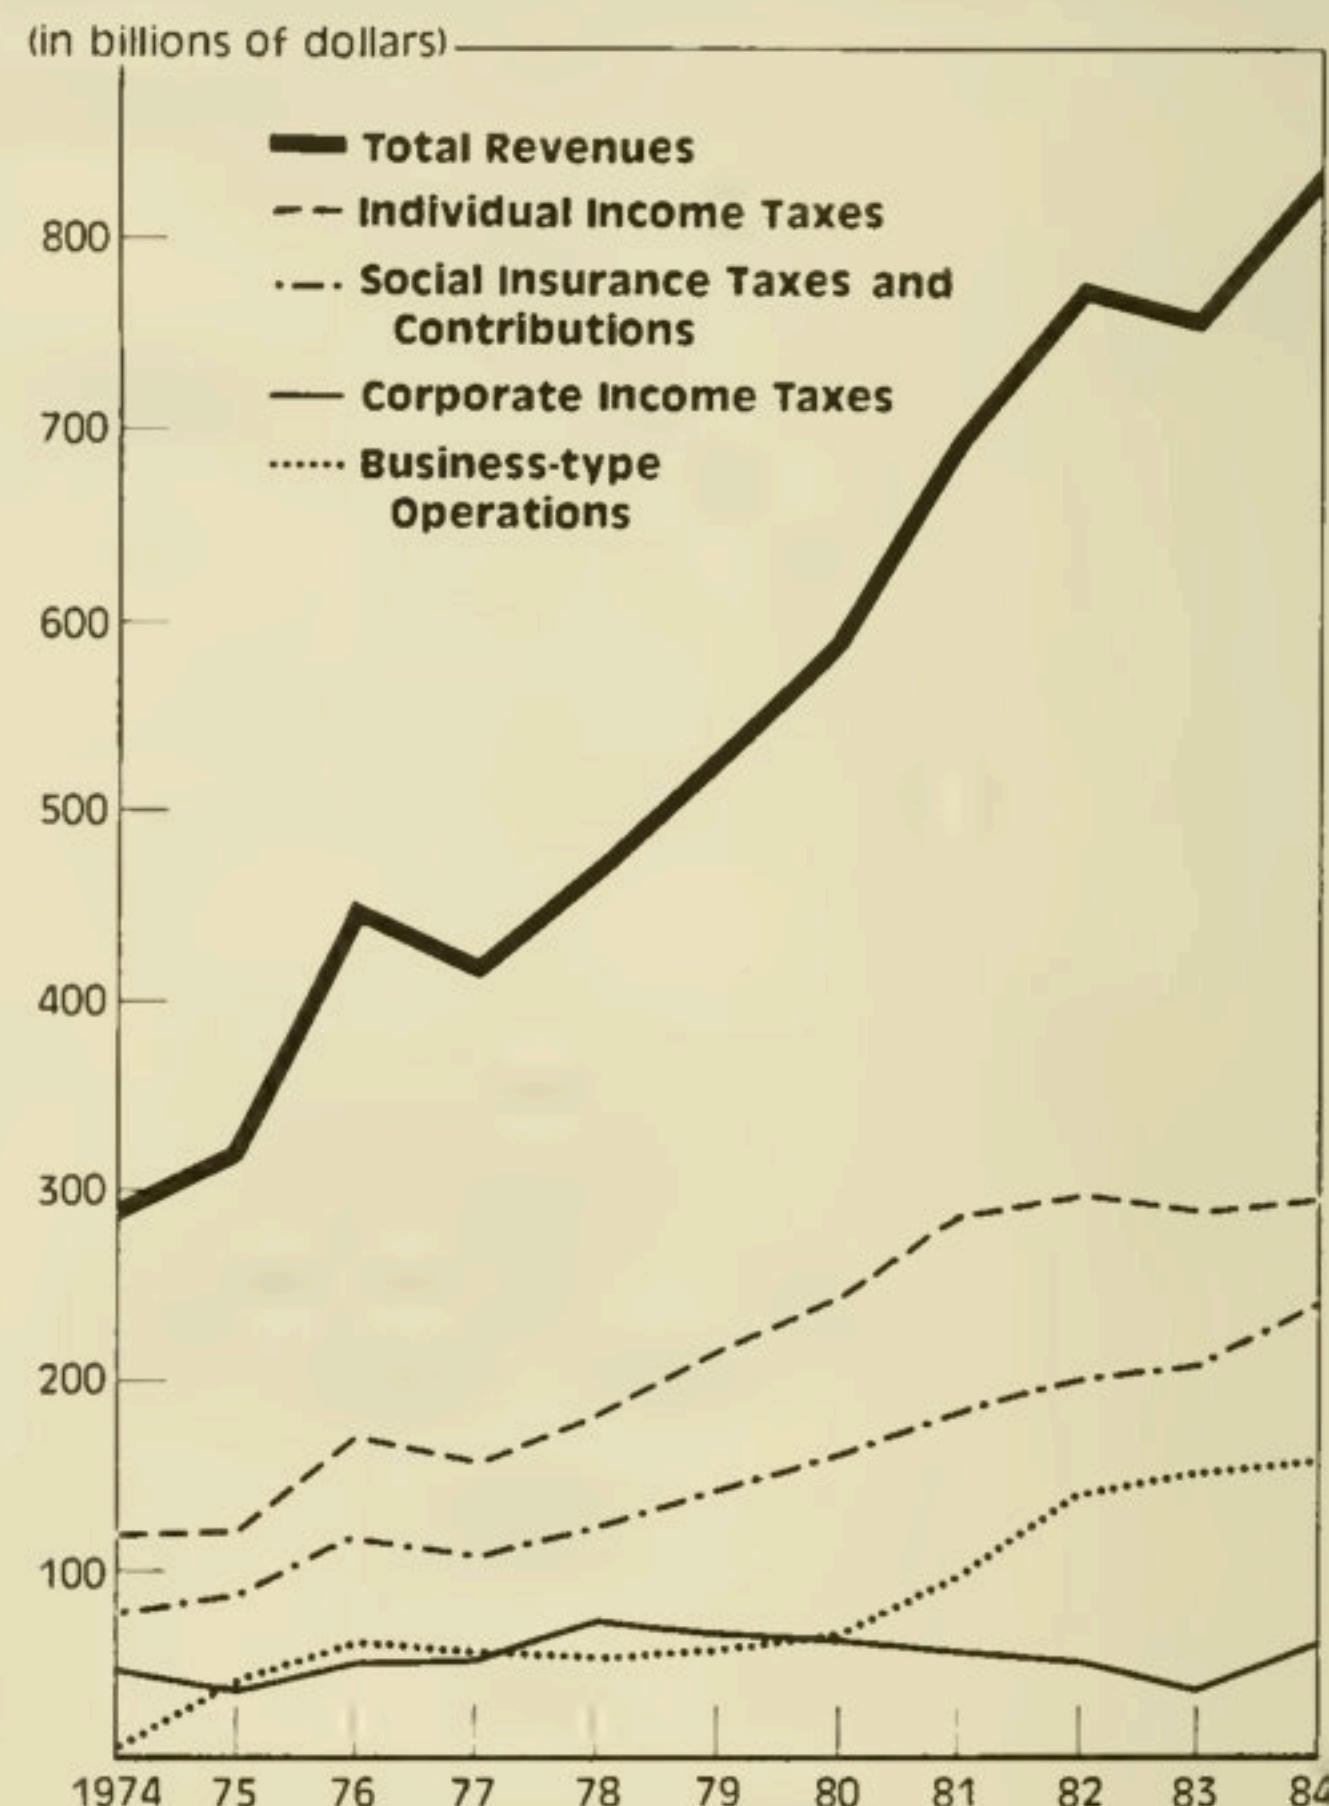

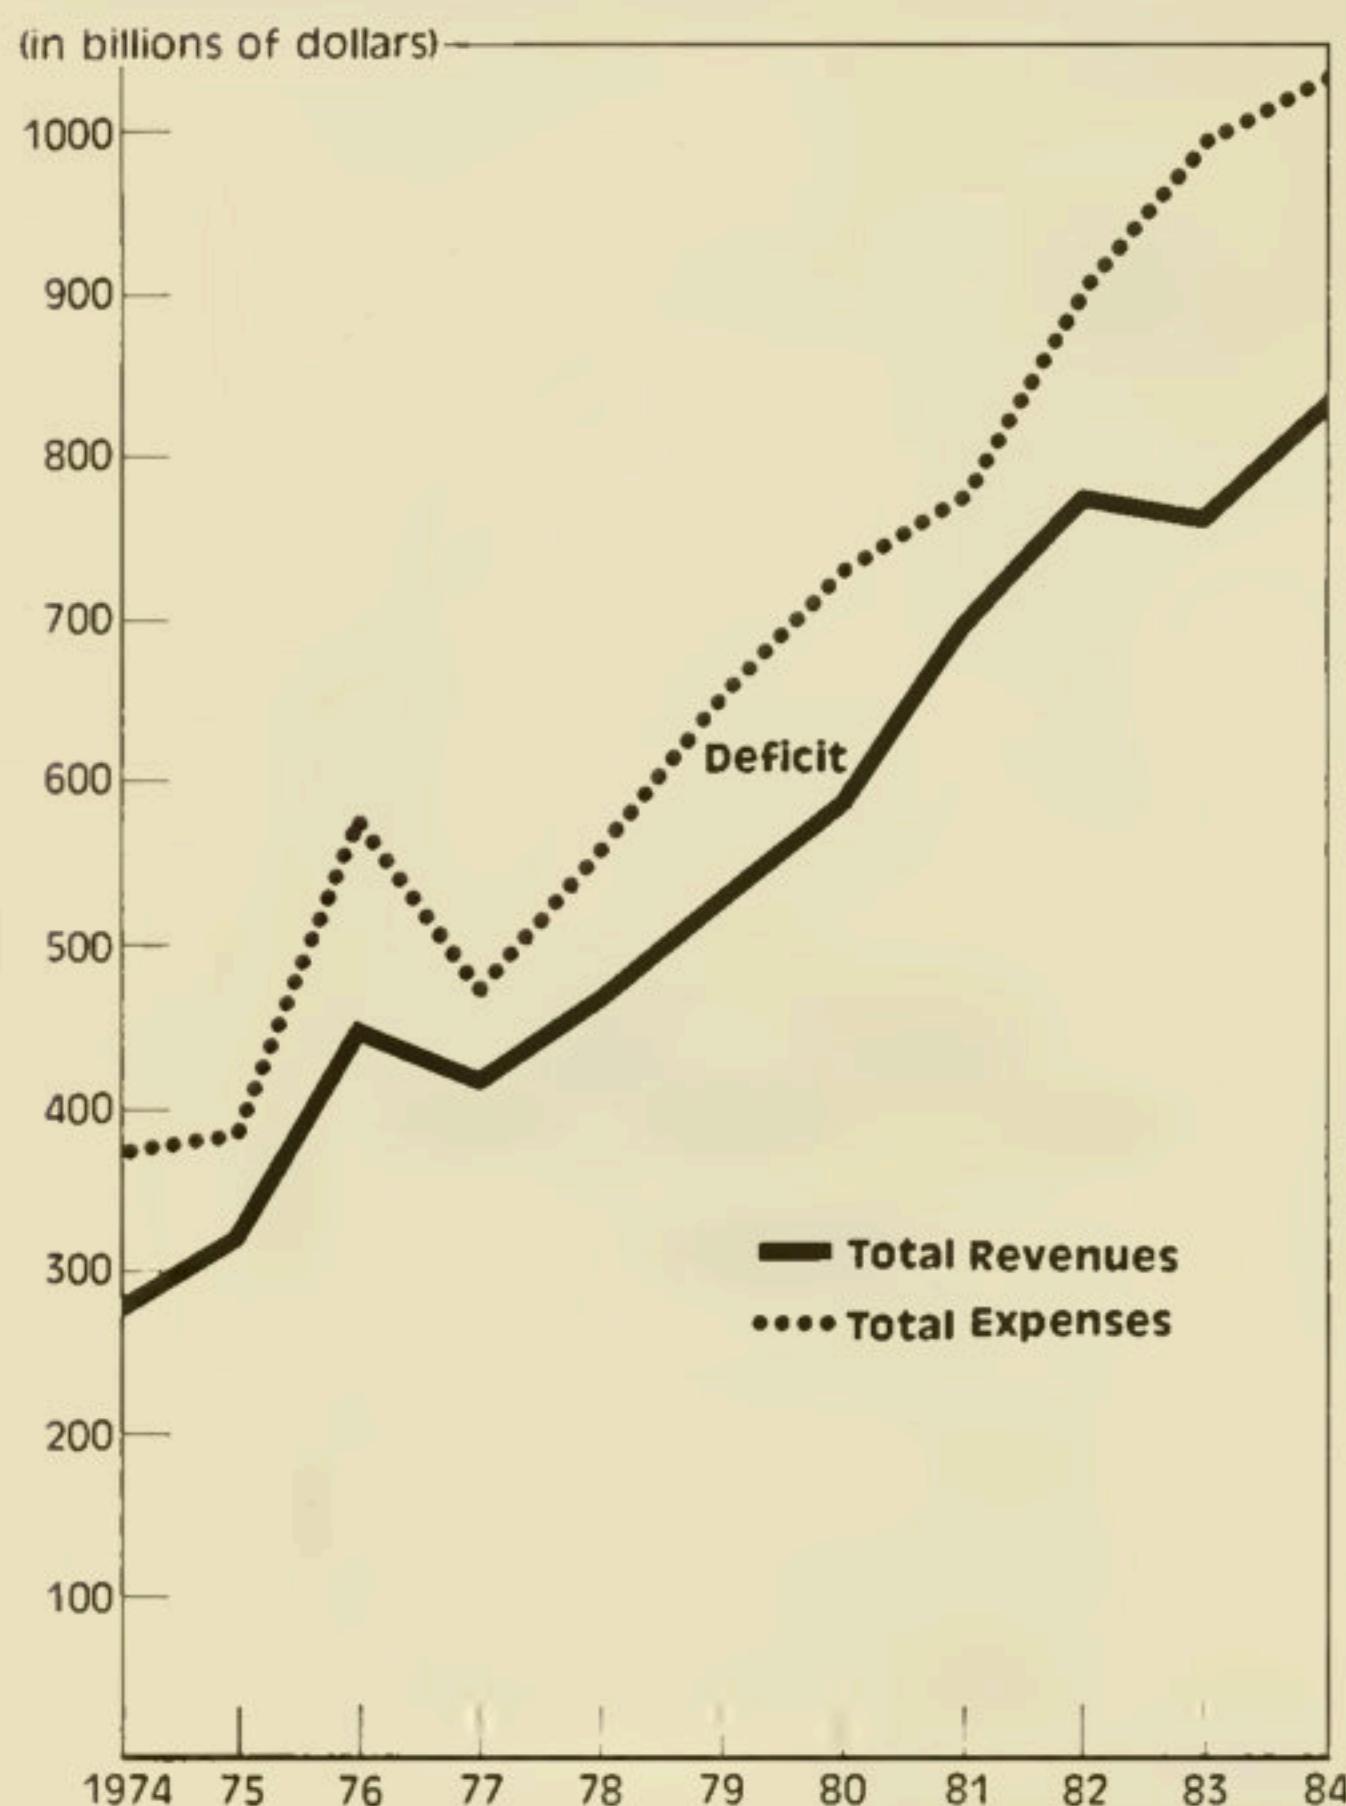

Major categories of assets

Assets are resources owned by the Federal Government that are available to pay liabilities or to provide public services in the future. The following graph is derived from the Statement of Financial Position and depicts the major categories of assets for FY 1984 as a percent of total assets. The Statement of Financial Position on page 88 shows the components for each of these major categories.

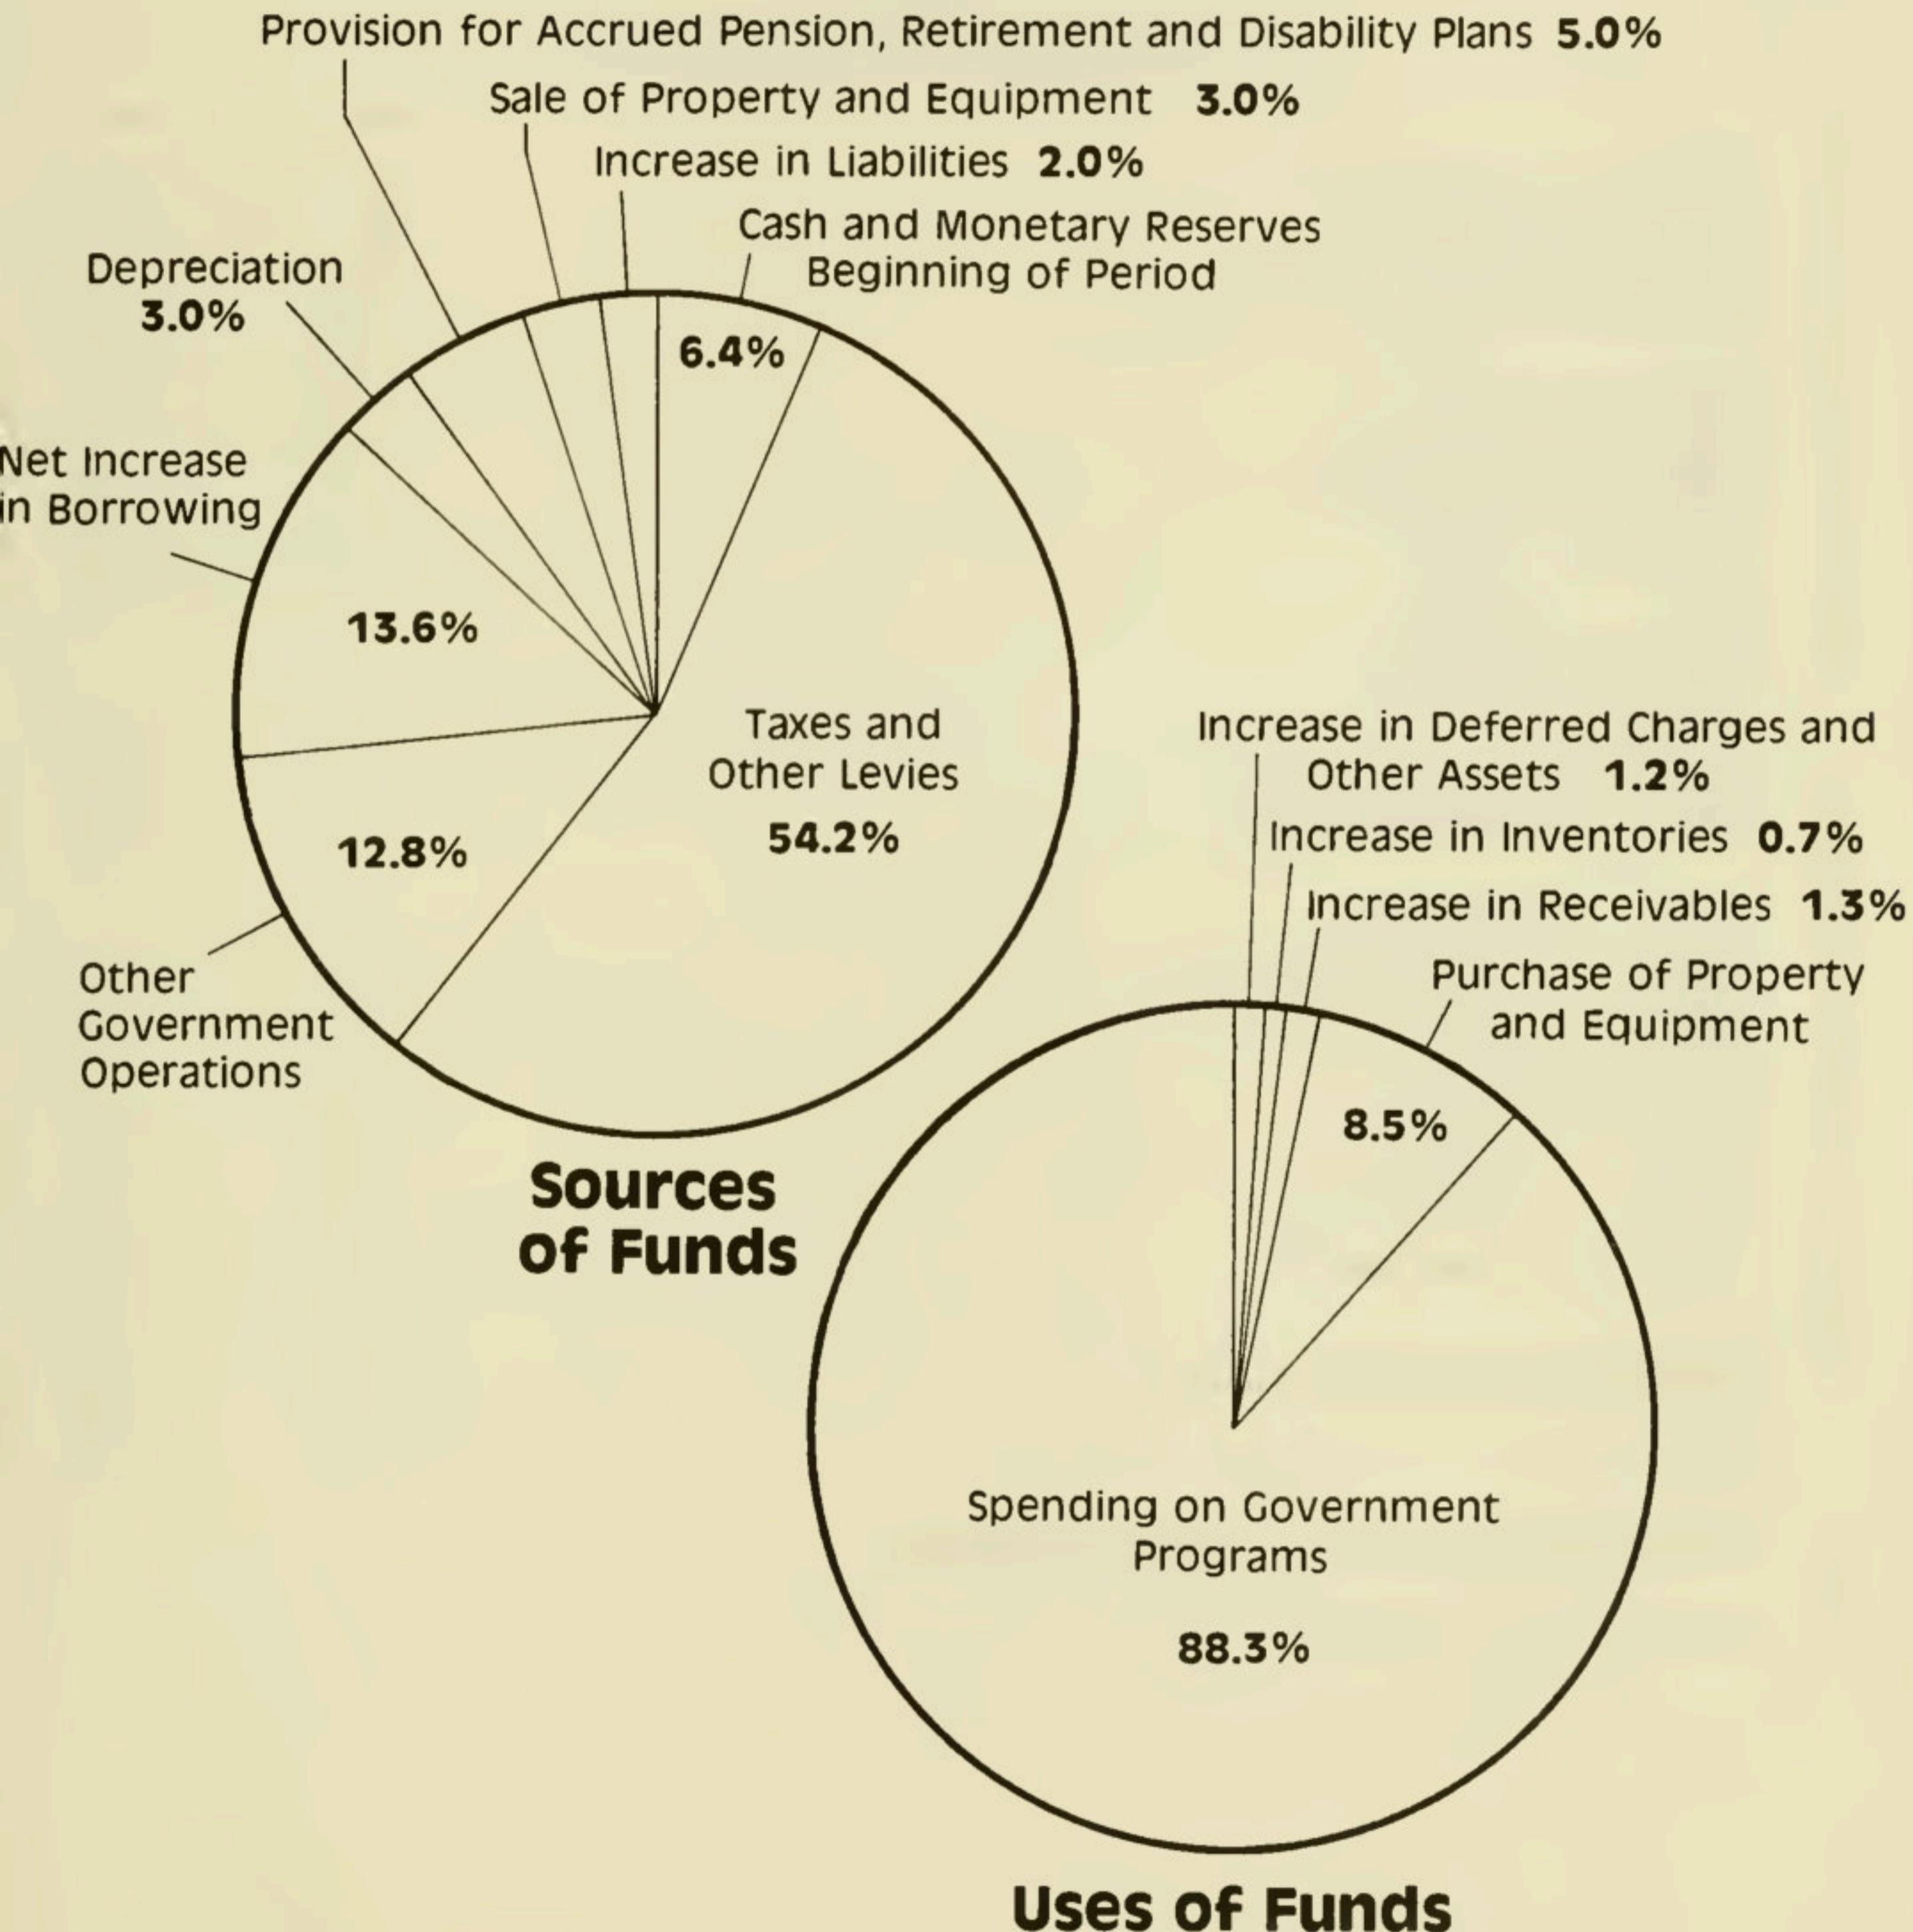

Revenues and expenses

The following graphs show revenues and expenses for fiscal years 1974 through 1984 and total revenues with amounts for major sources for the same period. The figures are taken from the Statement of Operations for the 11 periods for which consolidated statements have been prepared. These amounts have been calculated on an accrual basis and differ from those reported on the cash basis in other reports.

Sources and uses of funds

The graphs below have been derived from the Statement of Changes in Financial Position for FY 1984 and show the resources provided during the period and the uses to which they were put. This statement is not intended to substitute for either the Statement of Financial Position or the Statement of Operations; instead, it presents additional useful information not included in those reports.

Notes to Financial Statements

1. Summary of general accounting policies

Principal financial statements.—These consist of a statement of financial position, a statement of operations, and a statement of changes in financial position. Because of their developmental nature, only the most significant changes in format are disclosed in the Notes.

Principles of consolidation.—The statements include the accounts of all significant agencies and funds included in the budget of the U.S. Government. Agencies such as the U.S. Postal Service and the Federal Financing Bank, classified as off-budget (not included in calculating the budget surplus or deficit), have also been included in the statements because they are wholly owned and are clearly within the scope of Government operations. Government-sponsored enterprises such as the Federal land banks are excluded because they are privately owned. Intragovernmental transactions were eliminated in consolidation.

Fiscal year.—The fiscal year of the U.S. Government ends on September 30.

Reclassification and adjustment.—For comparability, certain fiscal 1983 data are reclassified where appropriate to conform to the financial statement presentation for fiscal 1984.

2. International monetary reserves

This category, as of September 30, 1984, comprises the following items: \$11.1 billion in gold, recorded at \$42.22 per ounce, the statutory price at which gold is monetized by the issuance of gold certificates to the Federal Reserve System; \$5.6 billion of special drawing rights, an international reserve asset; and \$11.6 billion representing the U.S. reserve position in the International Monetary Fund.

3. Other cash

This category, as of September 30, 1984, comprises the following items: Other U.S. Treasury monetary assets, \$0.9 billion; accountability for cash and other assets held outside the Treasury by disbursing, collecting and other fiscal officers, \$6.5 billion; convertible foreign currencies, at market value, \$6.0 billion, and balances of nonpurchased foreign currencies, \$0.7 billion. The amounts as of September 30, 1983, were \$1.6 billion, \$7.0 billion, \$6.9 billion, and \$1.0 billion, respectively.

4. Accrued taxes receivable

The September 30, 1984, total for taxes receivable represents \$26.0 billion (net) for delinquent taxes and \$4.2 billion of accrued corporate taxes.

5. Loans receivable

Outstanding loans and allowances have been recorded as reported by the various lending agencies. The allowances for losses are presumed to be understated and they are under study. Interest rates and loan repayment terms vary considerably for outstanding loans, with rates ranging up to 17.86 percent and terms from as short as 5 days to well over 35 years.

6. Inventories

Inventories include nondepreciable personal property and are stated at cost. The September 30, 1984, total for inventories comprises \$109.6 billion for the Department of Defense and \$41.8 billion for other agencies. The amounts as of September 30, 1983, were \$101.9 billion and \$41.6 billion, respectively. The inventory accounts do not include the weapons stockpile since the extent of this inventory is classified information.

7. Land

Land is valued at the cost paid by the Government. The cost of land acquired through donation, exchange, bequest, forfeiture, or judicial process is estimated by the General Services Administration at amounts the Government would have paid if purchased at the date of acquisition. Pending study of valuation methods, the Outer

Continental Shelf and other offshore land, and the 670 million acres of public domain land, have not been included. In 1972 a committee of the House of Representatives estimated the value of public domain land (92 percent of the total onshore acreage owned by the Federal Government) to be \$29.9 billion.

8. Buildings, structures, and facilities

This category consists of all real property owned by the Federal Government except land. The total reflects the acquisition cost of buildings and the cost of acquiring or erecting dams, utility systems, monuments, roads, and bridges. The September 30, 1984, total represents \$58.5 billion for the Department of Defense and \$78.5 billion for other agencies. The amounts as of September 30, 1983, were \$56.5 billion and \$83.1 billion, respectively.

9. Depreciable personal property

Military hardware and equipment are recorded at acquisition cost and include only depreciable property currently in use or in usable condition. The major components of each category are summarized as follows:

	1984	1983
	[In billions]	
Military hardware		
Aircraft and related equipment	\$140.0	\$129.1
Ships and service craft	89.8	79.1
Combat and tactical vehicles	67.9	55.6
Missiles and related equipment	27.0	23.1
Other	<u>5.6</u>	<u>5.1</u>
Total	<u>\$330.3</u>	<u>\$292.0</u>
Equipment		
Department of Defense		
Industrial plant equipment	\$20.8	\$20.2
Communications and electronics	3.7	3.1
Other	<u>29.8</u>	<u>26.5</u>
	54.3	49.8
Other agencies	<u>34.3</u>	<u>32.2</u>
Total	<u>\$88.6</u>	<u>\$82.0</u>

10. Accumulated depreciation

Most Government agencies do not calculate depreciation on property and equipment; therefore, accumulated depreciation is estimated on a straightline basis, from available information. The useful lives applied to each classification of asset are as follows: Buildings, structures, and facilities—50 years; ships and service craft—30 years; industrial plant equipment—20 years; all other depreciable assets—10 years.

11. Borrowing from the public

As of September 30, 1984, the gross amount of Federal debt outstanding net of unamortized premiums and discounts was \$1,035.8 billion. This amount was reduced by \$263.7 billion for intragovernmental holdings. The amount of Federal debt outstanding net of unamortized premiums and discounts, as of September 30, 1983, was \$1,371.2 billion. This amount was reduced by \$240.8 billion for intragovernmental holdings. As of September 30, 1984, foreign and international investors held approximately \$175.5 billion of the debt outstanding with the public. The amount as of September 30, 1983, was \$160.0 billion. For additional information on borrowing from the public, see the Federal Debt Maturity table in the supplemental section (page 105).

12. Accrued pension, retirement, and disability plans

The accounting for accrued pension, retirement, and disability plans is subject to several different assumptions, definitions, and methods of calculation. Each of the major plans is summarized below.

Military personnel and civilian employees: The liabilities under these two pension plans represent a major portion of the total unfunded liability which is to be reported under Public Law 95-595. In prior years, the accrued pension liabilities for September 30 represented the actuarial present value of accumulated plan benefits and were calculated in accordance with instructions developed jointly by the General Accounting Office and the Office of Management and Budget under the provisions of Public Law 95-595.

The actuarial liabilities as of September 30, 1984, were not available for either plan. The liabilities have been estimated by calculating a simple average of the change in reported liability for each of fiscal years 1981, 1982, and 1983.

Social security: Based on the present value of the projected excess of benefits over contributions for present participants for the next 75 years.

It has not yet been determined whether the requirements for Federal pension plans, established as a result of Public Law 95-595, should be applied to the Social Security System due to the uniqueness of the actuarial cost methods used for measuring benefits under the system.

Veterans compensation: Represents the present value of projected annual benefit payments.

Federal employees compensation: Represents estimated future costs for approved Federal Employees Compensation Act cases.

Other annual pension reports received from plans covered by Public Law 95-595 are reported in the same manner as military personnel and civilian employees described above.

3. Contingent liabilities for guarantee and insurance programs

A number of agencies do not make any provision for estimated losses on loan guarantees and insurance, while others do not provide reasonable estimates of losses.

For additional information on estimated losses for guarantee and insurance programs, see the Commitments and Contingencies of the U.S. Government table in the supplemental section (page 103).

4. Current noncash provision for social security

The noncash provision for social security represents changes in the social security accrued liability between periods based on a 30-year amortization of the actuarial deficit. Accounting methods for this provision require additional study.

The noncash amount is not included in the Statement of Operations because a substantial but indeterminate portion is not applicable to the current period. The Statement of Operations does include cash benefit payments. The current noncash provision for social security is \$133.3 billion in 1984.

5. Contingencies

Several Government agencies insure businesses and individuals against various types of risks. The amount of insurance coverage in force, representing the maximum risk exposure to the Government, is \$2,636.8 billion as of September 30, 1984.

The Government also guarantees loans by non-Government enterprises to businesses and individuals. These guarantees become liabilities of the Government only when it is required to honor its guarantees. Loan guarantees in force at September 30, 1984, are \$615.0 billion. For further information on contingencies, see the Commitments and Contingencies of the U.S. Government table in the supplemental section (page 103).

16. Open-ended programs and fixed costs

The Government commits itself to provide services by passing laws that make spending mandatory. Since a significant amount of future spending is fixed by law, it is very probable that the Government will pay for these programs in future years. Listed below are the programs for fiscal 1984 that can be terminated only if the laws are changed.

	1984 [In billions]
Payments for individuals	
Social security and railroad retirement	\$179.3
Federal employees retirement and insurance	49.0
Unemployment assistance	16.9
Assistance to students	4.8
Food and nutrition assistance	3.6
All other	2.9
Medicare and Medicaid	79.9
Public-assistance-related programs	<u>21.0</u>
	<u>357.4</u>
Net interest	<u>111.1</u>
General revenue sharing	<u>4.6</u>
Other open-ended programs and fixed costs	<u>5.7</u>
Total	<u><u>\$478.8</u></u>

Supplemental Tables

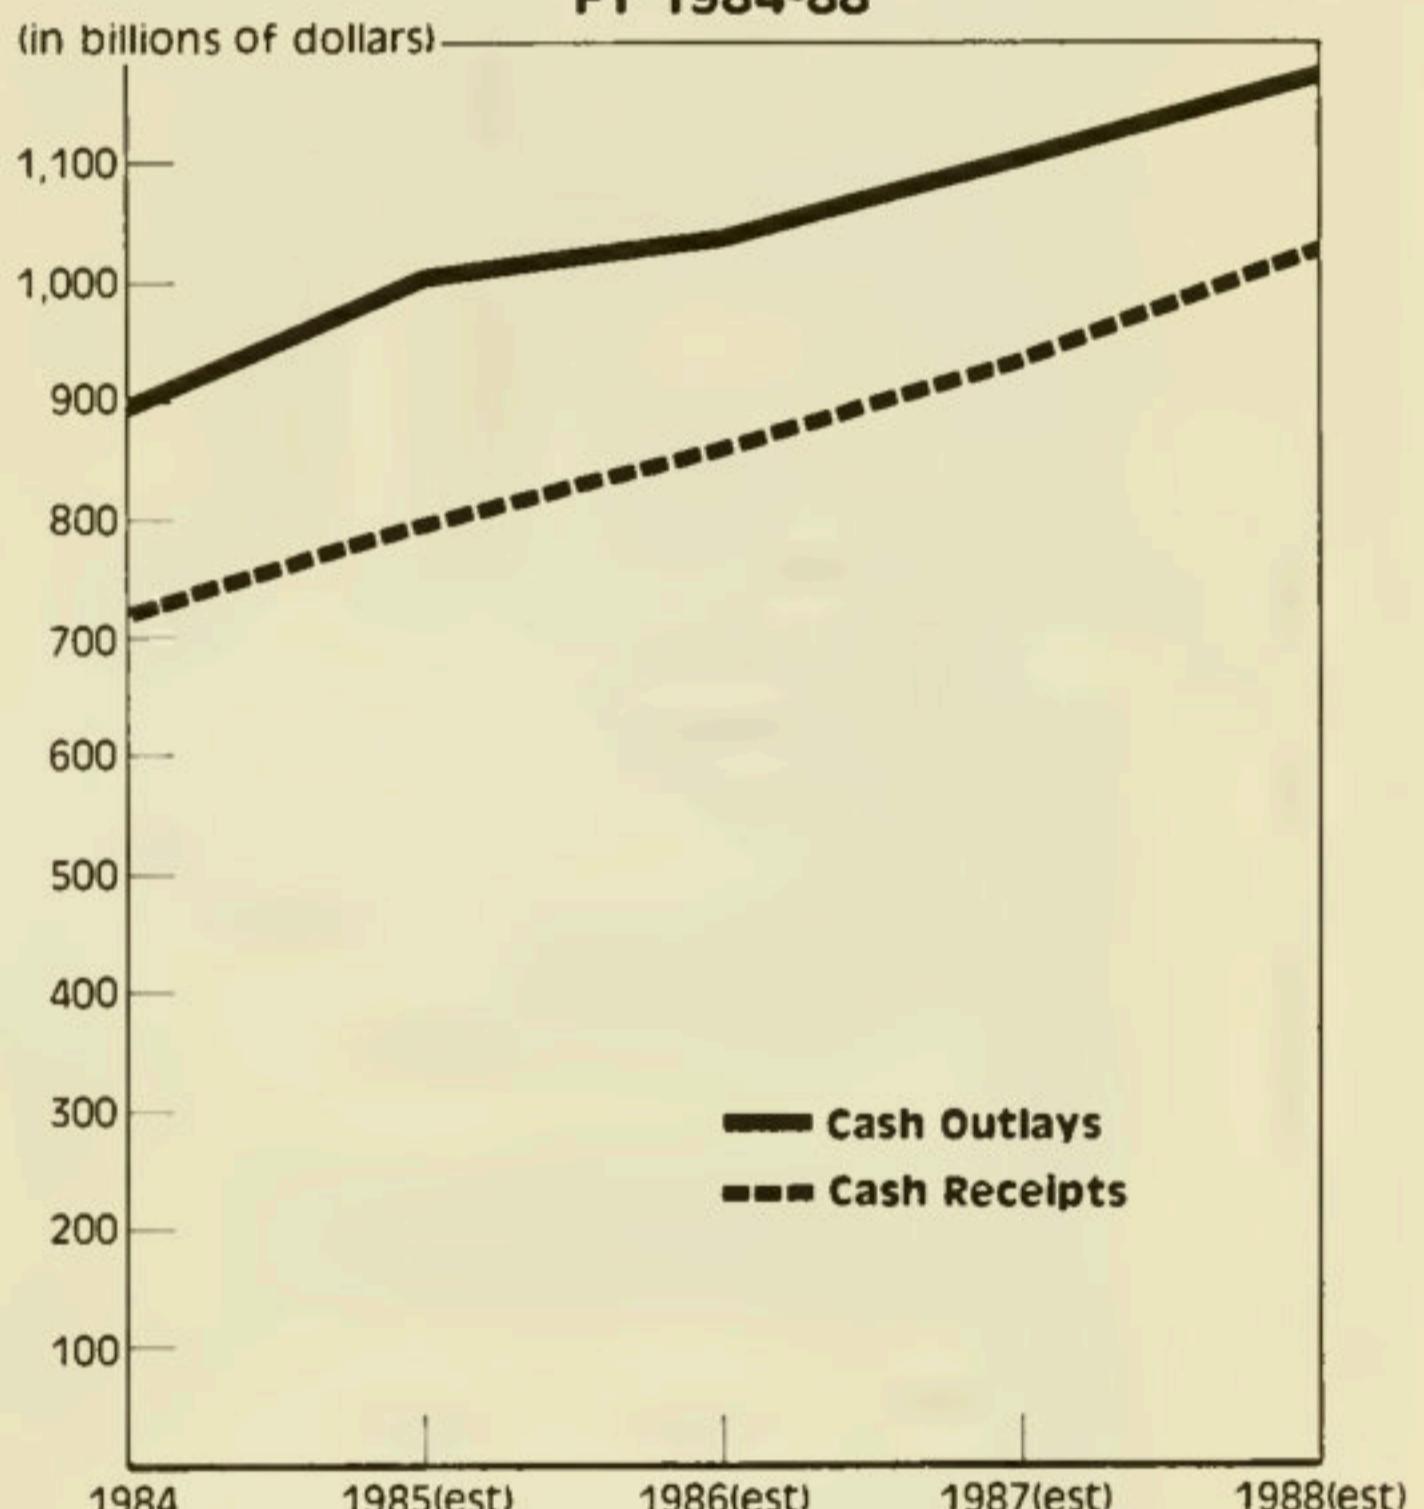

FLOW OF FUNDS PROJECTIONS

Total cash receipts amounted to \$718.8 billion in FY 1984, an increase of \$82.5 billion from FY 1983. The graphs below depict the actual and projected FY 1985–88 cash receipts and outlays and the components of cash receipts for FY 1984.

**Major Components of Cash Receipts
for FY 1984**

**Actual and Projected Cash Receipts and Outlays
FY 1984-88**

The table which follows shows the amount of actual FY 1984 and projected FY 1985–88 budget cash receipts and outlays.

- The data presented here differs from the consolidated financial statements in that it is on the cash basis instead of the accrual basis, and certain receipts are treated as reductions of outlays, according to conventions adopted for budgeting purposes.
- The projections are not forecasts of future receipts and outlays, nor are they recommendations for policy-setting purposes. They simply reflect what may happen to cash basis revenues and expenditures considering certain basic assumptions reflected in the budget.
- The receipts projections are consistent with the continuation of current tax laws as modified in the 1986 Budget.
- Outlay estimates indicate the degree to which resources would be committed by the continuation of existing and currently proposed programs through FY 1988.

COMPARATIVE SUMMARY OF SELECTED FINANCIAL DATA
Restated for General Price-Level Changes

The following graphs which were developed from the Statement of Financial Position and Statement of Operations present a comparative summary of selected financial data.

**Accumulated Position — Actual and Restated
for General Price-Level Changes
FY 1980-84**

**Operating Results — Actual and Restated for
General Price-Level Changes
FY 1980-84**

Accounting for inflation by restating historical values to account for changes in the general purchasing power of the dollar provides comparability between years since all dollars are equivalent to the current level of purchasing power. This restatement generally follows the Financial Accounting Standards Board Statement No. 33, "Financial Reporting and Changing Prices."

The tables which follow show the Financial Statements of the U.S. Government restated for general price-level changes and a comparative summary of selected financial data.

Derived from the Consumer Price Index for All Urban Consumers (CPI-U), the average conversion factors used in the tables are: fiscal 1984—1.025 and fiscal 1983—1.011. Monetary assets and liabilities as of September 30, 1984, are not restated because they already represent dollars of current general purchasing power.

EFFECT OF INDIVIDUAL AND CORPORATE TAX BENEFITS ON FEDERAL REVENUES

The following table is designed to show the revenue losses attributable to tax law provisions that allow special exclusions, exemptions, or deductions from gross income or provide special credits, tax rates, or deferrals. The schedule shows the approximate cost of tax benefits.

It should be noted that the effect on revenues of adding or deleting a particular tax benefit would not be the same as the dollar amount currently associated with the benefit. Consequently, it is not possible to say what the effects of increasing or decreasing selected benefits would be without considering a number of variables.

Some minor distortions may have occurred since data presented have been condensed for purposes of this report.

**Effect of Individual and Corporate Tax Benefits on Federal Revenues
for Tax Years 1984 and 1983**
(In billions)

	Estimated amount of revenue loss	
	1984	1983
Income exclusion		
Capital gains at death	\$3.9	\$3.5
Disability and retirement benefits (social security and private)	82.8	84.7
Education allowances (scholarships and GI benefits)	1.2	1.1
Foreign earnings and investment incentives (income earned abroad)	1.3	1.3
Interest and dividends (State and local bonds and debt, and life insurance)	19.9	22.1

COMMITMENTS AND CONTINGENCIES

Total commitments amounted to \$514.8 billion in FY 1984, an increase of \$80.3 billion from FY 1983. Total contingencies amounted to \$3,316.2 billion in FY 1984, an increase of \$368.1 billion from FY 1983. The graphs below show the percentage distribution of 1984 commitments and contingencies by source category.

The table that follows is designed to show two basic types of financial information. These are the maximum potential liabilities (commitments) and the anticipated liabilities (contingencies) which it is reasonably certain, based on experience and other factors, will occur. The anticipated liabilities are the equivalent to allowance for losses.

As used in commercial accounting, a commitment represents an obligation to pay for goods or services upon delivery under a contractual arrangement. Commitments shown in the table are represented by long-term contracts for which appropriations have not yet been provided by the Congress, and undelivered orders representing obligations of currently available appropriations.

A contingency represents a possible exposure to a liability depending upon the outcome of uncertain future events or circumstances. Contingencies are stated in terms of the maximum risk exposure without regard to existing contingent assets which would be available to offset potential losses. The ratio of losses incurred to premiums written represents the probability of incurring those losses. "Contingent liabilities" supports the balance sheet liability "contingent liabilities for guarantee and insurance programs" and represents the anticipated liability.

FEDERAL DEBT MATURITY

Total net borrowing from the public amounted to \$1,299.5 billion in FY 1984, an increase of \$169.1 billion from FY 1983. This chart has been presented to graphically show the increase in net borrowing from the public.

Net Borrowing from the Public with Interest Expense for 1974-84

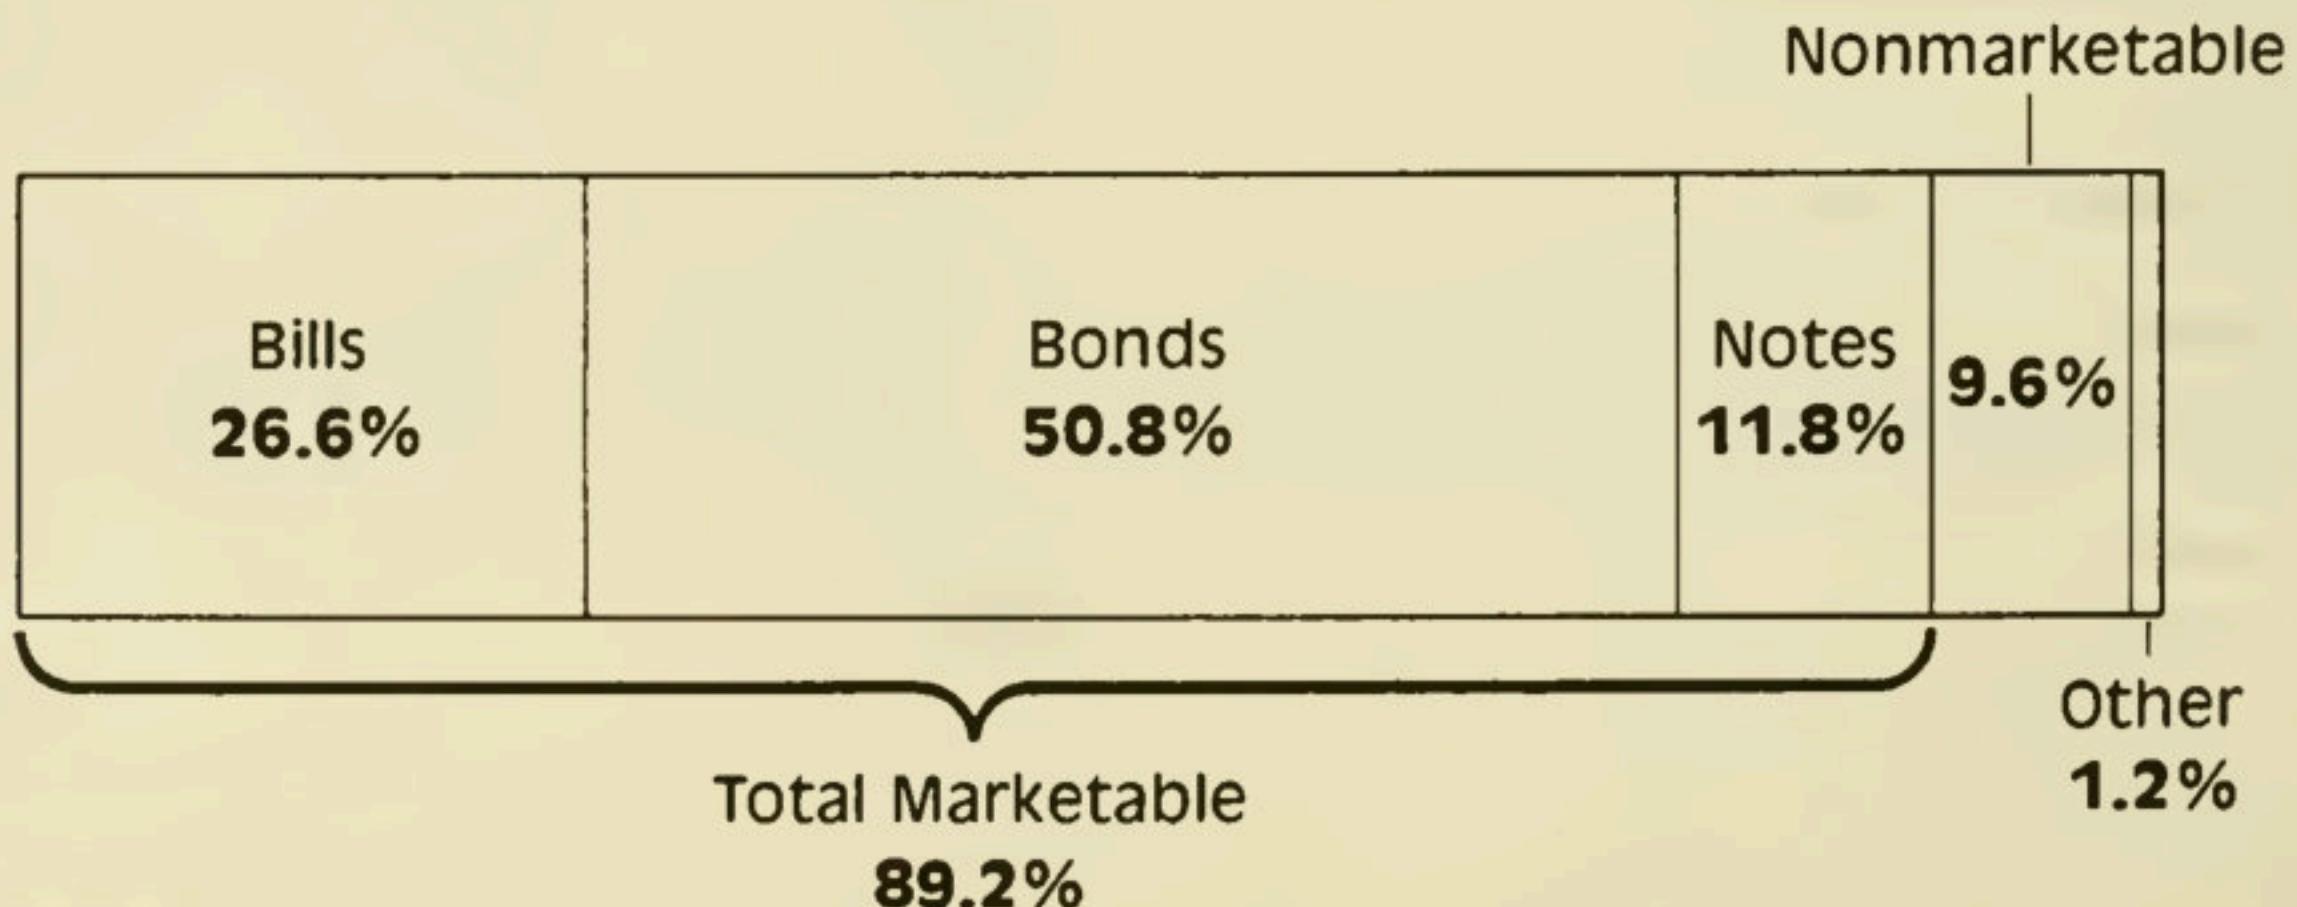

(In billions of dollars)

The Federal Debt Maturity schedule which follows reflects information on the borrowing of the Federal Government needed to finance the Government's operations.

Information on the debt is provided by type of debt instrument, average interest rate charged for each type, and maturity. This schedule directly supports the balance sheet caption, "Borrowing from the public," which is shown net of intragovernmental holdings and unamortized premium or discount. Intragovernmental holdings represent that portion of the total Federal debt held by Federal entities, including the major trust funds.

The percentage distribution of 1984 net borrowing from the public by source category is graphically depicted below.

ADDITIONS TO NON-FEDERAL ECONOMIC RESOURCES

The following graph indicates the ways in which the Government uses its resources to add to the physical and human resources of the Nation without acquiring physical assets.

The table which follows shows the amounts of these expenditures. Some of these investment-type expenditures, while not adding to the Federal assets, add to the assets of State and local governments or private institutions, and all enhance the future productivity of the Nation.

While this table does not provide a precise measure of the difference between capital and current items, it does indicate a useful general magnitude.

Additions to State, local, and private assets include construction grants for highways, hospitals, and airports, subsidies to the merchant fleet, and conservation projects, which increase the value of private farmland and water resources. Other developmental expenditures reflect current Federal expenditures and grants which will benefit the Nation in future years by increasing productivity or well-being. These include research and development costs and education and training.

**SUMMARY OF ACCOUNTS AND LOANS RECEIVABLE
DUE FROM THE PUBLIC**

Total accounts receivable amounted to \$63.5 billion in FY 1984, an increase of \$6.1 billion from FY 1983. Total loans receivable amounted to \$261.1 billion in FY 1984, an increase of \$6.5 billion from FY 1983. Graphically depicted below are summaries by function of accounts and loans receivable data.

Accounts Receivable

Loans Receivable

General Government Receivables

The table which follows supports the balance sheet receivables, "Accounts receivable" and "Loans receivable" which are shown net of allowances, taxes receivable and intragovernmental holdings. The information in the table is based on data submitted by Federal agencies to the Treasury and published annually in the Treasury Bulletin.

The Debt Collection Act of 1982 (31 U.S.C. 3719) requires the Director of the Office of Management and Budget (OMB), in consultation with the Secretary of the Treasury and the Comptroller General of the United States, to establish regulations requiring each agency with outstanding debts to prepare and transmit to OMB and the Treasury a report which summarizes the status of accounts and loans receivable managed by each agency. These receivables result from a wide range of Federal activities including tax assessments; sale of Government services such as satellite launchings; sale of Government goods such as natural resources from Federal lands; overpayments to people like annuitants; and various loan programs such as student and housing loans. The data in the reports will enable the Federal Government to improve collection activity.

RECONCILIATION OF ACCRUAL OPERATING RESULTS TO THE CASH BASIS BUDGET

The following table reflects the separate bases used to prepare each (accrual vs. cash). The Consolidated Financial Statements are prepared on the accrual basis and, accordingly, are more comprehensive because they recognize revenues and expenses in the accounting period to which they relate rather than when the receipts or outlays take place. The Budget of the United States Government reflects only cash received or spent.

The items shown as additions represent additional expenses not recognized under the budget concept, while deductions are adjustments for redistribution items.
