TREASURY BULLETIN

1/2
DEPARTM

**Winter Issue
March 1989**

**Office of the Secretary
Department of the Treasury
Washington, D.C.**

**Compiled and Published
by Financial Management
Service**

ADDITIONAL FINANCIAL MANAGEMENT SERVICE RELEASES ON FEDERAL FINANCES

*Sold on a subscription basis only (exceptions noted) by the Superintendent of Documents,
U.S. Government Printing Office, Washington, D.C. 20402 (phone orders: (202) 783-3238):†*

- **Daily Treasury Statement.** Provides summary data on the Treasury's cash and debt operations for the Federal Government. Published each Federal working day. Subscription price: \$152 per year (domestic), \$190 per year (foreign).
- **Monthly Treasury Statement of Receipts and Outlays of the United States Government.** Provides Federal budget results, including receipts and outlays of funds, the surplus or deficit, and the means of financing the deficit or disposing of the surplus. Preparation based on agency reporting. Subscription price: \$22 per year (domestic), \$27.50 per year (foreign).
- **Consolidated Financial Statements of the United States Government** (annual). Provides information about Government financial operations on a consolidated basis. Single copy price: \$2.25.
- **United States Government Annual Report and Appendix.** Annual Report presents budgetary results at the summary level. Appendix presents the individual receipt and appropriation accounts at the detail level. Annual Report single copy price: \$2.50; Appendix free from Financial Management Service.

† Treasury Bulletin subscription order form on inside back cover of this issue.

Excerpts from "The Tax Expenditure Budget Before and After the Tax Reform Act of 1986"

by Thomas S. Neubig and David Joulfaian

I. INTRODUCTION

One of the goals of the Tax Reform Act of 1986 (1986 act) was to reduce the role of the Federal tax system in the U.S. economy. The lack of a comprehensive income tax base resulted in higher marginal tax rates which discouraged saving, investment, and work effort and encouraged unproductive investment in tax shelters. Tax preferred activities were favored relative to other activities. The 1986 act enhanced the neutrality of the tax system and reduced distortions. One measure of the effect of the 1986 act on the reduction in economic distortions caused by the Federal tax system is the change in the Federal tax expenditure budget.

The tax expenditure budget lists "provisions of the Federal tax laws which allow a special exclusion, exemption, or deduction from gross income or which provide a special credit, a preferential rate of tax, or a deferral of liability." Although the specific provisions included in the tax expenditure budget and their measurement are subject to considerable controversy, they provide some indication of Federal economic assistance to particular activities that could be achieved through the Tax Code or alternatively through a direct expenditure program. The 1986 act had a dramatic effect on the Federal Government's influence on these activities.

The 1986 act reduced aggregate tax expenditures by \$190 billion, or by approximately 40 percent of what they would have been in 1988.

Income tax base broadening and repeal of numerous tax expenditures permitted significant reductions in marginal tax rates of both individuals and corporations. Repeal and scalebacks of tax expenditures directly reduced the number and amount of tax expenditures. But, more importantly, the significant reductions in marginal tax rates decreased the value of the remaining tax expenditures. Because most tax expenditures are directly related to the taxpayers' marginal tax rate, lower tax rates reduce the value of the tax expenditures. For example, the reduction in the top marginal tax rate from 50 percent to 28 percent lowered the value of the mortgage interest deduction by 44 percent for high-income taxpayers.

Under current law, the simple summation of tax expenditures for calendar year 1988 totals \$315 billion. Under pre-tax reform law, total tax expenditures in 1988 would have been \$510 billion. The 1986 act reduced aggregate tax expenditures by \$190 billion, or by

approximately 40 percent of what they would have been in 1988. The reduction in marginal tax rates accounted for \$115 billion, or almost 60 percent of this decline as shown in summary table 1. Almost half of the rate reduction effect occurred among provisions otherwise unchanged by tax reform, such as the mortgage interest deduction and the exclusion of Social Security benefits.

This paper is divided into four sections. Section II describes the tax expenditure budget and how the 1986 act changed it. We identify provisions that were repealed, scaled back, reduced in value by lower marginal tax rates, and expanded by the 1986 act. In section III, we present estimates of the tax expenditure budget before and after tax reform. In addition, we present estimates of the differential effects of rate reduction and base broadening, as well as some examples of the distributional effects of several tax expenditures. In the final section, we discuss some of the issues involved in measuring tax expenditures that were raised in quantifying the effects of the 1986 act.

II. BACKGROUND ON THE TAX EXPENDITURE BUDGET AND THE TAX REFORM ACT OF 1986

A. The Tax Expenditure Budget

The U.S. Department of the Treasury published the first tax expenditure budget in 1967. The budget included special exclusions, exemptions, deductions from gross income, special credits, preferential rates of tax, and provisions providing deferral of income tax liability. The tax expenditure budget is now published annually as special analysis G in the U.S. budget, as mandated by the Congressional Budget Act of 1974. Descriptions of the tax expenditure baselines, measurement issues, and specific tax expenditures are included in special analysis G.

The Treasury's tax expenditure budget includes 120 provisions with an outlay equivalent value summing individually to over \$450 billion in fiscal year (FY) 1988. As described in section IV, the total value of tax expenditures does not necessarily equal the sum of the value of individual tax expenditures due to interaction among the provisions. We provide some estimates of the extent of interactions between different provisions. The total value of tax expenditures may be misleading in its absolute value, and, thus, we present it only for purposes of giving the reader the general order of magnitude.

B. Different Effects of the 1986 Act on Tax Expenditures

The 1986 act had a number of different effects on the tax expenditure budget. . . .

Tax reform broadened the tax base by repealing 14 provisions and scaling back the eligible activity of 16 other provisions. The largest provisions repealed were the investment tax credit, the capital gains exclusion, and the deduction for two-earner married couples.

TAX POLICY

The largest provisions scaled back in their scope were the individual retirement accounts, the deductibility of nonbusiness State and local taxes (due to repeal of the sales tax deduction), and the deductibility of interest on consumer credit (which was phased down to 40 percent in 1988 and repealed by 1990).

The largest number of tax expenditures were only affected by the reduction in individual and corporate marginal tax rates. Even if the level of eligible activity of tax expenditures remained unchanged, the value of many tax expenditures was reduced by the lower marginal tax rates. For example, a taxpayer subject to the pre-tax reform top 50-percent marginal tax rate and the post-tax reform top 28-percent marginal tax rate had a 44-percent reduction in the value of certain tax expenditures, such as deductions and tax exemptions. If that taxpayer's mortgage interest deduction was \$20,000, the after-tax cost of the interest expenses rose from \$10,000 to \$14,400 (\$20,000 times one minus the marginal tax rate). The value of tax expenditures increased for certain taxpayers whose marginal tax rates increased, i.e., taxpayers subject to the lowest positive marginal tax rate of 11 percent before tax reform who might be subject to a 15-percent marginal rate after tax reform.

Although the 1986 act did not directly restrict a number of "sacred" provisions, the reduction in marginal tax rates reduced their value considerably. For instance, the largest changes in tax expenditures subject to only the tax rate effect were the exclusion of pension contributions and earnings on employer plans, the exclusion of employer contributions for medical insurance premiums and medical care, and the exclusion of mortgage interest on owner-occupied homes.

The 1986 act took many steps forward in broadening the tax base, and a few steps backward. The act expanded the scope of 11 tax expenditures and created 9 additional tax expenditures. Provisions, such as the research and experimentation credit and the targeted jobs tax credit, were scheduled to expire and were extended for 2 additional years. The 1986 act did not create any entirely new tax provisions; most of the new tax expenditures are exceptions from new general rules or substitutes for other tax expenditures. For instance, the additional deductions for the blind and the elderly replaced special exemptions for the same individuals. The low-income housing tax credit replaced special accelerated cost recovery deductions, 5-year amortization of rehabilitation expenses, special deductions for construction period interest and taxes, and tax-exempt bond financing for low-income rental housing.

In some cases, the new and expanded tax expenditures already were in the Tax Code but became tax expenditures due to other changes. For instance, the capital gains exclusion at death and on the first \$125,000 of home sales increased in value due to the repeal of the 60-percent exclusion of long-term capital gains. The exception for \$25,000 of rental losses from the passive loss limitation rules and the expensing of multiperiod timber growing costs became tax expenditures because the 1986 act created new general rules limiting passive losses¹ and requiring the capitalization of multiperiod expenses.

The distinction made here between provisions that were scaled back, expanded, and affected only by rate reductions is somewhat arbitrary. The 1986 act in many cases made minor changes in the eligible activity that changed the tax base, but the rate reduction effect was considerably larger than the tax base change. In those cases, the provision is listed under the rate reduction only effect. For instance, the deductibility of charitable contributions was tightened

slightly, while the rate reduction effect was several times larger.

Although the 1986 act did not directly restrict a number of "sacred" provisions, the reduction in marginal tax rates reduced their value considerably.

In addition, the distinction between provisions repealed, scaled back, and affected by rate reduction only uses the existing grouping of tax expenditures used in special analysis G. A somewhat different picture would occur if several tax expenditures were more disaggregated or the fully phased in law were applied. For instance, the repeal of State and local sales taxes is grouped with nonbusiness State and local taxes other than on owner-occupied homes. Thus, State sales, personal property, and income tax deductions are included together in the provisions scaled back. Alternatively, the sales tax deduction could be grouped with the provisions repealed, and the personal property and income tax deductions could be grouped with the provisions affected by rate reduction only. In addition, the gradual repeal of the deductibility of interest on consumer credit is grouped with the provisions scaled back, because in 1988 40 percent of the deduction was still allowed. If the comparison were made after the full phase-in of the 1986 act, the provisions repealed would show a larger effect.

* * *. In section III, we describe the stacking rules used to disaggregate the effect of tax reform into the separate effects from rate reduction and base broadening.

III. EFFECTS OF THE TAX REFORM ACT OF 1986 ON THE TAX EXPENDITURE BUDGET

The tax expenditure budget in the FY 1989 budget reflects the tax law changes of the 1986 tax act, but does not separately identify the important changes due to tax reform. For example, the tax expenditure budget shows a decline in the value of the net exclusion of pension contributions and earnings from employer plans in FY 1987 of \$64.1 billion to \$58.7 billion in FY 1989. Similarly, the tax expenditure for the exclusion of contributions and earnings from individual retirement accounts falls from \$19.3 billion in FY 1987 to \$12.0 billion in FY 1989. In both cases, the declines are a result of the 1986 act, but the act's effect can not be separately identified in the published numbers for two reasons. First, the level of activity for most tax expenditures is generally higher in FY 1989 than in FY 1987. Second, the use of fiscal years encompassing different taxable years, i.e., FY 1987 includes parts of taxable years 1986 and 1987 with their different tax rates, confounds the measurement.

The Office of Tax Analysis staff prepared additional estimates of the tax expenditure budget that separately identify the effects of the 1986 act in January 1988. Outlay equivalent estimates² were made of all provisions using 1986 (pre-tax reform) and 1988 (post-tax reform) law assuming the same level of activity (at 1988 levels). In addition, the staff estimated the value of tax expenditures assuming 1988 law but with 1986 tax rates. Using these estimates, one measure of the separate effects of base broadening and rate

TAX POLICY

reduction for each provision is presented. Finally, several examples of the distributional effects of the tax expenditure changes are shown.

A. General Issues

We use the same baseline and methodology for estimating tax expenditures as used in the FY 1989 budget special analysis G. The individual and corporate minimum taxes are included as part of the tax expenditure baseline. For purposes of separating the tax rate effects, the tax rate structure encompasses the tax rate schedule, personal exemptions, the standard deduction, and the minimum tax.

It is important to note that tax expenditure estimates assume no behavior effects unlike revenue estimates of specific tax legislation. Thus, the tax expenditure estimates hold constant the level of activity at 1988 levels. For instance, complete repeal of the consumer interest deduction would shift more borrowing against owner-occupied homes in the form of larger first or second mortgages or home-equity loans. The tax expenditure estimates take the amount of consumer and mortgage debt in 1988 as fixed, and estimates the tax expenditure for consumer interest assuming that it is no longer deductible and no additional deductible borrowing occurs. The revenue estimates of the 1986 act had a smaller revenue effect than the tax expenditure estimate due to the expected financial rearrangements.

About 40 percent of the net reduction in the value of tax expenditures, approximately \$81 billion, resulted from the repeal of various tax expenditures.

Some caution is necessary in the measurement of the change in tax expenditures when the level of activity is held constant. The 1986 act, for example, increased marginal tax rates on long-term capital gains. Pre-tax reform tax expenditures in this paper are estimated using 1988 levels of realizations. The level of realizations of long-term capital gains, however, is lower in 1988 as a result of the higher marginal tax rates. If the tax expenditure for the capital gains exclusion were measured at 1986 levels, the tax expenditure would be larger due to a higher level of realizations. Capital gains also raises the general issue of the appropriate baseline from which to measure tax expenditures, which is discussed more fully in section IV, since one of the justifications for the exclusion was a proxy for the lack of inflation indexing of nominal capital gains.

All estimates are stated in terms of outlay equivalent subsidies. The difference between outlay equivalents and revenue losses, and the reason for presenting outlay equivalents in evaluating the effects of tax reform, are discussed in section IV.

B. Estimates of the Effects of the 1986 Act

The Office of Tax Analysis staff estimated all tax expenditures under pre-tax reform law (1986 law) and current law (1988 law) for calendar year 1988. Using these estimates we provide a summary of the effects of the 1986 act in table 1.

Table 1 shows the total effect on tax expenditures of tax reform by the type of changes made. Approximately one-fourth of the \$190 billion net reduction in the value of tax expenditures due to tax reform occurred on provisions that were unchanged except for the reduction in marginal tax rates. Provisions with predominant rate effects were reduced in value by \$58 billion by tax reform. About 40 percent of the net reduction in the value of tax expenditures, approximately \$81 billion, resulted from the repeal of various tax expenditures. Another 40 percent, \$79 billion, occurred from the combination of rate reduction and base broadening on provisions scaled back by the 1986 act. Expanded and new provisions increased total tax expenditures by \$25 billion.

C. Effects of Rate Reduction and Base Broadening

In order to separately identify the effects of rate reduction and base broadening on the tax expenditure budget, the Office of Tax Analysis staff prepared additional estimates of all tax expenditures. The staff estimated the value of tax expenditures assuming the 1988 tax base, but with the 1986 tax rate structure. The difference between the tax expenditure estimates under prior law rules and the 1988 law/1986 rate estimates is one measure of the separate effect of the 1986 act's base-broadening provisions. The difference between the 1988 law/1986 rate estimates and the current law estimates is one measure of the separate effect of the marginal rate reductions.

These estimates stack the base-broadening provisions before the marginal rate reductions, which tends to allocate more of the tax reform effect to base broadening and less to tax rate reduction. The interaction between the rate reduction and tax base changes is explained more fully in the next subsection. Alternative measures of the separate effects were computed for several important provisions and do not alter the relative importance of the effects of rate reduction and tax base changes.

Table 1 shows the simple summation of the effects of rate reduction and base broadening by type of tax reform change. Base broadening reduced the tax expenditure budget by approximately \$77 billion, or about 40 percent of the total reduction. Tax rate reduction reduced the value of all tax expenditures by approximately \$115 billion in 1988, or 60 percent of the total reduction of \$190 billion in tax expenditures due to the 1986 act.

Table 1 also shows the breakdown by the type of tax reform change. Repeal of various tax expenditures, particularly the investment tax credit, the capital gains exclusion, and the two-earner deduction, accounted for \$81 billion of base-broadening effect.³ The scaleback of tax expenditures contributed an additional \$45 billion reduction. Expanded and new tax expenditures increased the amount of tax expenditures by \$49 billion (before the rate reduction effect), so that the net base-broadening effect was approximately \$77 billion.

Rate reduction reduced the value of the remaining tax expenditures by approximately \$115 billion. Most of the rate reduction effect occurred among provisions that were otherwise unchanged by the 1986 act. Fifty-eight billion dollars of rate reduction occurred among provisions affected only by rate reduction.⁴ Rate reduction reduced the value of provisions scaled back by \$34 billion, compared to \$45 billion from scaling back these same provisions. Rate reduction reduced the value of expanded provisions by \$23 billion. The rate

TAX POLICY

reduction reduced the value of both the new eligible activity as well as the existing eligible activity. Because of the stacking order used here, rate reduction is also shown for the new provisions. The lower tax rates reduced the value of the new provisions by about 9 percent of their value had the 1986 tax rates been in effect.

Lower marginal tax rates and a broader tax base reduced tax expenditures and changed the distribution of the remaining tax expenditures.

E. Distributional Effects

Lower marginal tax rates and a broader tax base reduced tax expenditures and changed the distribution of the remaining tax expenditures. With the significant reduction in the top marginal tax rate, many expected that tax expenditures would be disproportionately reduced for higher income taxpayers. To illustrate the distributional effects of the 1986 act on tax expenditures, we present two examples: contributions to individual retirement plans and the mortgage interest deduction. It should be noted that the distributional effect of the 1986 act on tax expenditures differs from the final incidence of the 1986 act, primarily because no behavioral effects are included in the tax expenditure analysis.

1. Retirement Plans. Under prior law, a working taxpayer could deduct up to \$2,000 (plus \$250 for a nonworking spouse) of contributions to individual retirement accounts (IRAs) from taxable income. The 1986 act scaled back this deduction reported by taxpayers covered under employer-provided retirement plans. The deduction is phased out for taxpayers with adjusted gross income (AGI) between \$40,000 and \$50,000 for joint filers and \$25,000 and \$35,000 for single taxpayers.⁵ The deduction of contributions to IRAs by the remaining taxpayers is retained under the act.

The effect of the rate reduction also disproportionately reduced the remaining tax expenditures of high-income taxpayers. The rate reduction effect, stacked after the base-broadening provisions, reduced the value of tax expenditures by 16 percent for taxpayers with economic income below \$30,000, while reducing the tax expenditures by 36 percent for the highest income taxpayers. A similar distributional effect occurs when the rate reduction was stacked before the base broadeners.

2. Mortgage Interest Deduction. The 1986 act retained the full deductibility of owner-occupied home mortgage interest expenses. The deduction's tax expenditures, however, were reduced by lower marginal tax rates and the expansion of the standard deduction.

Although not directly affected by the 1986 act, the value of mortgage interest deductions fell by 27 percent in 1988 as a result of the act. Tax expenditures for mortgage interest fell from \$34.2 billion

under prior law to \$25.0 billion after tax reform. This reduction occurred principally due to the lower marginal tax rates. Although the effect on tax expenditures of lower marginal tax rates is well recognized, higher standard deductions and tax thresholds also reduce the value of tax expenditures for many low-income families, as exemplified by the mortgage interest deduction.

IV. ISSUES IN MEASURING TAX EXPENDITURES AFTER TAX REFORM

The tax expenditure budget does not have a clearly defined conceptual basis and the empirical implementation of the budget is not always consistent internally or with other aspects of the budget. The 1986 act changes raised a host of issues underlying the tax expenditure budget. We note several of these issues below.

A. Definition of the Tax Expenditure Baseline

Several of the provisions in the 1986 act raised issues of the conceptual baseline for the tax expenditure budget. Examples of these include (1) uniform capitalization rules, (2) the minimum tax, and (3) the treatment of passive losses, among others.

1. Uniform Capitalization Rules. Under pre-tax reform law, businesses were not required to capitalize interest expenses associated with most production activity occurring over several taxable years. The 1986 act required that multiperiod production interest expenses are required to be capitalized and deducted over the life of the contract. The 1986 act, however, exempted timber producers from this requirement and allowed them to continue to expense such costs.

OTA and OMB treat the exception of timber producers from the uniform capitalization rules as a new tax expenditure. Although the tax treatment of timber was unchanged by the 1986 act, the general rule for capitalizing interest was tightened. Thus, the exemption for timber became a special provision rather than part of a general tax provision.

2. Alternative Minimum Tax. The 1986 act toughened the minimum tax system for both individuals and corporations. The minimum tax could be treated three different ways in the tax expenditure budget baseline. First, the minimum tax could be included as part of the tax expenditure baseline, and part of the tax rate structure. This is the way the minimum tax was treated in the OTA/OMB budget, with the value of tax expenditures reduced by the effect of the minimum tax. Since the minimum tax is an integral part of the Federal income tax system, with its alternative minimum tax credit carryover mechanism simply smoothing the timing of income tax payments, it is considered part of the tax rate structure.

Second, the minimum tax could be excluded from the tax expenditure baseline and viewed as a penalty tax imposed as part of the income tax structure. Tax preferences scaled back by the minimum tax might be viewed as negative tax expenditures. The net effect of the positive tax expenditure from the regular income tax and the negative tax expenditure from the minimum tax would give the same estimate as when the minimum tax is included as part of the baseline.

Finally, the minimum tax could be defined as a separate tax system with its own tax expenditure budget. Deviations from the

TAX POLICY

minimum tax baseline could be identified in a separate tax expenditure budget. For instance, the exception of public purpose tax-exempt bonds from the minimum tax base would be such a tax expenditure.

The alternative minimum tax also raises a number of measurement issues as well. The corporate book income provision indirectly scales back many tax expenditures. It is difficult to attribute the additional tax liability from the book income provision to specific tax expenditures. Also, the alternative minimum tax credit carryover affects the present value of many tax expenditures.

3. Passive Loss Limitation. Passive loss limitation rules enacted in 1986 prevent taxpayers from offsetting losses from "passive" activities against income from "active" activities. This raises the question of whether the passive loss limitation is a new general tax rule that should be included as part of the baseline. Some could argue that it was intended as a new general rule and should be part of the baseline. Others could argue that it is a targeted provision limited to a particular type of economic activity and should not be part of the baseline. If the passive loss limitation is not part of the baseline, then it is the equivalent to an exception to the general tax rules that penalizes targeted activities or the equivalent of a negative tax expenditure.

The passive loss limitation itself has a special exception for oil and gas activity. If the passive loss limitation is part of the baseline, then the oil and gas exception would be a tax expenditure. If it is not part of the baseline, then the oil and gas exception would not be a tax expenditure.

Special analysis G treats the passive loss limitation as part of the baseline. However, it does not include the oil and gas exception in the FY 1989 budget because the Code does not provide sufficient guidelines for measuring the exception's tax expenditure value. The Code does not specify whether taxpayers in oil and gas activity would be treated like partnerships and other businesses with "passive" and "active" activities, or treated like taxpayers with rental property where all activities are designated as "passive." One possible approach, albeit arbitrary, would be to apply the general passive loss limitation rules and designate royalty interests as passive and working interests as active. Depending on the way these ventures are financed and interests are "fractioned," however, the working interest may consist of active as well as passive activities.

B. Outlay Equivalents Versus Revenue Losses

Two measures of the cost of tax expenditures are employed in special analysis G. These are the revenue loss or forgone revenue approach and the outlay equivalent approach. The revenue loss estimates equal the amount by which taxes are reduced by the tax expenditure provision. The outlay equivalent estimates, on the other hand, equal the budget cost of a comparable, substitute direct expenditure program valued in pre-tax dollars. As described below, outlay equivalent estimates are the best measure of the change in the value of tax expenditures resulting from tax reform.

Outlay equivalent and revenue loss estimates differ for two types of tax expenditures: (1) provisions equivalent to tax-free grants and (2) provisions with revenue losses partially offset through the loss of other tax benefits.

An example of a provision equivalent to a tax-free grant is the research and experimentation (R&E) tax credit. The R&E credit pro-

vides a 20-percent tax credit to companies that increase their R&E spending. If companies making R&E expenditures were provided a direct grant, the grant would be included in their taxable income and would be subject to tax. The R&E tax credit, however, is not included in the taxable income of the company, and, thus, is the equivalent of a tax-free grant. Each \$1 of R&E tax credit provides the equivalent of \$1.33 of equivalent taxable outlay for a taxpayer in the 25-percent marginal tax rate. The revenue loss estimate only includes the \$1 of the tax credit, while the outlay equivalent includes the additional "tax saving" resulting from the exemption.

An example of a provision with a partially offsetting loss of tax benefit is the targeted jobs tax credit (TJTC). The TJTC is equivalent to a taxable grant because companies must include the amount of the tax credit earned in their taxable income by reducing the amount of wage deductions by the amount of the credit. The TJTC revenue loss estimate assumes that the companies' taxable income increases due to the lower wage deductions, which partially offset the amount of credits received. Direct outlays which are taxable, however, are not assumed to increase total taxable income in the economy. Thus, if an equivalent targeted jobs program paid out \$100 million, then the budget outlay would show \$100 million, even though the equivalent tax credit program would show a revenue loss of \$75 million for taxpayers subject to a 25-percent marginal tax rate.

In measuring the effects of tax reform on tax expenditures, the use of revenue loss estimates can lead to the peculiar result of lower tax rates increasing tax expenditures. For instance, assume that the TJTC program was unchanged by tax reform with credits equal to approximately \$100 million annually. Before tax reform, with corporations subject to a marginal tax rate of 46 percent, the revenue loss estimate would be \$54 million (\$100 million times one minus the marginal tax rate). After tax reform, with a lower 34-percent rate, the revenue loss estimate for an unchanged program would be \$66 million, or 20 percent higher. In contrast, the outlay equivalent estimate would remain unchanged at \$100 million without the misleading rate reduction effect. This anomaly is avoided by comparing outlay equivalent estimates before and after tax reform.

C. Interaction Among Tax Expenditure Provisions

The values of tax expenditure provisions are interrelated due to the nonlinear and progressive tax rate structure of the current law system. If one provision is repealed or modified, the value of other items in the budget may change as a result of taxpayers pushed into higher marginal tax rate brackets, becoming subject to the minimum tax, or switching to the standard deduction.

The interaction among tax expenditures may cause significant measurement problems. Each tax expenditure is estimated assuming its repeal while holding all other provisions in the tax system constant. While facilitating the estimation of individual tax expenditures, the inherent deficiency of this procedure is that it generally leads to overstating the value of deductions and, to a lesser extent, understating the value of exclusions.

To demonstrate the strong interaction among provisions, we estimated the marginal effects of repealing five deductions and five exclusions from income and present the results in table 5. The deductions include home mortgage interest, State and local income taxes, State and local real estate taxes, charitable contributions, and the deduction for medical expenses. Exclusions include employer contributions to pension plans, employer contributions to medical and health insurance plans, contributions to individual retirement

TAX POLICY

accounts, Social Security benefits, and tax-exempt interest.

Under pre-tax reform law, the simple summation of the marginal effects of the exclusions is estimated at \$93 billion. When estimated together for the total combined effect, their value rises to \$95 billion, an increase of \$2 billion or about 2 percent of the total. The combined effect is greater than the sum of the individual provisions because the combination of multiple base broadeners pushes some taxpayers into higher marginal tax brackets.

The simple summation of the marginal effects of the five deductions is estimated at \$89 billion under prior law. When estimated together, after accounting for possible interaction effects, their value falls to \$81 billion, a reduction of \$8 billion or 9 percent of the total.

The repeal of multiple deductions has two different effects. The repeal of several deductions increases taxpayers' taxable income and pushes them into higher marginal tax brackets, similar to that of repealing multiple exemptions. This causes the sum of individual provisions to be lower than the combined effect. The combination of deductions also lowers many taxpayers' deductions below the standard deduction. This will cause the sum of individual provisions to be larger than the combined effect. When people shift to the standard deduction, further cutbacks on itemized deductions have no revenue effect. For these five provisions, the standard deduction effect outweighs the higher marginal tax rate effect.

D. Timing Issues

The tax expenditure budget generally uses the net cash flow estimates of tax expenditures. Dollars are counted as spent in the year the receipts are forgone, even when there are additional commitments to future tax expenditures or offsetting tax receipt changes in later years. This can lead to potentially misleading statistics and apparent anomalies in tax expenditure estimates.

Use of net cash flow receipts understates the effects of tax provisions with large future year tax consequences. For instance, the new low-income housing tax credit is spread over a 10-year period. Although the FY 1989 budget tax expenditure estimate for 1988 was \$425 million, the total cost of the program for the investment done in 1988 will be several multiples of the first-year cost. Changes in other multiyear tax commitments, such as tighter limitations on tax-exempt bond financing, will reduce tax expenditures for 20-30 years in the future on the smaller level of tax-exempt bonds issued in 1988. Thus, comparisons of the tax expenditure value and the effect of tax reform on provisions involving multiyear commitments with provisions having only a single year effect, such as the child-care credit, are misleading.

Many tax expenditures arise from the acceleration in the timing of expense deductions or the deferral of taxable income. The exemption of timber production from the uniform capitalization rules, for instance, enables companies to accelerate deductions. Companies can deduct their timber production costs immediately (expensing) rather than capitalizing the costs and effectively deducting the cost

when the trees are harvested. This acceleration has a favorable effect on the present value of deductions for taxpayers. The deferral of taxable income is equivalent to an interest-free loan from the Government in the amount of the deferred income.

Due to growth in production levels, the amount of accelerated deductions in the initial years from recent investments usually exceeds income recognized in later years from prior investments. As long as the activity level is growing, the amount of tax-deferred income keeps growing. If a tax deferral activity reaches a period of declining investment, however, the repayment of prior interest-free loans can be greater than the amount of new borrowing (deferred income). If the level of activity diminishes, then repayments will exceed deferrals. This actually occurred in FY 1987-89 with oil and gas exploration and development costs. The tax expenditure estimates for oil and gas exploration and development costs are negative because the steep decline in activity resulted in a larger amount of old loans being repaid (deferred income becoming subject to tax) than new loans being created (new income being deferred).

Because the tax expenditure budget is on a net cash flow basis, it shows the tax expenditure for oil and gas exploration as a negative due to the repayment of old "loans." This is misleading in two respects. First, the smaller level of new oil and gas exploration still benefits from tax deferral with an associated positive tax expenditure. Second, due to the lower tax rates after tax reform, the value of the tax deferral on the old loans increased. The tax deferral under prior law was the equivalent of borrowing 46 cents for each dollar of deduction, but after tax reform the repayments will only be 34 cents for each dollar of deferred income. Thus, the tax expenditure budget does not include the forgone revenue of companies paying back previously deferred income at lower marginal tax rates.

V. CONCLUSION

The dramatic reduction in tax rates and the broadening of the tax base under tax reform significantly reduced the value of Federal resource allocation programs run through the Tax Code. The repeal and scaleback of numerous tax expenditure provisions facilitated the transition into a lower tax rate environment. Lower tax rates, in turn, reduced the value of tax expenditure provisions otherwise untouched by the 1986 act.

Overall, the 1986 act reduced the amount of Government subsidies provided through the tax system by \$190 billion, or 40 percent of what they would have been in 1988 in the absence of tax reform. The reduction in marginal tax rates accounted for 60 percent of this reduction.

The Tax Reform Act of 1986, and more specifically the accounting changes it brought about, have added an additional layer of ambiguity and complexity to the tax expenditure estimation process. Further work in the identification and measurement of tax expenditures is needed to make the tax expenditure budget more useful for budget and economic analyses. ◇

TAX POLICY

Table 1--Effect of Tax Reform on Outlay Equivalent Estimates for Tax Expenditures by Type of Effect (\$ millions at 1988 levels)

Types of tax reform change	Tax reform base effect	Tax reform rate effect	Total effect
Provisions repealed	-80,690	1,470	-81,160
Provisions scaled back	-45,045	-34,355	-79,400
Provisions with rate effects only ²	3,595	-57,245	-57,840
Expanded provisions	44,310	-23,000	21,310
New provisions	5,020	-970	4,050
Total	-77,000	-116,040	-193,040

¹ Includes rate effect on a small amount of transition activity of repealed provisions.

² Includes provisions with predominant rate effects not included elsewhere.

³ Includes provisions with very small amount of base-broadening effect.

Table 5--Selected Tax Expenditures Resulting from Itemized Deductions and Exclusions (\$ millions at 1988 levels)

	Pre-tax reform law	1988 law
Selected itemized deductions		
Home mortgage interest expense	34,293	25,014
State and local income taxes	27,350	17,151
State and local real estate taxes	12,106	8,544
Charitable contributions	11,965	8,055
Medical expenses	4,395	2,040
Subtotal deductions (before interaction)	88,742	60,804
Interaction	-7,358	-13,248

TAX POLICY

FOOTNOTES

¹ As noted in section III, some would argue that the passive loss limitation rules should not be part of the tax expenditure baseline, since they are targeted to only passive activities. In that case, the passive loss limitation rules might be considered a negative tax expenditure and the rental exemption no longer a tax expenditure.

² The difference between outlay equivalent and revenue loss estimates is described in section III.

³ A small amount of rate reduction effect is shown for the transition relief of some investment

tax credits.

⁴ The small amount of base-broadening effect is shown for several provisions which had minor base broadening relative to the rate reduction effect.

⁵ The exclusion of current investment earnings on IRAs continues and existing IRAs are grandfathered. In addition, nondeductible IRAs with tax-deferred investment income were permitted. * * * .

Financial Operations

FEDERAL FISCAL OPERATIONS

INTRODUCTION

Background

Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 3513a) requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government.

The first three Federal fiscal operations (FFO) tables are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. The tables are designed to provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the Federal Reserve banks. These reports detail accounting transactions affecting receipts and outlays of the Federal Government and off-budget Federal entities, and their related effect on the assets and liabilities of the U.S. Government. Data used in the preparation of tables FFO-1, FFO-2, and FFO-3 is derived from the Monthly Treasury Statement of Receipts and Outlays of the United States Government.

Budget authority usually takes the form of "appropriations" which permit obligations to be incurred and payments to be made. Most appropriations for current operations are made available for obligation only during a specified fiscal year (annual appropriations). Some are for a specified longer period (multiple-year appropriations). Others, including most of those for construction, some for research, and many for trust funds, are made available for obligation until the amount appropriated has been expended or until the objectives have been attained (no-year appropriations).

Budget authority can be made available by Congress for obligations and disbursement during a fiscal year from a succeeding year's appropriations (advance funding). For many education programs, Congress provides forward funding—budget authority made available for obligation in one fiscal year for the financing of ongoing grant programs during the succeeding fiscal year. When advantageous to the Federal Government, an appropriation is provided by Congress that will become available 1 year or more beyond the fiscal year for which the appropriation act is passed (advance appropriations). Included as advance appropriations are appropriations related to multiyear budget requests.

When budget authority is made available by Congress for a specific period of time, any part not obligated during that period expires and cannot be used later. Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire are known as reappropriations. The amounts involved are counted as new budget authority in the fiscal year of the legislation in which the reappropriation action is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Outlays.—Obligations generally are liquidated by the issuance of checks or the disbursement of cash; such payments are called outlays. In lieu of issuing checks, obligations also may be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in the redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments. Refunds of collections generally are treated as reductions of collections, rather than as outlays. However, payments for earned-income tax credits in excess of tax liabilities are treated as outlays rather than as a reduction in receipts. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and in part from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting

collections.

Receipts.—Receipts reported in the tables are classified into the following major categories: (1) budget receipts and (2) offsetting collections. Budget receipts are collections from the public that result from the exercise of the Government's sovereign or governmental powers, excluding receipts offset against outlays. These collections, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve System. Refunds of receipts are treated as deductions from gross receipts.

Offsetting collections are from other Government accounts or the public that are of a business-type or market-oriented nature. They are classified into two major categories: (1) offsetting collections credited to appropriations or fund accounts, and (2) offsetting receipts (i.e., amounts deposited in receipt accounts). Collections credited to appropriation or fund accounts normally can be used without appropriation action by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without being appropriated. They are subdivided into two categories: (1) proprietary receipts—these collections are from the public and they are offset against outlays by agency and by function, and (2) intragovernmental funds—these are payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts. The transactions may be intrabudgetary when the payment and receipt both occur within the budget or from receipts from off-budget Federal entities in those cases where payment is made by a Federal entity whose budget authority and outlays are excluded from the budget totals.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions, where the payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions, where the payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions, where the payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, by subfunction, or by agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by off-budget Federal entities) as employers into employees retirement funds, (2) interest received by trust funds, (3) rents and royalties on the Outer Continental Shelf lands, and (4) other interest (i.e., interest collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

Off-budget Federal entities.—The Federal Government has used the unified budget concept as the foundation for its budgetary analysis and presentation since 1969. This concept calls for the budget to include all of the Government's fiscal transactions with the public. Starting in 1971, however, various laws have been enacted under which several Federal entities have been removed from the budget or created outside the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two social security

FEDERAL FISCAL OPERATIONS

trust funds, Federal old-age and survivors insurance and Federal disability insurance.

The off-budget Federal entities are federally owned and controlled, but their transactions are excluded from the budget totals under provisions of law. When an entity is off-budget, its receipts, outlays, and surplus or deficit are not included in budget receipts, budget outlays, or the budget deficit; its budget authority is not included in the totals of budget authority for the budget; and its receipts, outlays, and surplus or deficit ordinarily are not subject to the targets set by the congressional budget resolution.

Nevertheless, the Balanced Budget and Emergency Deficit Control Act of 1985 (commonly known as the Gramm-Rudman-Hollings Act) included the off-budget surplus or deficit in calculating the deficit targets under that act and in calculating the excess deficit for purposes of that act. Partly because of this reason, attention has focused on the total receipts, outlays, and deficit of the Federal Government instead of the on-budget amounts alone.

Table FFO-1.--Summary of Fiscal Operations

This table summarizes the amount of total receipts, total outlays, total surplus or deficit, transactions in Federal securities and monetary assets, and transactions and balances in Treasury operating cash.

Table FFO-2.--On-budget and Off-budget Receipts by Source

Budget receipts are taxes and other collections from the public that result from the exercise of the Government's sovereign or governmental powers. The amounts in this table represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties,

and net miscellaneous receipts by source.

Table FFO-3.--On-budget and Off-budget Outlays by Agency

Congress [usually] provides budget authority which is [generally] in the form of appropriations, then Federal agencies obligate the Government funds to make outlays. The amounts in this table represent a breakdown of on-budget and off-budget outlays by agency.

Table FFO-4.--Summary of Internal Revenue Collections by States and Other Areas

This annual table provides data on internal revenue collections classified by States and other areas and by type of tax. The amounts reported are for collections made in a fiscal year beginning in October and ending the following September.

Fiscal year collections span several tax liability years because they consist of prepayments (e.g., estimated tax payments and taxes withheld by employers for individual income and social security taxes), of payments made with tax returns, and of subsequent payments made after tax returns are due or are filed (e.g., payments with delinquent returns or on delinquent accounts).

It is also important to note that these data do not necessarily reflect the Federal tax burden of individual States. The amounts are reported based on the primary filing address furnished by each taxpayer or reporting entity. For multistate corporations, this address may reflect only the State where such a corporation reported its taxes from a principal office rather than other States where income was earned or where individual income and social security taxes were withheld. In addition, an individual may reside in one State and work in another State.

FEDERAL FISCAL OPERATIONS

ago. This quarterly decline took place even though total net receipts for fiscal 1988 were \$10.27 billion greater than the prior fiscal year. The relative decline in fourth-quarter receipts was the result of last year's safe-harbor rules for corporate estimated payments which increased the share of fourth-quarter corporate receipts for 1987. Total net receipts for fiscal 1988 were \$94.16 billion.

Employment taxes and contributions.--During the fourth quarter of fiscal 1988, employment taxes and contributions were \$76.43 billion--an increase of \$10.32 billion over the same quarter of fiscal 1987. Employment taxes and contributions increased from \$273.03 billion in fiscal 1987 to \$305.09 billion in fiscal 1988. This growth was partly attributable to increases in several payroll tax rates, effective January 1, 1988. As a consequence of the Social Security Amendments of 1983, the Social Security rate was increased from 5.7 percent to 6.06 percent. In addition, the Omnibus Budget Reconciliation Act of 1987 included an increase in the combined employer-employee contribution for tier 2 railroad retirement from 19 percent to 21 percent.

Unemployment insurance.--Unemployment insurance tax receipts for the July-September quarter were \$6.43 billion compared with \$7.21 billion for the year earlier period. The reduction in tax collections for the recent quarter compared with the year ago quarter is the result of exceptionally high receipts in September of 1987, due to an accelerated payment of State unemployment insurance (UI) debt. The reduction in State UI debt and the improved economy has caused a reduction in the average unemployment insurance tax rate. Wage increases have approximately balanced the drop in average tax rate; however, total UI collections for fiscal 1988 are below the fiscal 1987 level due to the 1987 payment acceleration. Collections for fiscal 1988 were \$24.58 billion, down \$1.0 billion from the \$25.58 billion for the prior fiscal

year.

Contributions for other insurance and retirement.--Retirement contributions for the fourth quarter of fiscal 1988 totaled \$1.12 billion, a decrease of \$0.02 billion from the same quarter a year earlier. Total contributions for the fiscal year were \$4.66 billion.

Excise taxes.--Excise tax receipts for the July-September quarter were \$9.90 billion, compared with \$8.38 billion for the same quarter of 1987. Collections for the fiscal year ended September 30, 1988, totaled \$35.54 billion, compared with \$32.46 for the fiscal year ended September 30, 1987. Increased fuel tax collections, due to the change in point of collection of these taxes, as well as to growth in consumption of fuel, were important factors in the growth of collections from year earlier levels.

Estate and gift taxes.--Estate and gift tax receipts were \$1.97 billion in the fourth quarter of 1988. This represents a reduction of 8.3 percent from the previous quarter and an increase of 6.5 percent over the same quarter in the previous year. The continued slowdown in receipts growth reflects the stock market performance in the fall of 1987 as well as the phaseout of several law changes.

Customs duties.--Customs receipts, net of refunds, were \$4.36 billion for the fourth quarter of fiscal 1988. This is an increase of \$0.29 billion over the same quarter a year earlier.

Miscellaneous receipts.--Net miscellaneous receipts for the fourth quarter of fiscal 1988 fell by \$0.438 billion from the same quarter a year earlier to \$4.62 billion. Deposits of Federal Reserve earnings decreased by \$0.499 billion, while net other miscellaneous receipts increased by \$0.06 billion. ◇

1 The receipts in the various States do not indicate the Federal tax burden of each since, in many instances, taxes are collected in one State from residents of another State. For example, withholding taxes reported by employers located near State lines may include substantial amounts withheld from salaries of employees who reside in neighboring States. Also, the taxes of some corporations are paid from a principal office, although their operations may be located in another State, or throughout several States.

2 Collections of individual income tax not withheld include old-age, survivors, disability, and hospital insurance taxes on self-employment income (SECA). Similarly, the collections of individual income tax withheld are reported in combined amounts with old-age, survivors, disability, and hospital insurance taxes (FICA) on salaries and wages.

3 Includes taxes on unrelated business income of exempt organizations.

4 Includes District of Columbia collections.

5 Consists of collections from U.S. taxpayers in Puerto Rico, the Virgin Islands, etc., and in foreign countries.

6 Tax payments made to banks, under the Federal tax deposit (FTD) system, are included

In the internal revenue collections for the period in which the FTD is purchased. However, such payments are not classified by Internal revenue districts (nor by tax subclasses to which excise payments relate) until the IRS applies them to taxpayers' liabilities.

7 Represents credits allowable on income tax returns for certain gasoline and special fuels tax payments and for excess payments under the Federal Insurance Contributions Act (FICA).

8 Designations by taxpayers of a portion of their taxes to the Presidential election campaign fund are not collections, as such, because they do not affect taxpayer liability. Transfers of amounts to this fund are made on a national basis only and, therefore, have no effect on district and regional collection data.

9 Represents amounts offset against outstanding tax liabilities other than those for Forms 1040 and 1040A on which the credits were claimed.

10 Includes amounts contained in the national totals but not classified by State or district as of the end of the fiscal year on Sept. 30. Also includes amount transferred to a special account for the Northern Mariana Islands.

FEDERAL OBLIGATIONS

GROSS FEDERAL OBLIGATIONS AS OF SEPT. 30, 1988

GROSS FEDERAL OBLIGATIONS INCURRED
OUTSIDE THE FEDERAL GOVERNMENT

As of Sept. 30, 1988

ACCOUNT OF THE U.S. TREASURY

SOURCE AND AVAILABILITY OF THE BALANCE IN THE ACCOUNT OF THE U.S. TREASURY

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. Major information sources include the Daily Balance Wire received from the Federal Reserve banks and branches, and electronic transfers through the Treasury Financial Communications System. As the balances in the accounts at the Federal Reserve banks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on Nov. 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate in the program. Depositaries that wish to retain funds deposited in their tax and loan accounts in interest-bearing obligations participate under the Note Option; depositaries that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remittance Option.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same financial institution. On occasion, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the accounts of their customers.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and the economy.

^{*} Less than \$500,000.¹ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.² Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, etc.³ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.⁴ Includes U.S. savings bonds, savings notes, retirement plan and tax and loss bonds. U.S. savings notes first offered for sale as of May 1, 1967, and were discontinued after

June 30, 1970. Retirement plan bonds first offered for sale as of Jan. 1, 1963; tax and loss bonds first issued in March 1968.

⁵ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositories, as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after Mar. 15, 1968; and FUTA taxes beginning April 1970.

FEDERAL DEBT

INTRODUCTION

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the remainder. In addition to the data on the Federal debt presented in the tables in this section of the quarterly *Treasury Bulletin*, the Treasury publishes detailed data on the public debt outstanding in the Monthly Statement of the Public Debt of the United States and on agency securities and the investments of Federal Government accounts in Federal securities in the Monthly Treasury Statement of Receipts and Outlays of the United States Government.

Table FD-1.--Summary of Federal Debt

The Federal debt outstanding is summarized as to holdings of public debt and agency securities by the public, which includes the Federal Reserve, and by Federal agencies, largely the social security and other Federal retirement trust funds. Greater detail on holdings of Federal securities by particular classes of investors is presented in the ownership tables, OFS-1 and OFS-2, of the *Treasury Bulletin*.

Table FD-2.--Interest-Bearing Public Debt

Interest-bearing marketable and nonmarketable Treasury securities are presented as to type of security. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities on which interest has ceased to accrue. The Federal Financing Bank (FFB) is under the supervision of the Treasury, and FFB securities shown in this table are held by a U.S. Government account.

Table FD-3.--Government Account Series

Nonmarketable Treasury securities held by U.S. Government accounts are summarized as to issues to particular funds within the Government. Many of the funds invest in par-value special series nonmarketables at statutorily determined interest rates, while others whose statutes do not prescribe an interest rate formula invest in market-based special Treasury securities whose terms mirror the terms of marketable Treasury securities.

Table FD-4.--Interest-Bearing Securities Issued by Government Agencies

Federal agency borrowing has been declining in recent years, in part because the Federal Financing Bank has been providing

financing to other Federal agencies. This table does not cover Federal agency borrowing from the Treasury, which is presented in the Monthly Treasury Statement of Receipts and Outlays of the United States Government. The Government-sponsored entities, whose securities are presented in the memorandum section of table FD-4, are not agencies of the Federal Government, nor are their securities presented in table FD-4 guaranteed by the Federal Government.

Table FD-5.--Maturity Distribution and Average Length of Marketable Interest-Bearing Public Debt Held by Private Investors

The average maturity of the privately held marketable Treasury debt has increased gradually since it hit a trough of 2 years, 5 months, in December 1975. In March 1971, the Congress enacted a limited exception to the 4-1/4-percent interest rate ceiling on Treasury bonds that permitted the Treasury to offer securities maturing in more than 7 years at current market rates of interest for the first time since 1965. The exception to the 4-1/4-percent interest rate ceiling has been expanded since 1971 to authorize the Treasury to continue to issue long-term securities. The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes, and bonds, and the average length comprises an average of remaining periods to maturity, weighted by the amount of each security held by private investors (i.e., excludes the Government accounts and Federal Reserve banks).

Table FD-6.--Debt Subject to Statutory Limitation

The statutory debt ceiling is compared with the outstanding debt subject to limit. The other debt category includes certain Federal debt that the Congress has designated by statute to be subject to the debt ceiling. The changes in non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, such as weekends and holidays. In that event, Treasury securities are redeemed on the first business day following a non-business day.

Table FD-7.--Treasury Holdings of Securities Issued by Government Corporations and Other Agencies

Certain Federal agencies are authorized by statute to borrow from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. The Treasury finances such loans to the Federal agencies with issues of public debt securities.

TREASURY FINANCING OPERATIONS, OCTOBER-DECEMBER 1988

million was accepted at yields ranging from 8.93 percent, price 99.641, up to 8.94 percent, price 99.576. Tenders at the high yield were allotted 43 percent. Noncompetitive tenders were accepted in full at the average yield, 8.94 percent, price 99.576. These totaled \$457 million. Competitive tenders accepted from private investors totaled \$9,136 million.

Legislation enacted on November 10, 1988, repealed the statutory limitation on Treasury long-term bond authority.

In addition to the \$9,593 million of tenders accepted in the auction process, \$300 million was accepted from Government accounts and Federal Reserve banks for their own account.

The notes of Series D-1998 may be held in STRIPS form. The minimum par amount required is \$1,600,000.

The 37-day cash management bills were dated November 15, 1988, due December 22, 1988. Tenders were opened on November 10, 1988. They totaled \$48,660 million, of which \$11,025 million was accepted. The average bank discount rate was 8.07 percent.

Auction of 30-Year Bonds

Legislation enacted on November 10, 1988, repealed the statutory limitation on Treasury long-term bond authority.

On November 14 the Treasury announced that it would auction \$9,000 million of 30-year bonds of 2018 to raise new cash. The bonds of 2018 were dated November 15, 1988, issued November 22, 1988, due November 15, 2018, with interest payable on May 15 and November 15 until maturity. An interest rate of 9 percent was set after the determination as to which tenders were accepted on a yield auction basis. Accrued interest of \$1.74033 per \$1,000, covering the period from November 15 to November 22, 1988, was payable with each accepted tender.

Tenders for the bonds were received until 12:00 noon EST, November 17, and totaled \$21,580 million, of which \$9,026 million was accepted at yields ranging from 9.09 percent, price 99.072, up to 9.11 percent, price 98.869. Tenders at the high yield were allotted 37 percent. Noncompetitive tenders were accepted in full at the average yield, 9.10 percent, price 98.970. These totaled \$413 million. Competitive tenders accepted from private investors totaled \$8,613 million.

The bonds of 2018 may be held in STRIPS form. The minimum par amount required is \$200,000.

Auction of 2-Year and 5-Year 2-Month Notes

On November 16 the Treasury announced that it would auction \$9,000 million of 2-year notes of Series AH-1990 and \$7,500 million of 5-year 2-month notes of Series H-1994 to refund \$11,140 million of publicly held 2-year notes maturing November 30, 1988, and to raise about \$5,350 million of new cash.

The notes of Series AH-1990 were dated November 30, 1988, due November 30, 1990, with interest payable on May 31 and November 30 until maturity. An interest rate of 8-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, November 22, and totaled \$27,081 million, of which \$9,027 million was accepted at yields ranging from 8.86 percent, price 100.027, up to 8.89 percent, price 99.973. Tenders at the high yield were allotted 85 percent. Noncompetitive tenders were accepted in full at the average yield, 8.88 percent, price 99.991. These totaled \$1,275 million. Competitive tenders accepted from private investors totaled \$7,752 million.

In addition to the \$9,027 million of tenders accepted in the auction process, \$970 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$495 million was accepted from Government accounts and Federal Reserve banks for their own account.

The notes of Series H-1994 were dated December 1, 1988, due February 15, 1994, with interest payable on August 15 and February 15 until maturity. An interest rate of 8-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, November 23, and totaled \$21,793 million, of which \$7,504 million was accepted at a yield of 8.95 percent, price 99.616, up to 8.98 percent, price 99.493. Tenders at the high yield were allotted 3 percent. Noncompetitive tenders were accepted in full at the average yield, 8.97 percent, price 99.534. These totaled \$551 million. Competitive tenders accepted from private investors totaled \$6,953 million.

In addition to the \$7,504 million of tenders accepted in the auction process, \$260 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities.

52-Week Bills

On November 10 tenders were invited for approximately \$9,000 million of 364-day Treasury bills to be dated November 25, 1988, and to mature November 24, 1989. The issue was to refund \$9,373 million of maturing 52-week bills and to pay down about \$375 million. Tenders were opened on November 17. They totaled \$28,998 million, of which \$9,052

TREASURY FINANCING OPERATIONS, OCTOBER-DECEMBER 1988

million was accepted, including \$442 million of noncompetitive tenders from the public and \$3,279 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$52 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 7.92 percent.

DECEMBER

Auction of 2-Year and 4-Year Notes

On December 21 the Treasury announced that it would auction \$9,000 million of 2-year notes of Series AJ-1990 and \$7,250 million of 4-year notes of Series Q-1992 to refund \$16,753 million of Treasury notes maturing December 31 and to pay down about \$500 million.

The notes of Series AJ-1990 were dated January 3, 1989, due December 31, 1990, with interest payable on June 30 and December 31 until maturity. An interest rate of 9-1/8 percent was set after the determination as to which tenders were accepted on a yield basis.

Tenders for the notes were received until 1 p.m. EST, December 28, and totaled \$24,243 million, of which \$9,030 million was accepted at yields ranging from 9.21 percent, price 99.848, up to 9.24 percent, price 99.795. Tenders at the high yield were allotted 33 percent. Noncompetitive tenders were accepted in full at the average yield, 9.23 percent, price 99.813. These totaled \$1,724 million. Competitive tenders accepted from private investors totaled \$7,306 million.

In addition to the \$9,030 million of tenders accepted in the auction process, \$765 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,100 million was accepted from Government accounts and Federal Reserve banks for their own account.

own account.

The notes of Series Q-1992 were dated January 3, 1989, due December 31, 1992, with interest payable on June 30 and December 31 until maturity. An interest rate of 9-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, December 29, and totaled \$23,026 million, of which \$7,258 million was accepted at yields ranging from 9.19 percent, price 99.787, up to 9.22 percent, price 99.689. Tenders at the high yield were allotted 62 percent. Noncompetitive tenders were accepted in full at the average yield, 9.22 percent, price 99.689. These totaled \$1,042 million. Competitive tenders accepted from private investors totaled \$6,216 million.

In addition to the \$7,258 million of tenders accepted in the auction process, \$365 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$603 million was accepted from Government accounts and Federal Reserve banks for their own account.

52-Week Bills

On December 9 tenders were invited for approximately \$9,000 million of 364-day Treasury bills to be dated December 22, 1988, and to mature December 21, 1989. The issue was to refund \$9,275 million of maturing 52-week bills and to pay down about \$275 million. Tenders were opened on December 15. They totaled \$27,248 million, of which \$9,040 million was accepted, including \$535 million of noncompetitive tenders from the public and \$2,758 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$37 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 8.49 percent. ◇

PUBLIC DEBT OPERATIONS

INTRODUCTION

Background

The Second Liberty Bond Act (31 U.S.C. 3101, et seq.) provides the Secretary of the Treasury with broad authority to borrow and to determine the terms and conditions of issue, conversion, maturity, payment, and interest rate on Treasury securities. Data in the "Public Debt Operations" section, which have been published in the *Treasury Bulletin* in some form since its inception in 1939, pertain only to marketable Treasury securities, currently bills, notes, and bonds. Treasury bills are discount securities that mature in 1 year or less, while Treasury notes and bonds have semiannual interest payments. New issues of Treasury notes mature in 2 to 10 years, and bonds mature in over 10 years from the issue date. Each marketable Treasury security is listed in the Monthly Statement of the Public Debt of the United States.

Table PDO-1--Maturity Schedule of Interest-Bearing Marketable Public Debt Securities Other than Regular Weekly and 52-Week Treasury Bills

All unmatured Treasury notes and bonds are listed in maturity order, beginning with the earliest maturity. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks, so that the "All other investors" category includes all private holdings.

Table PDO-2--Offerings of Bills

The results of weekly auctions of 13- and 26-week bills and auctions of 52-week bills every fourth week are presented in table PDO-2. Treasury bills mature each Thursday. New issues of 13-week bills are reopenings of 26-week bills. The 26-week bill issued every fourth week to mature on the same Thursday as an existing

52-week bill is a reopening of the existing 52-week bill. The high, low, and average yields on accepted tenders and the dollar value of total bids is presented, along with the dollar value of awards on a competitive and a noncompetitive basis. The Treasury accepts non-competitive tenders of up to \$1 million in each auction of Treasury securities in order to assure that individuals and smaller institutions are able to participate in offerings of new marketable Treasury securities. Noncompetitive bids are awarded at the average yield on accepted competitive bids.

Table PDO-3--Public Offerings of Marketable Securities Other than Regular Weekly Treasury Bills

The results of auctions of marketable Treasury securities, other than weekly bills, are listed in the chronological order of the auction dates over approximately the most recent 2 years. This table includes notes and bonds presented in table PDO-1, 52-week bills in table PDO-2, and data for cash management bills. Treasury offers cash management bills from time to time to bridge temporary or seasonal declines in the cash balance. Cash management bill maturities generally coincide with the maturities of regular issues of Treasury bills.

Table PDO-4--Allotments by Investor Classes for Public Marketable Securities, Parts A and B

Data on allotments of marketable Treasury securities by investor class are presented in chronological order of the auction date for approximately the most recent 2 years. These data have appeared in the *Treasury Bulletin* since 1956. Tenders in each Treasury auction of marketable securities other than weekly auctions of 13- and 26-week bills are tallied by the Federal Reserve banks into investor classes described in the footnotes to the table.

¹ The 13-week bills represent additional issue of bills with an original maturity of 26 weeks or 52 weeks.

² For bills issued on or after May 2, 1974. Includes amounts exchanged on noncompetitive basis by Government accounts and Federal Reserve banks.

³ For 13-week, 26-week, and 52-week bills tenders for \$1,000,000 or less from any one bidder are accepted in full at average price or accepted competitive bids; for other issues, the corresponding amount is stipulated in each offering announcement.

⁴ Equivalent coupon-issue yield.

⁵ Except \$200,000 at 98.180 percent.

⁶ Except \$200,000 at 98.193 percent.

⁷ Except \$1,430,000 at 98.190 percent and \$1,220,000 at 98.188 percent.

⁸ Except \$860,000 at 98.132 percent.

⁹ Except \$2,840,000 at 98.114 percent and \$30,000 at 98.107 percent.

¹⁰ Except \$23,965,000 at 98.061 percent.

¹¹ Except \$4,430,000 at 96.067 percent, \$275,000 at 96.052 percent, and \$500,000 at

96.047 percent.

¹² Except \$90,000 at 98.018 percent.

¹³ Except \$115,000 at 96.003 percent, \$1,000,000 at 95.998 percent, and \$3,445,000 at 95.993 percent.

¹⁴ Except \$200,000 at 97.988 percent.

¹⁵ Except \$50,000 at 95.961 percent and \$50,000 at 95.890.

¹⁶ Except \$4,000,000 at 98.003 percent.

¹⁷ Except \$2,000,000 at 97.960 percent and \$850,000 at 97.958 percent.

¹⁸ Except \$450,000 at 6.68 percent and \$7,600,000 at 6.69 percent.

¹⁹ Except \$1,375,000 at 92.862 percent.

²⁰ Except \$20,000 at 92.922 percent.

²¹ Except \$10,000 at 91.658 percent.

²² Except \$200,000 at 94.730 percent.

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the average bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings see table PDO-2.

² From date of additional issue in case of a reopening.

³ In reopenings the amount issued is in addition to the amount of original offerings.

⁴ Includes securities issued to U.S. Government accounts and Federal Reserve banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

⁵ Eligible for STRIPS.

⁶ Interest began to accrue before the issue date (settlement date) of this loan.

⁷ Yields accepted ranged from 6.30% (price 99.907) up to 6.32% (price 99.870) with the average at 6.31% (price 99.889).

⁸ Yields accepted ranged from 6.62% (price 100.017) up to 6.66% (price 99.879) with the average at 6.64% (price 99.948).

⁹ Yields accepted ranged from 7.08% (price 99.557) up to 7.10% (price 99.448) with the average at 7.09% (price 99.502).

¹⁰ Yields accepted ranged from 6.15% (price 99.954) up to 6.19% (price 99.880) with the average at 6.18% (price 99.898).

¹¹ Yields accepted ranged from 6.53% (price 99.920) up to 6.54% (price 99.893) with the average at 6.54% (price 99.893).

¹² Yields accepted ranged from 7.24% (price 100.037) up to 7.27% (price 99.830) with the average at 7.25% (price 99.968).

¹³ Yields accepted ranged from 7.48% (price 100.203) up to 7.50% (price 99.966) with the average at 7.49% (price 100.084).

¹⁴ Yields accepted ranged from 6.31% (price 99.889) up to 6.32% (price 99.871) with the average at 6.32% (price 99.871).

¹⁵ Yields accepted ranged from 6.72% (price 99.546) up to 6.74% (price 99.459) with the average at 6.73% (price 99.502).

¹⁶ Yields accepted ranged from 6.41% (price 99.935) up to 6.44% (price 99.880) with the average at 6.43% (price 99.898).

¹⁷ Yields accepted ranged from 6.78% (price 99.896) up to 6.79% (price 99.862) with the average at 6.79% (price 99.862).

¹⁸ Yields accepted ranged from 7.02% (price 99.881) up to 7.04% (price 99.772) with the average at 7.04% (price 99.772).

¹⁹ Yields accepted ranged from 7.15% (price 99.954) up to 7.23% (price 99.808) with the average at 7.20% (price 99.863).

²⁰ Yields accepted ranged from 7.88% (price 99.987) up to 7.94% (price 99.829) with the average at 7.91% (price 99.908).

²¹ Yields accepted ranged from 8.49% (price 100.067) up to 8.53% (price 99.801) with the average at 8.52% (price 99.867).

²² Yields accepted ranged from 8.74% (price 100.106) up to 8.77% (price 99.789) with the average at 8.76% (price 99.895).

²³ Yields accepted ranged from 8.03% (price 99.946) up to 8.06% (price 99.891) with the average at 8.05% (price 99.909).

²⁴ The low, high, and average yield was 8.27% (price 99.852).

²⁵ Yields accepted ranged from 7.44% (price 99.881) up to 7.47% (price 99.826) with the average at 7.46% (price 99.845).

²⁶ Yields accepted ranged from 7.88% (price 99.983) up to 7.89% (price 99.949) with the average at 7.89% (price 99.949).

²⁷ Yields accepted ranged from 8.08% (price 99.750) up to 8.12% (price 99.359) with the average at 8.10% (price 99.464).

²⁸ Yields accepted ranged from 7.65% (price 99.954) up to 7.67% (price 99.918) with the average at 7.66% (price 99.936).

²⁹ Yields accepted ranged from 7.93% (price 99.856) up to 7.94% (price 99.830) with the average at 7.94% (price 99.830).

³⁰ Yields accepted ranged from 8.71% (price 99.438) up to 8.74% (price 99.242) with the average at 8.74% (price 99.242).

³¹ Yields accepted ranged from 8.87% (price 100.050) up to 8.89% (price 99.842) with the average at 8.89% (price 99.842).

average at 8.89% (price 99.842).

³² Yields accepted ranged from 7.82% (price 99.873) up to 7.86% (price 99.800) with the average at 7.86% (price 99.800).

³³ Yields accepted ranged from 8.46% (price 99.582) up to 8.49% (price 99.458) with the average at 8.48% (price 99.499).

³⁴ Yields accepted ranged from 8.55% (price 99.910) up to 8.59% (price 99.838) with the average at 8.57% (price 99.874).

³⁵ Yields accepted ranged from 9.22% (price 99.691) up to 9.24% (price 99.626) with the average at 9.24% (price 99.626).

³⁶ Yields accepted ranged from 9.48% (price 100.101) up to 9.54% (price 99.799) with the average at 9.51% (price 99.950).

³⁷ Yields accepted ranged from 7.91% (price 99.937) up to 8.00% (price 99.774) with the average at 7.95% (price 99.864).

³⁸ Yields accepted ranged from 8.00% (price 100.000) up to 8.05% (price 99.869) with the average at 8.03% (price 99.921).

³⁹ Yields accepted ranged from 8.84% (price 100.228) up to 8.93% (price 99.640) with the average at 8.88% (price 99.966).

⁴⁰ The low, high, and average yield was 8.79% (price 100.844).

⁴¹ Yields accepted ranged from 7.74% (price 100.018) up to 7.78% (price 99.945) with the average at 7.76% (price 99.982).

⁴² Yields accepted ranged from 8.29% (price 99.767) up to 8.31% (price 99.684) with the average at 8.30% (price 99.725).

⁴³ Yields accepted ranged from 7.92% (price 99.918) up to 7.94% (price 99.882) with the average at 7.93% (price 99.900).

⁴⁴ Yields accepted ranged from 8.32% (price 99.766) up to 8.34% (price 99.699) with the average at 8.33% (price 99.733).

⁴⁵ Yields accepted ranged from 8.65% (price 99.871) up to 8.68% (price 99.716) with the average at 8.67% (price 99.768).

⁴⁶ Yields accepted ranged from 7.39% (price 99.973) up to 7.41% (price 99.936) with the average at 7.40% (price 99.954).

⁴⁷ Yields accepted ranged from 7.40% (price 99.934) up to 7.43% (price 99.855) with the average at 7.42% (price 99.881).

⁴⁸ Yields accepted ranged from 8.17% (price 99.696) up to 8.23% (price 99.293) with the average at 8.21% (price 99.427).

⁴⁹ Yields accepted ranged from 8.48% (price 102.858) up to 8.53% (price 102.309) with the average at 8.51% (price 102.528).

⁵⁰ Yields accepted ranged from 7.15% (price 99.954) up to 7.17% (price 99.918) with the average at 7.16% (price 99.936).

⁵¹ Yields accepted ranged from 7.64% (price 99.881) up to 7.66% (price 99.797) with the average at 7.65% (price 99.839).

⁵² Yields accepted ranged from 7.38% (price 99.991) up to 7.40% (price 99.954) with the average at 7.39% (price 99.973).

⁵³ Yields accepted ranged from 7.89% (price 99.949) up to 7.92% (price 99.848) with the average at 7.90% (price 99.916).

⁵⁴ Yields accepted ranged from 8.43% (price 99.714) up to 8.45% (price 99.610) with the average at 8.44% (price 99.662).

⁵⁵ Yields accepted ranged from 7.63% (price 99.991) up to 7.65% (price 99.955) with the average at 7.64% (price 99.973).

⁵⁶ Yields accepted ranged from 8.21% (price 99.777) up to 8.24% (price 99.699) with the average at 8.23% (price 99.725).

⁵⁷ Yields accepted ranged from 9.05% (price 99.675) up to 9.06% (price 99.610) with the average at 9.06% (price 99.610).

⁵⁸ Yields accepted ranged from 9.16% (price 99.643) up to 9.18% (price 99.440) with the average at 9.17% (price 99.542).

⁵⁹ Yields accepted ranged from 8.15% (price 99.955) up to 8.18% (price 99.900) with the average at 8.18% (price 99.900).

⁶⁰ Yields accepted ranged from 8.75% (price 99.926) up to 8.77% (price 99.843) with the average at 8.77% (price 99.843).

PUBLIC DEBT OPERATIONS

¹ Includes trust funds and accounts that comprise Government accounts under the unified budget concept.

Government-sponsored agencies, formerly included with Government accounts.

² Exclusive of banks and insurance companies.

Note.--For detail of offerings see table PDO-3.

³ Included with all other investors are certain Government deposit accounts and

U.S. SAVINGS BONDS AND NOTES

Series EE bonds, on sale since Jan. 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for series E and EE savings bonds and savings notes. Series A-D were sold from Mar. 1, 1935, through Apr. 30, 1941. Series E was on sale from May 1, 1941, through Dec. 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through Apr. 30, 1952. Series H was sold from June 1, 1952, through Dec. 31, 1979. Series HH bonds were sold for cash from Jan. 1, 1980, through Oct. 31, 1982. Series J and K were

sold from May 1, 1952, through Apr. 30, 1957.

U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds. The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the *Treasury Bulletins* of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal year 1974.

Table SBN-1.--Sales and Redemptions by Series, Cumulative through Dec. 31, 1988

[In millions of dollars. Source: Monthly Statement of the Public Debt of the United States; Market Analysis Section, United States Savings Bonds Division]

Series	Sales ¹	Accrued discount	Sales plus accrued discount	Redemptions ¹	Amount outstanding	
					Interest-bearing debt	Matured non-interest-bearing debt
Savings bonds:						
Series A-D ²	3,949	1,054	5,003	5,002	-	1
Series E, EE, H, and HH.....	263,543	110,006	373,549	264,304	107,624	1,620
Series F and G.....	28,396	1,125	29,521	29,518	-	3
Series J and K	3,556	198	3,754	3,753	-	1
Savings notes	862	475	1,337	1,030	308	-
Total	300,306	112,858	413,164	303,607	107,932	1,625

¹ Sales and redemption figures include exchange of minor amounts of (1) matured series E bonds for series G and K bonds from May 1951 through April 1957; (2) series F and J bonds for series H bonds beginning January 1960; and (3) U.S. savings notes for series H bonds beginning January 1972; however, they exclude exchanges of series E bonds for series H and HH bonds.

² Details by series on a cumulative basis and by period of series A-D combined will be found in the February 1952 and previous issues of the *Treasury Bulletin*.

Note.—Series E and EE include U.S. savings notes (Freedom Shares) on sale from May 1, 1967, through June 30, 1970, to E bond buyers.

OWNERSHIP OF FEDERAL SECURITIES

INTRODUCTION

Federal securities presented in these tables comprise public debt securities issued by the Treasury and debt issued by other Federal agencies under special financing authorities. See the Federal debt (FD) series of tables for a more complete description of the Federal debt.

Table OFS-1--Distribution of Federal Securities by Class of Investors and Type of Issues

Holdings of Treasury marketable and nonmarketable securities and of debt issued by other Federal agencies are presented for Government accounts, the Federal Reserve banks, and private investors. Government account holdings largely reflect investment by the social security and Federal retirement trust funds. The Federal Reserve banks acquire Treasury securities in the market as a means of executing monetary policy.

Table OFS-2...Estimated Ownership of Public Debt Securities by Private Investors

Privately held Treasury securities are those held by investors other than the Government accounts and Federal Reserve banks. Treasury obtains information on private holdings from a variety of sources, such as data gathered by the Federal financial institution regulatory agencies. State and local holdings and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts, as well as municipal and foreign official and private holdings of marketable Treasury securities. Data on foreign holdings of marketable Treasury securities are presented in the capital movements tables in the *Treasury Bulletin*. See the footnotes for descriptions of the investor categories.

¹ U.S. savings bonds, series A-F and J, are included at current redemption value.² Includes domestically chartered banks, U.S. branches and agencies of foreign banks, New York Investment companies majority owned by foreign banks, and Edge Act corporations owned by domestically chartered and foreign banks.³ Includes partnerships and personal trust accounts.⁴ Includes U.S. savings notes. Sales began May 1, 1967, and were discontinued June 30, 1970.⁵ Exclusive of banks and insurance companies.⁶ Includes State and local pension funds.⁷ Consists of the investment of foreign balances and international accounts in the United States. Estimates reflect 1978 benchmark from December 1978 to date.⁸ Includes savings and loan associations, credit unions, nonprofit institutions, mutual savings banks, corporate pension trust funds, dealers and brokers, certain Government deposit accounts, and Government-sponsored agencies.

MARKET YIELDS

INTRODUCTION

The tables and charts in this section present yields on Treasury marketable securities and compare long-term Treasury market yields with yields on long-term corporate and municipal securities.

Table MY-1.--Treasury Market Bid Yields at Constant Maturities: Bills, Notes, and Bonds

The Treasury yield curve, presented in the chart that accompanies table MY-1, is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. each business day. The Treasury obtains quotations from the Federal Reserve Bank of New York, which composites quotations provided by five primary dealers. This yield curve reflects yields based on semiannual interest payments and is read at constant maturity points to develop

a consistent data series. Yields on Treasury bills, which are discount securities, are the coupon equivalent yields of bank discount rates at which Treasury bills trade in the market. The Board of Governors of the Federal Reserve System also publishes the Treasury constant maturity data series in its weekly H.15 press release.

Table MY-2.--Average Yields of Long-Term Treasury, Corporate, and Municipal Bonds

The long-term Treasury rate is the 30-year constant maturity rate presented in table MY-1. The corporate and municipal bond series are developed by the Treasury, using reoffering yields on new long-term securities rated Aa by Moody's Investors Service. See the footnotes for further explanation.

FEDERAL AGENCIES' FINANCIAL REPORTS

INTRODUCTION

Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 3513a) requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government and provides that each executive agency must furnish the Secretary of the Treasury such reports and information relating to the agency's financial condition and operations as the Secretary may require. The provisions do not apply to the legislative and judicial branches of the Federal Government; however, these entities are encouraged to submit the prescribed reports so the Secretary of the Treasury can prepare comprehensive reports on all the financial activities of the U.S. Government.

The Treasury Financial Manual (I TFM 2-4100) sets the criteria for the submission of annual and quarterly financial reports in accordance with the Reporting Entities Listing (Bulletin No. 88-11). Reports are provided for six fund types: Revolving funds, trust revolving funds, 15 major trust funds, all other trust funds, all other activity combined, and consolidated reports of an organizational unit. The financial transactions supporting the required reports are to be accounted for on the accrual basis. The Report on Operations can be submitted on a cash basis under certain circumstances (see I TFM 2-4180.20). Reports are to be prepared from a budgeting and accounting system which contains an integrated data base that is part of the agency's integrated financial management system as required by the Office of Management and Budget (OMB) Circular No. A-127.

The required reports should include all assets, liabilities, and equities relating to all programs and activities under control of the reporting entity, except for the assets of disbursing officers, which are reported by the Treasury. Reports should include transfer appropriation accounts from other agencies, foreign currencies, operations conducted in the territories or overseas, and any monetary assets or property received, spent, or otherwise accounted for by the reporting entity. Amounts are reported to the dollar.

Requirements provide that Federal agencies submit to Treasury four financial reports supplemented by three supporting reports which are consolidated and published annually in the winter issue of the *Treasury Bulletin*. These reports are: Report on Financial Position (SF 220), Report on Operations (SF 221), Report on Cash Flow (SF 222), and Report on Reconciliation (SF 223). The three supporting reports are: Direct and Guaranteed Loans Reported by Agency and Program Due from the Public (SF 220-8), Report on Accounts and Loans Receivable Due from the Public (SF 220-9), and Additional Financial Information (SF 220-1). The report on Direct and Guaranteed Loans is submitted to Treasury quarterly, and annually for publication in the *Treasury Bulletin*. The Report on Accounts and Loans Receivable Due from the Public is submitted quarterly on a selected basis, and by all entities annually. Information captured in the reports is shown in the following tables:

Table FA-1.--Report on Financial Position

The Report on Financial Position is a compilation of all assets, liabilities, and equity of the U.S. Government. It is required from all reporting entities within agencies and a consolidated report is required from each agency. The SF 220 should be prepared on the accrual basis and submitted to Treasury annually. The report discloses the financial position of the Federal Government as of September 30, the close of the fiscal year.

Table FA-2.--Direct and Guaranteed Loans

This report reflects the direct loans and guaranteed loans to the public through the Federal Credit Program to support credit activities.

Actual control of credit program levels remains with authorizing legislation and appropriations acts. The report on Direct and Guaranteed Loans also provides the Federal Reserve Board information to monitor the flow of funds. An accompanying chart depicts direct loans and guaranteed loans as of September 30.

Table FA-3.--Report on Accounts and Loans Receivable Due from the Public

The Report on Accounts and Loans Receivable Due from the Public (SF 220-9) provides information on the status of public receivables and is required by the Office of Management and Budget. This report provides accounting and management information necessary to assist in institutionalizing sound credit management. This requirement is part of OMB Circular No. A-127. Only selected reporting entities are required to submit SF 220-9's quarterly due to materiality, but all are required to submit SF 220-9's annually. The SF 220-9 is comprised of two parts: Status of receivables, and administrative actions. Only part one, reflecting departmental or agency totals, is published annually in the *Treasury Bulletin*.

Table FA-4.--Report on Operations

The Report on Operations is a compilation of the financial results of all Federal programs and activities. Preparation of a Report on Operations is required for all entities and should include the financial results of activities, including revenues and other financing sources, and operating expenses. The SF 221 should be prepared using the accrual or cash basis and submitted to Treasury annually. Generally, it is prescribed that the reporting entity prepare its reports under the accrual basis unless the differences between the cash and accrual basis are insignificant or the capability to do so does not exist at this point.

Table FA-5.--Report on Cash Flow

This report is required for each reporting entity. The Report on Cash Flow (SF 222) reconciles the fund balance with Treasury and cash at the beginning of the fiscal year with the balances at the end of the fiscal year by showing all significant sources and uses of resources during the fiscal year.

Table FA-6.--Report on Reconciliation

The Report on Reconciliation (SF 223) reconciles operating expenses and cash outlays for the fiscal year. It is required for each reporting entity.

Accompanying Charts

International Statistics

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and selected liabilities to all

other foreigners, which are used in the U.S. balance of payments statistics.

Table IFS-3 shows U.S. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-4 presents a measure of the general foreign exchange value of the U.S. dollar.

1/ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

2/ Includes gold held by the Exchange Stabilization Fund.

3/ Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 U.S.C. 5117(b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

4/ Includes allocations of SDR's in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR's.

Allocations of SDR's on Jan. 1 of respective years are as follows: 1970, \$867 million; 1971, \$717 million; 1972, \$710 million; 1979, 874 million (in SDR terms); 1980, 874 million (in SDR terms); and 1981, 857 million (in SDR terms).

5/ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be agreed upon by the parties to the transactions.

6/ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota.

1/ Includes Bank for International Settlements.

2/ Derived by applying reported transactions to benchmark data.

3/ Beginning in March 1988, includes current value of zero-coupon, 20-year bond issue to Government of Mexico. Also see footnote 1, Table IFS-3.

4/ Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.

5/ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."

6/ Includes marketable U.S. Government bonds and notes held by foreign banks.

7/ Includes nonmarketable U.S. Government bonds and notes held by foreign banks.

8/ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.

Note.—Table is based on Treasury Department data and on data reported to the Treasury Department by banks, other depository institutions and brokers in the United States. Data correspond generally to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and non-negotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

CAPITAL MOVEMENTS

INTRODUCTION

Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by commercial banks, other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the *Treasury Bulletin*.

The reporting forms and instructions¹ used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. The most recent, general revision of the report forms became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31, 1978. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

Basic Definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements, which is included in the classification "Other Europe."

Reporting Coverage

Reports are required from banks, other depository institutions, bank holding companies, International Banking Facilities (IBF's), securities brokers and dealers, and nonbanking enterprises in the

United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks, other depository institutions, and some brokers and dealers file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies *vis-a-vis* foreigners. Effective January 31, 1984, the specified exemption level applicable to the monthly and quarterly banking reports was raised from \$10 million to \$15 million. There is no separate exemption level for the semiannual reports.

Banks, other depository institutions, securities brokers and dealers, and other enterprises report monthly their transactions in long-term securities with foreigners. The applicable exemption level is \$500,000 with respect to the grand total of purchases and to the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks, other depository institutions, brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated foreigners at quarterend exceed specified exemption levels. Effective March 31, 1982, this exemption level was set at \$10 million, up from \$2 million. Nonbanking enterprises also report for each monthend their U.S. dollar-denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, other depository institutions, brokers, and dealers in the United States. Beginning April 1978, the following major changes were made in the reporting coverage: Amounts due to banks' own foreign offices are reported separately; a previous distinction between short-term and long-term liabilities was eliminated; a separation was provided of the liabilities of the respondents themselves from their custody liabilities to foreigners; and foreign currency liabilities are only available quarterly. Also, beginning April 1978, the data on liabilities were made more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners. Effective as of January 31, 1985, savings and loan associations and other thrift institutions began to file the TIC banking forms. Previously they had reported on TIC forms for nonbanking enterprises.

Section II presents the claims on foreigners reported by banks, other depository institutions, and brokers and dealers in the United States. Beginning with data reported as of the end of April 1978, a distinction was made between banks' claims held for their own account and claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, the distinction in reporting of long-term and short-term components of banks' claims was discontinued. Maturity data began to be collected quarterly on a time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency claims are also collected on a quarterly basis only. Beginning March 1981, this claims coverage

¹ Copies of the reporting forms and instructions may be obtained from the Office of Data Management, Office of the Assistant Secretary for International Affairs, Department of the Treasury, Washington, D.C. 20220, or from district Federal Reserve banks.

CAPITAL MOVEMENTS

was extended to certain items in the hands of brokers and dealers in the United States. See notes to section I above concerning the reporting of thrift institutions.

Another important change in the claims reporting, beginning with new quarterly data as of June 30, 1978, was the adoption of a broadened concept of "foreign public borrower," which replaced the previous category of "foreign official institution" to produce more meaningful information on lending to the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departments; State, provincial, and local governments of foreign countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section III includes supplementary statistics on U.S. banks' liabilities to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the TIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. banks' dollar liabilities to, and banks' own dollar claims on, countries not regularly reported separately are available semiannually in the June and December issues of the *Treasury Bulletin*.

Section IV shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns, financial institutions other than banks, other depository institutions, brokers, and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data also exclude

claims held through banks in the United States. Beginning with data reported as of December 31, 1978, financial liabilities and claims of reporting enterprises are distinct from their commercial liabilities and claims; and items are collected on a time remaining to maturity basis instead of the original maturity basis used previously.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks, brokers, and other entities in the United States (except nonmarketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, table IFS-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts. Also, see notes for section I above concerning the reporting of thrift institutions.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

1/ Includes Bank for International Settlements.

2/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank.

3/ Data as of preceding quarter for non-quarter-end months.

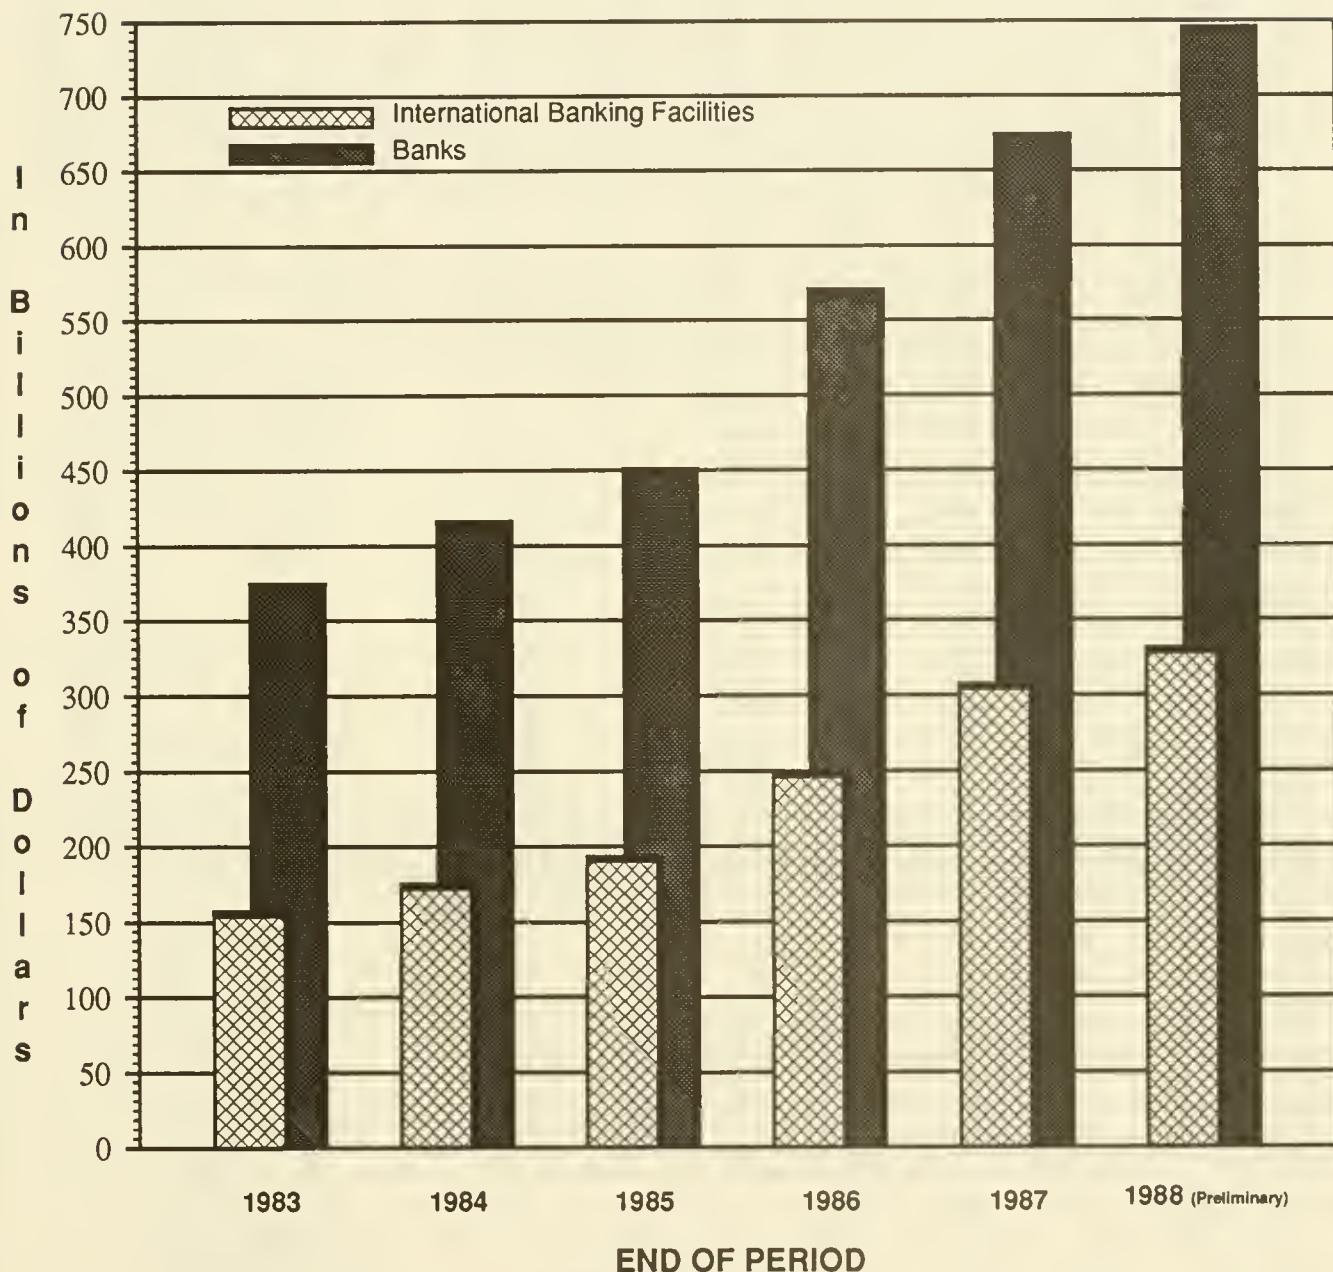

4/ Establishment of International Banking Facilities (IBF's) permitted beginning December 1981.

Note.--Total liabilities include liabilities previously classified as either "short term" or "long term" on the Treasury reports filed by banks. The maturity distinction was discontinued with new reports filed as of Apr. 30, 1978, and historical series adjusted accordingly. See introductory text to Capital Movements tables for discussion of changes in reporting.

CAPITAL MOVEMENTS

**LIABILITIES TO FOREIGNERS
CALENDAR YEARS 1983-88**

Reported by International Banking Facilities and by Banks in the
United States

FOREIGN CURRENCY POSITIONS

INTRODUCTION

Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U.S. banks and nonbanking firms. Reports cover five major foreign exchange market currencies and U.S. dollars held abroad. Reporting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of March 16, 1983, for the weekly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of March 1983.

Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions," and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majority-owned subsidiaries of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through inter-company accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or indirectly, own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

Reporting Threshold

The exemption level applicable to banks and banking institutions was \$10 million equivalent through January 1982, when it was raised to \$100 million. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 million equivalent on all nonbank forms from March 1975 through November 1976. It was raised to \$2 million equivalent on the monthly reports of positions held in the United States from November 1976 through September 1978. The exemption level was raised to \$3 million on foreign subsidiary positions on June 30, 1977, and for positions held in the United States on September 30, 1978. The exemption level for nonbanking firms was raised to \$100 million on positions in the United States in January 1982 and on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries, U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

Description of Statistics

Data collected on the Treasury foreign currency forms are published in the *Treasury Bulletin* in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

FOREIGN CURRENCY POSITIONS

Footnotes to Tables FCP-I through FCP-VII

SECTION I

¹ Worldwide net positions on the last business day of the calendar quarter of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. Excludes receivables and installment paper which have been sold or discounted before maturity, U.S. parent companies' investment in their majority-owned foreign subsidiaries, fixed assets (plant and equipment), and capitalized leases for plant and equipment.

² Foreign branches and majority-owned partnerships and subsidiaries only.

³ Weekly worldwide net positions of banks and banking institutions in the United States, and their foreign branches and majority-owned foreign subsidiaries. Excludes capital assets and liabilities.

⁴ Foreign branches and majority-owned subsidiaries only.

SECTIONS II THROUGH VII

¹ Positions of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. In section VII positions of foreign branches and majority-owned partnerships and subsidiaries only.

² Excludes receivables and installment paper sold or discounted before maturity, fixed assets (plant and equipment), and parents' investment in majority-owned foreign subsidiaries.

³ Capitalized plant and equipment leases are excluded.

⁴ Includes both spot and forward exchange rates.

⁵ Columns 1 and 3 less columns 2 and 4.

⁶ Representative rates on the report date. Canadian dollar and United Kingdom pound rates are expressed in U.S. dollars per unit of foreign currency, all others in foreign units per U.S. dollar. The source of the automated representative rates changed as of June 30, 1988.

⁷ Banks and banking institutions in the United States and their foreign branches and majority-owned subsidiaries. In section VII, foreign branches and majority-owned subsidiaries only.

⁸ Excludes capital assets.

⁹ Excludes capital liabilities.

¹⁰ Includes both spot and forward exchange contracts.

¹¹ Columns 3 and 9 less columns 6 and 12.

¹² See footnote 6.

EXCHANGE STABILIZATION FUND

INTRODUCTION

Background

The Exchange Stabilization Fund (ESF) was established under the Gold Reserve Act of January 30, 1934 (31 U.S.C. 822a). This act authorized the establishment in the Department of the Treasury of a stabilization fund to be operated under the exclusive control of the Secretary of the Treasury, with the approval of the President, for the purpose of stabilizing the exchange value of the dollar. Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

The resources of the fund consist of dollar balances, partly invested in U.S. Government securities, special drawing rights (SDRs), and balances of foreign currencies.

The principal sources of income or losses for the ESF have been profits or losses on holdings of and transactions in SDRs and foreign exchange, and the interest earned on assets.

Definitions

Special drawing rights.—International assets created by the International Monetary Fund (IMF). They serve to increase international liquidity and provide additional international reserves, and may be purchased and sold among eligible holders through the IMF.

SDR allocations.—The counterpart of SDRs issued by the IMF based on members' quota in the IMF. Although shown in ESF state-

ments as liabilities, they must be redeemed by the ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR Department of the IMF or cancellation of SDRs.

SDR certificates.—Issued to the Federal Reserve System against SDRs when SDRs are "monetized" and the proceeds of the monetization are deposited in an ESF account at the Federal Reserve Bank of New York.

Description of Tables

Table ESF-1 presents the assets, liabilities, and capital of the ESF. Data are presented in U.S. dollars or U.S. dollar equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the ESF by Congress of \$2 billion, less a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the IMF. Subsequent gains and losses since inception are reflected in the cumulative net income (loss) account.

Table ESF-2 presents the results of operations by quarter. Data are presented in U.S. dollars or U.S. dollar equivalents computed according to the accrual method of accounting. The "Profit (loss) on foreign exchange" includes realized profits (losses) on sales of foreign currencies as well as revaluation gains (losses) on currencies held. "Adjustment for change in valuation of SDR holdings and allocations" reflects the net gain (loss) on revaluation of SDR holdings and allocations for the quarter.

EXCHANGE STABILIZATION FUND

Table ESF-2.--Income and Expense

[In thousands of dollars]

	Current quarter July 1, 1988, through Sept. 30, 1988	Year to date Oct. 1, 1987, through Sept. 30, 1988
Income and expense:		
Profit (loss) on:		
Foreign exchange	(133,009)	212,070
Adjustment for change in valuation of SDR holdings and allocations 1	(42,392)	37,762
Interest (net charges) on:		
Special drawing rights	45,107	174,128
U.S. Government securities	45,403	236,561
Foreign exchange	76,138	219,270
Income from operations	(8,753)	879,791
Net income	(8,753)	879,791

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SDRs) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

² Excludes foreign exchange transactions for future and spot delivery.

³ A non-interest-bearing liability to the U.S. Treasury resulting from the transfer to the

Exchange Stabilization Fund of foreign currencies drawn from the IMF by the United States. Note.—Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the *Treasury Bulletin*. Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 *Treasury Bulletin*.

Special Reports

***STATEMENT OF LIABILITIES AND OTHER
FINANCIAL COMMITMENTS OF THE
UNITED STATES GOVERNMENT
AS OF SEPT. 30, 1988***

INTRODUCTION

The Statement of Liabilities and Other Financial Commitments of the United States Government is compiled in accordance with 31 U.S.C. 331 (b). The report discloses the liabilities, commitments, and contingent liabilities of the Federal Government as of September 30, 1988.

The categories listed represent existing liabilities to pay (1) money borrowed (public debt and agency debt including all public and agency issues outstanding), (2) goods and services actually received, and (3) adjudicated claims. The liability for these amounts is certain and the dollar values are relatively precise. Sources for the information supporting these totals follow:

The public debt--Final Monthly Treasury Statement of Receipts and Outlays of the United States Government (MTS), table 6, schedule D, Investments of Federal Government Accounts in Federal Securities. The Monthly Statement of the Public Debt of the United States, September 30, 1988, contains a comprehensive picture of the total public debt outstanding.

Agency securities outstanding--MTS, table 6, schedule B, Securities Issued by Federal Agencies Under Special Financing Authorities, contains detailed information on agency debt.

Deposit fund accounts--United States Government Annual Report Appendix at the fund account level and in the *Treasury Bulletin*, winter issue, table FA-1, Report on Financial Position, at the agency level.

Checks and other instruments outstanding; accrued interest on the public debt; and deferred interest (premium) on public debt subscriptions--Annual Report Appendix, Part One, Summary General Ledger Account Balances.

Accounts payable and accruals of Government agencies--Annual Report Appendix and table FA-1, Report on Financial Position, which disclose the liabilities for accounts payable and related transactions.

Section II of schedule 1 of this report contains totals for

commitments of the Government which represent the value of goods and services ordered and obligated but which have not yet been received and other legal commitments against appropriations, all pursuant to section 1311 of the Supplemental Appropriation Act of 1955 (31 U.S.C. 200). These commitments will become a liability when the goods and services ordered are delivered or when other performance stipulations have been met and the amounts to be paid can be determined. Schedule 1 shows the total amount for undelivered orders; the fund account detail supporting this total may be found in the Annual Report Appendix.

Long-term contracts represent commitments of a general nature that will not be due for a comparatively long time (usually more than one fiscal year). These commitments differ from undelivered orders insofar as (1) they are not legal commitments against obligations, (2) a longer period of time will elapse before they become obligations, and (3) they are subject to cancellation or modification and are not a reliable measure of future liabilities. Detail supporting the totals in schedule 1 are contained in schedule 2 of this report. This information is not available from other published Treasury sources. The financial data contained in this category and those in schedules 3 through 5 (contingencies) are obtained from agency financial statements submitted in response to the requirements in I TFM 2-4100, Federal Agencies' Financial Reports.

Contingencies represent conditional commitments which may become actual liabilities due to future events beyond the control of the Government. These commitments share a basic characteristic of uncertainty as to a possible loss, and they will be ultimately resolved when one or more future events occur or fail to occur. The amounts reported are agency projections and are stated in terms of maximum theoretical risk exposure (the upper limit of the Government's financial commitment) without regard to probability of occurrence and without deduction for existing and contingent assets which would be available to offset potential losses.

The data in this report are taken from unaudited reports provided by the agencies and have not been compared with any other reports submitted to the Treasury.

**Schedule 1.--Summary Statement of Liabilities and Other Financial Commitments
of the United States Government as of Sept. 30, 1988**

	[In millions]	
	Section	Total
I. Liabilities:		
The public debt		\$2,602,338
Agency securities outstanding		12,398
Total public debt and agency securities		2,614,736
Deposit fund accounts		18,402
Checks and other instruments outstanding		9,726
Accrued interest on the public debt		34,067
Deferred interest (premium) on public debt subscriptions		642
Accounts payable and accruals of Government agencies		218,432
Total liabilities		2,896,005
II. Commitments:		
Undelivered orders		588,413
Long-term contracts (schedule 2)		17,308
Section		Maximum theoretical measure of contingency
III. Contingencies:		
Government loan and credit guarantees, and insurance commitments (schedule 3)		\$4,180,839
Actuarial status of annuity programs (schedule 4)		(1)
Unadjudicated claims and other contingencies (schedule 5)		389,243

¹ Because the various annuity programs have been computed on different actuarial bases and at varying valuation dates, a total has not been computed. Details of individual programs are given in schedule 4.

Note.--Amounts presented in this report were compiled from reports submitted by the agencies in accordance with Volume I, Part 2, Chapter 4100 of the Treasury Financial Manual (Transmittal Letter No. 492). The information furnished by some reporting agencies was based on estimates.

¹ Public Law 95-595 requires annual reporting 6 months after the close of the plan year which provides pension benefits for officers and employees of the Federal Government and its agencies and instrumentalities. Figures in the report are based on the most recent Public Law 95-595 submission.

² The Uniformed Services Retirement System covers the military, the U.S. Coast Guard, the commissioned corps of the Public Health Service, and the National Oceanic and Atmospheric Administration. Except for the military, there are no employee contributions or trust funds from which benefits are paid. The Federal Government finances all benefit payments through annual appropriations authorized by Congress. On Oct. 1, 1984, the military retirement system changed its status from unfunded to an aggregate entry-age normal cost funding, and a trust fund was established. These plans submit Public Law 95-595 reports.

³ The Federal supplementary medical insurance trust fund has no valuation period as such. Under authority of section 1839 of the Social Security Act, the Secretary of Health and Human Services annually determines amounts to be paid by each of supplementary medical insurance enrollees and the Department of the Treasury that are, in total, adequate to fund both benefits incurred through the end of the annual promulgation period and related administrative expenses. Since amounts determined annually make adjustments for actuarial gains and losses, past submissions have used special definitions of assets and liabilities that relate solely to items incurred as of the valuation date.

⁴ The present values shown have been computed as of the beginning of the valuation period, Sept. 30, 1988, through Dec. 31, 2062. The liabilities consist of the sum of all estimated outgo during the valuation period, and the assets consist of the sum of all estimated income during the period and an estimate of the trust fund balance at the beginning of the period. The estimates have been prepared on the basis of the financing method regarded by both the Congress and the trustees of the trust funds as the appropriate one to use for social insurance programs, namely, that future young workers

will be covered by the program as they enter the labor force. If, instead, the estimates were based on the assumption that no workers would be covered in the future other than those who were age 15 and over as of Sept. 30, 1988 (that is, contrary to the basis which the Congress has adopted for financing these two programs), there would be a deficiency of \$5,739,600 million for the combined OASI and DI programs.

⁵ There are two retirement plans under the Federal Reserve System. One plan covers the employees of the Board of Governors. These are Federal employees in the excepted civil service. The second plan established by the Federal Reserve Board covers employees of the 12 Federal Reserve banks. These are not Government employees. Employees hired on or after Jan. 1, 1984, are covered under the same provisions as the bank plan. A consolidated Public Law 95-595 report is submitted.

⁶ Nonappropriated fund instrumentalities employ civilian workers and are authorized to operate programs, including retirement programs, to enhance their morale and welfare. These employees are not Federal employees under the civil service, but are governed by personnel policies established by the Departments of Defense and Transportation. The liability to the Federal Government for these retirement plans is extremely remote since employer contributions are to be paid from the operating revenues of the instrumentalities.

⁷ The Farm Credit Administration operates 12 farm credit districts. In 1959, Congress prohibited new farm credit employees from participating in the civil service and authorized establishment of separate retirement plans for new employees.

⁸ Preliminary figures as of Jan. 23, 1989.

⁹ The Federal Home Loan Bank Board (FHLBB) established the pension portability plan in November 1974 to supplement the retirement and disability benefits of employees with prior FHLBB service who are retiring from a Federal home loan bank or the Office of Finance. The Office of District Banks administers the plan while the Office of Finance is the disbursing agent.

Fiscal Year 1988

RECEIPTS AND OUTLAYS AIRPORT AND AIRWAY TRUST FUND

Fiscal Years 1984-88

Asbestos Trust Fund

The asbestos trust fund was established on the books of the Treasury in fiscal 1987 pursuant to Public Law 99-519, Oct. 22, 1986. It consists of amounts received in the Treasury on or after Jan. 1, 1987, as repayments of loans made under section 505 of the Asbestos School Hazard Abatement Act of 1984 (20 U.S.C. 4011 et seq.), and amounts received as deposits from local educational agencies under section 207(a) of the Toxic Substances Control Act.

Amounts available in the fund in excess of current outlay requirements are invested in interest-bearing obligations of the United States, and any interest earned and proceeds from sale or redemp-

tion are credited to the fund.

Amounts are made available to the Environmental Protection Agency for the purpose of carrying out the school loan and grant program under section 505 of the Asbestos School Hazards Abatement Act.

Annual reports to the Congress are required of the Secretary of the Treasury each year on the financial condition and results of the operations of the trust fund for the preceding fiscal year and on its expected condition and operations during the next 5 fiscal years.

Black Lung Disability Trust Fund

The black lung disability trust fund was established on the books of the Treasury in fiscal 1978 pursuant to the Black Lung Benefits Revenue Act of 1977. Public Law 97-119, Dec. 29, 1981, entitled "Trust Fund Code of 1981" (26 U.S.C. 9501), provides for the continuation of the fund as previously established under section 3 of the act of 1977. The Consolidated Omnibus Budget Reconciliation Act of 1985 (Public Law 99-272), enacted Apr. 7, 1986, provided for an increase in the coal tax effective Apr. 1, 1986, through Dec. 31, 1995, and a 5-year forgiveness of interest retroactive to Oct. 1, 1985. The Omnibus Budget Reconciliation Act of 1987 (Public Law 100-203), signed Dec. 22, 1987, extends the temporary increase in the coal tax through Dec. 31, 2013.

The act designates the following receipts to be appropriated and transferred from the general fund of the Treasury to the trust fund: excise taxes on mined coal tonnage; taxable expenditures of private black lung benefit trusts; reimbursements by responsible mine operators; and related fines, penalties, and interest charges. Estimates made by the Secretary of the Treasury determine monthly transfers of amounts for excise taxes to the trust fund, subject to adjustments in later transfers to actual tax receipts.

Amounts available in the fund in excess of current expenditure requirements are invested by the Secretary of the Treasury in interest-bearing public debt securities, and any interest earned is credited to the fund. Also credited to the fund, if necessary, are repayable advances from the general fund to meet outlay requirements in excess of available revenues.

To carry out the black lung disability program, amounts are made available to the Department of Labor. Other charges to the fund are to pay administrative expenses incurred by the Department of Health and Human Services and the Department of the Treasury, and also to repay advances from the general fund and interest on advances.

The act requires the Secretary of the Treasury to submit an annual report to Congress after consultation with the Secretary of Labor and the Secretary of Health and Human Services (26 U.S.C. 9602 (a)). The report must present the financial condition and results of operations of the fund during the past fiscal year and the expected condition and operations of the fund during the next 5 fiscal years.

Harbor Maintenance Trust Fund

The harbor maintenance trust fund was established on the books of the Treasury on Apr. 1, 1987, in accordance with the Water Resources Development Act of 1986 (Public Law 99-662, Nov. 17, 1986) (26 U.S.C. 9505).

The harbor maintenance trust fund consists of such amounts as may be appropriated as provided in section 9505(b), transferred by the Saint Lawrence Seaway Development Corporation (SLSDC) pursuant to section 13(a) of the Act of May 13, 1954, or credited as provided in section 9602(b). Amounts are appropriated equivalent to the taxes received in the Treasury under section 4461 (relating to harbor maintenance tax).

Amounts in the harbor maintenance trust fund shall be available as provided by appropriation acts for making expenditures to carry out section 210(a) of the Water Resources Development Act of 1986, for payments of rebates of tolls or charges pursuant to section 13(b) of the Act of May 13, 1954 (as in effect on Apr. 1, 1987), and for the payment of all expenses of administration incurred by the Depart-

ment of the Treasury in administering subchapter A of chapter 36 (relating to harbor maintenance tax), but not in excess of \$5,000,000 for any fiscal year and for periods during which no fee applies under paragraph (9) or (10) of section 13031(a) of the Consolidated Omnibus Budget Reconciliation Act of 1985.

Legislation is proposed to restore financing of the SLSDC's operation and maintenance to its status prior to passage of Public Law 99-662. Pursuant to the proposed legislation, the SLSDC would retain its tolls to finance operation and maintenance. Rebates would continue to be paid out of this trust fund.

Annual reports to Congress are required by 26 U.S.C. 9505 to be submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and its expected condition and operations during the next 5 fiscal years.

¹ Includes unrealized discounts on investments as represented in the Budget of the United States Government, fiscal year 1990.

² Legislation proposed by the Department of Transportation would restore financing of the

SLSDC's operation and maintenance to its previous status.

Hazardous Substance Superfund

The hazardous substance response trust fund was established on the books of the Treasury in fiscal 1981, in accordance with provisions of the Hazardous Substance Response Revenue Act of 1980 (42 U.S.C. 9631 (a)). Effective in fiscal 1987, this trust fund was reestablished as the hazardous substance superfund in accordance with provisions of the Superfund Amendments and Reauthorization Act of 1986 (Public Law 99-499, dated Oct. 17, 1986).

The Internal Revenue Service collects excise taxes on petroleum and certain chemical feed stocks as well as an environmental tax based on the corporate alternative minimum taxable income (AMTI). In addition, an appropriation from the general fund is authorized to the superfund. Cost recoveries and other miscellaneous receipts are deposited directly to the hazardous substance superfund.

Amounts available in the fund in excess of current expenditure requirements are invested by the Secretary of the Treasury in

interest-bearing public debt securities, and any interest earned is credited to the fund. Also credited to the fund, if necessary, are repayable advances from the general fund to meet outlay requirements in excess of available revenues.

To carry out the hazardous substance response program, amounts are made available to the Environmental Protection Agency. Other charges to the fund are to pay certain administrative expenses incurred and repay advances from the general fund and interest on advances.

An annual report to Congress by the Secretary of the Treasury is required by section 9633(b)(1). These reports must present the financial condition and the results of operations of the fund for the past fiscal year and its expected condition and operations during the next 5 years.

¹ Refunds of taxes and transfer to other funds have been deducted.

² Receipts of interest on investments netted by payment of interest on general fund advances.

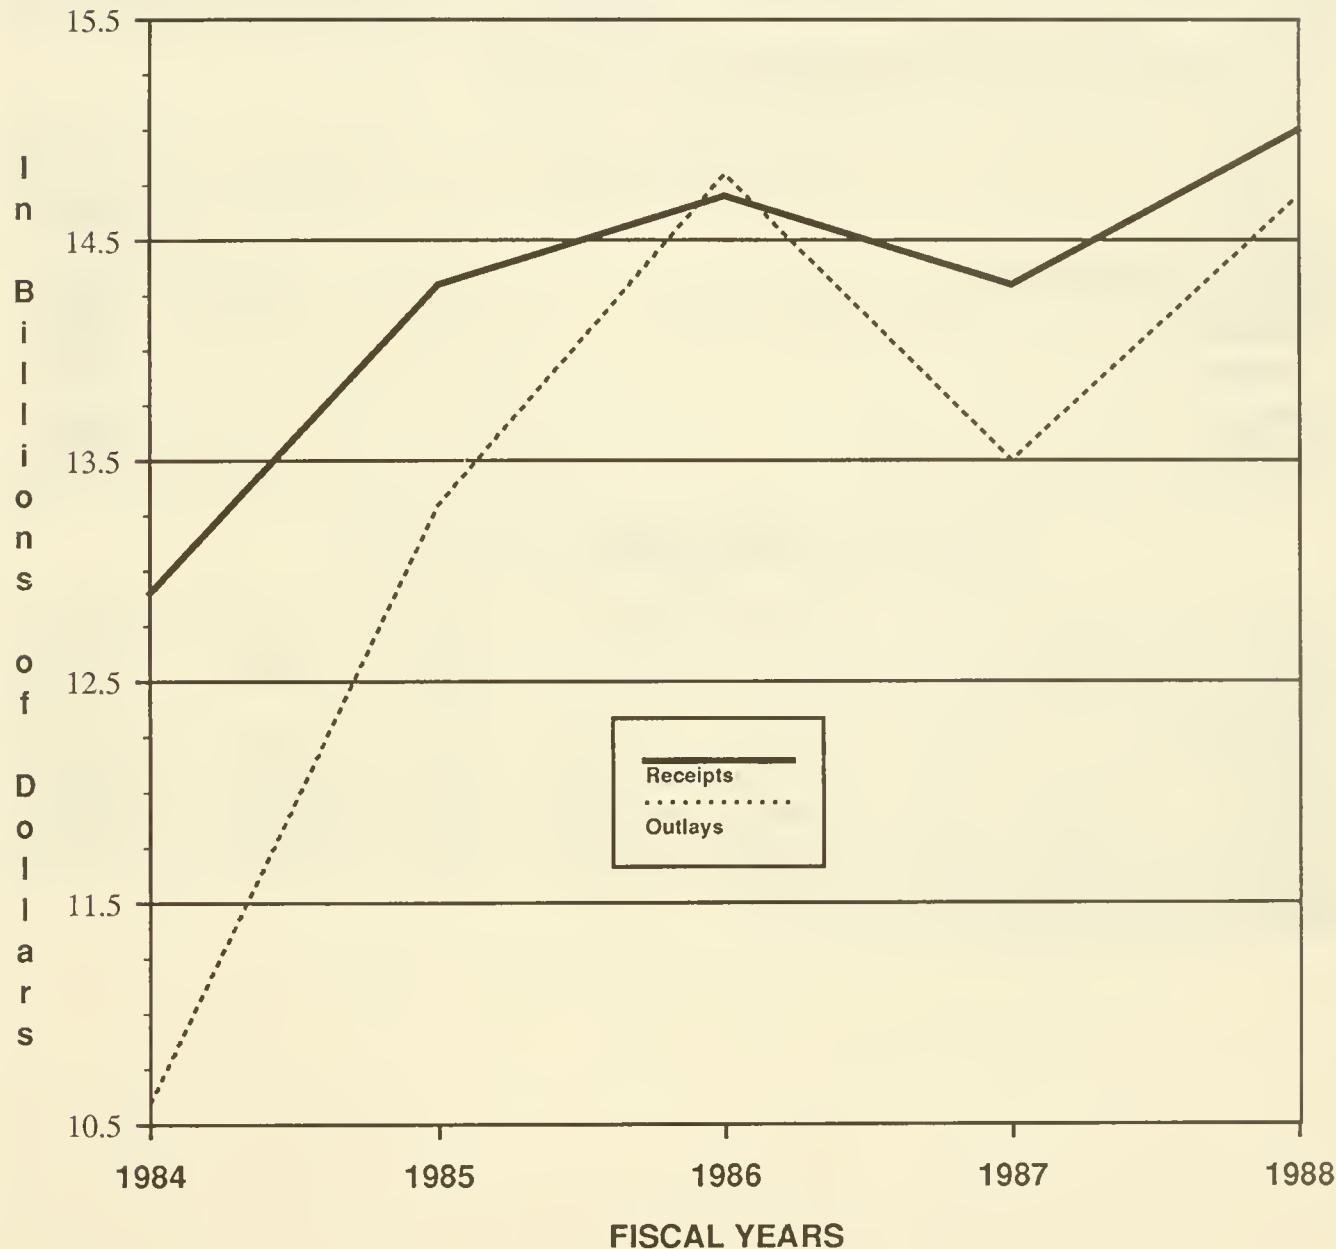

³ The Highway Revenue Act of 1982 requires that, before an apportionment can be made, projected unfunded highway authorizations at the close of the fiscal year must be less than the projected net revenues for the following 24-month period, and defines "unfunded

highway authorizations" as the excess, if any, of (a) the total potential unpaid commitments as a result of apportionment to the States of the amounts authorized to be appropriated from the highway trust fund, over (b) the amount available in the highway trust fund at such time to defray such commitments.

Note.—Data is in conformance with the President's FY 1990 budget.

RECEIPTS AND OUTLAYS HIGHWAY TRUST FUND

Fiscal Years 1984-88

Inland Waterways Trust Fund

The inland waterways trust fund was originally established on the books of the Treasury in fiscal 1981, in accordance with provisions of the Inland Waterways Revenue Act of 1978 (33 U.S.C. 1801(a)) and continued pursuant to the Water Resources Development Act of 1986 (26 U.S.C. 9506). Amounts determined by the Secretary of the Treasury to be equivalent to the amount of taxes received in the Treasury under section 4042 of the Internal Revenue Code of 1954 (relating to tax on fuel used in commercial transportation on inland waterways) shall be appropriated to the trust fund. These amounts shall be transferred at least quarterly from the general fund on the basis of estimates made by the Secretary, subject to adjustments in later transfers to the amounts of actual tax receipts.

It shall be the duty of the Secretary of the Treasury to invest in interest-bearing obligations of the United States that portion of the

trust fund in his judgment not required to meet current withdrawals. The interest on, and the proceeds from the sale or redemption of, any obligation held in the trust fund shall be credited to and form a part of the trust fund.

The act provides that amounts in the trust fund shall be available, by appropriations acts, for making construction and rehabilitation expenditures for navigation on the inland and intracoastal waterways of the United States described in 33 U.S.C. 1804. Expenditures must be otherwise authorized by law.

Annual reports to Congress are required by 26 U.S.C. 9602(a) of the Secretary of the Treasury. These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and its expected condition and operations during the next 5 fiscal years.

Leaking Underground Storage Tank Trust Fund

The leaking underground storage tank trust fund was established in fiscal 1987 by the Superfund Amendments and Reauthorization Act of 1986 (Public Law 99-499). Taxes are collected on gasoline, diesel fuel, special motor fuels, fuels used in aviation, and fuels used in commercial transportation on inland waterways by the Internal Revenue Service and appropriated from the general fund to the trust fund. All other receipts are deposited directly to the trust fund.

Amounts available in the fund in excess of current expenditure requirements are invested by the Secretary of the Treasury in interest-bearing public debt securities, and any interest earned is credited to the fund. Also credited to the fund, if necessary, are repayable advances from the general fund to meet outlay

requirements in excess of available revenues.

To carry out the leaking underground storage tank program, amounts are made available to the Environmental Protection Agency. Other charges to the fund are to pay certain administrative expenses incurred and repay advances from the general fund and interest on advances.

An annual report to Congress by the Secretary of the Treasury is required. These reports must present the financial condition and the results of operations of the fund for the past fiscal year and its expected condition and operations during the next 5 years.

Nuclear Waste Fund

The nuclear waste fund was established on the books of the Treasury in fiscal 1983, in accordance with provisions of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10222 (c)). Receipts represent fees collected from public utilities based on electricity generated by nuclear power reactors and spent nuclear fuel. Expenditures from the fund are for purposes of radioactive waste disposal activities.

Amounts available in the fund in excess of current needs may be invested by the Secretary of the Treasury in obligations of the United States (1) having maturities in tandem with the needs of the waste fund, and (2) bearing interest at rates determined appropriate, taking into consideration the current average market yield on outstanding

marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

An annual report to Congress by the Secretary of the Treasury, after consultation with the Secretary of Energy, is required by 42 U.S.C. 10222 (e)(1). This report must present the financial condition and the results of operations of the waste fund during the preceding fiscal year.

Reforestation Trust Fund

The reforestation trust fund was established on the books of the Treasury in fiscal year 1981 to continue through Sept. 30, 1985, in accordance with provisions of Title III—Reforestation, of the Recreational Boating Safety and Facilities Improvement Act of 1980 (16 U.S.C. 1606a (a)). The act provides that the Secretary of the Treasury shall transfer to the trust fund tariffs, limited to not more than \$30 million for any fiscal year, received in the Treasury from Oct. 1, 1979, through Sept. 30, 1985, on (1) rough and primary wood products, and wood waste; (2) lumber, flooring, and moldings; and (3) wood veneers, plywood, and other wood-veneer assemblies, and building boards. Public Law 99-190 extended the receipts for the reforestation trust fund.

Amounts available in the trust fund in excess of current withdrawals are invested in interest-bearing obligations of the United

States or in obligations guaranteed as to both principal and interest by the United States. The interest on, and the proceeds from the sale or redemption of, any obligations are credited to the trust fund.

The Secretary of Agriculture is authorized to obligate available sums in the trust fund (including any amounts not obligated in previous years) for (1) reforestation and timber stand improvement and (2) administrative costs of the Federal Government for these activities.

Annual reports are required by 16 U.S.C. 1606a (c)(1) to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Agriculture, on the financial condition and the results of the operations of the trust fund during the past fiscal year and on its expected condition and operations during the next fiscal year.

***U.S. CURRENCY AND COIN OUTSTANDING
AND IN CIRCULATION***

U.S. CURRENCY AND COIN OUTSTANDING AND IN CIRCULATION

INTRODUCTION

Purpose and Scope

The U.S. Currency and Coin Outstanding and in Circulation Statement is prepared to inform the public of the face value of currency and coin which are used as a medium of exchange and the total thereof, as of the end of a given accounting month.

The statement defines the total amount of currency and coin outstanding and the portion of which is deemed to be in circulation. Although it still includes some old and current rare issues of coin and currency which do not circulate or may do so to a limited extent, Treasury policy is to continue their inclusion in the statement since such issues were originally intended for general circulation. The statement also provides a brief description of the various issues of U.S. paper money and further presents a comparative amount of money circulated in relation to population.

History

Statements of currency and coin outstanding and in circulation have been published by the Department of the Treasury since 1888. These statements were originally prepared monthly by the Division of Loans and Currency, which was then under the Office of the Secretary of the Treasury but later became part of the Public Debt Service (currently known as the Bureau of the Public Debt) in 1929. The statement was published with the title "Circulation Statement of United States Money" from 1923 through December 31, 1965. Concurrently, from December 31, 1919, to September 30, 1951, the Office of the U.S. Treasurer published a statement entitled "Monthly Statement--Paper Currency of Each Denomination Outstanding." Two months after the Office of the U.S. Treasurer assumed publication of the "Circulation Statement of United States Money," a revision was made to the statement to include denomination detail of the currency in circulation. Publication of the "Monthly Statement--Paper Currency of Each Denomination Outstanding" was discontinued, and the revised version which combines information from both statements became known as the United States Currency and Coin Outstanding and in Circulation Statement. The statement in 1983 ceased to be published as a separate, monthly release and instead was incorporated into the quarterly *Treasury Bulletin* as a special report.

Definition of Terms

The classification "Amounts outstanding and in circulation" includes all issues by the Bureau of the Mint which are purposely intended as a medium of exchange. Therefore, coins sold by the Bureau of the Mint at premium prices are excluded. However, uncirculated coin sets, sold by the Mint at face value plus a handling charge, are included.

The term "Federal Reserve notes" refers to issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. These notes represent U.S. Government obligations. Currently, the item "Federal Reserve notes--amounts outstanding" consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

"U.S. notes" are also known as legal tender notes and were issued in five different issues; namely, (a) First Issue--1862 (\$5 to \$1,000 notes), (b) Second Issue--1862 (\$1 to \$2 notes), (c) Third Issue--1863 (\$5 to \$1,000 notes), (d) Fourth Issue--1863 (\$1 to \$10,000 notes), and (e) Fifth Issue--1901 (\$10 notes).

The column for "Currency no longer issued" consists of gold certificates (old and new series), silver certificates (old and new series), Federal Reserve notes (old and new series), national bank notes (old and new series), and Treasury notes (1890 series).

"Dollar coins" include standard silver coins and nonsilver coins.

"Fractional coins" include subsidiary coins in denominations of 50 cents, 25 cents, and 10 cents and minor coins (5 cents and 1 cent).

Reporting Sources

Data used in the preparation of the U.S. Currency and Coin Outstanding and in Circulation Statement is derived from monthly reports required from Treasury offices, various U.S. Mint offices, the Federal Reserve banks, and the Federal Reserve Board. Such reports convey information about the amount, class, and denomination of new issues of currency and/or coin, of destroyed and replaced currency, and of currency and coins withdrawn from circulation. Estimates of population from the Bureau of the Census are used in the calculation of money circulated per capita.

Information about the Superintendent of Documents Subscription Service

Current Subscribers

To know when to expect your renewal notice and keep a good thing coming . . . to keep subscription prices down, the Government Printing Office mails each subscriber only one renewal notice. You can learn when you will get your renewal notice by checking the number that follows ISSDUE on the top line of your label as shown in this example:

When this digit is 0, a renewal notice
..... / will be sent.
.....
• TRBU SMITH212J ISSDUE000 R 1
• JOHN SMITH
• 212 MAIN ST
• FORESTVILLE MD 20747
.....

When that number reads ISSDUE000, you have received your last issue unless you renew. You should receive your renewal notice around the same time that you receive the issue with ISSDUE000 on the top line.

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402-9372 with the proper remittance, and your service will be reinstated.

To change your address . . . please SEND YOUR MAILING LABEL, along with your new address, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402-9373.

To inquire about your subscription service . . . please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402-9375.

New Subscribers

To order a new subscription . . . please use the order form provided below.
