Treasury Financing Operations—Continued

Treasury Bills (Other than Short-dated bills) - General

Treasury bills are sold on a bid basis. The par amount is payable without interest at maturity. They are issued only in bearer form in the case of all issues except 52-week bills in denominations of \$10,000, \$15,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value). 52-week issues of bills are issued in book-entry form on the records of either the Federal Reserve Banks and Branches or of the Treasury. For a limited period of time, definitive bills of the 52-week issues will be available only in the \$100,000 denomination to investors who are able to show that they are required by law to hold securities in physical form.

Tenders are received at Federal Reserve banks and branches and from individuals at the Bureau of the Public Debt, Washington. Each tender must be for a minimum of \$10,000. Tenders over \$10,000 must be in multiples of \$5,000. Payment for the full par amount of 52-week bills applied for must accompany all tenders submitted for bills to be maintained on the book-entry records of the Department of the Treasury. A cash adjustment will be made for the difference between the par payment submitted and the actual issue price as determined in the auction. No deposit need accompany tenders from incorporated banks and trust companies and from responsible and recognized dealers in investment securities, for bills to be maintained on the book-entry records of Federal Reserve Banks and Branches, or for definitive bills, where authorized.

A deposit of 2 percent of the par amount of the bills applied for must accompany tenders for such bills from others, unless an express guaranty of payment by an incorporated bank or trust company accompanies the tenders.

Noncompetitive tenders (without stated price), usually for \$500,000 or less from any one bidder, for each issue of 13-week, 26-week, and 52-week bills, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, and 52-week bills may not be made by credit in Treasury tax and loan accounts.

Source: Monthly Treasury Statement of Receipts and Outlays of the

United States Government. Budget estimates are based on the

1978 Budget Revisions of the U.S. Government, released February 22, 1977.

Note: Outlays consist of disbursements less proprietary receipts from

the public and certain intrabudgetary transactions. Agency shifts are

shown in this table beginning with the period of such shifts; figures

prior to the shifts have been adjusted.

1/ Cumulative year to date figures may not add due to budget realignments.

2/ Prior to January 1975, Rents and Royalties on the Outer Continental

Shelf lands were shown as proprietary receipts from the public for

the Interior Department. To conform with the FY 1976 Budget Document's presentation, these amounts were reclassified and are now being shown as undistributed offsetting receipts.

3/ Reported on an accrual basis.

4/ Pursuant to Public Law 93-438, the activity for the Atomic Energy Commission other than nuclear regulatory and reactor safety research was transferred to the Energy Research and Development Administration.

5/ Includes the U.S. Postal Service.

Note: The memorandum section of various tables in the Federal Budgets presents the trust fund receipt and outlay data on the same concept as columns (3) and (9) above. Trust interfund transactions are payments from one fund to another trust fund and are excluded in calculating trust fund receipts and outlays. The intragovernmental transactions are payments from Federal funds to trust funds, and vice versa, but

exclude \$94 million in trust fund payments to Federal funds.

Note: Figures on accrued expenditures are developed from reports submitted to the Department of the Treasury by Federal agencies. Accrued revenues resulting from the Government's sovereign authority, e.g., income and various employment taxes, and customs collections are not included in this report. Cash outlays and accrued expenditures are offset by revenues of a proprietary nature, e.g., market-oriented revenues or revenues derived from activities operated as business-type enterprises. Figures reported by agencies on receivables and payables may differ to some extent with reports on budget status (S.F. 133 to OMB) and budget results (TFS-2108 to Treasury) due to conceptual differences, e.g., deferred charges and advances to consolidated working funds are reported as receivables for this table and as liquidated obligations for budget reports. For certain agencies submitting flash reports on cash transactions, the net cash outlays shown above may not be totally consistent with comparable data published in the Monthly Treasury Statement.

1/ Collections in the various States do not necessarily indicate the Federal tax burden of the respective States, since the taxes collected in one State are, in many instances, borne by residents of other States. For example, the withholding taxes reported by employers situated in metropolitan areas near State boundaries include amounts withheld from salaries of employees who reside in neighboring States.

2/ Includes old-age, survivors, disability, and hospital insurance taxes on self-employment income.

3/ Includes tax on unrelated business income of exempt organizations.

4/ Consists of estate, gift, and excise taxes; excise taxes on imported items deposited by collectors of customs; and amounts collected on Puerto Rican products coming into the United States.

5/ Includes District of Columbia collections.

6/ Consists of collections from U.S. taxpayers in Puerto Rico, Canal Zone, etc., and in foreign countries.

7/ Tax payments made to banks under the Federal tax deposit system are included in the internal revenue collections for the period in which the Federal tax deposit is purchased. However, such payments are not classified by internal revenue districts (nor by tax subclasses to which excise tax payments relate) until the Federal tax deposit payment is applied to the taxpayer's liability from tax returns filed.

8/ Represents credits allowable on income tax returns for certain gasoline and lubricating oil tax payments and for excess Social Security payments under the Federal Insurance Contributions Act (FICA).

9/ Withheld taxes covered into the Treasury of Guam (48 U.S.C. 1421h).

10/ Net transactions in the clearing account on the central books of the Treasury for income taxes withheld from the salaries of Federal employees.

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set

of categories which are based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies and firms often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In Table FO-1, obligations that are incurred within the Government are distinguished from those incurred outside the Government. Tables FO-2, 3, and 4 show only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury Bulletin and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 Bulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

The September 1976 through January 1977 obligations data are not included in this issue due to certain unavoidable delays in processing.
This data will be published in subsequent Bulletins.

1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget

presentation and therefore may differ somewhat from the Budget document.)

ACCOUNT OF THE U.S. TREASURY

Source and Availability of the Balance in the Account of the U.S. Treasury

The working cash of the Treasury is held mainly in Treasury's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in the same bank. On occasions, to the extent authorized by the

Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1973, pages 282-285.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960).

The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual rate is computed by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal amount.

Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1/ As of July 1974, includes Federal Financing Bank.

2/ Excludes Federal Financing Bank.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

5/ As of July 31, 1974, Monthly Statement of the Public Debt of the U.S., the column heading was changed to "Government account series" which includes Treasury deposit funds in addition to those accounts previously shown as special issues.

Source: Monthly Statement of the Public Debt of the U.S.; Office of Market Analysis, United States Savings Bonds Division.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957; (2) Series F and J bonds for Series H bonds beginning January 1960; and (3) U.S. savings notes for Series H bonds beginning January 1972; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table SB-3.

2/ Details by series on a cumulative basis and by periods of Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.

3/ Because there is a normal lag in classifying redemptions, the distribution of redemption between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the

method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemption. All periods shown have been revised on this basis.

- 4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
- 5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.
- 6/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.
- 7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.
- 8/ Includes exchanges of Series 1960 F and G bonds for 3-7/8% marketable bonds for 1968.
- 9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.
- 10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

TREASURY SURVEY OF OWNERSHIP

JANUARY 31, 1977

The monthly Treasury Survey of Ownership covers securities issued by the United States Government, Federal agencies, Federally-sponsored agencies, and the District of Columbia. The banks and insurance companies included in the Survey currently account for about 80 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 40 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for corporations and savings and loan associa-

tions in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

1/ Treasury bond yields are based on a composite of closing bid quotations in the over-the-counter market. Series includes bonds on which the interest income is subject to normal tax and surtax which are neither due nor callable before 10 years. For bonds currently in series, see Table MQ-3.

2/ Treasury series based on reoffering yields of new corporate bonds with 5 years call protection and rated Aa by Moody's Investors Service. Prior to June 1973, this series reflected bonds without call protec-

tion. The value of 5 years call protection in that period ranged from 10 to 25 basis points.

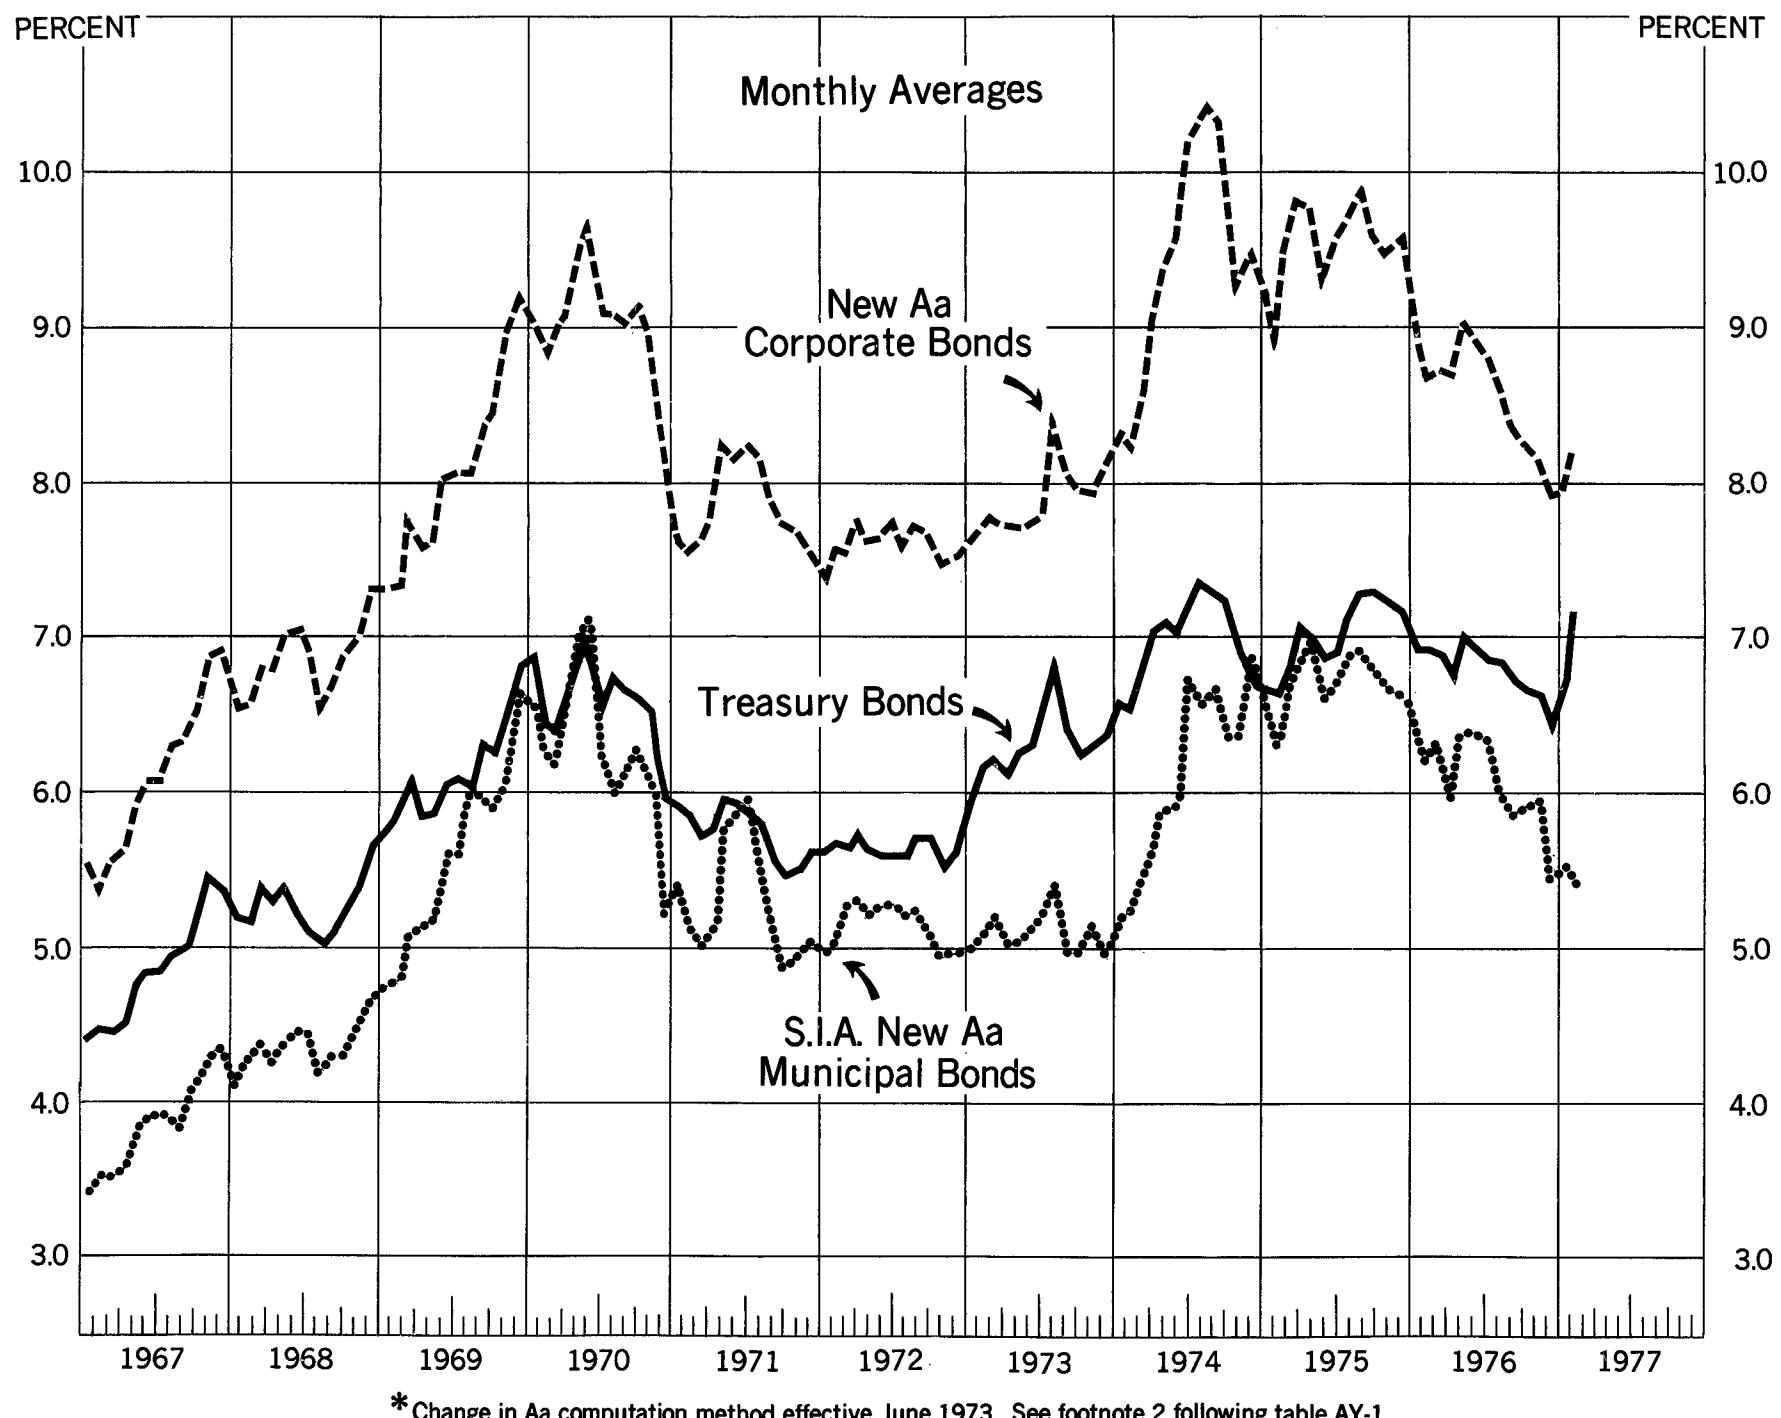

3/ Index of new issue reoffering yields on Aa 20 year general obligations compiled by Securities Industry Association. Weekly series are not available prior to January 1970.

4/ One or more new long-term bonds added to the average.

5/ An existing bond dropped from the average.

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on United States reserve assets and liabilities and other statistics related to the United States balance of payments and international financial position. A number of changes were introduced in the May 1967 and July 1972 issues of the Bulletin to increase the usefulness of this section.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and liquid liabilities to

all other foreigners, which are used in the United States balance-of-payments statistics.

Table IFS-3 presents an area breakdown of United States liabilities to official institutions of foreign countries.

Table IFS-4 shows United States Treasury nonmarketable bonds and notes issued to official institutions of foreign countries.

Table IFS-5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table IFS-6 presents a measure of weighted-average changes in exchange rates between the United States dollar and the currencies of certain other countries.

1/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, and gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases. For corresponding liabilities see Table IFS-2.

2/ Includes gold held by the Exchange Stabilization Fund (ESF). See "Account of the U.S. Treasury," Table UST-3.

3/ Includes initial allocation on January 1, 1970 of \$867 million, second allocation on January 1, 1971 of \$717 million and third allocation on January 1, 1972 of \$710 million of special drawing rights (SDR) in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR.

4/ Includes holdings of Treasury and Federal Reserve System.

5/ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the United States quota. See Table IFS-5.

6/ Reserve position includes, and gold stock excludes, \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

7/ Includes gain of \$67 million resulting from revaluation of the German mark in October 1969, of which \$13 million represents gain on German mark holdings at the time of revaluation. See also footnotes 3 and 4, Table IFS-4.

8/ Includes \$28 million increase in dollar value of foreign currencies revalued to reflect market exchange rates as of December 31, 1971. See also footnotes 3 and 5, Table IFS-4.

9/ Total reserve assets include increase of \$1,016 million resulting from change in par value of the U.S. dollar in May 1972, consisting of \$828 million total gold stock, \$822 million Treasury gold stock, \$155 million special drawing rights and \$33 million reserve position in the International Monetary Fund.

10/ Total reserve assets include increase of \$1,436 million resulting from change in par value of the dollar on October 18, 1973, consisting of \$1,165 million total gold stock, \$1,157 million Treasury gold stock, \$217 million special drawing rights, and \$54 million reserve position in the International Monetary Fund.

11/ Beginning July 1974, the IMF adopted a technique for valuing the SDR based on a weighted-average of exchange rates for the currencies of 16 member countries. The United States SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974. At valuation used prior to July 1974 (SDR 1=\$1,20635), the following end-of-month values amounted to (in millions of dollars):

Note: Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States. Data correspond generally to statistics following in this section and in the "Capital Movements" section, except for the exclusion of nonmarketable, nonconvertible U.S. Treasury notes issued to foreign official nonreserve agencies and the inclusion of investments by foreign official reserve agencies in debt securities of U.S. Federally-sponsored agencies and U.S. corporations. Table excludes International Monetary Fund "holdings of dollars," and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

^{1/} Includes liability on gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for gold subscriptions to the Fund under quota increases, and U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets.

^{2/} Includes Bank for International Settlements and European Fund.

^{3/} Derived by applying reported transactions to benchmark data; breakdown of transactions by type of holder estimated 1960-1963.

^{4/} Excludes notes issued to foreign official nonreserve agencies.

^{5/} Includes long-term liabilities reported by banks in the United States and debt securities of U.S. Federally-sponsored agencies and U.S. corporations.

^{6/} Includes short-term liabilities payable in dollars to foreign banks, and short-term liabilities payable in foreign currencies to foreign banks and to "other foreigners."

^{7/} Includes marketable U.S. Government bonds and notes held by foreign banks.

^{8/} Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank and the Asian Development Bank.

^{9/} Includes total foreign holdings of U.S. Government bonds and notes, for which breakdown by type of holder is not available.

^{10/} Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

^{11/} Includes \$101 million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in October 1969, as follows: liquid \$17 million; other \$84 million.

^{12/} Data on the second line differ from those on the first line because certain accounts previously classified as "official institutions" are included with "banks"; a number of reporting banks are included in the series for the first time; and foreign currency liabilities to official institutions of foreign countries are increased in value by \$110 million to reflect market exchange rates as of December 31, 1971, as follows: U.S. Treasury certificates, \$7 million; nonmarketable U.S. Treasury bonds and notes, \$103 million.

^{13/} Includes \$162 million increase in dollar value of foreign currency liabilities to official institutions of foreign countries revalued to reflect market exchange rates, as follows: short-term liabilities, \$15 million; and nonmarketable U.S. Treasury notes, \$147 million.

Note: Data represent short-term and long-term liabilities to the official institutions of foreign countries, as reported by banks in the United States; foreign official holdings of marketable and nonmarketable U.S. Government securities with an original maturity of more than one year except for nonmarketable notes issued to foreign official nonreserve agencies; and investments by foreign official reserve agencies in debt securities of U.S. Federally-sponsored agencies and U.S. corporations.

1/ Includes Bank for International Settlements and European Fund.
2/ Includes countries in Oceania, Eastern Europe and Western European dependencies in Latin America.
3/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in

coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

4/ Includes \$101 million increase in dollar value of foreign currency liabilities due to revaluation of the German mark in October 1969.

5/ Data on the second line differ from those on the first line because certain accounts previously classified as "official institutions" are included with "banks"; a number of reporting banks are included in the series for the first time; and U.S. Treasury liabilities payable in foreign currencies to official institutions of foreign countries, are increased in value by \$110 million to reflect market exchange rates as of December 31, 1971.

6/ Includes \$162 million increase in dollar value of foreign currency liabilities revalued to reflect market exchange rates.

Note: The initial U.S. quota in the International Monetary Fund was \$2,750 million. The U.S. quota was increased to \$4,125 million in 1959, \$5,160 million in February 1966, and \$6,700 million in December 1970, and revalued to \$7,274 million in May 1972 and \$8,083 million in October 1973 as a result of changes in the par value of the dollar. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 percent in gold and 75 percent in dollars.

1/ Represents net Fund sales of gold to acquire U.S. dollars for use in Fund operations. Does not include transactions in gold relating to gold deposits or gold investment (see Table IFS-2).

2/ Represents net loans made to the IMF under the General Arrangements to Borrow.

3/ Positive figures represent purchases from the Fund of currencies of other members for equivalent amounts of dollars; negative figures represent repurchases of dollars, including dollars derived from charges on purchases and from other net dollar income of the Fund. The United States has a commitment to repurchase within 3-5 years, but only to the extent that the Fund's holdings of dollars exceed 75 percent of the U.S. quota. Purchases of dollars by other countries reduce the U.S. commitment to repurchase by an equivalent amount.

4/ Beginning January 1970, includes dollars obtained by countries other than the United States from sales of gold to the Fund.

5/ Represents the United States gold tranche position in the Fund (the United States quota, plus net U.S. loans to the IMF, minus Fund's holdings of dollars), which is the amount that the United States could purchase in foreign currencies automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the United States quota.

6/ Includes \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

7/ Includes \$30 million of special drawing rights.

8/ Represents amount payable in dollars to the Fund to maintain the value of Fund holdings of U.S. dollars.

9/ Excludes currency valuation adjustments for each month as follows (in millions of dollars):

1/ This table presents calculations of weighted average percentage changes in the rates of exchange between the dollar and certain foreign currencies, in order to provide a measure of changes in the dollar's general foreign exchange value broader than a measure provided by any single exchange rate change. Calculations are provided for two sets of countries that account for a major share of U.S. foreign trade. U.S. bilateral trade patterns in 1972 are used as a convenient, readily available proxy for the assignment of relative weights to individual exchange rate changes, though such weights do not provide a full measure of individual currencies' relative importance in U.S. international transactions because they take no account of factors other than trade. The calculations do not purport to represent a guide to measuring the impact of exchange rate changes on U.S. international transactions.

Exchange rate data used in constructing the indices reported here differ somewhat from those used in earlier calculations to more accurately reflect end-of-period currency values.

The equations used are as follows:

Equation one is used to calculate a trade-weighted average of changes in the dollar cost of foreign currencies:

$$(EQ1) \quad E_m = \sum (\Delta \$/fc_i * M_i/\Sigma M)$$

Where: E_m is the weighted average of percentage changes in the dollar cost of individual foreign currencies;

$\Delta \$/fc_i$ is the percent change in the dollar cost of foreign currency i ; and

$M_i/\Sigma M$ is U.S. imports from country i , as a proportion of total U.S. imports from all countries in the set.

Equation two is used to calculate a trade-weighted average of changes in the foreign exchange cost of dollars:

$$(EQ2) \quad E_x = \sum (\Delta fc_i/\$ * X_i/\Sigma X)$$

Where: E_x is the weighted average of percentage changes in the foreign currency cost of dollars;

$\Delta fc_i/\$$ is the percent change in the foreign currency i cost of dollars; and

$X_i/\Sigma X$ is U.S. exports to country i , as a proportion of total U.S. exports to all countries in the set.

Equation three combines the above export-weighted and import-weighted averages to provide an overall measure of exchange rate change:

$$(EQ3) \quad E = [(E_m * m/m+x)*(-1)] + [E_x * x/m+x]$$

Where: $m/m+x$ is U.S. imports as a proportion of its total trade with all countries in the set; and

$x/m+x$ is U.S. exports as a proportion of its total trade with all countries in the set.

2/ Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom.

3/ The currencies of 46 IMF member countries which account for approximately 90% of U.S. total trade.

CAPITAL MOVEMENTS

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 3, 1949, and Treasury regulations promulgated thereunder. The regulations were amended in January 1977 to acknowledge the effects of the International Investment Survey Act of 1976 which provides additional authority for the collection of data on international capital flows and international investment. Statistics on the principal types of data and the principal countries are published monthly in the "Treasury Bulletin." Reports are filed with the Federal Reserve banks by banks, securities brokers and dealers, and nonbanking concerns in the United States. These statistics are then consolidated and are published by the Treasury as promptly as possible.

The report forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision of the report forms became effective with reports as of May 31, 1963. The report forms (formerly Treasury Foreign Exchange Forms) were redesignated in January 1977 as Treasury International Capital Forms. 1/

The present form of the published presentation of the "Capital Movements" statistics was introduced in the May 1969 issue of the "Bulletin." The principal changes were the rearrangement of the tables to bring together in separate sections all the data relevant to the same statistical series; the expansion of the time series on aggregate liabilities and claims reported by banks to show more detailed breakdowns by type of holder and type of liability and claim; and the presentation of statistics not previously published on the short-term liquid claims of large nonbanking concerns.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad, and the foreign branches, subsidiaries and offices of United States banks and business concerns; the central governments, central banks and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported generally in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Reporting coverage

Reports are required from banks, securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign firms. Institutions which have total reportable liabilities, claims or securities transactions below a specified exemption level are exempt from reporting.

Banks file reports monthly covering their short-term and long-term liabilities to and claims on foreigners; an exemption of \$500,000, based on the average for the report dates during a six-month period, including the current report date, is applicable to reports in each of these categories. Twice a year they also report their short-term dollar liabilities to foreigners in countries not shown separately on the monthly report of liabilities. Banks, securities brokers and dealers, and in some instances, nonbanking concerns, report monthly their transactions in securities with foreigners; the applicable exemption level is \$500,000 on the grand total of purchases and on the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking firms if their liabilities or claims, on the six-months average basis, are \$500,000 or more. Such firms also report the liquid portion of their claims for each month-end when they have reportable claims of \$1 million or more. The foreign credit and debit balances of securities brokers and dealers were reported quarterly through March 1976; the exemption level applicable to these reports was \$100,000.

Description of statistics

Data collected on the Treasury International Capital Forms are published in the "Treasury Bulletin" in six sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and the detailed breakdowns of the latest available data.

Section I covers the short-term and long-term liabilities to foreigners reported by banks in the United States. The data exclude the holdings of dollars of the International Monetary Fund derived from payments of the United States subscription and from the exchange transactions and other operations of the Fund. (Liabilities representing the "gold investment" of the Fund, however, are included.) The data also exclude U.S. Treasury letters of credit, and nonnegotiable, noninterest-bearing special notes of the United States held by international and regional organizations.

Section II presents the short-term and long-term claims on foreigners reported by banks in the United States, including claims held for their own account and for the account of their domestic customers. The data exclude convertible foreign currencies held by U.S. monetary authorities.

Sections III and IV show respectively the liabilities

CAPITAL MOVEMENTS

to, and claims on, foreigners reported by exporters, importers, industrial and commercial firms, financial institutions other than banks and brokers, and other nonbanking concerns in the United States. The data exclude the intercompany accounts of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business firms to the Department of Commerce on its direct investment forms.) The data also exclude claims held through United States banks. Separate figures are shown in Section IV for the short-term liquid claims of large nonbanking concerns in the United States.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series, and non-marketable U.S. Treasury bonds and notes, foreign currency series, which are shown in "International Financial Statistics" section, Table IFS-4). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts. The data exclude securities issued abroad by foreign subsidiaries of U.S. corporations, some of which are treated in the balance of payments as issues of U.S. corporations.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with United States residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries. Beginning with data for 1969, transactions between foreigners in new issues not offered for sale to United States residents but managed by underwriters in the United States are excluded from the gross figures.

Section VI comprises two tables on the money credit and debit balances, as appearing on the books of reporting brokers and dealers in the United States, in accounts of foreigners with them, and in their accounts carried by foreigners.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the United States Government. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

^{1/} Copies of the reporting forms and instructions may be obtained from the Office of Statistical Reports, Office of the Assistant Secretary for International Affairs, Department of the Treasury, Washington, D. C. 20220 or from Federal Reserve Banks.

- 1/ Includes Bank for International Settlements and European Fund.
 2/ Short-term U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets. Upon termination of investment, the same quantity of gold was reacquired by the International Monetary Fund.
 3/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank. Includes difference between cost value and face value of securities in IMF gold investment account (\$14 million at end 1971).
 4/ In addition, IMF gold investment included investments in U.S. Government bonds and notes which amounted to \$109 million at end 1960, \$187 million at end 1961, and \$61 million at end 1963.
 5/ Data on the two lines shown for this date differ because of changes

in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

6/ Data on the second line differ from those on the first line because certain accounts previously classified as "official institutions" are included with "banks" and a number of reporting banks are included in the series for the first time.

7/ Second line includes \$7 million increase in dollar value of foreign currency obligations revalued to reflect market exchange rates as of Dec. 31, 1971.

8/ Includes \$15 million increase in dollar value of foreign currency liabilities revalued to reflect market exchange rates.

1/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

p Data on the second line differ from those on the first line because those claims of U.S. banks on their foreign branches and those claims

of the U.S. agencies and branches of foreign banks on their head offices and foreign branches which were previously reported as loans are included in "other short-term claims"; and a number of reporting banks are included in the series for the first time.

FOREIGN CURRENCY POSITIONS

Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of United States banks and nonbanking firms. Reports cover nine major foreign exchange market currencies and United States dollars held abroad. Reporting has been required pursuant to Title II of Public Law 93-110, an Amendment to the Par Value Modification Act, of September 23, 1973, and implementing Treasury regulations. Statistics on the positions will be published monthly in the Treasury Bulletin, beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of October 29, 1975, for the weekly reports, and as of November 28, 1975 (the last business day of the month), for the monthly reports. The most recent revision of the nonbank Foreign Currency forms (see below) became effective as of the last business day of November 1976 for the monthly reports on nonbanking firms' positions in the United States.

Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Canal Zone, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States". The term "Worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions", and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly and monthly "bank positions".

Data for "foreign branches" and "all foreign" include amounts reported by the branches, majority-owned partnerships and majority-owned subsidiaries of United States banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiaries of a few foreign-owned U.S. based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for receipt or delivery within two business days from the date of the report. "Short-term" means maturing in one year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States directly or indirectly own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

Reporting Threshold

The exemption level applicable to banks and banking institutions is \$10 million equivalent. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 million equivalent on all nonbank forms from March 1975 through November 1976, when it was raised to \$2 million equivalent on the monthly reports of positions held in the United States.

Firms must report their entire foreign currency position in a specified foreign currency if a specified United States dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm in the United States and separately to each foreign branch or subsidiary. In reports on their foreign branches, majority-owned foreign partnerships and majority-owned foreign subsidiaries, United States banks and nonbanks are required to report the United States dollar denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

Description of Statistics

Data collected on the Treasury Foreign Currency forms are published in the Treasury Bulletin in ten sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through IX each present data on a specified foreign currency. Section X presents the United States dollar positions of the foreign branches and subsidiaries of United States firms which are required to report in one or more of the specified foreign currencies.

FINANCIAL OPERATIONS OF GOVERNMENT AGENCIES AND FUNDS

Government Corporations and Other Activities

Treasury Department Circular No. 966, Revised, dated December 20, 1972, and volume I, part 2, chapter 4100 of the Treasury Fiscal Requirements Manual (Transmittal Letter No. 186) require Government agencies to submit business-type financial statements and related information to the Department of the Treasury for use in compiling financial reports of the U.S. Government. The circular was originally issued in 1956 pursuant to the authority of Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 66b) which requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government.

Department Circular No. 966, Revised, requires submission of semiannual financial statements by all Government corporations specifically subject to the Government Corporation Control Act, as amended (31 U.S.C. 846, 856) and any wholly owned and mixed-ownership corporations subsequently brought under the provisions of the act, and all other activities operating as revolving funds. Other business-type activities required to report semiannually include activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature or whose activities result in the accumulation of substantial inventories, investments, and other recoverable assets. Regular governmental activities, which are of a nonbusiness-type nature, are required to report on an annual basis.

Two basic kinds of financial statements are called for by Department Circular No. 966, Revised; and they are published in the Treasury Bulletin. Statements of financial condition

are required for all activities. Statements of income and retained earnings are required for business-type activities only.

The statements of financial condition for business-type activities appear in Section I, Table GA-I-1 and are published semiannually. The first statements of financial condition published under the revised circular were as of December 31, 1972, applied to business-type activities only, and appeared in the May 1973 issue of the Bulletin. Statements of financial condition submitted annually by nonbusiness-type activities were published together with business-type activities in Section I, Table GA-I-1 in the January 1974 issue of the Bulletin. Loans shown on the agencies' statements of financial condition and held by the agencies, and loans guaranteed and insured by the agencies are reported on a quarterly basis. The first quarterly table on this Federal credit data, which was as of March 31, 1973, appeared in Section III, Table GA-III-2 in the August 1973 issue of the Bulletin. The first semiannual statements of income and retained earnings submitted under the revised circular were for the period July 1, 1972, through December 31, 1972, and appeared in Section I, Table GA-I-2 in the June 1973 issue of the Bulletin. All revolving funds shown in the statements are noted to indicate whether they are public enterprise funds, intragovernmental funds, or trust revolving funds; and trust funds are also noted. Direct sales and repurchases of loans are published on a monthly basis in Section II, Table GA-II-1.

Source: Monthly Treasury Statement of Receipts and Outlays of the United States Government. Budget estimates are based on the 1978 Budget of the U.S. Government, released January 17, 1977.

- 1/ State unemployment funds used for benefit payments. For the period August 1961 to February 1964, withdrawals by States were reduced by reimbursements to State accounts from the Federal Extended Compensation Account.
- 2/ Established by the Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. (a)), into which are deposited tax receipts transferred in accordance with the act and from which are paid the administrative expenses of the employment security program and reimbursement for tax refunds. Receipts consist of appropriated and unappropriated transfers of tax collections.
- 3/ Net of repayments.
- 4/ Amounts represent excess of collections from Federal Unemployment tax over expenditures for benefits and administrative expenses which excess was appropriated from the general fund to this account. (Includes amounts appropriated to the State Unemployment Accounts.) Beginning 1961, such excess is transferred between book accounts within the Unemployment Trust Fund.
- 5/ Extended unemployment compensation benefits under the employment security amendments of 1970 (P.L. 91-373) and the amendments to the Social Security Act (P.L. 92-224).
- 6/ For payment of benefits and refunds (45 U.S.C. 360). Figures exclude interim advance of \$15 million from the Treasury and subsequent repayment, both in 1940.
- 7/ Contributions under the Railroad Unemployment Insurance Act of 1938, as amended (45 U.S.C. 360 (a)), in excess of the amount specified for administrative expenses. Through 1957, also includes transfers from the administration fund of excess amounts over the specified balance (45 U.S.C. 361 (d)).
- 8/ Temporary advances are made when the balance in the Railroad Unemployment Insurance Account is insufficient to meet payments of

benefits and refunds due or to become due. Whenever the balance is sufficient to pay such benefits and refunds, repayments are made, plus interest at 3% per annum, pursuant to an act approved May 19, 1959 (45 U.S.C. 360 (d)).

- 9/ Consists of specified proportion of contributions deposited in the fund to be available for administrative expenses. The Railroad Unemployment Insurance Fund was established in the Unemployment Trust Fund pursuant to the amending act of September 6, 1958; before that the administration fund was a separate trust fund (45 U.S.C. 361).
- 10/ Total includes \$107 million transferred from State accounts to the Railroad Unemployment Insurance Account in connection with its establishment (45 U.S.C. 363). Beginning fiscal 1961 refunds of taxes (principal only) are reported as deductions from receipts. Interest paid on refunds of taxes is included under expenditures.
- 11/ Established by the act approved March 24, 1961 (42 U.S.C. 1105 (a)), which provides for a temporary program of extended unemployment compensation payments.
- 12/ Includes \$5 million FY 1970, \$10 million FY 1971 and \$12 million FY 1972, \$6 million FY 1973, and \$5 million FY 1974 from Railroad Retirement Unemployment Insurance Account.
- 13/ Includes an estimate of \$1,300 million supplemental appropriation requested and \$1 million of miscellaneous proprietary receipts.
- 14/ Beginning FY 1967 excludes transactions for investments of non-Federal securities.
- 15/ Includes payment of \$50 million from the extended unemployment account to the general fund.
- 16/ Includes \$1,029 million transferred to the Department of Labor for grants to States.
- 17/ Includes unappropriated receipts beginning September 1960.
- 18/ Includes interest.
- 19/ Includes an adjustment of \$7 million pursuant to the act of September 6, 1958 (U.S.C. 361 (a)).

* Less than \$500,000.
