## Treasury Financing Operations

### February Certificate Maturity

A one-year issue of 7/8 percent certificates of indebtedness, outstanding in the amount of \$3,947 million, matured on February 1, 1948. On January 20, 1948, the Secretary of the Treasury announced the offering of a new one-year 1-1/8 percent certificate in exchange, par for par, for the maturing certificates. Cash subscriptions were not received. The new certificates are dated February 1, 1948, and bear interest from that date at the rate of 1-1/8 percent per annum. Interest will be paid in full with the principal on the maturity date, February 1, 1949. The certificates of indebtedness were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Reports to the Treasury on the ownership of Government securities indicate that on December 31, 1947, about 70 percent of the \$3,947 million of certificates maturing February 1 were owned by reporting commercial banks and Federal Reserve Banks. The ownership figures for December 31 are the latest which are available for holdings of both commercial banks and Federal Reserve Banks.

---

Note: Historical details of Treasury market financing operations are shown in the tables on "Offerings" and "Disposition", respectively, of marketable issues of

Subscription books were opened on January 20 and closed at the close of business January 22. Holdings of the maturing certificates of indebtedness by the Federal Reserve Banks, which amounted to \$1,614 million on January 30, were redeemed in full for cash. Exchange subscriptions for the new issue amounted to \$2,189 million, leaving \$143 million to be paid in cash to holders other than Federal Reserve Banks.

### Treasury Bills Refunded and Retired

Reductions in Treasury bills outstanding again took place in January. The five issues maturing during the month totaled \$5.9 billion and the total refunded was \$5.6 billion. The first two maturities were \$1.3 billion each and the last three \$1.1 billion each. The first two maturing issues were refunded in full, but each of the last three was reduced by \$100 million. Bill retirements from April 17, 1947, when the first bill reduction occurred, through January 29, 1948, have totaled \$2.2 billion. The average rates of discount for the five January offerings, beginning with that dated January 2, were 0.952 percent, 0.950 percent, 0.976 percent, 0.981 percent, and 0.990 percent, respectively,

Source: Actual figures from Daily Treasury Statement; estimates from 1949 Budget document, including effect of proposed legislation.

1/ Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law. Includes transfers to trust accounts and net expenditures of wholly owned Government corporations, under appropriate classifications. Expenditure classifications in these tables are based on the Daily Treasury Statement, and therefore differ somewhat from those in the 1949 Budget document.

2/ Represents appropriations equal to "Social security -- employment taxes" collected and deposited as provided under Sec. 201 (a) of the Social Security Act amendments of 1939. See also Table 7, following. Figures were revised in the February 1948 issue of the "Treasury Bulletin" to reflect the present classification of certain expenditures reimbursed from the Federal Old-Age and Survivors Insurance Trust Fund.

3/ Includes public works undertaken by the Veterans Administration. For further detail, see tables under "Internal Revenue Collections".

4/ Receipts of Victory taxes withheld pursuant to the Revenue Act of 1942 are classified as "Other" income and profits taxes.

5/ Excludes railroad unemployment insurance contributions, which are included in "All other receipts".

6/ At present consists largely of proceeds from the sale of surplus property; also includes deposits resulting from renegotiation on war contracts (for detail see "Treasury Bulletin" for February 1948, page 5), and recoveries of U. S. investment in capital funds (see tables on "Cash Income and Outgo" in the current issue of the "Treasury Bulletin").

7/ Includes expenditures of the Department of the Air Force, which are being made from Army appropriations pending transfer of funds pursuant to the Act of July 26, 1947.

8/ Excludes payments under the Armed Forces Leave Act and expenditures for UNRRA, shown elsewhere in this table, and expenditures for international finance and aid shown in Table 4. Figures for the Department of the Army exclude also expenditures for surplus property disposal and Office of Selective Service Records, shown elsewhere

in this table, and expenditures for river and harbor work and flood control, which are included under "Public Works" in Table 5.

10/ National defense and related activities of RFC and its affiliates. After July 1, 1947, expenditures for these purposes were not segregated from the other expenditures of the Corporation and its affiliates, which are included under "Other" expenditures in Table 5.

11/ For detail prior to July 1, 1947, see "Treasury Bulletin" for February 1948, page 7. Current figures consist solely of Office of Selective Service Records.

12/ Includes expenditures from prior year appropriations which are not shown separately in the Daily Treasury Statement but are included under the Department of the Army.

13/ Department of Agriculture expenditures except those for UNRRA, surplus property disposal, other national defense and related activities prior to July 1947, foreign aid and relief, and forest roads and trails.

14/ For more detail of these expenditures, see Tables 7, 8, and 9 following. Tax refunds shown there are excluded from expenditures in this table and included in Table 1 preceding as refunds.

15/ Consists of Federal Works Agency expenditures except those for surplus property disposal, other national defense and related activities prior to July 1947, and assistance to Greece and Turkey; forest roads and trails; rivers and harbors and flood control; Bureau of Reclamation; and Tennessee Valley Authority.

16/ Housing and Home Finance Agency expenditures except those for surplus property disposal, and for other national defense and related activities prior to July 1947.

17/ Not classified separately for fiscal years after 1945. For additional information for earlier years, see "Treasury Bulletin" for August 1945, page 6.

18/ Includes executive departments and legislative and judicial functions; Government contributions to Federal employees' retirement; atomic energy; aids to education, labor, finance, commerce, and industry; Civil Aeronautics; Post Office deficiency; stock-piling; and, for 1948 and 1949 estimates, a reserve for contingencies.

1/ Accrued discount on savings bonds and bills less interest paid on savings bonds and bills redeemed.

2/ Interest payments to wholly owned Government corporations are not deducted because they are treated as negative expenditures when received by corporations; hence payment and receipt offset each other in the expenditure series.

3/ Budget expenditures involving the issuance of Federal securities

are treated as noncash at the time of original payment and as cash expenditures at the time of redemption. The figures shown are net issuances, or net redemptions (-).

1/ Excludes postal savings bonds.

2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of

call has been made, however, are listed as fixed maturities. For date of issue of each security, see chapter on "Market Quotations"; for tax status, see chapter on "Treasury Survey of Ownership".

3/ Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to a specified date.

1/ Original call and maturity dates are used.

2/ Prior to the refunding operation of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege

of exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

## UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31, and October 1935, pages A-4 and A-5. Sales and redemptions data by States are published at the end of each calendar and each fiscal year after June 30, 1947. Sales by denominations are also published semi-annually after December 31, 1947.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of Series G outstanding are quoted at par. Matured bonds which have been redeemed are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to

June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and small amounts also of unclassified F and G redemptions, beginning with June 1947.

3/ Not calculated for matured series.

## TREASURY SAVINGS NOTES

Treasury savings notes have been issued in three series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; and Series C on continuous sale since September 14, 1942. For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series C notes, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For similar information regarding Series A and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220. For sales and redemptions of Series A and B notes by fiscal years

and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

## TREASURY SURVEY OF OWNERSHIP, DECEMBER 31, 1947

The Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey account for approximately 95 percent of such securities held by all banks and insurance companies in the United States.

Information on the distribution of ownership by types of banks and insurance companies is published each month. Additional information showing the holdings of commercial banks distributed according to Federal Reserve member-bank classes and nonmember banks has been published at less frequent intervals. Currently,

this information is published for June 30 and December 31. Figures for December 31, 1947, will appear in the April issue of the "Treasury Bulletin".

The Survey began with data for March 31, 1941, which appeared in the "Treasury Bulletin" for May of that year. Revisions of data on insurance companies for May 31, 1943, and prior months appeared in the November 1943 issue; reclassification of data on banks for the period November 30, 1943, through February 29, 1944, appeared in the May 1944 issue; and revisions of data for September 30, 1944, appeared in the February 1945 issue.

\* Less than \$500,000.

1/ Excludes trust departments.

2/ Includes trust companies.

3/ Includes those banks and insurance companies not reporting in the Treasury Survey.

4/ C. C. C. demand obligations in the amount of \$43 million, all held by commercial banks, are shown only in the total amount outstanding; data for reporting banks are not available.

5/ Excludes guaranteed securities held by the Treasury.

6/ Issues which commercial banks may not acquire prior to a specified date (with minor exceptions); see footnotes to Table 2 under "Debt Outstanding".

7/ Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly" tax-exempt securities are those with the income exempt from both normal tax and surtax. "Partially" tax-exempt securities are those with the income exempt from the normal tax except that in

the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to both normal tax and surtax.

8/ Includes F. H. A. debentures; see footnote 9.

9/ A small indeterminate amount of these debentures is partially tax-exempt.

10/ United States savings bonds, Series C, D, E, and F, are shown at current redemption values. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

11/ Savings bonds sold prior to March 1, 1941, are partially tax-exempt; those sold on and after that date are taxable.

12/ The proprietary interest of the United States in these banks ended on June 26, 1947.

<sup>4/</sup> Called on November 14, 1947, for redemption on March 15, 1948.<sup>5/</sup> Included in the average yield of long-term taxable Treasury bonds as shown in Table 1 under "Yields of Treasury and Corporate Bonds".<sup>6/</sup> Issue which commercial banks may not acquire prior to a specified date (with minor exceptions).<sup>7/</sup> All partially tax-exempt except Panama Canal bonds, which are wholly tax-exempt.<sup>8/</sup> These securities are not shown until date of issue.<sup>9/</sup> Not quoted since date of issue.<sup>10/</sup> Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in the Federal land banks ceased on June 26, 1947.<sup>11/</sup> Yield to maturity. Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

## YIELDS OF TREASURY SECURITIES JAN. 30, 1948

Based on Mean of Closing Bid and Asked Quotations

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Note: The Treasury bond yields averages include only bonds which are neither due nor callable for fifteen years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the

New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin". The partially tax-exempt series was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

2/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

3/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

4/ Market closed.

CAPITAL MOVEMENTS

Information relating to capital movements between the United States and foreign countries is presented in four sections. Section I contains the principal types of data on capital movements by years from 1935, and currently by months. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for recent months. The total capital movements are given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Details with respect to capital movements and short-term claims and liabilities are presented in Section III as of the latest month for which the data are available.

Section IV contains data for recent months on the

net position in foreign currencies of banks and brokers in the United States, their outstanding foreign exchange contracts, and purchases and sales of foreign exchange, both spot and forward.

These data relating to capital movements are based on reports filed each month by banks, bankers, and brokers throughout the United States. The reports are collected, checked and tabulated by the twelve Federal Reserve Banks. The totals are then forwarded to the Treasury Department for consolidation and publication.

Figures for previous periods may be obtained from the following sources:

"Treasury Bulletin", November 1945, for a summary of capital movements, and position in foreign currencies by months, 1942-1945.

Supplement to "Treasury Bulletin", November 1945, on "Capital Movements between the United States and Foreign Countries, January 1942 through April 1945", for details during that period.

"Treasury Bulletin", March 1942, and earlier issues, for details covering years back to January 2, 1935.
