A Statement by the Secretary of the Treasury

During the past several months I have become increasingly concerned over the rise in prices. I see more and more evidence that the prices people have to pay are being raised to levels out of proportion to their incomes. The sharpness of the recent rise is shown in the accompanying chart.

When people find prices too high they stop buying. They wear their old clothes longer. They put off buying new cars and building new houses. They buy cheaper foods and less meat and butter.

I feel strongly that our economic outlook, now so promising, will be jeopardized if we do not cooperate to reduce prices now.

The hard way to get prices down is for people to cut down their buying. Retailers then start cancelling orders, and try to reduce their inventories through clearance sales. Factories, in turn, have to curtail production and lay off workers, which further reduces consumer demand. This is the hard way.

There is a better way. I ask all who have a voice in pricing their products to cooperate in reducing prices before they are forced down.

I have been immensely gratified by the price reductions made recently by several of our larger manufacturing companies, and I know there are many others who have done their share.

There has never been a time when the backlog of demand for houses and automobiles, for household equipment, and other types of goods was so great as it has been in recent months. It would indeed be tragic to let a substantial part of this demand be dissipated in high prices, when it could serve as a bulwark to the national economy for many years ahead.

An improvement in the price picture will not solve all our economic problems, but I emphasize this factor because a reduction in prices (in areas in which profits justify) to an equitable level in relation to incomes is the outstanding need right now.

I trust that all groups — manufacturers, distributors, workers, farmers, and all others — will recognize and carry out their part in this contribution to continued national prosperity.

Treasury Market Financing

Historical details of Treasury market financing operations involving bonds, notes, and certificates of indebtedness, beginning with the Fifth War Loan, are published in the tables on pages 30 and 31. Details of weekly Treasury bill offerings are shown on pages 32 and 33.

March Maturities

Maturities in March totaled \$5,081 million, comprising an issue of 7/8% certificates of indebtedness maturing on March 1 in the amount of \$3,133 million, and an issue of 1-1/4% Treasury notes maturing on March 15 in the amount of \$1,948 million. Cash payments on these maturities aggregated \$2.9 billion made up of the total note issue and \$1 billion of the certificate issue. For the remainder of the maturing certificates an exchange offering of a new issue of one-year 7/8% certificates was made. Subscriptions were received subject to allotment to all holders on an equal percentage basis, except that subscriptions in amounts of \$25,000 or less were allotted in full. Cash subscriptions were not received. The handling of the March maturities was announced by Secretary of the Treasury Snyder in press releases on February 17 (for the certificates) and February 20 (for the notes).

The new certificates were dated March 1, 1947 and will mature March 1, 1948. They will bear interest at the rate of 7/8% per annum which will be subject to all Federal income taxes. Interest will be payable in full with the principal at maturity.

Subscription books were opened on February 17 and closed at the end of business on February 19. The certificates were issued in bearer form only in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

On February 27, 1947, Secretary Snyder announced that subscriptions for the new issue aggregated \$2,950 million. Subscriptions in amounts of \$25,000 or less were allotted in full in the amount of \$52 million. Subscriptions in amounts of over \$25,000 were allotted 72% on a straight percentage basis, but not less than \$25,000 to any one subscriber, and with adjustments to the next highest thousand where necessary. Total allotments amounted to \$2,142 million, leaving \$991 million to be paid in cash.

On the basis of reports to the Treasury on the ownership of the debt, about 58% of the maturing certificates and notes was owned by reporting commercial banks and the Federal Reserve Banks as of January 31, 1947. The ownership figures as of January 31 are the latest available.

The following table presents a summary of the ownership distribution of each of the maturing issues.

With the cash pay-off of \$2.9 billion on the securities maturing in March 1947, payments made in cash on maturities in the first three months of 1947 totaled \$4.2 billion. From March 1, 1946, when the debt pay-off program was started, to March 17, 1947, cash payments on maturing securities totaled \$27.4 billion.

The total public debt 2/ stood at just below \$280 billion when the cash payment program began and was reduced to \$259 billion by March 17, 1947. This represents a net reduction in the debt of \$21 billion. The difference between the reduction in the debt and the total of cash pay-offs for the period is accounted for by other public debt transactions, such as the continued sale of savings bonds, the sale of special issues to Federal agencies and trust funds, the issuance of armed forces leave bonds, and the issuance of noninterest-bearing notes to the International Monetary Fund. The February 1947 issue of the "Treasury Bulletin" includes a more detailed discussion of financing activities during the calendar year 1946.

1/ Includes (1) 7,338 commercial banks holding approximately 95% of the United States Government obligations held by all commercial banks in the United States and (2) Federal Reserve Banks.

2/ Includes guaranteed obligations in the hands of the public.

1/ General expenditures now include expenditures for revolving funds; back figures have been revised accordingly.

Outstanding excess profits tax refund bonds may be redeemed at the option of the holder commencing January 1, 1946; when such redemptions occur, they will appear as retirements of public debt.

6/ Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Department of Labor, U. S. Employment Service (formerly Office for Emergency Management, War Manpower Commission, U. S. Employment Service), under authority of Social Security Act. For further details, see tables which follow on the Social security program.

7/ Includes public buildings, public highways (including forest roads and trails), river and harbor work and flood control, Tennessee Valley Authority, Federal Public Housing Authority (formerly U. S. Housing Authority), reclamation projects and the Public Works Administration. Excludes certain expenditures for public works in connection with war activities by the Federal Works Agency, beginning July 1941.

8/ Consists of payments under Bretton Woods Agreements Act - International Bank; credit to United Kingdom; and Export-Import Bank of Washington - capital stock.

9/ Classified as Other expenditures commencing July 1, 1945. For additional information on Direct and work relief, see "Treasury Bulletin" for August 1945, page 6.

10/ Gross expenditures have been reduced \$315 million representing the repayment of capital funds by certain United States Government agencies. For further details see "Treasury Bulletin" for June 1943, page 9, footnote 12.

11/ Includes \$500 million for Commodity Credit Corporation - postwar price support of agriculture.

1/ Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rate of

interest on United States savings bonds, Series A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.53%.

2/ Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

Statutory Limitation on the Public Debt

Section 21 of the Second Liberty Bond Act, as amended, provides that the face amount of obligations issued under authority of that Act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury), shall not ex-

ceed in the aggregate \$275 billion outstanding at any one time. Obligations issued on a discount basis, and subject to redemption prior to maturity at the option of the owner, are included in the statutory debt limitation at current redemption values.

Sources: Daily Treasury Statement, and reports to the Treasury.

1/ Excludes (1) postal savings bonds and (2) Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).

2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities.

3/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.

"Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates.

"Taxable" securities are subject to both normal and surtax rates. 4/ Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to a specified date. See footnote 2, page 21.

1/ Original call and maturity dates are used.

2/ Bank restricted issue.

3/ Prior to the refunding operation of March 1, 1946, maturing

Beginning with that operation, some securities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

Sales and Redemptions of United States Savings Bonds

United States savings bonds were first offered for sale in March 1935. Bonds of series A-D were sold between March 1935 and April 1941. Series E, F, and G bonds have been on sale since May 1, 1941.

Series A-E bonds are 10-year discount bonds sold at 75% of maturity value, and yield 2.90% per annum if held to maturity. Series F bonds are 12-year discount bonds sold at 74% of maturity value, and yield 2.53% per annum if held to maturity. Series G bonds are 12-year current income bonds, sold at par, bearing interest at 2-1/2% per annum, and redeemable at par at maturity or at stated prices less than par before maturity.

Purchases of series A-D bonds were limited to \$7,500 issue price in any one calendar year. These bonds were available to all subscribers prior to April 1, 1940, and to individuals only after that date. Purchases of series E bonds are limited to \$3,750 issue price in any one calendar year, and may be made only by individuals (defined as natural persons only). The limit for series F and G combined is \$100,000 issue price in any one calendar year (\$50,000 in calendar year 1941). Series F and G bonds are available to all

subscribers except commercial banks. Commercial banks, however, were permitted to purchase these bonds during certain periods and with certain restrictions. For details concerning these periods and restrictions see "Treasury Bulletin" for December 1944, page 36, footnote 9, and "Treasury Bulletin" for February 1946, page 37, footnote 9, and page A-22. For details concerning features, investment yields, and redemption values see "Treasury Bulletin" for October 1945, pages A-4 and A-5.

Series A bonds matured in 1945, and series B bonds in 1946. Series C bonds began to mature in January 1947. Matured bonds turned in for redemption are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of series G outstanding are quoted at par.

Sales and Redemptions of Treasury Savings Notes

Treasury savings notes were issued in three series, series A from August 1, 1941 through June 22, 1943, series B from August 1, 1941 through September 12, 1942, and series C which have been on continuous sale since September 14, 1942. All of series A and B and some of series C notes have matured.

Series C notes are sold at par, and accrue in value each month, yielding 1.07% per annum if held to maturity (3 years from date of issue). These notes may be used in payment of taxes any time after 2 months after issue, or may be redeemed for cash any time after 6 months after issue. For details concerning features, investment yields, and tax payment or redemption values, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning the features of series A

and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes turned in for redemption (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement. For sales and redemptions of series A and B notes by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

* Less than \$500 thousand or less than .05%.

^{1/} Securities held in trust departments are excluded.^{2/} Includes trust companies.^{3/} This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See headnotes to this section.^{4/} Issues which commercial banks may not acquire prior to a specified

date (with minor exceptions). See footnote 2, page 21.

^{5/} Guaranteed securities held by the Treasury are not included.

Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5 thousand of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

^{6/} Includes an estimated amount of Federal Housing Administration debentures.^{7/} Actual figures by tax status are available only for total amount outstanding.

1/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "When issued" prices for all securities except Federal Intermediate Credit Bank debentures are included.

Dates of highs and lows, in case of recurrence, are the latest dates.

2/ Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to matu-

rity as more significant when an issue is selling at or below par.

1/ Prices quoted are subject to a dealer's commission. These securities are not shown until date of issue.

2/ Not quoted on February 28, 1947.

2/ Excludes issues completely held by Farm Credit Administration agencies.

Note: Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. Monthly and weekly data for the period January 1933 through March 1941 appeared in the "Treasury Bulletin" for April 1941, pages 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of average see "Treasury Bulletin" for March 1944, page 58. The partially tax-exempt series was discontinued on December 15, 1945 because there were no longer any bonds of this classification due or callable in 15 or more years. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax, except that in the

case of partially tax-exempt Treasury and United States savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

2/ For discussion of present composition of high-grade corporate bond average, see "Treasury Bulletin" for January 1945, page 56; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treasury Bulletin" for April 1941, page 61.

3/ Monthly averages of daily figures. Prior to April 1, 1948, corporate bonds are averages of Saturday figures.

4/ The composition of the high-grade corporate bond average was revised commencing with November 1, 1944. The old average for November 1944 was 2.56%. See footnote 2.

5/ On days when the exchanges are closed, the date and prices of the previous day are used.

CAPITAL MOVEMENTS BETWEEN THE UNITED STATES
AND FOREIGN COUNTRIES AND NET POSITION
IN FOREIGN CURRENCIES

Capital Movements Between the United States and Foreign Countries

This chapter on Capital Movements between the United States and Foreign Countries and Position in Foreign Currencies is divided into four main groups. Section I of Capital Movements, the Historical Summary, contains data regarding capital movements, by the principal types of data and by years, starting with 1935. The last thirteen months are also shown. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for the last thirteen months. The total capital movements are given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Details with respect to capital movements and short-term claims and liabilities are presented in Section III as of the latest month for which the data are

available.

The last group contains information regarding the net position in foreign currencies of United States banks and brokers, their outstanding foreign exchange contracts and purchases and sales of foreign exchange, both spot and forward. This section covers a twelve-month period.

Figures for previous periods may be obtained from the following sources:

Supplement to the "Treasury Bulletin" on "Capital Movements between the United States and Foreign Countries, January 1942 through April 1945", for details during that period.
