Treasury Financing Operations

February Certificates Refunded

On January 19, 1949, the Secretary of the Treasury announced the offering of a one-year 1-1/4 percent certificate of indebtedness in exchange for the \$2,189 million of 1-1/8 percent certificates of indebtedness maturing February 1. Subscription books were opened January 19 and were closed at the close of business on January 21.

Exchanges were made par for par and cash subscriptions were not received. The new certificates were dated February 1, 1949, and bear interest from that date at the rate of 1-1/4 percent per annum, payable with the principal at maturity on February 1, 1950. They were issued in bearer form only in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Reports to the Treasury on the ownership of Government securities indicate that on November 30, 1948, about 41 percent of the maturing certificates were owned by reporting commercial banks and Federal Reserve Banks. The ownership figures for November 30 are the latest available for holdings of commercial banks.

Subscriptions to the new certificates amounted to \$1,993 million on the basis of preliminary figures. Maturing certificates held by Federal Reserve Banks in the amount of \$88 million were redeemed for cash,

leaving \$108 million held by other investors to be paid in cash.

Treasury Bills Retired and Refunded

Treasury bills maturing in December totaled \$5.2 billion and the amount refunded totaled \$5.0 billion. The first two weekly issues were each \$100 million less than the respective amounts maturing. The remaining issues were refunded in full. The average rates of discount on the five December offerings, beginning with that dated December 2, were in sequence, 1.150 percent, 1.152 percent, 1.153 percent, 1.154 percent, and 1.157 percent.

Savings Bonds, Series E - Limitation Modified

Individual holders of Series D-1939 savings bonds, which began maturing January 1, 1949, may reinvest the proceeds of the maturing bonds in Series E savings bonds currently on sale without regard to the \$10,000 annual limitation (maturity value) on purchases of E bonds, according to an announcement on December 20, 1948. Holders of Series D-1939 savings bonds may reinvest any part of the proceeds of their maturing bonds up to such denominational amounts as the proceeds will fully cover. The reinvestment can be effected through the established payment and issue procedure.

Note: Details of Treasury market financing operations are shown in the tables on "Offerings" and "Disposition", respectively, of marketable issues of bonds, notes,

and certificates of indebtedness, and the table "Offerings of Treasury Bills", in this issue of the "Treasury Bulletin".

Announcement

As announced on December 23, 1948, by the Secretary of the Treasury, the Director of the Bureau of the Budget, and the Comptroller General, as part of a continuing effort to improve Federal accounting and financial reporting, amounts refunded by the Government, principally for the overpayment of taxes, are being reported as deductions from total receipts rather than as expenditures, beginning January 1949. Figures for prior periods, except as noted, have been adjusted accordingly for comparative purposes. The change does not affect the size of the budget surplus or deficit since it reduces receipts and expenditures by equal amounts. Interest, which is paid on some types of refunds, will continue to be reported as a budget expenditure.

Refunds of receipts are not true operating costs, but merely represent the return of money which the Government is not entitled to keep. The new method results in a clearer presentation of receipts retained by the Government, and causes reported budget expenditures to reflect more accurately the actual costs of carrying out Government programs.

Figures for prior periods have been adjusted also to exclude from both budget receipts and budget expenditures certain payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings, in accordance with reporting procedure which became effective July 1, 1948.

Source: Actual figures from Daily Treasury Statement; estimates based on the 1950 Budget document, including effect of proposed legislation.

1/ Both receipts and expenditures exclude (1) refunds of receipts and (2) payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings (see page A-2 in this issue of the "Treasury Bulletin").

2/ Gross receipts less appropriations to Federal Old-Age and Survivors Insurance Trust Fund and refunds of receipts (see Table 1 under "Budget Receipts and Expenditures").

3/ Excludes refunds of receipts, formerly shown as expenditures but now shown as deductions from receipts (see Table 2 under "Budget Receipts and Expenditures"). Figures for the fiscal year 1948 include \$3,000 million transfer in June to Foreign Economic Co-operation Trust Fund; figures for fiscal year 1949 (actual and estimated) exclude expenditures from this fund.

4/ Established in accordance with the Economic Cooperation Act of 1948; positive figures indicate receipts and negative figures indicate expenditures.

5/ Comprises all trust accounts other than Foreign Economic Co-operation Trust Fund; sales and redemptions of securities of Government corporations, etc., in the market (net); increment on gold; seigniorage on silver; and miscellaneous funds and accounts. Figures exclude retirement of national bank notes chargeable against increment on gold (fiscal years 1937-39).

6/ Clearing account for outstanding checks and telegraphic reports from Federal Reserve Banks; excess of receipts, or expenditures (-).

7/ For data on guaranteed securities and total Federal securities outstanding, see Table 1 under "Debt Outstanding" in the current issue of the "Treasury Bulletin"; for earlier data, see issue of July 1948, page 1.

8/ Figures have not been revised as yet to exclude refunds and capital transfers.

1/ Original call and maturity date are used.

2/ Prior to the refunding operations of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege of exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

3/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called securities would be presented for cash redemption.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31, and October 1945, pages A-4 and A-5. Sales and redemptions data by States are published at the end of each calendar and each fiscal year after June 30, 1947. Sales by denominations are also published semiannually after December 31, 1947.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of Series G outstanding are quoted at par. Matured bonds which have been redeemed are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

TREASURY SAVINGS NOTES

Treasury savings notes (originally designated tax savings notes) have been issued in four series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; Series C from September 14, 1942, through August 31, 1948; and Series D on continuous sale beginning September 1, 1948. Details concerning terms and conditions for purchase and redemption, and investment yields of Series D notes will be found on page A-1 of the October 1948 "Treasury Bulletin". For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946,

pages 42 and 43. Similar information concerning Series C notes will be found in the "Treasury Bulletin" for October 1945, pages A-4 and A-5.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock

Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.
 ^{1/} For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin". The partially tax-exempt series was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

^{2/} Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

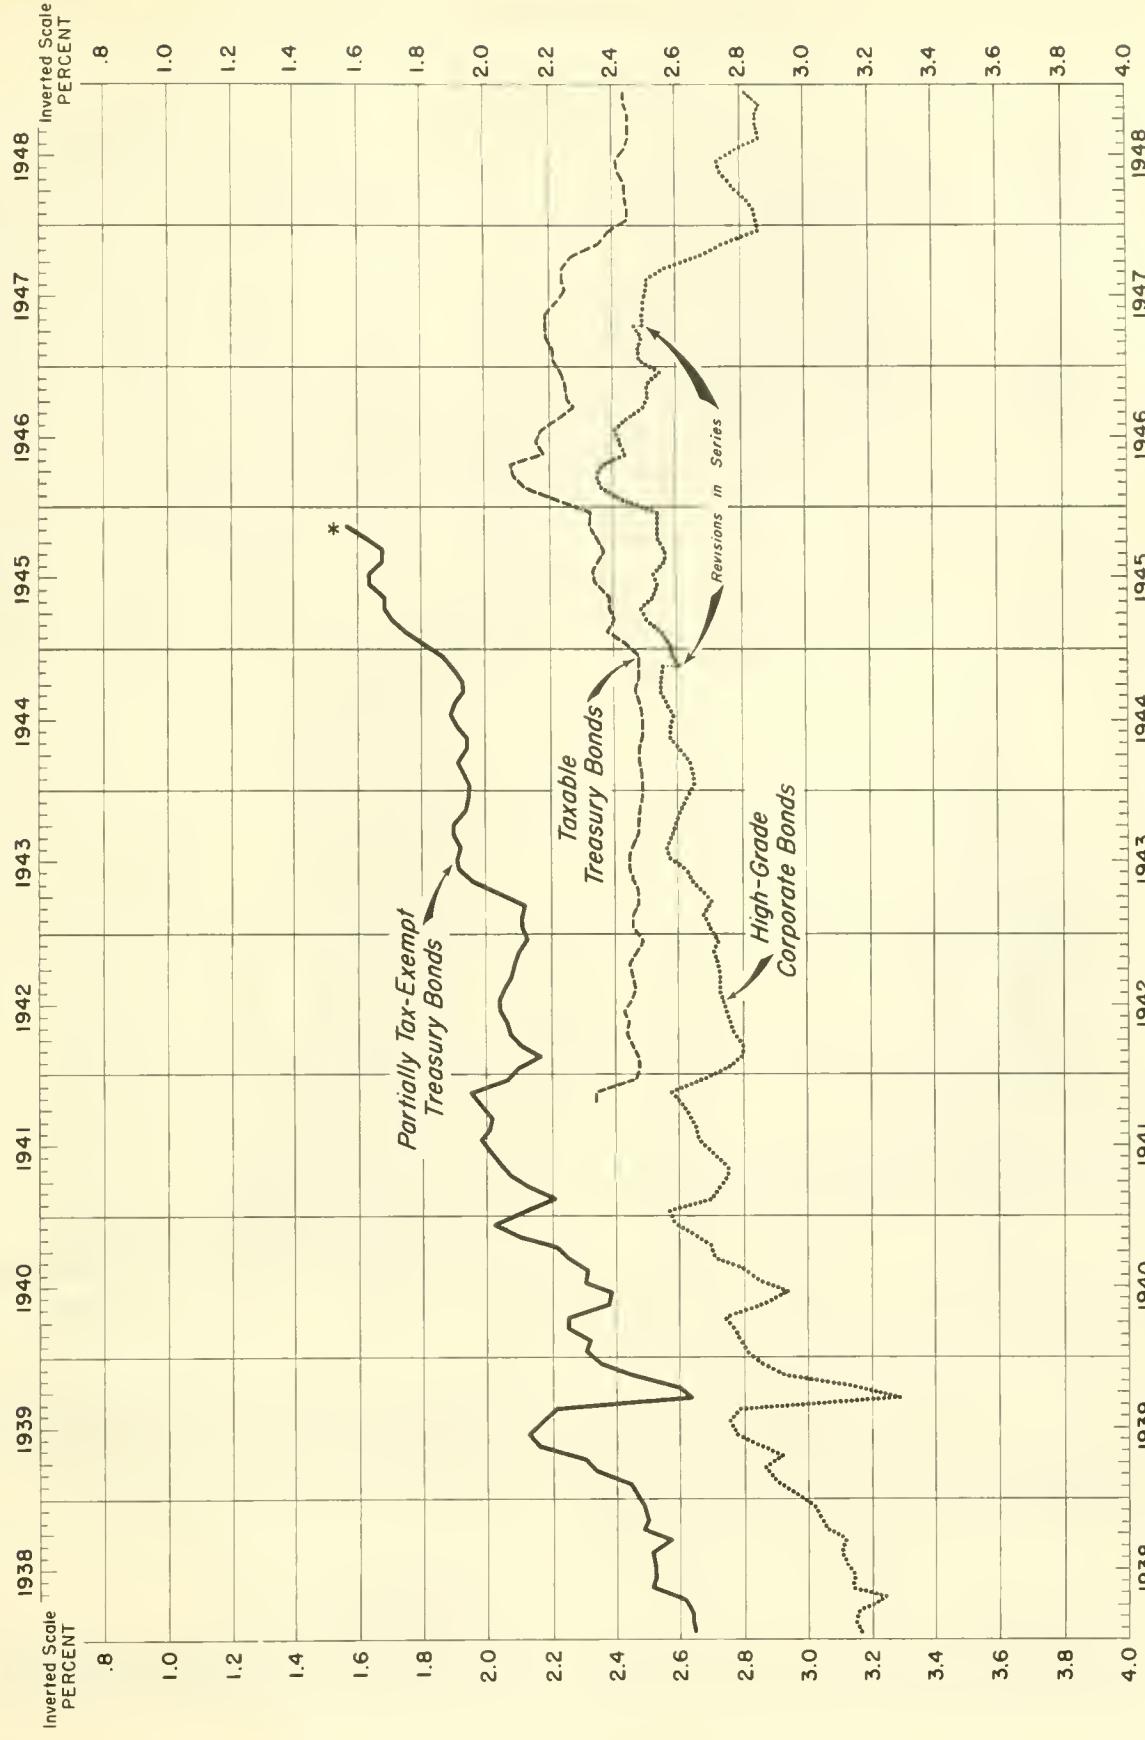

^{3/} Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

CAPITAL MOVEMENTS

Information relating to capital movements between the United States and foreign countries is presented in four sections. Section I contains the principal types of data on capital movements by years beginning with 1935, and currently by months. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for recent months. The total net capital movement is given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Section III presents details with respect to capital movements and short-term claims and liabilities as of the latest month for which the data are available.

Section IV contains data for recent months on outstanding contracts of banks for forward purchases and sales of foreign exchange.

The data in these four sections are based on reports filed each month by banks, bankers, and brokers throughout the United States. The reports are collected, checked, and tabulated by the twelve Federal Reserve Banks. The totals are then forwarded to the Treasury Department for consolidation and publication.

Publication of detailed figures on capital movements was discontinued between the March 1942 and the November 1945 issues of the "Treasury Bulletin", but data omitted during that period were supplied in the November 1945 issue and supplement.

Beginning with the December 1948 issue, publication of the data on capital movements was advanced two months by the use of preliminary reports. A comparison of preliminary and final data for past months indicates a difference of a maximum of one percent in the grand totals. Somewhat more significant changes in particular categories for individual countries may be necessary when the final reports are published, normally two months after the preliminary data.
