Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the

Treasury's "Combined Statement of Receipts, Expenditures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1, 1948, and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve banks. However, noncash debt transactions are included.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily state-

ment with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures were classified by type of account, and the budget results shown in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the

Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions handled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

Treasury Financing Operations

Tax Anticipation Bills

On June 28 tenders were invited for \$2.0 billion, or thereabouts, of 255-day tax anticipation bills and for \$2.0 billion, or thereabouts, of 286-day tax anticipation bills, both issues to be dated July 11, 1967. The 255-day bills mature on March 22, 1968, and the 286-day bills mature on April 22, 1968, but they will be acceptable at face value in payment of income taxes due on March 15, 1968, and April 15, 1968, respectively. Tenders were opened on July 5.

Tenders received for the 255-day bills totaled \$3,251 million, of which \$2,003 million was accepted at the average bank discount rate of 4.861 percent. The limit for noncompetitive tenders was \$400,000. These totaled \$270 million.

Tenders received for the 286-day bills totaled \$3,027 million, of which \$2,001 million was accepted at the average bank discount rate of 4.898 percent. The limit for noncompetitive tenders was \$400,000. These totaled \$225 million.

All bidders for either issue were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of any bills of that issue at a specific rate or price, until after one-thirty p.m., Eastern daylight saving time, July 5, 1967.

Any qualified depositary was permitted to make payment by credit in its Treasury tax and loan account for both issues of bills allotted to it for itself and its customers up to any amount for which it was qualified in excess of existing deposits.

9-Month and One-Year Bills

On June 21 tenders were invited for \$500 million, or thereabouts, of 275-day Treasury bills, representing an additional amount of bills dated March 31, 1967, maturing March 31, 1968, to be issued June 30, 1967, and for \$1 billion, or thereabouts, of 366-day Treasury bills, to be dated June 30, 1967. These issues were to refund \$1.5 billion of bills maturing June 30. Tenders were opened on June 27.

Tenders received for the 275-day bills totaled \$1,183 million, of which \$500 million was accepted, including \$18 million of noncompetitive tenders. The average bank discount rate was 4.723 percent.

Tenders received for the 366-day bills totaled \$1,771 million, of which \$1,001 million was accepted, including \$38 million of noncompetitive tenders. The average bank discount rate was 4.732 percent.

On June 28 the Treasury announced that subsequent offerings of 9-month bills will be for \$500 million and offerings of one-year bills will be for \$1 billion. This will raise \$900 million of new cash during fiscal year 1968.

13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in June totaled \$11.5 billion, replacing an equal amount of maturing bills. There were five 91-day issues of \$1.3 billion each and five 182-day issues of \$1.0 billion each. Average rates for the new issues are shown in the following table.

3/ This was an additional issue of the bills dated Nov. 30, 1966.

On June 28 the Treasury announced that for thirteen weeks, starting with the auction on July 10, 1967, the amount of 3-month bills to be offered would be enlarged by \$100 million. This will raise \$1.3 billion of new cash over the course of three months.

Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of \$1,000, \$5,000, \$10,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value). Tenders are received at Federal Reserve banks and branches.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for \$200,000 or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on

that date. Payment for 13-week, 26-week, 9-month, and one-year bills may not be made by credit in Treasury tax and loan accounts.

Foreign Series and Foreign Currency Series

Foreign series securities issued in June totaled \$275 million, consisting of one 3.85 percent 6-month certificate of indebtedness, and two 3.50 percent 3-month certificates of indebtedness. Redemptions for the month totaled \$50 million. At the end of June, foreign series securities outstanding totaled \$624 million.

Foreign currency series securities issued in June consisted of one note equivalent to \$25 million. The note is denominated in Swiss francs, bears interest of 4.83 percent, is dated June 30, 1967, and matures September 30, 1968. Redemptions for the month totaled an equivalent of \$25 million. At the end of June foreign currency series securities outstanding totaled an equivalent of \$890 million, and were denominated in Austrian schillings, German marks, Italian lire, and Swiss francs.

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates, including effect of proposed legislation, are from the 1968 Budget document released January 24, 1967.
Note: Agency shifts are shown in this table beginning with the period

of such shifts; figures prior to the shifts have not been adjusted. Therefore, some expenditures do not necessarily represent functions which are comparable over a period of time (for a more consistent basis, see Table 5).

Source: Expenditures for 1967 are from reports received from disbursing, collecting, and administrative agencies of the Government, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1968 Budget document, Table 19, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 19. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.

- 1/ For expenditures by major functions for fiscal 1967 through June 1967, and fiscal 1966 through June 1966, see "Note" below. Details by functions are not available for publication in this issue but will appear in the August 1967 Bulletin.
- 2/ Expenditures for 1967 for function code 351 include those relating to specified research projects applicable to function code 355. These expenditures were made from "Special Activities, Commodity Credit Corporation."
- 3/ Expenditures for 1967 for function code 551 include those relating to veterans' readjustment benefits applicable to function code 803 and those relating to the advancement of business applicable to function code 506. These expenditures were made from the "Participation Sales Fund, Federal National Mortgage Association."
- 4/ Expenditures for 1967 for function code 653 include those relating to medical and hospital care for the aged applicable to function code 651. These expenditures were made from "Grants to States for Public Assistance, Welfare Administration."
- 5/ Expenditures for 1967 for function code 702 include those relating to assistance for elementary and secondary education applicable to function code 701 and other aids to education applicable to function code 704. Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates, including effect of proposed legislation, are from the 1968 Budget document released January 24, 1967.

Note: Figures in this table differ from those published prior to August 1963 for shifts in classification including security transactions of Government-sponsored enterprises from deposit fund account expenditures to net investment by Government agencies in public debt securities, and

net redemption of agency securities in the market; and certain deposit fund account receipts from net receipts to net expenditures.

1/ Certain interfund transactions are excluded from both receipts and expenditures beginning with the July 1961 issue of the Bulletin. For content see Table 4.

CONSOLIDATED CASH TRANSACTIONS

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1968 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget documents as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated

from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Seasonally adjusted summary data are shown in table 3. The adjusted data have been derived by applying a seasonal adjustment formula developed by the Bureau of Census, Department of Commerce.

ACCOUNT OF THE TREASURER OF THE UNITED STATES**Source and Availability of the Balance in the Treasurer's Account**

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in

the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included

through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).

2/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.

3/ Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

1/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.

2/ United States savings notes first offered for sale as of May 1, 1967.

3/ Retirement plan bonds first offered for sale as of January 1, 1963.

4/ Taxes eligible for credit consist of those deposited by taxpayers in the depository banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; and estimated corporation income taxes beginning April 1967.

5/ Under a special procedure begun in March 1951, authorization was given during certain periods for income tax payments, or a portion of them, made by checks of \$10,000 or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure was discontinued in April 1967.

* Less than \$500,000.

Footnotes to Table 2

Source: On the basis of the daily Treasury statement.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual

interest charge for the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1/ Guaranteed securities included are those held outside the Treasury.

2/ Total includes "Other bonds" through 1960; see Table 3.

2/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

r Revised.

STATUTORY DEBT LIMITATION

The Second Liberty Bond Act (31 U.S.C. 757b), as amended by an act approved June 30, 1959, provides that the face amount of securities issued under authority of that act, and the face amount of securities guaranteed as to principal and interest by the United States (except guaranteed securities held by the Secretary of the Treasury) shall not exceed in the aggregate

\$285 billion outstanding at any one time. A temporary increase to \$336 billion has been authorized through June 30, 1967 (act of March 2, 1967).

For a legislative history of the public debt limitation, see the Annual Report of the Secretary of the Treasury.

1/ Does not include payments for accrued interest.

The effective rate of interest on the new issue is the coupon rate adjusted for the amount paid by or to the Treasury as premium or discount on the new security exchanged for eligible securities originally issued at par. For eligible securities originally issued at prices other than par, the payment by or to the Treasury is applied to the price adjusted for the pro rata amortization of the original premium or discount to the date of the advance funding.

2/ Based on the mean of bid and asked prices of securities eligible for exchange (adjusted for payments on account of purchase price of securities issued) at noon on the day before announcement by the Treasury.

4/ Additional issue.

PUBLIC DEBT OPERATIONS

Footnotes to Table 7

Source: Daily Treasury statement; Bureau of the Public Debt.

1/ Original call and maturity dates are used.

2/ All by investors other than Federal Reserve banks.

2/ Advance refunding offering. Pursuant to the provisions of section 1037 (a) of the Internal Revenue Code of 1954 as added by Public Law 86-346, approved September 22, 1959, the Secretary of the Treasury has declared that no gain or loss shall be recognized for Federal income tax purposes upon the exchange of the eligible outstanding securities solely for the new securities. For tax purposes, therefore, the investor will carry the new securities on his books at the same amount as he had been carrying the eligible securities exchanged. Gain or loss, if any, upon the securities surrendered in exchange will be taken into account upon the disposition or redemption of the new securities. See also Table 5.

4/ Reopening of an earlier issue.

5/ Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 3-7/8% notes offered in the amount of about \$4.0 billion. For detail of offering, see Table 4.

6/ Excess of maturing 5% notes and 3-3/4% notes over allotments of new securities on subscriptions from holders of those notes (see Table 4, footnotes 9 and 10).

7/ Rolled over into a one-year bill (see Table 4).

8/ Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 4% notes offered in the amount of about \$9 1/4 billion. For detail of offering, see Table 4.

9/ Excess of maturing 4-7/8% notes and 3-1/4% notes over allotments of new securities on subscriptions from holders of those notes (see Table 4, footnotes 14 and 15).

10/ Holders of the maturing bonds were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 4% notes offered in the amount of about \$2,170 million. For detail of offering, see Table 4.

11/ Excess of maturing 2-5/8% bonds over allotments of the new security on subscription from holders of those bonds (see Table 4, footnotes 18 and 19).

12/ Tax anticipation issue; for detail of offerings beginning 1965, see Table 4; for amounts redeemed for taxes and for cash see "Note" below.

13/ Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the \$9,700 million offering of 4-1/4% notes. For detail of offering, see Table 4.

14/ Excess of maturing 3-1/2% notes and 4% notes over allotments of new

securities on subscriptions from holders of those notes (see Table 4, footnotes 23 and 24).

15/ Rolled over into 9-month and one-year bills under new program beginning September 30, 1966 (see Table 4).

16/ Holders of the maturing bonds, notes and certificates were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 5-5/8% notes offered in the amount of about \$2,500 million or the 5-3/8% notes offered in the amount of about \$1,600 million. For detail of offering, see Table 4.

17/ Excess of maturing 3-3/8% bonds, 4% notes and 4-3/4% certificates over allotments of new securities on subscription from holders of those bonds, notes and certificates (see Table 4, footnotes 30 and 31).

18/ Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 4-3/4% notes of Series B-1968 offered in the amount of about \$5,500 million or the 4-3/4% note of Series A-1972 offered in the amount of about \$2,000 million. For detail of offering, see Table 4.

19/ Excess of maturing 3-5/8% notes and 4% notes over allotments of new securities on subscription from holders of those notes (see Table 4, footnotes 36 and 37).

Source: Daily Treasury statement; Office of Debt Analysis in the Office of the Secretary.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

^{1/} Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table 3.

^{2/} Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.

^{3/} Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the

method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.

^{4/} Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.

^{5/} Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.

^{6/} Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.

^{7/} Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.

^{8/} Includes exchanges of Series 1950 F and G bonds for 3-7/8% marketable bonds of 1968.

^{9/} Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.

^{10/} Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

Source: Daily Treasury statement for total amounts outstanding; reports from agencies and trust funds for securities held by U.S. Government investment accounts; and reports from Federal Reserve System for securities held by Federal Reserve banks.

1/ Includes certain debt not subject to statutory limitation. For amounts subject to limitation, see page 1.

2/ Includes accounts under the control of certain U.S. Government agencies

whose investments are handled outside the Treasury.

3/ The total amount of interest-bearing securities held by private investors is calculated by deducting from the total amount outstanding the amount held by U.S. Government investment accounts and Federal Reserve banks.

4/ Consists of guaranteed securities held outside the Treasury. All are public marketable issues.

TREASURY SURVEY OF OWNERSHIP, MAY 31, 1967

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for corporations and

savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

1/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrence are the latest dates.

2/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.

3/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aaa corporate bonds.

1/ Series includes bonds on which the interest income is subject to

normal tax and surtax which are neither due nor callable before a given number of years as follows: April 1953 to date, 10 years; April 1952 - March 1953, 12 years; October 1941 - March 1952, 15 years. For bonds currently in the series, see Table 4 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.

2/ One or more new long-term bonds added to the average (see footnote 1).
3/ An existing bond dropped from the average (see footnote 1).

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on United States reserve assets and liabilities and other statistics related to the United States balance of payments and international financial position. A number of changes were introduced in the May 1967 Bulletin to increase the usefulness of this section.

Table 1 has been revised to include in the reserve assets of the United States its reserve position in the International Monetary Fund. In accordance with Fund policies the United States has the right to draw foreign currencies equivalent to this amount virtually automatically if needed. (Under appropriate conditions the United States could draw additional amounts equal to the United States quota of \$5,160 million.) This revised presentation corresponds to the treatment of United States monetary reserves in the United States balance of payments accounts.

Table 2 brings together the various statistical components of the liabilities which enter into the United States balance of payments calculated on the liquidity basis. The inclusion of the United States reserve position in the International Monetary Fund in Table 1 requires that the "holdings of

dollars" of the Fund be excluded from the data on liabilities to foreigners, in order to avoid double counting. For further explanation of this change in the liabilities statistics, see headnote to "Capital Movements" section.

Table 3 (formerly Table 5), presenting an area breakdown of United States liquid liabilities to official institutions of foreign countries, has been revised to include holdings of convertible nonmarketable United States Government securities with an original maturity of more than one year.

Table 4 (formerly Table 2) is virtually unchanged and shows United States Treasury nonmarketable bonds and notes issued to official institutions of foreign countries.

Table 5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table 6 (formerly Table 3) presents United States net monetary gold transactions with foreign countries and international and regional organizations. The former Table 4, which presented the estimated gold reserves and dollar holdings of foreign countries and international institutions, was discontinued in the May 1967 Bulletin.

1/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, and gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases. For corresponding liabilities see Table 2.

2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. See "Account of the Treasurer of the United States," Table 4.

3/ Includes holdings of Treasury and Federal Reserve System.

4/ In accordance with Fund policies the United States has the right to draw foreign currencies equivalent to its reserve position in the Fund virtually automatically if needed. Under appropriate conditions the United States could draw additional amounts equal to the United States quota. See Table 5.

5/ Reserve position includes, and gold stock excludes, \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

Note: Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States. Data correspond to statistics following in this section and in the "Capital Movements" section, except for minor rounding differences. Table excludes International Monetary Fund "holdings of dollars," and holdings of U.S. Treasury letters of credit and nonnegotiable, non-interest-bearing special U.S. notes held by other international and regional organizations. The liabilities figures are used by the Department of Commerce in the statistics measuring the balance of international payments of the United States on the liquidity basis; however, the balance-of-payments statistics include certain adjustments to Treasury data prior to 1963 and some rounding differences, and may differ because of varying timing in incorporating revisions of Treasury data. The table does not include certain nonliquid liabilities to foreign official institutions which enter into the calculation of the official reserve transactions balance by the Department of Commerce.

1/ Represents liability on gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases.

2/ U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets.

Upon termination of investment, the same quantity of gold can be reacquired by the International Monetary Fund.

3/ Includes Bank for International Settlements and European Fund.

4/ Derived by applying reported transactions to benchmark data; breakdown of transactions by type of holder estimated 1960-1963. Includes securities issued by corporations and other agencies of the United States Government, which are guaranteed by the United States.

5/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank.

6/ Includes difference between cost value and face value of securities in IMF gold investment account. Liabilities data reported to the Treasury include the face value of these securities, but in this table the cost value of the securities is included under "Gold investment." The difference, which amounted to \$32 million as of the end of 1966, is included in this column.

7/ Includes total foreign holdings of U.S. Government bonds and notes, for which breakdown by type of holder is not available.

8/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

Note: The initial U.S. quota in the International Monetary Fund was \$2,750 million. The U.S. quota was increased to \$4,125 million in 1959, and to \$5,160 million in February 1966. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 percent in gold and 75 percent in dollars.

1/ Represents net Fund sales of gold to acquire U.S. dollars for use in Fund operations. Does not include transactions in gold relating to gold deposit or gold investment (see Table 2).

2/ Represents purchases from the Fund of currencies of other members for equivalent amounts of dollars. The United States has a commitment to repay drawings within 3-5 years, but only to the extent that the Fund's holdings of dollars exceed 75 percent of the U.S. quota. Drawings of dollars by other countries reduce the U.S. commitment to repay by an equivalent amount.

2/ Represents the United States gold tranche position in the Fund (the United States quota minus the Fund's holdings of dollars), which is the amount that the United States could draw in foreign currencies virtually automatically if needed. Under appropriate conditions, the United States could draw additional amounts equal to the United States quota.

4/ Represents \$600 million IMF gold sale to United States (1957), less \$6 million gold purchase by IMF from another member with U.S. dollars (1948).

5/ Includes \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

CAPITAL MOVEMENTSBackground

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is published monthly in the "Treasury Bulletin." Reports by banks, bankers, securities brokers and dealers, and nonbanking business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision became effective with reports covering data as of May 31, 1963.^{1/} A detailed description of the content of the statistics, including the changes instituted in 1963, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," "Latin American regional," or "Asian regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all

types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude U.S. Treasury letters of credit, and nonnegotiable, noninterest-bearing special notes of the United States held by the Inter-American Development Bank and the International Development Association.

Beginning with the May 1967 Bulletin, data on short-term liabilities to foreigners have been revised to exclude the holdings of dollars of the International Monetary Fund derived from payments of the United States subscription and from the exchange transactions and other operations of the Fund. (Liabilities representing the "gold investment" of the Fund continue to be included.) This change in the treatment of the Fund's "holdings of dollars" is related to the revision of the table on United States monetary reserve assets (see "International Financial Statistics" section, Table 1) to include the United States reserve position in the International Monetary Fund.

The Fund's "holdings of dollars" do not represent United States liabilities to foreigners in the same sense as do other reported liabilities to foreigners. They are more accurately viewed as contingent liabilities, since they represent essentially the amount of dollars available for drawings from the Fund by other member countries. Changes in these holdings (arising from United States drawings and repayments of foreign currencies, from drawings and repayments of dollars by other countries, and from other dollar operations of the Fund) give rise to equal and opposite changes in the United States gold tranche position in the Fund, which in the absence of United States lending to the Fund, is equal to the United States reserve position. Since the reserve position is included in United States reserve assets, it is necessary, in order to avoid double-counting, to exclude the Fund's "holdings of dollars" from United States liabilities to foreigners. This revised presentation conforms to the treatment of these items in the United States balance of payments and the international investment position of the United States.

The data on securities transactions and on foreign holdings of U.S. Government bonds and notes exclude non-marketable U.S. Treasury notes, foreign series, and non-marketable U.S. Treasury bonds and notes, foreign currency series (see "International Financial Statistics" section, Table 4).

Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Beginning with the May 1967 Bulletin, publication of the former Section I, Table 1, "Net Movements of Banking Funds and Transactions in Long-Term Securities with Foreigners" was discontinued. Due to numerous breaks in the statistical series, the usefulness of this table had become increasingly limited in recent years. Time series of the significant categories of data reported on the Treasury Foreign Exchange Forms, from which this table was derived, are available elsewhere in this section.

Section IV presents supplementary data which are reported less frequently than monthly but which are published monthly.

^{1/} Copies of the reporting forms and instructions may be obtained from the Office of Balance of Payments Programs, Operations and Statistics, Office of the Assistant Secretary for International Affairs, Treasury Department, Washington, D.C. 20220 or from Federal Reserve Banks.

1/ For exclusions see headnote on page 78.

2/ Date exclude the "holdings of dollars" of the International Monetary Fund. For explanation see headnote on page 78.

3/ Included with "Other foreigners."

4/ Included with "Other claims."

5/ Beginning in August 1956 and also in April 1957, certain accounts previously classified as "Foreign banks" are included with "Official institutions."

6/ Differs from 1961 end of year data on the preceding line by inclusion of liabilities and claims reported by a number of banks included in the series beginning December 31, 1961.

7/ Includes reported liabilities to foreign official institutions beginning October 1961. Figures for selected dates are as follows:
end 1961, \$46.3 million; end 1962, \$47.9 million; end 1963, \$30.1 million; end June 1966, \$367.2 million; end September 1966, \$517.7 million; end December 1966, \$516.5 million; end March 1967, \$444.2 million; end May 1967, \$454.0 million.

8/ Includes claims previously held but first reported as of May 31, 1963; as of that date such claims amounted to \$85.6 million. Also includes claims amounting to \$193.2 million reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported.

2/ Short-term liabilities include a net increase of \$50.8 million arising from changes in reporting coverage, distributed as follows: "Official institutions" -\$40.0 million, "Foreign banks" +\$60.3 million, "Other foreigners" +\$22.5 million, and "Payable in foreign currencies" -\$27.9 million.

10/ Data on claims below the line differ from claims above the line because of the exclusion as of December 31, 1964 of \$58.1 million of short-term U.S. Government claims previously included; and because of the addition of \$545.9 million of short-term claims and \$313.3 million of long-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.

11/ Data on claims below the line differ from claims above the line because of the addition of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 31, 1965, and short-term claims reported by banks reporting for the first time.

12/ See footnote 13.

13/ Data on liabilities and claims below the line differ from data above the line because of changes in reporting coverage and classification effective December 31, 1966.

1/ Excludes convertible foreign currencies held by U.S. monetary authorities.

2/ The second column for 1965 differs from data in preceding column because of the addition of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 31, 1965, and short-term claims reported by banks reporting

for the first time.

3/ Data in the first column are comparable in coverage and classification to data for previous date, and do not reflect changes in reporting arrangements effective December 31, 1966. Data in the second column reflect changes in reporting arrangements effective December 31, 1966.

1/ The second column for 1964 differs from data in preceding column because of the addition of \$313.3 million of long-term claims arising from the inclusion of claims previously held but first reported

as of December 31, 1964, and from revisions of preliminary figures.

* Less than \$50,000.

1/ Reported by banks in all Federal Reserve Districts.

2/ Through April 1965, Singapore included with Malaysia.

3/ Data exclude \$12,372 thousand resulting from changes in reporting coverage and classification.

4/ Through December 1964, data for Malawi (formerly Nyasaland) and Zambia (formerly Northern Rhodesia) included with Southern Rhodesia.

n.a. Not available.

Note: Through 1962, except as noted, data are based on reports from banks in the Second (New York) Federal Reserve District only, and include funds held in an account with the U.S. Treasury; subsequent data are as reported by banks in all Federal Reserve Districts. They represent a partial breakdown of the amounts shown for the corresponding dates for the "Other" categories in the regular monthly series in the "Treasury Bulletin."
