## Sales Patterns for Sixth War Loan and Sales Reported Through December 7

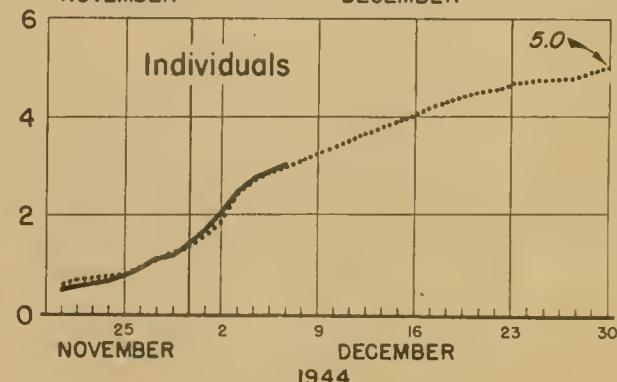

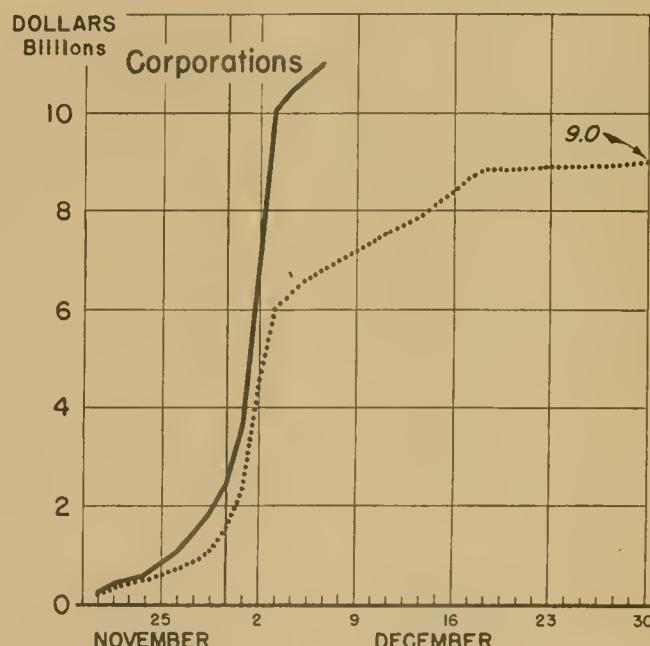

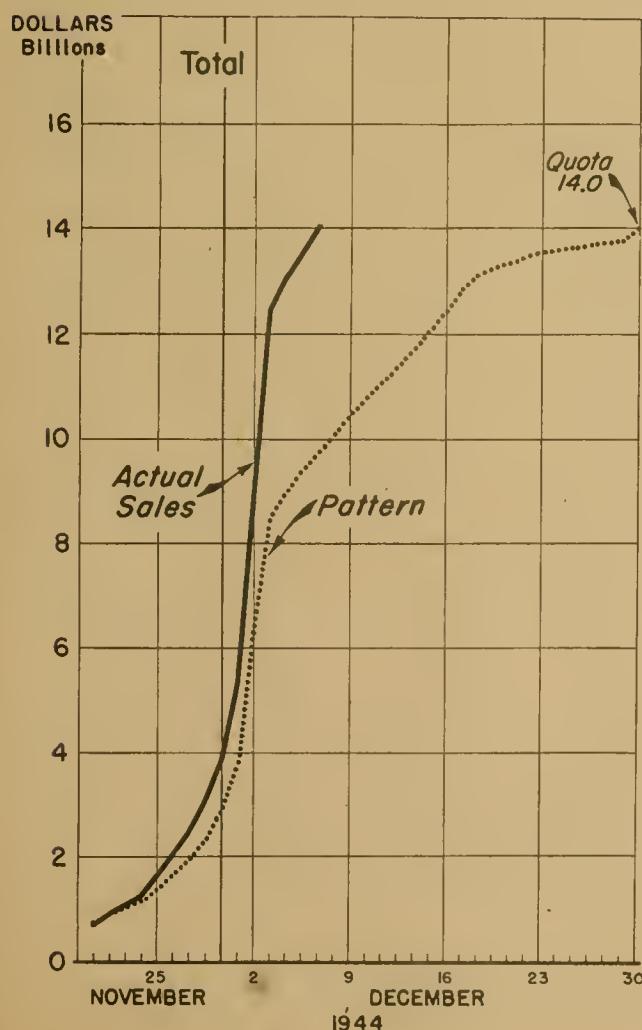

Sales of securities in the Sixth War Loan reached the national quota of \$14.0 billions on December 7 and exceeded it by \$0.1 billions. Indications are that final sales will be well in excess of the goal. This preliminary report reviews sales progress through December 7.

The following chart compares day by day sales through December 7 with anticipated sales patterns for (1) total sales, (2) sales to corporations, and (3) sales to individuals. The sales patterns, which are designated by broken lines on the chart, were developed to indicate the levels it was believed cumulative sales would have to

reach each day in order to achieve the quotas. These patterns are based on experience in previous war loans and take into account the time factors which differ from drive to drive, such as the dating of the marketable securities, the length of the counting period before the formal opening of the drive, and the length of the counting period after the sale of marketable issues has been completed. The experience in earlier loans is woven together to form the pattern or "beam" for the Sixth War Loan.

As indicated on the chart, total sales through December 7 were far in advance of the

### ACTUAL SALES IN 6<sup>TH</sup> WAR LOAN COMPARED WITH EXPECTED SALES PATTERN CUMULATIVE

sales pattern, having already exceeded the quota for the entire War Loan. Corporation purchases were substantially ahead of the pattern, having passed their total quota by \$2.0 billions. Purchases by individuals had followed the sales pattern closely and, as of December 7, amounted to \$3.0 billions or 60% of their total quota.

These figures show that the War Loan was going well through December 7 and indicate that the over-all quota will be surpassed by a substantial margin. The exact amount of oversubscription will not be known, of course, until final results are in. The sales patterns are only approximations prepared for the purpose of evaluating the progress of the War Loan and not

as a forecast of how much final sales will be.

Final figures on sales in the Sixth War Loan will be available early in January. While the formal period of the drive extends from November 20 to December 16, sales of savings bonds and savings notes processed by the Federal Reserve Banks and by the Treasury Department during the entire months of November and December will be credited to the drive to enable millions of persons to participate through the purchase of bonds by weekly or semi-monthly deductions from their pay during this period. The January issue of the "Treasury Bulletin" will present the final sales figures.

## Comparison of Excise Taxes in the United States, Canada, and United Kingdom

A comparison of the excise taxes imposed by the central governments in the United Kingdom, Canada, and the United States was recently published in a Treasury tax study entitled "Excise Taxes: United States, Canada and United Kingdom". The following table summarizes information on comparative rates of tax for the principal excises reviewed in the study. The table does not include excises which are levied in only one of the three countries.

The study undertakes to show, in so far as possible, the relative tax rates on the taxed articles and services in the respective countries. Considerable attention is also devoted to showing the differences and similarities of the taxbases. The taxes compared are the Federal excise taxes of the United States, the duties of excise and some of the customs duties of the United Kingdom, and the Canadian duties of excise assessed under The Excise Act, 1934 and its amendments, as well as the excise taxes and retail purchase tax levied under the Special War Revenue Act. Excluded from the comparison are State excises and sales taxes in the United States, Provincial sales and excise taxes in Canada, the Canadian federal manufacturers' sales tax of 8%, and the British Purchase Tax. 1/

While no consideration is given to the United States or Canadian customs duties on articles subject to excises, it is necessary to refer to the British customs duties where articles subject to excises are wholly or largely imported. In the United States and Canada, excise taxes or excise duties are imposed on both domestically

produced and imported articles, and customs duties in virtually all cases represent an additional levy upon the imported articles.

Where not expressed as a percentage of selling price, the taxes are shown in terms of dollars per taxable unit. For this purpose British taxes have been converted to dollars. It should be noted, however, that conversion does not give a completely accurate picture of the comparative level of the taxes because of differences in internal prices in the two countries and wartime controls over exchange rates. Since conversion to United States currency would not make a major difference in the comparison with Canada, Canadian duties are, as a matter of convenience, expressed in Canadian currency.

In addition to problems of customs duties and currency conversion, there are also other problems of comparability which have precluded exact tax comparisons in every case. For some taxes it has been necessary to present derived rates rather than the actual statutory rates in order to place the taxes on a comparable basis. The actual rate and base of each excise may be determined by consulting the full text of the study. It is believed that the data presented give a reasonably accurate view of the excise tax rates in the three countries.

1/ The rates shown in this table, in many cases, are those which have been derived subsequent to a conversion of the actual excise tax in order to place the taxes on a comparable basis. The actual rate and base of each excise tax may be determined by consulting the full text of the study entitled "Excise Taxes, United States, Canada and United Kingdom". Central government sales taxes, and State or Provincial and local sales and excise taxes are excluded.

2/ Tax rates of United Kingdom converted on basis of £1 to \$4.00. Canadian taxes are in Canadian currency. British and Canadian taxes rounded to nearest 1/2-cent for amounts of less than \$1 and to nearest 1-cent for amounts of \$1 and over. The following units of measurement are used: Imperial or Canadian gal-

lon = 277.418 cubic inches; wine gallon (standard gallon of the United States) = 231 cubic inches; Imperial or Canadian proof gallon = 277.418 cubic inches containing 57.1% of alcohol by volume at 60° F.; United States proof gallon = 231 cubic inches containing 50% of alcohol by volume at 60° F.; British hundredweight = 112 pounds; a wine gallon is equivalent to 0.833 Imperial or Canadian gallon, and a United States proof gallon is equivalent to 0.73 Imperial or Canadian proof gallon.

3/ No excise tax.

4/ Watches retailing for not more than \$65 and alarm clocks retailing for not more than \$5 are subject to a 10% rate.

1/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national

bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance general and special accounts for the purpose of this table.

7/ Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1935 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1935, \$91 millions; 1936, \$397 millions; 1937, \$99 millions; 1938, \$51 millions; and 1939, \$5 millions; total, \$645 millions. r Revised.

1/ Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the

annual interest charge and rate of interest on United States savings bonds, Series A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.53%.

2/ Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

1/ Revised.

\* Less than \$50,000.

1/ At current redemption values except Series G, which is stated at par.

2/ Estimated, except for Series G.

3/ For details concerning investment yields and redemption values, see "Treasury Bulletin" for August 1943, page 4.

4/ Commercial bank purchases were permitted prior to April 1, 1940, and are estimated to have aggregated about \$300 millions.

5/ Not yet available.

6/ Series A-D, sold between March 1935 and April 1941, are 10 year discount bonds sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases were limited to \$7,500 issue price in any calendar year and from April 1, 1940, could be made only by individuals.

7/ Redemptions of Series A-E bonds by eligible banks and trust companies, which commenced in October 1944 (see "Treasury Bulletin" for October 1944, page A-1), have not been wholly classified by series. For purposes of this table it has been necessary to assume that all such redemptions were Series E bonds even though small amounts of Series A-D may have been included. Consequently the amount outstanding of Series E may be slightly understated and Series A-D slightly overstated.

8/ Series E, on sale since May 1, 1941, is a 10 year discount bond sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases are limited to \$3,750 issue price in any

calendar year and may be made only by individuals. Series F and G have been on sale since May 1, 1941. Series F is a 12 year discount bond sold at 74% of maturity value, yielding 2.53% per annum if held to maturity. Series G is a 12 year current income bond, sold at par, bearing interest at the rate of 2-1/2% per annum, redeemable at par on maturity or at stated price less than par before maturity. Purchases of Series F and G combined in any calendar year are limited to \$100,000 issue price (\$50,000 in calendar year 1941) and through December 31, 1943 could be made by any investor except commercial banks. Between January 1 and June 12, 1944 the limit for commercial banks was \$100,000 providing that total holdings of Series F and G bonds, 2-1/4% Treasury bonds of 1956-59 and 2-1/2% Treasury bonds of 1965-70 did not exceed 10% of savings deposits or \$200,000, whichever was less. From June 12, 1944 through November 19, 1944 the limit for commercial banks was \$100,000 providing that total holdings of Series F and G bonds, 2% Treasury bonds of 1952-54, 2-1/4% Treasury bonds of 1955-59, and 2-1/2% Treasury bonds of 1965-70 did not exceed 20% of the combined amount of time certificates of deposit of individuals and non-profit corporations or associations and of savings deposits, or \$400,000, whichever was less. Commencing November 20, 1944, the limit for commercial banks was \$100,000 providing that total holdings of Series F and G bonds, 2% Treasury bonds of 1952-54, and 2-1/2% Treasury bonds of 1966-71 did not exceed 10% of the combined amount of time certificates of deposit of individuals and non-profit corporations or associations and of savings deposits, or \$500,000, whichever was less.

\* Less than \$50,000.

<sup>1/</sup> These notes were originally designed to help taxpayers set aside funds with which to pay taxes and were known as Treasury tax savings notes. Series A notes were designed for the small and moderate taxpayer; Series B and Series C notes were intended for the large taxpayer. When the collection of taxes through withholding at the source commenced, the need for Series A tax savings notes disappeared and their sale was discontinued. Redemption provisions on Series A notes were relaxed to provide for the payment of interest on notes thereafter redeemed for cash (see footnote 3). Sale of Series C notes, which were designed for the investment of idle cash reserves as well as for the accumulation of tax reserves, was continued and the notes were designated Treasury savings notes.

<sup>2/</sup> Includes matured Treasury savings notes.

<sup>3/</sup> Series A notes, which were sold from August 1, 1941 through June 22, 1943, yield approximately 1.92% per annum. Through June 22, 1943, the notes could be redeemed for cash only at the original purchase price; since that date, the notes have been redeemed for cash at

the tax payment value current at the time of presentation. (See also footnote 1.) Prior to October 4, 1943, the maximum amount which could be used in payment of each class of tax (income, estate, or gift) by each taxpayer during each taxable year was limited to \$5,000 per value; this limitation was removed as of that date.

<sup>4/</sup> Series B notes were sold from August 1, 1941 through September 12, 1942, to yield approximately 0.45% per annum. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash only at the original purchase price.

<sup>5/</sup> Series C notes went on sale September 14, 1942. Interest accrues each month on a graduated scale (see "Treasury Bulletin" for August 1943, page 4) to yield approximately 1.07% per annum if held to maturity. These notes may be used in payment of Federal taxes at any time two months after the date of issue. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash six months after the date of issue at the tax payment value current at the time of presentation. Prior to July 27, 1943, notice of 30 days was required for cash redemption. See also footnote 1.

7/ Price history begins May 15, 1944.

8/ Excludes issues completely held by Farm Credit Administration agency.

# YIELDS OF TREASURY SECURITIES OCT. 31, 1944

Basis of Computation: (1) Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Back Figures: For monthly and weekly figures back to January 1933, see "Treasury Bulletin" for April 1944, pages 57-61.
