Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Money." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Combined Statement of Receipts, Expenditures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of check paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions handled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the daily statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

Treasury Financing Operations

Results of the May Refunding

Subscriptions to the optional exchange offering of 3-1/2 percent Treasury certificates of indebtedness, Series B-1958, and 3-5/8 percent Treasury notes, Series A-1962, totaled \$2,998 million, leaving \$1,157 million to be paid in cash. Subscriptions to the 11-1/2-month certificates amounted to \$2,351 million and to the 4-year and 9-1/2-month notes to \$647 million. Of the \$4,155 million of maturing 1-5/8 percent notes, Series B-1957, Federal Reserve Banks and Government investment accounts held \$114 million as of April 30, 1957; and commercial banks held \$1,389 million as of March 31, 1957, as reported in the Treasury Survey of Ownership. Terms of the offering were summarized in the May Bulletin, page A-10.

Marketable Bond Offering Postponed

The Treasury Department announced on May 16, 1957, that decision had been made, in view of market conditions, to postpone indefinitely any offering of marketable bonds to the holders of maturing Series F and G savings bonds.

Offering of 119-Day Tax Anticipation Bills

To raise cash for current requirements, as announced on May 16, 1957, the Treasury Department on May 17 invited tenders on May 22 for \$1.5 billion, or thereabouts, of 119-day Treasury bills. Tax an-

ticipation Series. The bills are dated May 27, 1957, and will mature September 23, 1957. Payment could be made by any qualified depositary by credit in its Treasury tax and loan account for Treasury bills allotted to it for itself and its customers up to the amount for which it was qualified in excess of existing deposits. The bills will be accepted at face value in payment of income and profits taxes due on September 15, 1957, and to the extent they are not presented for this purpose the face amount of the bills will be payable without interest at maturity.

Tenders were accepted in the amount of \$1,501 million at the average rate of discount of 2.825 percent. Noncompetitive tenders for \$300,000 or less aggregating \$399 million were accepted at the average price of accepted competitive bids and are included in the total accepted tenders.

Weekly Treasury Bills Refunded

The five weekly maturities of May bills totaling \$8.7 billion, were refunded by new bills in equivalent amounts. All but the last were 91-day bills. The fifth maturity, a 92-day issue, was refunded by a 90-day issue. The first three issues were for \$1.7 billion each, and the last two for \$1.8 billion each. Average rates of discount on the new issues were 3.039 percent for May 2; 2.909 percent for May 9; 2.895 percent for May 16; 3.122 percent for May 23; and 3.245 percent for May 31.

Note: Details of Treasury market financing operations are shown elsewhere in this issue of the "Treasury Bulletin," in the tables on "Offerings," "Allot-

ments," and "Disposition," respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills."

More detailed information with respect to the figures on this page will be found in succeeding tables.

Source: Actual figures through 1952 are from the daily Treasury statement and thereafter from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the 1958 Budget document, released January 16, 1957, including effects of proposed legislation.

1/ For further detail, see tables under "Internal Revenue Collections." 2/ Breakdown was not made in the daily Treasury statement and the monthly statement for years prior to 1954.

3/ Beginning January 1951, the distribution of receipts between individual income taxes and old-age and disability insurance taxes is made in accordance with provisions of Sec. 201 (e) of the Social Security Act, as amended (H.R. 401 (e)), for transfer to the Federal Old-Age and Survivors Insurance Trust Fund (see footnote 11), and after December 1956 also for transfer to the Federal Disability Insurance Trust Fund (see footnote 12). Income taxes withheld for

June and the fiscal year 1956 have been reduced by \$4 million representing withheld income taxes transferred to the Government of Guam. Taxes on employers and employees under the Federal Insurance Contributions Act, as amended (26 U.S.C. 3101-3125), and, beginning with the taxable year 1951, tax on self-employed individuals under the Self-Employment Contributions Act, as amended (26 U.S.C. 1401-1403). The Social Security Act Amendments of 1956, approved August 1, 1956 (70 Stat. 807-856) increased the rates of tax, applicable to wages paid and taxable years beginning after December 31, 1956, to provide for disability insurance (see footnote 12).

4/ Tax on carriers and their employees under the Railroad Retirement Tax Act, as amended (26 U.S.C. 3201-3233).

5/ Tax on employers of 4 or more under the Federal Unemployment Tax Act, as amended (26 U.S.C. 3301-3308); with respect to services performed before January 1, 1956, the tax was imposed on employers of 8 or more. Remaining footnotes on page 5.

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the 1958 Budget document, released January 16, 1957, including effects of proposed legislation.

Note: Figures in this table are for agencies as constituted at the time the expenditures were made, and therefore do not necessarily represent functions which are comparable over a period of time. For expenditures by functions on a consistent basis, see Table 3.

Expenditures for Reconstruction Finance Corporation are included under "Independent offices" through 1954, and under "Treasury Department, other" thereafter.

Expenditures for Federal Home Loan Bank Board are included under "Housing and Home Finance Agency" through 1955, and under "Independent offices" thereafter.

Expenditures of \$1 million in 1956 from prior year appropriations to the Commerce Department for the Ramo Road are included under that Department in this table, while the 1958 Budget document includes them under State Department in combination with expenditures from the 1956 appropriation for the same purpose.

Total includes allowance for contingencies amounting to \$200 million in 1957 and \$400 million in 1958.

Beginning with 1957, Federal aid for highways is excluded from

budget expenditures and included in trust account expenditures (see Table 1, footnote 14). Payments made initially from budget accounts in the early months of 1957 had been fully reimbursed from the trust fund (netted against other expenditures) by the end of November.

6/ Expenditures for Alaska road construction are included under Interior Department through 1956 and under Commerce Department beginning 1957. December figures include 1957 adjustment for this transfer.

7/ Effective January 1, 1957, the production credit corporations were merged in the Federal intermediate credit banks, pursuant to the Farm Credit Act of 1956, approved July 26, 1956 (70 Stat. 659). Thereafter operations of the banks (as mixed-ownership corporations) are classified as trust enterprise funds and are included net in trust account expenditures; previously the operations of the banks and the corporations, respectively, were classified as public enterprise funds and were included net in budget expenditures. Adjustments for this change in classification are incorporated in the January figures.

8/ Current year totals include unclassified expenditure transfers.

9/ Effective June 30, 1955, interest on the public debt is reported on an accrual basis.

10/ Consists of Federal payment and loans and advances.

Source: Figures for 1953-56 are from the 1958 Budget of the United States Government, Special Analysis L; figures for 1957 are based on reports submitted by Government disbursing officers and are classified by individual appropriation items. Expenditures are net of receipts of public enterprise funds.

1/ See footnote 4.

2/ Expenditures for 1957 include those made from "Readjustment Benefits, Veterans Administration," applicable to functional classification 102, "Other Veterans readjustment benefits," the separate amounts of which cannot be readily determined.

3/ See footnote 2.

Footnotes to Table 1.- (Continued)

Footnotes 1 through 6 follow Table 1.

1/ Through 1953, contributions to the Railroad Unemployment Insurance Administration Fund were carried in the daily Treasury statement as miscellaneous receipts, while the 1958 Budget document, Special Analysis L, includes them in employment taxes through 1952. Beginning 1954 the contributions are credited direct to the trust account. For amounts of the contributions included in budget receipts, see "Treasury Bulletin" for February 1954, page 7.

2/ In the 1958 Budget document, Special Analysis L, internal revenue taxes not otherwise classified are included in miscellaneous receipts.

3/ Adjustments have been made pursuant to Sec. 201 (e) of the Social Security Act, as amended (42 U.S.C. 401 (a)), as follows: For the fiscal year 1955, transfers were reduced by \$300 million as an adjustment for excess transfers to the trust fund of \$90 million in 1952 and \$210 million in 1953; for the fiscal year 1956, individual income taxes withheld were increased by \$249 million representing adjustments to correct estimates for the quarter ended June 30, 1955, and prior quarters by \$149 million and for the quarter ended September 30, 1955, by \$100 million; individual income taxee not withheld were reduced by \$4 million representing adjustment to correct estimates for 1953 and prior calendar years, and the old-age insurance taxes and the transfers to the trust fund were reduced by the net of these adjustments or \$246 million; for October, individual income taxes withheld were increased by \$136 million representing adjustments to correct estimates for the quarter ended December 31, 1955, and prior quarters, individual income taxes not withheld were reduced by \$1 million representing adjustment to correct estimates for 1954 and prior calendar years, and the old-age insurance taxes and the transfers to the trust fund were reduced by the net or \$134 million.

4/ Beginning with the fiscal year 1957, specified percentages of certain excise tax receipts are transferred to the Highway Trust Fund. Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance (42 U.S.C. 401 (a)). The Social Security Act Amendments of 1950, approved August 28, 1950 (64 Stat. 477), changed in certain respects the basis of transferring the appropriated funds to the trust fund. Beginning January 1951, the amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury pursuant to the provisions of Sec. 201 (a) of the act as amended, and are adjusted in later trans-

fers for shift of Federal intermediate credit banks from budget to trust account classification effective January 1957, see Table 2, footnote 7.

5/ Excludes Federal-aid highway expenditures, which are made from the Highway Trust Fund beginning with 1957 (see Table 1, footnote 14); corresponding expenditures for previous years are included in budget expenditures.

6/ See footnote 10.

7/ See footnote 13.

8/ Expenditures for 1957 include those for community facilities - grants, loans, and advances applicable to functional classification 515, "Community development and facilities"; and loans for Alaska and prefabricated housing applicable to functional classification 517, "Other aids to housing." These expenditures were made from "Revolving Fund, Liquidating Programs, Office of the Administrator, Housing and Home Finance Agency" and the separate amounts cannot be readily determined.

9/ See Footnote 5.

10/ Expenditures for 1957 include those for disaster loans and relief made from "Revolving Fund, Small Business Administration" applicable to functional classification 521, "Disaster insurance, loans and relief," the separate amounts of which cannot be readily determined.

11/ Expenditures for 1957 include those for lending program -- public agencies, made from "Reconstruction Finance Corporation Liquidation, Treasury" and applicable to functional classification 515, "Community development and facilities," the separate amounts of which cannot be readily determined.

12/ See footnote 12.

Footnotes to Table 1.- (Continued)

Footnotes 1 through 6 follow Table 1.

1/ Through 1953, contributions to the Railroad Unemployment Insurance Administration Fund were carried in the daily Treasury statement as miscellaneous receipts, while the 1958 Budget document, Special Analysis L, includes them in employment taxes through 1952. Beginning 1954 the contributions are credited direct to the trust account. For amounts of the contributions included in budget receipts, see "Treasury Bulletin" for February 1954, page 7.

2/ The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 (70 Stat. 820). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.

3/ Excludes the Government's contribution for creditable military service (45 U.S.C. 228c-1 (a)). Beginning 1952, amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscal year (65 Stat. 222 and 66 Stat. 371), and transfers are made currently. Previously, annual appropriations were based, in effect, on estimated tax collections, with any necessary adjustments made in succeeding appropriations.

4/ The Highway Revenue Act of 1956 (Title II of Public Law 627, 84th Congress, approved June 29, 1956) established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expenditures after June 30, 1956, and before July 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided (Sec. 209 (c)(3)) that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. Previous to the fiscal year 1957 corresponding excise tax receipts were included in budget receipts, and Federal-aid highway expenditures were included in budget expenditures.

5/ Interest on refunds is included in expenditures in Table 2. Reimbursement by Federal Old-Age and Survivors Insurance Trust Fund for refunds of taxes for the fiscal year (see footnote 11) is offset against internal revenue refunds for the month in which the reimbursement is made.

6/ Net of reimbursement of \$54 million from the Federal Old-Age and Survivors Insurance Trust Fund (see footnote 15).

* Less than \$500,000.

1/ Beginning 1955 excludes net transactions of Government-sponsored enterprises (see Table 3).

2/ Total includes sales of \$10 million by the Tennessee Valley Authority, under proposed legislation.

3/ Beginning January 1957, Federal intermediate credit banks are classified as trust enterprise funds instead of public enterprise funds as before

(see "Budget Receipts and Expenditures," Table 2, footnote 7). Adjustments for this change in classification are incorporated in the January figures.

4/ Management and liquidation program.

5/ Secondary market operations.

6/ Net redemption, or sales (-), by Government-sponsored enterprises beginning 1955 is included in deposit fund expenditures in Table 3.

CASH INCOME AND OUTGO

The cash income and outgo data appearing in the "Treasury Bulletin," beginning with the February 1956 issue, are on a basis consistent with receipts from and payments to the public as derived in the 1957 and subsequent Budgets of the United States, Special Analysis A. Reconciliation to cash deposits and withdrawals in the account of the Treasurer of the United States is shown on the same basis as in the Budget documents. There is also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget classifications are made available month by month. Figures for back years have been revised where necessary in order to make them as nearly comparable with the Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in earlier Budget documents as well as in the Bulletin.

The Budget series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's account. Receipts and payments include transactions both in budget accounts and in trust and deposit fund accounts. Operations of Government-sponsored enterprises are included in payments on a net basis as reflected in Treasury reports. Major intragovernmental transactions which are reported as both expenditures and receipts are eliminated from both. Noncash items which represent accrued obligations of the Government to make payments in the future are also eliminated from expenditures but are added later when actual payments are made. Receipts from the exercise of monetary authority (mostly seigniorage on silver) are excluded as not

representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Cash transactions through the Treasurer's account are similar in general concept to those included in the Budget series, but are limited in coverage to transactions which affect the balance in that account. On the other hand, they include receipts from the exercise of monetary authority, which are excluded from receipts from the public in the Budget series.

Beginning with figures for the fiscal year 1953, the series of transactions with the public is based on the "Monthly Statement of Receipts and Expenditures of the United States Government," which is compiled from reports by all collecting and disbursing officers and includes those transactions not cleared through the Treasurer's account. Cash deposits and withdrawals in the Treasurer's account, beginning with the figures for the same year, are reported in daily Treasury statements. For those years prior to 1953 both cash transactions series are based on a single source, namely, the earlier basis of daily Treasury statements which reported separate classifications for budget results, trust account transactions, etc.

1/ Excludes guaranteed securities held by the Treasury.

2/ Total includes "Other bonds"; see Table 2.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ The annual interest charge and annual interest rate on United States savings bonds are computed on the basis of the rate to maturity applied against the amount outstanding.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date. The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed

1/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities. For

data of issue of each security, see "Market Quotations"; for tax status, see "Treasury Survey of Ownership."

2/ Not called for redemption on March 15, 1957. Callable on four months' notice on September 15, 1957, succeeding interest payment date.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between March 1935 and the end of April 1941, and Series E, F, and G were first offered in May 1941. When Series E began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redeem the bonds in cash in accordance with the original terms; to retain them with an extended maturity of 10 years at specified rates of interest accrual; or to exchange them for Series G bonds. A number of changes became effective May 1, 1952. The principal ones were: The rate of interest accrual on Series E was increased, especially for the near term, with corresponding changes in extended Series E; and Series F and G were replaced by two new issues, Series J and K, also at higher interest rates. A new current-income bond, Series H, similar in interest return to Series E, was offered beginning June 1. Details

of these changes appear in the May 1952 Bulletin, page A-1. Series F and G began to mature on May 1, 1953. For the exchange offering made to holders of these bonds maturing through December 31, 1953, see the May 1953 issue, page A-1. Sales of Series J and K were discontinued after April 30, 1957. An increase in interest rates on Series E and H was announced on April 20, 1957, retroactive to February 1. Details of the changes appear in the May 1957 Bulletin, page A-1. In the tables which follow, Series A-F and J sales are included at issue price and total redemptions and amounts outstanding at current redemption values. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured F and G bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

Source: Daily Treasury statement.

1/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the "Treasury Bulletin."

2/ Includes exchanges of matured Series E bonds for Series G bonds beginning May 1951 and for Series K bonds beginning May 1952.

3/ Sales of Series J and K were discontinued at the close of business on April 30, 1957.

4/ Includes both matured and unmatured bonds; see Table 4.

5/ Includes total value of redemptions not yet classified between matured and unmatured bonds.

6/ A change in procedure, beginning in June 1954, for processing redeemed savings bonds has resulted in a high level of redemptions not yet classified between matured and unmatured bonds. This increase temporarily obscures the relationship between the redemption columns showing sales price and accrued discount in Tables 2 through 4 and also the relationship between the matured and unmatured sections of Table 4.

(See also footnote 5). The subsequent distribution of this high level of unclassified redemptions may be large enough in any month to show redemptions of matured bonds for a series in Table 4 which are greater than the total redemptions of that series as shown in Table 3, and to show a negative in the unmatured section of Table 4.

7/ Reductions were made in issues and redemptions of Series E, H, F, J, and K in July 1954 to compensate for the erroneous inclusion of reissue transactions in June 1954 as reported in the daily Treasury statement. The amounts involved were as follows: \$18 million for issues of Series E and H and \$17 million for issues of Series F, G, J, and K; and \$35 million for unclassified retirements.

8/ Sales began June 1, 1952.

9/ Comparable data are not available prior to January 1950.

10/ Includes exchanges of Series 1941 F and G savings bonds for Treasury 3-1/4% bonds of 1978-83.

* Less than \$500,000.

1/ Includes certain obligations not subject to statutory debt limitation. For amount subject to limitation, see page 1.

2/ Excludes trust departments.

3/ Includes trust companies and, beginning with figures for July 1949, also includes stock savings banks. Previously, these banks were reported as a separate classification.

4/ Includes those banks and insurance companies not reporting in the Treasury Survey.

5/ Consists of corporate pension trust funds and profit sharing plans which involve retirement benefits. The data are compiled from quarterly reports by trustees of funds which account for an estimated three-fourths of United States Government securities held by all corporate pension trust funds. Since the data are not available each month, the regular monthly Survey includes holdings by these funds under "Held by all other investors." The quarterly data are presented as supplemental information in a memorandum column accompanying the Survey for each reporting date, beginning with December 31, 1953. The corresponding information from earlier reports, beginning with December 31, 1949, is summarized on page 30 of the March 1954 "Treasury Bulletin."

6/ United States savings bonds, Series E, F, and J, are shown at current redemption value. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption value for use in this statement.

7/ Includes \$77 million depositary bonds held by commercial banks not included in the Treasury Survey.

8/ Holdings by reporting investors not available.

9/ Excludes guaranteed securities held by the Treasury.

10/ Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly" tax-exempt securities are those with the income exempt from both normal tax and surtax. "Partially" tax-exempt securities are those with the income exempt from the normal tax except that in the case of partially tax-exempt Treasury bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to normal tax and surtax.

11/ Includes Federal Housing Administration debentures; see footnote 13.

12/ Tax anticipation series.

13/ A small indeterminate amount of these debentures is partially tax-exempt.

14/ Includes only publicly offered issues.

15/ Central Bank for Cooperatives debentures.

16/ The proprietary interest of the United States in these banks ended in July 1951.

17/ The proprietary interest of the United States in these banks ended in June 1947.

* Less than \$500,000.

Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aaa corporate bonds. For definition of taxable bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin."

1/ Prior to April 1953, the single series on long-term taxable Treasury bonds included the following: April 1952 through March 1953, bonds neither due nor callable for 12 years; October 1941 through March 1952, bonds neither due nor callable for 15 years.

2/ The long-term taxable Treasury bond average was revised beginning April 1, 1952; see footnote 1. The old average for April 1952 was 2.52 percent.

3/ Annual average is based on the single long-term series January through March (see footnote 1) and the 10-20 year series thereafter.

4/ Average covers 8-1/2 months beginning April 15, the inception date of this series.

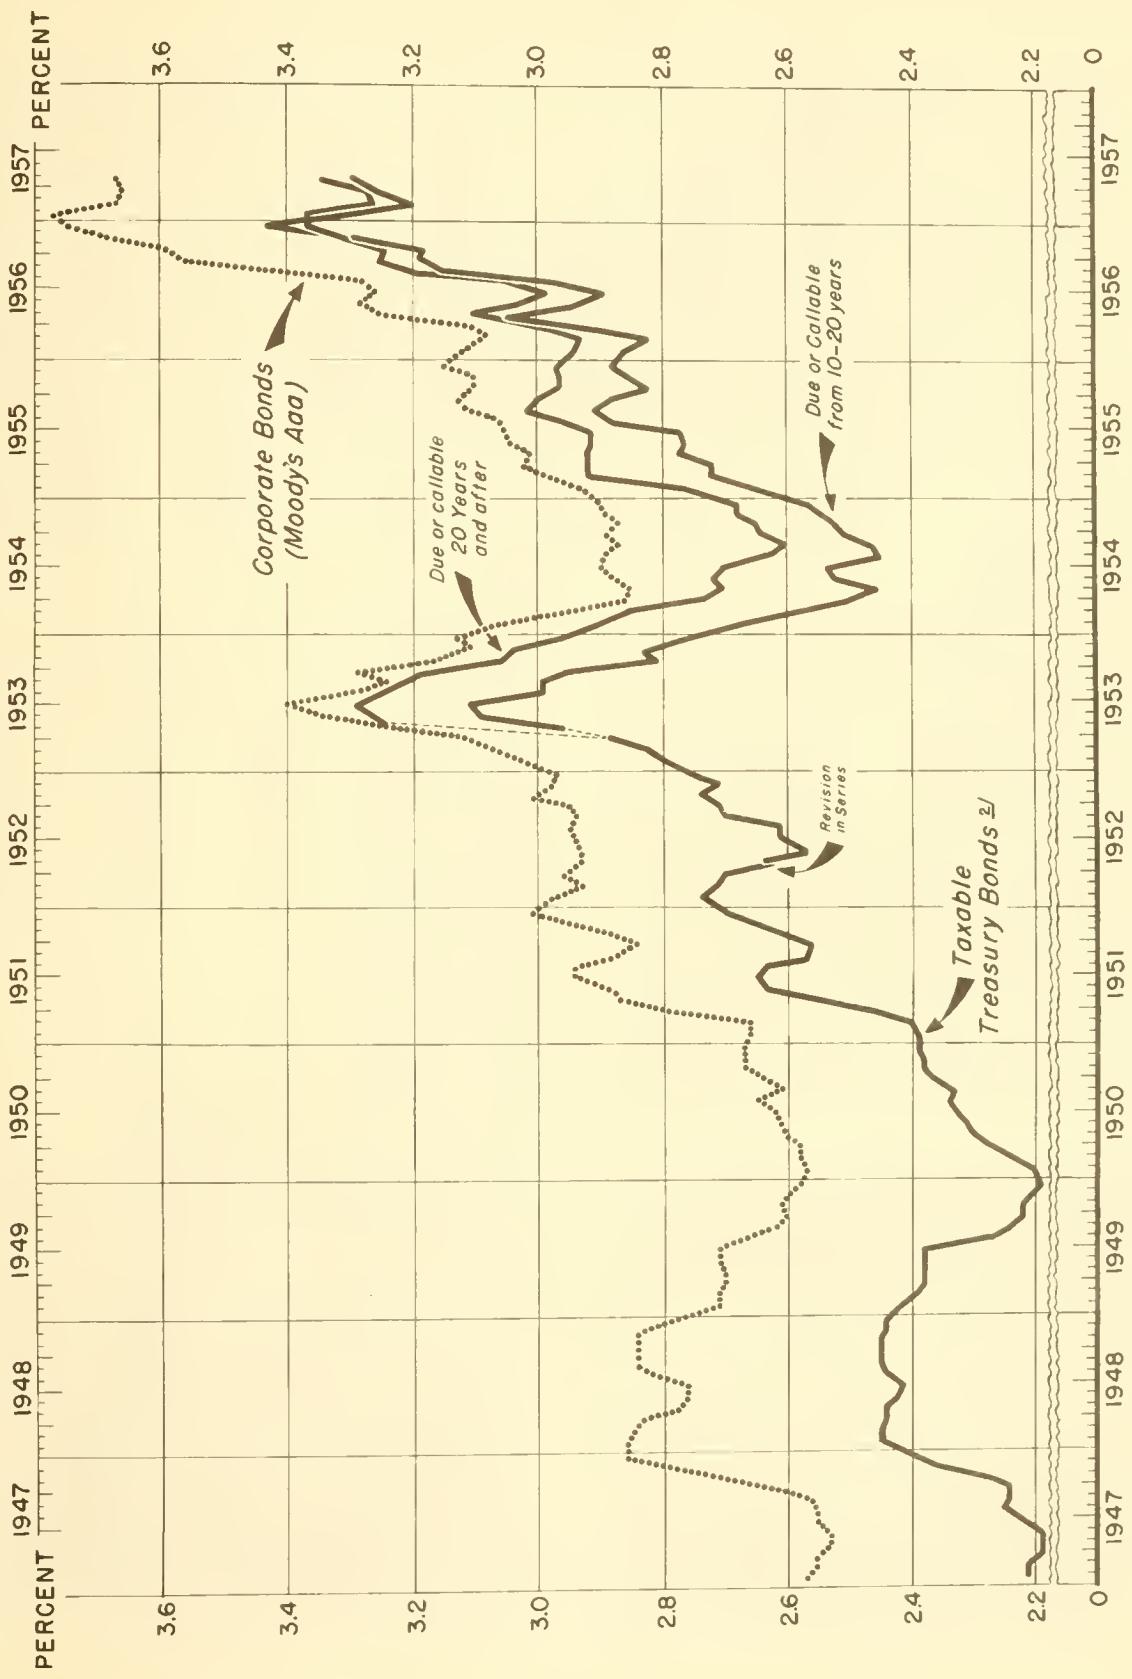

5/ Includes the 3% bonds of February 15, 1955, first quoted on January 28, 1955.

Source: Internal Revenue Service reports for detail of collections by type of tax; daily Treasury statement for budget receipts from internal revenue through the fiscal year 1952, and the monthly statement of receipts and expenditures of the Government for receipts thereafter (for explanation of reporting bases in these publications, see page II). Certain detail by type of tax is available only from returns filed with the Internal Revenue Service. The figures shown include collections for credit to special accounts for certain island possessions, as reported by the Internal Revenue Service. Beginning with the fiscal year 1955, they include the amounts of tax collected in Puerto Rico upon articles of merchandise of Puerto Rican manufacture coming into the United States. Figures for 1954 have been revised to the same basis. Figures for previous years include only amounts collected at ports of entry into the United States.

1/ Differences between the amounts of internal revenue reported by the Internal Revenue Service as collections for given periods and the amounts reported in Treasury statements as budget receipts for the same periods arose because of differences in the time when payments were included in the respective reports. Tax payments are included in budget receipts when they are reported as credits to the account of the Treasurer of the United States. Prior to July 1954, they were included in Internal Revenue Service collection reports after the returns to which they applied had been received in internal revenue offices. Under procedure begun in 1950 with withheld income tax and old-age insurance taxes and later extended to railroad retirement taxes and many excises, these taxes are paid currently into Treasury depositories and the depository receipts, as evidence of such payments, are attached to quarterly returns to the Internal Revenue Service.

Under this procedure, the payments are included in budget receipts in the month in which the depository receipts are issued to the taxpayer. Revised accounting procedures effective July 1, 1954, extended the same practice to Internal Revenue Service collection reports.

2/ Monthly figures include social security tax on self-employment income, which is levied and collected as part of the individual income tax beginning with the taxable year 1951. Fiscal year figures exclude this tax, on the basis of estimates beginning 1952 (see footnote 3), and it is included under "Old-age and disability insurance."

3/ In Internal Revenue Service reports beginning January 1951, current collections have not been separated as to type of tax but the breakdown shown for fiscal years is based on estimates made in accordance with provisions of Sec. 201 (a) of the Social Security Act, as amended (42 U.S.C. 401 (a)), for transfer of tax receipts to the trust funds (see "Budget Receipts and Expenditures," Table 1).

b/ Beginning with the fiscal year 1955, collections shown include undistributed depository receipts and unapplied collections. For excises these receipts are included in the total only. Total collect include "Taxes not otherwise classified," (see Table 2).

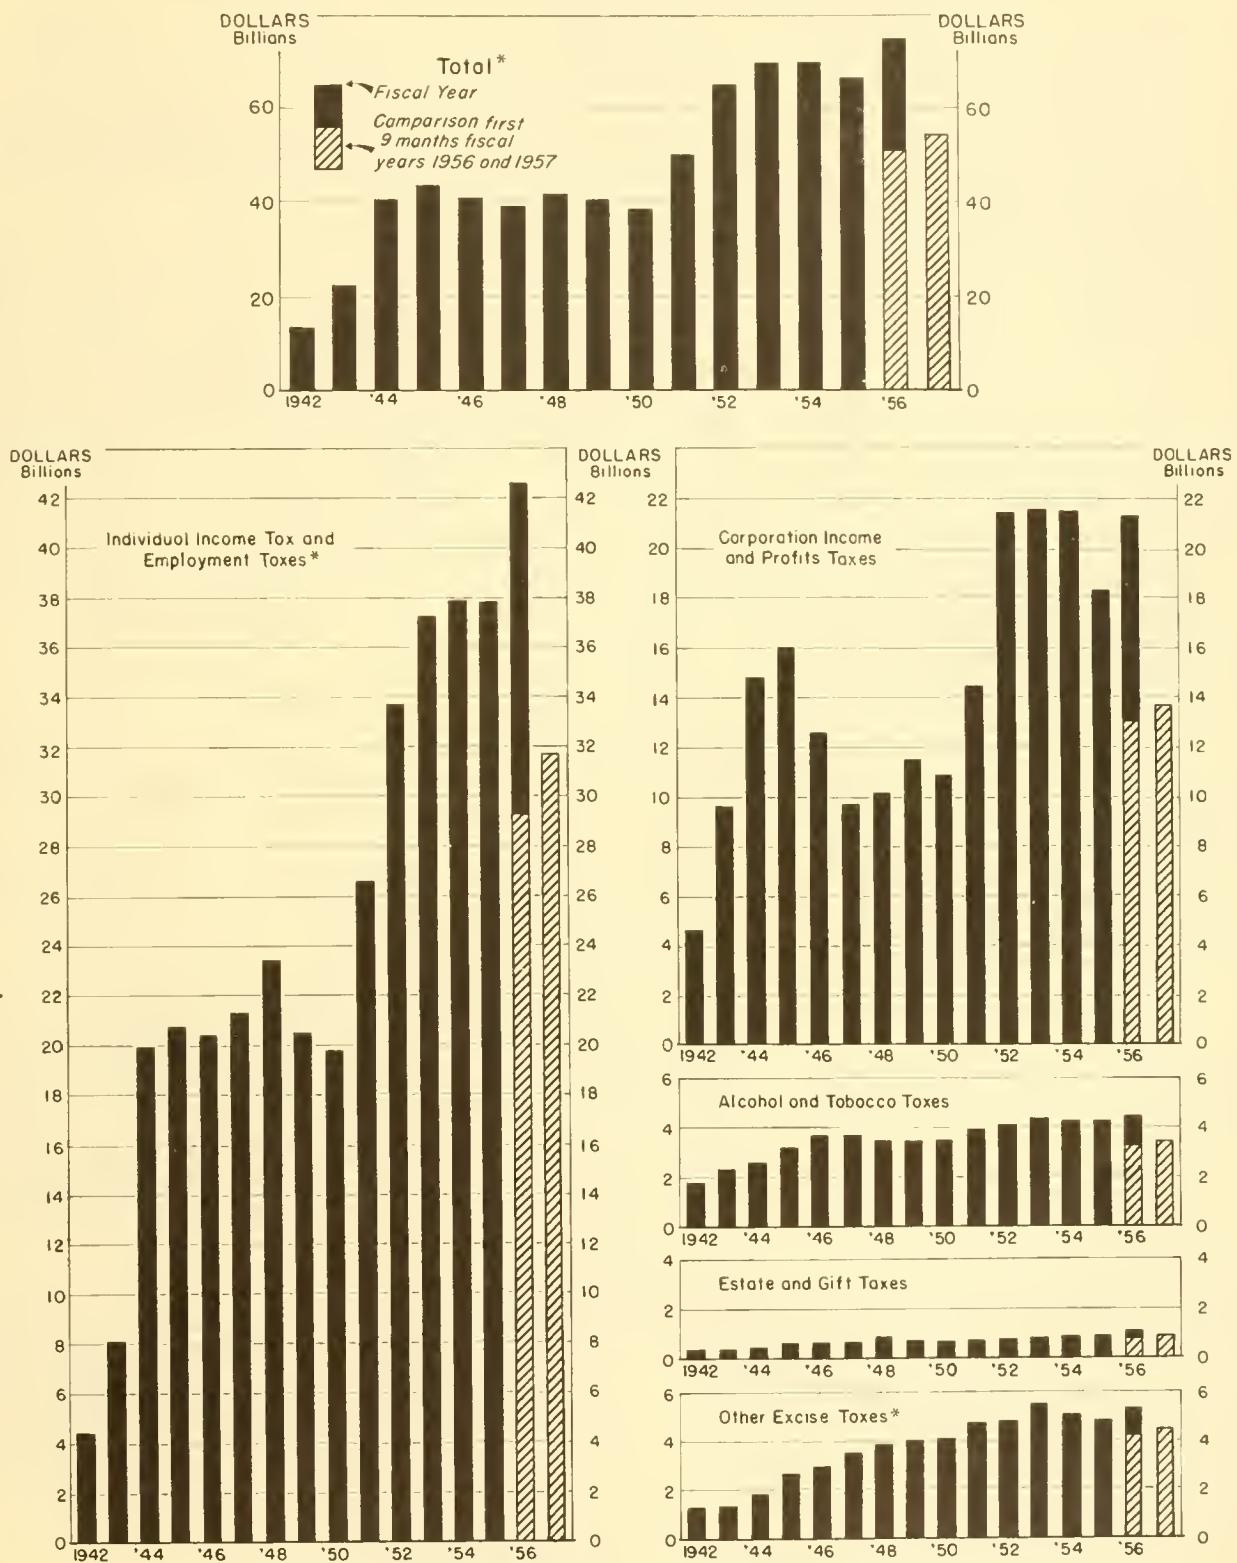

4/ Budget receipts have been reduced by \$3,566 thousand representing withheld income taxes transferred to the Government of Guam.

5/ Repealed for years ending after June 30, 1945. Beginning 1951, included under "Miscellaneous excise taxes."

6/ Detail is reported by quarters beginning with the fiscal year 1956.

Source: Internal Revenue Service reports for detail of collections by type of tax; monthly statement of receipts and expenditures of the Government for budget receipts from internal revenue. Certain detail by type of tax is available only on the basis of returns filed with the Internal Revenue Service. The figures shown include collections for credit to special accounts for certain island possessions, as reported by the Internal Revenue Service.

- 1/ Includes social security tax on self-employment income, which is levied and collected as part of the individual income tax. For estimated fiscal year breakdown, see Table 1.
 2/ For estimated fiscal year breakdown between income tax withheld and social security taxes, see Table 1.
 3/ Under revised accounting procedures effective July 1, 1954, tax payments made to banks under the depositary receipts system are included in Internal Revenue Service reports of collections in the month in which the depositary receipts are issued instead of the month in which tax returns supported by the depositary receipts are received.

in internal revenue offices, as was the previous practice. The "Undistributed depositary receipts" included in the collections represent the amount of depositary receipts issued during the period less the amount received with the returns. In the case of excise taxes, it is not possible to classify the depositary receipts by type of tax until the returns are received. Accordingly, the amount of such undistributed depositary receipts is included only in the total of excise taxes.

- 4/ Includes advance payments of estate and gift taxes not further classified in the amounts of \$16,116,000 and \$19,381,000 for 1955 end 1956, respectively.
 5/ Includes unidentified and excess collections and profit from sale of acquired property. These collections were included with "Other excise taxes" prior to the August 1956 issue of the Bulletin.
 6/ See Table 1, footnote 1.
 7/ See Table 1, footnote 5.
 * Less than \$500.

CAPITAL MOVEMENTS

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information covering the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin." Supplementary information is published at less frequent intervals. Reports by banks, bankers, securities brokers and dealers, and industrial and commercial concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. Beginning April 1954, data reported by banks in the Territories and possessions of the United States are included in the published data.

The term "foreigner" as used in these reports covers all institutions and individuals domiciled outside the United States and its Territories and possessions, the official institutions of foreign countries, wherever such institutions may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 issue of the "Treasury Bulletin."

pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

The first three sections which follow are published monthly. They provide summaries, by periods and by countries, of data on short-term banking liabilities to and claims on foreigners and transactions in long-term securities by foreigners, and present detailed breakdowns of the latest available preliminary data.

Section IV provides supplementary data in five tables which appear at less frequent intervals. Table 1, short-term foreign liabilities and claims reported by non-financial concerns, is published quarterly in the January, April, July, and October issues of the Bulletin. Table 2, long-term foreign liabilities and claims reported by banks and bankers, and Table 3, estimated gold reserves and dollar holdings of foreign countries and international institutions, are published quarterly in the March, June, September, and December issues. Table 4, foreign credit and debit balances in brokerage accounts, appears semi-annually in the March and September issues. Table 5, short-term liabilities to foreigners in countries and areas not regularly reported separately by banking institutions, is presented annually in the April issue.

CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES

The financial statements of corporations and certain other business-type activities of the United States Government which appear in the "Treasury Bulletin" beginning with the August 1956 issue are compiled from reports submitted to the Treasury under Department Circular No. 966, issued January 30, 1956, and Supplement No. 1, issued June 1, 1956. The regulations so issued are pursuant to Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 66 b), and represent another step in the program of comprehensive and integrated Government accounting and financial reporting for which authority was provided in that act. They supersede Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942.

In coverage, the new regulations require submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); and all other activities of the Government operating as revolving funds for which business-type public enterprise or intragovernmental fund budgets are required by the Bureau of the Budget. Other activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments

and other recoverable assets, may be brought under the regulations as agency accounting systems are developed to the point where they are capable of furnishing the financial reports required.

Four kinds of financial statements are called for by Department Circular No. 966 and Supplement No. 1. They are statements of financial condition, income and expense, source and application of funds, and certain commitments and contingencies. All of the financial statements required by the Circular will be presented in the Bulletin. The statements of financial condition are published quarterly, as before, and appear as Section I in the series of tables. The first data under the new regulations are for March 31, 1956, and were presented in the August 1956 Bulletin. Statements of income and expense and source and application of funds continue to be published semiannually, and appear as Sections II and III. The first of these statements under the new regulations cover the fiscal year 1956, and were published in the January 1957 Bulletin. Certain commitments and contingencies will be added on a semiannual basis for a subsequent date. Within the sections, the agencies are grouped in separate tables by type, as follows: public enterprise funds, intragovernmental funds, certain other activities, deposit funds, and trust revolving funds.
