## War Financing - Some Implications for the Future

The following address was delivered by Daniel W. Bell, Under Secretary of the Treasury, before the Annual Dinner Meeting of the Association of Stock Exchange Firms in New York City on November 19, 1945.

It is a pleasure to be here today to speak to the members of the Association of Stock Exchange Firms. I know that you folks have worked hard to help put across our war bond drives and I want to express the appreciation of the Treasury for your fine cooperation.

I would like to speak to you this evening about the sources of war financing and the implications for the future. The postwar management of the debt really began when war financing started. How the debt was distributed by investor classes, the maturity structure of the debt, the interest rate policy — these are all important factors which had to be determined step by step in financing the war, and which together determined postwar management of the debt at its very core. It is like putting up a building — you must do your planning in the blueprint stage in order to have the building successfully arranged when it is completed.

You members of the financial community are closer to this subject than are most of our citizens. I hope you will bear with me as I draw on a good many figures in an effort to analyze the financing story from the point of view of the income flow of the country and the integration of the war bond program to that income flow.

For convenience, let's begin by reviewing the size of the job from July 1, 1940, when the defense program began, to June 30, 1945, the approximate end of the Seventh War Loan. In these five fiscal years the Federal Government spent in all \$323 billion, of which \$290 billion was directly for national defense and for war. Of the remaining \$33 billion, slightly over half was for items indirectly connected with the war — interest on the public debt, veterans' benefits, and tax refunds — with the other half covering mostly the regular costs of government.

As against \$323 billion of expenditures, tax receipts brought into the Federal Government \$133 billion, leaving a deficit of \$190 billion. You know that this deficit was financed mainly by war loans and a regular payroll savings program as well as by offerings of securities in the market in the early part of the period. What have been the effects of this financing on the economy during the war? What are the implications for the future?

The tremendous importance of Government buy-

ing in the market place during the war period is evident from the fact that Federal Government spending accounted for \$323 billion out of aggregate spending of \$833 billion during the five-year period. This latter figure, by the way, would be cited by the statisticians as eight-tenths of a trillion dollars. These figures show that the Government accounted for close to 40% of the aggregate spending taking place throughout the country. The remaining \$510 billion of spending was accounted for by \$428 billion of spending by consumers, \$41 billion by business for capital goods, and \$41 billion by State and local governmental units.

The Government share of total spending in this war reached a peak of almost 50% in the fiscal year 1945 when the Government accounted for \$100 billion out of \$211 billion total spending. Contrast this situation with that in World War I when the Federal Government accounted for a maximum of only about one-fourth of aggregate market spending, with the other three-fourths coming from consumers, business, and State and local governments. In the fiscal year 1919 — the peak year of Federal spending in World War I — total expenditures in this country amounted to about \$75 billion, of which the Federal Government accounted for a little under \$19 billion.

I think it is obvious from these figures — and, of course, most of you have known it all along — that the difference in the financing job in this war was not only one of size but one of kind. When the Government takes over such a large proportion of our output to fight a total war the economic effects become important all along the line. The figures I have cited merely point out the tremendous contrast between the financing problems of World War I and World War II.

Let's look further at that \$833 billion of total spending in the five-year period. It is axiomatic that aggregate spending in the country is equal to aggregate income. The head of the coin is the \$833 billion of spending while the other side is the \$833 billion of income flow. It should be noted that this is a gross income flow since it includes such items as funds flowing into business reserves as well as net income in the usual sense.

Who received this gross income flow? We know that the Federal Government received in

taxes \$133 billion or about 15% of the total income flow, and State and local governments received about \$49 billion. Of the remaining \$651 billion of income after taxes, about 90% was distributed to individuals and 10% to corporations. Corporations are here treated as a conduit and only the new funds remaining in their hands over the five-year period are counted as being received by them. The corporate income items thus consist of retained earnings plus accretions in reserves, such as depreciation and depletion accounts, over and above what was invested in new capital goods — plant, equipment, and inventories. The income flow to individuals includes dividends received from corporations.

Turn these figures around another way. The Federal Government spent \$323 billion and received in taxes \$133 billion, leaving a deficit of \$190 billion. Individuals and corporations spent \$469 billion but had income after taxes of \$651 billion. Here was a surplus of \$182 billion and if you add in the \$8 billion surplus of State and local governments you obtain an exact correspondence with the \$190 billion Federal deficit.

One of the major goals of Treasury financing was to try to channel back into the Treasury as much as possible of this \$190 billion which people were accumulating as a result of the Federal deficit. From a financing point of view, every means possible had to be taken to persuade people to hold these funds rather than to attempt to spend them, for such an attempt on a large scale would have meant inflation. Direct controls on production, wages, prices, etc. operated on one front to dam up these funds but the Treasury had to operate on another front to see that the funds remained saved. The best way to accomplish this was to get as much as possible of these funds into Government securities.

What were our results? Let's look at the three major forms of liquid assets held by all nonbank investors combined, namely, currency, commercial bank deposits, and Federal securities. These are the significant ways in which the deficit manifested itself. Because of various minor transactions in the economy which we do not need to go into here, the total increase in nonbank holdings of these major liquid assets during the five year period we are talking about was actually \$189 billion, rather than the \$190 billion deficit.

Of the approximately \$190 billion available,

\$121 billion was placed in Federal securities by nonbank investors. Individuals were the largest investors, adding \$49 billion to their holdings of Government securities over the period. Insurance companies absorbed \$16 billion of Government securities and savings banks took \$6 billion. Other corporations and associations absorbed \$27 billion. State and local governments acquired \$5 billion, and Federal agencies and trust funds invested \$18 billion — the last representing mostly social security and military insurance funds.

In other words, about two-thirds of the \$190 billion of new funds was placed directly in Federal securities and one-third in money savings — that is, currency and commercial bank accounts. The one-third placed in money savings in turn resulted in a corresponding amount of absorption of Federal securities by the banking system. Because individuals and businesses chose to place one-third of their new savings in currency and commercial bank deposits, commercial banks and Federal Reserve Banks absorbed Federal securities of an equivalent amount. Over the five year period the banks, accordingly, absorbed \$68 billion of Federal securities to match the growth of currency and commercial bank deposits. They absorbed also an extra \$20 billion of Federal securities as a result of other factors, the most important of which was the growth of the Treasury's cash balance.

Coming back to this \$68 billion of money savings over the five year period, why did the people of this country make the collective decision to place this much in cash rather than to invest even more in Federal securities than they did? We have asked ourselves many times what should have been par for the amount placed in Federal securities or, vice versa, what should have been par for money savings under the circumstances. Unfortunately, there is no precise answer to these questions. You may be interested, however, in some observations on the factors bearing on them.

First of all, take the question of currency. Out of \$68 billion of savings going into money forms, currency accounted for \$18 billion. While this is a big increase, I believe it must be seen in perspective to be understood. The major forms of liquid assets held by all nonbank investors combined have increased from \$85 billion in the middle of 1940 to \$275 billion at the end of the Seventh War Loan. As a proportion of these to-

tals for liquid assets, currency has been remarkably stable — accounting for 8% of the total in June 1940 and 9% of the total in the middle of this calendar year. We studied this series in World War I and found the same stability in the proportion of liquid assets held in the form of currency, the figures running from 7-1/2% to 9-1/2% in that war.

It must be remembered that during World War II the distribution of income was significantly altered so that millions of families, formerly on a subsistence level or even below, received adequate and decent incomes for the first time in their lives. Naturally, they increased their holdings in currency — from a figure of approximately zero to something running up to, I suppose, several hundred dollars in some cases. In our surveys some people have stated frankly that they derived a sense of security and comfort from having a wallet full of currency.

Another factor bearing on the currency increase was, of course, that the level of business was so much higher than ever before that all along the line it was necessary to have more currency to carry on transactions.

A third factor is that banking was not always convenient for many people, either because of odd working hours or because of a lack of nearby banking facilities, particularly in communities where industrial growth was most striking.

Finally, there are, of course, the motives of tax evasion and black markets. You know from the tax evasion cases which have been discussed in the papers that a few of our citizens tried very hard to beat the tax laws. Some part of the currency outflow has been due to these illegal activities, but it is believed that this has been a relatively small factor in the currency growth.

From the standpoint of selling war bonds, these explanations of the currency outflow are important because most of the people who absorbed this currency also bought bonds. A total of 85 million people have purchased Series E bonds and I doubt that very many of those who haven't bought bonds hold much of the currency either. What has happened is that people have both bought bonds and acquired currency, and so long as the currency is not hot money from the inflationary point of view it is not inconsistent with our campaign for new savings to avoid inflationary

pressures.

Subtracting the \$18 billion growth of currency, the remainder of the \$68 billion of money savings consisted of a \$50 billion increase in commercial bank accounts. What should we conclude with regard to the motivation of people in wanting this particular increase in the money supply? We know first of all that about \$38 billion of this increase was in demand deposits and about \$12 billion in time deposits.

In the case of demand deposits, corporations and associations accounted for about 40% of the increase, or about \$16 billion. These were not inflationary funds but rather, for the most part, were needed increases in working capital and funds set aside for reconversion. In addition, for various reasons corporations were accumulating temporary reserves which they preferred to keep to a considerable extent in readily available cash.

Another large part of the increase in demand deposits is accounted for by unincorporated businesses and farmers, which in many cases were faced with the same need for larger working capital as corporations. About \$10 billion of the demand deposits accumulated by individuals during the period should be credited to these investors as business accounts. In addition, State and local governments acquired about \$2 billion of demand deposits over the period, while insurance companies and savings banks actually reduced their deposits by nearly a billion dollars in the five years. This leaves only about \$11 billion of the increase in demand deposits to be credited to the broad group of wage-earners, professional people, etc. Some of this is certainly hot money, but a large part is definitely in the class of legitimate savings. In short, it is clear that only a relatively small part of the \$38 billion increase in demand deposits is dangerous money in the inflationary sense.

The growth of time deposits in commercial banks is probably to be explained mostly by the word "diversification". We have found in our surveys that many people want to spread their savings among different forms. They feel that they have done their duty in the war bond program by investing more than 10% under payroll plans and by participating in the purchase of extra bonds in each war loan. In too many cases, our goals have thus become "psychological ceilings" to many people, which have been difficult to pen-

erate. In any event, savings over and above the amounts invested in bonds are spread around partly into currency, partly into demand deposits, and partly into time deposits. On the other hand, some part of the funds placed in time deposits is just as hot as some of the currency or demand deposits. The psychology varies with each depositor.

I have not here cited separately the figures for increases in deposits in savings banks as opposed to commercial banks, because savings banks have been treated as part of the composite group of nonbank investors in the figures I have given you, and it would be double counting to take up their deposits on the one hand and also to include their purchases of Government securities with other nonbank purchases on the other hand. For your information, however, deposits in savings banks increased by close to \$4 billion over the five-year period; the purchases of Government securities made by savings banks as they invested these funds are included in the figures previously mentioned for nonbank absorption of Federal securities.

Thus the inflationary dollars involved in the \$68 billion of money savings made over the five-year period represent a fairly small proportion of the total. Some part of each of the categories of money savings is definitely hot money, but it is my opinion that in each case the largest part of the funds placed in cash forms represents legitimate savings. In short, I believe that in absorbing \$121 billion out of \$190 billion of new funds, we came pretty close to shooting par. On the other hand, no one in the Treasury would argue that the job has been perfect. Moreover, we well realize that even Government securities are not completely foolproof in preventing inflation, since bonds can be redeemed or they can be sold in the market.

What of the future? First of all, we have arranged the debt so that each investor class holds securities which are appropriate to it. Over 60% of the securities held by the commercial banks are due or callable in less than five years. On the other hand, insurance companies hold only about 10% of their portfolios in the form of securities due or callable within five years, and 90% in longer categories. Individuals largely hold Series E, F, and G savings bonds, which they may either cash when the need arises or continue to hold at an ascending rate of interest. About half of the holdings of individuals is in the

form of Series E bonds, a security designed exclusively for the average small investor.

Corporations other than banks and insurance companies hold close to one-third of their Government securities in the form of savings notes—a highly flexible instrument which may be turned in on taxes, redeemed for cash, or held for investment at increasing rates of interest. The bulk of the remainder of corporation holdings is in the form of short-term securities, largely certificates of indebtedness.

This "tailoring" of securities to the needs of the investor is a healthy thing for the economy.

For example, corporations have readily available funds to use for plant expansion as well as for reconversion purposes. Individuals are in a position to draw on their bonds to aid them in periods of unemployment and to assist them in purchasing new supplies of consumers' goods as they become available. Most of all, however, the existence of a flexible portfolio of bonds in the hands of individuals will add to their sense of security and thereby aid them as a group in taking off of the markets the volume of production which they, as workers, produce.

Our public debt will soon be more than \$270 billion, and it is clear that the annual interest charge in the next few years is going to run in excess of \$5 billion. The average rate of interest on the debt today is 1.94%, and our net borrowing during the war has been done at an average rate of around 1.8%. Contrast this with World War I, when the average interest rate was about 4-1/4%. We have lightened the future burden of the debt considerably by our low interest rate policy. Indeed, if rates had averaged 4-1/4% in this war, the interest burden would be about \$12 billion a year instead of something over \$5 billion.

But low interest rates are not only beneficial in so far as the burden of the debt is concerned. Secretary Vinson has stated the advantages of a low interest rate policy for the entire economy, as follows:

"Interest rates determine the real burden of the debt. They should continue low for a long time to come. It is self-evident that this is in the interest of people as taxpayers. Not as evident, but just as valid,

is that low interest rates — what the economists call a 'cheap money policy' — benefits the people as consumers, as workers, and as citizens. Low interest rates, for example, will be an important factor in making possible the better homes, the better industrial plants, and the better public facilities which will make our country tomorrow more productive and a better place to live in than it was yesterday."

All of the things I have been saying boil down to the simple statement that the war has been well financed and that, as we enter what I hope will be a long period of peace, our banking institutions, business in general, and individuals are in a healthier financial condition than ever before.

I hope that conditions will be so good in the next several years that we will have a surplus in the Treasury and will be able to retire debt continuously. If that proves possible, so much the better; if not, we have done the best we could to prepare for the problems facing us.

In closing, I want to say that the work done by the volunteer war bond organizations throughout the nation has been a source of stimulation to all of us in the Treasury. In a sense, we have been merely planners and strategists; the real generals and the army itself have consisted of the local war finance organizations and their six million volunteers. I think it is a tribute to American democracy that this program has in essence represented a sum total of many, many smaller programs. We have had special campaigns carried out by virtually every group in this country. Many of these overlapped, but far from weakening the results the overlapping proved beneficial for it meant that there was an intensification of sales efforts. I am sure that bond sales were stimulated by the fact that many a man has been asked to buy bonds by his children as a result of a school program, by a neighbor as a result of a community program, by a payroll worker at the plant, through a call from a banker or broker, and by a volunteer in one of the other programs. It has been a tough job, but all of us should feel a deep sense of satisfaction in the success which has been achieved.

## Procedure for Redemption of United States Excess Profits Tax Refund Bonds

On November 10, 1945 the Treasury Department issued instructions regarding the procedure for the redemption of United States excess profits tax refund bonds. A copy of amended regulations concerning these bonds was attached to the press release. A summary of the procedure for redemption is presented in this article. 1/

The excess profits tax refund bonds were issued in connection with a postwar credit of 10% of the excess profits tax paid by corporations for each year ending after December 31, 1941. 2/ It was provided that the credit for a year could be taken currently to the extent of 40% of net debt retired in that year. To the extent that credit was not taken currently the balance was issued to the taxpayer in the form of noninterest-bearing bonds. These bonds which were issued under the designation "Excess Profits Tax Refund Bonds" are nonnegotiable and nontransferable until after the formal declaration of the cessation of hostilities of World War II. There are now approximately 70,000 bond owners on record and there were \$1,113 million of excess profits tax refund bonds outstanding as of October 31, 1945.

The authorizing act set maturity dates for the bonds at stated intervals after the cessation of hostilities, depending upon the excess profits tax year for which they were issued. Provision

- 
- 1/ More detailed discussion of the procedure for submitting bonds is in the original release, Press Service No. V-124 and attachments.
  - 2/ Except in the case of taxable years beginning in 1941 and ending before July 1, 1942.
  - 3/ Nevertheless, bonds outstanding remain nonnegotiable and nontransferable until the formal declaration of cessation of hostilities.

was made, however, that the bonds would be redeemable at the option of the United States, after the cessation, on three months' notice. The Tax Adjustment Act of 1945 provides that the bonds may be turned in by their owners for redemption on or after January 1, 1946 3/, and that the credit of 10% of excess profits tax for calendar year 1944 and subsequent years is to be taken currently as a tax credit or refund.

As discussed in the instructions on procedure, assignment of the excess profits tax refund bonds to the Secretary of the Treasury for redemption is to be made by executing a form on the back of the securities. The bond must be assigned in the presence of an officer authorized to witness such assignments. Officers authorized to witness submission of the bonds include executive officers of banks and trust companies, executive officers of Federal Land Banks, certain officers of Federal Reserve Banks and branches, and notaries public. Bonds should be sent to the Treasury Department, Division of Loans and Currency, Washington 25, D. C., or to any Federal Reserve Bank or branch.

It was urged in the official circular that those owners who desire payment on January 1, 1946 surrender their bonds immediately in order that examination of the assignments can be completed and checks drawn in time to be delivered on that date. Owners who do not elect to receive payment on January 1 are also requested to surrender their bonds well in advance of the date on which they may desire payment.

## Assets and Liabilities of All Active Banks in the United States,

December 31, 1939 through June 30, 1945

The Comptroller of the Currency released on November 1 the regular semi-annual report on assets and liabilities of all active banks in the United States and possessions as of June 30, 1945. The data were compiled from call reports of national banks and from information provided by State bank supervisory authorities on banks under their supervision. The report covers a total of 14,587 banks. Comparable data from earlier reports have been drawn upon in the preparation of the accompanying tables and charts.

From the data available, the highlights for the 5-1/2 year period, December 31, 1939 through June 30, 1945, may be summarized in the following five statements:

- (1) The asset position of all active banks had reached an unprecedented peak by June 30, 1945. As of June 30, 1945, assets of all active banks totaled \$163.0 billion, more than two times as great as they were at the beginning of period.
- (2) Time deposits, which lagged far behind demand deposits in rate of growth for most of the period from December 31, 1939 through June 30, 1945, have been increasing at a faster rate than demand deposits in the last year.
- (3) U. S. Government securities showed the most outstanding increase among asset items during the 5-1/2 year period. As a proportion of total assets U. S. Government securities rose from one-fourth to over one-half.
- (4) The ratio of capital accounts to total deposits has declined during the period from December 31, 1939 through June 30, 1945. The ratio of capital accounts to deposits minus cash and U. S. Government securities, however, has risen.
- (5) National banks and State commercial banks showed significantly greater increases in assets (and deposits) than mutual savings banks throughout the 5-1/2 year period. Two factors are primarily responsible for the smaller growth of mutual savings banks: (a) these banks hold no demand deposits, which showed the major

increases during the period, and (b) mutual savings banks are concentrated in the northeastern section of the country, which lagged behind other sections in industrial expansion.

More detailed discussion is presented in the remainder of this article.

## Summary by classes of banks

The new report on bank assets and liabilities for June 30, 1945 shows that the wartime growth of total bank assets continued but at a slightly slower rate. During the year from June 30, 1944 through June 30, 1945, total assets of all active banks increased by \$23.5 billion, or 17%. For the first time since the beginning of the war the relative increase in assets of mutual savings banks was at about the same level as that of the other two major classes of banks, national banks and State commercial banks. The share of total assets held by these three types of banks showed no change in the year ending June 30, 1945.

In the 5-1/2 year period from December 31, 1939 through June 30, 1945 total assets of all active banks more than doubled. They increased from \$77.6 billion to \$163.0 billion, a rise of \$85.5 billion. The distribution by classes of banks of total assets and liabilities as of these two dates is presented in the following table.

Class of bank	Total assets and liabilities		Increase	
	Dec. 31, 1939	June 30, 1945	Amount	Percent
(In billions of dollars)				
National banks.	35.3	81.8	+46.5	+132
State commercial banks...	29.5	65.1	+35.5	+120
Mutual savings banks.....	11.9	15.9	+4.1	+34
Private banks..	0.9	0.2	-0.6	-71
Total.....	77.6	163.0	+85.5	+110

As the table shows, the two classes of commercial banks — national banks and State commercial banks — showed by far the greatest increases over the 5-1/2 year period. The percentage increases for these banks of 120% or more reflect the growth over the period in demand deposits which are held almost exclusively by commercial banks.

Mutual savings banks, on the other hand,

# ASSETS OF ALL ACTIVE BANKS IN THE UNITED STATES<sup>U</sup>

December 31, 1939 - June 30, 1945

Chart I - Dollar Values

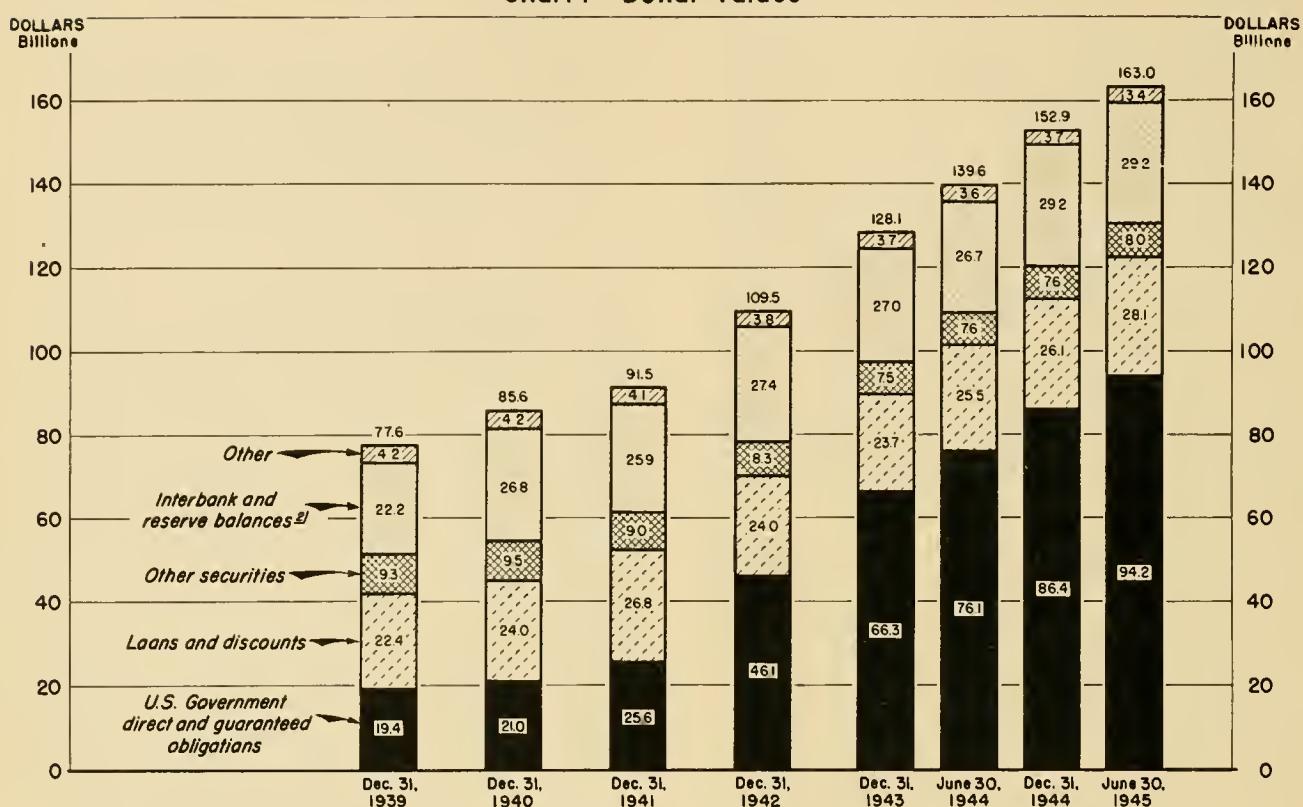

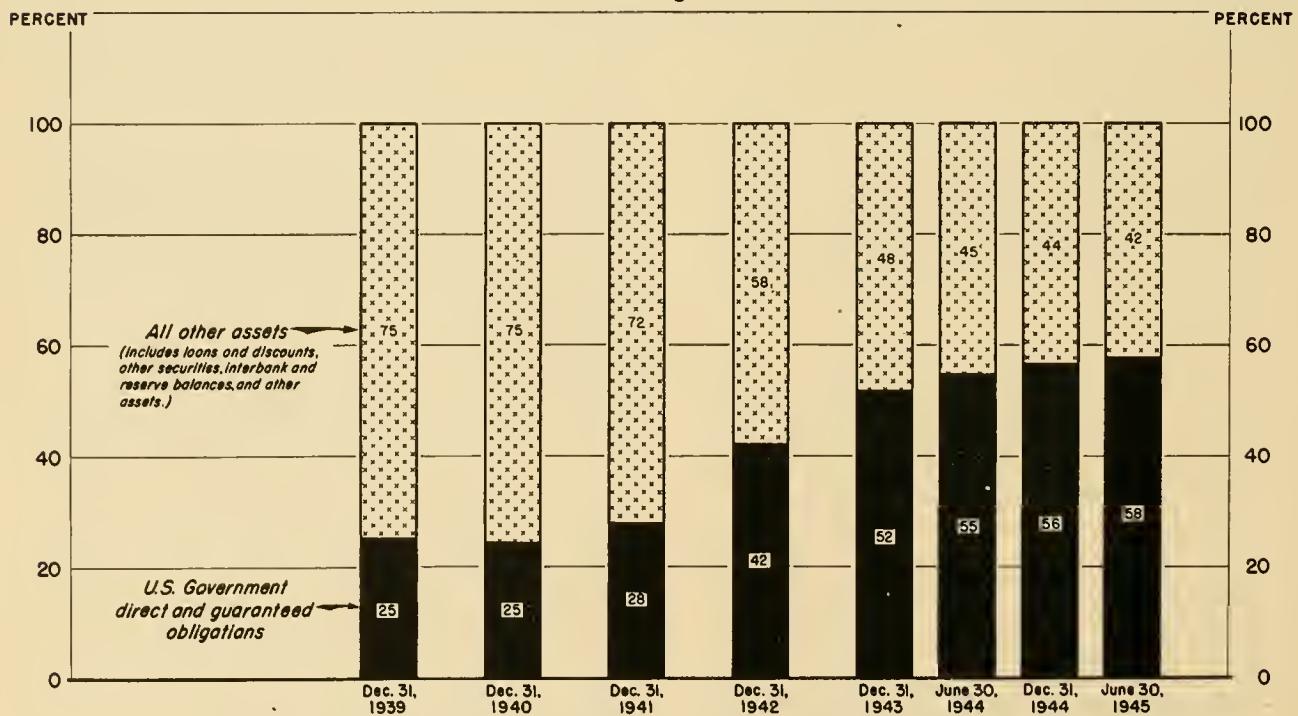

Chart 2 - Percentage Distribution

<sup>U</sup>Includes territories and insular possessions<sup>E</sup>See accompanying Table 1, footnote 2

which hold only a negligible amount of demand deposits, had an increase of only 34% in assets. Time deposits increased at a much slower rate than demand deposits over the period from December 31, 1939 to June 30, 1945.

The decline in the assets of private banks is explained, for the most part, by the decrease in the number of banks in that class, due to the shift of some of the larger ones into the commercial bank category.

### Assets

In the year ending June 30, 1945, the change in the various asset items held by all active banks continued to reflect the financing of the war. Holdings of U. S. Government securities continued to increase but at a declining rate during the year. Of an increase of 24% in Government securities during the year two-thirds occurred in the first six months and one-third in the second. The table below presents a distribution of total assets as of June 30, 1944, December 31, 1944, and June 30, 1945.

Assets	June 30, 1944	Dec. 31, 1944	June 30, 1945
(In billions of dollars)			
U. S. Government direct and guaranteed obligations.....	76.1	86.4	94.2
Loans and discounts..	25.5	26.1	28.1
Other securities....	7.6	7.6	8.0
Interbank and reserve balances.....	26.7	29.2	29.2
Other assets.....	3.6	3.7	3.4
Total assets.....	<u>139.6</u>	<u>152.9</u>	<u>163.0</u>

Loans and discounts, which had followed an uneven course throughout the war period, had an increase of 10% during the year ending June 30, 1945, of which 8% occurred in the last six months. Other securities, covering State and local and miscellaneous securities, which had been declining steadily during most of the war period, showed an increase of 6% in the year ending June 30, 1945.

Over the 5-1/2 year period from December 31, 1939 to June 30, 1945 holdings of U. S. Government securities showed increases far greater than any other asset items. Holdings of Federal securities showed an increase of \$74.8 billion or 385% during the period. Of the \$85.5 billion increase in total assets of all active banks, U. S. Government securities accounted for 88%. As a proportion of total assets, U. S. Government se-

curities made up 26% at the beginning of the period and 58% at the end of the period (Charts 1 and 2). The following table shows the major asset items as of December 31, 1939 and June 30, 1945 and the change over the period.

Assets	Dec. 31, 1939	June 30, 1945	Amount	Increase Percent
(In billions of dollars)				
U. S. Government direct and guaranteed obligations.....	19.4	94.2	\$74.8	+385
Loans and discounts.....	22.4	28.1	+5.7	+26
Other securities....	9.3	8.0	-1.3	-14
Interbank and reserve balances.....	22.2	29.2	+7.0	+32
Other assets.....	4.2	3.4	-0.8	-19
Total assets.....	<u>77.6</u>	<u>163.0</u>	<u>\$85.5</u>	<u>+110</u>

Of the other asset items total loans and discounts held by all active banks showed an increase during the 5-1/2 year period of \$5.7 billion or 26%. In relation to total assets loans and discounts declined from 29% to 17%.

State and local, corporate, and other securities decreased from \$9.3 billion to \$8.0 billion. They accounted for 5% of total assets on June 30, 1945 as compared with 12% on December 31, 1939.

National banks and State commercial banks showed similar growth in their U. S. Government security holdings over the period from December 31, 1939 to June 30, 1945. The almost parallel increases were 421% for national banks and 448% for State commercial banks. Of the total increase in national bank assets, 82% was accounted for by Government securities, and this ratio was 86% for State commercial banks. Holdings of U. S. Government securities in relation to the total assets of each of these two classes of banks also showed similar changes during the 5-1/2 year period. Federal securities made up 26% of total assets of national banks at the beginning of the period and rose to 58% of total assets by the end. Of total assets of State commercial banks, U. S. Government securities accounted for 23% as of December 31, 1939 and 57% as of June 30, 1945 (Charts 3 and 4).

The increase of U. S. Government securities held by mutual savings banks (\$6.5 billion) was greater than the increase in total assets. A decline of \$2.4 billion in loans and discounts, other securities, interbank and reserve balances, and other assets accounted for almost half of the

## DISTRIBUTION OF ASSETS BY CLASSES OF BANKS<sup>1</sup>

December 31, 1939 and June 30, 1945

Chart 3 - Dollar Values

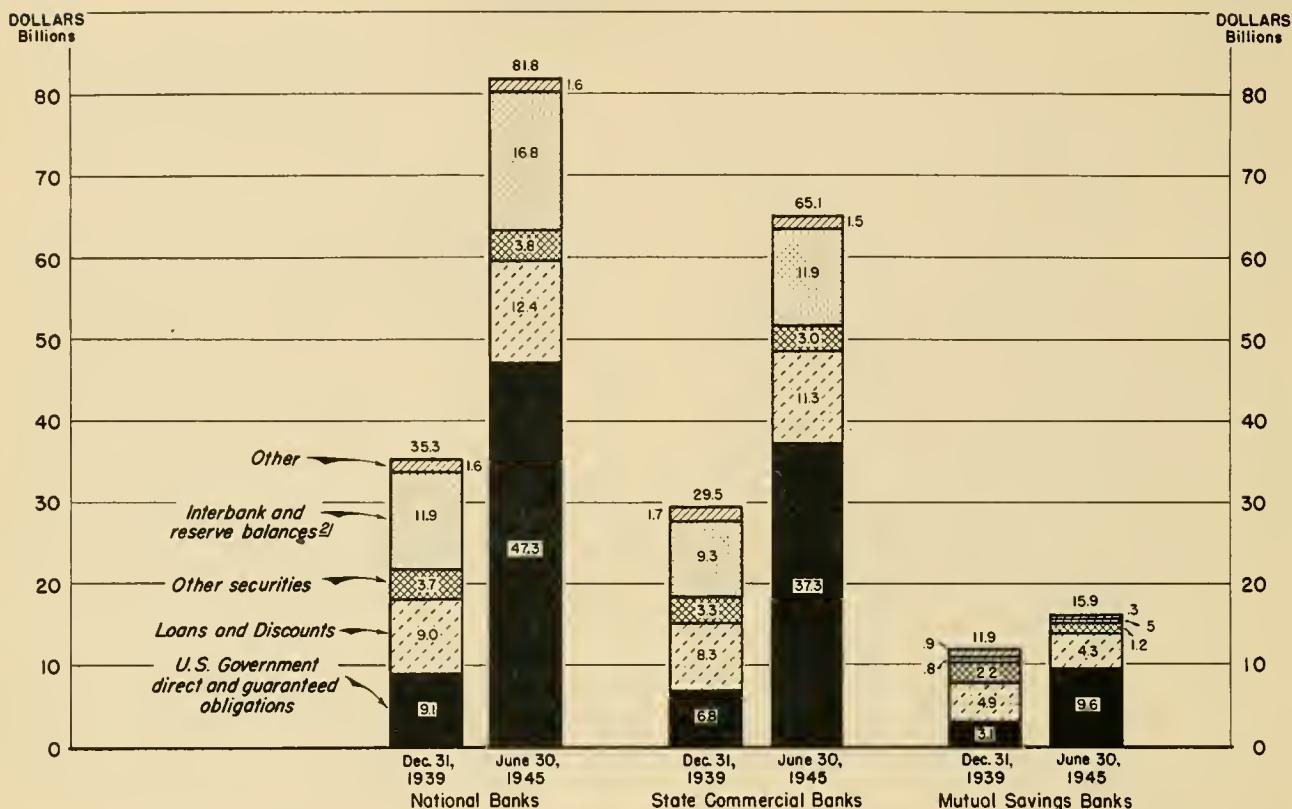

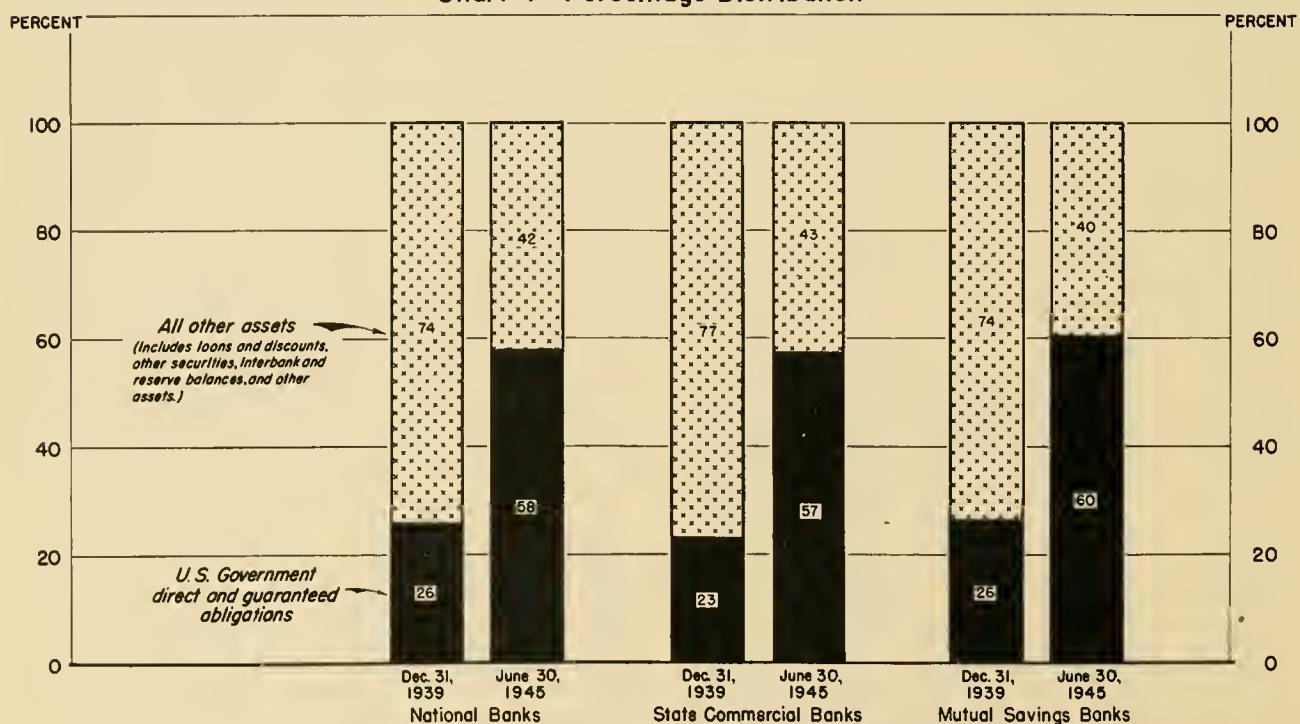

Chart 4 - Percentage Distribution

<sup>1</sup>Includes banks in territories and insular possessions. <sup>2</sup>See accompanying Table I, footnote 2.

increase in Government securities. As a proportion of total assets Federal securities accounted for 26% at the beginning of the period and 60% at the end of the period (Charts 3 and 4).

The table at the bottom of this page shows the major asset items by classes of banks as of December 31, 1939 and June 30, 1945.

### Liabilities and capital accounts

On the liability side of the balance sheet, the most significant change in the year ending June 30, 1945 occurred in the rate of increase of time deposits as compared with demand deposits. During that year time deposits increased at a much faster rate than demand deposits. This contrasts sharply with the situation throughout the war period when time deposits lagged well behind demand deposits in rate of growth. For the year ending June 30, 1945 time deposits showed an increase of 24% as compared with a rise in demand deposits of 14%. This trend was accelerated in the last half of the year when time deposits increased by 11% whereas demand deposits rose by only 2%.

The distribution of the major liability items as of June 30 and December 31, 1944 and June 30, 1945 is presented in the table that appears in the next column.

The table shows that U. S. Government deposits were between about \$20 and \$25 billion as of each of the three dates covered. These balances reflect in each case the fact that a war loan was in progress or just ending. Accordingly, these are peak balances for Government deposits. Between loans these deposits are drawn on, and on net balance result in a transfer of deposits from

the Government to private accounts.

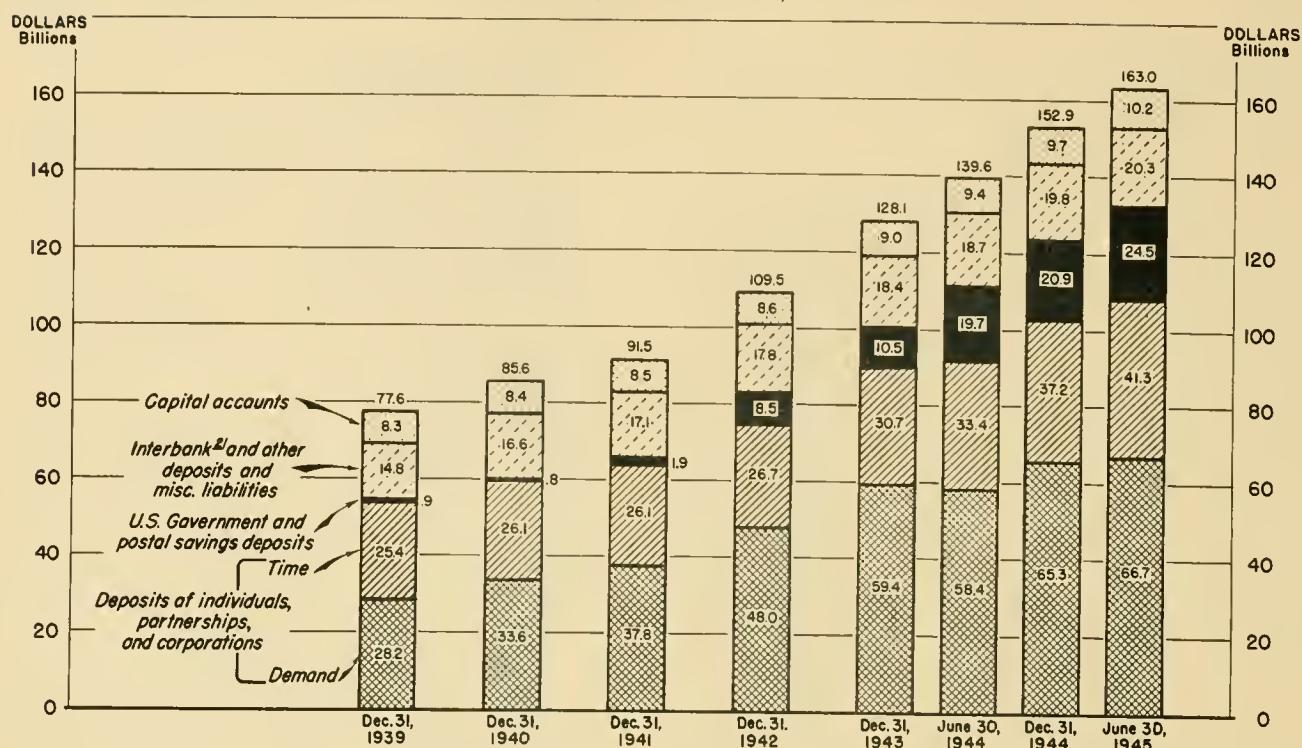

Liabilities and capital accounts	June 30, 1944	Dec. 31, 1944	June 30, 1945
(In billions of dollars)			
<b>Liabilities:</b>			
Deposits of individuals, partnerships, and corporations:			
Demand.....	58.4	65.3	66.7
Time.....	33.4	37.2	41.3
U. S. Government and postal savings deposits.....	19.7	20.9	24.5
Interbank and other deposits and miscellaneous liabilities.....	18.7	19.8	20.3
Total liabilities...	130.2	143.3	152.9
Capital accounts.....	9.4	9.7	10.2
<b>Total liabilities and capital accounts....</b>	<b>139.6</b>	<b>152.9</b>	<b>163.0</b>

Over the 5-1/2 year period from December 31, 1939 through June 30, 1945, the \$65.5 billion increase in assets and liabilities showed up among liabilities primarily as a growth in deposits. Demand deposits of individuals, partnerships, and corporations rose from \$28.2 billion on December 31, 1939 to \$66.7 billion on June 30, 1945, an increase of \$38.5 billion or 136%. This contrasts with time deposits which increased from \$25.4 billion to \$41.3 billion, an increase of \$15.9 billion or 63% (Chart 5).

The greatest relative increase among liability items during the 5-1/2 year period occurred in U. S. Government and postal savings deposits, reflecting the Government's need for a large working balance for war expenditures and the effect of the timing of war loans as discussed above.

<b>Capital accounts...</b>	<b>8.3</b>	<b>10.2</b>	<b>+1.9</b>	<b>+22</b>
<b>Total liabilities and capital accounts.....</b>	<b>77.6</b>	<b>163.0</b>	<b>+85.5</b>	<b>+110</b>

National banks and State commercial banks continue to hold practically all the demand deposits in the country. During the period from December 31, 1939 through June 30, 1945 national banks accounted for 58% of the total increase in demand deposits and State commercial banks made up 43% (Chart 6).

The proportion of time deposits held by the three major classes of banks, national banks, State commercial banks, and mutual savings banks, changed significantly over the period. On December 31, 1939 national banks held 30% of total time deposits, State commercial banks held 28%, and mutual savings banks held 41%. These percentages changed to 35%, 31%, and 35%, respectively, by June 30, 1945. The total increase of time deposits over the 5-1/2 year period was divided as follows: (1) 41% to national banks;

(2) 34% to State commercial banks; and (3) 24% to mutual savings banks. This may be explained largely by the fact that savings banks are concentrated in the northeastern part of the country which felt less than any other area the industrial expansion due to the war. Thus, the sharply smaller growth of savings banks may be explained by (1) the fact that they hold practically no demand deposits of individuals, partnerships and corporations, which showed the greatest increase during the period, and (2) the lesser increase in time deposits due to the disadvantage of the location of most mutual savings banks. 1/

The table at the bottom of this page shows liabilities by classes of banks as of December 31, 1939 and June 30, 1945.

Capital accounts showed a small but steady growth throughout the 5-1/2 year period from December 31, 1939 to June 30, 1945. They increased from \$8.3 billion at the beginning of the period to \$10.2 billion at the end, a rise of 22%. Of the capital stock items, capital notes and debentures, and preferred stock declined \$0.3 billion, whereas common stock showed an increase of \$0.3 billion. Surplus, undivided profits, and reserves increased \$1.9 billion over the period. The ratio of capital accounts to total deposits was 1 to 8.27 on December 31, 1939 and 1 to 14.97 on June 30, 1945. If cash and U. S. Government securities are deducted from total deposits, the ratio of capital to remaining deposits becomes 1 to 3.10 and 1 to 2.64 on December 31, 1939 and June 30, 1945, respectively. The following table shows the liability items as of December 31, 1939 and June 30, 1945.

1/ Data on the "Geographic Distribution of Bank Deposits" as of December 31, 1944 were published in an article in the May 1945 issue of the "Treasury Bulletin".

## Treasury Market Financing

Historical details of Treasury market financing operations involving bonds, notes, and certificates of indebtedness, beginning with the 3rd War Loan, are published in the tables on pages 32 and 33.

### Call of 3-3/4% Treasury bonds

On November 14, 1945 the 3-3/4% Treasury bonds of 1946-56 were called for payment on March 15, 1946. These bonds were dated March 15, 1926. Their final maturity date was March 15, 1956 with the option to call by the Treasury, on four months' notice, for payment on any interest payment date from March 15, 1946 to final maturity. There are now outstanding \$489 million of

these bonds. The issue is partially tax-exempt.

The Treasury's announcement of call stated that holders of the bonds may be offered, in advance of the redemption date, the privilege of exchanging all or any part of their called bonds for other interest-bearing obligations of the United States, in which event public notice would hereafter be given.

Source: Actual receipts and expenditures come from Daily Treasury Statements; source of estimated figures is explained in footnote 1.

\* Less than \$500,000.

1/ Based upon Budget estimates as revised August 31, 1945.

2/ For further details, see following chapter, Tables 1 and 2.

3/ Includes receipts from taxes withheld by employers under the Revenue Act of 1942 and Current Tax Payment Act of 1943.

4/ Includes chiefly alcoholic beverage taxes, tobacco taxes, manufacturers' and retailers' excise taxes, and estate taxes.

5/ Includes deposits resulting from the renegotiation of war contracts. Information on the amount of such deposits is not available on the basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1943, \$558 million; fiscal year 1944, \$2,235 million; and fiscal year 1945, \$2,041 million. These figures include so-called voluntary returns.

6/ Details not available.

7/ Excludes expenditures for public debt retirements which are chargeable to the sinking fund, etc. under special provisions of law. For further details regarding expenditures see following chapter, Tables 1 and 2.

8/ Includes transfers to trust accounts, etc.

9/ Includes expenditures for public works undertaken by Veterans' Administration.

10/ "Refunds of taxes" include amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and exclude refunds of taxes under the social security program. For discussion of excess profits tax refund bonds, see following chapter, Table 3.

11/ Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Office for Emergency Management, War Manpower Commission (U. S. Employment Service) under authority of the Social Security Act.

12/ Comprises \$950 million for payments to International Monetary Fund, (excludes \$1,800 million to be paid from Exchange Stabilization Fund); \$317 million for payments for capital stock of International Bank for Reconstruction and Development; and \$999 million for payments for capital stock of Export-Import Bank (excludes \$1 million of common stock heretofore issued by Export-Import Bank and purchased by the United States).

Source: Daily Treasury Statements.

\* Less than \$500,000.

1/ Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc. under special provisions of law.

2/ For further details, see Table 2.

3/ For explanation see tables which follow entitled "Social Security Program".

4/ For further details, see Table 3.

5/ For further details, see Table 4.

6/ For further details, see Table 5.

7/ Total expenditures less net receipts.

8/ Represents expenditures for public debt retirements which are chargeable to the sinking fund, etc. under special provisions of law.

9/ Includes recoveries of U. S. investments in capital funds. Such re-

coveries totaled \$54 million in the fiscal year 1940; \$319 million in the fiscal year 1941; \$18 million in the fiscal year 1942; and \$10 million in the fiscal year 1943.

10/ Receipts from reductions in capital stock and paid-in surplus available to be released under existing law are included as negative items under expenditures. Such reductions totaled \$315 million.

11/ Includes deposits resulting from the renegotiation of war contracts. Information on the amount of such deposits is not available on the basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1943, \$558 million; fiscal year 1944, \$2,235 million; and fiscal year 1945, \$2,041 million. These figures include so-called voluntary returns.

Source: Daily Treasury Statements.

\* Less than \$500,000.

1/ For further details, see chapter entitled "Internal Revenue Statistics".

2/ Excludes receipt of victory taxes withheld pursuant to the Revenue Act of 1942. Such receipts have been classified as "Other" income and profits taxes.

3/ Includes unjust enrichment tax.

4/ For the period prior to September 1939, the data in the columns entitled "Federal Insurance Contributions Act" and "Federal Unemployment Tax Act" represent collections under Titles VIII and IX, respectively, of the Social Security Act.

Source: Daily Treasury Statements.

Back Figures: For monthly data for the period July 1941 through July 1944, see "Treasury Bulletin" for September 1945, pages 6 and 7.

r Revised.

\* Less than \$500,000.

1/ General expenditures now include expenditures for revolving funds; back figures have been revised accordingly.

2/ Includes public works undertaken by the Veterans' Administration.

3/ Does not include transfers to trust accounts, etc. These are shown in Table 5.

4/ "Refunds of taxes" include amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and exclude refunds of taxes under the Social security program. Excess profits tax refund bonds were formerly issued to corporations entitling them to a post-war credit equal to 10% of the excess profits tax paid. The Tax Adjustment Act of 1945 reduced by 10% the amount of excess profits tax to be paid and abolished the post-war credit. For amounts of excess profits tax refund bonds issued, see the first table in chapter entitled "Public Debt and Guaranteed Obligations of the United States Government". Outstanding excess profits tax refund bonds may be redeemed at the option of the holder commencing January 1, 1946; when such redemptions occur, they will appear as retirements of public debt.

5/ Consists of Administration of Sugar Act of 1937, Agricultural Adjustment Agency, exportation and domestic consumption of agricultural commodities, Farm Credit Administration, Farm Security Administration, Federal Farm Mortgage Corporation, Federal land banks, Rural Electrification Administration, Soil Conservation and Extension Service, Department of Agriculture departmental expenditures, and other.

6/ Includes railroad retirement and railroad unemployment activities

and excludes expenditures made by Office for Emergency Management, War Manpower Commission (U. S. Employment Service) under authority of Social Security Act. For further details, see tables which follow on the Social security program.

7/ Includes public buildings, public highways (including forest roads and trails), river and harbor work and flood control, Tennessee Valley Authority, Federal Public Housing Authority (formerly U. S. Housing Authority) and reclamation projects. Excludes certain expenditures for public works in connection with war activities by the Federal Works Agency, beginning July 1941.

8/ Excludes expenditures for the U. S. Maritime Commission, departmental expenditures under the Social security program and the Department of Agriculture departmental expenditures.

9/ For additional information, see "Treasury Bulletin" for August 1945, page 6.

10/ Includes expenditures for the following: Office of Education, and Public Health Service of the Federal Security Agency; Post Office Department postal deficiencies; Federal Housing Administration; Treasury Department investments in Federal savings and loan associations; certain expenditures of the Panama Canal; and capital stock of the Federal Deposit Insurance Corporation, Home Owners' Loan Corporation, Federal home loan banks, and Disaster Loan Corporation.

11/ Gross expenditures have been reduced \$160 million representing the repayment of capital funds by certain United States Government agencies. For further details see "Treasury Bulletin" for June 1943, page 9, footnote 12.

12/ Includes \$257 million for restoration of capital impairment of Commodity Credit Corporation applicable to fiscal years 1943 and 1944.

13/ Classified as miscellaneous expenditures commencing July 1, 1945.

14/ Includes \$174 million, Export-Import Bank of Washington - capital stock.

Back Figures: For monthly data for the period July 1941 through July 1944, see "Treasury Bulletin" for September 1945, pages 11 and 12.

\* Less than \$500,000.

1/ Includes Government Retirement funds, etc. (See footnote 2.)

2/ Comprises Public Works Administration revolving fund, special deposits (net), and, during the fiscal years 1940 through 1945,

transactions in commodity food stamps by the Department of Agriculture. Commencing July 1, 1945, such transactions are classified as "other trust accounts".

3/ Net receipts in this column constitute net sales, and net expenditures constitute net redemptions of obligations.

4/ Details not available.

Source: Daily Treasury Statements.

\* Less than \$50,000.

1/ Formerly Title VIII of the Social Security Act.

2/ Formerly Title IX of the Social Security Act. Includes amounts equal to appropriations to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected with respect to the period from January 1936 to June 1939, inclusive, from employers subject to the Railroad Unemployment Insurance Act (See Table 3 of Section I).

3/ Prior to January 1, 1940, figures represent amounts transferred to the Old-Age Reserve Account. From January 1 to July 1, 1940 "Transfers" were made to the Federal Old-Age and Survivors Insurance Trust Fund. Subsequently receipts have been deposited in the General Fund of the Treasury and "appropriated" directly to the Federal Old-Age and Survivors Insurance Trust fund. Amounts shown as transfers reflect deductions made for reimbursement to the General Fund account to cover administrative expenses, which are shown as expenditures in

Section II, Table 1.

4/ Includes only expenditures from appropriations made specifically for administrative expenses relating to the Social Security Act; namely, Social Security Board, Department of Commerce, and Department of Labor; and administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended. Beginning July 1, 1940, includes also administrative expenses under the Wagner-Peyser Act. Excludes administrative expenses payable from other appropriations, principally for the following agencies: Bureau of Internal Revenue of the Treasury Department, and Public Health Service and Office of Education of the Federal Security Agency.

5/ Covered by appropriations by Congress.

6/ Second Deficiency Appropriation Act, fiscal year 1938, appropriated \$41 million for refunding to certain States portions of Federal employers' tax for 1936 collected under the Social Security Act.

Insurance Account equivalent to amounts of taxes collected, with respect to period from January 1936 to June 1939, inclusive, from employees and employers who come within the purview of the Railroad Unemployment Insurance Act.

4/ Represents excess funds of the Railroad Unemployment Insurance Administration Fund (under Act of Oct. 10, 1940).

5/ For railroad unemployment benefits and refunds.

1/ Excludes advance of \$15 million from the Treasury and subsequent repayment, both taking place in the fiscal year 1940.

2/ Represents 90% of contributions under the Railroad Unemployment Insurance Act; the remaining 10% is used for administrative expenses. (See Section I, Table 3.)

3/ Represents amounts transferred from States to Railroad Unemployment

Liquidations of 1940 and prior contract authorizations.....			-457,872,846	-
Total approved and pending appropriations and net contract authorizations 1/.....			\$360,495,447,468	\$7,461,842,682

1/ Comprises of appropriations and net contract authorizations available as of and after July 1, 1940. Excludes: (1) authorizations of the Reconstruction Finance Corporation and its affiliates for war purposes, and (2) unexpended balances of appropriations on June 30, 1940 (except immediately available funds from fiscal year 1941 appropriations), available for expenditure in the fiscal year 1941.

2/ Contract authorizations have been reduced by later appropriations which were earmarked in authorizing acts for this purpose.

3/ Represents the net amount of contractual authority that the President may authorize in accordance with provisions of this act.

4/ Includes appropriations made available for prior years. For amounts, see appropriate footnotes in "Treasury Bulletin" for August, 1945, pages 15 and 16.

5/ Unappropriated contract authorizations for the naval expansion program are as follows:

Public Law No. 441.....\$2,171,000,000  
 Public Law No. 204 (Estimated by Navy Department) 1,031,314,662  
 Public Law No. 375.....55,000,000  
 Public Law No. 375 (Estimated by Navy Department) 1,825,000,000  
 Public Law No. 529.....60,000,000

6/ Public Law No. 352 has been reduced by \$30,257,572 representing the amount repealed by Congress and carried to the surplus fund in ac-

cordance with provisions of this act.

7/ Represents revision by the U. S. Maritime Commission of contract authorization reported on June 30, 1945.

8/ Includes \$180,000,000 for the fiscal year 1945.

9/ Represents amount of prior appropriations repealed by Congress. The repeal of contractual authority has been applied to prior acts.

10/ Pending appropriations, as used herein, represent appropriation bills reported from the Committee on Appropriations to the House, or in subsequent stages of Congressional action before Presidential approval. Estimates of appropriations for war purposes reported by the President to Congress and submitted to the Committee on Appropriations, amounting to \$3,599,835,98 are not included.

11/ For details of appropriations made by 76th Congress, Third Session, see "Treasury Bulletin" for March, 1944, page 5.

12/ Includes actual transfer of balances of the Bureau of Marine Inspection and Navigation from the Department of Commerce to Coast Guard, Navy, in the amount of \$1,153,802 in accordance with Executive Order 9083, dated February 28, 1942. Also includes \$40,985,871.27 received as war contributions under authority of the Second War Powers Act and deposits of advance payments made by foreign governments to the Defense Aid Special Fund for the procurement of defense articles amounting to \$225,359,177.56.

\* Less than \$500,000.

<sup>1/</sup> This is the net budgetary deficit. Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law.<sup>2/</sup> This represents the increase in the gross public debt, except as noted. (See footnote 6.)<sup>3/</sup> Comprises Federal Old-Age and Survivors Insurance Trust Fund, National Service Life Insurance Fund, Unemployment Trust Fund, Railroad Retirement Account, Government insurance and retirement funds and other trust accounts. (See footnotes 5.)<sup>4/</sup> Charges for retirement of national bank notes are reflected in this statement directly against increment on gold, in the years during which the retirements were actually made. (See footnote 6.)<sup>5/</sup> Comprises Public Works Administration revolving fund, special deposits (net), and, during the fiscal years 1940 through 1945, transactions in commodity food stamps by the Department of Agriculture. Commencing July 1, 1945, such transactions are classified in the column "Trust accounts".<sup>6/</sup> Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1936 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1936, \$397 million; 1937, \$99 million; 1938, \$51 million; and 1939, \$5 million. The increases in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.<sup>7/</sup> Includes inactive gold in the amount of \$1,087 million.

Source: Daily Treasury Statements.

<sup>1/</sup> Less than \$500,000.

<sup>2/</sup> Guaranteed securities held by the Treasury and securities guaranteed as to interest only are not included in this table.

<sup>3/</sup> Demand obligations.

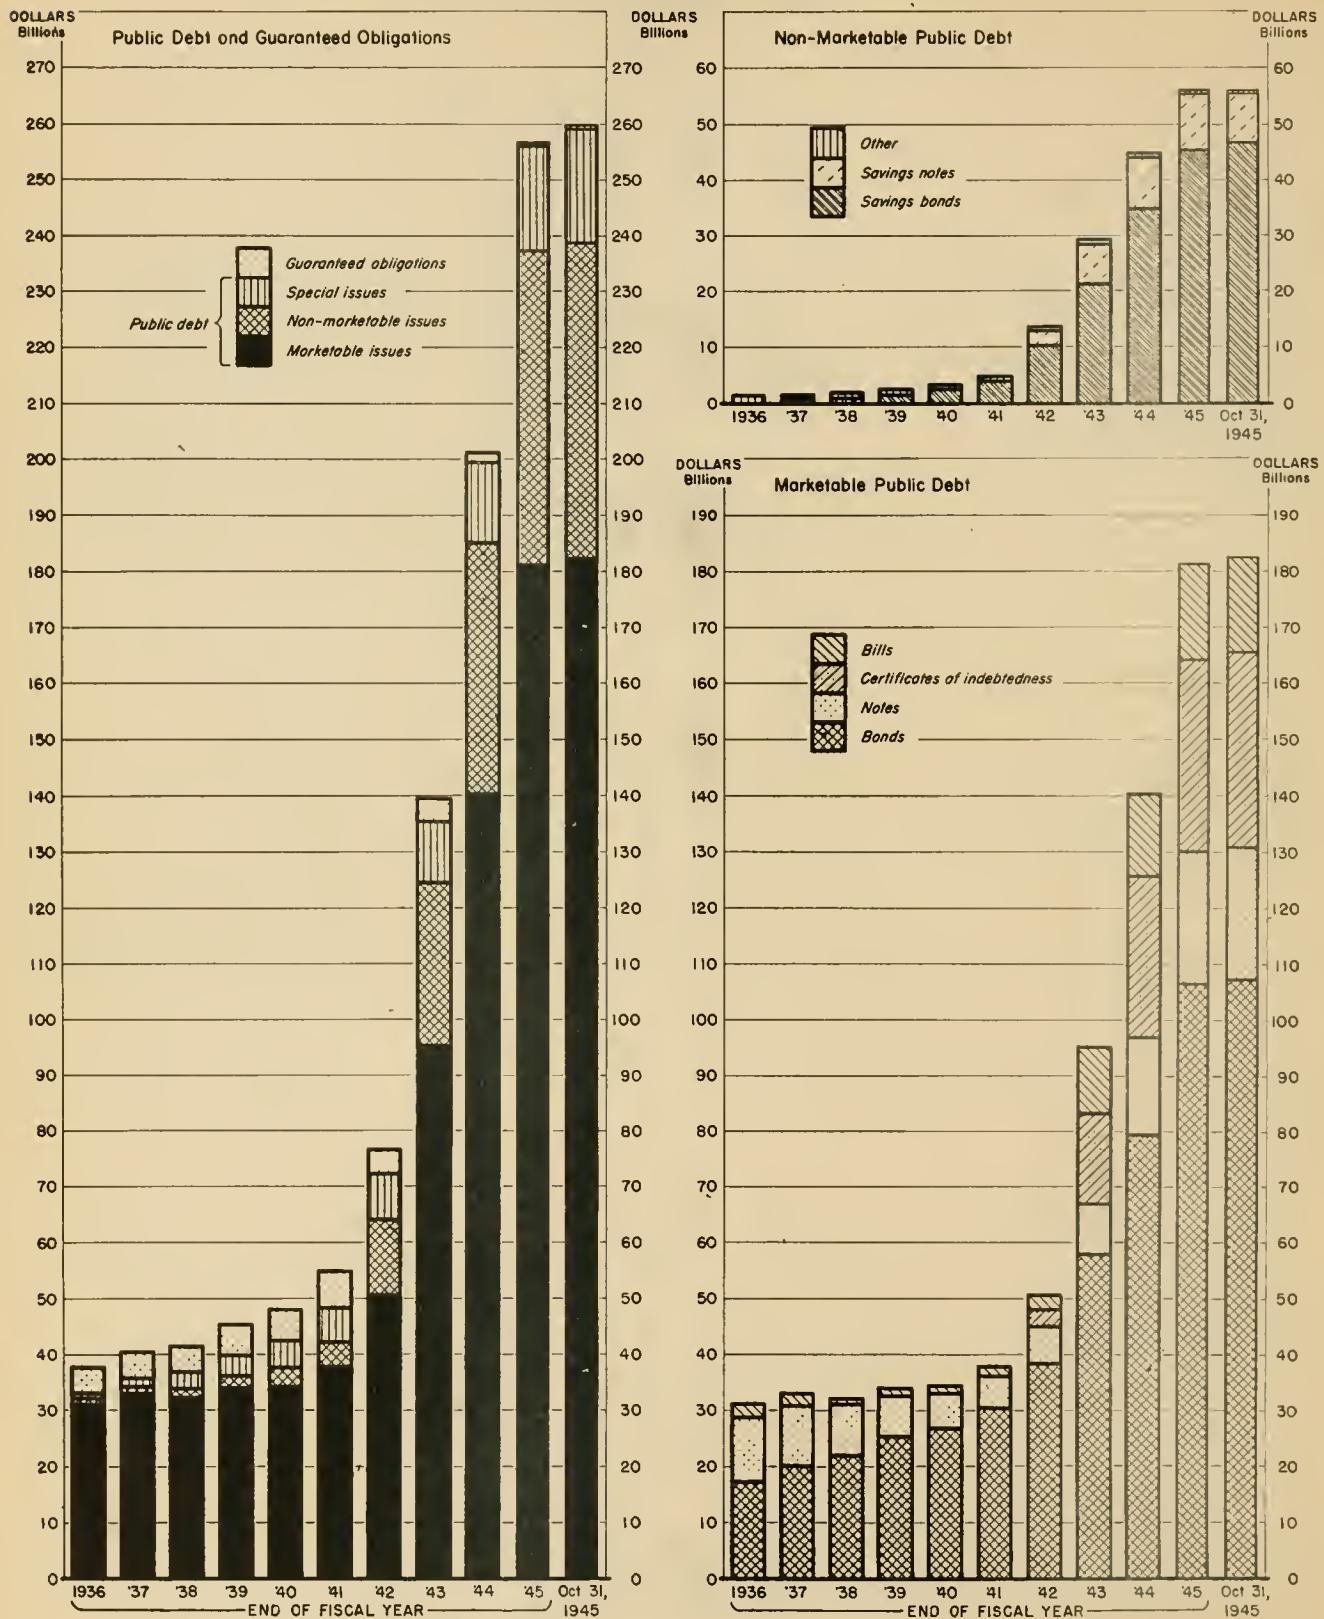

<sup>4/</sup> Consists of Reconstruction Finance Corporation notes, Series I-A.

L-B, and L-C, which were held by United States Government corporations and credit agencies.

<sup>5/</sup> Includes prepayments on securities.

Comencing with March 1945, figures for United States savings bonds include small amounts of Series A bonds which have matured but have not been turned in for payment.

## INTEREST-BEARING PUBLIC DEBT AND GUARANTEED OBLIGATIONS OF THE UNITED STATES GOVERNMENT

## Statutory Limitation on the Public Debt

Section 21 of the Second Liberty Bond Act, as amended, provides that the face amount of obligations issued under authority of that Act, and the face amount of obligations guaranteed as to principal and

interest by the United States (except such guaranteed obligations as may be held by the Secretary of the Treasury), shall not exceed in the aggregate \$300 billion outstanding at any one time.

Table 1.- Condition as of October 31, 1945

(In millions of dollars)

Maximum amount of securities which may be outstanding at any one time, under limitations imposed by Section 21 of the Second Liberty Bond Act, as amended.....	300,000
 Amount of securities outstanding subject to such statutory debt limitation:	
U. S. Government securities issued under the Second Liberty Bond Act, as amended 1/.....	271,464
Guaranteed securities 2/.....	558
Total amount of securities outstanding subject to statutory debt limitation.....	272,022
Balance issuable under such authority.....	27,978

1/ For comparison with the public debt outstanding, see following table 2.

2/ Excludes guaranteed securities held by the Treasury.

**Back Figures:** For period December 1941 through July 1943, see "Treasury Bulletin" for November 1944, page 32.

<sup>4/</sup> Reopening of previously offered security.

<sup>5/</sup> Interest commenced on October 15, 1943.

<sup>6/</sup> Announcement of exchange offering was included in announcement of Third War Loan, August 16, 1943.

<sup>7/</sup> Figures on amount of War Loan securities issued consist both of amounts issued in connection with the Drive, and of amounts issued concurrently with Drive to commercial banks and to Treasury investment accounts.

<sup>8/</sup> Interest commenced on March 15, 1944.

<sup>9/</sup> Interest commenced on June 26, 1944.

<sup>10/</sup> Interest commenced on September 15, 1944.

<sup>11/</sup> This is the same security that was offered in the Sixth War Loan.

<sup>12/</sup> Exchanged as of December 15, 1944 and accrued interest charged from December 1 to December 15.

<sup>13/</sup> Amounts not yet available.

<sup>1/</sup> In the case of the reopening of a previously offered security, the period to first call and to maturity are calculated from the date interest commences on the reopening.

<sup>2/</sup> Restricted issues are those which commercial banks (defined for this purpose as banks which accept demand deposits) are not permitted to acquire prior to a specified date, with two exceptions: (1) concurrently with the 4th, 5th and 6th War Loans and the Victory Loan, commercial banks were permitted to subscribe to the restricted issue offered in the War Loan for limited investment of their savings deposits; (2) commercial banks may temporarily acquire restricted issue through foreclosure when such issue have been used as collateral.

<sup>3/</sup> Consists of all public cash subscriptions and of subscriptions by U. S. Government agencies and trust funds.

## Offerings and Maturities of Treasury Bills

Source: (1) Total amounts outstanding: Daily Treasury Statements;

(2) Securities held by U. S. Government agencies and trust funds: reports of the agencies and accounts with the Treasury; (3) Securities held by Federal Reserve Banks: Federal Reserve System.

P Preliminary.

\* Less than \$500,000.

1/ Excludes matured securities, and obligations held by the Treasury. The total amount of securities held by private investors is calculated by deducting from the total amount of securities outstanding the securities held by U. S. Government agencies and trust funds and by Federal Reserve Banks.

\* Less than \$50,000.

1/ Consists of purchases or sales made by the Treasury. Treasury investment accounts comprise (1) trust funds which by law are under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain

U. S. Government agencies whose investments are handled through the facilities of the Treasury Department. This table also includes purchases under Section 19 of the Second Liberty Bond Act, as amended, and excludes the Exchange Stabilization Fund.

**Treasury Survey of Ownership of Securities Issued by the United States  
Government and by Federal Agencies, September 30, 1945**

**Section I - Securities Issued or Guaranteed by the United States Government**

The tables in Section I present summary data as of September 30, 1945 from the Treasury Survey of Ownership of Securities Issued or Guaranteed by the United States. The banks and insurance companies covered in the survey account for approximately 95

percent of the amount of such securities owned by all banks and insurance companies in the United States.

Section II presents summary data on the ownership of Federal land bank bonds.

**Table 1.- Summary: All Interest-Bearing Securities**

Back Figures: The Treasury Survey commenced with date for March 31, 1941 and has been published regularly in the "Treasury Bulletin" since May 1941. Revisions of data for September 30, 1944 appeared in the February 1945 issue, page 53; reclassification of data on banks for the period November 1943 through February 1944 appeared in the May 1944 issue, pages 52-57; revisions of data on insurance companies for May 31, 1943 and prior months appeared in the November 1943 issue, pages 52-63.

• Less than \$500,000 or less than .05%.

1/ Securities held in trust departments are excluded.

2/ Includes trust companies.

3/ This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See headnote to this section.

4/ Guaranteed securities held by the Treasury are not included. Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

5/ Includes an estimated amount of Federal Housing Administration debentures.

6/ Actual figures by tax status are unavailable.

• Less than \$500,000.

<sup>1/</sup> United States savings bonds, Series A-D, E, and F are shown at current redemption values. They were reported at maturity value by the banks and insurance companies covered in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

<sup>2/</sup> Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of prin-

cipal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

<sup>3/</sup> Securities held in trust departments are excluded.

<sup>4/</sup> Includes trust companies.

<sup>5/</sup> This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See headnote to this section.

<sup>6/</sup> Series A-D savings bonds sold prior to March 1, 1941 are partially tax-exempt; those sold on and after that date are taxable.

<sup>7/</sup> Guaranteed securities held by the Treasury are not included.

\* Less than \$500,000 or less than .05%.

1/ Includes trust companies but excludes securities held in trust departments.

2/ Guaranteed securities held by the Treasury are not included.

2/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.

"Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the

normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates.

"Taxable" securities are subject to both normal and surtax rates.

4/ Includes an estimated amount of Federal Housing Administration debentures.

5/ Actual figures by tax status are unavailable.

\* Less than \$500,000.

1/ United States savings bonds, Series A-D, E, and F are shown at current redemption values. They were reported at maturity value by the banks covered in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

2/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt

Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

3/ Includes trust companies but excludes securities held in trust departments.

4/ Series A-D savings bonds sold prior to March 1, 1941 were partially tax-exempt; those sold on and after that date are taxable.

5/ Guaranteed securities held by the Treasury are not included.

6/ Distribution by type of bank is partly estimated.

<sup>1/</sup> Excludes Federal Housing Administration debentures.<sup>2/</sup> Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.<sup>3/</sup> Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.<sup>4/</sup> Included in the Average of Long-Term Taxable Treasury Bonds.<sup>5/</sup> Quoted on a yield basis.<sup>6/</sup> Not quoted on October 31, 1945.<sup>7/</sup> This security was issued on November 1, 1945, in the amount of \$1,318 million.<sup>8/</sup> This is the only bond eligible to remain in the Average of Long-Term Partially Tax-Exempt Treasury Bonds.<sup>9/</sup> Excludes postal savings bonds.

Over-the-Counter Closing Quotations on Public Marketable Securities Issued by the  
United States Government and by Federal Agencies  
October 31, 1945 - (Continued)

1/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "When issued" prices for all securities except Federal Intermediate Credit Bank debentures are included beginning November 1, 1941. Dates of highs and lows, in case of recurrence, are the latest dates.

2/ Market convention treats the yield to earliest call date as more

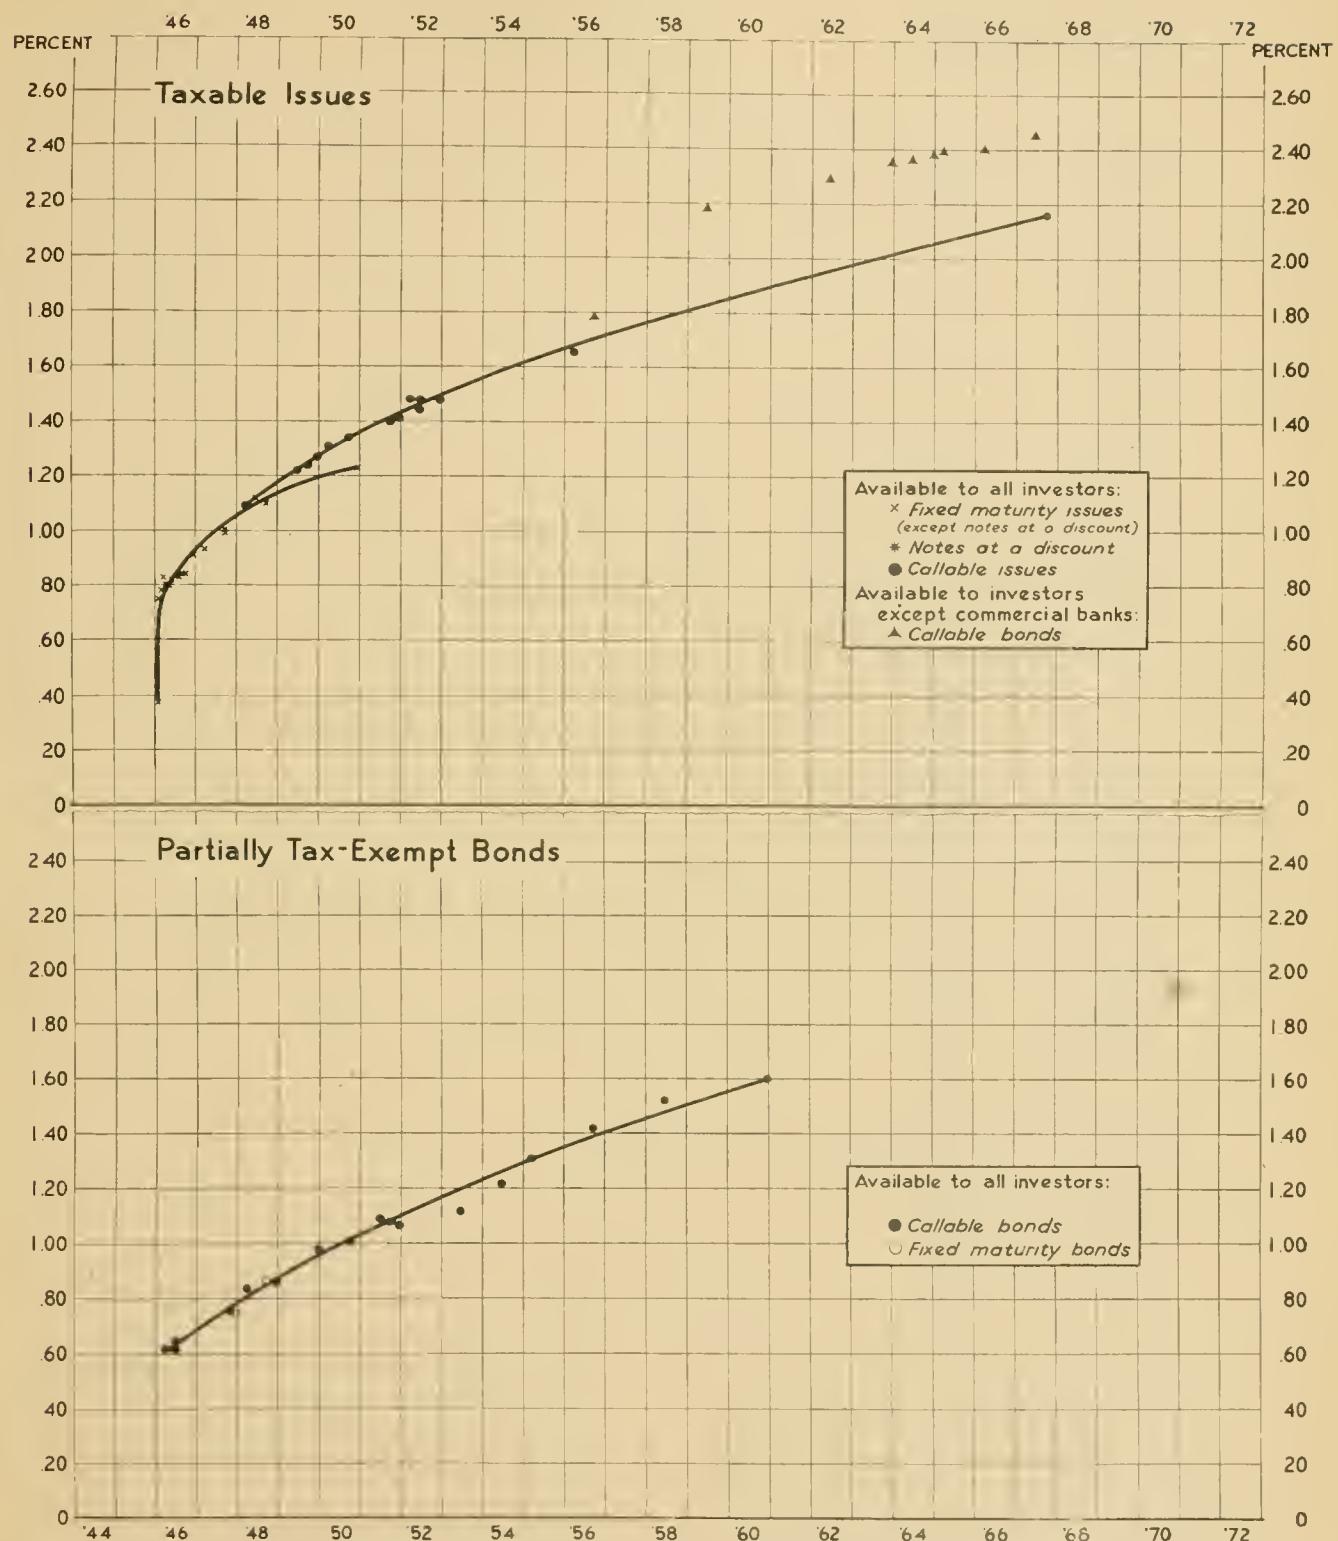

significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

3/ Prices quoted are subject to a dealer's commission. These securities are not shown until date of issue.

4/ Excludes issues completely held by Farm Credit Administration agencies.

## YIELDS OF TREASURY SECURITIES OCT 31, 1945

Based on Mean of Closing Bid and Asked Quotations

**Explanation** The points represent yields to call date when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Basis of Computation: (1) Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Back Figures: Monthly and weekly data for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944, pages 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of average see "Treasury Bulletin" for March 1944, page 58. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax, except that in the case of partially tax-exempt Treasury and United States savings bonds, interest derived from

\$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

2/ For discussion of present composition of high-grade corporate bond average, see "Treasury Bulletin" for January 1945, page 56; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treasury Bulletin" for April 1943, page 61.

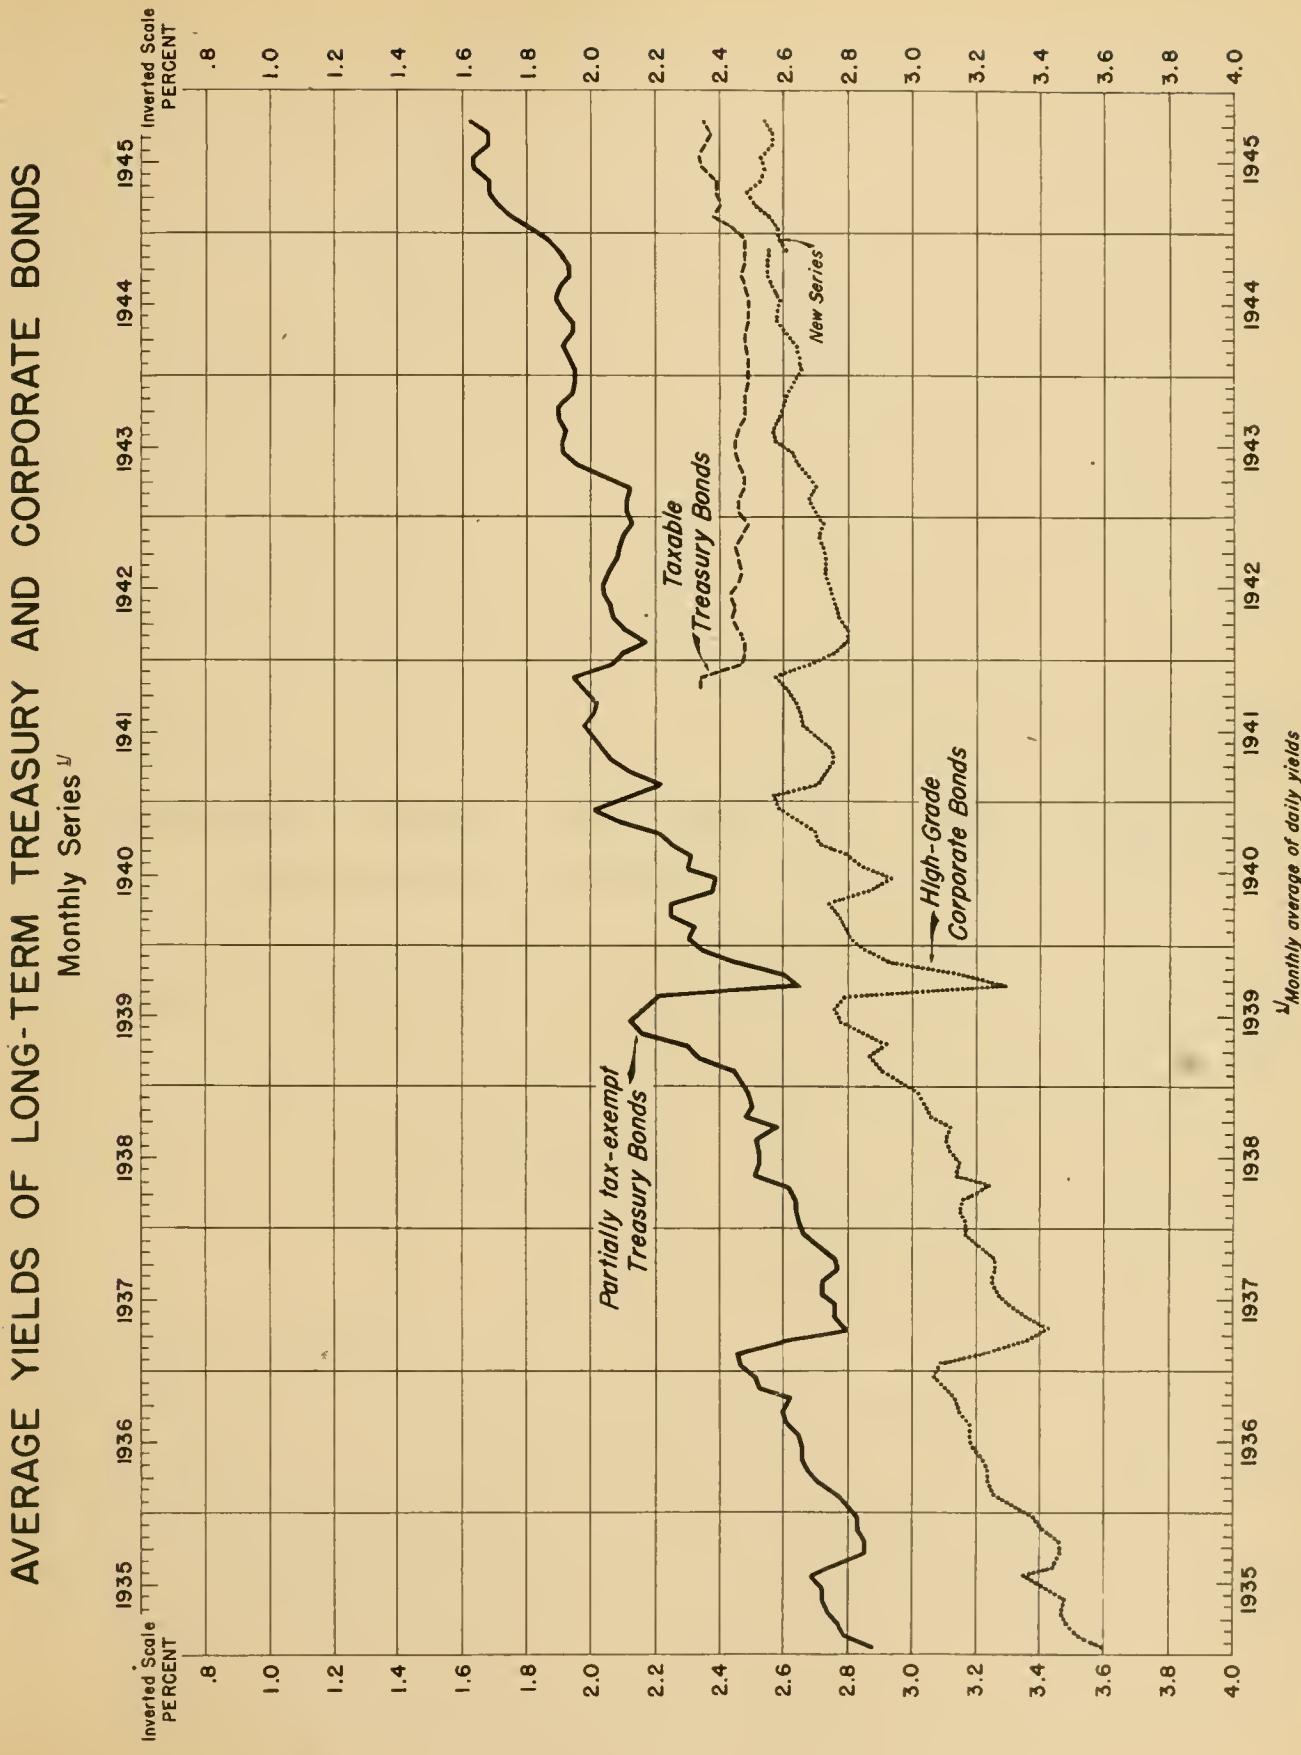

3/ Monthly averages of daily figures. Prior to April 1, 1938, corporate bonds are averages of Saturday figures.

4/ The composition of the high-grade corporate bond average was revised commencing with November 1, 1944. The old average for November 1944 was 2.56%. See footnote 2.

5/ On days when the exchanges are closed, the date and prices of the previous day are used.

6/ Holiday.

7/ Closed.

Source: Daily Treasury Statement, November 15, 1945.

\* Less than \$50,000.

1/ Figures are as of August 31, 1945 the latest available.

2/ Consists of Agricultural Marketing Act Revolving Fund and Emergency Crop and Feed Loans.

3/ Consists of Indian Loans, Puerto Rican Hurricane Relief Loan Section, and Puerto Rico Reconstruction Administration.

4/ Consists of Public Works Administration and War Public Works, Community Facilities.

5/ Consists of Navy Department, sale of surplus supplies (World War I), and guaranteed loans (World War II); War Department, guaranteed loans (World War II); Federal Public Housing Authority, war housing and subsistence homesteads; Federal Security Agency, loans to students; and Treasury Department, miscellaneous loans and certain other assets.

6/ Excludes unexpended balances of appropriated funds.

7/ Consists of accounts and notes receivable, accrued assets, and advances to contractors and agents.

8/ Consists of deferred charges, undistributed charges, and other assets.

9/ Consists of deferred credits, undistributed credits, and other liabilities (including liability reserves).

10/ Includes the value of vessels and other expenses transferred from the U. S. Maritime Commission.

11/ Excludes the value of vessels and other expenses transferred to the War Shipping Administration for which no transfer of funds will be required.

12/ Represents excess of expenditures incurred pursuant to legislation for such activities as: Construction and operation of merchant marine fleet in interest of the war effort; relief to farmers; loans and grants for rural rehabilitation and subsistence homesteads; relief and rehabilitation in Puerto Rico; loans, grants, and relief in construction of housing, public works, and community facilities; and others.

13/ Negative figures indicate excess of expense.

14/ Includes \$67.2 million representing equity of mortgagors in earnings of group accounts of the Mutual Mortgage Insurance Fund.

15/ Consists of paid-in capital (U. S. owned), less Treasury loans to Government corporations, plus excess of income (or expense).

16/ Negative figures indicate amounts due from Government agencies.

Sources: (1) Total receipts from internal revenue: Daily Treasury Statements; (2) Detailed collections by type of tax: Reports of collections made by collectors of internal revenue.

r Revised.

• Less than \$500.

1/ Excludes collections for credit to certain trust accounts for territories and insular possessions, etc.

2/ Consists only of collections for which returns have been filed with the Collector of Internal Revenue. Collections under this act as shown in Daily Treasury Statements consist of withholdings deposited in Government depositaries in addition to payments accompanying returns filed with the Collector of Internal Revenue.

3/ Current collections consist in general of taxes paid within twelve months after the close of the taxable year for which the return was

filed.

4/ Current individual income tax collections for the fiscal year 1945 include payments on unforgiven portion of 1942 tax, due March 15, 1945, of \$308,605 thousand for the period January 1, 1945 through April 30, 1945.

5/ Revisions represent payments on 1944 estimated tax (Form 1040 ES for 1944) previously classified as back taxes, now classified as current taxes.

6/ Represents collections under the Federal Insurance Contributions Act.

7/ Represents collections under the Federal Unemployment Tax Act.

8/ Represents collections under the Carriers' Taxing Act of 1937.

9/ Tax imposed upon the manufacture and sale of, and the occupational tax on, mixed flour repealed as of November 1, 1942.
