Corporation Income and Taxable Excess Profits Tax Returns for 1942

Secretary of the Treasury Vinson recently made public a series of three tabulations from Statistics of Income for 1942, Part 2, 1/. These tabulations were compiled from corporation income tax returns (Form 1120) and taxable corporation excess profits tax returns (Form 1121). A summary of the data in the releases is presented in this article. The complete report, Statistics of Income for 1942, Part 2, will be published at some future date.

Income tax returns

A total of 479,677 income tax returns were filed for 1942. Of these, 269,942 returns reported net income 2/ totaling \$24.1 billion, 172,723 reported deficits totaling \$1.0 billion, and the remaining 37,012 (returns of inactive corporations) showed no income data. The income tax liability reported totaled \$4.3 billion. The following table presents a comparison of 1942 data with similar data for 1941.

- 1/ Treasury Department, Press Service Nos. V-33, V-34, and V-35, dated August 24, August 27, and August 30, 1945.
2/ Net income or deficit as used throughout this report is the amount reported for declared value excess-profits tax computation adjusted by excluding the net operating loss deduction. Net income for declared value excess-profits tax computation includes intercorporate dividends received.

Taxable excess profits tax returns

A total of 54,002 taxable excess profits tax returns were filed for 1942. The excess profits tax liability reported was \$7.9 billion. The following table shows the number of returns, credits, and tax for 1941 and 1942.

	1942	1941	Increase	
			Amount	Per cent
(Money figures in millions of dollars)				
Number of returns	54,002	42,412	11,590	27
Excess profits net income <u>3/</u>	17,084	12,073	5,012	41
Adjusted excess profits net income <u>4/</u>	10,495	6,335	4,160	66
Excess profits tax, net <u>5/</u>	7,852	3,359	4,493	134

Table 1, Part A at the end of this article gives more detailed data on the number of income tax returns filed, income earned, and taxes paid, by major industrial groups. Table 1, Part B gives similar data by net income and deficit classes.

- 3/ Excess profits net income is obtained from net income by making certain adjustments, consisting principally of the exclusion of long term capital gains and losses, dividends received, and the declared value excess-profits tax, and the inclusion of the net operating loss deduction.
4/ Adjusted excess profits net income is the excess profits net income less the sum of the specific exemption, the excess profits credit, and the unused excess profits credit adjustment.
5/ The excess profits tax shown is that imposed by section 710 of the Internal Revenue Code, and should not be confused with the declared value excess-profits tax. For 1942, the tax is shown after deduction of the credit for debt retirement and the net postwar refund.

Compiled net profit

The 442,665 returns of active corporations showed compiled net profits 1/ of \$23.4 billion. After total taxes, 2/ this amounted to \$11.1 billion. From the latter figure, dividends (other than the corporation's own stock) of \$5.6 billion were paid. The table below shows a comparison of these items for 1941 and 1942.

	1942	1941	Increase or decrease	
			Amount	Percent
(Money figures in millions of dollars)				
Number of returns.	442,665	468,906	-26,241	-5.6

Compiled net profit less total tax <u>2/</u>	11,132	9,507	1,625	17.1
Dividends paid, other than corporation's own stock.....	5,607	6,701	-1,094	-16.3

Table 1, Part C at the end of this article gives detailed information on compiled receipts and deductions, tabulated by major industrial divisions.

Assets and liabilities

The number of returns with balance sheets filed was 383,534. These reported total assets of \$360.0 billion. For 1941, total assets reported were \$340.5 billion, for 407,053 returns. Table 2, Part A at the end of this article gives detailed assets and liabilities for these returns, classified by major industrial divisions. Table 2, Part B gives similar information by total assets classes.

Coverage of statistics and comparability with previous years

The three releases summarized in this article furnish the following information. The first release, Press Service No. V-33, includes data on the number of returns filed, net income 3/ reported, and tax liability. Tabulations given consist of one by major and minor industrial groups and another by size of net income or deficit. The second release, Press Service No. V-34, gives compiled receipts and deductions, compiled net profit or loss, 4/ taxes, and dividends paid,

- 1/ Compiled net profit differs from net income or deficit as used in this article in that it includes tax-exempt interest. It includes intercorporate dividends received and excludes the net operating loss deduction.
2/ Total taxes include normal tax and surtax, excess profits tax, and declared value excess-profits tax.

tabulated by major industrial groups. The third release, Press Service No. V-35, covers corporation returns with balance sheets, and gives assets and liabilities, compiled receipts and deductions, compiled net profit or loss, taxes, and dividends paid. Two tabulations are given, one by major industrial groups and the other by total assets classes.

The data presented in these releases are tabulated from returns for the calendar year 1942, for fiscal years ending between July 1, 1942 and June 30, 1943, and part years with the major part of the accounting period falling in 1942. Returns filed by foreign corporations engaged in business in the United States are included. The statistics were compiled from the returns as filed, prior to revisions that may be made as a result of audit by the Bureau of Internal Revenue, and prior to any changes which may result from renegotiation of war contracts after the returns were filed.

The comparability of the data for 1942 with similar data for 1941 is affected by changes in the law introduced by the Revenue Act of 1942. Under the law as amended by this Act, the relationship between the income tax and the excess profits tax was altered; in 1941, the excess profits tax was allowed as a deduction in computing normal tax net income, whereas in 1942, income subject to excess profits tax was allowed as a deduction. The rates of tax were increased; the excess profits credit computed under the invested capital method was decreased for invested capital over \$10 million; provision was made for a postwar refund of 10 percent of the excess profits tax; and the provisions were changed with respect to the filing of consolidated returns, the treatment of capital gains, the computation of fiscal year taxes, the computation under the average earnings method, and the treatment of life insurance companies. Further information with respect to changes may be found in the original releases.

A summary of advance tabulations from 1943 taxable corporation income and excess profits tax returns received by December 31, 1944, was published in the September 1945 issue of the "Treasury Bulletin."

- 3/ Net income or deficit as used throughout this report is the amount reported for declared value excess-profits tax computation adjusted by excluding the net operating loss deduction. Net income for declared value excess-profits tax computation includes intercorporate dividends received.
4/ Compiled net profit or loss differs from net income or deficit as defined in footnote 3/ above in that it includes tax-exempt interest.

* Less than \$500.

1/ "Net income" or "deficit" is the amount reported for declared value excess profits tax computation adjusted by excluding the net operating loss deduction.

2/ The industrial classification is based on the business

activity reported on the return. When multiple businesses are reported on a return, the classification is determined by the business activity which accounts for the largest percentage of total receipts. Therefore, the industrial groups do not reflect pure industry classifications.

3/ Total number of returns includes returns of inactive corporations.

4/ Total compiled receipts excludes non-taxable income other than tax-exempt interest on certain Government obligations.

5/ The excess profits tax shown is that imposed by section 710 of the Internal Revenue Code, and reported on excess profits tax returns, Form 1121, for 1942, and should not be confused with the

declared value excess-profits tax, which was enacted with the capital stock tax in 1933. The amount shown is after deduction of the credit for debt retirement and the net postwar refund. Owing to the non-availability of data, \$15,723 thousand of the total excess profits tax shown is not distributable by industrial groups.

1/ "Net income" or "deficit" is the amount reported for declared value excess-profits tax computation, adjusted by excluding the net operating loss deduction.

2/ The excess profits tax shown is that imposed by section 710 of the Internal Revenue Code, and reported on excess profits tax returns, Form 1121, for 1942. It should not be confused

with the declared value excess-profits tax, which was enacted with the capital stock tax in 1933. The amount shown is after deduction of the credit for debt retirement and the net postwar refund.

1/ Number of returns excludes inactive corporations.

2/ "Gross sales" consists of amounts received for goods, less returns and allowances, in transactions where inventories are not an income-determining factor.

3/ "Gross receipts from operations" consists of amounts received from transactions in which inventories are not an income-determining factor.

4/ Amount shown as "Rents and royalties" consists of gross amounts received. The amounts of depreciation, repairs, interest, taxes, and other expenses, which are deductible from the gross amount received for rents, and the amount of depletion, which is deductible from the gross amount of royalties received, are included in the respective deduction items.

5/ "Net gain or loss, sales other than capital assets" is the net amount of gain or loss arising from the sale or exchange of depreciable property and real property used in trade of business.

6/ Total compiled receipts excludes non-taxable income other than tax-exempt interest on certain Government obligations.

7/ Where the amount reported as "Cost of goods sold" or "Cost of operations" includes items of deductions such as depreciation, taxes, etc., these items ordinarily are not transferred to their specific headings. However, an exception is made with respect to amortization of emergency facil-

ties reported in costs, such amount being transferred to "Amortization".

8/ Amount shown as "Repairs" is the cost of incidental repairs, including labor and supplies, which do not add materially to the value of the property or appreciable prolong its life. The item "Taxes paid" excludes (1) Federal income tax and Federal excess profits taxes, (2) estate, inheritance, legacy, succession, and gift taxes, (3) income taxes paid to a foreign country or possession of the United States if any portion is claimed as a tax credit, (4) taxes assessed against local benefits, (5) Federal taxes paid on tax-free covenant bonds, and (6) taxes reported in "Cost of goods sold" and "Cost of operations".

9/ Amount shown as "Amortization" is the deduction provided by the Second Revenue Act of 1940 with respect to the amortization of the cost of emergency facilities necessary for national defense.

10/ The excess profits tax shown is that imposed by section 710 of the Internal Revenue Code, and reported on excess profits tax returns, Form 1121, for 1942, and should not be confused with the declared value excess profits tax, which was enacted with the capital stock tax in 1933. The amount shown is after deduction of the credit for debt retirement and the net post-war refund. Owing to the non-availability of data, \$16 million of the total excess profits tax shown is not distributable by industrial groups.

1/ Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rates of

interest on United States savings bonds, Series A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.55%.

2/ Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

1/ Excludes (1) postal savings bonds and (2) Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).

2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities.

3/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

r Revised.

• Less than \$50,000.

1/ At current redemption values except Series G, which is stated at par.

2/ Estimated, except for Series G.

3/ For details concerning investment yields and redemption values, see "Treasury Bulletin" for May 1945, page A-4.

4/ Commercial bank purchases were permitted prior to April 1, 1940, and are estimated to have aggregated about \$300 million.

5/ Not yet available.

6/ Series A-D, sold between March 1935 and April 1941, are 10 year discount bonds sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases were limited to \$7,500 issue price in any calendar year and from April 1, 1940, could be made only by individuals. Series A bonds began to mature in March 1945. For information on the approximate monthly distribution of maturities during 1945 see "Treasury Bulletin" for March 1945, page A-2. The small amounts of matured bonds which have not been redeemed remain in the amount outstanding.

7/ There were \$143.0 million of Series A-D and E savings bonds redeemed through September 30, 1945 which had not been identified by series. For purposes of this table, it has been assumed that all of these were Series E bonds.

8/ Series E, on sale since May 1, 1941, is a 10 year discount bond

sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases are limited to \$3,750 issue price in any calendar year and may be made only by individuals.

2/ Series F and G have been on sale since May 1, 1941. Series F is a 12 year discount bond sold at 75% of maturity value, yielding 2.53% per annum if held to maturity. Series G is a 12 year current income bond, sold at par, bearing interest at the rate of 2-1/2% per annum, redeemable at par on maturity or at stated price less than par before maturity. Purchases of Series F and G combined in any one calendar year are limited to \$100,000 issue price (\$50,000 in calendar year 1941). Commercial banks were permitted to purchase Series F and G bonds during the calendar year 1944 under certain conditions ("Treasury Bulletin" for December 1944, page 36, footnote 9); and from June 18 through June 30, 1945 they were again permitted to make such purchases, subject to the following limitations: (1) purchases of Series F and G bonds from June 18 through June 30 were not to exceed the annual limit of \$100,000; and (2) combined purchases of Series F and G bonds, 1-1/2% Treasury bonds due 12/15/50, and 7/8% certificates of indebtedness due 6/1/46 may not exceed 10% of the combined amount of time certificates of deposit of individuals and non-profit corporations or associations and of savings deposits, or \$500,000, whichever may be less.

1/ It should be noted that State figures presented in this table are not necessarily comparable with sales data by States inasmuch as bonds which have been purchased in one State may have been redeemed in another. Moreover, the figures shown in this table are based on

current redemption values, whereas the sales figures are shown at issue price. Data on redemptions by States are not available prior to October 1944.

2/ Includes Series A bonds which have matured and which have been retired.

* Less than \$50,000.

1/ These notes were originally designed to help taxpayers set aside funds with which to pay taxes and were known as Treasury tax savings notes. Series A notes were designed for the small and moderate taxpayer; Series B and Series C notes were intended for the large taxpayer. When the collection of taxes through withholding at the source commenced, the need for Series A tax savings notes disappeared and their sale was discontinued. Redemption provisions of Series A notes were relaxed to provide for the payment of interest on notes thereafter redeemed for cash (see footnote 3). Sale of Series C notes, which were designed for the investment of idle cash reserves as well as for the accumulation of tax reserves, was continued and the notes were designated Treasury savings notes.

2/ Includes matured Treasury savings notes.

3/ Series A notes, which were sold from August 1, 1941 through June 22, 1943, yield approximately 1.92% per annum. Through June 22, 1943, the notes could be redeemed for cash only at the original purchase price; since that date, the notes have been redeemed for cash at

the tax payment value current at the time of presentation. (See also footnote 1.) Prior to October 4, 1943, the maximum amount which could be used in payment of each class of tax (income, estate, or gift) by each taxpayer during each taxable year was limited to \$5,000 par value; this limitation was removed as of that date.

4/ Series B notes were sold from August 1, 1941 through September 12, 1942, to yield approximately 0.48% per annum. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash only at the original purchase price.

5/ Series C notes went on sale September 14, 1942. Interest accrues each month on a graduated scale (see "Treasury Bulletin" for August 1943, page 4) to yield approximately 1.07% per annum if held to maturity. These notes may be used in payment of Federal taxes at any time two months after the date of issue. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash six months after the date of issue at the tax payment value current at the time of presentation. Prior to July 27, 1943, notice of 30 days was required for cash redemption. See also footnote 1.

4/ Includes trust companies.

5/ This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See headnote to this section.

6/ Series A-D savings bonds sold prior to March 1, 1941 are partially tax-exempt; those sold on and after that date are taxable.

Basics of Computation: (1) Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Back Figures: Monthly and weekly data for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944, pages 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of average see "Treasury Bulletin" for March 1944, page 58. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax, except that in the case of partially tax-exempt Treasury and United States savings bonds, interest derived from

\$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

2/ For discussion of present composition of high-grade corporate bond average, see "Treasury Bulletin" for January 1945, page 56; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treasury Bulletin" for April 1943, page 61.

3/ Monthly averages of daily figures. Prior to April 1, 1938, corporate bonds are averages of Saturday figures.

4/ The composition of the high-grade corporate bond average was revised commencing with November 1, 1944. The old average for November 1944 was 2.56%. See footnote 2.

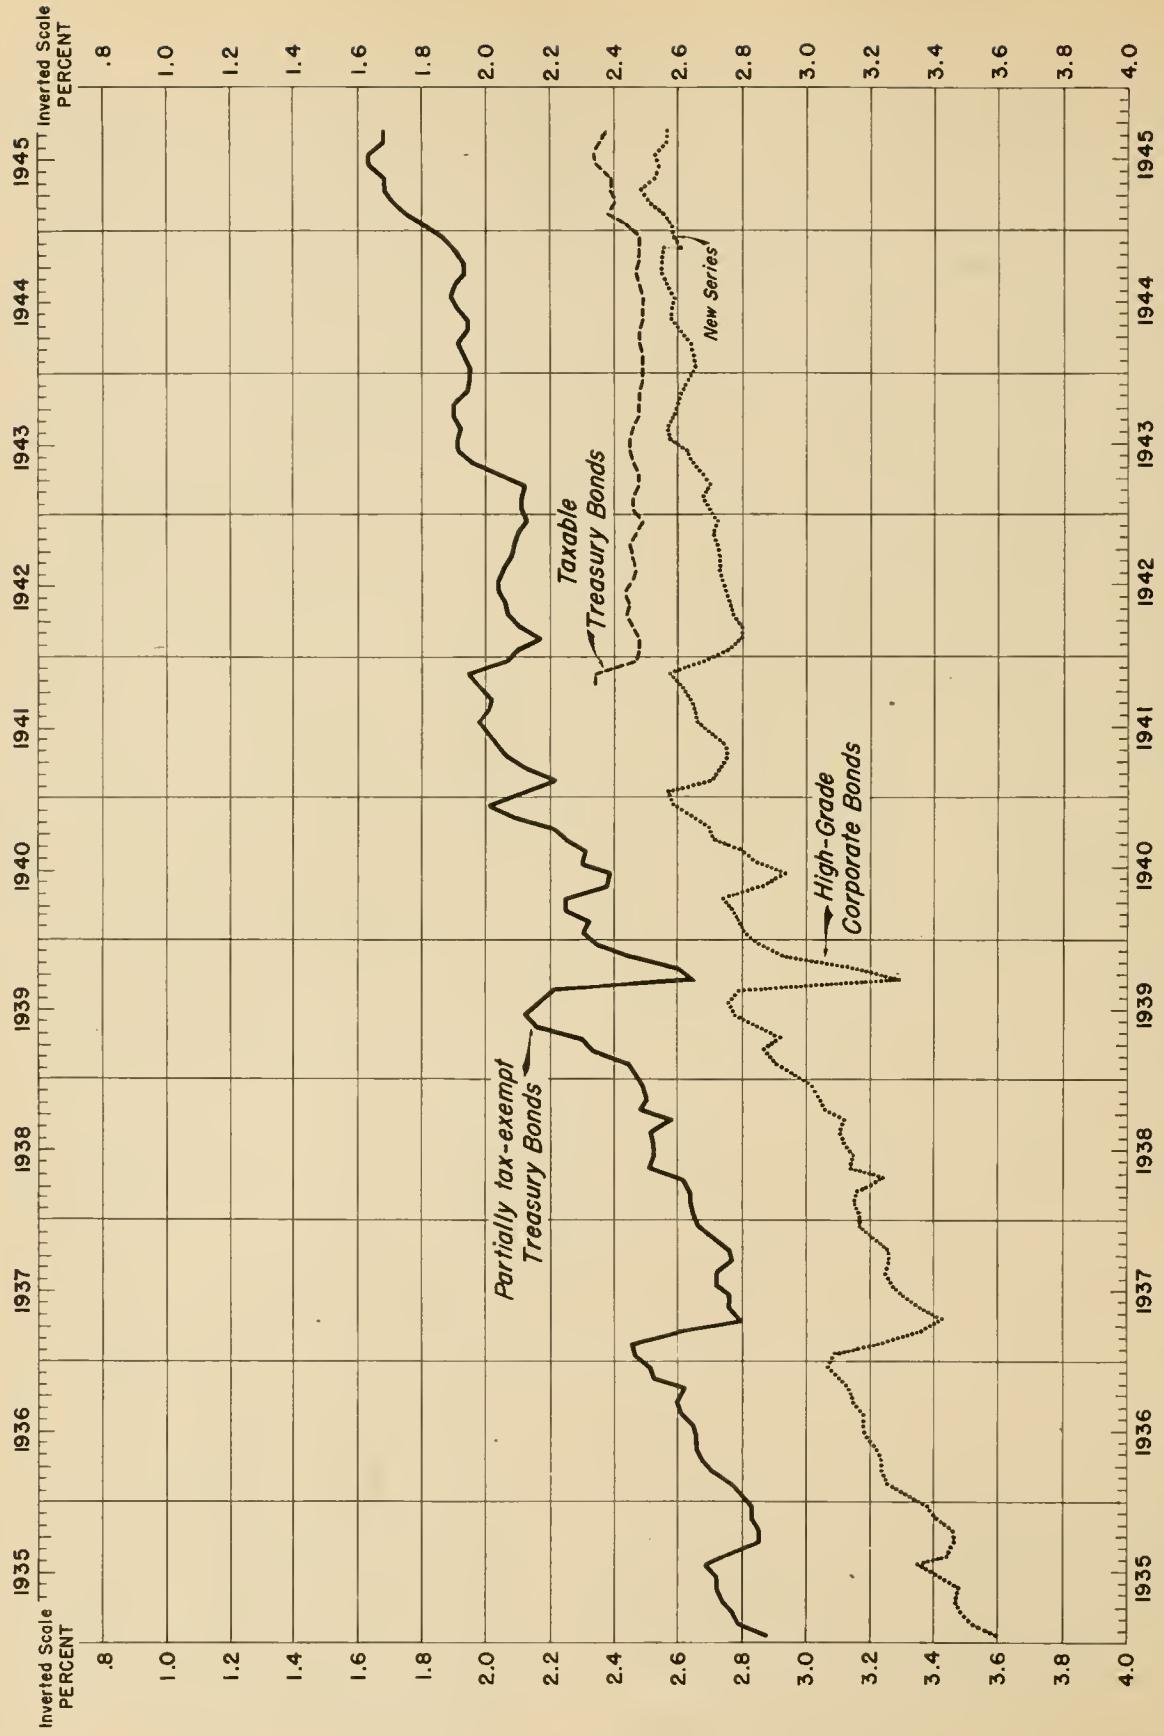

5/ On days when the exchanges are closed, the date and prices of the previous day are used.

6/ Closed.

CAPITAL MOVEMENTS BETWEEN
THE UNITED STATES AND FOREIGN COUNTRIES

Capital Movements Between the United States and Foreign Countries

Publication of statistics resumed

Publication is resumed in this issue of the "Treasury Bulletin" of detailed information on capital movements between the United States and foreign countries, the short-term foreign assets and liabilities of reporting banks and brokers in the United States, and the position in foreign currencies of reporting banks and bankers. Publication of this information was discontinued as of January 1942 for reasons of national security.

Summary information for the period January 1942 through April 1945 and details for May 1945 appear in the following tables. A supplement to this issue of the "Treasury Bulletin" is being prepared which will provide additional information for the January 1942--April 1945 period and which will be available upon request.

Coverage of statistics

Banks, bankers, and securities brokers and dealers are the "reporters" of these data. They report with respect to (1) their foreign transactions in securities on their own account and on behalf of other institutions and individuals, and (2) the outstanding short-term foreign assets and liabilities in their own accounts or in accounts with them.

The term "foreigners" covers all institutions and individuals domiciled outside of the United States. Thus, foreign branches of United States institutions are regarded as "foreign" while the United States branches of foreign institutions are regarded as "domestic". The United States branches of foreign institutions report with respect to their liabilities to and claims on, as well as their transactions with or on behalf of, their head offices. The United States head offices report regarding their branches abroad in like manner. In addition, assets and liabilities held by non-reporting domestic custodians, nominees, or agents acting on behalf of or for the benefit of persons or institutions domiciled outside of the United States, and transactions in securities executed by such custodians, nominees, or agents are reportable by banks and brokers to the extent that the relationship is known.

"Foreign countries" include all countries and territories except continental United States and the following territories and possessions of the United States: Alaska, American Samoa, the

Canal Zone, Guam, Hawaii, Midway Island, Puerto Rico, Virgin Islands, and Wake Island.

Assets, liabilities, and transactions expressed or executed in foreign currencies are converted at the rates of exchange prevailing on the reporting date or when the transactions were executed.

Capital movements

The "capital movement" tables relate to the net flow of funds between the United States and other countries. Included therein are (1) the net change in the short-term liabilities of United States banks to foreigners, (2) the net change in the short-term assets of United States banks and their customers in foreign countries, (3) the net changes in brokerage debit and credit balances and (4) the net purchases and sales of domestic and foreign long-term securities by foreigners.

The data regarding "capital movements" do not purport to cover fully the international movement of funds; they do identify the trends in the movement of funds. One of their principal defects is that the short-term data are obtained by subtracting the book balances of one date from those of another without its being possible to take account of such changes as the writing off of a bad debt or the classification of an account as domestic, which previously had been considered as foreign, because the owner has acquired domicile in this country. Furthermore, these data do not cover the entire range of international capital transactions. Among the omitted types of data the principal ones are: (1) the movements of the short- and long-term funds of corporations and individuals that are not handled through the agency of reporting banks or brokers in the United States, such as direct investments by corporations, and (2) the capital transactions of the United States Government. The latter became of prime importance only during the war.

"Short-term foreign assets and liabilities" are defined as those payable on demand or maturing not more than one year from date of report, except that securities having a maturity of more than one year from the date of issuance are classed as long-term even when they come within one year of maturity.

The reporting of United States liabilities to foreigners is probably more nearly complete

than that of United States assets abroad because, while the reporting banks are in a position to report their own liabilities to foreign individuals and corporations, they often do not have knowledge of the short-term foreign assets belonging to individuals and corporations in the United States. Funds placed abroad for the account of domestic clients and funds earmarked abroad or in this country for specific uses, such as the payment of interest, are included in the reported data.

Long-term securities are defined as those having no contractual maturity and those of a maturity of more than one year from the date of issuance. Holdings of securities with an original maturity of less than one year are included in the reported short-term assets and liabilities.

The data on securities transactions relate to the total amount of money debited or credited to foreign accounts as a result of transactions in long-term securities. (The amounts debited or credited to foreign accounts are defined as the cost of purchases plus commissions and other charges, or the proceeds of sales less commis-

sions, etc.). Purchases and sales of long-term securities executed in the United States for account of foreigners and purchases and sales executed abroad for the reporter's account or for the account of domestic clients are both included. The redemption of securities in the United States or abroad, as well as purchases and sales for sinking fund purposes, are included, as are those connected with the underwriting of new issues.

Purchases and sales for arbitrage accounts in which the reporter participates as a principal jointly with a foreigner are also included to the extent that they are executed in the United States. The opposite side of the arbitrage transaction -- the sale or purchase executed abroad -- is not reportable.

Net position in foreign currencies

The "net position in foreign currencies" represents the net balance of the foreign currency claims and commitments of reporting banks and bankers. Outstanding spot and forward contracts are both included. Positions in gold or silver bullion are excluded.
