**Statement by Secretary Vinson on the Extension of the
Stabilization Act, before the House Banking and
Currency Committee, March 27, 1946**

I am always very pleased to appear before this able Committee of the Congress. Before this Committee comes some of the most important legislation considered by the Congress. I have ever found your work to be painstaking and thorough and all of the members of the Committee have a high devotion to duty and honesty of purpose.

Of all the important subjects you are called upon to consider, none, in my judgment, outranks the prevention of inflation. The extension of the Stabilization Act, without crippling amendments, is the biggest single aspect of our battle against inflation. We won this battle year after year during the war, and I am confident that now we are not going to walk off the field and lose by default.

The battle against inflation was my direct assignment from our great President, Franklin D. Roosevelt, for nearly two years. Later in the Office of War Mobilization and Reconversion, I had a no less vital interest in economic stabilization while William H. Davis was the field general in the Office of Economic Stabilization. At all times both of us had the courageous and able help of Chester Bowles, the Administrator of the Office of Price Administration. I should like to report also that Paul Porter was one of my assistants while I was in the Office of Economic Stabilization. He did a fine job for us there, and I have full confidence in his ability to administer with success the Office of Price Administration while Chester Bowles is carrying out the over-all program of economic stabilization. We were all fortunate to be working under a law that gave us full opportunity to accomplish the results that were desired and expected. We had a good team to administer the law. And my brief summary shows that the team, while having some changes, is still intact.

It is, I believe, a part of our common knowledge that war brings powerful inflationary pressures to bear on the economy. This is because a large proportion of the population is removed from its normal tasks of making goods and rendering services for the civilian population, and is placed, instead, in the business of making the goods and rendering the services of war. The product of the persons in the armed forces and in

the war industries is not of a type which can be sold to the civilian population; but the persons producing it continue to receive incomes, and these incomes will be spent, in large part, on the products of the persons still in the civilian industries. During war, all of the population is living on the product of only part of it.

An upward pressure on prices is inevitable, therefore, and can only be counteracted by vigorous measures on the part of the Government. In the case of the war which we have just finished, these upward pressures were the most powerful which have yet been generated in the American economy; but the American people, acting through their Government, combatted them so vigorously that the rise in prices during the war which has just ended was less than in any previous major war in which the United States has been engaged.

For a considerable period during World War II, about half of the national product was going for war purposes. This compares with a maximum of only about one-fourth of the national product going for war purposes in World War I - and then for a much shorter period. Yet, retail prices paid by consumers, as measured in each case by the index number of the Bureau of Labor Statistics, advanced only 31 percent between the outbreak of the war in Europe in 1939 and VJ-Day, as compared with a rise of 62 percent between the outbreak of the war in Europe in 1914 and Armistice Day.

What were the measures by which prices were thus held down during World War II? They may be grouped into three major classes: taxation, the stimulation of savings, and direct controls over prices and the physical allocation of goods.

All three of these methods were applied also in World War I; yet prices rose much more, although in response to weaker pressures. Why, then, were we so much more successful in World War II?

In the first place, we applied all of the methods in a more vigorous fashion. This was made possible, in large part, because we started sooner. We took our first step toward the war-

time level of taxation with the enactment of the first Revenue Act of 1940 in June 1940; we formed the Advisory Commission to the Council of National Defense in May 1940, and so commenced the organization of the allocation of goods on the physical level; we formed the Defense Savings Staff in March 1941, and so commenced the organization of war savings. In World War I, all of the corresponding steps were taken after we had entered the war.

As a consequence, in part, of starting earlier, we have achieved better results on the fiscal front in World War II. From July 1, 1940, about the beginning of the program of defense finance, to the present time, 44 percent of the expenditures of the Federal Government have been covered by taxation and other nonborrowing receipts. This compares with 33 percent for the World War I period beginning with the outbreak of the war in Europe and continuing to June 30, 1919.

The most important difference between World War I and World War II, however, is the difference in emphasis on the different types of controls. We learned a great deal from experience. In World War I, very little emphasis was placed on direct controls. There was no rationing at the retail level; and no public announcement of fixed prices, even of war goods, until September 1917. Furthermore, such price control and allocation as existed were removed almost immediately after the Armistice.

The inflationary pressures generated by a war continue for some time after it has been concluded on the battlefronts. In World War I, retail prices rose 62 percent in the 52 months between the outbreak of the war in Europe in 1914 and Armistice Day. From Armistice Day until June 1920, retail prices rose another 46 points, making a total of 108 percent above the 1914 level. On the other hand, retail prices have risen only 0.5 percent between VJ-Day and January 15, 1946.

The problem before us is to prevent a repetition of the experience after World War I. We can prevent it if we try; and one of the most important things to do is to extend the Stabilization Act with as little delay as possible.

The task ahead of us does not appear so difficult if we remember the work that we have done. During the fight against the armed enemy abroad and the insidious enemy of inflation at home, we had our headaches and our heartaches. There were shortages of raw materials. There were great transfers of manpower from peacetime pursuits to

war production, and from the homes to the factories. There were kinks in the production line and in the transportation system. In large part we had to prepare for war after the battle had started. And we were fighting enemies who had prepared for years. Yet we overwhelmed the enemy with our armed might, had more than enough to live on at home, and kept our economy on even keel.

After the shooting stopped we had to change over again, this time from war to the pursuits of peace. Again we have had our problems. By and large, however, the job is done, and we can say it was well done.

Today we can be more optimistic about the future than ever before. It would be pathetic if we muffed this grand opportunity. We must maintain our controls over inflation a little longer.

In view of the work I have had in the field of stabilization, I have, of course, a strong personal interest in the subject. Of much more importance, however, is the fact that as Secretary of the Treasury I have a vital official interest in the prevention of inflation.

Two of the most important subjects in the Treasury Department are taxes and the management of the public debt. Inflation, or its prevention, has a direct effect on both problems.

At present we are travelling a sound and pleasant road. Our receipts are larger than the estimates made at the time of the President's Budget Message. In fact, our net receipts from July 1, 1945, through March 22, 1946, have been only 2 percent less than during the corresponding period of the previous fiscal year. Our revenues have been large because our national income has stayed at a high level. Meanwhile, expenditures are smaller than the estimates made at the time of the Budget Message. In fact, our expenditures in February were \$3,500 million against the high of \$9,700 million last June. This decline of nearly two-thirds in eight months is because we have all made a wholehearted effort to leave the wartime basis and adopt the peacetime course. The two together mean that we are well on the way to a balanced budget. That has a novel sound, but it is a happy situation which I am glad to report to this Committee, to the Congress, and to all the people of the country who have the same problem in their daily lives.

With our current expenditures much lower, the cash balance of the Treasury can be less.

Chiefly by this means we have been able to make two substantial reductions in the public debt. That, too, has a novel sound. In fact, they are the first substantial reductions in 16 years.

In spite of this generally good situation, taxes must remain high and the burden of carrying the public debt is still significant. The raising of substantial revenues and the carrying of the public debt can both be done without undue burden to our economy. Can be done, that is, if our economy is maintained at a high level.

The only desirable, sound, long-term solution to the problems of revenue and debt management is high-level production, employment, and national income. With our economy in high gear the burden will be much lighter. The war has demonstrated that we have a \$200 billion nation.

As Secretary of the Treasury I want a sound and expansive economy. And on that point the prevention of inflation has its all important impact. We cannot have that stable, high-level economy with full production, full employment, and high national income, nor can we meet successfully our revenue and debt management problems, if we have the dislocation of all values and relationships throughout our economy that comes with a bad case of inflation.

We have built up a tremendous demand for most consumer goods. This demand is backed up by large savings. The amount of currency, bank deposits, and United States securities owned by all non-bank investors has increased from about \$82 billion at the end of 1939 to about \$300 billion today. Our wants, fortified by these liquid reserves, can give us the impetus to begin a volume of peacetime production far greater than we have ever seen. Moreover, these savings can be the flywheel for our economy for a long time to come. This can give us the future that all Americans want. It can be the pleasant aftermath of war.

This result, however, is not an inevitable one. We could quickly spend ourselves in the dissipation of spiralling prices and speculative markets. We have the heart and the mind to avoid this catastrophe. Let us have the fortitude and the wit to carry out the decision that we know is right. Our children would look back and consider it the most pathetic thing our generation did, if, after thwarting the inflation ogre all through the war, we gave up just before the job was finished.

Production to meet the demand is the final

answer. Some quarters, taking advantage of the appeal of this end, have suggested that the removal of price controls is the best way to stimulate production and is therefore the best way to beat the inflation danger. These people, consciously or unconsciously, overlook the needs of the interim period. Although we are well on our way of peacetime production, we cannot produce enough tomorrow or the next day to meet the demand that has accumulated over months. During that period, the removal of price control would be stimulating - stimulating in a fanciful, dizzy sort of way. In my judgment, there would be so much effort spent in beating the market, in buying and selling materials and inventories, in concentrating on the speculative gain, that we would find total production decreased rather than increased.

I therefore take issue with those who say that removal of price control will stimulate and increase production. This sounds like the 1946 version of the old argument that price control has stifled production. Price control did not stifle production during the war and in spite of the obstacles we have had, the expansion of peacetime production in the period since VJ-Day as a whole has been more rapid than in any other period of our history. The present physical level of production in the whole economy is now above the average of the year 1941, despite the tremendous problems which have been presented to industry in the past year by the change-over from a wartime to a peacetime demand. When the pipelines are full, most types of consumers' goods will be on the market in volume. But the extension of the Stabilization Act is necessary to hold the line until supply once more matches demand.

When we are served up tempting departures from our present program, let us remember that the record under price control is remarkably good. Let us recall again and again that the best index of retail prices we have showed an increase in the 72 months of this war of one-half what it did in the 52 months during World War I. Let us recall that after November 11, 1918, prices continued to increase rapidly until June 1920 when they reached a point double what they were at the start of the war. Then came the crash. This time prices have been relatively stable since the end of the war. We are in a good position to avoid an insecure boom followed by a terrible collapse. Let us not undo what we have done. I fully endorse the extension of the Stabilization Act.

**Statement by Secretary Vinson on the Reduction
of the Debt Limitation, before the Senate
Committee on Finance, April 23, 1946**

I am appearing here today to give you my views on S. 1760, a bill to decrease the debt limit of the United States from \$300 billion to \$275 billion.

I am in complete accord with the purpose of this bill, and I wish to say so clearly at the beginning of my statement. Not only do I think that the public debt should be reduced, but I also think that it should be reduced as rapidly as possible consistent with the maintenance of maximum employment and production in the economy; and as Secretary of the Treasury I am here to tell you that it is the Administration's objective to do so.

However, I feel I should mention at the outset that the debt limit should not be viewed apart from all of the factors that cause the debt to go up on one occasion and go down on another. The amount of the public debt is a residual figure. Changes in it come about only after the Treasury has taken into account all of the Government's receipts from taxes and other sources in relation to the volume of expenditures that have been authorized by Congress.

If there are not enough funds available from receipts, money must be borrowed by the Treasury to augment its cash balance so that the expenditure checks can be paid as they are presented. Under the circumstances, the public debt must, of necessity, go up. If, on the other hand, there are more than enough funds available from taxes and receipts to meet the expenditures authorized by Congress, then the Treasury is able to take some of this surplus and use it to pay off some of its securities. Under these circumstances, the public debt will go down.

In the final analysis, therefore, it should be clearly understood that the amount of the public debt is determined by Congress and is the end result at the Treasury of the appropriation and the revenue legislation.

There may, it is true, be some fluctuation in the volume of the public debt in extraordinary periods of short duration when the size of the Treasury's cash balance is being increased or is

being decreased significantly. But, in the final analysis and for periods of extended duration, the debt will decrease if revenues exceed expenditures; and, conversely, the debt will increase if expenditures exceed revenues. The debt limit is, therefore, not the controlling factor. The existing limitation has not meant that the public debt is a penny higher today than it otherwise would have been; neither is it a penny lower.

This does not mean to say that I am against having a debt limit. On the contrary, the Treasury has always believed - and I too have believed both when I've been in and out of the Treasury - that a debt limit is a good thing to have. Its existence requires the officials of the Treasury to come to the Congress from time to time, particularly, as in the past, when fundamental changes in the debt structure are going on, and to set forth before Congressional committees the detail of the public debt picture. In my opinion, the review of the situation that results is beneficial.

The point that I want to make is only that the limit in itself does not reduce the debt, and that the limit should not be set so low that it will remove from the Treasury some of the flexibility that it needs in current public debt management operations. I believe the present bill sets the limit a little too low; and I shall give you some figures on this in a few minutes. Before I do so, however, I should like to make a few comments on the subject of public debt management. Debt management is a subject that many people are just beginning to think about, but it is a subject that the Treasury has been doing something about since the very beginning of the war.

You can't defer the planning of post-war public debt management until the debt has grown from \$48 billion to \$280 billion. You have to plan that management as and when the debt is actually incurred.

At the outset, for example, it was decided that the various classes of investors should be sold securities which fitted their requirements. This meant that they should have the particular

types of securities that would best suit them and that they should have the particular length of maturities that they needed.

To give the various classes of investors the various securities required, a broad list of issues was offered by the Treasury. Some of these securities were of the savings bond type that were not transferable, and were redeemable on demand. Some of these securities were transferable in the market, but were restricted as to bank ownership for a period of years. More than half of the total increase in the public debt that occurred in the last six years represented these types of securities. Today, those securities cannot move into bank portfolios.

This was planning on the part of the Treasury, and I believe it was wise planning. Today, holders of Savings Bonds who need money can come directly to the Treasury and get it through the facilities of the Savings Bond redemption agents. That was planning too; and there is no selling of securities on the market by small investors. There is no repetition of the pressure on bond prices that occurred after the first World War. Prices of Liberty Bonds fell to a low of 82 in the Spring of 1920. As this occurred, many people sold their securities in the fear of further losses; while others found it necessary to get their money, regardless of price. Now, the small holders of Savings Bonds are protected against price risks because the bonds are redeemable according to the values set forth on their face.

There was also planning by the Treasury with respect to the particular length of maturity of the issues that were sold to the various classes of investors. A conscious effort was made to fit the debt to the needs of those investor classes. Accordingly, about 90 percent of the securities held by commercial and Federal Reserve Banks mature within ten years; similarly, about 80 percent of securities held by nonfinancial corporations mature within this period of time.

On the other hand, in the case of insurance companies and savings banks, long-term securities predominate. About 75 percent of the holdings of these two groups of investors do not mature until after ten years. The amount of the debt held by the different classes of investors and the composition of their holdings will, naturally, shift with the passage of time and the changing character of our economy. This means that the debt will have to be tailored to meet these shifting

demands. This is part of the policy of flexible debt management.

I have gone into these matters in some detail because I want to make clear that the Treasury planned its post-war management of the debt from the beginning. The Treasury is now reducing the debt; and it has so managed its debt operations that the entire reduction has been effected in bank holdings. In fact, the reports of leading commercial banks and of the Federal Reserve Banks following our April 1 debt payoff indicated a combined reduction in holdings of Government securities in excess of the total debt reduction since the end of last year.

The reduction of the bank-held debt has come about directly as a result of the application to debt repayment of a part of the cash balance that was left over from the Victory Loan. Since that Loan closed, the Government has not sold any securities to the public in order to raise new money (except Savings Bonds which have been on continuous sale for over ten years, and Savings Notes which are used primarily as tax anticipation instruments).

The Government has, instead, been paying off maturing securities with a considerable degree of rapidity. On March 1, the Treasury paid off \$1 billion of maturing certificates. On March 15, it paid off \$1.5 billion of maturing bonds and notes. On April 1, it paid off \$2 billion of maturing certificates. We have already announced that on May 1, the Treasury will pay off an additional \$1.6 billion of certificates.

After these transactions have been completed, and after allowing for such other public debt transactions as have occurred during this period, the public debt will show an aggregate reduction of \$7 billion in the short period of two months between February 28 - the date on which the last of the Victory Loan money was paid into the Treasury - and May 1.

The size of the Treasury's cash balance will permit us to pay off other maturing securities from time to time as we find it convenient and desirable. Every movement on this account has its effect on the financial markets, because the public debt is so intimately woven into the entire financial structure of our country. On the occasion of each maturity of a public debt obligation, I have found it necessary, therefore, to go over in detail the information in the Treasury

on a number of factors. First of all, there are matters with respect to the ownership of the securities and the effect that repayment of these obligations would have on the money markets. I also have to go over the Treasury's current cash position and investigate the prospective cash outlook before determining how much of the maturity, if any, should be paid off.

In this connection, I have been very much pleased - as I know you have been - by the continued improvement in the Federal budgetary situation. Revenues for the fiscal year 1946 have proved to be considerably higher than we had originally anticipated. This has occurred because the reconversion of our economy from war to peace was more rapid than even our most optimistic hopes.

On the expenditure side of the picture, the Government has been reducing its expenditures as rapidly as possible, and more rapidly than originally expected. The expenditures of the Government reached a high of \$9.7 billion last June. By March of this year, they had fallen to under \$4 billion and the decrease is continuing, so that average monthly expenditures in the fiscal year 1947 will be quite a bit lower than the March level.

As the President announced ten days ago, we are well on the way toward a balanced budget because of the strides we have made toward full peacetime production.

"It is the aim of our fiscal policy", the President said, "to balance the budget for 1947 and to retire national debt in boom times such as these. In our present fight against inflation, fiscal policy has a vital role to play. A continuation of our present policy, which is to maintain the existing tax structure for the present, and to avoid nonessential expenditures, is the best fiscal contribution we can make to eco-

nomic stability."

The reason I have discussed these matters in detail today is that I want to make a particular point to you; that is, the Government's fiscal outlook is good at this time, its debt is in good shape, and we are managing it well.

In setting a figure for the debt limitation, an adjustment must be made between the present outstanding debt and the amount of the statutory debt limitation. The principal item relates to the unearned discount of approximately \$11 billion on United States Savings Bonds. The law requires the inclusion of United States Savings Bonds at full maturity value for debt limitation purposes; whereas, the debt itself includes these bonds at any given time at their current redemption value.

On the other hand, there is about \$1 billion of debt items which are not subject to the statutory debt limitation. The attached summary and reconciliation may be helpful in this connection. It shows the exact relationship on March 31 between the gross public debt of \$276.6 billion and \$286.3 billion under the statutory debt limitation.^{1/}

In view of these facts, therefore, I should like to suggest to your committee that the bill provide for a reduction in the debt limit to \$285 billion from the present level of \$300 billion. I should like to suggest further that we take this matter up again sometime next year.^{2/}

In closing, I should like to emphasize the importance of maintaining a strong tax structure in order to pay off debt as rapidly as possible at the present time. This has the added advantage of combating inflationary pressures and will help us stabilize the economy at the present high level of production and employment.

^{1/} The regular "Bulletin" table on page 28 presents all of the data in the summary and reconciliation referred to, although in a somewhat different arrangement.

^{2/} Secretary Vinson suggested in the above statement that the limit on the face amount of Government obligations be reduced from \$300 billion to \$285 billion. At the conclusion of the statement Senator

Byrd asked Secretary Vinson if he would be agreeable to a debt limit of \$275 billion under which obligations redeemable prior to maturity at the option of the holder would be computed at current redemption value rather than face amount. Secretary Vinson said the two proposals meant about the same thing, and he would agree with Senator Byrd's suggestion.

American Prosperity and World Prosperity Are Interlinked

The following address was delivered by Secretary Vinson before the Buffalo Chamber of Commerce at Buffalo, New York on March 29, 1946.

I am happy to visit the great State of New York. I am particularly pleased to be in Buffalo and to meet you folks. You know, I come here with a definite preconception. I believe that you folks are like my folks in Kentucky, and whether you believe it or not, I can assure you that most of the people in Washington are just folks too, doing their work the best they know how. And by and large they are doing a good job.

What the future holds for us is always an interesting question. I wish to discuss some of our economic policies which I am convinced will help us to have a future of peace and prosperity.

Basically we have a twofold job. We must build a strong and sound economy in America. You have heard many times of late, I am sure, that the economy of the world must be stable or we cannot have an expanding economy at home. With that I do not disagree, but I wish to emphasize, in turn, that the world does not stand a chance of having a stable economy unless this country has a sound, high-level economy. Other countries recognize the major impact that our domestic policies and achievements have upon the condition of the world. Let us recognize their importance at least as much and put our domestic economy into high gear.

The second basic part of our job is to co-operate with other nations in building a sound world economy. We must do our part or more in making international cooperation work and in establishing healthy economic relationships among nations. Such a course will mean much to other peoples, but it is not simply, or even primarily, a matter of altruism. Assisting in the building of a sound world economy is in our own self-interest. A world economically healthy means that all nations can produce more. It means also a large flow of trade among nations. That means more markets for American products. That means we can buy more goods to improve our standard of living. A high level of foreign trade is a vital and integral part of our domestic program of full production and employment, with a higher national

income and a better standard of living.

Our basic economic objectives can be stated simply; vast production, a good job for every man seeking employment, a high national income, and a full American standard of living. To find and carry out all of the ways and means to these simply stated but most important objectives will require attention and action on many fronts.

During the war our people learned what it is like for the job to seek the man, and they also learned what a terrific productive capacity this nation has. Our people want this high-level economy duplicated in peacetime. They will feel that something is wrong, as indeed it will be, if it takes war to make a full economy.

Our people wish to reach these economic objectives under the system that built us a great nation and will build us a greater nation - the system of free enterprise. Again they are right, for the system of free enterprise not only preserves the human values we hold dear, but it affords the best opportunity of material progress. There are, of course, threats to the system of free enterprise. The biggest threat is mass unemployment.

The great depression proved that mass unemployment could topple our system. The pleas of the false prophets were strong. It is ever to the credit of the American people that they did not succumb to the starry-eyed plans of men with liquid promises. Strong as we are, it is the wiser course to avoid the danger of overtemptation.

Today we have the best opportunity that we have ever had for mass production and employment. During the war a tremendous demand was built up for most consumers' goods. At the same time a large reservoir of savings to back up that demand was created. Industry is eager to match that demand with production and it is eager to try out its newly learned production know-how. We certainly have a made-to-order opportunity to reach

a high level of production and employment. This can be one aftermath of war that is pleasant.

This good fortune, however, is not inevitable. We could dissipate quickly our energy and our reserves in spiralling prices and speculative markets. We must continue the fight against inflation. All through the war we bested this insidious enemy. Let us win the tenth and final round.

We must maintain our program of preventing inflation not only through direct controls such as price ceilings but also through less direct deterrents like taxation. We need large revenues not only to help the battle against inflation, but also for the very practical purpose of meeting our expenditures.

Our nation should strive to make both ends meet just as every family that composes that nation must do. The post-war budget will be large. The legacy of the war - in debt, obligations to veterans, and maintenance of sufficient armed strength - accounts for most of the increase in our expenses.

We mean to balance the budget as soon as possible. We mean to reduce the public debt whenever possible and as much as we can. On both scores I can report we are well on our way.

Since the President transmitted the budget to Congress in January, experience has shown our receipts to be higher and our expenditures to be lower than was estimated at that time. Our receipts have been greater than estimated because our national income has remained at a very high level. Our expenditures have been less than estimated because all of Washington is working to cut back to a peacetime basis. In the eight months between June 1945 and February 1946, the rate of our expenditures was decreased nearly two-thirds. We are on the road to a balanced budget. In view of the fact that our current expenditures are much less, the Treasury does not need to maintain as large a cash balance, and we have twice made substantial reductions in the public debt. Each reduction of the debt means the carrying charge is less and our expenditures in turn go down. Yes, the different factors of a sound, prosperous economy can influence and

strengthen each other for good just as during a depression general contraction can lead us into a vicious downward cycle.

The only desirable and long-term solution of our tax problem and our debt problem is a high level of production, employment, and national income. A large tax from a high level of income is less burdensome than a small tax from a low level of income. We can have that high level of income. The war has demonstrated that this is a \$200 billion nation. It has also been demonstrated that we can have mass employment. We are on the road to a sound, expansive economy under the system of free enterprise.

Our foreign economic policy goes hand-in-hand with our domestic program. For some time this country has stood for international economic cooperation. It is a good thing to learn from experience. No one will gainsay that, but people and nations have been known to fail in the practice of it. The policy of cooperation among the nations is in large part a frank recognition that the breakdown in world economic relations was an important factor in intensifying, here as well as abroad, the great depression.

There is, as well, a frank recognition that the economic warfare of the 1930's was part of the master plan for aggression by Germany and Japan. The United States wants the United Nations to adopt a comprehensive policy of international economic cooperation to restore world trade and to establish standards of fair currency and trade practices.

We have made much progress. At Bretton Woods representatives of 44 countries agreed on the establishment and principles of two great institutions, the International Bank for Reconstruction and Development and the International Monetary Fund. These two institutions were conceived to help promote good economic relations among nations, and to remove as far as possible the economic and financial irritations that feed the greedy god of war.

Bretton Woods is perhaps the best example this old world has seen of so many nations putting their heads together to solve their common problems in the interest of economic peace among

nations and in their own self-interest. The representatives of 44 countries not only agreed on the fact that these economic problems should be met but also agreed on a complete and basic constitution of principles for the two novel institutions. By the end of 1945 more than enough countries ratified this work so that it could become effective. We have just been to Savannah, Georgia, and there we established the World Bank and Fund as living organisms. Again at this meeting there was a re-dedication to the efficacy of effort and again there was solemn resolve to make the discussion process work. Again, as at Bretton Woods, there was not only a meeting of the minds, but also a meeting of our hearts. The spirit of these meetings builds a firm foundation for faith in the future.

Through the International Bank, countries will find it possible to reconstruct and develop their economies. They, then, can produce more. Through the International Fund, they will remove monetary restrictions and substitute fair standards of currency exchange. All countries, then, can trade more. And the United States has proposed that an International Trade Organization be established to reduce other barriers and discriminations that hamper the growth of trade.

Through this program, the United Nations can put into effect the fair currency and trade practices which will be conducive to a full flow of trade among the nations. The expansion of world trade will benefit all countries. It will make it possible to maintain high levels of production and employment, and to raise standards of living. The adoption of fair currency and trade practices will give all countries access to world markets on fair and equal terms.

We believe that such a program is necessary for world recovery. We know that it is good for American business. It is because of no sordid motive, however, that we urge this program on the United Nations. We want a prosperous world, not just for the resulting material benefits, important though they are, but even more because a prosperous world is likely to be a peaceful world. In contrast, a world raked with economic warfare and depression cannot be a world of security and stable enduring peace.

We have reached the stage where much of our

international economic program can be, and is being, put into effect. The big danger is delay. If we wait too long, continued reliance on wartime currency and trade restrictions may make it much more difficult to remove those restrictions later. That is why the success of our program depends in large part on securing prompt adherence to these fair currency and trade practices. Unfortunately, England will not be able to put these principles into effect until she is assured, in one way or another, of necessary food and raw materials to feed her people and her factories.

England's international economic position was disrupted by the war. In 1944 her exports were only 40 percent of her pre-war volume. Her production was diverted from goods for export trade to the materiel of war. England sold many of her foreign investments. She has lost the income from these. Similarly she has lost much of her income from shipping, insurance, banking and other services. In addition to this she incurred a tremendous foreign debt among the sterling area countries amounting to some \$13,000 million measured in our money. For some time what England sells will be far short of what she must buy, nor will she have sufficient income from other sources to make up the difference. That creates a difficult problem for the people of England. It is an urgent problem that they cannot decide on the basis of abstract principles. To assure the flow of essential imports during the next few years, they must have some help from abroad. To restore their wartime economy to high standards of efficiency they must increase their export trade. The policy that England chooses must have the very practical effect of assuring her people that they can eat and work in the five critical years ahead. It must offer the opportunity of expanding England's export trade to the level necessary to maintain the living standard of her people and the operation of her industries.

One choice is for England to accept fully the program of the United Nations. She would do this by cooperating promptly with the fair currency principles of the International Monetary Fund and with the fair trade principles of the proposed International Trade Organization. This would mean that England would remove her wartime currency controls without waiting for the end of the post-war transition period. Then as world

trade grows England would share in this growth and her increased exports would in time pay for her essential imports.

This is the choice that the people of England would prefer. England's economic and political traditions and interests argue for her to find a solution to her problem within the framework of a world economy. The difficulty is that the effect of expanding world trade on her exports may not come for a few years. In the meantime, she must find some means for continuing her essential imports. She needs help to follow this course.

The second choice is for England to continue and even extend her wartime currency and trade controls. She would form a British economic bloc. Countries that wish to sell to England would be compelled to take payment in British exports. The countries to whom she owes \$13,000 million in blocked sterling would be compelled to take British goods in payment of the debts. Our trade with England would be a trickle under such conditions. In fact the formation of a British economic bloc might exclude us from trade with most of the British Empire, the sterling area, and the countries with which England has established trade and payments agreements.

England's choice is very important to us. Our program for international economic cooperation depends on having England adopt the fair trade and currency practices for which we stand. England's action will set the pattern for the whole British Empire and the sterling area and for many countries in Europe. These countries account for nearly one-half of the international trade of the entire world. The continuation of currency and trade restrictions in England will necessitate their continuation in large areas of the world. Their practical effect would be to isolate the United States from an enormous trading area. Our position in world trade would be threatened. We would have to defend ourselves. We would retaliate.

That would be economic warfare. Probably we would win, but it would be a Pyrrhic victory. World trade would be destroyed, and all countries would suffer. If England and the United States should drift into such a policy it would be a tragedy for all. We would find our trade decreased and our people unemployed. England would

find her standard of living deteriorated and her people impoverished. And other countries would be unable to reconstruct their bombed and wrecked economies. The hope for international economic cooperation might be lost forever. The consequences to world prosperity, and even to world peace, would be disastrous. That is not the kind of world our people want.

Our basic goal is to establish a world in which countries can live and work together in peace and prosperity. International economic problems can no more be solved by economic force than political problems can be solved by war.

Out of discussion and agreement between the representatives of the United States and of England came the proposed financial agreement now before Congress for approval. We found a way to help England meet her problem within the framework of the fair currency and trade principles that have been accepted by the United Nations.

Our representatives agreed that subject to the approval of Congress we would open a line of credit of \$3,750 million to be used by England to pay for her most essential imports. Their representatives agreed, in turn, that subject to the approval of Parliament they would commit themselves to remove various wartime restrictions and discriminations.

In brief, this is what England undertakes to do under the financial agreement:

1. Within a year, unless we agree to a temporary extension, England will make all sterling arising from current trade convertible. England will thus return to the free use of sterling in international trade that she permitted before the war. If Mexico and Egypt export to England they will be able to use the money they receive in any country. That means they could convert the sterling into dollars and buy radios or refrigerators in the United States.
2. Within a year, unless we agree to a temporary extension, Britain will dissolve the sterling area dollar pool. During the war, under the dollar pool, when a sterling area country received dollars

they were pooled in London. These dollars could be used only if allocated, and London did not allocate unless the goods wanted could not be obtained in any sterling area country. American producers lose markets, and fast, under that system. Under the provisions of the financial agreement, every country in the sterling area will have complete freedom to use its dollars as it wishes. All dollars that the sterling area countries receive for their exports could be spent in the United States without obtaining an allocation from England. That means India could use dollars to buy American machinery instead of being forced to buy English machinery.

3. Current exports of goods and services from the United States to England will be paid for in dollars, or if paid in pounds, the money can be converted into dollars by American exporters. That means that American companies which in the past have experienced considerable difficulty in getting their earnings out of England will now be paid in dollars. For all practical purposes American businessmen can be just as sure of payment for their sales in England as they were before the war.
4. The blocked sterling balances will be settled by England and the countries concerned. Any payments on these balances, made now or later, will be free for making purchases in any country, including the United States. That means England will not force these countries holding more than \$13,000 million in sterling to buy British instead of American goods. This large debt will not be used to exclude American products from the sterling area, or to put our exporters at a disadvantage in competition with British exporters.
5. England's import controls will be administered in a manner which does not discriminate against American products. That means England will not keep out American cotton, tobacco, grains, fruits and nuts,

or our industrial products in order to buy these same goods in other countries. Any quantitative limitation that England finds it necessary to impose on her imports will be applied on an equal basis toward all countries.

6. England will support the American proposal for an International Trade Organization to reduce trade barriers and eliminate trade restrictions. In this way, England supports our policy of expanded trade, with all countries having access to world markets on fair terms. England's support of our proposal augurs well for the success of the United Nations Trade Conference to be held later this year.

We have asked England to adopt these principles because they will help world trade and American trade. In the long run, these fair trade and currency practices will help England, too. With expanded world trade, British exporters will find better markets. But it will take several years before British exports are increased sufficiently to make good her heavy foreign exchange losses during the war. In the meantime, England needs credit if she is to secure the imports essential to her people and to her economy.

Part of the credit England needs she will get from other countries. Canada has a vital interest in securing British agreement to these principles and she will help England adhere to them. Much of the credit England can get only from us.

Under the financial agreement, England can draw upon the line of credit of \$3,750 million until 1951. The money is to be used to pay for her imports and other current needs. Any part of the credit not used by then will reduce the amount owed by England. Beginning in 1951, England is to repay the credit with interest at 2 percent. She will do this in 50 equal annual payments.

The principal of the credit due each year must be repaid without qualification. Under conditions of severe depression in world trade, and under objective standards written in the agreement, the interest due in any given year would be

waived, but payment of interest would be resumed as soon as trade recovers. Such a provision to take care of an emergency situation is certainly preferable to forcing a default.

The greater part of the credit will be used to pay for exports from the United States. Directly and indirectly nearly all of the money will ultimately be spent in the United States. The credit to England will enable her to maintain her essential imports on a modest level. I should like to emphasize that England will still have to enforce an austere standard of consumption, little different from that of the war years.

This credit is not a gift. It is a loan, a loan which England is to repay. It bears interest at 2 percent, a rate comparable to the Government's cost of borrowing money. It is not an unconditional credit - it is a credit which must be used only to meet Britain's current payments and to enable her to remove her wartime currency and trade restrictions.

This financial agreement is good business for the United States. The credit we extend may prove to be one of the most important investments we have yet made in world peace and prosperity. Not only is the \$3,750 million to be repaid, but American business will reap rich dividends through its access to world markets on a fair and equal basis.

The expansion of international trade will be a great help to this country in carrying out our own policy of maintaining high levels of produc-

tion and employment. Foreign trade is an important factor in our national economy.

I suppose all of us, at one time or another, have thought of the great turning points of history and wondered. Did people know then that what they were doing would decide the fate of nations? We live in just such a critical time. The decisions we make now may shape the destiny of the world for generations.

We have one more chance to build a world in which countries can live and work together in peace and prosperity. We are determined that the United Nations shall do everything in their power to build such a world.

We have started with the proposition that if conflicts between nations are not to be settled again by fire and sword, some other way must be found to deal with international problems. The common-sense way is to deal with such problems through discussion and agreement - through international cooperation. Cooperation on political problems that affect world security is essential. But it is not enough. We must provide a sound economic foundation for peace.

We have made good progress on the road of international economic cooperation. We have made good progress in building a sound and expansive economy at home. If we continue to apply ourselves, if we exercise the same intelligence and unity of purpose that we did during the war, we can look forward with full faith to a bright future.

Treasury Market Financing During March

Historical details of Treasury market financing operations involving bonds, notes, and certificates of indebtedness, beginning with the Fourth War Loan, are published in the tables on pages 32 and 33. Details of weekly Treasury bill offerings are shown on pages 34 and 35.

Repayment and Refunding

On April 1, 1946, there was a maturity of 7/8% certificates of indebtedness in the amount of \$4,811 million. The Secretary of the Treasury announced on March 20, 1946 that about \$2 billion of this would be paid off in cash with a new certificate of indebtedness offered in exchange for the remainder. The new certificate was also a 7/8% one-year issue. Exchange subscriptions were received subject to allotment to all holders on an equal percentage basis. Subscriptions in the amounts of \$25,000 and less, however, were allotted in full. Cash subscriptions were not accepted.

The Treasury reports on the ownership of Government securities indicate that on February 28, 1946 about 85% of the \$4.5 billion of maturing certificates was owned by reporting commercial banks and Federal Reserve Banks.

The new certificates were dated April 1, 1946 and will mature April 1, 1947. Interest at the rate of 7/8% per annum is payable on Octo-

ber 1, 1946 and April 1, 1947 and is subject to Federal income taxes.

The certificates were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000. The exchange was on a par for par basis. Subscription books were open from March 20 through March 22, except for receipt of subscriptions from holders of \$25,000 or less of the maturing certificates, for which the books remained open through March 25.

On March 29, Secretary Vinson announced that subscriptions for the new issue aggregated \$4,742 million. Subscriptions of \$25,000 or less were allotted in full in the amount of \$46 million. Subscriptions in amounts over \$25,000 were allotted 59% on a straight percentage basis, but not less than \$25,000 to any one subscriber and with adjustments up to the next highest thousand, where necessary. Total allotments amounted to \$2,820 million, leaving \$1,991 million to be paid off in cash.

May 1946

Source: Daily Treasury Statement, except as noted.

* Less than \$500,000.

n.a. Not available.

1/ Based upon the President's Budget Statement of April 11, 1946.

2/ Based on the 1947 Budget released in January; no revision of these figures was made in the President's Budget Statement of April 11.

3/ Includes chiefly alcoholic beverage taxes, tobacco taxes, manufacturers' and retailers' excise taxes, and estate taxes.

4/ Includes deposits resulting from the renegotiation of war contracts. Information on the amount of such deposits is not available on the basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1943, \$558 million; fiscal year 1944, \$2,235 million; and fiscal year 1945, \$2,041 million. These figures include so-called voluntary returns.

5/ Classification changed to reflect expenditures of surplus property

disposal agencies for the fiscal years 1946 and 1947. Prior year expenditures are included under "Other".

6/ Includes transfers to trust accounts, etc.

7/ Includes expenditures for public works undertaken by Veterans' Administration.

8/ "Refunds of taxes" include amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and exclude refunds of taxes under the social security program. For discussion of excess profits tax refund bonds, see following chapter, Table 3.

9/ Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Office for Emergency Management, War Manpower Commission (U. S. Employment Service) under authority of the Social Security Act.

* Less than \$500,000.

1/ For further details, see chapter entitled "Internal Revenue Statistics".

2/ Excludes receipt of victory taxes withheld pursuant to the Revenue Act of 1942. Such receipts have been classified as "Other" income and profits taxes.

3/ Includes unjust enrichment tax.

4/ For the period prior to September 1939, the data in the columns entitled "Federal Insurance Contributions Act" and "Federal Unemployment Tax Act" represent collections under Titles VIII and IX, respectively, of the Social Security Act.

Source: Daily Treasury Statement.

* Less than \$500,000.

1/ General expenditures now include expenditures for revolving funds; back figures have been revised accordingly.

2/ Includes public works undertaken by the Veterans' Administration.

3/ Does not include transfers to trust accounts, etc. These are shown in Table 5.

4/ "Refunds of taxes" include amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and exclude refunds of taxes under the Social security program. Excess profits tax refund bonds were formerly issued to corporations entitling them to a post-war credit equal to 10% of the excess profits tax paid. The Tax Adjustment Act of 1945 reduced by 10% the amount of excess profits tax to be paid and abolished the post-war credit. For amounts of excess profits tax refund bonds issued, see the first table in chapter entitled "Public Debt and Guaranteed Obligations of the United States Government". Outstanding excess profits tax refund bonds may be redeemed at the option of the holder commencing January 1, 1946; when such redemptions occur, they will appear as retirements of public debt.

5/ Consists of Administration of Sugar Act of 1937, Agricultural Adjustment Agency, exportation and domestic consumption of agricultural commodities, Farm Credit Administration, Farm Security Administration, Federal Farm Mortgage Corporation, Federal land banks, Rural Electrification Administration, Soil Conservation and Extension Service, Department of Agriculture departmental expenditures, and other.

6/ Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Office for Emergency Management, War Manpower Commission (U. S. Employment Service) under authority of Social Security Act. For further details, see tables which follow on the Social security program.

1/ Includes public buildings, public highways (including forest roads and trails), river and harbor work and flood control, Tennessee Valley Authority, Federal Public Housing Authority (formerly U. S. Housing Authority), reclamation projects and the Public Works Administration. Excludes certain expenditures for public works in connection with war activities by the Federal Works Agency, beginning July 1941.

2/ Excludes expenditures for the U. S. Maritime Commission, departmental expenditures under the Social security program and the Department of Agriculture departmental expenditures.

3/ For additional information, see "Treasury Bulletin" for August 1945, page 6.

10/ Includes expenditures for the following: Office of Education, and Public Health Service of the Federal Security Agency; Post Office Department postal deficiencies; Federal Housing Administration; Treasury Department investments in Federal savings and loan associations; certain expenditures of the Panama Canal; and capital stock of the Federal Deposit Insurance Corporation, Home Owners' Loan Corporation, Federal home loan banks, and Disaster Loan Corporation.

11/ Gross expenditures have been reduced \$315 million representing the repayment of capital funds by certain United States Government agencies. For further details see "Treasury Bulletin" for June 1943, page 9, footnote 12.

12/ Includes \$257 million for restoration of capital impairment of Commodity Credit Corporation applicable to fiscal years 1943 and 1944. Classified as miscellaneous expenditures commencing July 1, 1945.

13/ 14/ Expenditures during October 1945 and March 1946 include \$1 1/4 million and \$100 million respectively for Export-Import Bank of Washington - capital stock.

15/ Includes \$500 million for Commodity Credit Corporation - postwar price support of agriculture.

Source: Daily Treasury Statement.

* Less than \$500,000.

1/ Includes war public housing functions.

2/ Similar items for periods prior to fiscal year 1941 are classified under "Other departmental" and "Other general expenditures" in Table 3. Includes war expenditures of Commerce, Justice, Interior, Labor, and State Departments; Civil Service Commission; Executive Office of the President (including Office for Emergency Management); Panama Canal; and capital stock of Smaller War Plants Corporation. Includes Defense Aid Special Fund through the fiscal year 1943; thereafter such expenditures are reflected within the respective

departments.

3/ Classification changed to reflect expenditures for the fiscal year 1946 under "War activities". Prior year expenditures are included under "General".

4/ Payment of \$370,286,944 was made on Dec. 29, 1945, by the Federal Surplus Commodities Corporation of the Department of Agriculture to the Commodity Credit Corporation in reimbursement for agricultural commodities procured in connection with the lend-lease program and reflected in previous expenditures by the Commodity Credit Corporation.

* Less than \$500,000.

1/ Additional transactions are shown in Table 3.

2/ Comprises Adjusted Service Certificate Fund and the National Service Life Insurance Fund, administered by the Veterans' Administration.

3/ Includes railroad retirement and railroad unemployment activities.

For further explanations see tables which follow on Social security program.

4/ Represents transactions in commodity food stamps by Department of Agriculture. This activity formerly came under the Office of Distribution and prior thereto under the Agricultural Marketing Administration.

* Less than \$500,000.

1/ Includes Government Retirement funds, etc. (See footnote 2.)

2/ Comprises Public Works Administration revolving fund, special deposits (net), and, during the fiscal years 1940 through 1945, transactions in commodity food stamps by the Department of Agri-

culture. Commencing July 1, 1945, such transactions are classified as "other trust accounts".

3/ Net receipts in this column constitute net sales, and net expenditures constitute net redemptions of obligations.

4/ Details not available.

* Less than \$50,000.

^{1/} Formerly Title VIII of the Social Security Act.^{2/} Formerly Title IX of the Social Security Act. Includes amounts equal to appropriations to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected with respect to the period from January 1936 to June 1939, inclusive, from employers subject to the Railroad Unemployment Insurance Act (See Table 3 of Section I).^{3/} Prior to January 1, 1940, figures represent amounts transferred to the Old-Age Reserve Account. From January 1 to July 1, 1940 "transfers" were made to the Federal Old-Age and Survivors Insurance Trust Fund. Subsequently receipts have been deposited in the General Fund of the Treasury and "appropriated" directly to the Federal Old-Age and Survivors Insurance Trust Fund. Amounts shown as transfers reflect deductions made for reimbursement to the General Fund account to cover administrative expenses, which are shown as expenditures in

Section II, Table 1.

^{4/} Includes only expenditures from appropriations made specifically for administrative expenses relating to the Social Security Act; namely, Social Security Board, Department of Commerce, and Department of Labor; and administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended. Beginning July 1, 1940, includes also administrative expenses under the Wagner-Peyser Act. Excludes administrative expenses payable from other appropriations, principally for the following agencies: Bureau of Internal Revenue of the Treasury Department, and Public Health Service and Office of Education of the Federal Security Agency.^{5/} Covered by appropriations by Congress.

Second Deficiency Appropriation Act, fiscal year 1938, appropriated \$41 million for refunding to certain States portions of Federal employers' tax for 1936 collected under the Social Security Act.

* Less than \$50,000.

1/ Operated as Railroad Unemployment Insurance Administration Fund.

2/ Represents 10% of contributions under the Railroad Unemployment Insurance Act; the remaining 90% is deposited in the Railroad Unemployment Insurance Account, Unemployment Trust Fund (See Section II, Table 3). Excludes amounts appropriated to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected for the period January 1936 through June 1939 from employers subject to the Railroad Unemployment Insurance Act. These amounts aggregated \$15.0 million and were distributed by calendar

years, as follows: 1937, \$5.3 million; 1938, \$6.8 million; and for the first six months of the calendar year 1939, \$2.9 million. These amounts are included in Table I under Federal Unemployment Tax Act (unemployment insurance).

3/ Includes only expenditures from appropriations made specifically for administrative expenses relating to the Railroad Unemployment Insurance Act.

4/ Represents excess funds of the Railroad Unemployment Insurance Administration Fund (under Act of Oct. 10, 1940).

5/ Covered by appropriations by Congress.

Source: Daily Treasury Statement.

1/ Excludes advance of \$15 million from the Treasury and subsequent repayment, both taking place in the fiscal year 1940.

2) Represents 90% of contributions under the Railroad Unemployment Insurance Act; the remaining 10% is used for administrative expenses. (See Section 1, Table 3.)

3/ Represents amounts transferred from States to Railroad Unemployment

Insurance Account equivalent to amounts of taxes collected, with respect to period from January 1936 to June 1939, inclusive, from employees and employers who come within the purview of the Railroad Unemployment Insurance Act.

4) Represents excess funds of the Railroad Unemployment Insurance Administration Fund (under Act of Oct. 10, 1940).

5/ For railroad unemployment benefits and refunds.

^{1/} Consists of appropriations and net contract authorizations available on and after July 1, 1940. Excludes: (1) authorizations of the Reconstruction Finance Corporation and its affiliates for war purposes, and (2) unexpended balances of appropriations on June 30, 1940 (except immediately available funds from fiscal year 1941 appropriations), available for expenditure in the fiscal year 1941.

^{2/} Contract authorizations have been reduced by later appropriations which were earmarked in authorizing acts for this purpose.

^{3/} Includes appropriations made available for prior years. For amounts see appropriate footnotes in "Treasury Bulletin" for July, 1945, page 16.

^{4/} Unappropriated contract authorizations for the naval expansion program are as follows:

Public Law No. 441.....	\$2,257,137,102
Public Law No. 204 (Estimated by Navy Department) 2,464,905,021	
Public Law No. 375.....	55,000,000
Public Law No. 375 (Estimated by Navy Department) 1,825,000,000	
Public Law No. 529.....	60,000,000

^{5/} The amounts of appropriations repealed by Congress and carried to the surplus fund in accordance with the provisions of this act are shown separately below.

^{6/} Includes \$180,000,000 for the fiscal year 1945.

^{7/} Excludes rescission of the unobligated portion of the contract authorization under Aviation, Navy.

^{8/} Pending appropriations, as used herein, represent appropriation bills reported from the Committee on Appropriations to the House, or in subsequent stages of Congressional action before Presidential approval. Estimates of appropriations for national defense purposes reported by the President to Congress and submitted to the Committee on Appropriations, amounting to \$11,394,131,000, are not included.

^{9/} Excludes rescission of the United States Maritime Commission to the amount of \$460,000,000.

^{10/} For details of appropriations made by the 76th Congress, Third Session and 77th Congress, First Session, see "Treasury Bulletin" for March, 1944, page 5.

^{11/} Includes actual transfer of balances of the Bureau of Marine Inspection and Navigation from the Department of Commerce to Coast Guard, Navy, in the amount of \$1,153,802 in accordance with Executive Order 9083, dated February 28, 1942. Also includes \$57,133,291 received as war contributions under authority of the Second War Powers Act and deposits of advance payments made by foreign governments to the Defense Aid Special Fund for the procurement of defense articles amounting to \$307,714,933.

Cash Income and Outgo of the Treasury, by Major Classifications^{1/}

(In millions of dollars)

r Revised to adjust classification.

- Less than \$500,000.

1/ These figures are not intended to reflect the budgetary position of the Government, and will not agree with budgetary figures on receipt, expenditure, and deficit such as those appearing in the Daily Treasury Statement and in other tables in the "Treasury Bulletin". For an explanation of the revisions made in Daily Treasury Statement figures to arrive at this cash series, see the "Treasury Bulletin", February 1939.

2/ Comprises Public Buildings Administration, Public Roads Administration, Public Works Administration, Federal Public Housing Authority, river and harbor work and flood control, Tennessee Valley Authority, forest roads and trails, and reclamation projects.

3/ Coosists of Farm Credit Administration, Federal Farm Mortgage Cor-

participation, Federal land banks, Rural Electrification Administration, Administration of the Sugar Act of 1937, Exportation and domestic consumption of agricultural commodities, Agricultural Adjustment Agency, Farm Security Administration, Soil Conservation and Extension Service, Department of Agriculture departmental expenditures, and Other.

Excludes transactions under transfers to trust accounts, etc.

Excludes accrued discount on United States savings bonds, and interest on trust fund investments.

Savised to include "Work Projects Administration" and "Civilian Conservation Corps", and to exclude "Surplus property disposal agencies" which, beginning July 1, 1945 are included in "War activities" above.

Sources: Daily Treasury Statement.

* Less than \$500,000.

^{1/} This is the net budgetary deficit (-) or surplus. Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law.^{2/} Comprises Federal Old-Age and Survivors Insurance Trust Fund, National Service Life Insurance Fund, Unemployment Trust Fund, Railroad Retirement Account, Government insurance and retirement funds and other trust accounts. (See footnote 4.)^{3/} Charges for retirement of national bank notes are reflected in this statement directly against increment on gold, in the years during which the retirements were actually made. (See footnote 5.)^{4/} Comprises Public Works Administration revolving fund, special de-

posits (net), and, during the fiscal years 1940 through 1945, transactions in commodity food stamp by the Department of Agriculture. Commencing July 1, 1945, such transactions are classified in the column "Trust accounts".

^{5/} Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1936 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1936, \$397 million; 1937, \$99 million; 1938, \$51 million; and 1939, \$5 million. The increases in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.^{6/} Includes inactive gold in the amount of \$1,087 million.

Sources: Daily Treasury Statement.

^a Less than \$500,000.

^{1/} Guaranteed securities held by the Treasury and securities guaranteed as to interest only are not included in this table.

^{2/} Bank restricted issues are those which commercial banks (banks accepting demand deposits) are not permitted to acquire prior to a specified date, with two exceptions: (1) concurrently with the 4th, 5th and 6th War Loans and the Victory Loan, commercial banks were permitted to subscribe for limited investment of their savings deposits; (2) commercial banks may temporarily acquire such issues through forfeiture of collateral.

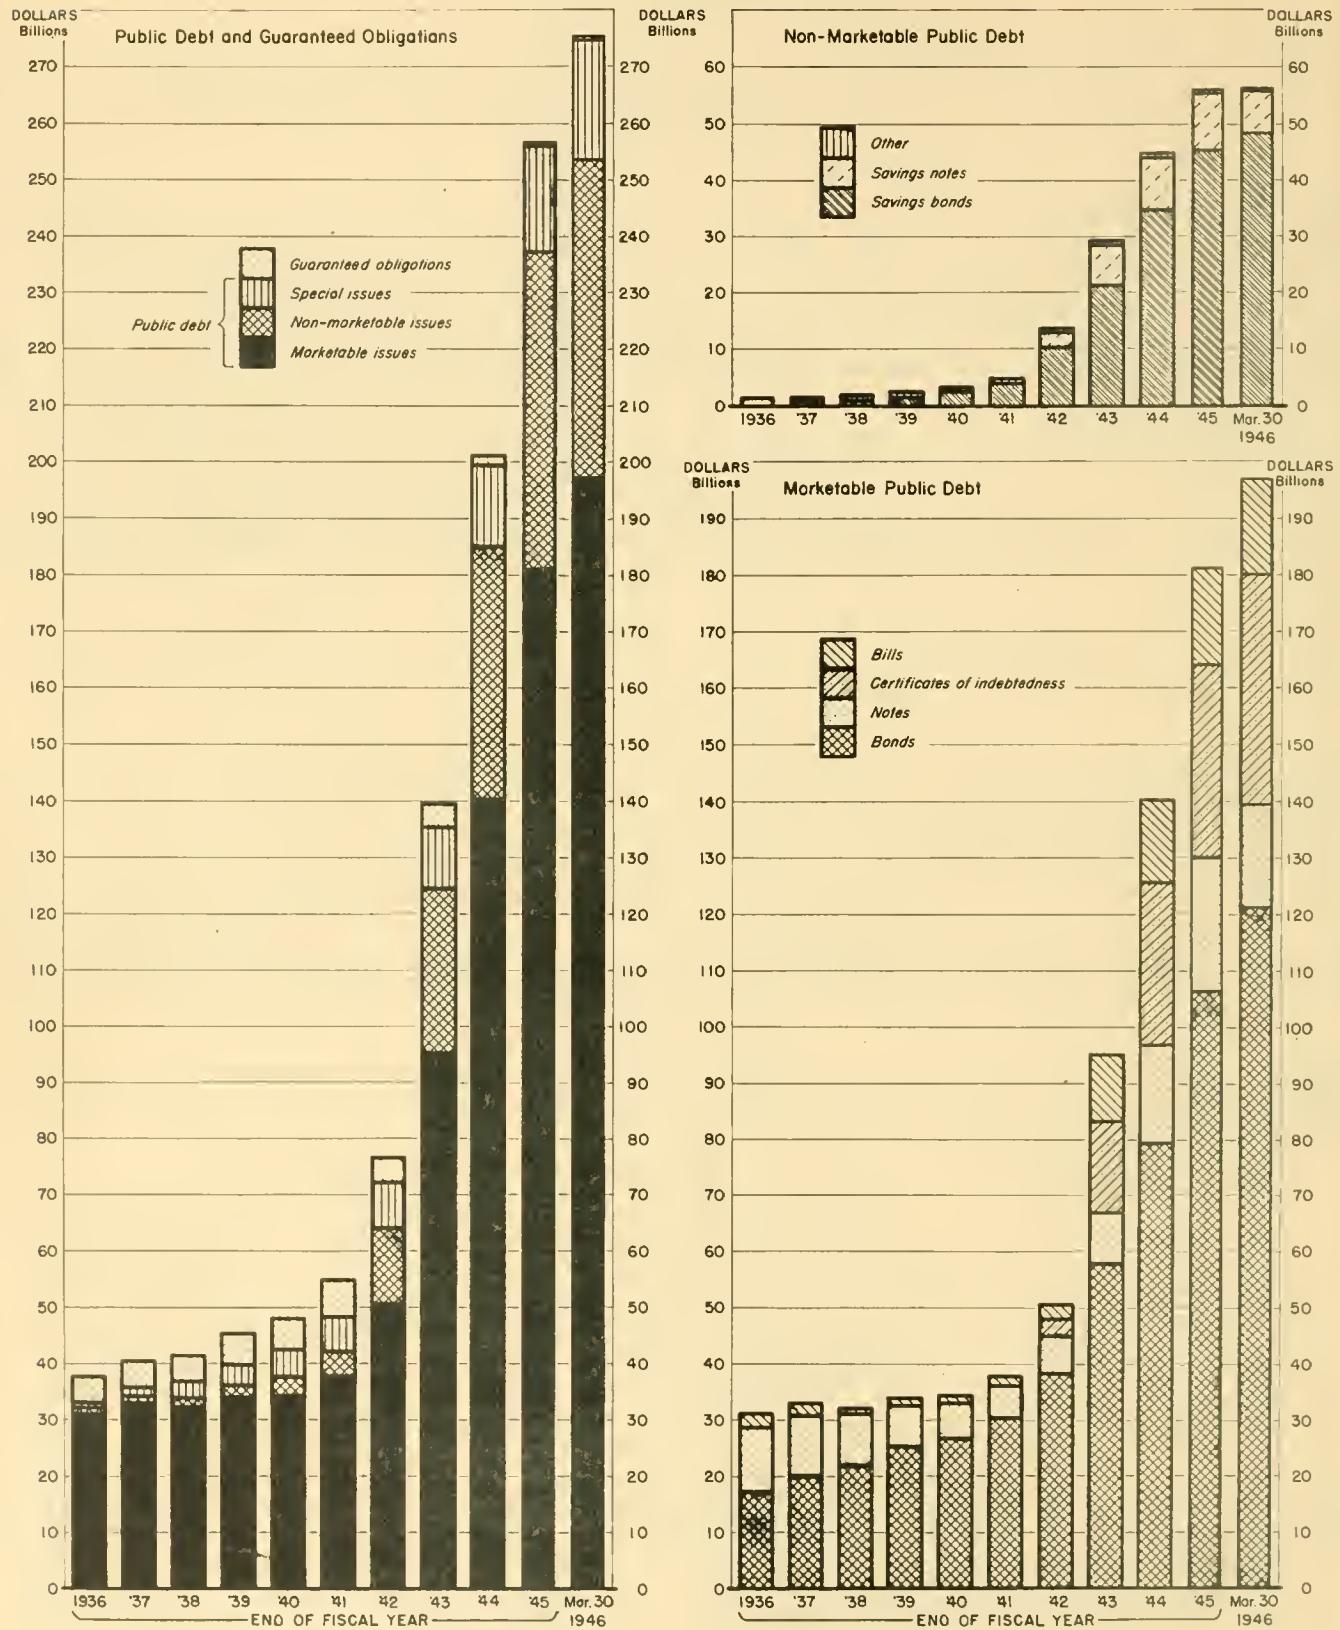

^{3/} The face value of any yearly series of United States savings bonds and Treasury savings notes maturing from month to month which are not currently presented for retirement are included in the interest-bearing debt until all the bonds or notes of the series have matured.

^{4/} Demand obligations stated as of the previous month to agree with the Contingent Liability Statement in the Daily Treasury Statement.

^{5/} Consists of Reconstruction Finance Corporation notes, Series X-A, X-B, and X-C, which were held by United States Government corporations and credit agencies.

^{6/} Includes prepayments on securities.

Source: Daily Treasury Statement.

1/ Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rate of

interest on United States savings bonds, Series A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.53%.

2/ Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

Source: Daily Treasury Statement, and reports to the Treasury.

^{1/} Excludes (1) postal savings bonds and (2) Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).^{2/} It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities.^{3/} Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.^{4/} "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates.^{5/} "Taxable" securities are subject to both normal and surtax rates. Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to a specified date. See footnote 2, page 25.

Preliminary.

- 1/ In the case of the reopening of a previously offered security, the period to first call and to maturity are calculated from the date interest commences on the reopening.
 2/ Consists of all public cash subscriptions and of subscriptions by U. S. Government agencies and trust funds.
 3/ Figures on amount of War Loan securities issued consist both of amounts issued in connection with the Drive, and of amounts issued concurrently with Drive to commercial banks and Treasury investment accounts.

4/ Bank restricted issue. See preceding table (maturity schedule of interest-bearing public marketable securities) for earliest date on which commercial banks may acquire this issue.

5/ Reopening of previously offered security.

Interest commenced on March 15, 1944.

Interest commenced on June 26, 1944.

Interest commenced on September 15, 1944.

This is the same security that was offered in the Sixth War Loan. Exchanged as of December 15, 1944 and accrued interest charged from December 1 to December 15.

**Disposition of Matured Marketable Issues of Treasury Bonds, Notes, and Certificates
of Indebtedness and Securities Guaranteed by the United States**

P Preliminary.

1/ Original call and maturity dates are used.

2/ Bank restricted issue

3/ Prior to the refunding operation of March 1, 1946, maturing ie-

sue were either paid off in full or the holders were given the privilege to exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

Offerings and Maturities of Treasury Bills

Note: See Annual Reports of the Secretary of the Treasury for back figures.

1/ Bank discount basis.

2/ Except \$2,000,000 at 99.925.

3/ Except \$75,000 at 99.925.

Sales and Redemptions of United States Savings Bonds

United States savings bonds were first offered for sale in March 1935. Bonds of series A-D were sold between March 1935 and April 1941. Series E, F, and G bonds have been on sale since May 1, 1941.

Series A-E bonds are 10-year discount bonds sold at 75% of maturity value, and yield 2.90% per annum if held to maturity. Series F bonds are 12-year discount bonds sold at 74% of maturity value, and yield 2.53% per annum if held to maturity. Series G bonds are 12-year current income bonds, sold at par, bearing interest at 2-1/2% per annum, and redeemable at par at maturity or at stated prices less than par before maturity.

Purchases of series A-D bonds were limited to \$7,500 issue price in any one calendar year. These bonds were available to all subscribers prior to April 1, 1940, and to individuals only after that date. Purchases of series E bonds are limited to \$3,750 issue price in any one calendar year, and may be made only by individuals (defined as natural persons only). The limit for series F and G combined is \$100,000 issue price in any one calendar year (\$50,000 in calendar year 1941). Series F and G bonds are available to all

subscribers except commercial banks. Commercial banks, however, were permitted to purchase these bonds during certain periods and with certain restrictions. For details concerning these periods and restrictions see "Treasury Bulletin" for December 1944, page 36, footnote 9, and "Treasury Bulletin" for February 1946, page 37, footnote 9, and page A-22. For details concerning features, investment yields, and redemption values see "Treasury Bulletin" for October 1945, pages A-4 and A-5.

Series A bonds matured in 1945, and bonds of series B began to mature in January 1946. Matured bonds turned in for redemption are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of series G outstanding are quoted at par.

Table I.--Summary of Sales and Redemptions, by Series, as of March 31, 1946

United States savings bonds	Sales	Accrued discount	Sales plus accrued discount	Redemptions	Amounts outstanding		Percent of redemptions to sales plus accrued discount

1/ Sale of \$10 denomination Series E bonds was authorized beginning June 1944 for sale to the armed forces only.

2/ Sale of \$25 denomination Series F bonds was authorized in December 1941.

3/ Sale of \$200 denomination Series E bonds began in October 1945.

Sales and Redemptions of Treasury Savings Notes

Treasury savings notes were issued in three series, series A from August 1, 1941 through June 22, 1943, series B from August 1, 1941 through September 12, 1942, and series C which have been on continuous sale since September 14, 1942. All of series A and B and some of series C notes have matured.

Series C notes are sold at par, and accrue in value each month, yielding 1.07% per annum if held to maturity (3 years from date of issue). These notes may be used in payment of taxes any time after 2 months after issue, or may be redeemed for cash any time after 6 months after issue. For details concerning features, investment yields, and tax payment or redemption values, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning the features of series A

and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes turned in for redemption (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement. For sales and redemptions of series A and B notes by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

^{1/} Less than \$50,000.^{1/} Consists of purchases or sales made by the Treasury. Treasury investment accounts comprise (1) trust funds which by law are under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain

U. S. Government agencies whose investments are handled through the facilities of the Treasury Department. This table also includes purchases under Section 19 of the Second Liberty Bond Act, as amended, and excludes the Exchange Stabilization Fund.

Treasury Survey of Ownership of Securities Issued by the United States Government and by Federal Agencies, February 28, 1946

The tables in Section I present summary data as of February 28, 1946 from the Treasury Survey of Ownership of Securities Issued or Guaranteed by the United States. The banks and insurance companies covered in the survey account for approximately 95 percent of the

amount of such securities owned by all banks and insurance companies in the United States.

Section II presents summary data on the ownership of Federal land bank bonds and Federal intermediate credit bank debentures.

Section I - Securities Issued or Guaranteed by the United States Government

Table 1.- Summary: All Interest-Bearing Securities

Note: The Treasury Survey commenced with data for March 31, 1941 and has been published regularly in the "Treasury Bulletin" since May 1941. Revisions of data for September 30, 1944 appeared in the February 1945 issue, page 53; reclassification of date on banks for the period November 1943 through February 1944 appeared in the May 1944 issue, pages 52-57; revisions of data on insurance companies for May 31, 1943 and prior months appeared in the November 1943 issue, pages 52-63.

* Less than \$500,000 or less than .05%.

^{1/} Securities held in trust departments are excluded.

^{2/} Includes trust companies.

^{3/} This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See headnote to this section.

^{4/} Issues which commercial banks may not acquire prior to a specified

date (with minor exceptions). See footnote 2, page 25.

^{5/} Guaranteed securities held by the Treasury are not included.

^{6/} Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

^{7/} Includes an estimated amount of Federal Housing Administration debentures.

^{8/} Actual figures by tax status are available only for total amount outstanding.

1/ Excludes Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).
 2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.
 3/ Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.
 4/ Included in the Average Yield of Long-Term Taxable Treasury Bonds.

5/ Issues which commercial banks may not acquire prior to a specified date (with minor exceptions). See footnote 2, page 25.
 6/ Quoted on a yield basis.
 7/ Quoted on price basis at par from March 22 through March 30; from March 16 through March 21, quoted on basis of zero yield plus premium per thousand dollars; prior to March 15, quoted on a yield basis.
 8/ For amount of this security issued on April 1, 1946, see table on "Offerings of Marketable Issues of Treasury Bonds, Notes, and Certificates" in the chapter on "Public Debt and Guaranteed Obligations of the United States Government."
 9/ Called on February 14, for redemption on June 15, 1946.
 10/ Excludes postal savings bonds.

Over-the-Counter Closing Quotations on Public Marketable Securities Issued by the
United States Government and by Federal Agencies
March 30, 1946 - (Continued)

1/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "When issued" prices for all securities except Federal Intermediate Credit Bank debentures are included beginning November 1, 1941. Dates of highs and lows, in case of recurrence, are the latest dates.

2/ Market convention treats the yield to earliest call date as more

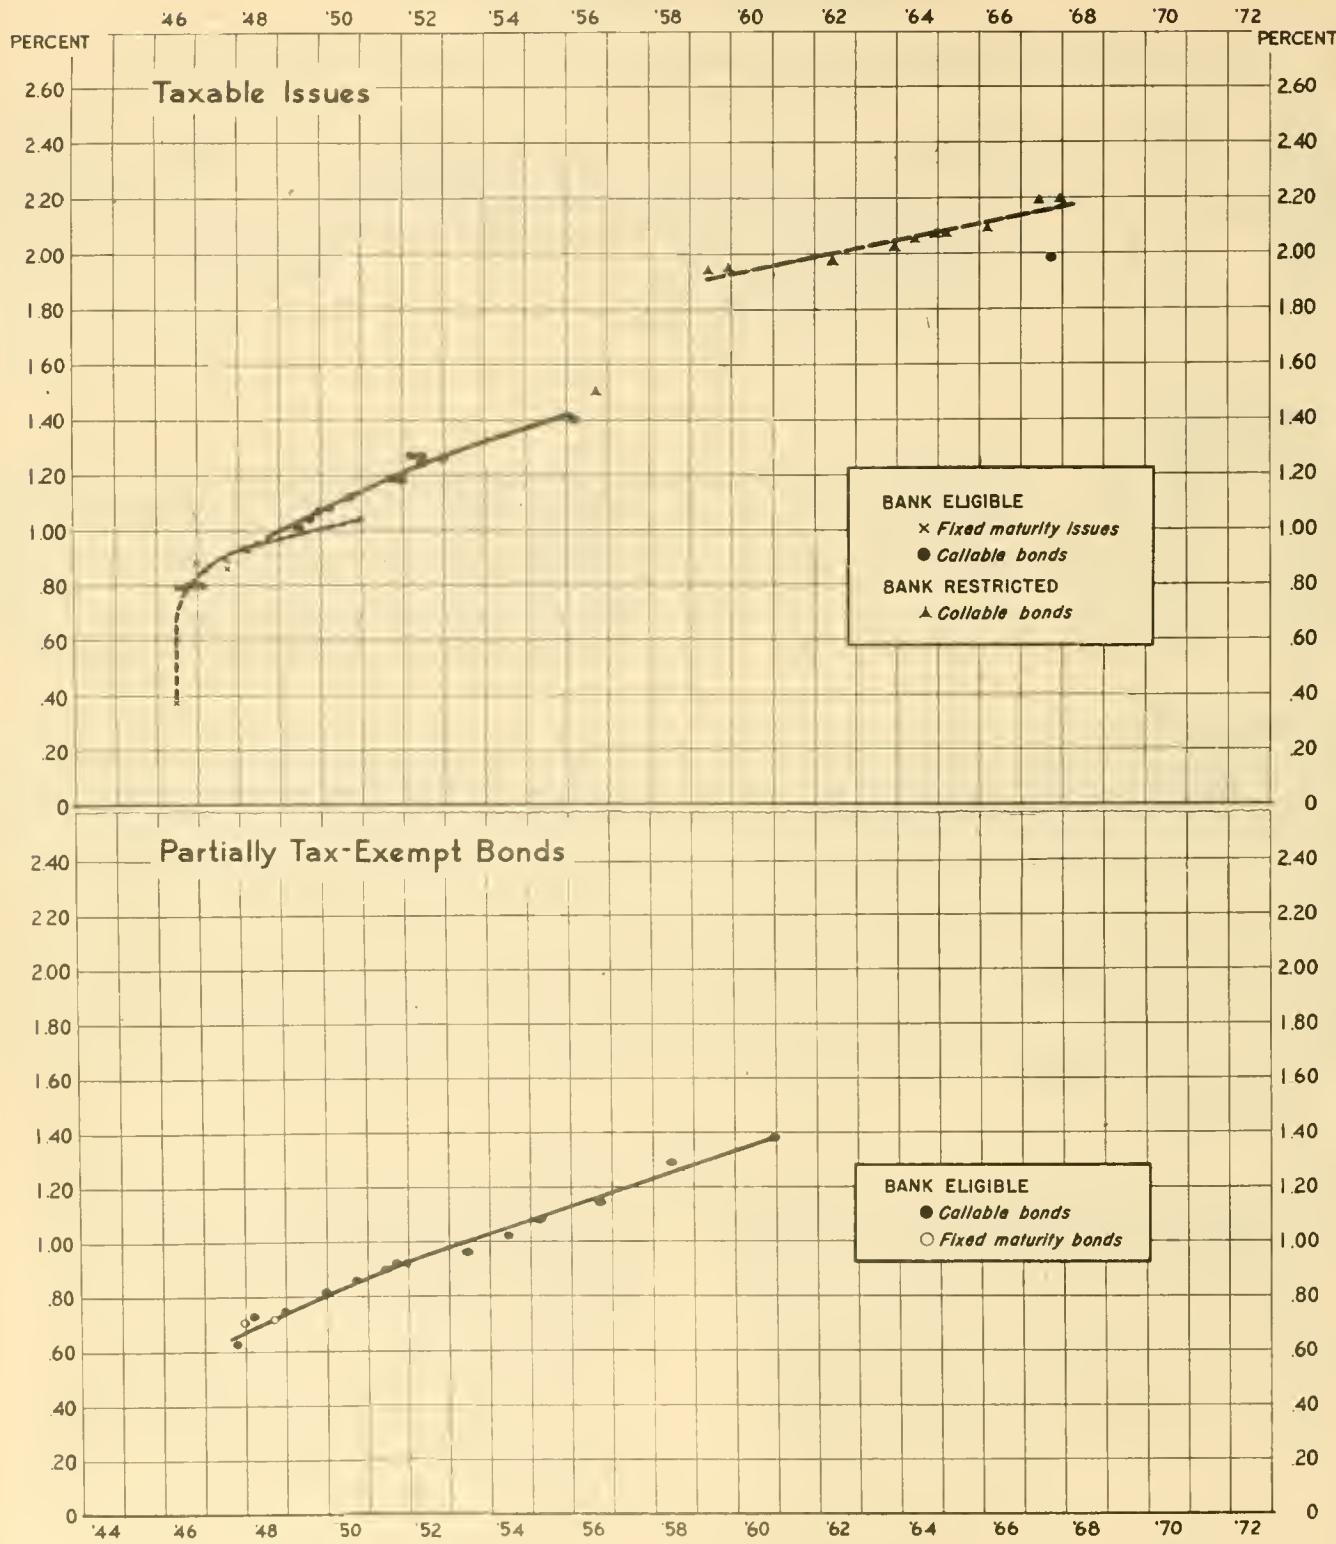

significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

3/ Prices quoted are subject to a dealer's commission. These securities are not shown until date of issue.

4/ Excludes issues completely held by Farm Credit Administration agency.

YIELDS OF TREASURY SECURITIES MAR. 30, 1946

Based on Mean of Closing Bid and Asked Quotations

Explanation The points represent yields to call date when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Note: Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. Monthly and weekly data for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944, pages 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of average see "Treasury Bulletin" for March 1944, page 58. The partially tax-exempt series was discontinued on December 15, 1945 because there were no longer any bonds of this classification due or callable in 15 or more years. Partially tax-exempt bonds are those the interest on which is exempt

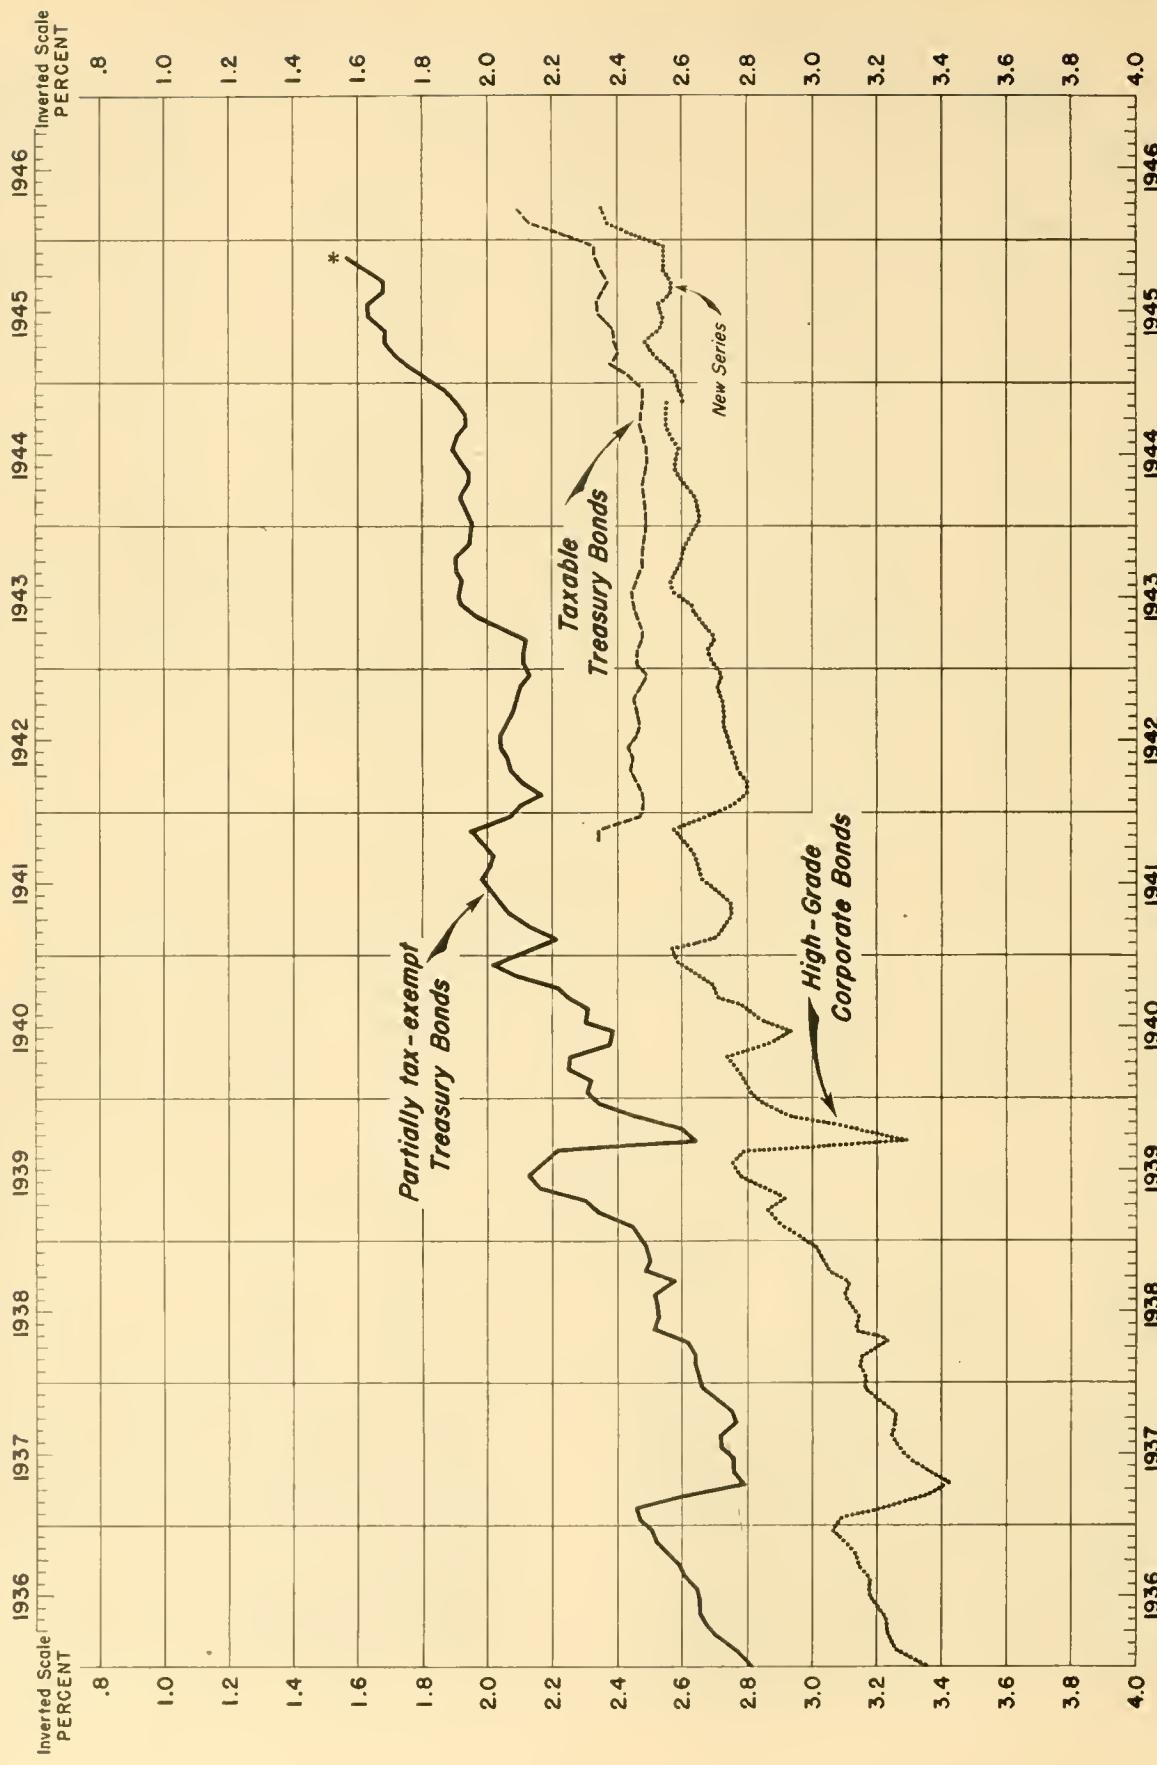

from the normal rates of the Federal income tax, except that in the case of partially tax-exempt Treasury and United States savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax. For discussion of present composition of high-grade corporate bond average, see "Treasury Bulletin" for January 1945, page 56; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treasury Bulletin" for April 1943, page 61.

2/ Monthly averages of daily figures. Prior to April 1, 1938, corporate bonds are averages of Saturday figures.

3/ The composition of the high-grade corporate bond average was revised commencing with November 1, 1944. The old average for November 1944 was 2.56%. See footnote 2.

4/ On days when the exchanges are closed, the date and prices of the previous day are used.

AVERAGE YIELDS OF LONG-TERM TREASURY AND CORPORATE BONDS

Source: (1) Total receipts from internal revenue: Daily Treasury Statement; (2) Detailed collections by type of tax: Reports of collections made by collectors of internal revenue.

Revised.

• Less than \$500.

1/ Excludes collections for credit to certain trust accounts for territories and insular possessions, etc.

2/ Consists only of collections for which returns have been filed with the Collector of Internal Revenue. Collections under this act as shown in Daily Treasury Statements consist of withholdings deposited in Government depositories in addition to payments accompanying returns filed with the Collector of Internal Revenue.

3/ Current collections consist in general of taxes paid within twelve months after the close of the taxable year for which the return was filed.

4/ Current individual income tax collections for the fiscal year 1945 include payments on unforgiven portion of 1942 tax, due March 15, 1945, as follows: \$308,605 thousand for the period January 1, 1945 through April 30, 1945, and \$173,595 thousand for March 1945.

5/ Represents collections under the Federal Insurance Contributions Act.

6/ Represents collections under the Federal Unemployment Tax Act.

7/ Represents collections under the Carriers' Taxing Act of 1937.

8/ Tax imposed upon the manufacture and sale of, and the occupational tax on, mixed flour repealed as of November 1, 1942.
