Treasury Financing Operations

June Certificate Offering

On May 18, 1953, the Secretary of the Treasury announced the offering on May 20, of a new issue of one-year 2-5/8 percent certificates of indebtedness. The certificates were offered to holders of the 11-month 1-7/8 percent certificates maturing on June 1 and to holders of the 2 percent partially tax-exempt Treasury bonds of June 15, 1953-55 (dated October 7, 1940) which previously had been called for redemption on June 15. The maturing certificates were outstanding in the amount of \$4,963 million and the called bonds in the amount of \$725 million. Subscriptions to the new certificates totaled \$4,858 million, which was 85 percent of the maturing and called securities.

The new certificates, Series B-1954, are dated June 1, 1953, and will bear interest from that date at the rate of 2-5/8 percent per annum payable with the principal at maturity on June 1, 1954. They were exchanged par for par for the maturing certificates on June 1, and for the called bonds par for par on June 15, with an interest adjustment on that date. Cash subscriptions were not received. The certificates were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000. Subscription books were closed at the close of business on May 22.

Reports to the Treasury on the ownership of Government securities indicated that on March 31, 1953, about 52 percent of the maturing certificates and about 90 percent of the called bonds were owned by reporting commercial banks and Federal Reserve Banks. The ownership figures for March 31 are the latest published for commercial banks.

Maturing certificates were exchanged in the amount of \$4,410 million, leaving \$553 million to be paid in cash, and the called bonds were exchanged in the amount of \$448 million, leaving \$277 million to be paid in cash.

Treasury Savings Notes, Series B

The Secretary of the Treasury announced on May 11 that a new series of Treasury savings notes would be available for purchase beginning on May 15.

The announcement recalled that Treasury savings notes are issued primarily to provide a security in which corporations and other taxpayers can invest their tax reserves as they accumulate during the

year; and that the notes are utilized extensively also by corporations for the investment of other short-term funds.

The new notes, designated Series B, replaced Treasury savings notes Series A, which had been on sale since May 15, 1951. The new notes are similar in all respects except as to maturity and interest rate. Their maturity is two years instead of the three years of the discontinued series.

Interest on the new Series B notes accrues monthly on the fifteenth calendar day of each month after the issue date on a graduated scale as follows:

Half-year periods after month of issue	Interest accrual each month per \$1,000
First 6 months.....	\$1.80
7th through 12th month	2.10
13th through 18th month	2.20
19th through 24th month	2.30

The table on the following page shows for the denomination of \$1,000 the monthly tax-payment or redemption values and approximate investment yields. The official circular, No. 922, dated May 11, 1953, contains a table showing these data for each denomination, and gives the terms of the offering in full.

Series B savings notes, if inscribed in the name of a Federal taxpayer, may be used in payment of Federal income, estate, and gift taxes assessed against the owner of the notes or his estate at par and accrued interest, at any time after two months from the issue date. If not presented in payment of taxes, and except for notes in the names of banks that accept demand deposits, Series B notes will be redeemable for cash at par and accrued interest at any time after four months from the issue date. If inscribed in the name of a bank that accepts demand deposits, the notes will be accepted at par and accrued interest in payment of taxes, but will be redeemed for cash at or before maturity only at the purchase price.

Tax Anticipation Bills Offered

On May 26, the Secretary of the Treasury invited tenders for \$800 million, or thereabouts, of 107-day Treasury bills, Tax Anticipation Series. The bills are dated June 3, 1953, and will mature September 18, 1953. They will be accepted at face value in payment of income and profits taxes due on

position", respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills".

September 15, 1953; and to the extent that they are not presented in payment of taxes due they will be paid in cash at maturity. Taxpayers desiring to apply these bills in payment of September 15, 1953, income and profits taxes have the privilege of surrendering them to any Federal Reserve Bank or branch not more than fifteen days before September 15, 1953, and receiving receipts therefor showing the face amount of the bills so surrendered.

The offering was for cash with payment on the date of issue, except that any qualified depositary could make payment for the bills by credit in its Treasury tax and loan account up to any amount for which it is qualified in excess of existing deposits.

In the President's tax message to Congress on May 20, 1953, total budget expenditures in 1954 are estimated at \$74.1 billion (see page 1). Expenditure classifications shown here differ somewhat from those in the Budget.

income tax not withheld. Fiscal year figures exclude old-age insurance tax, on the basis of estimate beginning 1952. For further explanation, see footnote 7.

4/ Partly estimated beginning January 1951 (see footnote 7). Monthly figures will not add to this total (see footnotes 2 and 3).

5/ Consists of receipts for old-age insurance, unemployment insurance, and railroad retirement; for further detail, see Tables 7 and 8. Beginning January 1951, receipts for old-age insurance are estimated as explained in footnote 7. Railroad unemployment insurance contributions for administrative expenses are included in "Other receipts".

6/ Includes proceeds from sale of surplus property and from Government-owned securities; deposits resulting from renegotiation of war contracts (see "Treasury Bulletin" for February 1948, page 5); and repayments on credit to United Kingdom (see Table 4).

1/ Fiscal year ending June 30 of year indicated.

2/ Gross receipts less appropriations to Federal Old-Age and Survivors Insurance Trust Fund and refunds of receipts.

1/ Expenditures are "net", after allowance for reimbursements to appropriations, receipts of revolving fund appropriations, and receipts credited to disbursing accounts of corporations and agencies having authority to use collections without formal covering into the Treasury. The figures include transfers to trust accounts, transactions of the Foreign Economic Cooperation Trust Fund, established under the Economic Cooperation Act of 1948 (62 Stat. 150), and transactions of wholly owned Government corporations and end agencies. Beginning November 1950, investments by these corporations and agencies

1/ Excess of expenditures is covered by appropriations by Congress.

2/ Taxes on employees and employee under the Federal Insurance Contributions Act and later amendments (26 U.S.C. 1400-1432); and tax on self-employment income under the Social Security Act Amendments of 1950 (26 U.S.C. 480-482). The tax on self-employment income is levied and collected as part of the individual income tax beginning with the taxable year 1951. Beginning January 1951, the receipts shown here are based on estimates (see footnote 4).

3/ Tax on employers of 8 or more under the Federal Unemployment Tax Act and later amendments (26 U.S.C. 1600-1611). Figures exclude certain credits not to exceed 90 percent of the total tax which are allowed with respect to contributions by the taxpayer to a State fund under a State unemployment compensation law.

4/ Appropriation to the Federal Old-Age and Survivors Insurance Trust Fund equivalent to the amount of taxes collected and deposited for old-age insurance (42 U.S.C. 401 (a); see also footnote 2). The Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950, changed in certain respects the basis of transferring the appropriated funds to the trust fund. Effective January 1, 1951, the amounts transferred currently as appropriations to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury, and are adjusted in later transfers on the basis of wage and self-employment income

records maintained in the Social Security Administration. For purposes of this table, beginning January 1951, the same amount as is credited each month to the trust fund is shown as estimated current tax receipts for old-age insurance.

5/ Interest on refunds is included under "Administrative expenses".

6/ Includes expenditures from appropriations made specifically for administrative expenses relating to the Social Security Act, as amended; administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended; administrative expenses under the Wagner-Peyser Act of 1933, as amended (29 U.S.C. 49d); and interest on refunds of social security taxes.

7/ Aid to permanently and totally disabled (Title XIV) as added by Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950.

8/ For unemployment insurance and maintenance of public employment office; includes expenditures made directly by the Federal Government beginning January 1942 for maintenance of employment office, and expenditures of the U.S. Employment Service for the period December 1942 through June 1948, when it was not in the Bureau of Employment Security.

9/ Total includes expenditures for grants to State, Public Health Service, as follows: 1945, \$10.7 million; and 1946, \$.2 million. After 1945 expenditures were made under provisions of the Public Health Service Act of 1944 (58 Stat. 682).

* Less than \$50,000.

1/ The U. S. subscription to the capital of the International Monetary Fund was paid in part from the Exchange Stabilization Fund (see "Treasury Bulletin" for September 1947, page 17).

2/ Consists of seigniorage on silver and increment resulting from reduction in weight of the gold dollar. This item is part of the

cash budget receipts shown in these tables, but is excluded from the budget figures for "Receipts from the public".

3/ In addition to the decrease in the General Fund balance, the Exchange Stabilization Fund was drawn down by \$1,800 million for subscription to the capital of the International Monetary Fund.

4/ In the President's tax message to Congress on May 20, 1953, the cash deficit for 1954 (cash operating outgo less net receipts from the exercise of monetary authority) was estimated at \$3.3 billion on the basis of existing tax laws (see page 1).

 1/ Obligations issued by certain Government corporations and other agencies, which are guaranteed by the United States as to both principal and interest.

Such obligations were first authorized in 1932. Prior to September 1939, the figures represent principal shown as a contingent liability of the United States; beginning September 1939, they represent principal outstanding, both matured and unmatured. Guaranteed securities held by the Treasury are excluded.

STATUTORY DEBT LIMITATION

The Second Liberty Bond Act, as amended, (31 U.S.C. 757 b), provides that the face amount of obligations issued under authority of that act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury), shall not exceed in the

aggregate \$275 billion outstanding at any one time. Obligations issued on a discount basis, and subject to redemption prior to maturity at the option of the owner, are included in the statutory debt limitation at current redemption values.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between March 1935 and the end of April 1941, and Series E, F, and G were first offered in May 1941. When Series E began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redeem the bonds in cash in accordance with the original term; to retain them with an extended maturity of 10 years at specified rates of interest accrual; or to exchange them for Series G bonds. A number of changes became effective May 1, 1952. The principal ones were: The rate of interest accrual on Series E was increased, especially for the near term, with corresponding changes in extended Series E; and Series F and G were replaced by two new issues, Series J

and K, also at higher interest rates. A new current-income bond, Series H, similar in interest return to Series E, was offered beginning June 1. For details of these changes see "Treasury Bulletin" for May 1952, page A-1.

In the tables which follow, Series A-F and J sales are shown at issue price and total redemptions and amounts outstanding at current redemption values. Series G, H, and K are shown at face value throughout. Matured bonds which have been redeemed are included in redemptions. Data by denominations and sales by States are published on a monthly basis but not in each issue of the "Treasury Bulletin".

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Excludes trust departments.

2/ Includes trust companies and, beginning with figures for July 1949, also includes stock savings banks. Formerly these banks were shown as a separate classification, but they are no longer so reported.

3/ Includes those banks and insurance companies not reporting in the Treasury Survey.

4/ United States savings bonds, Series E, F, and J, are shown at current redemption values. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

5/ Holdings by reporting agencies not available.

6/ Excludes guaranteed securities held by the Treasury.

7/ Issues which commercial banks may not acquire prior to specified dates (with minor exceptions); see "Debt Outstanding", Table 3, footnote 1.

8/ Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly" tax-exempt securities are those with the income exempt from both normal tax and surtax. "Partially" tax-exempt securities are those with the

income exempt from the normal tax except that in the case of partially tax-exempt Treasury bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to normal tax and surtax.

9/ Includes F. H. A. debentures; see footnote 10.

10/ A small indeterminate amount of these debentures is partially tax-exempt.

11/ Includes \$73.1 million depositary bonds held by commercial banks not included in the Treasury Survey.

12/ C. C. C. demand obligations as of the close of the previous month in the amount of \$34 thousand, all held by commercial banks, are shown only in the total amount outstanding; holdings by reporting banks are not available.

13/ Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in these banks ended on June 26, 1947.

* Less than \$500,000.

MARKET QUOTATIONS ON TREASURY SECURITIES, APRIL 30, 1953

Current market quotations shown here are over-the-counter closing bid quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York. The securities listed include all public marketable securities issued by the United States Government except Panama Canal bonds. Outstanding issues which are guaranteed by the United States Government are excluded because they are not regularly quoted in

the market. Quotations on public marketable securities issued by Federal agencies but not guaranteed by the United States Government were discontinued after March 1953. The Treasury Department publication "Prices and Yields of Public Marketable Securities Issued by the United States Government and by Federal Agencies", which carried daily quotations for each month, was discontinued after February 1953.

3/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows in case of recurrence are the latest dates.

4/ Not called for redemption on March 15, 1953. Will mature on September 15, 1953.

5/ Not called for redemption on June 15, 1953. Callable on four months' notice on December 15, 1953.

6/ Yield to maturity. Market convention treats the yield to earliest

call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

7/ Included in the average of taxable Treasury bonds, due or callable from 12 to 20 years beginning April 15, 1953, as shown under "Average Yields of Long-Term Bonds".

8/ Amount allotted as of May 8, 1953, \$1,607 million.

9/ First quoted April 15, 1953. This issue is listed under a new long-term taxable Treasury bond class due or callable 20 years and after as shown under "Average Yields of Long-Term Bonds".

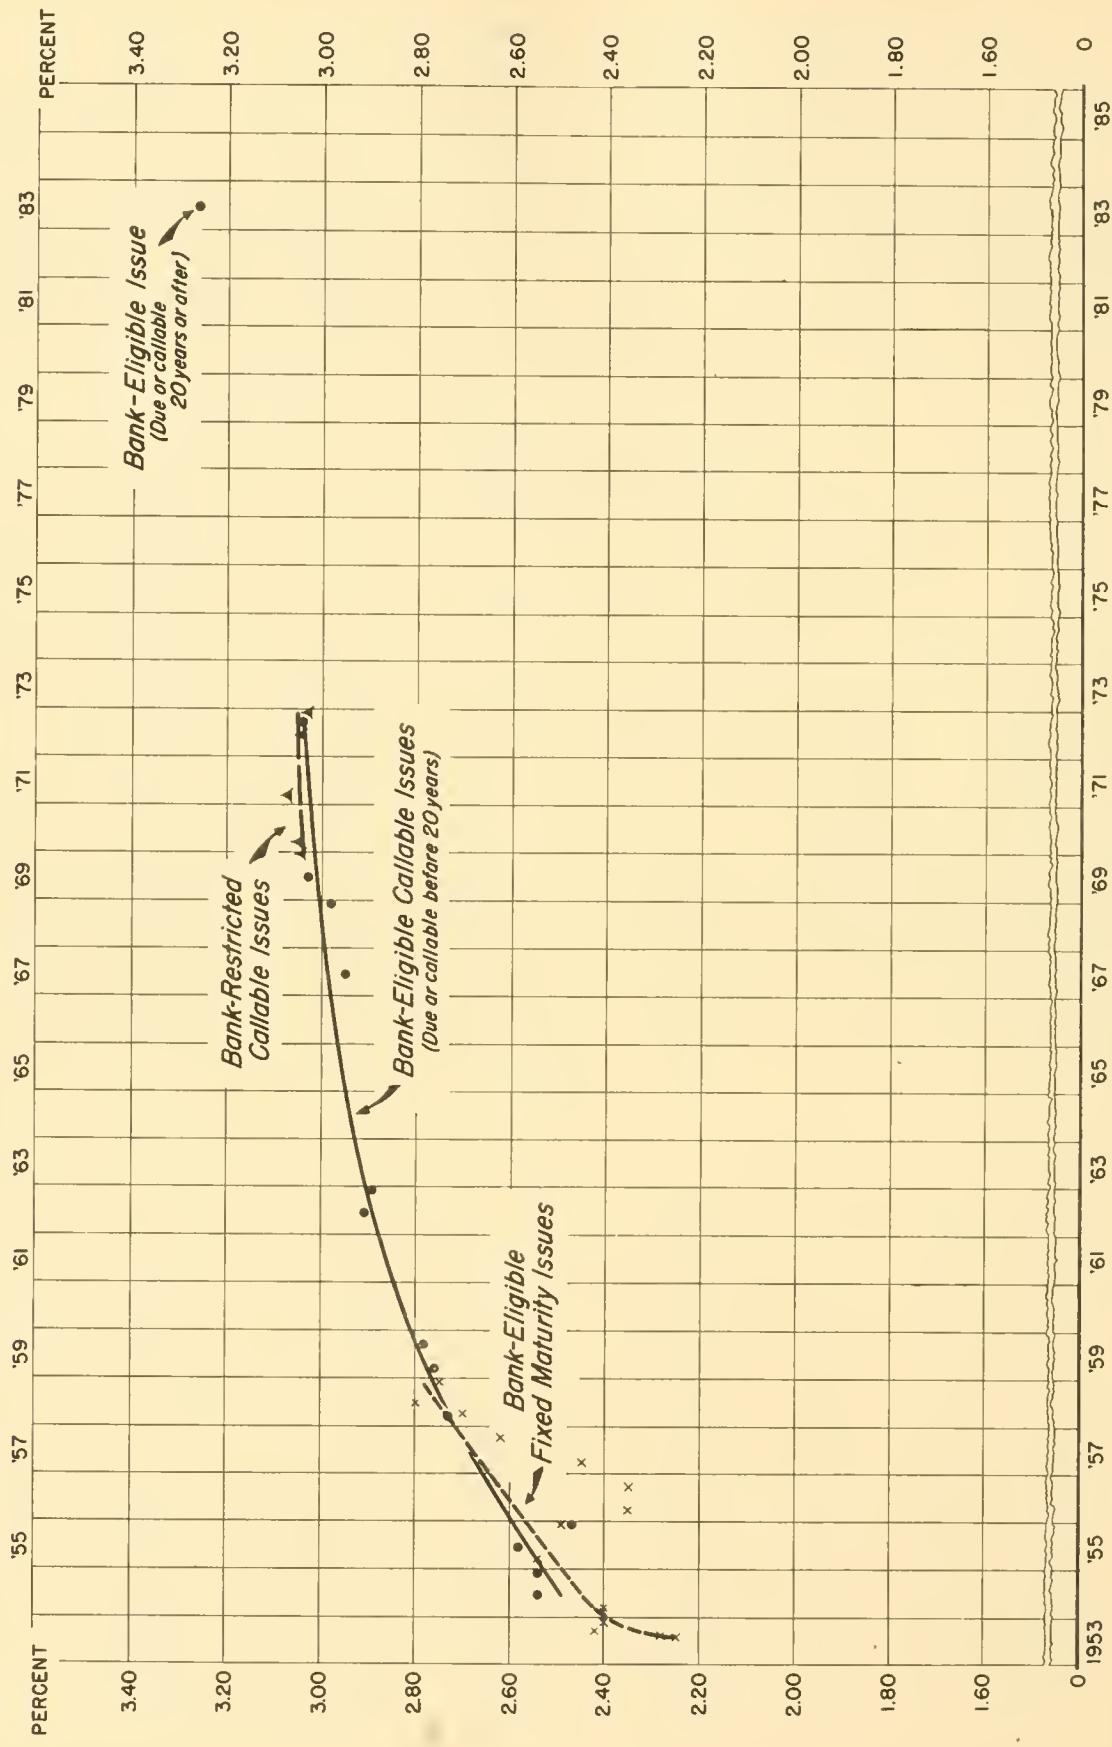

10/ For definition, see "Debt Outstanding", Table 3, footnote 1.

11/ All partially tax-exempt.

12/ Called on February 13, 1953, for redemption on June 15, 1953.

MARKET QUOTATIONS ON TREASURY SECURITIES, APRIL 30, 1953

YIELDS OF TAXABLE TREASURY SECURITIES, APR. 30, 1953
Based on Closing Bid Quotations

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which on exchange offer has been made or which are due or callable in less than 3 months are excluded.

1/ Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of the mean of closing bid and ask quotations. For definition of taxable bonds, see footnote to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin".

2/ Prior to April 1953, the single series on long-term taxable Treasury bonds included the following: beginning April 1952, bonds neither due nor callable for 12 years; from December 1935 through March 1952, bonds neither due nor callable for 15 years. For a discussion of the

composition of these Treasury bond averages, see the "Treasury Bulletin" for March 1944, page 58.

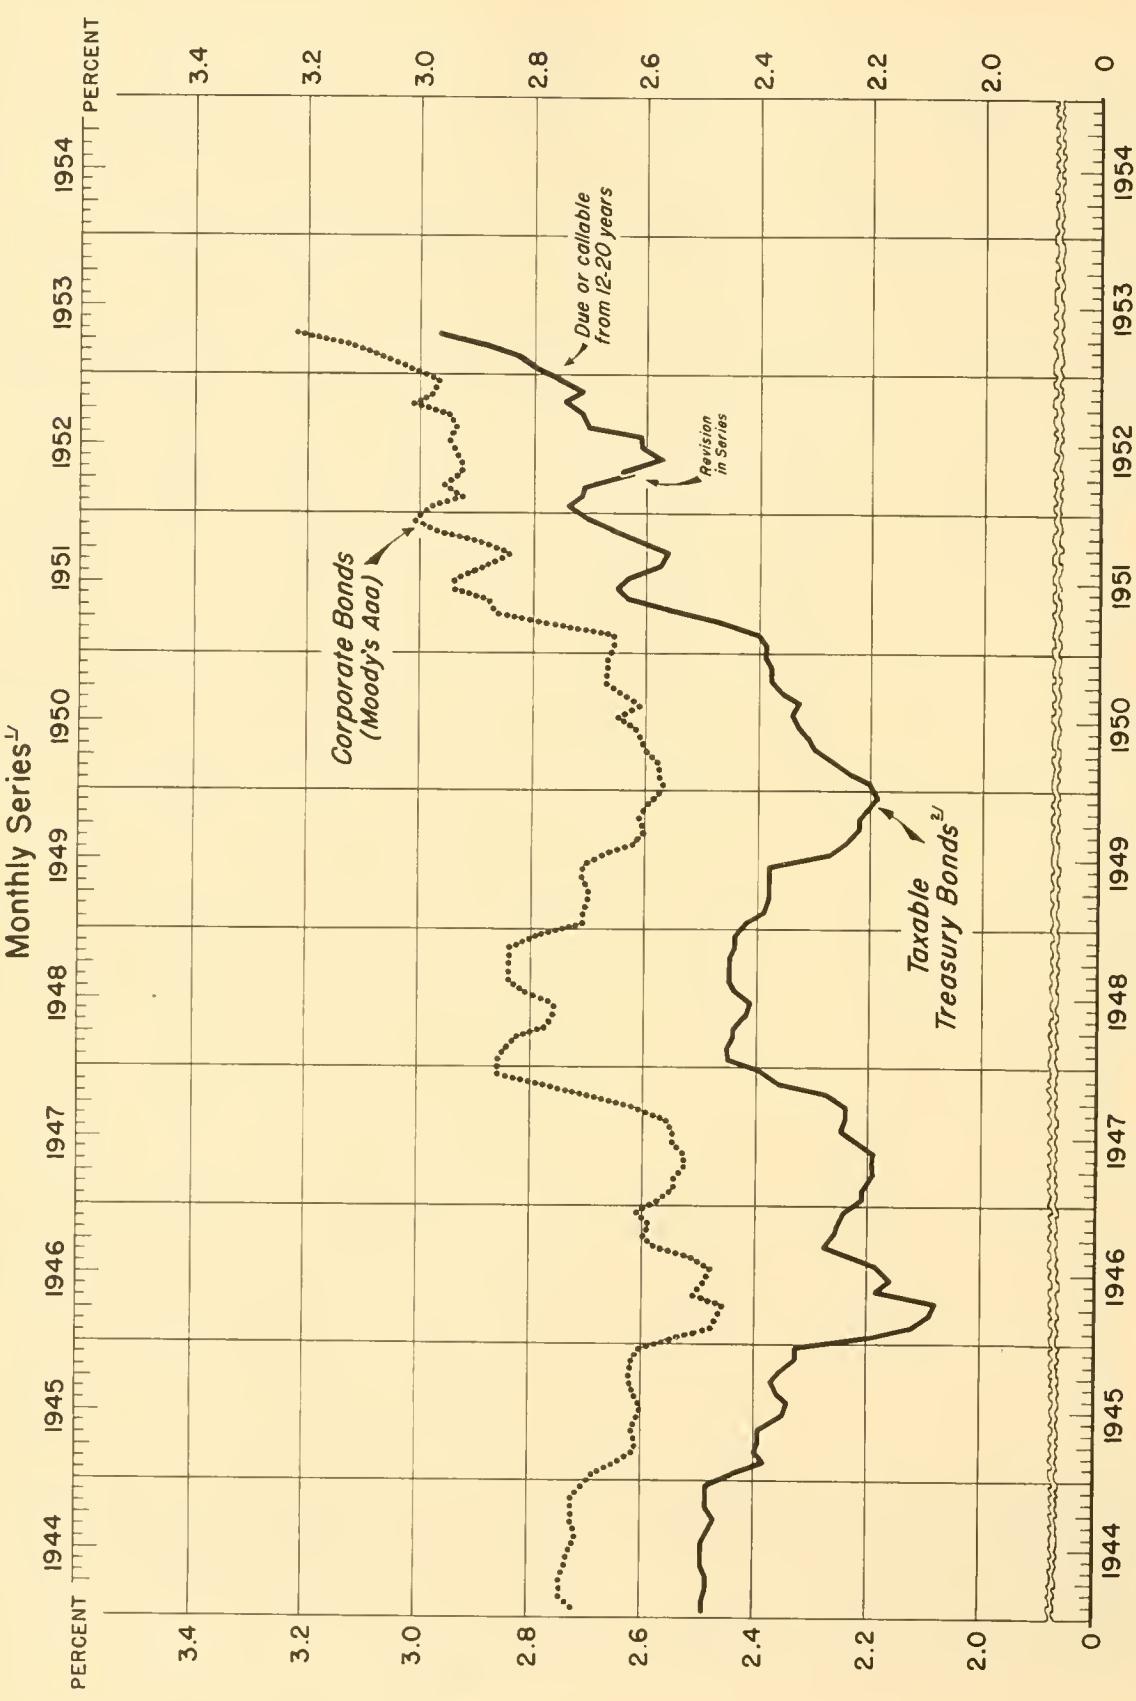

3/ Moody's Investors Service average of Aaa corporate bonds. This series supersedes the Treasury average of high-grade corporate bonds previously shown in this table, which was discontinued after March 1953.

4/ The long-term taxable Treasury bond average was revised beginning April 1, 1952, see footnote 2. The old average for April 1952 was 2.62 percent.

5/ Market closed.

Source: Daily Treasury Statement for total receipts from internal revenue; reports by the Bureau of Internal Revenue for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositaries; they do not coincide with amounts reported by the Bureau because of the lag in deposits of collections and because certain taxes are paid directly into the depositaries.

1/ Excludes collections for credit to certain trust accounts for island possessions; includes corporation income tax on Alaska Railroad (repealed by Public Law 386, approved June 10, 1952, for taxable years ending after that date).

2/ Includes excess profit taxes formerly shown separately as follows: unjust enrichment through 1947 (thereafter these collections are included under "Miscellaneous taxes"); declared value (repealed for years ending after June 30, 1946); Excess Profits Tax Act of 1940

(Title II of the Second Revenue Act of 1940, which was repealed for years ending after December 31, 1945). Includes also excess profits taxes on Army and Navy contracts under the Vinson Act as amended (34 U.S.C. 496) and income tax on business income of exempt organizations, imposed by the Revenue Act of 1951, approved October 20, 1951.

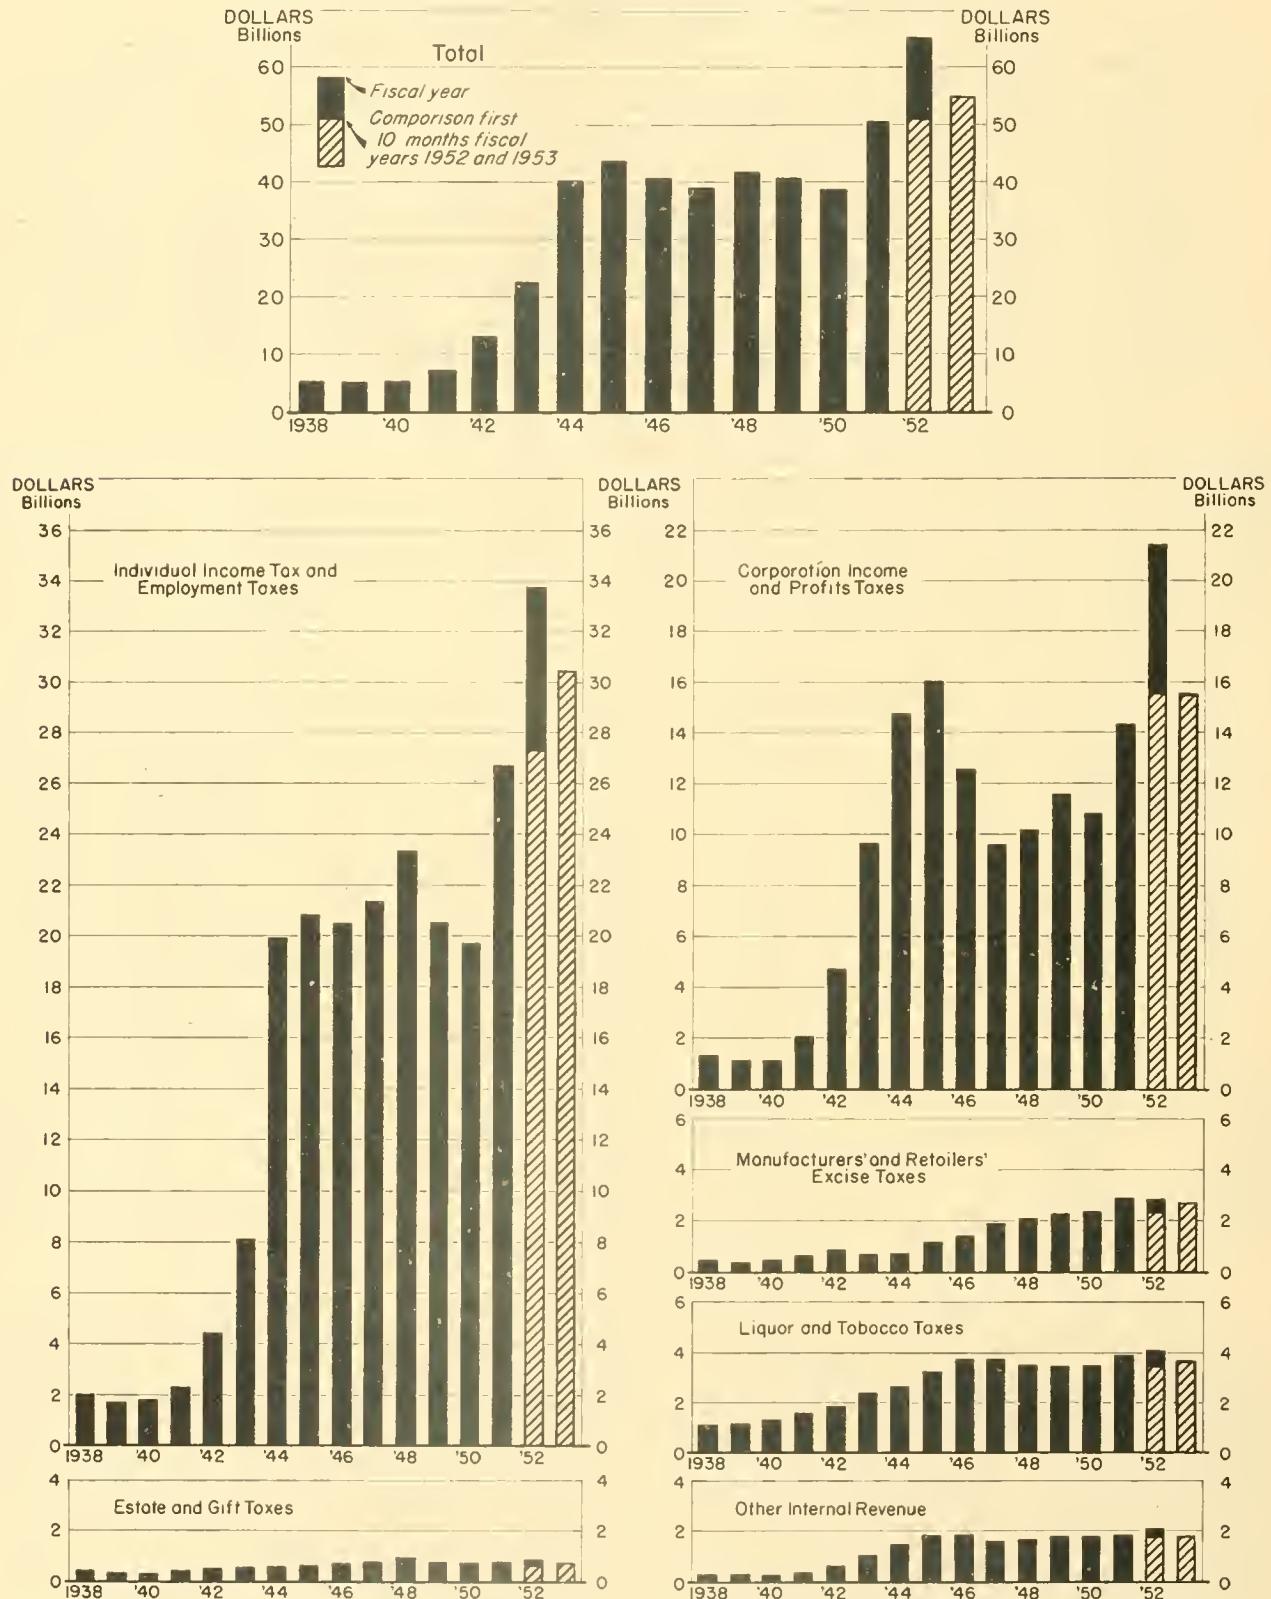

3/ Monthly figures include old-age insurance tax on self-employment income, which is levied and collected as part of the individual income tax beginning with the taxable year 1951. Fiscal year figures exclude this tax, on the basis of estimates beginning 1952, and it is included under "Old-age insurance taxes".

4/ Withheld income tax and old-age insurance taxes on employers and employees are paid into the Treasury in combined amounts beginning January 1951, so that current collections are not separable as to type of tax. For fiscal years beginning 1951, the breakdown is estimated.

5/ Repealed for years ending after June 30, 1945. Beginning July 1950, included under "Miscellaneous taxes".

Source: Daily Treasury Statement for total receipts from internal revenue; reports by the Bureau of Internal Revenue for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositaries; they do not coincide with amounts reported by the Bureau because of the lag in deposits of collections and because certain taxes are paid directly into the depositaries.

the Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950. The tax is levied and collected as part of the individual income tax beginning with the taxable year 1951. For estimated fiscal year breakdown, see Table 1.

4/ Beginning January 1951, withheld income tax and social security employment taxes on employers and employees are paid into the Treasury in combined amounts without separation as to type of tax, pursuant to the Social Security Act Amendments of 1950. CAPITAL MOVEMENTS

Data relating to claims on foreigners and liabilities to foreigners, and capital movements between the United States and foreign countries, have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury regulations thereunder. Information covering the principal types of data and the principal countries is reported each month by banks and bankers and securities brokers and dealers in the United States. This information is published regularly in the "Treasury Bulletin". Supplementary information is published at less frequent intervals. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

The term "foreigners" as used in these reports covers all institutions and individuals (including United States citizens) domiciled outside the United States, as well as international organizations, wherever domiciled, created by treaty or convention between sovereign states. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, basis of reporting, and derivation of capital movements figures appeared in the April 1950 issue of the "Treasury Bulletin", pages 50-52. Revised report forms and regulations became effective with

the data for January 1950. Attention is called to the fact that although the grand total figures on the revised reporting basis are reasonably comparable with those for preceding months, data for individual countries in some instances are not comparable because of certain changes in coverage and geographical classification.

The supplementary information, contained in Section IV, is presented in three tables appearing at different times. Table 1 gives data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue of the "Treasury Bulletin" and begins with data for September 30, 1946. Table 2 supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. This table appeared for the first time in the December 1949 issue. Data are for the end of the calendar year beginning with 1942. Table 3 gives information on short-term liabilities to countries not regularly reported separately by banks and bankers. This table appeared for the first time in the April 1950 issue. The data have been requested at irregular intervals, the earliest date being October 1943.
