BUDGET RESULTS FOR THE FIRST QUARTER, FISCAL 1987

Summary

The Federal deficit for the first quarter of fiscal 1987 narrowed to \$64.3 billion from \$75.1 billion in the comparable months of fiscal 1986. About one-third of the reduction of \$10.8 billion in the deficit reflected special factors, including some shifting of spending into fiscal 1986 from fiscal 1987 and the receipt of Outer Continental Shelf royalty payments that had been held in escrow. The narrowing of the deficit also reflected a relatively strong rate of increase in receipts, which was largely traceable to effects of tax law changes. The increase in outlays was quite modest, even after adjustment for special factors.

Receipts in the first quarter of fiscal 1987 totaled \$190 billion, up about 7 1/4 percent from the corresponding months of fiscal 1986. Total outlays in the first quarter were \$254.4 billion, up about three-fourths percent from the year earlier figure.

Generally outlays of most agencies during the first 3 months of fiscal 1987 were up only moderately from a year earlier, and for some agencies spending was down. Defense spending was up one-half percent from a year earlier, after doubling between fiscal years 1980 and 1986. Outlays by the Departments of Energy, Housing and Urban Development, Commerce, State, and Transportation, and a number of independent agencies, were down from year earlier figures. Counter to this pattern of fairly moderate gains or declines in spending, outlays for Medicare and Medicaid were up by nearly 14 percent, combined, from the first 3 months of fiscal 1986, while spending by the Federal Savings and Loan Insurance Corporation was up \$1 billion from the first quarter of fiscal 1986.

Fourth-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the fourth quarter of fiscal 1986 supplements fiscal data earlier reported in detail in the fall issue of the *Treasury Bulletin*. At the time of that issue's release, not enough data was available to analyze adequately collections for the quarter. Future analyses of this kind will be published, unavoidably, with the same timelag.

Individual income taxes.—Individual income tax receipts for the period July through September 1986 were \$8 billion greater than receipts in the corresponding 1985 period. This 9.2-percent increase in net receipts reflected an increase in withheld receipts of \$5.1 billion, in nonwithheld receipts of \$2.5 billion, and a decrease in refunds of \$0.3 billion.

Corporation income taxes.—The \$15.9 billion of corporate receipts for the quarter were nearly \$2 billion higher than for the same quarter 1 year earlier. The higher level of receipts was primarily due to large payments of final tax liabilities for the previous year made in the July-September quarter, reflecting non-

calendar-year corporations' payments of tax on higher corporate profits.

Employment taxes and contributions.—Employment taxes and receipts for the fourth quarter of fiscal 1986 continued to show the impact of the FICA rate and base changes effective January 1, 1986. The \$62 billion collected in this quarter is \$3 billion higher than the \$59 billion collected in the same period in fiscal 1985.

Unemployment insurance.—Unemployment insurance receipts for the July-September 1986 quarter were \$5.6 billion, slightly above the year earlier level of \$5.5 billion. The latter amount included a negative

BUDGET RESULTS FOR THE FIRST QUARTER, FISCAL 1987

adjustment for amounts previously misclassified as unemployment insurance.

Contributions for other insurance and retirement.—Employee contributions by Federal and District of Columbia workers were \$1.2 billion, about the same in the third and fourth quarters of fiscal 1986. However, receipts are down negligibly from the previous year due to the new Federal retirement program.

Excise taxes.—Excise tax receipts of \$7.7 billion for the July-September 1986 quarter were \$1.6 billion below the year earlier level. This decline occurred as a result of the sharp drop in oil prices from year earlier levels which eliminated receipts from the windfall oil profits tax.

Estate and gift taxes.—Net estate and gift taxes were \$1.8 billion for the fourth quarter of fiscal 1986, a \$0.1 billion decline from the third quarter in 1986 and a \$0.1 billion increase from the fourth quarter of 1985.

Customs duties.—Customs receipts, net of refunds, were \$3.8 billion for the fourth quarter of fiscal 1986, a major increase from the \$3.2 billion for the same quarter in 1985. The high collections reflected the strong import demand.

Miscellaneous receipts.—Miscellaneous receipts for the fourth quarter of fiscal 1986 exceeded receipts for the same quarter a year earlier by \$0.1 billion. Deposits of Federal Reserve earnings increased by \$0.2 billion, while net other miscellaneous receipts experienced a decrease of \$0.1 billion.

1/ The receipts in the various States do not indicate the Federal tax burden of each since, in many instances, taxes are collected in one State from residents of another State. For example, withholding taxes reported by employers located near State lines may include substantial amounts withheld from salaries of employees who reside in neighboring States. Also, the taxes of some corporations are paid from a principal office, although their operations may be located in another State, or throughout several States.

2/ Collections of individual income tax not withheld include old-age, survivors, disability, and hospital insurance taxes on self-employment income (SECA). Similarly, the collections of individual income tax withheld are reported in combined amounts with old-age, survivors, disability, and hospital insurance taxes (FICA) on salaries and wages.

3/ The national totals do not include an adjustment made by the Department of the Treasury after its books were closed to increase "Individual income tax withheld and FICA" and correspondingly decrease "Unemployment insurance" by \$396,387,000. This adjustment does not affect State data.

4/ Includes taxes on unrelated business income of exempt organizations.

5/ Includes District of Columbia collections.

6/ Consists of collections from U.S. taxpayers in Puerto Rico, the Virgin Islands, etc., and in foreign countries.

7/ Tax payments made to banks, under the Federal tax deposit (FTD) system, are included in the internal revenue collections for the period in which

the FTD is purchased. However, such payments are not classified by internal revenue districts (nor by tax subclasses to which excise payments relate) until the FTD payment is applied to the taxpayer's liability from tax returns filed.

8/ Represents credits allowable on income tax returns for certain gasoline and special fuels tax payments and for excess payments under the Federal Insurance Contributions Act (FICA).

9/ Net transactions in the clearing account on the central books of the Treasury for income tax withheld from the salaries of Federal employees.

10/ Designations by taxpayers of a portion of their taxes to the Presidential election campaign fund are not collections, as such, because they do not affect taxpayer liability. Transfers of amounts to this fund are made on a national basis only and, therefore, have no effect on district and regional collection data.

11/ Represents amounts offset against outstanding tax liabilities other than those for Forms 1040 and 1040A on which the credits are claimed.

12/ Includes amounts contained in the national totals but not classified by State or district as of Sept. 30. Also includes amount transferred to a special account for the Northern Mariana Islands.

FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, and consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order, but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In table FO-1, obligations incurred within the Government are distinguished from those incurred outside the Government. Table FO-2 shows only those incurred outside.

This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. ACCOUNT OF THE U.S. TREASURY

SOURCE AND AVAILABILITY OF THE BALANCE IN THE ACCOUNT OF THE U.S. TREASURY

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. Major information sources include the Daily Balance Wire received from the Federal Reserve banks and branches, and electronic transfers through the Treasury Financial Communications System. As the balances in the accounts at the Federal Reserve banks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on Nov. 2, 1976, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate in the program. Depositaries that wish to retain funds deposited in their tax and loan accounts in interest-bearing obligations participate under the Note Option; depositaries that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remittance Option.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same financial institution. On occasion, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the accounts of their customers.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and the economy.

TREASURY FINANCING OPERATIONS, OCTOBER-DECEMBER 1986

O C T O B E R

Auction of 2-Year Notes

On October 15 the Treasury announced that it would auction \$10,250 million of 2-year notes to refund \$9,273 million of notes maturing October 31, 1986, and to raise about \$975 million new cash. The notes offered were Treasury Notes of Series AF-1988, dated October 31, 1986, due October 31, 1988, with interest payable on April 30 and October 31 until maturity. An interest rate of 6 $\frac{1}{8}$ percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, October 22, and totaled \$40,684 million, of which \$10,386 million was accepted at yields ranging from 6.38 percent, price 99.991, up to 6.39 percent, price 99.972. Tenders at the high yield were allotted 46 percent. Noncompetitive tenders were accepted in full at the average yield, 6.39 percent, price 99.972. These totaled \$672 million. Competitive tenders accepted from private investors totaled \$9,714 million.

In addition to the \$10,386 million of tenders accepted in the auction process, \$575 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$529 million was accepted from Government accounts and Federal Reserve banks for their own account.

Auction of 6-Year 11-Month Notes

On October 21 the Treasury announced that it would auction \$7,000 million of 6-year 11-month notes to raise new cash. The notes offered were Treasury Notes of Series H-1993, dated November 3, 1986, due October 15, 1993, with interest payable on April 15 and October 15 until maturity. An interest rate of 7 $\frac{1}{8}$ percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, October 28, and totaled \$16,365 million, of which \$7,004 million was accepted at yields ranging from 7.18 percent, price 99.703, up to 7.23 percent, price 99.434. Tenders at the high yield were allotted 38 percent. Noncompetitive tenders were accepted in full at the average yield, 7.21 percent, price 99.542. These totaled \$261 million. Competitive tenders accepted from private investors totaled \$6,743 million.

November Quarterly Financing

On October 29 the Treasury announced that it would sell to the public at auction, under competitive and noncompetitive bidding, up to \$10,000 million of 3-year notes of Series T-1989, \$9,750 million of 10-year notes of Series D-1996, and \$9,250 million of 30-year bonds of

52-Week Bills

On September 19 tenders were invited for approximately \$9,750 million of 364-day Treasury bills to be dated October 2, 1986, and to mature October 1, 1987. The issue was to refund \$8,421 million of maturing 52-week bills and to raise about \$1,325 million of new cash. Tenders were opened on September 25. They totaled \$36,834 million, of which \$9,823 million was accepted, including \$250 million of noncompetitive tenders from the public and \$2,650 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 5.47 percent.

On October 17 tenders were invited for approximately \$9,750 million of 364-day Treasury bills to be dated October 30, 1986, and to mature October 29, 1987. The issue was to refund \$8,316 million of maturing 52-week bills and to raise about \$1,425 million of new cash. Tenders were opened on October 23. They totaled \$31,964 million, of which \$9,750 million was accepted, including \$243 million of noncompetitive tenders from the public and \$2,250 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$250 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 5.44 percent.

Cash Management Bills

On October 28 tenders were invited for approximately \$4,000 million of 79-day bills to be issued November 4, 1986, representing an additional amount of bills dated January 23, 1986, maturing January 22, 1987. The issue was to raise new cash. Tenders were opened on October 30. They totaled \$31,770 million, of which \$4,011 million was accepted. The average bank discount rate was 5.20 percent.

Public Debt Ceiling

On October 21, 1986, Public Law No. 99-509 (the Budget Reconciliation Bill) raised the statutory public debt limit to \$2,300,000 million from \$2,111,000 million. An earlier increase had been made from \$2,078,700 million to \$2,111,000 million on August 21, 1986. The delay in the passage of debt limit legislation had caused a reduction in the size of several Treasury bill offerings as well as a postponement in the issue of a 7-year note.

2016 to refund \$13,407 million of Treasury securities maturing November 15 and to raise about \$15,600 million new cash.

An interest rate of 6 $\frac{1}{8}$ percent was set on the notes of Series T-1989 after the determination as to which tenders were accepted on a yield auction basis. The

TREASURY FINANCING OPERATIONS, OCTOBER-DECEMBER 1986

Tenders at the high yield were allotted 98 percent. Noncompetitive tenders were accepted in full at the average yield, 6.64 percent, price 99.948. These totaled \$354 million. Competitive tenders accepted from private investors totaled \$7,399 million.

In addition to the \$7,753 million of tenders accepted in the auction process, \$380 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$243 million was accepted from Government accounts and Federal Reserve banks for their own account.

Auction of 7-Year Notes

On December 16 the Treasury announced that it would auction \$7,250 million of 7-year notes to raise new cash. The notes offered were Treasury Notes of Series D-1994, dated January 5, 1987, due January 15, 1994, with interest payable on July 15 and January 15 until maturity. An interest rate of 7 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, December 30, and totaled \$19,041 million, of which \$7,278 million was accepted at yields ranging from 7.08 percent, price 99.557, up to 7.10 percent, price 99.448. Tenders at the high yield were allotted 56 percent. Noncompetitive tenders were accepted in full at the average yield, 7.09 percent, price 99.502. These totaled \$246 million. Competitive tenders accepted from private investors totaled \$7,032 million. In addition to the \$7,278 million of tenders accepted in the auction process, \$10 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities.

52-Week Bills

On December 12 tenders were invited for approximately \$9,750 million of 363-day Treasury bills to be dated December 26, 1986, and to mature December 24, 1987. The issue was to refund \$9,281 million of maturing 52-week bills and to raise about \$475 million new cash. Tenders were opened on December 23. They totaled \$28,507 million, of which \$9,755 million was accepted, including \$274 million of noncompetitive tenders from the public and \$2,519 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 5.60 percent.

U.S. SAVINGS BONDS AND NOTES

Series EE bonds, on sale since Jan. 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for series E and EE savings bonds and savings notes. Series A-D were sold from Mar. 1, 1935, through Apr. 30, 1941. Series E was on sale from May 1, 1941, through Dec. 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through Apr. 30, 1952. Series H was sold from June 1, 1952, through Dec. 31, 1979. Series HH bonds were sold for cash from Jan. 1, 1980, through Oct. 31, 1982. Series J and K were sold from May 1, 1952, through Apr. 30, 1957.

U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds. The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the Treasury Bulletins of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal year 1974.

* Rates are from the Treasury yield curve.

1/ On Apr. 30, 1986, the Treasury announced that it would no longer issue 20-year bonds. Consequently, the 20-year

constant maturity became an interpolation between rates on 10- and 30-year securities. The 20-year series will be discontinued at the end of 1986.

¹ The Treasury long-term bond series has been revised to reflect 30-year maturities rather than the previously used 20-year maturity. The 30-year series was initiated in March 1977.

² Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service and having an original maturity of at least 20 years.

³ Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service.

FEDERAL AGENCIES' FINANCIAL REPORTS

INTRODUCTION

Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 3513a) requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government and provides that each executive agency must furnish the Secretary of the Treasury such reports and information relating to the agency's financial condition and operations as the Secretary may require. The provisions do not apply to the legislative and judicial branches of the Federal Government; however, these entities are encouraged to submit the prescribed reports so the Secretary of the Treasury can prepare comprehensive reports on all the financial activities of the U.S. Government.

The Treasury Financial Manual (I TFM 2-4100) sets the criteria for the submission of annual and quarterly financial reports and schedules in accordance with the Reporting Entities Listing (Bulletin No. 86-04). Reports and schedules are provided for six fund types: Revolving funds, trust revolving funds, 15 major trust funds, all other trust funds, all other activity combined, and consolidated reports of an organizational unit. The financial transactions supporting the required reports and schedules are to be accounted for on the accrual basis. The Report on Operations can be submitted on a cash basis under certain circumstances (see I TFM 2-4180.20). Reports are to be prepared from a budgeting and accounting system which contains an integrated data base that is part of the agency's integrated financial management system as required by the Office of Management and Budget (OMB) Circular No. A-127.

The required reports should include all assets, liabilities, and equities relating to all programs and activities under control of the reporting entity, except for the assets of disbursing officers, which are reported by the Treasury. Reports should include transfer appropriation accounts from other agencies, foreign currencies, operations conducted in the territories or overseas, and any monetary assets or property received, spent, or otherwise accounted for by the reporting entity. Amounts are reported to the dollar.

Requirements provide that Federal agencies submit to Treasury four financial reports supplemented by three supporting schedules which are consolidated and published in the *Treasury Bulletin*. These reports are: Report on Financial Position (TFS 220), Report on Operations (TFS 221), Report on Cash Flow (TFS 222), and Report on Reconciliation (TFS 223). The Report on Cash Flow and Report on Reconciliation were not required for FY 1986. The three supporting schedules are: Direct and Guaranteed Loans Reported by Agency and Program Due from the Public (Schedule 220.8), Report on Accounts and Loans Receivable Due from the Public (Schedule 220.9), and Additional Financial Information (Schedule 220.1). The information from Schedule 220.1 is used in the preparation of reports which are published elsewhere in the *Treasury Bulletin*. The schedule on Direct and Guaranteed Loans is submitted to Treasury quarterly, and annually for publication in the *Treasury Bulletin*. The Report on Accounts and Loans Receivable Due from the Public is submitted quarterly on a selected basis, and by all entities annually. Information captured in the reports and schedules is shown in the following tables:

Table FA-1. – Report on Financial Position

The Report on Financial Position is a compilation of all assets, liabilities, and equity of the U.S. Government. It is required from all reporting entities within agencies and a consolidated report is required from each agency. The TFS 220 should be prepared on the accrual basis and submitted to Treasury annually. The report discloses the financial position of the Federal Government as of September 30, the close of the fiscal year.

Table FA-2. – Direct and Guaranteed Loans Due from the Public

This report reflects the direct loans and guaranteed loans to the public through the Federal Credit Program to support credit activities. Actual control of credit program levels remains with authorizing legislation and appropriations acts. The schedule of Direct and Guaranteed Loans also provides the Federal Reserve Board information to monitor the flow of funds. Schedule 220.8 is a supporting schedule required for the TFS 220.

Table FA-3. – Report on Accounts and Loans Receivable Due from the Public

The Report on Accounts and Loans Receivable Due from the Public (TFS 220.9) provides information on the status of public receivables and is required by the Office of Management and Budget. This report provides accounting and management information necessary to assist in institutionalizing sound credit management. This requirement is part of OMB Circular No. A-127. Only selected reporting entities are required to submit TFS 220.9's quarterly due to materiality, but all are required to submit TFS 220.9's annually. The TFS 220.9 is comprised of two parts: Status of receivables, and administrative actions. Only part one, reflecting departmental or agency totals, is published annually in the *Treasury Bulletin*.

Table FA-4. – Report on Operations

The Report on Operations is a compilation of the financial results of all Federal programs and activities. Preparation of a Report on Operations is required for all entities and should include the financial results of activities, including revenues and other financing sources, and operating expenses. The TFS 221 should be prepared using the accrual or cash basis and submitted to Treasury annually. Generally, it is prescribed that the reporting entity prepare its reports under the accrual basis unless the differences between the cash and accrual basis are insignificant or the capability to do so does not exist at this point.

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.

Table IFS-3 shows U.S. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-4 presents a measure of weighted-average changes in exchange rates between the U.S. dollar and the currencies of certain other countries.

1/ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SOR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SOR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

2/ Includes gold held by the Exchange Stabilization Fund.

3/ Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 U.S.C. 5117(b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

4/ Includes allocations of SOR's in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SOR's.

Allocations of SOR's on Jan. 1 of respective years are as follows: 1970, \$867 million; 1971, \$717 million; 1972, \$710 million; 1979, 874 million (in SOR terms); 1980, 874 million (in SOR terms); and 1981, 857 million (in SOR terms).

5/ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be agreed upon by the parties to the transactions.

6/ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota.

1/ This table presents calculations of weighted average percentage changes in the rates of exchange between the dollar and certain foreign currencies, in order to provide a measure of changes in the dollar's general foreign exchange value broader than a measure provided by any single exchange rate change. Calculations are provided for two sets of countries that account for a major share of U.S. foreign trade. U.S. bilateral trade patterns in 1972 are used as a convenient, readily available proxy for the assignment of relative weights to individual exchange rate changes, although such weights do not provide a full measure of individual currencies' relative importance in U.S. international transactions because they take no account of factors other than trade. The calculations do not purport to represent a guide to measuring the impact of exchange rate changes on U.S. international transactions.

Exchange rate data used in constructing the indices reported here differ somewhat from those used in earlier calculations to more accurately reflect end-of-period currency values.

The equations used are as follows:

Equation one is used to calculate a trade-weighted average of changes in the dollar cost of foreign currencies:

$$(E01) \quad E_m = \sum (\Delta S/fc_i * M_i/\Sigma M)$$

Where: E_m is the weighted average of percentage changes in the dollar cost of individual foreign currencies;

$\Delta S/fc_i$ is the percent change in the dollar cost of foreign currency i ; and

$M_i/\Sigma M$ is U.S. imports from country i , as a proportion of total U.S. imports from all countries in the set.

Equation two is used to calculate a trade-weighted average of changes in the foreign exchange cost of dollars:

$$(E02) \quad E_x = \sum \Delta fc_i / S * X_i / EX$$

Where: E_x is the weighted average of percentage changes in the foreign currency cost of dollars;

$\Delta fc_i / S$ is the percent change in the foreign currency i cost of dollars; and

X_i / EX is U.S. exports to country i , as a proportion of total U.S. exports to all countries in the set.

Equation three combines the above export-weighted and import-weighted averages to provide an overall measure of exchange rate change:

$$(E03) \quad E = [(E_m * m/m+x) * (-1)] + [E_x * x/m+x]$$

Where: $m/m+x$ is U.S. imports as a proportion of its total trade with all countries in the set; and

$x/m+x$ is U.S. exports as a proportion of its total trade with all countries in the set.

2/ Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and United Kingdom.

CAPITAL MOVEMENTS

INTRODUCTION

Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by commercial banks, other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the Treasury Bulletin.

The reporting forms and instructions 1/ used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. The most recent, general revision of the report forms became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31, 1978. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

Basic Definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements, which is included in the classification "Other Europe."

Reporting Coverage

Reports are required from banks, other depository institutions, bank holding companies, International Banking Facilities (IBFs), securities brokers and dealers, and nonbanking enterprises in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks, other depository institutions, and some brokers and dealers file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies vis-a-vis foreigners. Effective January 31, 1984, the specified exemption level applicable to the monthly and quarterly banking reports was raised from \$10 million to \$15 million. There is no separate exemption level for the semiannual reports.

Banks, securities brokers and dealers, and in some instances nonbanking enterprises report monthly their transactions in securities with foreigners; the applicable exemption level is \$500,000 on the grand total of purchases and on the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks, other depository institutions, brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated foreigners exceed a specified exemption level on a two quarter-end average basis. Effective March 31, 1982, this exemption level was set at \$10 million, up from \$2 million. Nonbanking enterprises also report for each monthend their U.S. dollar-denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, other depository institutions, brokers, and dealers in the United States. Beginning April 1978, the following major changes were made in the reporting

coverage: Amounts due to banks' own foreign offices are reported separately; a previous distinction between short-term and long-term liabilities was eliminated; a separation was provided of the liabilities of the respondents themselves from their custody liabilities to foreigners; and foreign currency liabilities are only available quarterly. Also, beginning April 1978, the data on liabilities were made more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners. Effective as of January 31, 1985, savings and loan associations and other thrift institutions began to file the TIC banking forms. Previously they had reported on TIC forms for nonbanking enterprises.

Section II presents the claims on foreigners reported by banks in the United States. Beginning with data reported as of the end of April 1978, a distinction was made between banks' claims held for their own account and claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, the distinction in reporting of long-term and short-term components of banks' claims was discontinued. Maturity data began to be collected quarterly on a time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency claims are also collected on a quarterly basis only. Beginning March 1981, this claims coverage was extended to certain items in the hands of brokers and dealers in the United States. See notes to section I above concerning the reporting of thrift institutions.

Another important change in the claims reporting, beginning with new quarterly data as of June 30, 1978, was the adoption of a broadened concept of "foreign public borrower," which replaced the previous category of "foreign official institution" to produce more meaningful information on lending to the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departments; State, provincial, and local governments of foreign countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section III includes supplementary statistics on U.S. banks' liabilities to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the TIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. banks' dollar liabilities to, and banks' own dollar claims on, countries not regularly reported separately are available semiannually in the May and November issues of the Treasury Bulletin.

Section IV shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns, financial institutions other than banks, other depository institutions, brokers, and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data also exclude claims held through banks in the United States. Beginning with data reported as of December 31, 1978, financial liabilities and claims of reporting enterprises are distinct from their commercial liabilities and claims; and items are collected on a time remaining to maturity basis instead of the original maturity basis used previously.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, table IFS-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts. Also, see notes for section I above concerning the reporting of thrift institutions.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

^{1/} Copies of the reporting forms and instructions may be obtained from the Office of Data Management, Office of the Assistant Secretary for International Affairs, Department of the Treasury, Washington, D.C. 20220, or from district Federal Reserve banks.

1/ Includes Bank for International Settlements.

2/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank.

3/ Data as of preceding quarter for non-quarter-end months.

4/ Establishment of International Banking Facilities (IBF's) permitted beginning December 1981.

Note.--Total liabilities include liabilities previously classified as either "short term" or "long term" on the Treasury reports filed by banks. The maturity distinction was discontinued with new reports filed as of Apr. 30, 1978, and historical series adjusted accordingly. See introductory text to Capital Movements tables for discussion of changes in reporting.

FOREIGN CURRENCY POSITIONS

INTRODUCTION

Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U.S. banks and nonbanking firms. Reports cover five major foreign exchange market currencies and U.S. dollars held abroad. Reporting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of March 16, 1983, for the weekly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of March 1983.

Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions," and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majority-owned subsidiaries of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or indirectly, own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

Reporting Threshold

The exemption level applicable to banks and banking institutions was \$10 million equivalent through January 1982, when it was raised to \$100 million. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 million equivalent on all nonbank forms from March 1975 through November 1976. It was raised to \$2 million equivalent on the monthly reports of positions held in the United States from November 1976 through September 1978. The exemption level was raised to \$3 million on foreign subsidiary positions on June 30, 1977, and for positions held in the United States on September 30, 1978. The exemption level for nonbanking firms was raised to \$100 million on positions in the United States in January 1982 and on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries, U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

Description of Statistics

Data collected on the Treasury foreign currency forms are published in the Treasury Bulletin in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

Note.--Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the Treasury Bulletin. Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 Treasury Bulletin.

Special Reports

**STATEMENT OF LIABILITIES
AND OTHER FINANCIAL COMMITMENTS OF THE
UNITED STATES GOVERNMENT AS OF SEPT. 30, 1986**

INTRODUCTION

The Statement of Liabilities and Other Financial Commitments of the United States Government is compiled in accordance with 31 U.S.C. 331 (b). The report discloses the liabilities, commitments, and contingent liabilities of the Federal Government as of September 30, 1986.

Liabilities are shown in section I, schedule 1. In prior reports, the individual amounts supporting the totals for Federal liabilities were contained in separate schedules in the report. Because the data are contained in other published Treasury reports, they have been summarized for presentation here with references provided to where the appropriate detail may be found.

The categories listed represent existing liabilities to pay (1) money borrowed (public debt and agency debt including all public and agency issues outstanding), (2) goods and services actually received, and (3) adjudicated claims. The liability for these amounts is certain and the dollar values are relatively precise. Sources for the information supporting these totals follow:

The public debt--The fiscal year information on the public debt outstanding may be found in the Final Monthly Treasury Statement of Receipts and Outlays of the United States Government (MTS), table 6, schedule 0, Investments of Federal Government Accounts in Federal Securities. The Monthly Statement of the Public Debt of the United States, September 30, 1986, contains a comprehensive picture of the total public debt outstanding.

Agency securities outstanding--MTS, table 6, schedule B, Securities Issued by Federal Agencies Under Special Financing Authorities, contains detailed information on agency debt.

Deposit fund accounts--The liabilities for deposit funds may be found in the United States Government Annual Report Appendix and in the Treasury Bulletin, winter issue, table FA-1, Report on Financial Position. Both sources disclose deposit fund liabilities at the fund account level.

Checks and other instruments outstanding; accrued interest on the public debt; and deferred interest (premium) on public debt subscriptions--Detailed information on each of these categories of liabilities may be found in the Annual Report Appendix, Part One, Summary General Ledger Account Balances.

Accounts payable and accruals of Government agencies--Both the Annual Report Appendix and table FA-1, Report on Financial Position, disclose the liabilities for accounts payable and related transactions at the fund account level.

Section II, schedule 1, of this report contains totals for commitments of the Government which represent the value of goods and services ordered and obligated but which have not yet been received and other legal commitments against appropriations, all pursuant to section 1311 of the Supplemental Appropriation Act of 1955 (31 U.S.C. 200). These commitments will become obligations when the goods and services ordered are delivered or when other performance stipulations have been met and the amounts to be paid can be determined. Schedule 1 shows the total amount for undelivered orders; the fund account detail supporting this total may be found in the Annual Report Appendix and in table FA-1, Report on Financial Position.

Long-term contracts represent commitments of a general nature that will not be due for a comparatively long time (usually more than one fiscal year). These commitments differ from undelivered orders insofar as (1) they are not legal commitments against obligations, (2) a longer period of time will elapse before they become obligations, and (3) they are subject to cancellation or modification and are not a reliable measure of future liabilities. The total in schedule 1 is supported by schedule 2 in this report because this information is not available from other published Treasury sources. The financial data contained in this category and those in section III, Contingencies, are obtained from agency financial statements submitted in response to the requirements in I TFM 2-4100, Federal Agencies' Financial Reports.

Contingencies represent conditional commitments which may become actual liabilities due to future events beyond the control of the Government. These commitments share a basic characteristic of uncertainty as to a possible loss, and they will be ultimately resolved when one or more future events occur or fail to occur. The amounts reported are agency projections and are stated in terms of maximum theoretical risk exposure (the upper limit of the Government's financial commitment) without regard to probability of occurrence and without deduction for existing and contingent assets which would be available to offset potential losses.

The data in this report have not been compared with any other reports submitted to the Treasury, nor have they been traced to source documents within the agency. In the past, instances have occurred where the underlying data and systems have had problems which affected the reliability of agency financial reports. In addition, revisions to certain financial reporting requirements contained in I TFM 2-4100, which were implemented for fiscal 1986 reports, have caused systemic delays within agencies creating gaps in information due to the Treasury on November 15, 1986. Missing data remain outstanding despite aggressive followup action initiated by the Treasury. A footnote has been placed in each schedule where a financial statement was expected but not received by the Treasury.

1/ Public Law 95-595 requires annual reporting 6 months after the close of the plan year which provides pension benefits for officers and employees of the Federal Government and its agencies and instrumentalities. Figures in the report are based on the most recent Public Law 95-595 submission.

2/ The Uniformed Services Retirement System covers the military, the U.S. Coast Guard, and the commissioned corps of the Public Health Service and the National Oceanic and Atmospheric Administration. There are no employee contributions or trust funds from which benefits are paid. The Federal Government finances all benefit payments through annual appropriations authorized by Congress. These plans submit Public Law 95-595 reports.

3/ The Federal supplementary medical insurance trust fund has no valuation period as such. Under authority of section 1839 of the Social Security Act, the Secretary of Health and Human Services annually determines amounts to be paid by each of supplementary medical insurance enrollees and the Department of the Treasury that are, in total, adequate to fund both benefits incurred through the end of the annual promulgation period and related administrative expenses. Since amounts determined annually make adjustments for actuarial gains and losses, past submissions have used special definitions of assets and liabilities that relate solely to items incurred as of the valuation date.

4/ The present values shown have been computed as of the beginning of the valuation period. The liabilities consist of the sum of all estimated outgo during the valuation period, and the assets consist of the sum of all estimated income during the period and estimate of the trust fund balance at the beginning of the period. The estimates have been prepared on the basis of the financing method regarded by both the Congress and the

trustees of the trust funds as the appropriate one to use for social insurance programs; namely, that future young workers will be covered by the program as they enter the labor force. If, instead, the estimates were based on the assumption that no workers would be covered in the future other than those who were age 15 and over as of Sept. 30, 1986 (that is, contrary to the basis which the Congress has adopted for financing these two programs), there would be a deficiency of \$5,393,500 million for the combined OASI and DI programs.

5/ There are two retirement plans under the Federal Reserve System. One plan covers the employees of the Board of Governors. These are Federal employees in the excepted civil service. The second plan established by the Federal Reserve Board covers employees of the 12 Federal Reserve banks. These are not Government employees. A consolidated Public Law 95-595 report is submitted.

6/ Nonappropriated fund instrumentalities employ civilian workers and are authorized to operate programs, including retirement programs, to enhance their morale and welfare. These employees are not Federal employees under the civil service, but are governed by personnel policies established by the Departments of Defense and Transportation. The liability to the Federal Government for these retirement plans is extremely remote since employer contributions are to be paid from the operating revenues of the instrumentalities.

7/ The Farm Credit Administration operates 12 farm credit districts. In 1959, Congress prohibited new farm credit employees from participating in the civil service and authorized establishment of separate retirement plans for new employees.

TRUST FUND REPORTS

Airport and Airway Trust Fund

The airport and airway trust fund was originally established on the books of the Treasury in fiscal 1971, in accordance with provisions of the Airport and Airway Revenue Act of 1970 (49 U.S.C. 1742(a)). The trust fund has been reestablished in the Internal Revenue Code (26 U.S.C. 9502 and 9602(b)) as a result of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248, dated Sept. 3, 1982), effective as of Sept. 1, 1982. Amounts equivalent to the taxes received in the Treasury on aviation fuel, transportation by air, gasoline used in aircraft, and tires and tubes used on aircraft are designated by the act to be appropriated and transferred from the general fund of the Treasury to the trust fund. These transfers are made at least quarterly on the basis of estimates made by the Secretary of the Treasury, subject to adjustments in later transfers to the amount of actual tax receipts. When the provisions of 26 U.S.C. 9602(b) have been met, amounts available in the fund in excess of outlay requirements shall be invested in public debt securities and interest thereon credited to the fund. There are also credited to the fund additional sums from the

general fund, as authorized and made available by law, to meet outlay requirements in excess of available revenues, if necessary.

Amounts required for outlays to carry out the airport and airway program are made available to the Federal Aviation Administration, Department of Transportation. Other charges to the trust fund are made by the Secretary of the Treasury for transfers of certain refunds of taxes and certain section 39 credits of the Internal Revenue Code of 1954.

Annual reports to Congress are required by 26 U.S.C. 9602(a) to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Transportation. These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and the expected condition and operations of the fund during the next 5 fiscal years.

Black Lung Disability Trust Fund

The black lung disability trust fund was established on the books of the treasury in fiscal 1978 pursuant to the Black Lung Benefits Revenue Act of 77, Public Law 97-119, December 29, 1981, entitled "Trust Fund Code of 1981" (6 U.S.C. 9501), provides for the continuation of the fund as previously established under section 3 of the act of 1977. The Consolidated Omnibus Budget conciliation Act of 1985 (Public Law 99-272), enacted April 7, 1986, provided for an increase in the coal tax effective April 1, 1986, through December 31, 1995, and a 5-year forgiveness of interest retroactive to October 1, 1985.

The Act designates the following receipts to be appropriated and transferred from the general fund of the Treasury to the trust fund: excise taxes on mineral tonnage; taxable expenditures of private black lung benefit trusts; reimbursements by responsible mine operators; and related fines, penalties, and interest charges. Estimates made by the Secretary of the Treasury determine monthly transfers of amounts for excise taxes to the trust fund, subject to adjustments in later transfers to actual tax receipts.

Amounts available in the fund in excess of current expenditure requirements are invested by the Secretary of the Treasury in interest-bearing public debt

securities, and any interest earned is credited to the fund. Also credited to the fund, if necessary, are repayable advances from the general fund to meet outlay requirements in excess of available revenues.

To carry out the black lung disability program, amounts are made available to the Department of Labor. Other charges to the fund are to pay administrative expenses incurred by the Department of Health and Human Services and the Department of the Treasury, and also to repay advances from the general fund and interest on advances.

The Act requires the Secretary of the Treasury to submit an annual report to Congress after consultation with the Secretary of Labor and the Secretary of Health and Human Services (26 U.S.C. 9602 (a)). The report must present the financial condition and results of operations of the fund during the past fiscal year and the expected condition and operations of the fund during the next 5 fiscal years.

Hazardous Substance Response Trust Fund

The hazardous substance response trust fund was established on the books of the Treasury in fiscal 1981, in accordance with provisions of the Hazardous Substance Response Revenue Act of 1980 (42 U.S.C. 9631(a)). Excise taxes are collected on petroleum and certain chemicals by the Internal Revenue Service and appropriated from the general fund to the trust fund. All other receipts are deposited directly to the trust fund.

Amounts available in the fund in excess of current expenditure requirements are invested by the Secretary of the Treasury in interest-bearing public debt securities, and any interest earned is credited to the fund. Also credited to the fund, if necessary, are repayable advances from the general fund to meet outlay requirements in excess of available revenues.

To carry out the hazardous substance response program, amounts are made available to the Environmental Protection Agency. Other charges to the fund are to pay certain administrative expenses incurred and repay advances from the general fund and interest on advances.

An annual report to Congress by the Secretary of the Treasury is required under section 9633(b)(1). These reports must present the financial condition and results of operations of the fund for the past fiscal year and its expected condition and operations during the next 5 years.

1/ Interest is accounted for differently from the budget. The budget counts the unamortized discount received on investment as a receipt in the year invested. Treasury counts the discount as a receipt only when it is realized and available for appropriation.

Note.--Effective in fiscal 1987, this trust fund will be reestablished on the books of the Treasury as Hazardous Substance Superfund, in accordance with provisions of the Superfund Amendments and Reauthorization Act of 1986 (Public Law 99-499, dated October 17, 1986).

Highway Trust Fund

The highway trust fund was originally established on the books of the sury in accordance with provisions of the Highway Revenue Act of 1957, as ded (23 U.S.C. 12 note). It was reestablished on the books of the Treasury the Surface Transportation Assistance Act of 1982 and recently modified by the cit Reduction Act of 1984 (Public Law 98-369, approved July 18, 1984). ents equivalent to taxes on gasoline, diesel fuel, special motor fuels, tires, is, tread rubber, commercial motor vehicles, truck use, lubricating oil, and ts and accessories for trucks, buses, etc., are designated by the act to be opriated and transferred from the general fund of the Treasury to the trust l. These transfers are made at least monthly on the basis of estimates by the etary of the Treasury, subject to adjustments in later transfers to the ent of actual tax receipts. Amounts available in the fund in excess of outlay ifirements are invested in public debt securities and interest thereon is ited to the fund. There are also credited to the fund repayable advances n the general fund, as authorized and made available by law, to meet outlay iarements in excess of available revenues during a portion of a fiscal year, necessary.

The termination date of the fund was extended to Sept. 30, 1988, as a result the Surface Transportation Assistance Act of 1982 (Public Law 97-424, approved . 6, 1983). The act also established a mass transit account within the trust

fund to be funded by one-ninth of the excise tax collections under sections 4041 and 4081 of the Internal Revenue Code (26 U.S.C.) imposed after Mar. 31, 1983. The funds from this account shall be used for expenditures in accordance with section 21(a)(2) of the Urban Mass Transportation Act of 1964. The remaining excise taxes collected shall be included in a highway account within the trust fund, and expenditures for this account shall be made in accordance with the provisions of Public Law 97-424.

Amounts required for outlays to carry out the Federal-aid highway program are made available to the Federal Highway Administration, Department of Transportation. Other charges to the trust fund are made by the Secretary of the Treasury for transfers of certain taxes to the land and water conservation fund and to the aquatic resources trust fund, refunds of certain taxes, repayments of advances from the general fund, and the interest on advances.

Annual reports to Congress are required by 26 U.S.C. 9602 (a), Internal Revenue Code as amended, to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Transportation. These reports cover the financial condition and the results of operations of the fund for the past fiscal year and its expected condition and operations during the next 5 fiscal years.

1/ Refunds of taxes and transfer to other funds have been deducted.

2/ Receipts of interest on investments netted by payment of interest on general fund advances.

3/ The Highway Revenue Act of 1982 requires that, before an apportionment can be made, projected unfunded highway authorizations at the close of the fiscal year must be less than the projected net revenues for the following 24-month period, and defines "unfunded highway authorizations" as the excess, if any, of (a) the total potential unpaid commitments as a result of apportionment to the States of the amounts authorized to be appropriated from the highway trust fund, over (b) the amount available in the highway trust fund at such time to defray such commitments.

4/ As no estimates have yet been made for revenue to be earned in FY 1993 (the President's budget figures extend only through FY 1992), a 24-month revenue estimate is not available for FY 1991. As a result, a determination cannot be made at this time as to whether or not all funds assumed to be authorized for 1991 could be apportioned.

Note.—Data is in conformance with the President's FY 1988 budget. Actual highway trust fund balances at the beginning of FY 1987 are in conformance with the Government Annual Report Appendix.

Inland Waterways Trust Fund

The inland waterways trust fund was established on the books of the Treasury fiscal 1981, in accordance with provisions of the Inland Waterways Revenue Act of 1980 (33 U.S.C. 1801(a)). Amounts determined by the Secretary of the Treasury equivalent to the amount of taxes received in the Treasury under section of the Internal Revenue Code of 1954 (relating to tax on fuel used in commercial transportation in inland waterways) shall be appropriated to the trust. These amounts shall be transferred at least quarterly from the general on the basis of estimates made by the Secretary, subject to adjustments in transfers to the amounts of actual tax receipts. It shall be the duty of Secretary of the Treasury to invest in interest-bearing obligations of the United States that portion of the trust fund in his judgment not required to meet withdrawals. The interest on, and the proceeds from the sale or

redemption of, any obligation held in the trust fund shall be credited to and form a part of the trust fund.

The act provides that amounts in the trust fund shall be available, by appropriations acts, for making construction and rehabilitation expenditures for navigation on the inland and intracoastal waterways of the United States described in 33 U.S.C. 1804. Expenditures must be otherwise authorized by law.

Annual reports to Congress are required by 33 U.S.C. 1801(c)(1) of the Secretary of the Treasury. These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and its expected condition and operations during the next 5 fiscal years.

Nuclear Waste Fund

The nuclear waste fund was established on the books of the Treasury in fiscal 1983, in accordance with provisions of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10222 (c)). Receipts represent fees collected from public utilities based on electricity generated by nuclear power reactors and spent nuclear fuel. Expenditures from the fund are for purposes of radioactive waste disposal activities.

Amounts available in the fund in excess of current needs may be invested by the Secretary of the Treasury in obligations of the United States (1) having maturities in tandem with the needs of the waste fund, and (2) bearing

interest at rates determined appropriate, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

An annual report to Congress by the Secretary of the Treasury, after consultation with the Secretary of Energy, is required by 42 U.S.C. 10222 (e)(1). This report must present the financial condition and the results of operations of the waste fund during the preceding fiscal year.

Reforestation Trust Fund

The reforestation trust fund was established on the books of the Treasury in fiscal year 1981 to continue through Sept. 30, 1985. In accordance with provisions of Title III--Reforestation, of the Recreational Boating Safety and Facilities Improvement Act of 1980 (16 U.S.C. 1606a (a)). The act provides that the Secretary of the Treasury shall transfer to the trust fund tariffs, limited not more than \$30 million for any fiscal year, received in the Treasury from L. I., 1979, through Sept. 30, 1985, on (1) rough and primary wood products, and wood waste; (2) lumber, flooring, and moldings; and (3) wood veneers, plywood, other wood-veneer assemblies, and building boards. Public Law 99-190 tended the receipts for the reforestation trust fund.

Amounts available in the trust fund in excess of current withdrawals are vested in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States. The interest, and the proceeds from the sale or redemption of, any obligations are credited to the trust fund.

For each of the first 5 fiscal years beginning after Sept. 30, 1980, there are authorized after that date to be appropriated to the Secretary of Agriculture,

out of any amounts in the trust fund, an amount equal to the sum of the amount by which the sum estimated by the Secretary of Agriculture for the fiscal year under section 3(d)(2) of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1601 (d)(2)) to be necessary for reforestation and other treatment of acreage, as set forth in the report transmitted by the Secretary to the Congress under that section for the fiscal year, exceeds the sum of the amounts appropriated for the fiscal year under the authorization contained in section 3(d)(3) of such act and under any other provision of law to carry out the same purpose; and such sums as are determined by the Secretary of Agriculture to be properly allocable to administrative costs of the Federal Government incurred for the fiscal year in connection with the reforestation program carried out under that act.

Annual reports are required by 16 U.S.C. 1606a (c)(1) to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Agriculture, on the financial condition and the results of the operations of the trust fund during the past fiscal year and on its expected condition and operations during the next fiscal year.
