## Treasury Financing Operations

### February Certificate Maturity

On January 13, 1950, the Secretary of the Treasury announced that a new issue of 1-1/4 percent Treasury notes to mature in 20 months would be offered in exchange for the one-year 1-1/4 percent certificates of indebtedness maturing February 1, 1950. The maturing certificates, Series B-1950, were outstanding in the amount of \$1,993 million.

Subscription books for the new Treasury notes, Series A-1951, were opened on January 20 and were closed at the close of business on January 24. Exchanges were made par for par and cash subscriptions were not received. The notes are dated February 1, 1950, and bear interest from that date at the rate of 1-1/4 percent per annum, payable on a semiannual basis on October 1, 1950, and April 1 and October 1, 1951. They will mature October 1, 1951, and will not be subject to call for redemption prior to maturity. The notes were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

---

Note: Details of Treasury market financing operations are shown in the tables on "Offerings" and "Disposition", respectively, of marketable issues of bonds, notes,

Reports to the Treasury on the ownership of Government securities indicate that on November 30, 1949, about 50 percent of the maturing certificates were owned by reporting commercial banks and Federal Reserve Banks. The ownership figures for November 30 are the latest available for the holdings of commercial banks.

Subscriptions to the new Treasury notes amounted to \$1,918 million, leaving \$75 million to be paid in cash.

### Treasury Bills Refunded

Treasury bills maturing in January were refunded in the full amount of \$3.6 billion. Each maturity and each offering was for \$900 million. The average rates of discount on the month's four new issues were, in weekly sequence, beginning with the issue of January 5, 1.081 percent, 1.076 percent, 1.101 percent, and 1.103 percent. The last two of these are preliminary.

- 1/ For further detail, see tables under "Internal Revenue Collections".
- 2/ Receipts of Victory taxes withheld pursuant to the Revenue Act of 1942 are classified as "Other" income and profits taxes.
- 3/ Consists of receipts for old-age insurance, unemployment insurance, railroad retirement, and health insurance in the 1951 estimate; for details see Tables 7 and 8 in this section. Excludes railroad unemployment insurance contributions, which are included in "Other receipts".
- 4/ Includes proceeds from sale of surplus property and from Government-owned securities; also deposits resulting from renegotiation of war contracts (see "Treasury Bulletin" for February 1948, page 5).
- 5/ Both budget receipts and budget expenditures exclude payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings (see "Treasury Bulletin" for February 1949, page A-2).
- 6/ Represents appropriations equal to "Social security -- employment taxes" collected and deposited as provided under Sec. 201 (a) of the Social Security Act Amendments of 1939. See also Table 7 in this section.

- 9/ Figures for fiscal year 1948 include \$3,000 million transfer to Foreign Economic Cooperation Trust Fund; figures for fiscal year 1949 exclude expenditures from this fund.
- 10/ Beginning November 1, 1949, interest on the public debt is reported as an expenditure when such interest becomes due and payable, as distinguished from the previous practice of showing it as an expenditure at the time interest was paid by the Treasurer of the United States. In order to take care of the transition in the basis of reporting, the expenditures for interest in the fiscal year 1950 represent not only the interest which becomes due and payable during that year but also the interest for prior years which had not been presented as of June 30, 1949, for payment by the Treasurer of the United States, amounting to \$225 million.
- 11/ Includes public works undertaken by the Veterans' Administration.
- 12/ In addition to the exclusion of certain payments to the Treasury as indicated in footnote 5, total expenditures shown here exclude refunds of receipts, which were formerly shown as a classification of expenditures but which are now shown as a deduction from receipts (see Table 1 in this section). Interest on refunds, formerly included with refunds, is still carried as an expenditure but is shown under "Other" expenditures. Budget expenditures also exclude amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law, and include transfers to trust accounts and net expenditures of wholly owned Government corporations, etc., except payments to the Treasury mentioned above.
- 13/ Established in accordance with the Economic Cooperation Act of 1948. Negative figures indicate receipts.
- 14/ See footnote 15.
- 15/ Department of the Army expenditures, including expenditures on behalf of the Department of the Air Force which are made out of appropriations to the Department of the Army, but excluding expenditures for the following: payments under the Armed Forces Leave Act, UNRRA, and surplus property disposal, shown separately in Table 3; international finance and aid, shown in Table 4; river and harbor work and flood control, included in Table 5 under "Public works"; and Panama Canal. War expenditures of the Panama Canal, all prior to July 1, 1947, are included in Table 3 under "Other"; other expenditures of the Panama Canal are included in Table 5 under "Miscellaneous".

Source: Actual figures are based on Daily Treasury Statement; estimates are based on the 1951 Budget document, including effect of proposed legislation as outlined in Budget detail.

1/ Expenditures from the Foreign Economic Cooperation Trust Fund (all of which occurred in the fiscal year 1949) are treated in this series of tables as cash trust account expenditures rather than as cash budget expenditures.

2/ The U. S. subscription to the capital of the International Monetary Fund was paid in part from the Exchange Stabilization Fund (see "Treasury Bulletin" for September 1947, page 17).

3/ Consists of seigniorage on silver and increment resulting from reduction in

weight of the gold dollar. This item is part of the cash budget receipts of the Treasury shown in these tables, but is excluded from the 1951 Budget document figures for "Receipts from the public".

4/ In addition to this decrease in the General Fund balance, the Exchange Stabilization Fund was drawn down by \$1,800 million for subscription to the capital of the International Monetary Fund (see footnote 2).

2/ Includes transfer of \$3,000 million in June 1948 from General Fund to Foreign Economic Cooperation Trust Fund, expenditures from which are included in Table 4 as cash expenditures of trust accounts in fiscal 1949.

3/ See Table 5, footnote 4, in this section.

4/ Interest payments to wholly owned Government corporations are not deducted because they are treated as negative expenditures when received

by corporations; hence payments and receipts offset each other.

1/ Original call and maturity date are used.

2/ Prior to the refunding operation of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege of exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

3/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called securities would be presented for cash redemption.

## UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31, and October 1945, pages A-4 and A-5. Savings bonds operations in dollar volume, as they are reflected in the total public debt, are summarized by months and years in Tables 1 through 3, which appear each month. As of the end of each fiscal and each calendar year, data by denominations are presented in Table 4, and dollar sales by States in Tables 5 and 6, giving monthly figures for the intervening period. Beginning with figures as of December 1949, data by denominations include

both sales and redemptions in thousands of pieces, instead of sales figures alone, previously given in dollar volume at issue price. As of the same date, redemptions by States, previously included as Table 7, were discontinued.

For dollar figures, sales are quoted at issue price, and redemptions and amounts outstanding at current redemption values, except that Series G outstanding are quoted at par. Matured bonds which have been redeemed are included in redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to

June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and small amounts else of unclassified F and G redemptions, beginning with June 1947.

3/ Includes both matured and unmatured bonds.

\* Less than \$500,000.

Statement. The greater part of that series consists of sales for which information is available as to the series but not the year of issue. Prior to June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

## TREASURY SAVINGS NOTES

Treasury savings notes (originally designated tax savings notes) have been issued in four series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; Series C from September 14, 1942, through August 31, 1948; and Series D on continuous sale beginning September 1, 1948. Details concerning terms and conditions for purchase and redemption, and investment yields of Series D notes will be found in the "Treasury Bulletin" for October 1948, page A-1. Similar information concerning Series C notes will be found in the "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning terms and conditions, investment yields, and tax payment or redemption values

of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

- 1/ Excludes trust departments.  
 2/ Includes trust companies and, beginning with figures for July 1949, also includes stock savings banks. Formerly these banks were shown as a separate classification, but they are no longer so reported.  
 3/ Includes those banks and insurance companies not reporting in the Treasury Survey.  
 4/ United States savings bonds, Series D, E, and F, are shown at current redemption values. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption values for use in this statement.  
 5/ C. C. C. demand obligations in the amount of \$11 million, all held by commercial banks, are shown only in the total amount outstanding; holdings by reporting banks are not available.  
 6/ Holdings by reporting agencies not available.  
 7/ Excludes guaranteed securities held by the Treasury.  
 8/ Issues which commercial banks may not acquire prior to specified dates (with minor exceptions); see "Debt Outstanding", Table 3, footnote 3.  
 9/ Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly" tax-exempt securities are those with the income exempt from both normal tax and surtax. "Partially" tax-exempt securities are those with the income exempt from the normal tax except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to normal tax and surtax.  
 10/ Includes F. H. A. debentures; see footnote 11.  
 11/ A small indeterminate amount of these debentures is partially tax-exempt.  
 12/ United States savings bonds sold prior to March 1, 1941, are partially tax-exempt; those sold on and after that date are taxable.  
 13/ The proprietary interest of the United States in these banks ended on June 26, 1947.  
 \* Less than \$500,000.

## MARKET QUOTATIONS, DECEMBER 30, 1949

Market quotations shown here are over-the-counter closing quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York. The securities listed in Section I include all public marketable securities issued or guaranteed by the United States Government except those not regularly quoted in the market. The issues excluded are postal savings bonds and Federal Housing Administration debentures. The latter are

the only public marketable interest-bearing guaranteed securities outstanding. Section II lists the public marketable securities issued by Federal agencies but not guaranteed by the United States Government. Daily quotations for the securities listed in Sections I and II are published monthly in the Treasury Department statement, "Prices and Yields of Public Marketable Securities Issued by the United States Government and by Federal Agencies".

1/ Not quoted on December 30, 1949.

2/ Issued after December 30, 1949; for amount, see "Debt Operations", Table 3.

3/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

4/ Quoted on a yield basis.

5/ Called on November 14, 1949, for redemption on March 15, 1950.

6/ Included in the average yield of long-term taxable Treasury bonds as shown under "Yields of Treasury and Corporate Bonds".

7/ Issues which commercial banks may not acquire prior to specified dates (with minor exceptions); see "Debt Operations", Table 1, for eligibility dates.

8/ All partially tax-exempt except Panama Canal bonds, which are wholly tax-exempt.

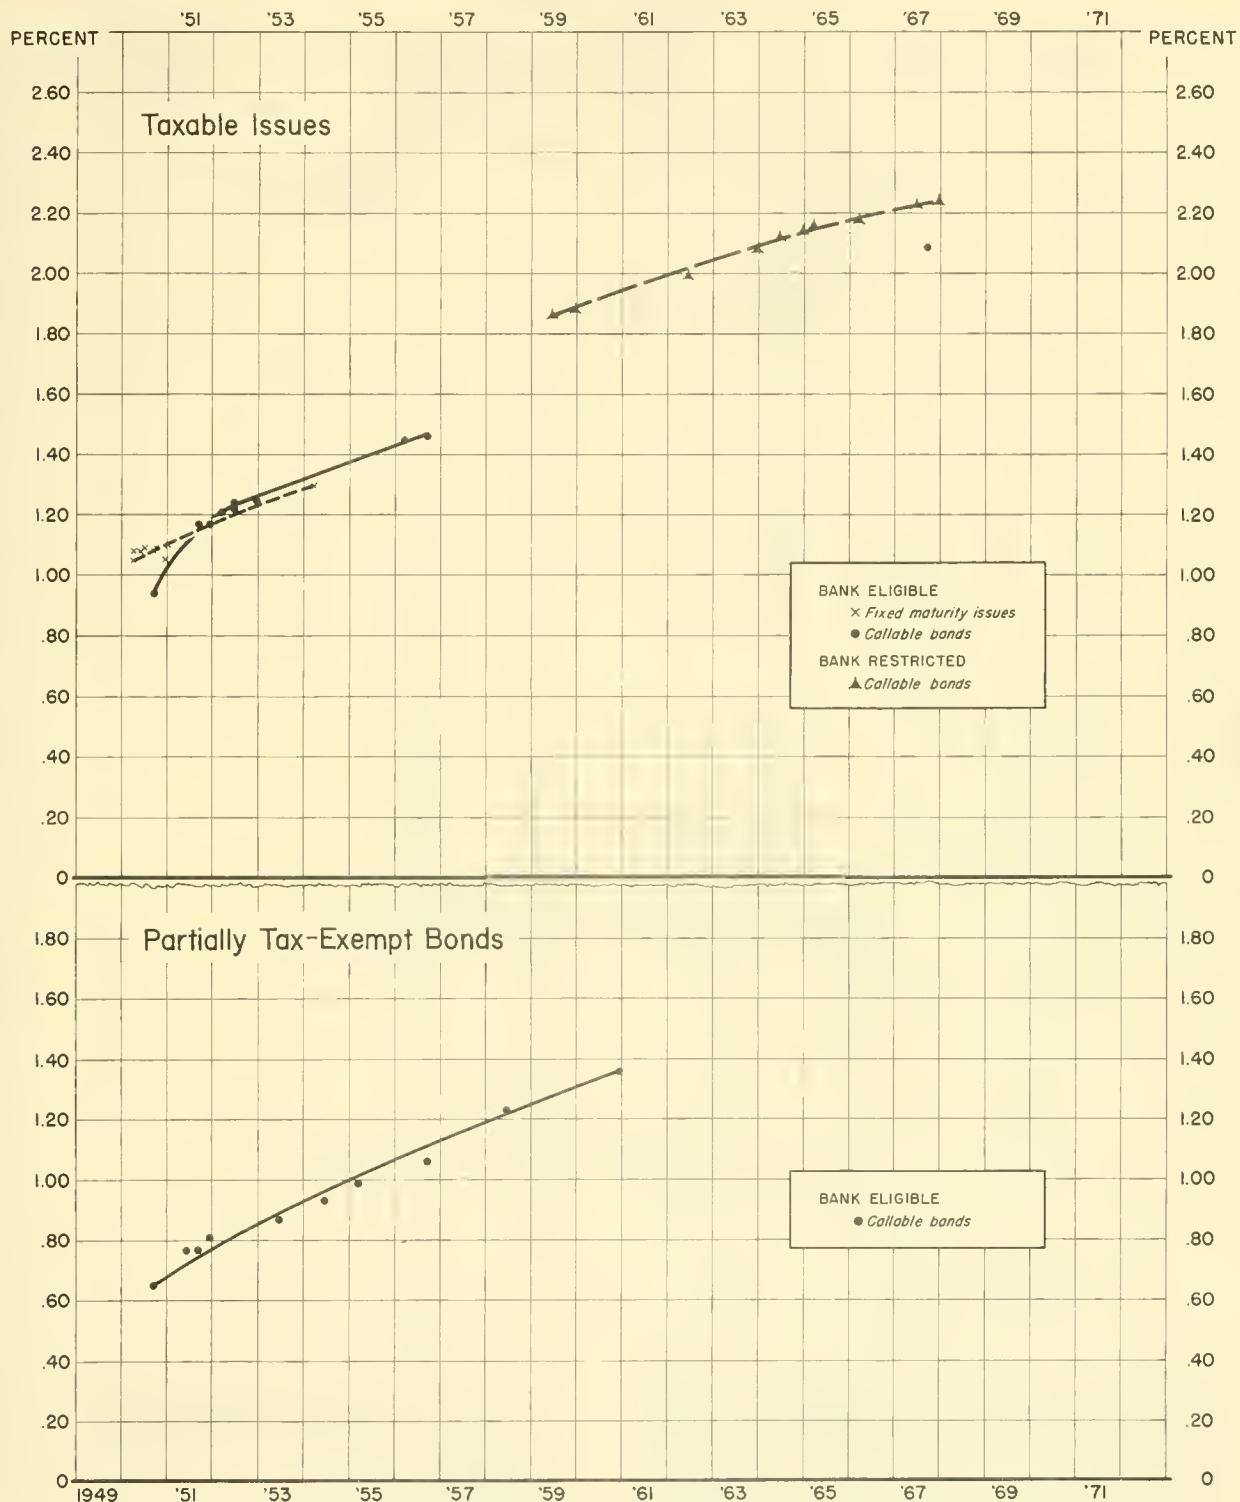

9/ These securities are not shown until date of issue.

10/ Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in the Federal land banks ceased on June 26, 1947.

11/ Yield to maturity. Market coövection treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

MARKET QUOTATIONS, DECEMBER 30, 1949

**YIELDS OF TREASURY SECURITIES DEC. 30, 1949**  
 Based on Mean of Closing Bid and Ask Quotations

*Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below.  
 The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been  
 made or which are due or callable in less than 3 months are excluded.*

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market as reported to the Treasury by the Federal Reserve Bank of New York, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not

sell, the price of the last preceding sale is used.

1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership", in this issue of the "Treasury Bulletin". The partially tax-exempt average was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

2/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

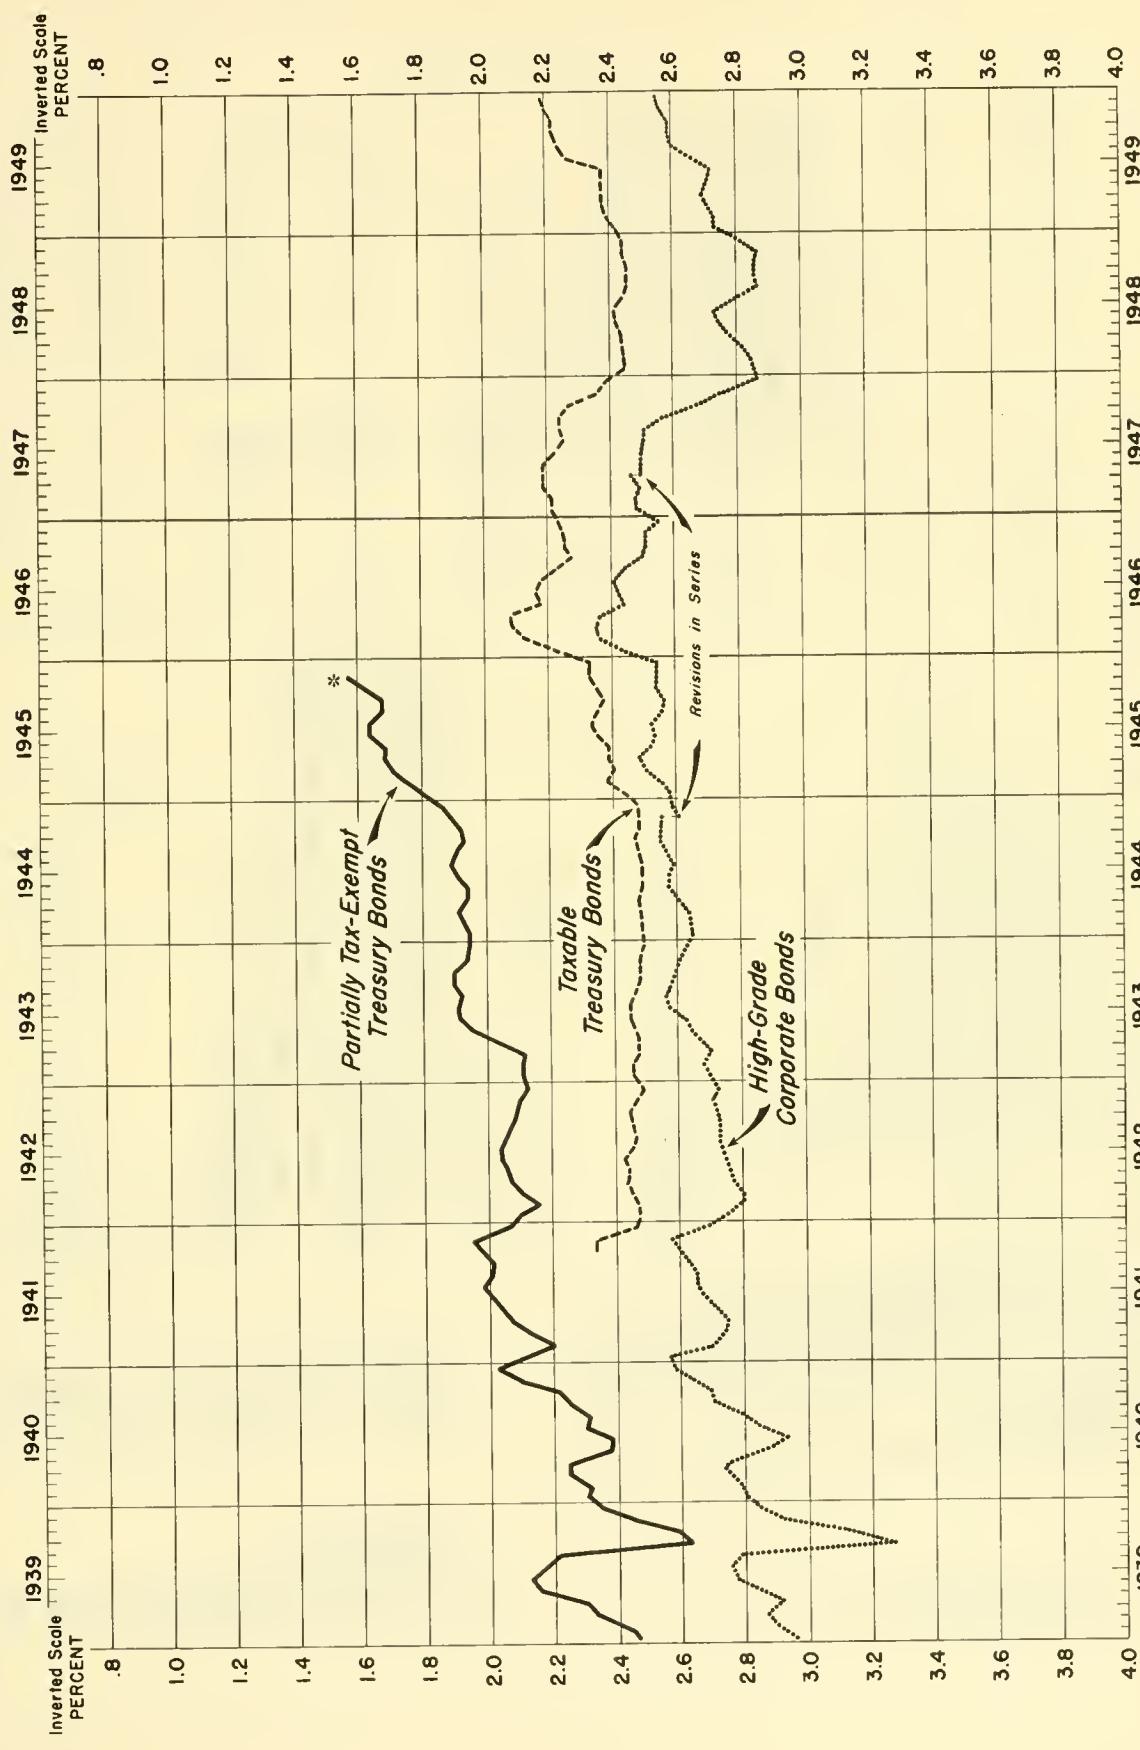

3/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

4/ Beginning December 21, 1949, the average includes nine bonds instead of ten, the Consolidated Gas, Electric Light and Power of Baltimore 2-3/4 percent bonds of 1981 having been called and exchanged for a new issue.

5/ Market closed.

Source: Daily Treasury Statement for total receipts from internal revenue; reports by collectors of internal revenue for collections by type of tax. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositaries. Reports of collections do not coincide because of a lag in deposits of collections. Detail by tax is reported on a collection basis because it is not available on the basis of deposits.

<sup>1/</sup> Excludes collections for credit to certain trust accounts for Territories

and insular possessions, etc.; includes corporation income tax on Alaska Railroad.

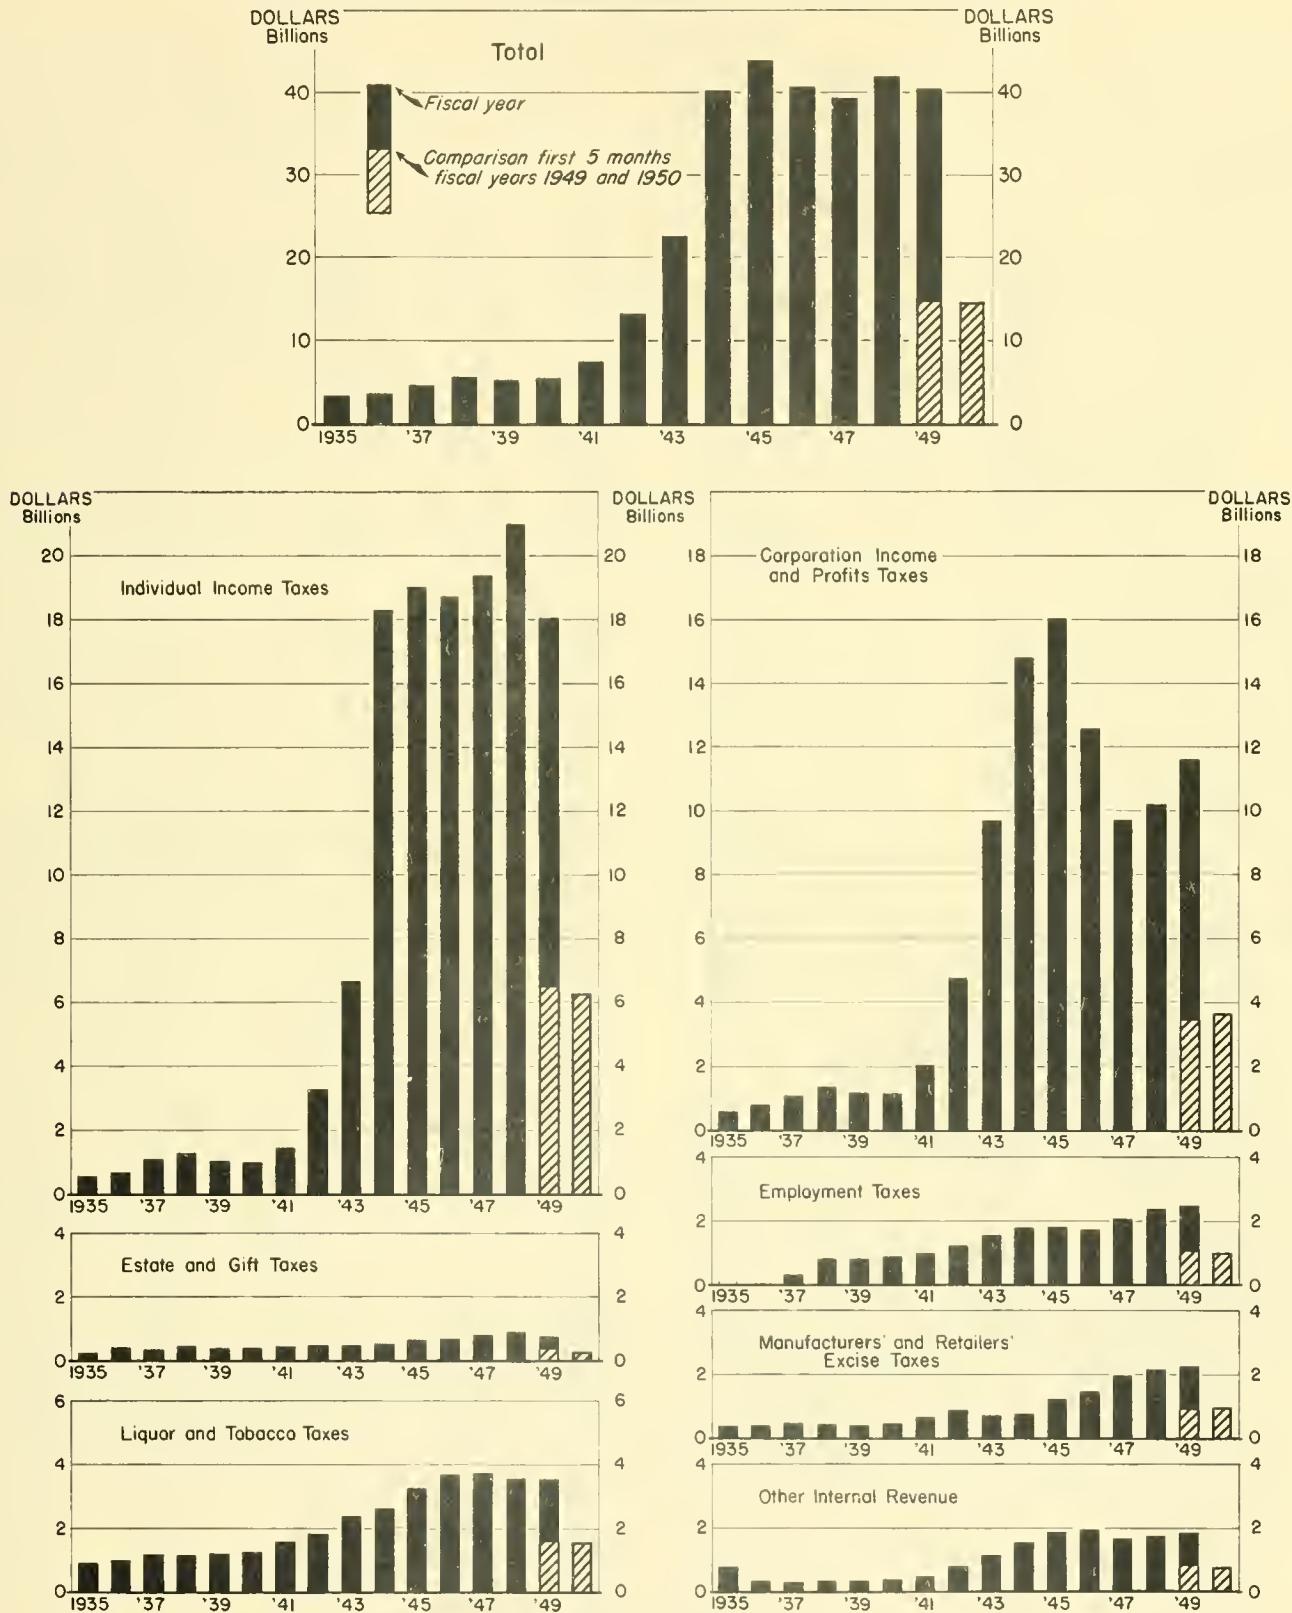

<sup>2/</sup> Beginning with the fiscal year 1947, collections from the unjust enrichment tax, previously carried in this column, are included with other repealed taxes under "Miscellaneous".

<sup>3/</sup> Repealed for years ending after June 30, 1945.

<sup>4/</sup> Repealed taxes not separately shown are included under "Miscellaneous", beginning with figures for the fiscal year 1948.

2/ The figures in this column are not cumulative; as the amount of bullion held changes, the potential seigniorage thereon changes.

## CAPITAL MOVEMENTS

Monthly data relating to capital movements between the United States and foreign countries as reported by banks, bankers, and brokers throughout the United States appear in the first four sections of "Capital Movements". Supplementary data are presented at less frequent intervals in Section V. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

Section I contains the historical summary of principal types of monthly data on capital movements, beginning with 1935 when the information was first compiled. Each type is then broken down into its chief components in the same chronological detail. Section II supplies a summary by countries, showing a geographic breakdown for recent months of the same principal series and most of the same components. Foreign debit and credit balances in brokerage accounts also are shown by countries.

Section III presents data by countries for certain components of total short-term claims and liabilities and total long-term security transactions. This information is given for the latest month for which final figures are available. Similar information for the latest month for which preliminary figures are available is presented in Section III A. "Short-term" as used in all tables on capital movements refers to original maturities of one-year or less, and "long-term" refers to all other maturities. Section IV contains data for recent months on outstanding contracts of banks for forward

purchases and sales of foreign exchange.

The supplementary information in Section V is presented in two tables, appearing in different issues of the "Treasury Bulletin". Table 1 gives data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue, covering quarterly periods from September 30, 1946, through December 31, 1948. An explanation of the figures appeared in the headnote on page 49 of that issue. Later quarterly data will be published at the end of each calendar year. Table 2 in Section V supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. These data are collected along with those on short-term balances but are not incorporated in the regular monthly series on capital movements. Table 2 appeared for the first time in the December 1949 issue of the "Treasury Bulletin", giving data for the end of the calendar years 1942 through 1948. Corresponding data will be published for subsequent years.

Publication of detailed figures in the monthly series on capital movements was discontinued between the March 1942 and the November 1945 issues of the "Treasury Bulletin", but data omitted during that period were supplied in the November 1945 issue and supplement.
