Treasury Financing Operations

New Refunding Bonds and Certificates

On February 13, 1952, the Secretary of the Treasury announced that on February 18 the Treasury would offer an issue of 2-3/8 percent Treasury bonds callable on and after March 15, 1957, and maturing on March 15, 1959, to refund the 2-1/2 percent Treasury bonds of 1952-54 called for redemption on March 15, 1952. In the same statement the Secretary announced also that holders of the 1-7/8 percent certificates of indebtedness of Series A-1952 maturing April 1, 1952, would be offered at the same time an issue of 11-1/2 month 1-7/8 percent certificates of indebtedness to mature February 15, 1953. Interest on the bonds was to be adjusted as of March 15, and on the certificates as of March 1. Cash subscriptions were not to be received.

Details of the offerings were announced on February 18, the date the subscription books were opened. The books were closed at the close of business on February 21.

The new bonds bear interest from March 1, 1952, at the rate of 2-3/8 percent per annum, payable on a semiannual basis on September 15, 1952, and thereafter on March 15 and September 15 in each year until the principal becomes payable. Bearer bonds with interest coupons attached and bonds registered as to principal and interest were issued, in denominations of \$500, \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000. The certificates bear interest from March 1, 1952, at the rate of 1-7/8 percent per annum, payable with the principal at maturity on February 15, 1953. They were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Subscriptions to the 2-3/8 percent Treasury bonds of 1957-59 amounted to \$922 million, leaving \$101 million to be paid in cash. Subscriptions to the new 1-7/8 percent certificatee, Series A-1953, amounted to \$5,868 million, leaving \$656 million to be paid in cash. Reports to the Treasury on the ownership of Government securities indicate that on December 31, 1951, about 57 percent of the called 2-1/2 percent Treasury bonds of 1952-54, and about 61 percent of the maturing certificatee, Series A-1952, were owned by reporting commercial banks and the Federal Reserve Banks. The ownership figures for that date are the latest published for holdings of commercial banks.

Announcoement Regarding Treasury Bonds Callable

June 15, 1952

The announcement of February 13, 1952, stated also that the option to call for redemption the three issues of Treasury bonds which were eligible to be called on June 15, 1952, would not be exercised.

Maturing Treasury Bille Refunded

Weekly maturities of 91-day Treasury bills in February totaled \$4.8 billion and were refunded in equivalent weekly amounts. The amounts on February 7 and February 14 were for \$1.3 billion each and on February 21 and February 28, for \$1.1 billion each. The average rates of discount on the new offerings were 1.584 percent for February 7, 1.643 percent for February 14, 1.507 percent for February 21, and 1.563 percent for February 28.

Note: Details of Treasury market financing operations are shown elsewhere in this issue of the "Treasury Bulletin", in the tables on "Offerings" and "Dis-

position", respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills".

 6/ For basis of appropriations, see Table 7. Amounts appropriated are equivalent to the amounts of taxes collected and deposited for old-age insurance. The Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950, changed in certain respects the basis of transferring the appropriated funds to the trust fund. Effective January 1, 1951, the old-age insurance taxes on employers and employees and the withheld income tax are paid to the Treasury in combined amounts without separation as to type of tax. The old-age insurance tax on self-employment income, imposed by Public Law 734, is levied and collected as part of the individual income tax, beginning with the taxable year 1951. Beginning January 1951, the amounts transferred currently as appropriations to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury,

and are adjusted in later transfers on the basis of records maintained by the Federal Security Administrator. For purposes of this table, the amount credited each month to the trust fund is included under "Employment taxes" as estimated receipts for old-age insurance. Throughout the calendar year 1951, the balance of the combined amounts paid in by employees was shown as income tax withheld. Beginning January 1952, the tax on self-employment income is allowed for in the amounts credited to the trust fund, so that these amounts can no longer be used to derive an estimate of the income tax withheld by employers.

7/ Interest on refunds is included in Table 5 under "Miscellaneous".
 8/ Current appropriations were temporarily suspended to complete adjustments (see footnote 6) as follows: October 1 through November 5, 1951, for adjustment of \$150 million (\$113 million in October and \$37 million in November); January 2 through 4, 1952, for adjustment of \$25 million.

For description of content, see Table 6, footnotes 3.

1/ Fiscal year ending June 30 of year indicated.

2/ Gross receipts less appropriations to Federal Old-Age and Survivors Insurance Trust Fund and refunds of receipts.

Expenditures are "net" after allowance for reimbursements to appropriations receipts of revolving fund appropriations, and receipts credited to disbursing accounts of corporations and agencies having authority to use collections without formal covering into the Treasury. The figures include transfers to trust accounts, transactions of the Foreign Economic Cooperation Trust Fund, established under the Economic Cooperation Act of 1948 (62 Stat. 150), and transactions of wholly owned Government corporations and agencies.

Beginning November 1950, investments by these corporations and agencies

in public debt securities are excluded from budget expenditures and included with other such investments under "Trust account and other transactions." Corresponding adjustments were made in November 1950 and January 1951 for the investments classified as budget expenditures in the period July through October. Budget expenditures exclude also amounts from public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law. Payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and disposition of earnings are excluded from both receipts and expenditures. Further information on capital transfers and the Foreign Economic Cooperation Trust Fund may be found in the 1950 Annual Report of the Secretary of the Treasury, pages 452 and 453.

- 1/ Excess of expenditures is covered by appropriations by Congress.
 2/ Taxes on employers and employees under the Federal Insurance Contributions Act and later amendments (subchapter A of chapter 9 of the Internal Revenue Code - 26 U.S.C. 1400-1432); and tax on self-employment income under the Social Security Act Amendments of 1950 (subchapter E of chapter 1 of the Internal Revenue Code - 26 U.S.C. 480-482). The tax on self-employment income is levied and collected as part of the individual income tax beginning with the taxable year 1951. Beginning January 1951, the receipts shown here are based on estimates (see footnote 4).
 3/ Tax on employers of 8 or more under the Federal Unemployment Tax Act and later amendments (26 U.S.C. 1600-1611). Against this tax certain credits not to exceed 90 percent of the total tax are allowed with respect to contributions by the taxpayer to a State fund under a State unemployment compensation law.
 4/ Appropriations to the Federal Old-Age and Survivors Insurance Trust Fund equivalent to the amount of taxes collected and deposited for old-age insurance (42 U.S.C. 401 (a); see also footnote 2). The Social Security Act Amendments of 1949 (Public Law 73), approved August 28, 1950, changed in certain respects the basis of transferring the appropriated funds to the trust fund. Effective January 1, 1951, the amounts transferred currently as appropriations to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury, and are adjusted in

later transfers on the basis of wage and self-employment income records maintained by the Federal Security Administrator. For purposes of this table, beginning January 1951, the same amount as is credited each month to the trust fund is shown as estimated current tax receipts for old-age insurance.

- 5/ Interest on refunds is included under "Administrative expenses".
 6/ For explanation of adjustments in these figures, see Table 1.
 7/ Includes expenditures from appropriations made specifically for administrative expenses relating to the Social Security Act, as amended; administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended; administrative expenses under the Wagner-Peyser Act of 1933, as amended (29 U.S.C. 494); and interest on refunds of social security taxes.
 8/ Security Act Amendments of 1950 (Public Law 73), approved August 28, 1950.
 9/ For unemployment insurance and maintenance of public employment offices; includes expenditures made directly by the Federal Government beginning January 1942 for maintenance of employment offices, and expenditures of the U. S. Employment Service for the period December 1942 through June 1948, when it was not in the Bureau of Employment Security.
 10/ Total includes expenditures for grants to States, Public Health Services, as follows: 1944, \$10.9 million; 1945, \$10.7 million; and 1946, \$.2 million. After 1945 expenditures were made under provisions of the Public Health Service Act of 1944 (58 Stat. 682).

Source: Actual figures are based on the Daily Treasury Statement; estimates are based on the 1953 Budget document, including effect of proposed legislation as outlined in Budget detail.

1/ The U. S. subscription to the capital of the International Monetary Fund was paid in part from the Exchange Stabilization Fund (see "Treasury Bulletin" for September 1947, page 17).

2/ Consists of seigniorage on silver and increment resulting from

reduction in weight of the gold dollar. This item is part of the cash budget receipts shown in these tables, but is excluded from the 1953 Budget document figures for "Receipts from the public".

In addition to this decrease in the General Fund balance, the Exchange Stabilization Fund was drawn down by \$1,800 million for subscription to the capital of the International Monetary Fund.

Source: Daily Treasury Statement; Office of the Treasurer of the United States; for guaranteed securities prior to July 1942, Statement of Contingent Liabilities.

1/ Obligations, issued by certain Government corporations and other agencies, which are guaranteed by the United States as to both principal and interest.

Such obligations were first authorized in 1932. Prior to September 1939, the figures represent principal shown as a contingent liability of the United States; beginning September 1939, they represent principal outstanding, both matured and unmatured. Guaranteed securities held by the Treasury are excluded.

STATUTORY DEBT LIMITATION

The Second Liberty Bond Act, as amended, (31 U.S.C. 757 b), provides that the face amount of obligations issued under authority of that act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury), shall not exceed in the

aggregate \$275 billion outstanding at any one time. Obligations issued on a discount basis, and subject to redemption prior to maturity at the option of the owner, are included in the statutory debt limitation at current redemption values.

1/ Original call and maturity dates are used.

2/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called

securities would be presented for cash redemption.

3/ These nonmarketable bonds, dated April 1, 1951, and maturing April 1, 1980, are exchangeable for 1-1/2% marketable Treasury notes. See Table 3, footnote 2.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were on sale through April 1941 and Series E, F, and G have been on sale since that time. Beginning May 1, 1951, holders of maturing Series E bonds have three options: to redeem the bonds in cash, to retain them with an extended maturity of 10 years at specified rates of interest accrual, or to exchange them for Series G bonds. Further information on these options will be found in the "Treasury Bulletin" for April 1951, and on the terms and conditions of each series in annual reports of the Secretary of the Treasury.

Series A-F sales are shown at issue price and total redemptions and amounts outstanding at current redemption values. Series G is shown at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured bonds outstanding of Series A-D were included in the interest-bearing debt until all bonds of the annual series had matured, when they were transferred to matured debt on which interest has ceased. Data by denominations and the amounts of sales by States are published on a monthly basis but not in each issue of the "Treasury Bulletin".

1/ Beginning June 1947, Series E sales include unclassified sales consisting of Series E, F, and G. The amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include unclassified Series A-D redemptions beginning October 1944, and also unclassified F and G redemptions, beginning June 1947.

3/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the "Treasury Bulletin".

4/ Includes both matured and unmatured bonds; see Table 4.

5/ Beginning May 1951, includes exchanges of matured Series E bonds for Series G bonds as shown in Table 4.

6/ Comparable data are not available prior to January 1950.

7/ Of the total amount of redemptions, 75% represents issue price and 25% accrued discount.

8/ Includes redemptions not yet classified (see footnote 2).

* Less than \$500,000.

TREASURY SAVINGS NOTES

Treasury tax and savings notes have been issued in five series: Tax Series A from August 1, 1941, through June 22, 1943; Tax Series B from August 1, 1941, through September 12, 1942; Savings Series C (originally designated as Series C) from September 14, 1942, through August 31, 1948; Savings Series D from September 1, 1948, through May 14, 1951; and Savings Series A beginning on May 15, 1951.

Details concerning terms and conditions for purchase and redemption and investment yields of Savings Series A appear in the June 1951 issue of the "Treasury Bulletin", page A-1. Similar information with respect to Savings Series D will be found in the October 1948 and September 1949 issues, and with respect to Savings Series C in the October 1945

issue. For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased.

TREASURY SURVEY - COMMERCIAL BANK OWNERSHIP, DECEMBER 31, 1951

The tables which follow provide an analysis of the security holdings of commercial banks reporting in the Treasury survey of ownership of securities issued by the United States Government and by Federal agencies. The figures show the total holdings distributed according to Federal Reserve member-bank classes and nonmember banks.

This analysis of commercial bank ownership was first published in the May 1944 issue of the "Treasury Bulletin", based on the survey data for December 31, 1943. It has appeared at semiannual or quarterly intervals since that time, and is now being published for the June 30 and December 31 survey data.

Note: Treasury bonds included in the averages, beginning December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see "Treasury Bulletin" for March 1944, page 56; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market as reported to the Treasury by the Federal Reserve Bank of New York, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

1/ For definition of taxable and partially tax-exempt bonds, see foot-note to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin". The partially tax-exempt average was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

2/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

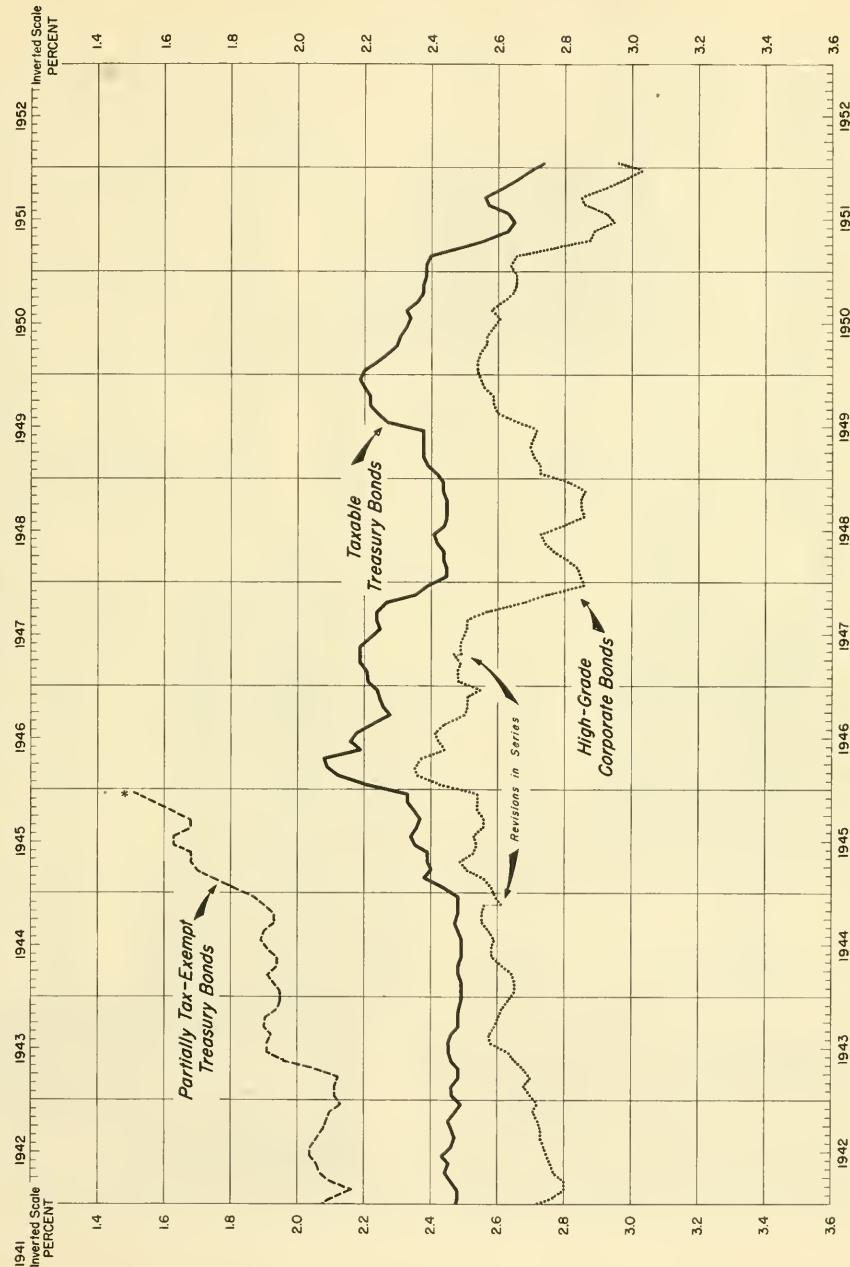

3/ As of December 21, 1949, the Consolidated Gas Electric Light and Power Company of Baltimore 2-3/4% of 1981 were dropped from the average, having been called.

4/ As of October 20, 1950, the Standard Oil Company of California 2-3/4% of 1965-66 were dropped from the average, having been called.

5/ Market closed.

Sources: Daily Treasury Statement for total receipts from internal revenue; reports by collectors of internal revenue for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositories; they do not coincide with amounts reported by collectors because of the lag in deposits of collections and because certain taxes are paid directly into the depositories.

1/ Excludes collections for credit to certain trust accounts for island possessions; includes corporation income tax on Alaska Railroad.

2/ Includes excess profits taxes formerly shown separately as follows: until enrichment through 1947 (thereafter these collections are included under "Miscellaneous"), declared value (repealed for years ending after June 30, 1946). Excess Profits Tax Act of 1940 (Title II of the Second

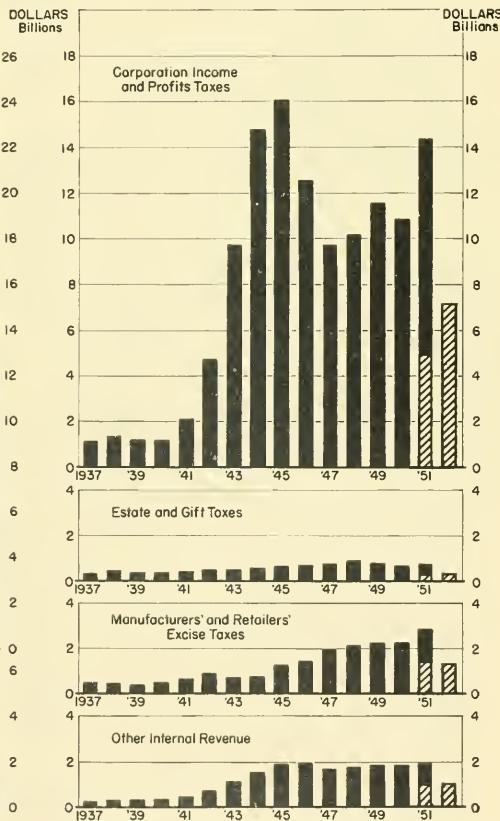

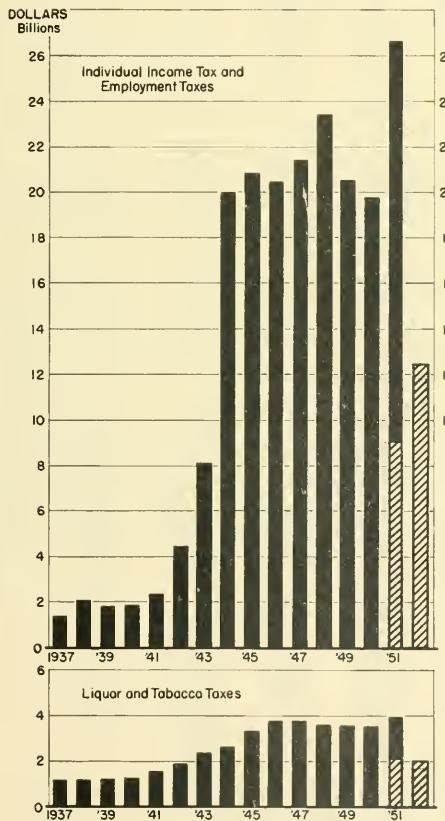

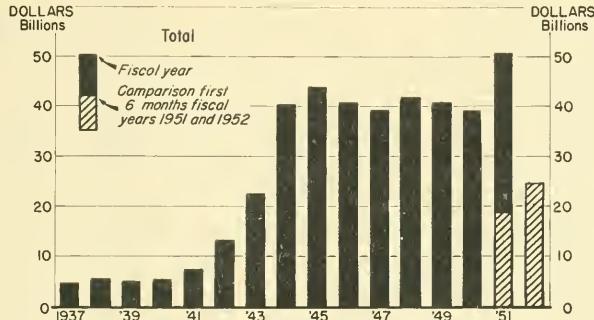

Revenue Act of 1940, which was repealed for years ending after December 31, 1945), and Vinson Act as amended (3½ U.S.C. 496).

3/ Beginning January 1951, withheld income taxes and social security employment taxes on employees and employers are paid into the Treasury in combined amounts without separation as to type of tax, pursuant to the Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950. The figures for prior periods have been combined accordingly in this table for purposes of comparison, but are shown separately in the March 1951 and preceding issues of the "Treasury Bulletin".

4/ Repealed for years ending after June 30, 1945. Beginning July 1950, included under "Miscellaneous".

Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositories; they do not coincide with amounts reported by collectors because of the lag in deposits of collections and because certain taxes are paid directly into the depositories.

CAPITAL MOVEMENTS

Data relating to claims on foreigners and liabilities to foreigners, and capital movements between the United States and foreign countries, have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury regulations thereunder. Information covering the principal types of data and the principal countries is reported each month by banks and bankers and securities brokers and dealers in the United States. This information is published regularly in the "Treasury Bulletin". Supplementary information is published at less frequent intervals. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

The term "foreigners" as used in these reports covers all institutions and individuals (including United States citizens) domiciled outside the United States, as well as international organizations, wherever domiciled, created by treaty or convention between sovereign states. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, basis of reporting, and derivation of capital movements figures appeared in the April 1950 issue of the "Treasury Bulletin", pages 50-52. Revised report forms and regulations became effective with

the data for January 1950. Attention is called to the fact that although the grand total figures on the revised reporting basis are reasonably comparable with those for preceding months, data for individual countries in some instances are not comparable because of certain changes in coverage and geographical classification.

The supplementary information, contained in Section IV, is presented in three tables appearing at different times. Table 1 gives data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue of the "Treasury Bulletin" and begins with data for September 30, 1946. Table 2 supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. This table appeared for the first time in the December 1949 issue. Data are for the end of the calendar year beginning with 1942. Table 3 gives information on short-term liabilities to countries not regularly reported separately by banks and bankers. This table appeared for the first time in the April 1950 issue. The data have been requested at irregular intervals, the earliest date being October 1943.
