1/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes.

In this statement, however, charges for retirement of national bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,057 millions for the fiscal year 1937 is considered as a part of the working balance.

r Revised.

1/ Treasury bills are included in interest-bearing debt figures at face amount, but for the purpose of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rate of interest on United States

savings bonds, Series A-E are considered to yield 2.90 percent per annum and Series F is considered to yield 2.53 percent.

2/ Excludes securities guaranteed by the United States which were sold directly to the Treasury. Consists only of securities guaranteed by the United States as to both principal and interest.

This advance tabulation summarizes significant data from taxable excess profits tax returns, Form 1121, for 1941 received in the Bureau of Internal Revenue from the offices of the collectors through July 31, 1942. It is presented at this time to make the information available prior to the more complete tabulations and detailed analyses which will be published later in the complete report "Statistics of Income for 1941, Part 2". The data presented herein are tabulated from the returns as filed and do not reflect any revisions that may be made as a result of audit by the Bureau. No tentative returns are included.

The returns are divided into two classes for tabulation and are shown in Tables I and II, as follows:

Table I - Returns for the calendar year 1941, and for fiscal and part years beginning in, and the greater part of the accounting period falling in, 1941. This class of returns is filed under the provisions of the Internal Revenue Code as amended applicable to the calendar year 1941. The number of returns in this class totaled 32,976.

Table II - Returns for fiscal and part years beginning in 1940 and the greater part of the accounting period falling in 1941. This class of returns is filed under the provisions of the Internal Revenue Code as amended applicable to the calendar year 1940. The number of returns in this class totaled 4,121.

The number of returns on which excess profits credit is computed on the invested capital method is 18,337, or 49.4 percent of the total, and on the income method 18,760, or 50.6 percent of the total. The aggregate excess profits net income of the returns filed on the invested capital method is \$3,423,490,861 and the excess profits tax is \$972,454,312. The aggregate excess profits net income of the returns filed on the income method is \$6,998,993,264 and the excess profits tax liability is \$1,935,279,322.

For the returns on which the excess profits credit is computed on the income method, 9,053 or 45.3 percent used the general average method, and 9,707 or 51.7 percent used the increased earnings method. The aggregate excess profits net income of the returns filed on the general average method is \$3,998,516,130, and the excess profits tax liability is \$1,173,574,737. The aggregate excess profits net income of the returns filed on the increased earnings method is \$3,000,477,134 and the excess profits liability is \$761,704,585.

Selected data covering the 32,976 returns filed for the calendar year 1941 and for fiscal and part years beginning in, and the greater part of the accounting period falling in, 1941

The distribution of the returns according to tax brackets is as follows:

Rate of tax	Number of returns	Percent of total number of returns
60	1,344	4.1
55	1,150	3.5
50	2,758	8.3
45	3,253	9.9
40	5,751	17.4
35	18,720	56.8
Total	32,976	100.0

Corporations which used the invested capital method number 16,390 of which 5,505 or 51.9 percent disclaimed the income method, whereas 16,556 corporations used the income method of which 7,518 or 45.3 percent disclaimed the invested capital method. The remainder, 16,953, failed to disclaim either method or had no election privilege.

An excess profits credit carry-over aggregating \$205,236,023 is reported by 10,953 corporations.

The number of returns filed on a consolidated basis is 212.

The number of returns with abnormal income attributable to other years is 528. Of the 16,556 returns with excess profits credit computed under the income method the number with abnormal deductions in the base period is 1,282.

Principal excess profits tax changes introduced by the Revenue Act of 1941

Reversal of the deduction for income and excess profits taxes - Prior to the enactment of the Revenue Act of 1941, income taxes were deductible in computing excess profits net income. The Revenue Act of 1941 eliminates this deduction and allows the deduction of excess profits tax for income tax purposes. The elimination of income tax as a deduction in computing excess profits net income applies to the base period years as well as to the taxable year.

Change in excess profits credit based on invested capital - The Revenue Act of 1941 changed the invested capital credit from a flat 8 percent to 5 percent on invested capital not in excess of \$5,000,000 plus 7 percent on the amount in excess of \$5,000,000.

Increase in rates - The Revenue Act of 1941 increases the rates in each adjusted excess profits net income bracket by ten percentage points as follows:

Adjusted excess profits net income (In thousands of dollars)	From (percent)	To (percent)
Not over 20.....	25	35
Over 20 not over 50.....	30	40
Over 50 not over 100.....	35	45
Over 100 not over 250.....	40	50
Over 250 not over 500.....	45	55
Over 500.....	50	60
