SPECIAL ARTICLES

Treasury Market Financing

On March 22, the Treasury announced an exchange offering for the \$5,251 millions of 7/8 percent certificates of indebtedness maturing April 1, 1944. New 7/8 percent certificates were offered, dated April 1, 1944, and maturing April 1, 1945. Subscription books were open for four days, March 22-25, inclusive. A total of \$4,877 millions of the maturing issue, or 93 percent of the amount outstanding, were exchanged. The remaining

\$374 millions were redeemed in cash. The maturing certificates were originally issued on April 15, 1943, as part of the Second War Loan.

On April 24, 1944, the Treasury announced an exchange offering for the \$1,655 millions of 7/8 percent certificates of indebtedness maturing May 1, 1944. New 7/8 percent certificates were offered, dated May 1, 1944, and maturing May 1, 1945.

Plans for the Fifth War Loan

The Fifth War Loan campaign will open on June 12, 1944, and will continue through July 8. The goal for this drive will be \$16 billions, of which \$6 billions is assigned to individuals. In the Fourth War Loan, the goal for individuals was \$5.5 billions out of a total goal of \$14 billions.

In announcing the drive, Secretary Morgenthau stated that the major emphasis throughout the Loan will be placed on the quota of \$6 billions for individuals. Although subscriptions will be received from all nonbank investors during the entire period, only sales to individuals will be reported by the Treasury during the period from June 12 to June 26. Commencing on June 26, the campaign to sell securities to individuals will be supplemented by an intensive campaign for subscriptions from all other investors except commercial banks.

Continuing the practice established in the Fourth War Loan, all subscriptions for savings bonds and savings notes processed by the Federal Reserve Banks and by the Treasury Department during the months of June and July will be credited to the drive.

The table which follows presents the chief characteristics of the securities to be offered during the Fifth War Loan. Eight securities are being offered, five of which are unchanged from offerings in the Fourth War Loan. These five securities consist of Series E, F, and G savings bonds, Series C savings notes, and the 2-1/2% Treasury bonds of 1965-1970. A sixth issue is a 7/8 percent certificate similar to that offered in the Fourth Loan. The other two securities consist of a 1-1/4 percent Treasury note due March 15, 1947 and a 2 percent Treasury bond of 1952-54. This is the first time a Treasury note has been offered in a War Loan.

The three issues of savings bonds and Series C savings notes will be dated the first of the month in which purchased. The marketable issues will be dated June 26, except the 2-1/2 percent bond, which is a re-opening of the issue sold during the Fourth War Loan and was dated February 1, 1944. Purchases of this bond during the Fifth War Loan will accrue interest from June 26, 1944, and will have a special coupon attached cov-

ering interest to accrue between June 26 and September 15, 1944. Commercial banks are not permitted to own these bonds until February 1, 1954, except for the limited investment of time deposits.

In order to minimize the amount of indirect participation by commercial banks in the Fifth War Loan, the Treasury has asked the cooperation of all banks in declining to make speculative loans for the purchase of Government securities. This policy, however, is not intended to imply any disapproval of loans which fit the requirements set forth in the joint statement by national and State bank supervisory authorities on November 23, 1942 (see "Treasury Bulletin" for March 1944, page A-3). This statement approves bank loans to enable investors to purchase bonds in anticipation of income, provided that the loans are on a short-term or amortization basis and are fully repaid within six months.

In order to avoid unnecessary transfers of funds from one locality to another during the Fifth War Loan, the Treasury has again requested that all subscriptions by corporations and firms be entered and paid for through the banking institutions where the funds are located. The Treasury will undertake to see that statistical credit for such subscriptions is given to localities that subscribing corporations and firms may designate, except that subscriptions from insurance companies will be credited to the State of the home office as in the past.

Concurrently with the Fifth War Loan commercial banks will be permitted to subscribe in limited amounts to the 2 percent and 2-1/2 percent bonds, and to Series F and Series G savings bonds. The limit, including subscriptions to 2-1/4 percent and 2-1/2 percent Treasury bonds during the Fourth War Loan, and purchases of savings bonds on or after January 1, 1944, will be 20 percent of savings deposits and time certificates of deposit of individuals and nonprofit corporations or associations, but not more than \$400,000, for any one bank. Of such subscriptions, no more than \$100,000 may consist of Series F or Series G bonds (Series 1944) singly or in combination. Subscriptions by commercial banks for the limited investment of time deposits will not be considered as part of the Fifth War Loan drive and will not be credited to drive quotas.

1/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national

bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance general and special accounts for the purpose of this table.

6/ Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1935 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1935 - \$91 millions, 1936 - \$397 millions, 1937 - \$99 millions, 1938 - \$51 millions, and 1939 - \$5 millions, total - \$645 millions. The increases in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.

^{1/} Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the

annual interest charge and rate of interest on United States savings bonds, Series A-E are considered to yield 2.90 percent per annum and Series F is considered to yield 2.53 percent.

^{2/} Guaranteed securities sold directly to the Treasury, and securities guaranteed as to interest only, are not included in this table.

1/ Excludes postal savings bonds and Federal Housing Administration debentures.

2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities. The abbreviations refer

to the following corporations: Home Owners' Loan Corporation, Reconstruction Finance Corporation, Commodity Credit Corporation, Federal Farm Mortgage Corporation, and Federal Public Housing Authority.

3/ The Reconstruction Finance Corporation notes, Series X-A, X-B, and X-C, which are held entirely by United States Government agencies and trust funds, have been reclassified as non-marketable issues.

* Less than \$50,000.

^{1/} These notes were originally designed to help taxpayers set aside funds with which to pay taxes and were known as Treasury tax savings notes. Series A notes were designed for the small and moderate taxpayer; series B and series C notes were intended for the large taxpayer. When the collection of taxes through withholding at the source commenced, the need for series A tax savings notes disappeared and their sale was discontinued. Redemption provisions on series A notes were relaxed to provide for the payment of interest on notes thereafter redeemed for cash (see footnote 3/). Sale of series C notes which were designed for the investment of idle cash reserves as well as the accumulation of tax reserves was continued and the notes were designated Treasury savings notes.

^{2/} Includes matured Treasury savings notes.

^{3/} Series A notes, which were sold from August 1, 1941 through June 22, 1943, yield approximately 1.92 percent per annum. Through June 22, 1943, the notes could be redeemed for cash only at the original purchase price; since that date, the notes have been redeemed for cash at the tax payment value

current at the time of presentation. (See also footnote 1/.) Prior to October 1, 1943, the maximum amount which could be used in payment of each class of tax (income, estate, or gift) by each taxpayer during each taxable year was limited to \$5,000 per value; this limitation was removed as of that date.

^{4/} Series B notes were sold from August 1, 1941 through September 12, 1942, to yield approximately .48 percent per annum. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash only at the original purchase price.

^{5/} Series C notes went on sale September 14, 1942. Interest accrues each month on a graduated scale (see "Treasury Bulletin" for August 1943, page 4) to yield approximately 1.07 percent per annum if held to maturity. These notes may be used in payment of Federal taxes at any time two months after the date of issue. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash six months after the date of issue at the tax payment value current at the time of presentation. Prior to July 27, 1943, notice of 30 days was required for cash redemption. See also footnote 1/.

1/ Figures for periods prior to November 1, 1942 are not strictly comparable with subsequent data because of the shift to a Daily Treasury Statement basis. Stamps sold prior to October 1, 1942 were known as postal savings stamps and were obligations of the Postal Savings System but subsequently became public debt obligations.

2/ Estimated on the basis of employee conducted by the Post Office Department.

3/ Sales and redemptions commence with May 1, 1941 when the special

defense series of stamps went on sale. The amount of the old series of postal savings stamps outstanding on April 30, 1941 was \$150 thousands. Details not available for May, June, and July 1941.

4/ Includes minor amounts which were exchanged for postal savings certificates. These aggregated \$123 thousands for the period August 1, 1941 through June 30, 1942 and \$55 thousands for the period July 1, 1942 through October 31, 1942.

5/ Net of sales less redemptions. See footnote 1/ Does not include amounts transferred from Postal Savings System to the Treasury to cover outstanding stamps.

Issued or Guaranteed by the United States, February 29, 1944**

The following tables present summary data from the Treasury survey, as of February 29, 1944, of the ownership of securities issued or guaranteed by the United States. It should be noted that commencing with the Treasury survey as of February 29, 1944, the Reconstruction Finance Corporation notes, Series X-A, X-B, and X-C, which are held entirely by United States Government agencies and trust funds, have been reclassified as non-marketable issues.

Back Figures: For revisions of previously published data on life insurance companies and on fire, casualty, and marine insurance companies, see "Treasury Bulletin" for November 1943, pages 52-63.

* Less than \$500,000 or less than .05%.

1/ Public marketable interest-bearing securities include all interest-bearing securities outstanding except (1) special issues to Government agencies and trust funds, (2) adjusted service bonds, (3) depositary bonds, (4) United States savings bonds, (5) Treasury savings notes and (6) Commodity Credit Corporation demand obligations. For amounts of such obligations held by institutions reporting, see Table II, footnote 1/.

2/ Excludes certain banks which accept demand deposits and which have been classified as commercial banks. In the Treasury survey for November 30, 1943, the nomenclature "savings banks"

replaced that of "mutual savings banks". This change reflected a more nearly correct designation of the nature of the banks included in this category without measurably affecting the comparability of the two classes.

3/ Excludes Exchange Stabilization Fund.

4/ Excludes obligations sold directly to the Treasury.

5/ Securities the income from which is exempt from the normal rates and the surtax rates of the Federal income tax.

Back Figures: For revisions of previously published data on life insurance companies and on fire, casualty, and marine insurance companies, see "Treasury Bulletin" for November 1943, pages 52-63.

* Less than \$500,000 or less than .05%.

1/ Public marketable interest-bearing securities include all interest-bearing securities outstanding except (1) special issues to Government agencies and trust funds, (2) adjusted service bonds, (3) depositary bonds, (4) United States savings bonds, (5) Treasury savings notes and (6) Commodity Credit Corporation demand obligations. Such obligations were held by institutions reporting, as follows: (1) depositary bonds: commercial banks, \$373 millions; (2) United States savings bonds: commercial banks, \$453 millions; savings banks, \$144 millions; insurance companies, \$183 millions; all institutions, \$781 millions; (3) Treasury savings notes: commercial banks, \$60 millions; insurance companies, \$26 millions; all institutions, \$87 millions; (4) Commodity Credit Corporation demand

obligations: holdings of these obligations are not reported.

2/ Excludes certain banks which accept demand deposits and which have been classified as commercial banks. In the Treasury survey for November 30, 1943, the nomenclature "savings banks" replaced that of "mutual savings banks". This change reflected a more nearly correct designation of the nature of the banks included in this category without measurably affecting the comparability of the two classes.

3/ Excludes Exchange Stabilization Fund.

4/ Securities the income from which is exempt from the normal rates and the surtax rates of the Federal income tax.

Basis of Computation: (1) Treasury bond yields are computed on the basis of the mean of bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Revised.

1/ Items in this column are the only ones in this statement which constitute a charge against the Federal Budget. They represent amounts of funds drawn against available appropriations.

2/ Except for the H.O.L.C., sales of obligations in the market, as shown in this column, are reduced by the amount of obligations which have been retired (including those which have in effect been refunded through the sale of obligations to the Treasury). In the case of the H.O.L.C., the original amount of obligations sold in the market is shown in this column and the retirement and refunding of these obligations are shown as "Retirement of obligations issued in exchange for mortgages" in the statement of uses of funds.

3/ Includes \$3,000,000 N.I.R.A.; \$97,000,000 R.F.C. included in notes canceled by the Treasury (See footnote 4/); and \$143,950,524 restoration of capital impairment, which is net of repayments to the Treasury of \$43,756,731 on the basis of March 31, 1940 appraisal, and \$27,815,514 on the basis of March 31, 1942 appraisal of the corporation, pursuant to Public Law No. 442 - 75th Congress, approved March 8, 1938.

4/ These funds were furnished by the R.F.C. from the proceeds of its notes sold to the Treasury, such amounts being included in

the total of obligations of the corporation canceled by the Secretary of the Treasury pursuant to the Act of February 24, 1938.

5/ The R.F.C. purchased the stock of the Federal home loan banks from the Treasury Department on February 20, 1941. The net effect of this transaction is the same as a sale of stock to other agencies, and is shown as such for purposes of this report.

6/ Includes the Electric Home and Farm Authority which was transferred for purposes of liquidation to the R.F.C. by Executive order effective October 31, 1942.

7/ Comprises Cargoes, Incorporated, Defense Homes Corporation, Defense Plant Corporation, Defense Supplies Corporation, Institute of Inter-American Affairs, Institute of Inter-American Transportation, Inter-American Educational Foundation, Inc., Inter-American Navigation Corporation, Metals Reserves Company, Petroleum Reserves Corporation, Rubber Development Corporation, Rubber Reserve Company, Smaller War Plants Corporation, U.
