Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Money." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Combined Statement of Receipts, Expenditures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions handled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the daily statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

Treasury Financing Operations

August Refinancing

On July 16, the Treasury Department announced an optional exchange offering of 4-3/4 percent 12-1/2-month notes and 4-3/4 percent 4-3/4-year notes. The offering was made to holders of \$13,500 million 1-5/8 percent certificates of indebtedness maturing August 1, and \$473 million 4 percent notes of Series A-1961, on which holders had filed notice of intention to redeem on August 1, 1959. Cash subscriptions were not received.

The 12-1/2-month notes are dated August 1, 1959, and mature August 15, 1960. The 4-3/4-year notes are dated July 20, 1959, and mature May 15, 1964. Both notes were offered at par. In the case of the longer notes, an interest adjustment was made as of July 20, 1959. Following acceptance of the securities to be exchanged, accrued interest from February 1 to that

1964. Both securities were issued in bearer form only and in denominations of \$1,000, \$5,000, \$10,000, \$100,000, \$1,000,000, \$100,000,000, and \$500,000,000.

Subscriptions accepted for the new issues totaled about \$13,745 million leaving about \$228 million to be paid in cash. Results of the offering are shown in the accompanying table.

13-Week and 26-Week Bills

July issues of regular weekly Treasury bills totaled \$7.6 billion, an amount equivalent to the maturing 13-week and 26-week bills. The five new issues of 91-day bills amounted to \$5.5 billion, and the five new issues of 182-day bills to \$2.1 billion. Of the five 91-day issues, the first on July 2 was for \$1.1 billion, the next two for \$1.2 billion each, and the last two for \$1.0 billion each.

Source: Actual figures through 1952 are from the daily Treasury statement and thereafter from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases see page II); estimates are from the 1960 Budget document, released January 19, 1959, and supporting data, including effects of proposed legislation.

1/ For further detail, see tables under "Internal Revenue Collections." Breakdown was not made in the daily Treasury statement and the monthly statement for years prior to 1954.

2/ Beginning January 1951, the distribution of receipts between individual income taxes and old-age and disability insurance taxes is made in accordance with provisions of Sec. 201 of the Social Security Act, as amended (42 U.S.C. 401), for transfer to the Federal Old-Age and Survivors Insurance Trust Fund (see footnote 11), and after December 1956 also for transfer to the Federal Disability Insurance Trust Fund (see footnote 12).

4/ Taxes on employers and employees under the Federal Insurance Contributions Act, as amended (26 U.S.C. 3101-3125), and, beginning with the taxable year 1951, tax on self-employed individuals under the Self-Employment Contributions Act, as amended (26 U.S.C. 1401-1403). The Social Security Act Amendments of 1956, approved August 1, 1956, increased the rates of tax applicable to wages paid and taxable years beginning after December 31, 1956, to provide for disability insurance (see footnote 12).

5/ Taxes on carriers and their employees under the Railroad Retirement Tax Act, as amended (26 U.S.C. 3201-3233).

6/ Tax on employers of 4 or more under the Federal Unemployment Tax Act, as amended (26 U.S.C. 3301-3308); with respect to services performed before January 1, 1950, the tax was imposed on employers of 8 or more. Remaining footnotes on following page.

Footnotes to Table 1 - (Continued)

- 7/ Through 1953, contributions to the Railroad Unemployment Insurance Administration Fund were carried in the daily Treasury statement as miscellaneous receipts, while the 1960 Budget document, Special Analysis I, includes them in employment taxes through 1952. Beginning 1954 the contributions are credited direct to the trust account. For amounts of the contributions included in budget receipts, see "Treasury Bulletin" for February 1954, page 7.
- 8/ In the 1960 Budget document, Special Analysis I, taxes not otherwise classified are included in miscellaneous receipts.
- 9/ Beginning 1957, includes collections under increased rates in the Highway Revenue Act of 1956 (see footnote 14).
- 10/ Figures shown include adjustments (see footnote 11) as follows: In January, decreases in income tax of \$82 million withheld and \$7 million not withheld, and increases in transfers of \$83 million to Federal Old-Age and Survivors Insurance Trust Fund and \$5 million to Federal Disability Insurance Trust Fund; in April, increase in income tax withheld of \$129 million and decreases in income tax not withheld of \$2 million and in transfers of \$114 million to Federal Old-Age and Survivors Insurance Trust Fund and \$13 million to Federal Disability Insurance Trust Fund; in June, increase in income tax withheld of \$138 million and decreases in income tax not withheld of \$14 million, and in transfers of \$111 million to Federal Old-Age and Survivors Insurance Trust fund and \$13 million to Federal Disability Insurance Trust Fund.
- 11/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance (42 U.S.C. 401 (a)). Beginning January 1951, the amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury pursuant to the provisions of Sec. 201 (e) of the Social Security Act, as amended (42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration. The amount of old-age insurance tax refunds is reimbursed to the general fund by the trust fund. The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 (42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal

- Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
- 13/ Excludes the Government's contribution for creditable military service (45 U.S.C. 228c-1 (n)). Beginning 1952, amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscal year (65 Stat. 27 as 66 Stat. 371), and transfers are made currently.
- 14/ The Highway Revenue Act of 1956, approved June 29, 1956 (70 Stat. 173) established a Highway Trust Fund from which are to be paid, as provided by appropriation acts, Federal-aid highway expenditures after June 30, 1956, and before July 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. The use tax was imposed by the act and rates were increased for the other taxes. Previous to the fiscal year 1957 corresponding excise tax receipts were included in net budget receipts, and Federal-aid highway expenditures were included in budget expenditures.
- 15/ Interest on refunds is included in expenditures in Table 1.
- 16/ Transfers reduced by \$300 million to correct those made earlier or basis of estimates (see footnote 11).
- 17/ Includes \$139 million increment from reduction in the weight of the gold dollar, which had been allocated for payments to Federal Reserve Banks for making industrial loans, and was returned to the Treasury pursuant to Public Law 85-699, approved August 1, 1956 (70 Stat. 692). The unused portion of the allocation, \$112 million, was transferred from the trust account in which it had been held; the \$27 million which had been advanced to Federal Reserve Banks was repaid into a special fund, from which it was appropriated to the Small Business Administration to be available for grants under section 7 (d) of the Small Business Act, as amended. See also "Trust Account and Other Transactions," Table 2, and "Monetary Statistics," Table 1 (published quarterly).
- 18/ Net of reimbursement of \$83 million from the Federal Old-Age and Survivors Insurance Trust Fund for tax refunds (see footnote 11).
- 19/ Includes \$689 million of anticipated revenue under the 1-1/2 cent per gallon tax increase on motor fuels which is included under proposed legislation in the 1960 Budget document.

* Less than \$500,000.

Footnotes to Table 2 - (Continued)

- Footnotes 1 through 3 follow Table 2 on page 4.
- 4/ Includes unclassified expenditure transfers until these have been distributed in final fiscal year figures.
- 5/ Monthly figures shown will not add to the fiscal year cumulative because prior to December they do not reflect the shift of the former Civil Aeronautics Administration and the Civil Aeronautics Board from "Commerce Department" to "Independent Offices," pursuant to the Federal Aviation Act of 1958, approved August 23, 1958 (Public Law 85-726), but the cumulative figures have been adjusted to reflect it from the beginning of the fiscal year.

- 6/ Total includes allowance for contingencies of \$100 million.
- 7/ Beginning 1955, consists of net expenditures of the Postal Fund, reflecting the change in classification of Post Office transactions to a public enterprise revolving fund basis.
- 8/ Reported on an accrual basis effective June 30, 1956.
- 9/ Consists of Federal payment and loans and advances.
- 10/ Includes \$1,375 million additional subscription to the International Monetary Fund pursuant to Public Law 86-42, approved June 17, 1959.
- * Less than \$500,000.

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the 1960 Budget document, released January 19, 1959, including effects of proposed legislation.

Note: Figures in this table are for agencies as constituted at the time the expenditures were made, and therefore do not necessarily represent functions which are comparable over a period of time. For expenditures by functions on a consistent basis, see Table 4. Agency shifts are reflected in this table as follows: Beginning 1955, Federal Home Loan Bank Board from "Housing and Home Finance Agency" to "Independent offices," and Reconstruction Finance Corporation as indicated in footnote 1; beginning 1957, Alaska Road Construction from "Interior Department" to "Commerce Department," and Federal intermediate credit banks and production credit corporations as indicated in footnote 3; beginning 1958, Federal Facilities Corporation (remaining functions) from "Treasury Department" to "General Services Administration," and Informational Media Guaranty Fund from "Funds appropriated to the President" to "Independent offices"; beginning 1959, Federal Civil Defense Administration from "Independent offices" to "Executive Office of the President"; and beginning December 1958 (except that estimates are for the full fiscal year), the former Civil Aeronautics Administration and the Civil Aeronautics Board from "Commerce Department" to "Independent offices."

1/ Reconstruction Finance Corporation is included under "Independent offices" through 1954, and under "Treasury Department" beginning 1955, except functions transferred to Export-Import Bank, Federal National Mortgage Association, General Services Administration, and Small Business Administration. The corporation was abolished at the close of June 30, 1957, by Reorganization Plan No. 1 of 1957, and its remaining functions were transferred to the Housing and Home Finance Administrator, Administrator of General Services, Administrator of Small Business Administration, and Secretary of the Treasury.

2/ Beginning 1957, Federal aid for highways is excluded from budget expenditures and included in trust account expenditures (see Table 1).

3/ Effective January 1, 1957, the production credit corporations were merged in the Federal intermediate credit banks, pursuant to the Farm Credit Act of 1956, approved July 26, 1956 (12 U.S.C. 1027), and operations of the merged agencies (as mixed-ownership corporations) were classified as trust enterprise funds (see "Trust Account and Other Transactions," Table 3); previously the operations of the banks and the corporations, respectively, were classified as public enterprise funds and were included net in budget expenditures.

Source: Bureau of Accounts. Details for the current fiscal year to date are shown in Bureau of Accounts report "Budgetary Appropriations and Other Authorizations, Expenditures and Unexpended Balances".

1/ These preliminary figures are the latest available at this time. They are based on preliminary reports from the agencies and are subject to later adjustments as additional information is received, preparatory to the closing of the central accounts in the Treasury for fiscal year 1959. Among the areas subject to later adjustment are the following: certain overseas transactions not yet included; the write-offs or withdrawals of unobligated balances no longer available, since agency reports covering these transactions are not required by law to be submitted until September 30 (the write-offs in the fiscal

year 1958 amounted to \$350 million); certain indefinite appropriations included on the basis of Budget estimates instead of final figures; other transactions, including those relating to (a) authorizations to expend from debt receipts, (b) contract authorizations, (c) investment in public debt securities, and (d) restorations and reappropriations, which may require adjustment on the basis of final reports from the agencies.

2/ Includes same categories as shown at end of current period.

3/ Although not expended, a substantial portion of these amounts is obligated for outstanding purchase orders and contracts for equipment and supplies, for payrolls, and for similar items.

Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in the Special Analysis. Where current year classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.

and excluded from net investment by Government agencies in public debt securities (see Table 4) and from net redemption or sale of obligations of Government agencies in the market (see Table 5). Figures previously published for the fiscal year 1955 have been revised to the new classification basis.

2/ Includes guaranteed securities beginning 1955 (see Table 4).
3/ Differs from monthly statement of receipts and expenditures for December 1958 because of error in classification in that statement.

Source: See Table 1.

1/ Includes security transactions of Government-sponsored enterprises beginning 1955 (see Table 1, footnote 1).

2/ Does not include revolving fund receipts representing acquired securities amounting to \$1,643,070 (par value); see also Table 4.

3/ Differs from monthly statement of receipts and expenditures for December 1958 because of error in classification in that statement.

4/ Operated as a trust enterprise fund beginning January 1, 1957, at which time the production credit corporations were merged in the Federal intermediate credit banks, pursuant to the Farm Credit Act of 1956 (12 U.S.C. 1027); previously the banks and corporations, respectively, were classified as public enterprise funds, and were included net in budget expenditures. Beginning January 1959 they are classified as Government-sponsored enterprises, and the net transactions of the operating fund were then transferred from the trust fund and included under "Deposit fund accounts."

5/ Secondary market operations, as provided in the Housing Act of 1954, approved August 2, 1954 (12 U.S.C. 1719). Funds provided by the Treasury (-), or repaid to the Treasury, are shown in a separate column (and correspondingly are reflected net in budget expenditures).

6/ Includes District of Columbia operating expenditures; Indian tribal funds; expenditures chargeable against increment on gold; and trust enterprise funds (net) which are not shown separately. The Railroad Unemployment Insurance Administration Fund is included for the period 1954 through November 1958 (see Table 7), and the Employees' Life Insurance Fund (net) from its establishment in August 1954.

7/ Excluded from deposit fund account expenditures and included with similar security transactions of other agencies (see Tables 4 and 5).

* Less than \$500,000.

1/ Includes the Government's contribution for creditable military service (45 U.S.C. 228c - 1 (n)). Beginning 1952, appropriations of receipts are equal to the amount of taxes deposited in the Treasury (less refunds) under the Railroad Retirement Tax Act, and transfers are made currently subject to later adjustments (see Budget Receipts and Expenditures, Table 1). For prior years, appropriations were included here when made, but were included in Table 2 when the funds were transferred from the general fund. Beginning 1954 includes unappropriated transfers of tax receipts.

2/ Payments are made between the Railroad Retirement Account and the Federal Old Age and Survivors and the Federal Disability Insurance

trust funds so as to place those funds in the position in which they would have been if railroad employment after 1936 had been included in social security coverage (45 U.S.C. 228e (k)). See also Tables 6 and 7.

3/ Paid from the trust fund beginning 1950 (63 Stat. 297).

4/ Includes unappropriated receipts beginning fiscal year 1954.

5/ Appropriations reduced by \$19.2 million in November 1951 and \$14.7 million in August 1953 and these amounts transferred to surplus (65 Stat. 755; 67 Stat. 245).

6/ Includes adjustments to monthly statement basis.

7/ Includes adjustment due to reporting change to a collection basis.

CASH INCOME AND OUTGO

The cash income and outgo data appearing in the "Treasury Bulletin," beginning with the February 1956 issue, are on a basis consistent with receipts from and payments to the public as derived in the 1957 and subsequent Budgets of the United States, Special Analysis A. Reconciliation to cash deposits and withdrawals in the account of the Treasurer of the United States is shown on the same basis as in the Budget documents. There is also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget classifications are made available month by month. Figures for back years have been revised where necessary in order to make them as nearly comparable with the Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in earlier Budget documents as well as in the Bulletin.

The Budget series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's account. Receipts and payments include transactions both in budget accounts and in trust and deposit fund accounts. Operations of Government-sponsored enterprises are included in payments on a net basis as reflected in Treasury reports. Major intragovernmental transactions which are reported as both expenditures and receipts are eliminated from both. Noncash items which represent accrued obligations of the Government to make payments in the future are also eliminated from expenditures but are added later when actual payments are made. Receipts from the exercise of monetary authority (mostly seigniorage on silver) are excluded as not

representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Cash transactions through the Treasurer's account are similar in general concept to those included in the Budget series, but are limited in coverage to transactions which affect the balance in that account. On the other hand, they include receipts from the exercise of monetary authority, which are excluded from receipts from the public in the Budget series.

Beginning with figures for the fiscal year 1953, the series of transactions with the public is based on the "Monthly Statement of Receipts and Expenditures of the United States Government," which is compiled from reports by all collecting and disbursing officers and includes those transactions not cleared through the Treasurer's account. Cash deposits and withdrawals in the Treasurer's account, beginning with the figures for the same year, are reported in daily Treasury statements. For those years prior to 1953 both cash transactions series are based on a single source, namely, the earlier basis of daily Treasury statements which reported separate classifications for budget results, trust account transactions, etc.

Footnotes to Table 4

1/ Net operating expenditures, or receipts (-), as measured by funds provided by or applied to net security transactions reflected in Treasury reports (see Table 7). To a large extent, these Government-sponsored enterprises secure funds for their operations by direct borrowing from the public or by cashing Federal securities which they hold, and they apply the net income received from operations to repayment of borrowing from the public or to investment in Federal securities. On that basis, net expenditures for operations are shown in this table in terms of the combined net of disinvestment in Federal securities and sale of agency obligations in the market,

and net receipts from operations are shown in terms of the combined net of investment in Federal securities and redemption of agency obligations in the market.

2/ Not reported prior to 1954.

3/ See Table 7, footnote 1.

4/ Does not include revolving fund receipts representing acquired securities amounting to \$1,643,070 (par value).

ACCOUNT OF THE TREASURER OF THE UNITED STATES

Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's

account to the tax and loan account in the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depository system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1/ Consists of Treasurer's checks outstanding, reserve and other deposits of Board of Trustees of the Postal Savings System, uncollected items, exchanges, etc., beginning December 1954; prior to that time included also Post Office Department and Postmasters' disbursing accounts (see footnote 2).

2/ Beginning December 1954, Post Office Department and Postmasters'

disbursing accounts are no longer treated as liability accounts of the Treasurer of the United States, but are classified and treated in the same manner as other disbursing accounts, in accordance with the change in method of reporting Post Office transactions (see "Budget Receipts and Expenditures," Table 2). An adjustment of - \$207 million in the balance in the Treasurer's account (and in the "clearing account") reflects this change.

1/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of United States Government obligations purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.

2/ Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.

3/ Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of \$10,000 or more drawn on a special depositary bank to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date. The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed

by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal amount.

1/ Excludes guaranteed securities held by the Treasury.

2/ Total includes "Other bonds"; see Table 3.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ The annual interest charge and annual interest rate on United States savings bonds are computed on the basis of the rate to maturity applied against the amount outstanding.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between March 1935 and the end of April 1941, and Series E, F, and G were first offered in May 1941. When Series E began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redeem the bonds in cash in accordance with the original terms; to retain them with an extended maturity of 10 years at specified rates of interest accrual; or to exchange them for Series G bonds. A number of changes became effective May 1, 1952. The principal ones were: The rate of interest accrual on Series E was increased, especially for the near term, with corresponding changes in extended Series E; and Series F and G were replaced by two new issues, Series J and K, also at higher interest rates. A new current-income bond, Series H, similar in interest return to Series E, was offered beginning June 1. Details

of these changes appear in the May 1952 Bulletin, page A-1. Series F and G began to mature on May 1, 1953. For the exchange offering made to holders of these bonds maturing through December 31, 1953, see the May 1953 issue, page A-1. Sales of Series J and K were discontinued after April 30, 1957. An increase in interest rates on Series E and H was announced on April 20, 1957, retroactive to February 1. Details of the changes appear in the May 1957 Bulletin, page A-1. In the tables which follow, Series A-F and J sales are included at issue price and total redemptions and amounts outstanding at current redemption values. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured F and G bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

Source: Daily Treasury statement; Debt Analysis Staff in the Office of the Secretary.

1/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the "Treasury Bulletin."

2/ Includes exchanges of matured Series E bonds for Series G bonds beginning May 1951 and for Series K bonds beginning May 1952.

3/ Includes both matured and unmatured bonds; see Table 4.

4/ Includes total value of redemptions not yet classified between matured and unmatured bonds.

5/ A change in procedure, beginning in June 1954, for processing redeemed savings bonds has resulted in a high level of redemptions not yet classified between matured and unmatured bonds. This increase temporarily obscures the relationship between the redemption columns showing sales price and accrued discount in Tables 2 through 4 and also the relationship between the matured and unmatured sections of Table 4. (See also footnote 4). The subsequent distribution of this high

level of unclassified redemptions may be large enough in any month to show redemptions of matured bonds for a series in Table 4 which are greater than the total redemptions of that series as shown in Table 3, and to show a negative in the unmatured section of Table 4.

6/ Reductions were made in issues and redemptions of Series E, H, F, G, J, and K in July 1954 to compensate for the erroneous inclusion of reissue transactions in June 1954 as reported in the daily Treasury statement. The amounts involved were as follows: \$18 million for issues of Series E and H and \$17 million for issues of Series F, G, J, and K; and \$35 million for unclassified retirements.

7/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.

8/ Comparable data are not available prior to January 1950.

9/ Includes exchanges of Series 1941 F and G savings bonds for Treasury 3-1/4% bonds of 1978-83.

* Less than \$500,000.

1/ Not quoted on June 30, 1959.

2/ Amount issued July 2, 1959, was \$1,100 million.

3/ Amount issued July 2, 1959, was \$500 million.

4/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices are included in the history beginning October 1, 1939. Dates of high and low in case of recurrence are the latest dates.

5/ As of May 1, 1959, holders of \$473 million of the \$2,609 million of 4% notes due August 1, 1961, exercised the option to be paid off in cash on August 1, 1959.

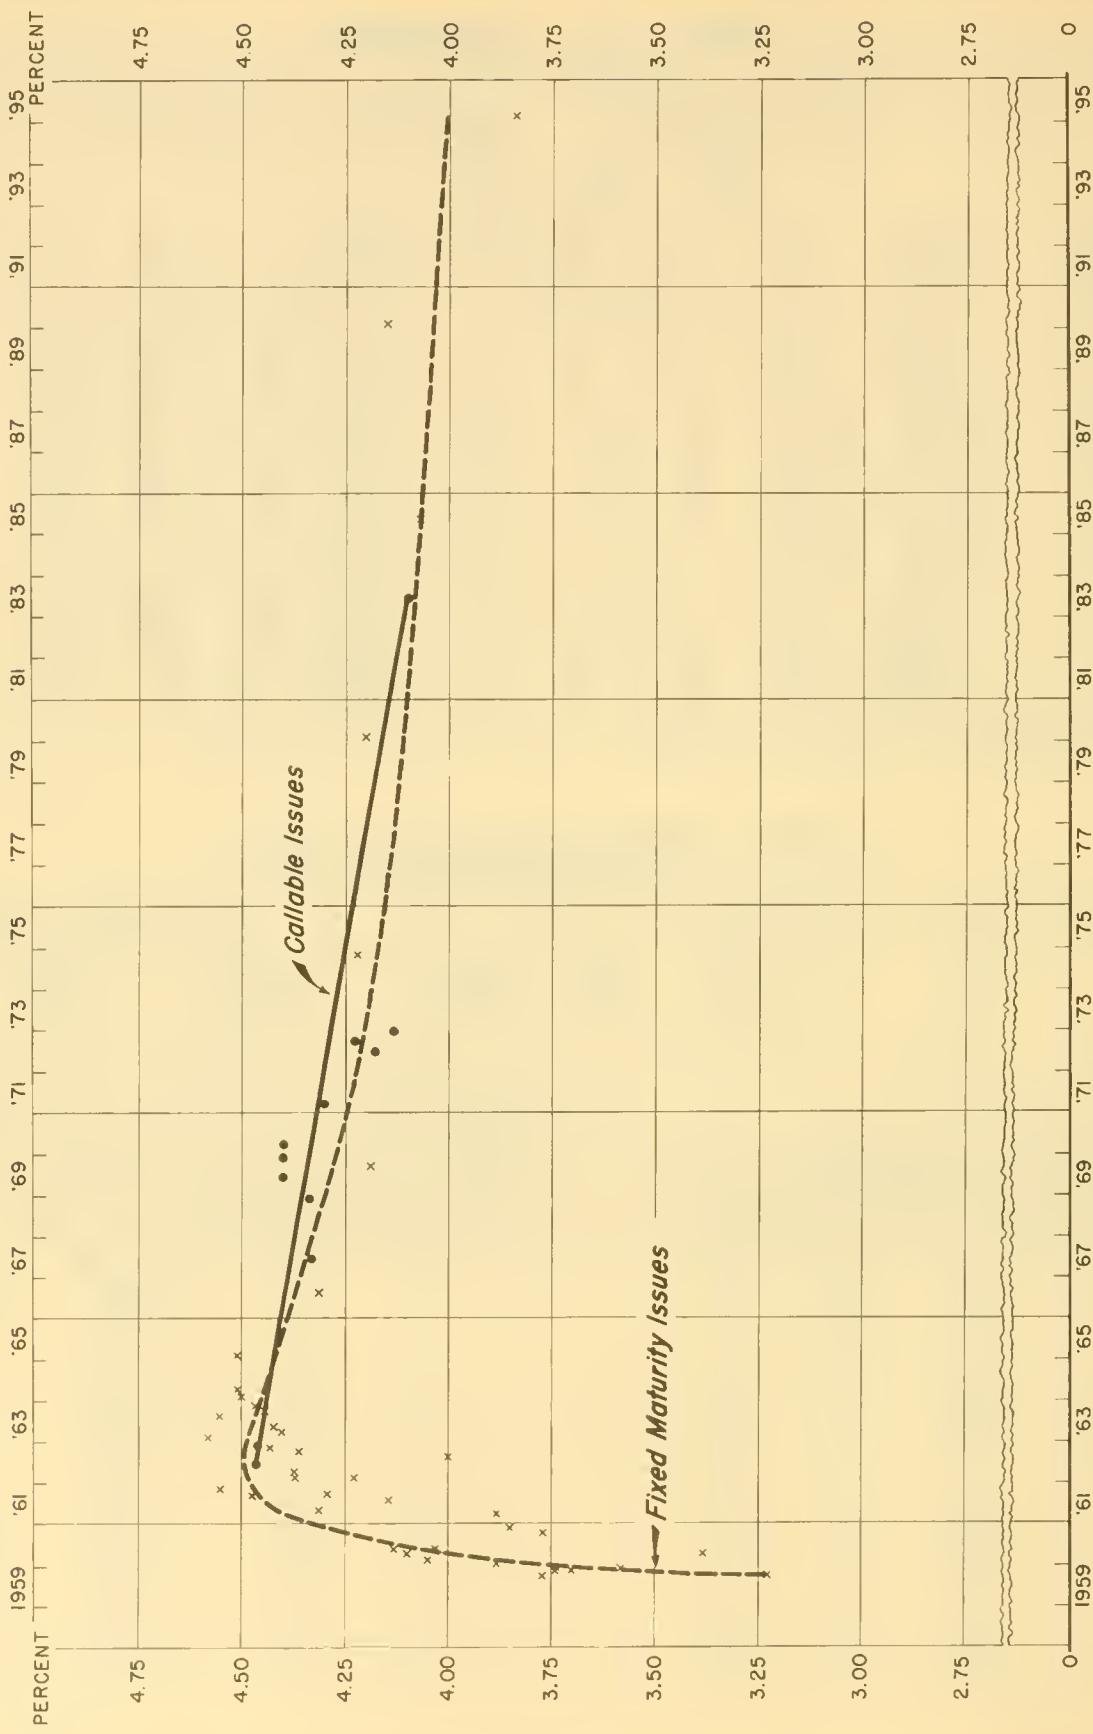

6/ Redeemable on February 15, 1960, at option of holder upon 3 months' notice.

7/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at or below.

8/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

MARKET QUOTATIONS ON TREASURY SECURITIES, JUNE 30, 1959

YIELDS OF TAXABLE TREASURY SECURITIES, JUNE 30, 1959
Based on Closing Bid Quotations

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the two classes of points are fitted by eye. Market yields on bills other than those offered the latest week end on coupon issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aaa corporate bonds. For definition of taxable bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the Bulletin.

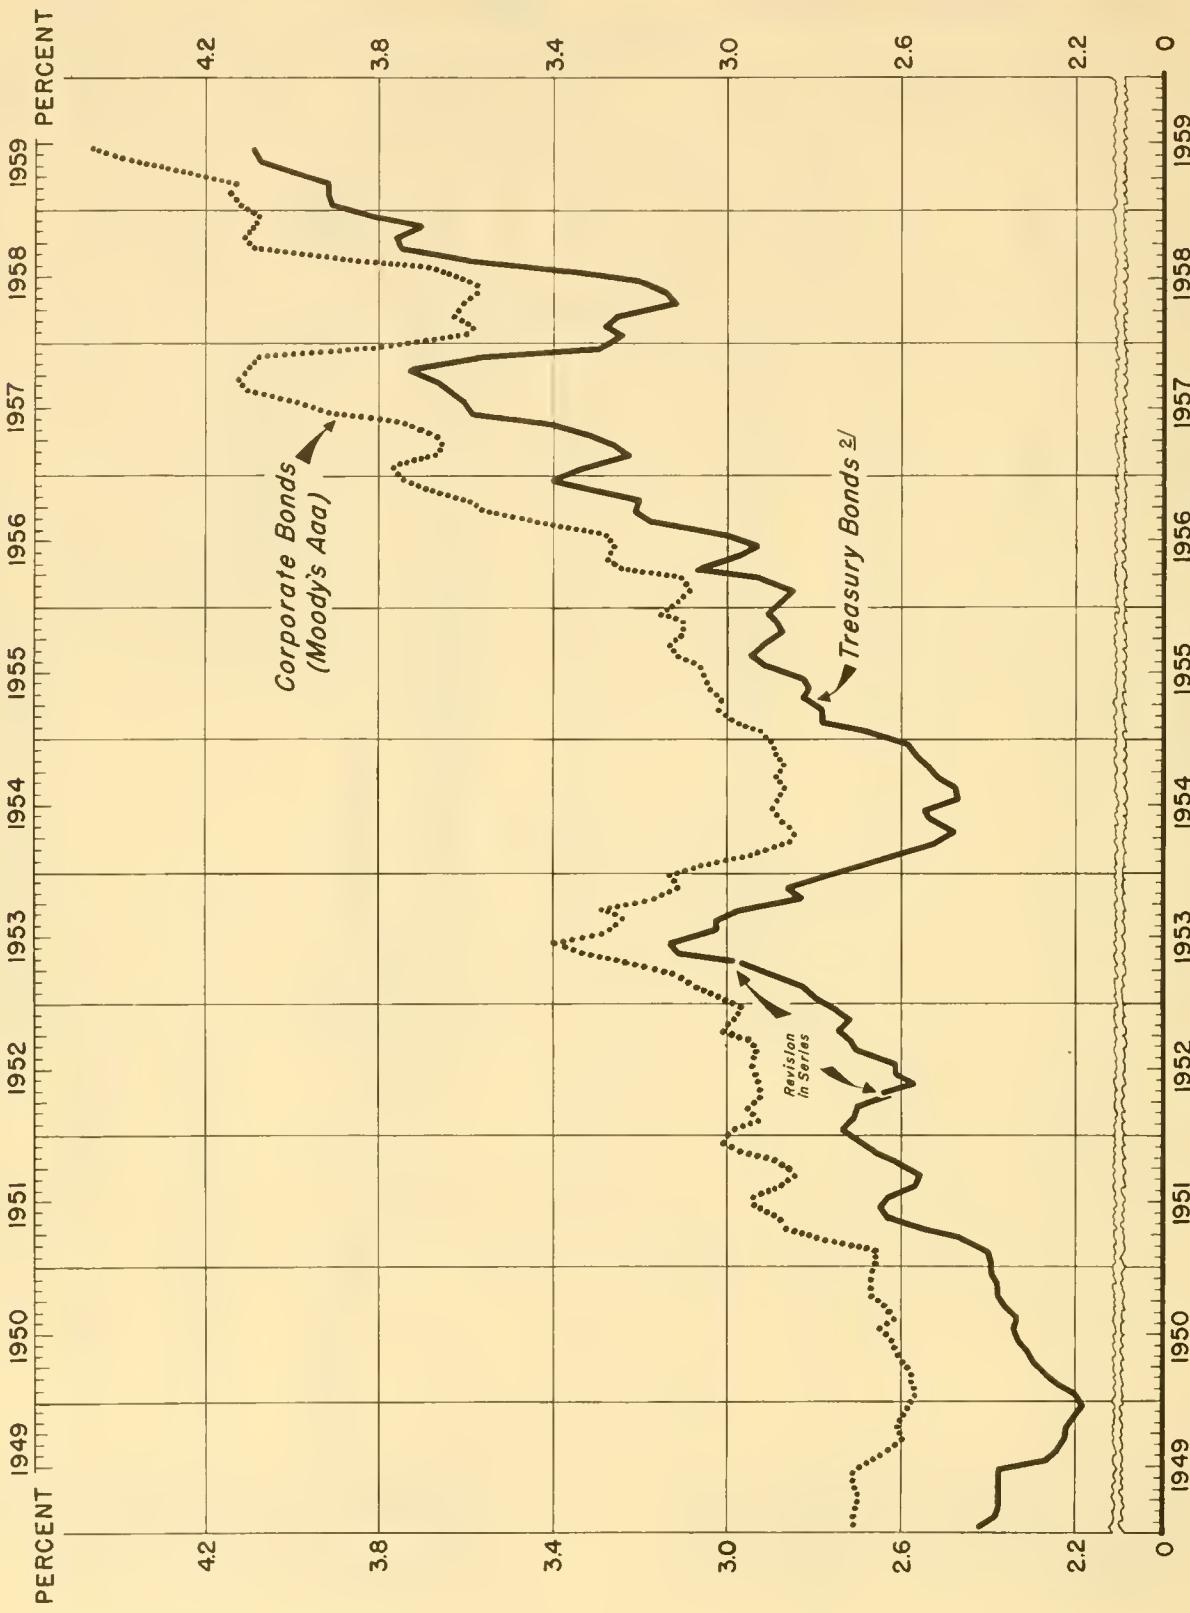

1/ Beginning April 1953, the average includes bonds neither due nor callable for 10 years; April 1952 through March 1953, the minimum length (neither due nor callable) was 12 years; October 1941 through March 1952, the minimum length was 15 years. For bonds currently in the average, see Table 4 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.

2/ A new long-term bond added to the average.

3/ An existing bond dropped from the average (see footnote 1).

Sources: Internal Revenue Service reports for detail of collections by type of tax; daily Treasury statement for budget receipts from internal revenue through the fiscal year 1952, and the monthly statement of receipts and expenditures of the Government for receipts thereafter (for explanation of reporting bases in these publications, see page II). Certain detail by type of tax is available only from returns filed with the Internal Revenue Service. The figures shown include collections for credit to special accounts for certain island possessions, as reported by the Internal Revenue Service. Beginning with the fiscal year 1955, they include the amounts of tax collected in Puerto Rico upon articles of merchandise of Puerto Rican manufacture coming into the United States. Figures for 1954 have been revised to the same basis. Figures for previous years include only amounts collected at ports of entry into the United States.

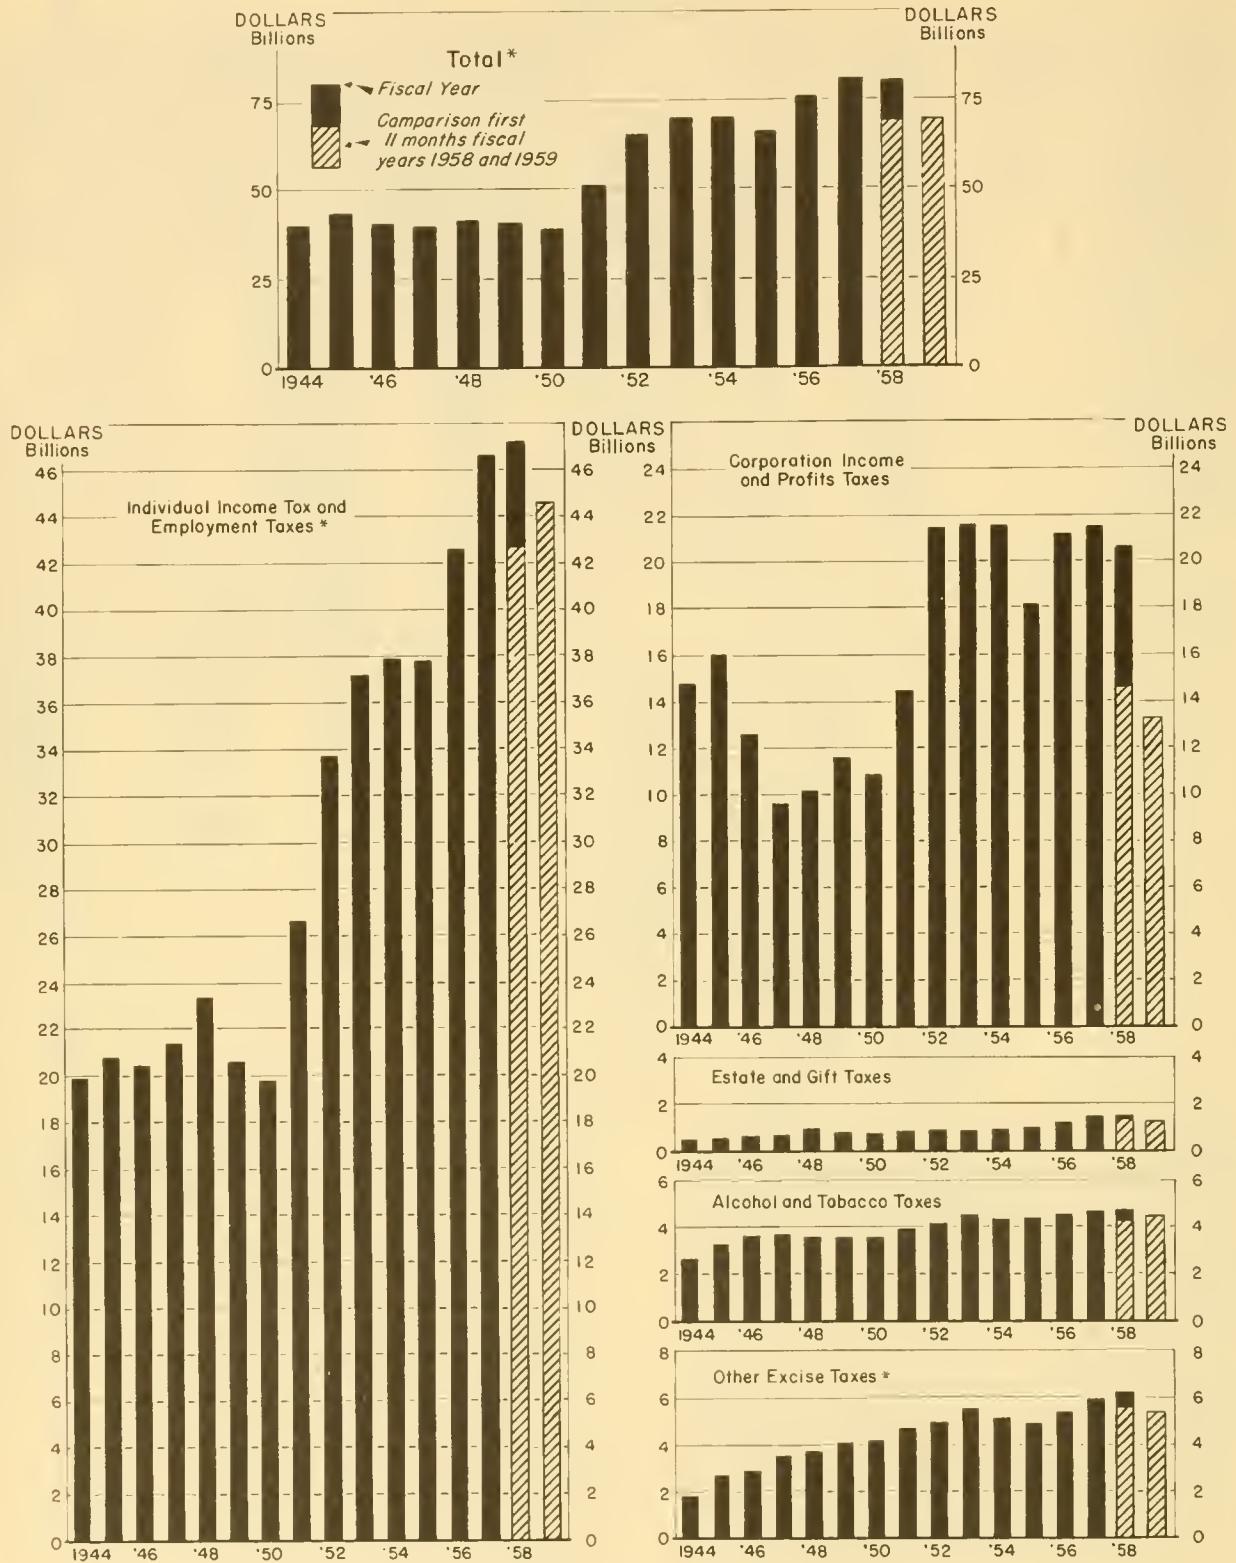

1/ Differences between the amounts of internal revenue reported by the Internal Revenue Service as collections for given periods and the amounts reported in Treasury statements as budget receipts for the same periods arose because of differences in the time when payments were included in the respective reports. Tax payments are included in budget receipts when they are reported as credits to the account of the Treasurer of the United States. Prior to July 1954, they were included in Internal Revenue Service collection reports after the returns to which they applied had been received in internal revenue offices. Under procedure begun in 1950 with withheld income tax and old-age insurance taxes and later extended to railroad retirement taxes and many excises, these taxes are paid currently into Treasury depositaries and the depositary receipts, as evidence of such payments, are attached to quarterly returns to the Internal Revenue

Service. Under this procedure, the payments are included in budget receipts in the month in which the depositary receipts are issued to the taxpayers. Revised accounting procedures effective July 1, 1954, extended the same practice to Internal Revenue Service collection reports.

- 2/ Monthly figures include social security tax on self-employment income, which is levied and collected as part of the individual income tax beginning with the taxable year 1951. Fiscal year figures exclude this tax, on the basis of estimates beginning 1952 (see footnote 3), and it is included under "Old-age and disability insurance."
- 3/ In Internal Revenue Service reports beginning January 1951, current collections have not been separated as to type of tax but the breakdown shown for fiscal years is based on estimates made in accordance with provisions of Sec. 201 of the Social Security Act, as amended (42 U.S.C. 401), for transfer of tax receipts to the trust funds (see "Budget Receipts and Expenditures," Table 1).
- 4/ Beginning with the fiscal year 1955, collections shown include undistributed depositary receipts and unapplied collections. For excise taxes these receipts are included in the total only. Total collections include "Taxes not otherwise classified."
- 5/ Budget receipts for 1956 were reduced by \$3,566 thousand representing tax collections transferred to the Government of Guam pursuant to the act approved August 1, 1950 (64 Stat. 392), but this amount was included in collections reported by the Internal Revenue Service. Beginning with 1957, such collections are excluded also in Internal Revenue Service reports.
- 6/ Detail is reported by quarters beginning with the fiscal year 1956.

CAPITAL MOVEMENTS

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information covering the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin." Supplementary information is published at less frequent intervals. Reports by banks, bankers, securities brokers and dealers, and industrial and commercial concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. Beginning April 1954, data reported by banks in the Territories and possessions of the United States are included in the published data.

The term "foreigner" as used in these reports covers all institutions and individuals domiciled outside the United States and its Territories and possessions, the official institutions of foreign countries, wherever such institutions may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 issue of the "Treasury Bulletin," pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously

published will be exactly comparable to those now presented.

The first three sections which follow are published monthly. They provide summaries, by periods and by countries, of data on short-term banking liabilities to and claims on foreigners and transactions in long-term securities by foreigners, and present detailed breakdowns of the latest available preliminary data.

Section IV provides supplementary data in six tables which appear at less frequent intervals. Table 1, short-term foreign liabilities and claims reported by non-financial concerns, is published quarterly in the January, April, July, and October issues of the Bulletin. Table 2, long-term foreign liabilities and claims reported by banks and bankers, and Table 3, estimated gold reserves and dollar holdings of foreign countries and international institutions, are published quarterly in the March, June, September, and December issues. Table 4, foreign credit and debit balances in brokerage accounts, appears semi-annually in the March and September issues. Table 5, short-term liabilities to foreigners in countries and areas not regularly reported separately by banking institutions, is presented annually, appearing in the April issue through 1958 and in the March issue thereafter. Table 6, purchases and sales of long-term securities by foreigners during the preceding calendar year, also appears annually, beginning with the May 1959 issue.
