1/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

\* Less than \$500,000.

1/ This is the net budget deficit. Excludes expenditures for retirement of public debt.

2/ This represents the increase in the gross public debt, except as noted. (See footnote 1/.)

3/ Includes Federal Old-Age and Survivors Insurance Trust Fund, Unemployment Trust Fund, Railroad Retirement Account, Government insurance and retirement funds and other trust funds.

4/ Comprises Public Works Administration revolving fund and special deposits (net). Also includes Surplus Marketing Administration commodity food stamp transactions.

5/ Includes expenditures for retirement of national bank notes.

6/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national bank notes are reflected directly against increment on gold, in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance general and special accounts for the purpose of this table.

7/ Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1935 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1935 - \$91 millions, 1936 - \$397 millions, 1937 - \$99 millions, 1938 - \$51 millions, and 1939 - \$5 millions, total - \$645 millions. The increases in the public debt shown in the table Means of Financing Cash Requirements for the above fiscal years will not agree for the reason stated above.

1/ Excludes postal savings bonds.

2/ When the price of a security is such as to result in a negative yield, the excess of price over zero yield is given in the yield column in thirty-secondes.

3/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that Treasury bond prices for the period prior to September 30, 1939 represent closing prices on the New York Stock Exchange. "When issued" prices are included beginning September 30, 1939. Dates of highs and lows, in case of recurrences, are the latest dates.

4/ Computed on mean price to call date when prices are above par; to maturity date when prices are below par.

T Taxable issues.

1/ When the price of a security is such as to result in a negative yield, the excess of price over zero yield is given in the yield column in thirty-seconds.

2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "When issued" prices are included beginning November 1, 1941. Dates of highs and lows, in case of recurring, are the latest dates.

3/ Computed on mean price to call date when prices are above par; to maturity date when prices are below par.

4/ Excludes issues completely held by Farm Credit Administration agencies.

5/ Series A is callable on 30 days' notice at 100-1/4 on May or November 16, 1942. Series B is callable on 30 days' notice at 101 on July 3, 1943; at 100-1/2 on January or July 3, 1943. "Yield" is computed to maturity or that call date which gives the lowest yield.

# YIELDS OF TREASURY BONDS AND NOTES MAR. 16, 1942

Based on Mean of Closing Bid and Asked Quotations

## Amount Outstanding

Note: For callable bonds, yields are computed to and issues plotted as of the earliest call date if the bond is selling above par, and as of the final maturity date if the bond is selling below par. The smooth curves are fitted by eye.

Dollar amounts shown in descriptions of issues are in millions.

Issues for which an exchange offer has been made and has expired are excluded.

Curves reflect the yields of taxable and partially tax-exempt bonds respectively, and of wholly tax-exempt notes.

Basis of Computation: (1) Treasury bond yields are computed on the basis of the mean of bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.
