Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Money." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Combined Statement of Receipts, Expenditures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown

in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1, 1948, and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions handled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the daily statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

Treasury Financing Operations

Offering of Notes and Bonds

An optional exchange offering of 3-1/4 percent 15-month Treasury notes and 3-3/4 percent 5½-year Treasury bonds was announced by the Treasury Department on October 27, 1960. The offering, open on October 31 through November 2, was made to holders of the 4-3/4 percent Treasury certificates of indebtedness, Series C-1960, and the 2-1/8 percent Treasury bonds of 1960, both maturing November 15. An announcement on October 12 had stated that the holders would be offered preemptive rights for exchange of new securities. Cash subscriptions were not received.

Subscriptions accepted for the two new issues totaled about \$10,313 million, leaving \$531 million to be paid in cash. Preliminary results are shown in the accompanying table.

amount becomes payable. Neither issue will be subject to call for redemption before maturity.

Both securities were made available either in bearer form with interest coupons attached or registered as to principal and interest. The notes were issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000, \$1,000,000, \$100,000,000, and \$500,000,000. The bonds were issued in denominations of \$500, \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Weekly Bills Refunded

New issues of regular Treasury bills in October totaled \$5.8 billion, refunding an equivalent volume of maturing 13-week and 26-week bills. Each new issue of 13-week bills amounted to \$1.0 billion, and of the \$1.8 billion of 26-week bills, the issues on October 6 and 13 were for \$0.5 billion and those

Source: Actual figures through the fiscal year 1952 and the calendar year 1953 are from the daily Treasury statement, and thereafter from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the Midyear Review of the 1961 Budget, released October 4, 1960, including effects of proposed legislation. More detailed information with respect to the figures on this page will be found in succeeding tables.

✓ Beginning with the September 1960 Treasury Bulletin, certain interfund transactions are excluded from both net budget receipts and budget expenditures, in accordance with the plan stated in the President's Budget Message of January 18, 1960 (see pages 2 and 5). Figures previously published for these series have been revised to the new reporting basis, except as noted. The change does not affect the budget surplus or deficit.

2/ Consists of transactions of trust and deposit funds, investment by Government agencies in public debt securities, and redemption or sale of obligations of Government agencies in the market; excess of receipts, or expenditures (-). For details of content, see page 9.

3/ For checks outstanding and telegraphic reports from Federal Reserve Banks; public debt interest accrued and unpaid beginning with June

and the fiscal year 1955 (previously included from November 1949 as interest checks and coupons outstanding); also deposits in transit and changes in cash held outside the Treasury and in certain other accounts beginning with the fiscal year 1954. Net increase, or decrease (-).

4/ For current month detail and list of sets, see section on "Statutory Debt Limitation" in each issue of the Bulletin. The limitations in effect during the period covered by this table and the date when each became effective are as follows: \$275 billion, on June 26, 1946; \$281 billion, on August 28, 1954; \$278 billion, on July 1, 1956; \$275 billion, on July 1, 1957; \$280 billion, on February 26, 1958; \$288 billion, on September 2, 1958; \$290 billion, on June 30, 1959; and \$295 billion, on July 1, 1959. From July 1, 1960 through June 30, 1961, the limit is \$293 billion. Thereafter it will revert to \$285 billion.

5/ Transactions of the Foreign Economic Cooperation Trust Fund, established under Section 114 (f) of the Economic Cooperation Act of 1948 (62 Stat. 150), are consolidated with budget expenditures.

6/ Figures for calendar years are not yet revised to exclude interfund transactions (see footnote 1).

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases see page II); estimates are from the Midyear Review of the 1961 Budget, released October 4, 1960, including effects of proposed legislation.

^{1/} The distribution of receipts between individual income taxes and old-age and disability insurance taxes is made in accordance with provisions of Sec. 201 of the Social Security Act, as amended (42 U.S.C. 401), for transfer to the Federal Old-Age and Survivors Insurance Trust Fund (see footnote 9), and also for transfer to the Federal Disability Insurance Trust Fund (see footnote 10).

^{2/} Tax on employers and employees under the Federal Insurance Contributions Act, as amended (26 U.S.C. 3101-3125), and tax on self-

employed individuals under the Self-Employment Contributions Act, as amended (26 U.S.C. 1401-1403). The Social Security Act Amendments of 1956, approved August 1, 1956, increased the rates of tax applicable to wages paid and taxable years beginning after December 31, 1956, to provide for disability insurance.

^{3/} Taxes on carriers and their employees under the Railroad Retirement Tax Act, as amended (26 U.S.C. 3201-3233).

^{4/} Tax on employers of 4 or more under the Federal Unemployment Tax Act, as amended (26 U.S.C. 3301-3308); with respect to services performed before January 1, 1956, the tax was imposed on employers of 8 or more.

Source: Actual figures are from reports to the Treasury Department by disbursing officers, on the monthly statement reporting basis (see page II); estimates are from the Midyear Review of the 1961 Budget, released October 4, 1960, including effects of proposed legislation.

1/ Consists of miscellaneous taxes (principally the tonnage tax on foreign vessels entering U. S. ports), bullion charges, and gifts and contributions.

2/ Difference between the total shown in the monthly statement of receipts and expenditures of the Government (based on preliminary

reports) and that from final accounts of disbursing officers.

3/ In 1953, taxes collected in Puerto Rico on products of Puerto Rican manufacture coming into the United States, amounting to \$16 million, are classified as miscellaneous budget receipts; thereafter, such collections are included in Internal Revenue collections of excise taxes.

* Less than \$500,000.

n.a. Not available.

Footnotes to Table 1 - (Continued)

- 6/ In the 1961 Budget document, Special Analysis G, taxes not otherwise classified are included in miscellaneous receipts.
- 7/ Beginning 1957, includes collections under increased rates in the Highway Revenue Act of 1956 (see footnote 13).
- 8/ Figures shown include (see footnote 9) decreases in income tax of \$98 million withheld and \$4 million not withheld and increases in transfers of \$90 million to Federal Old-Age and Survivors Insurance Trust Fund and \$11 million to Federal Disability Insurance Trust Fund.
- 9/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury (42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration. The amount of old-age insurance tax refunds is reimbursed to the general fund by the trust fund.
- 10/ The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 (42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
- 11/ Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscal year (65 Stat. 222 and 66 Stat. 371) and transfers are made currently. Figures for 1953 and 1954 exclude the Government's contribution for creditable military service (45 U.S.C. 228c-1 (n)).
- 12/ The Employment Security Act of 1960, approved September 13, 1960 (74 Stat. 970) established in the Unemployment Trust Fund an administration account, and appropriated for credit to that account, beginning with

the fiscal year 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transferred currently on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account are to be paid the administrative expenses of the employment security program. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures. Refunds of taxes are to be reimbursed from the administration account.

13/ The Highway Revenue Act of 1956, approved June 29, 1956 (23 U.S.C. 120, Note) established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expenditures after June 30, 1956, and before July 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. The use tax was imposed by the act and rates were increased for the other taxes. Previous to the fiscal year 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures.

14/ Interest on refunds is included in expenditures in Table 4.

15/ For content, see Table 3. These transactions are included in the detail of both budget receipts and budget expenditures, but are deducted from the totals in accordance with the reporting procedure outlined in the President's Budget Message of January 18, 1960 (see Reporting Bases, p. II).

16/ Figures in this column differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 15).

17/ Transfers reduced by \$300 million to correct those made earlier on basis of estimates (see footnote 9).

18/ Net of reimbursement of \$89 million from the Federal Old-Age and Survivors Insurance and Federal Disability Insurance trust funds.

* Less than \$500,000.

Footnotes to Table 4 - (Continued)

Footnotes 1 through 3 follow Table 4 on page 5.

4/ The 1959 figures in the Bulletin differ from those in the 1961 Budget document because of a reclassification in the latter by which military assistance under the Mutual Security program in the amount of \$2,340 million is shifted from "Funds appropriated to the President" to "Defense Department, military functions," and \$8 million is shifted from "State Department" to "Funds appropriated to the President."

5/ Beginning 1955, consists of net expenditures of the Postal Fund, reflecting the change in classification of Post Office transactions to a public enterprise revolving fund basis.

6/ Reported on an accrual basis effective June 30, 1955.

7/ Consists of Federal payment and loans and advances.

8/ For content, see Table 3. These transactions are included in the detail of both budget receipts and budget expenditures, but are deducted from the totals in accordance with the reporting procedure outlined in the President's Budget Message of January 18, 1960 (see Reporting Bases, p. II).

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the Midyear Review of the 1961 Budget, released October 4, 1960, including effects of proposed legislation. Revolving fund expenditures are included net.

Note: Figures in this table are for agencies as constituted at the time the expenditures were made, and therefore do not necessarily represent functions which are comparable over a period of time. For expenditures by functions on a consistent basis, see Table 6. Agency shifts are reflected in this table as follows: Beginning 1955, Federal Home Loan Bank Board from "Housing and Home Finance Agency" to "Independent offices," and Reconstruction Finance Corporation as indicated in footnote 1; beginning 1957, Alaska Road Construction from "Interior Department" to "Commerce Department," and Federal intermediate credit banks and production credit corporations as indicated in footnote 2; beginning 1958, Federal Facilities Corporation (remaining functions) from "Treasury Department" to "General Services Administration," and Informational Media Guaranty Fund from "Funds appropriated to the President" to "Independent offices"; beginning 1959, Federal Civil Defense Administration from "Independent offices" to "Executive Office of the President", and the former Civil Aeronautics Administration and the Civil Aeronautics Board from "Commerce Department" to "Independent offices"; beginning 1960, military assistance from "Funds appropriated to the President"

to "Defense Department, military," pursuant to budgeting instructions in the Mutual Security Act of 1959, approved July 24, 1959 (22 U.S.C. 1813).

1/ Reconstruction Finance Corporation is included under "Independent offices" through 1954, and under "Treasury Department" beginning 1955, except functions transferred to Export-Import Bank, Federal National Mortgage Association, General Services Administration, and Small Business Administration. The corporation was abolished at the close of June 30, 1957, by Reorganization Plan No. 1 of 1957, and its remaining functions were transferred to the Housing and Home Finance Administrator, Administrator of General Services, Administrator of Small Business Administration, and Secretary of the Treasury.

2/ Effective January 1, 1957, the production credit corporations were merged in the Federal intermediate credit banks, pursuant to the Farm Credit Act of 1956, approved July 26, 1956 (12 U.S.C. 1027), and operations of the merged agencies (as mixed-ownership corporations) were classified as trust enterprise funds (see "Trust Account and Other Transactions," Table 3); previously the operations of the banks and the corporations, respectively, were classified as public enterprise funds and were included net in budget expenditures.

3/ Beginning 1957, Federal aid for highways is excluded from budget expenditures and included in trust account expenditures (see Table 1). Remaining footnotes on page 4.

Source: Bureau of Accounts. Details for the current fiscal year to date are shown in Bureau of Accounts report "Budgetary Appropriations and Other Authorizations, Expenditures and Unexpended Balances".

1/ These preliminary balances shown as of July 1, 1960, are the latest available at this time. They are based on preliminary reports from the agencies and are subject to later adjustments as additional information is received, preparatory to the closing of the central accounts in the Treasury for fiscal year 1960. Among the areas subject to later adjustment are the following: certain overseas transactions not yet included; the write-offs or withdrawals of unobligated balances no longer available, since agency reports covering these transactions are not required by law to be submitted until September 30 (the write-offs in the fiscal year 1959 amounted to \$412 million); certain indefinite appropriations included on the basis of Budget estimates instead of

final figures; other transactions, including those relating to (a) authorizations to expend from debt receipts, (b) contract authorizations, (c) investment in public debt securities, and (d) restorations and reappropriations, which may require adjustments on the basis of final reports from the agencies. Includes same categories as shown at end of current period.

2/ Although not expended, a substantial portion of these amounts is obligated for outstanding purchase orders and contracts for equipment and supplies, for payroll, and for similar items.

3/ Includes reappropriations.

4/ Consists of authorizations by law for Government-owned enterprises to borrow (1) from the Treasury (to expend from public debt receipts), or (2) from the public (to expend from debt receipts).

They are classified in accordance with the classification used in the 1961 Budget document, Special Analysis G, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in the Special Analysis. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.

1/ State unemployment funds; used for benefit payments mainly.

2/ Employment Security Administration Fund, established by the Employment Security Act of 1960, approved September 13, 1960 (74 Stat. 970), into which are deposited tax receipts transferred in accordance with the act (see "Budget Receipts and Expenditures," Table 1, footnote 12) and from which are paid the administrative expenses of the employment security program and reimbursement for tax refunds. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures, and only the excess of receipts over expenditures, if any, was transferred to the trust account by appropriation. Receipts consist of appropriated and unappropriated transfers of tax collections. The Federal unemployment tax allows to the taxpayer credit for contributions to State unemployment funds up to 90 percent of the Federal tax.

2/ Excess of collections from Federal unemployment tax over expenditures for benefits and administrative expenses each year is deposited in this account to maintain a reserve of \$200 million available for loans to States when needed to replenish the balances in their accounts in the trust fund. Beginning 1961, these transfers are from the administration fund in the trust account; previously they were from the general fund. Any remaining excess is credited to the State accounts. (42 U.S.C. 1101 - 1103).

4/ For payment of benefits and refunds (45 U.S.C. 360). Figures exclude interim advance of \$15 million from the Treasury and subsequent repayment, both in 1940.

5/ Contributions under the Railroad Unemployment Insurance Act of 1938, as amended (45 U.S.C. 360 (a)), in excess of the amount specified for administrative expenses (see footnote 8).

CASH INCOME AND OUTGO

The cash income and outgo data appearing in the Treasury Bulletin, beginning with the February 1956 issue, are on a basis consistent with receipts from and payments to the public as derived in the 1957 and subsequent Budgets of the United States, Special Analysis A. Reconciliation to cash deposits and withdrawals in the account of the Treasurer of the United States is shown on the same basis as in the Budget documents. There is also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget classifications are made available month by month. Figures for back years have been revised where necessary in order to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in earlier Budget documents as well as in the Bulletin.

The Budget series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's account. Receipts and payments include transactions both in budget accounts and in trust and deposit fund accounts. Operations of Government-sponsored enterprises are included in payments on a net basis as reflected in Treasury reports.

Major intragovernmental transactions which are reported as both expenditures and receipts are eliminated from both. Noncash items which represent accrued obligations of the Government to make payments in the future are also eliminated from expenditures but are added later when actual payments are made. Receipts from the exercise of monetary authority (mostly assignorage on silver) are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Cash transactions through the Treasurer's account are similar in general concept to those included in the Budget series, but are limited in coverage to transactions which affect the balance in that account. On the other hand, they include receipts from the exercise of monetary authority, which are excluded from receipts from the public in the Budget series.

Source: Actual figures are based on the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the Midyear Review of the 1961 Budget, released October 4, 1960, including effects of proposed legislation.

^{1/} Figures in this column differ from those published prior to the September 1960 Treasury Bulletin because of the exclusion of a few additional items of budget receipts which are also budget expenditures (see tables 3 and 4).

CASH INCOME AND OUTGO**Footnotes to Table 3**

- 1/ All previously published figures were revised in the September 1960 Bulletin to take account of the deduction of certain interfund transactions from both net budget receipts and budget expenditures, to accord with the new reporting procedure outlined in the President's Budget message of January 18, 1960, (see pages 2 and 5). Formerly such transactions were included in the intragovernmental transactions which were deducted in deriving receipts from and payments to the public.
- 2/ Treated as noncash refund deductions from receipts when issued and as cash refund deductions when redeemed.
- 3/ Consists of seigniorage and the increment resulting from reduction in the

weight of the gold dollar; excluded from receipts from the public but included in cash deposits in the Treasurer's account.

4/ Figures in this column differ from those published prior to the September 1960 Treasury Bulletin because a few additional items of budget receipts which are also budget expenditures are included in the interfund transactions deducted from budget receipts and budget expenditures (see footnote 1).

* Less than \$500,000.
p Preliminary.

Footnotes to Table 4

- 1/ See footnote 1 to Table 3.
- 2/ Net operating expenditures, or receipts (-), as measured by funds provided by or applied to net security transactions reflected in Treasury reports (see Table 7). To a large extent, these Government-sponsored enterprises secure funds for their operations by direct borrowing from the public or by cashing Federal securities which they hold, and they apply the net income received from operations to repayment of borrowing from the public or to investment in Federal securities. On that basis, net expenditures for operations are shown in this table in terms of the combined net of disinvestment in Federal securities and sale of agency obligations in the market, and net

receipts from operations are shown in terms of the combined net of investment in Federal securities and redemption of agency obligations in the market.

3/ See footnote 4 to Table 3.

4/ Not reported prior to 1954.

5/ See footnote 1 to Table 7.

6/ Does not include revolving fund receipts representing acquired securities amounting to \$1,643,070 (par value).

p Preliminary.

Footnotes to Table 5

- 1/ Includes reimbursement by Federal Old-Age and Survivors Insurance Trust Fund and Federal Disability Insurance Trust Fund for administrative expenses, and beginning with 1959 for refunds of taxes (treated as an offset to refunds rather than being credited to receipts); reimbursement by Highway Trust Fund for refunds of taxes; reimbursement by the District of Columbia; payment of dividends, interest, etc., by Federal National Mortgage Association's secondary market operations; and Federal intermediate credit bank franchise tax and repayment of capital stock to the Treasury after December 1956 and before January 1959.
- 2/ Consists of payment of franchise tax by banks for cooperatives beginning 1955, and also by Federal intermediate credit banks beginning January 1959.
- 3/ Includes relatively small amounts of deductions from salaries paid by trust funds and Government-sponsored enterprises. Beginning with fiscal year 1958 excludes deductions from salaries of District of Columbia employees (see footnote 5), and beginning with fiscal year 1959 excludes voluntary contributions.
- 4/ Consists of payments to employees' retirement funds representing United States and Government corporation shares of contributions; payments to the Railroad Retirement Account (for creditable military service), the

Unemployment Trust Fund, veterans' life insurance funds, Judicial Survivors Annuity Fund, trust fund for technical services and other assistance under the agricultural conservation program, and District of Columbia; and awards of Indian Claims Commission.

- 5/ Includes payment by District of Columbia to the Civil Service retirement fund for its share of contributions, and beginning with 1958 also deductions from its payroll; financial adjustments among Railroad Retirement Account, Federal Old-Age and Survivors Insurance Trust Fund, Federal Disability Insurance Trust Fund, and Unemployment Trust Fund; transfers from Civil Service retirement fund to Foreign Service retirement fund from 1955 through 1957; and transfers from Railroad Unemployment Insurance Administration Fund to Unemployment Trust Fund through 1955.
- 6/ Figures in this column differ from those previously published because budget receipts which are also budget expenditures are no longer included; see Tables 3 and 4.

* Less than \$500,000.
p Preliminary.

Footnotes to Table 6

- 1/ Accrued discount on savings bonds and bills less interest paid on savings bonds and bills redeemed.
- 2/ Public debt interest due and accrued beginning June 30, 1955, effective date of the change in accounting and reporting from a due and payable basis to an accrual basis; for 1954, consists only of public debt interest checks and coupons outstanding; net increase, or decrease (-). Not reported as a separate clearing account prior to 1954.
- 3/ Treated as noncash expenditures at the time of issuance of the securities and as cash expenditures at the time of their redemption; net issuance, or redemption (-).
- 4/ Issued in 1936 in exchange for adjusted service certificates held by veterans of World War I. The bonds matured in 1945.
- 5/ Issued in 1947 in payment for accumulated leave. The last of these bonds matured in 1951.

6/ Part of the United States subscription to the capital of the International Monetary Fund was paid in the form of noninterest-bearing nonnegotiable notes payable on demand (see 1947 Annual Report of the Secretary of the Treasury, pages 48, 350, and 385). In June 1959 \$1,031 million of notes were issued as part of the additional United States subscription to the Fund authorized by an act approved June 17, 1959 (see "Budget Receipts and Expenditures," Table 4, footnote 10).

- 7/ Checks outstanding less deposits in transit, and changes, in other accounts; net increase, or decrease (-). For 1953 includes also public debt interest due and unpaid (see footnote 2).

* Less than \$500,000.
p Preliminary.

Footnotes to Table 7

- 1/ In this table, beginning 1954, in accordance with treatment in Budget documents, net investment in United States securities by Government-sponsored enterprises includes a small amount by other enterprises regarded as representing net transactions with the public. In Table 4 under "Trust Account and Other Transactions," these amounts are included in trust and deposit fund account investment.
- 2/ Does not include investments representing acquired securities amounting to \$1,643,070 (par value) and donation of securities amounting to \$45,800 (par value).
- 3/ Accrued discount on savings bonds and bills, which is included in the principal of the public debt, less interest paid on savings bonds and bills redeemed.

4/ Treated as noncash transactions at the time of issuance and as cash transactions at the time of redemption; net issuance, or redemption (-).

5/ Excluded from borrowing because the transactions are treated as expenditures in Table 6.

6/ Excluded from borrowing because the transactions are treated as deductions from receipts in Table 3.

7/ Market transactions in public debt securities and agency obligations.

ACCOUNT OF THE TREASURER OF THE UNITED STATES

Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's

account to the tax and loan account in the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depository system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1/ Consists of Treasurer's checks outstanding, reserve and other deposits of Board of Trustees of the Postal Savings System, uncollected items, exchanges, etc., beginning December 1954; prior to that time included also Post Office Department and Postmasters' disbursing accounts (see footnote 2).

2/ Beginning December 1954, Post Office Department and Postmasters'

disbursing accounts are no longer treated as liability accounts of the Treasurer of the United States, but are classified and treated in the same manner as other disbursing accounts, in accordance with the change in method of reporting Post Office transactions (see "Budget Receipts and Expenditures," Table 4). An adjustment of - \$207 million in the balance in the Treasurer's account (and in the "clearing account") reflects this change.

^{1/} Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of United States Government obligations purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.^{2/} Taxes eligible for credit consist of those deposited by taxpayers in the depository banks, as follows: Withheld income tax beginning March

1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1, 50, and under the Rail road Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.

^{3/} Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of \$10,000 or more drawn on a special depository bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for the total, or for any

group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount.

Prior to that date it was based on the coupon rate for all issues. 1/ Includes only guaranteed securities held outside the Treasury.

2/ Total includes "Other bonds"; see Table 3.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

Subscriptions for \$25,000 or less from savings-type investors and commercial banks, and for \$10,000 or less from all others, were allotted in full. Subscriptions for more than these minimums were allotted not less than the minimums. In addition, \$90 million of the bonds were allotted to Government investment accounts.

Subscriptions from all other investors totaled \$2,433 million and were allotted 5 percent, but not less than \$1,000 on any one subscription. In addition, \$100 million of the notes were allotted to Government investment accounts.

- Savings-type investors were given the privilege of paying for the bonds in installments up to June 15, 1960 (not less than 40 percent by April 14, the delivery date; 70 percent by May 15; and full payment by June 15). In addition to the amounts allotted to the public, \$100 million of the bonds were allotted to Government investment accounts.
- Subscriptions for \$100,000 or less were allotted in full. Subscriptions for more than \$100,000 were allotted 30 percent but in no case less than \$100,000. In addition, \$27.4 million of the notes were allotted to Government investment accounts.

- Subscriptions were permitted to be made with payment offered in cash or in 4-3/4% Treasury notes maturing August 15, 1960 (see Table 6, footnote 21). In addition in order that holders of 3-5/8% Federal National Mortgage Association notes maturing August 23, 1960, might have an opportunity to reinvest the proceeds, the Secretary of the Treasury, in behalf of the Association, offered to purchase such notes on August 15, 1960, at par and accrued interest to the extent that such subscriptions were allotted and the proceeds from the par amount of the notes were applied to payment, in whole or in part, for the new securities.
- Combined total includes \$80 million allotted on subscriptions from holders of the Federal National Mortgage Association notes maturing August 23, 1960 (see footnote 44).
- Consists of allotments on subscriptions from holders of Treasury notes maturing August 15, 1960.

Note: In these tables Series A-F and J sales are included at issue price and redemptions and amounts outstanding at current redemption values. Series G, H, K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured F and G bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Sales and redemptions figures include exchanges of minor amounts of (1) matured series E bonds for series G and K bonds from May 1951 through April 1957 and (2) series F and J bonds for series H bonds beginning January 1960; however, they exclude exchanges of series E bonds for series H bonds, which are reported in Table 3.

2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.

3/ Includes both matured and unmatured bonds; see Table 4.

4/ Includes total value of redemptions not yet classified between sales price and accrued discount.

5/ A change in procedure, beginning in June 1954, for processing redeemed savings bonds has resulted in a high level of redemptions not yet classified by yearly series of issue. This increase temporarily obscures the relationship between the redemption columns showing sale price and accrued discount in Tables 2 and 3 and also the

relationship between the matured and unmatured sections of Table 4. (See also footnote 4). The subsequent distribution of this high level of unclassified redemptions may be large enough in any month to show redemptions of matured and unmatured bonds in Table 4 which are greater than the total redemptions for that month.

6/ Reductions were made in issues and redemptions of Series E, H, F, G, J, and K in July 1954 to compensate for the erroneous inclusion of reissue transactions in June 1954 as reported in the daily Treasury statement. The amounts involved were as follows: \$18 million for issues of Series E and H and \$17 million for issues of Series F, G, J, and K; and \$35 million for unclassified retirements.

7/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.

8/ Includes the December 1959 exchanges of series 1948 F and G bonds for 4-3/4% marketable notes of which \$692 million were reported in December 1959, \$51 million in January 1960, and \$3 million in February 1960.

9/ Represents changes in the amounts of redemptions not yet classified as between matured and unmatured issues.

10/ Includes exchanges of Series 1941 F and G savings bonds for Treasury 3-1/4% bonds of 1978-83.

* Less than \$500,000.

1/ Consists of purchases or sales made by the Treasury of securities issued or guaranteed by the U. S. Government for (1) trust funds which by law are under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain U. S. Government agencies whose investments are handled through the facilities of the Treasury Department. It will be noted that these

transactions differ from those reflected in Table 1 because they exclude those Government investment accounts for which investments are not handled by the Treasury. Table 2 also includes purchases under Section 19 of the Second Liberty Bond Act, as amended (31 U.S.C. 754a), and excludes the Exchange Stabilization Fund.

- 1/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices are included in the history beginning October 1, 1939. Dates of highs and lows in case of recurrence are the latest dates.
- 2/ Of the \$1,000 million 4% notes of August 15, 1962, outstanding on October 31, 1959, \$1,684 million were exchanged for the 4-7/8% notes of November 15, 1963, and \$159 million were presented for stamping for redemption on February 15, 1960, leaving \$158 million to mature August 15, 1962.
- 3/ Amount outstanding includes an additional issue of \$746 million on December 15, 1959, accepted in exchange for F and G savings bonds due to mature in 1960.
- 4/ Following the advance refunding offer announcement dated June 6, 1960, relative to the 2-1/2% bond of November 15, 1961, outstanding in the amount of \$11,177 million, \$3,893 million were exchanged for 3-3/4% notes of May 15, 1964, and \$320 million for 3-7/8%

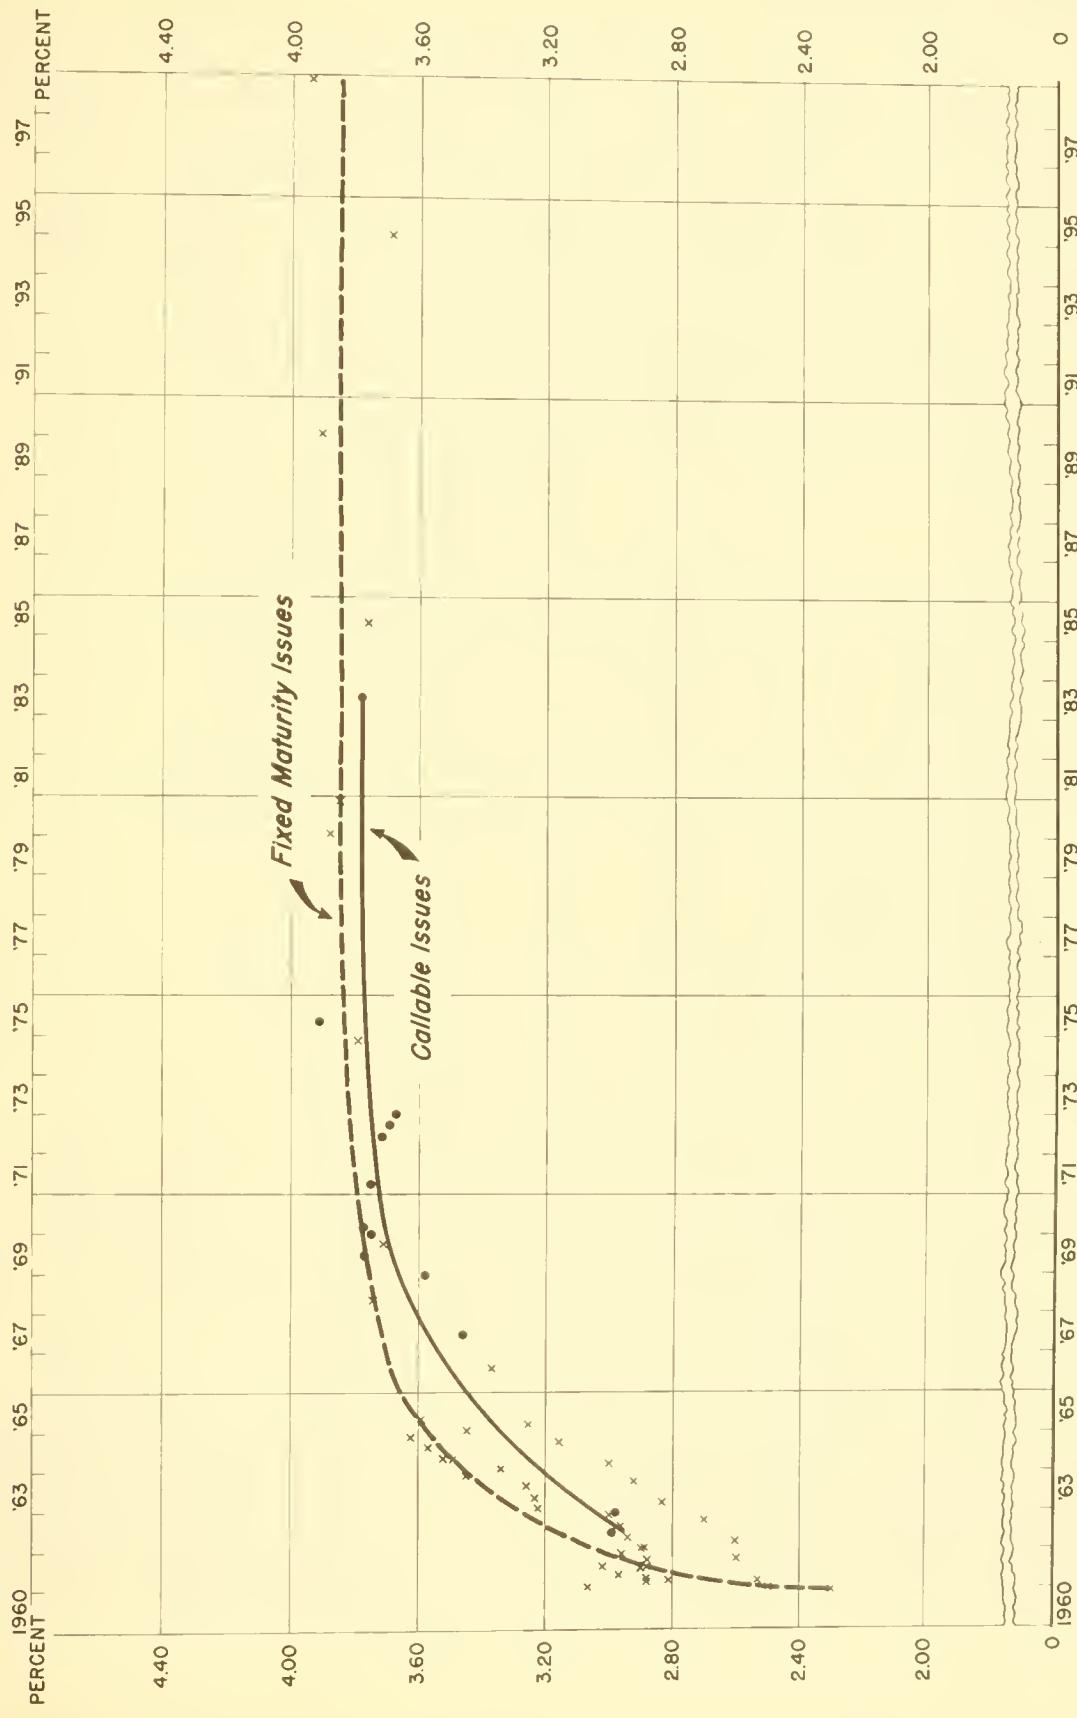

bonds of May 15, 1968. As a result of a later offering, an additional amount of \$1,070 million of 3-7/8% bonds of May 15, 1968, were issued. See "Debt Operations", Table 6.

- 5/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.
- 6/ Not quoted on September 30, 1960.
- 7/ The following exchanges resulted from the advance refunding offer dated September 9, 1960: \$44 million of the 2-1/2% bonds of June 15, 1962-67, for 3-1/2% bonds of November 15, 1980; \$93 million of the 2-1/2% bonds of December 15, 1963-68, for 3-1/2% bonds of February 15, 1990 (an additional issue of an existing bond); and a total of \$1,343 million of the 2-1/2% bonds of June 15, 1964-69, and December 15, 1964-69, for 3-1/2% bonds of November 15, 1998. The issue date for the new and additional issues was October 3, 1960. See "Debt Operations", Table 6.

- 8/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

MARKET QUOTATIONS ON TREASURY SECURITIES, SEPTEMBER 30, 1960

YIELDS OF TAXABLE TREASURY SECURITIES, SEPT. 30, 1960
 Based on Closing Bid Quotations

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the two classes of points are fitted by eye. Market yields on regular weekly bills other than those offered the latest week and on maturing coupon issues for which an exchange offer has been made or which are due in less than 3 months are excluded.

Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aaa corporate bonds. For definition of taxable bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the Bulletin.

1/ Beginning April 1953, the average includes bonds neither due nor

callable for 10 years; April 1952 through March 1953, the minimum length (neither due nor callable) was 12 years; October 1941 through March 1952, the minimum length was 15 years. For bonds currently in the average, see Table 4 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.

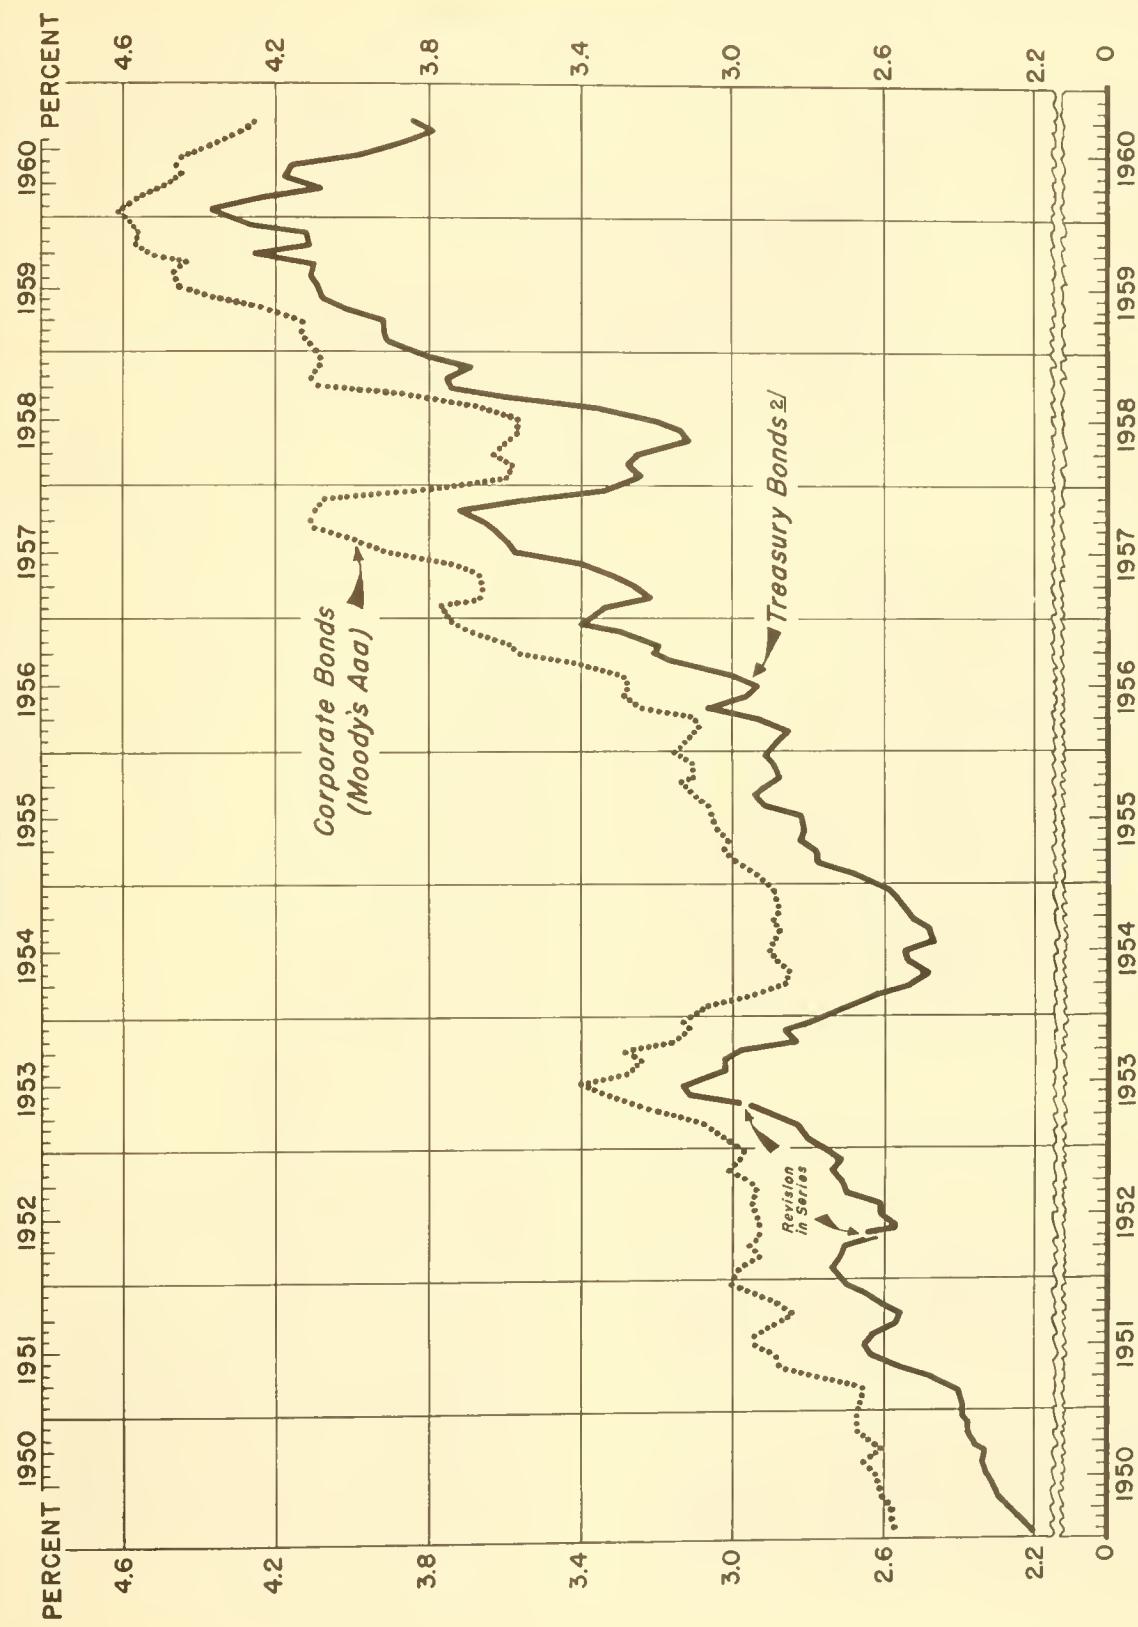

2/ One or more new long-term bonds added to the average.

3/ An existing bond dropped from the average (see footnote 1).

4/ Market closed.

Source: Internal Revenue Service reports for detail of collections by type of tax; monthly statement of receipts and expenditures of the Government for budget receipts from internal revenue (for explanation of reporting bases in this publication, see page 11). Certain detail by type of tax is available only from returns filed with the Internal Revenue Service. The figures shown include collections for credit to special accounts for certain island possessions, as reported by the Internal Revenue Service. Beginning with the fiscal year 1955, they include the amounts of tax collected in Puerto Rico upon articles of merchandise of Puerto Rican manufacture coming into the United States. Figures for 1954 have been revised to the same basis, but those for 1953 include only amounts collected at ports of entry into the United States.

1/ Differences between the amounts of internal revenue reported by the Internal Revenue Service as collections for given periods and the amounts reported in Treasury statements as budget receipts for the same periods arose because of differences in the time when payments were included in the respective reports. Tax payments are included in budget receipts when they are reported as credits to the account of the Treasurer of the United States. Prior to July 1954, they were included in Internal Revenue Service collection reports after the returns to which they applied had been received in internal revenue offices. Under procedure begun in 1950 with withheld income tax and old-age insurance taxes and later extended to railroad retirement taxes and many excises, these taxes are paid currently into Treasury depositories and the depositary receipts, as evidence of such payments, are attached to quarterly returns to the Internal Revenue Service.

Under this procedure, the payments are included in budget receipts in the month in which the depositary receipts are issued to the taxpayers. Revised accounting procedures effective July 1, 1954, extended the same practice to Internal Revenue Service collection reports.

2/ Monthly and fiscal year 1960 figures include social security tax on self-employment income, which is levied and collected as part of the individual income tax. Prior fiscal year figures exclude this tax, on the basis of estimates (see footnote 3), and it is included under "Old-age and disability insurance."

3/ In Internal Revenue Service reports current collections are not separated as to type of tax; the breakdown shown for fiscal years is based on estimates made in accordance with provisions of Sec. 201 of the Social Security Act, as amended (42 U.S.C. 401), for transfer of tax receipts to the trust funds (see "Budget Receipts and Expenditures," Table 1).

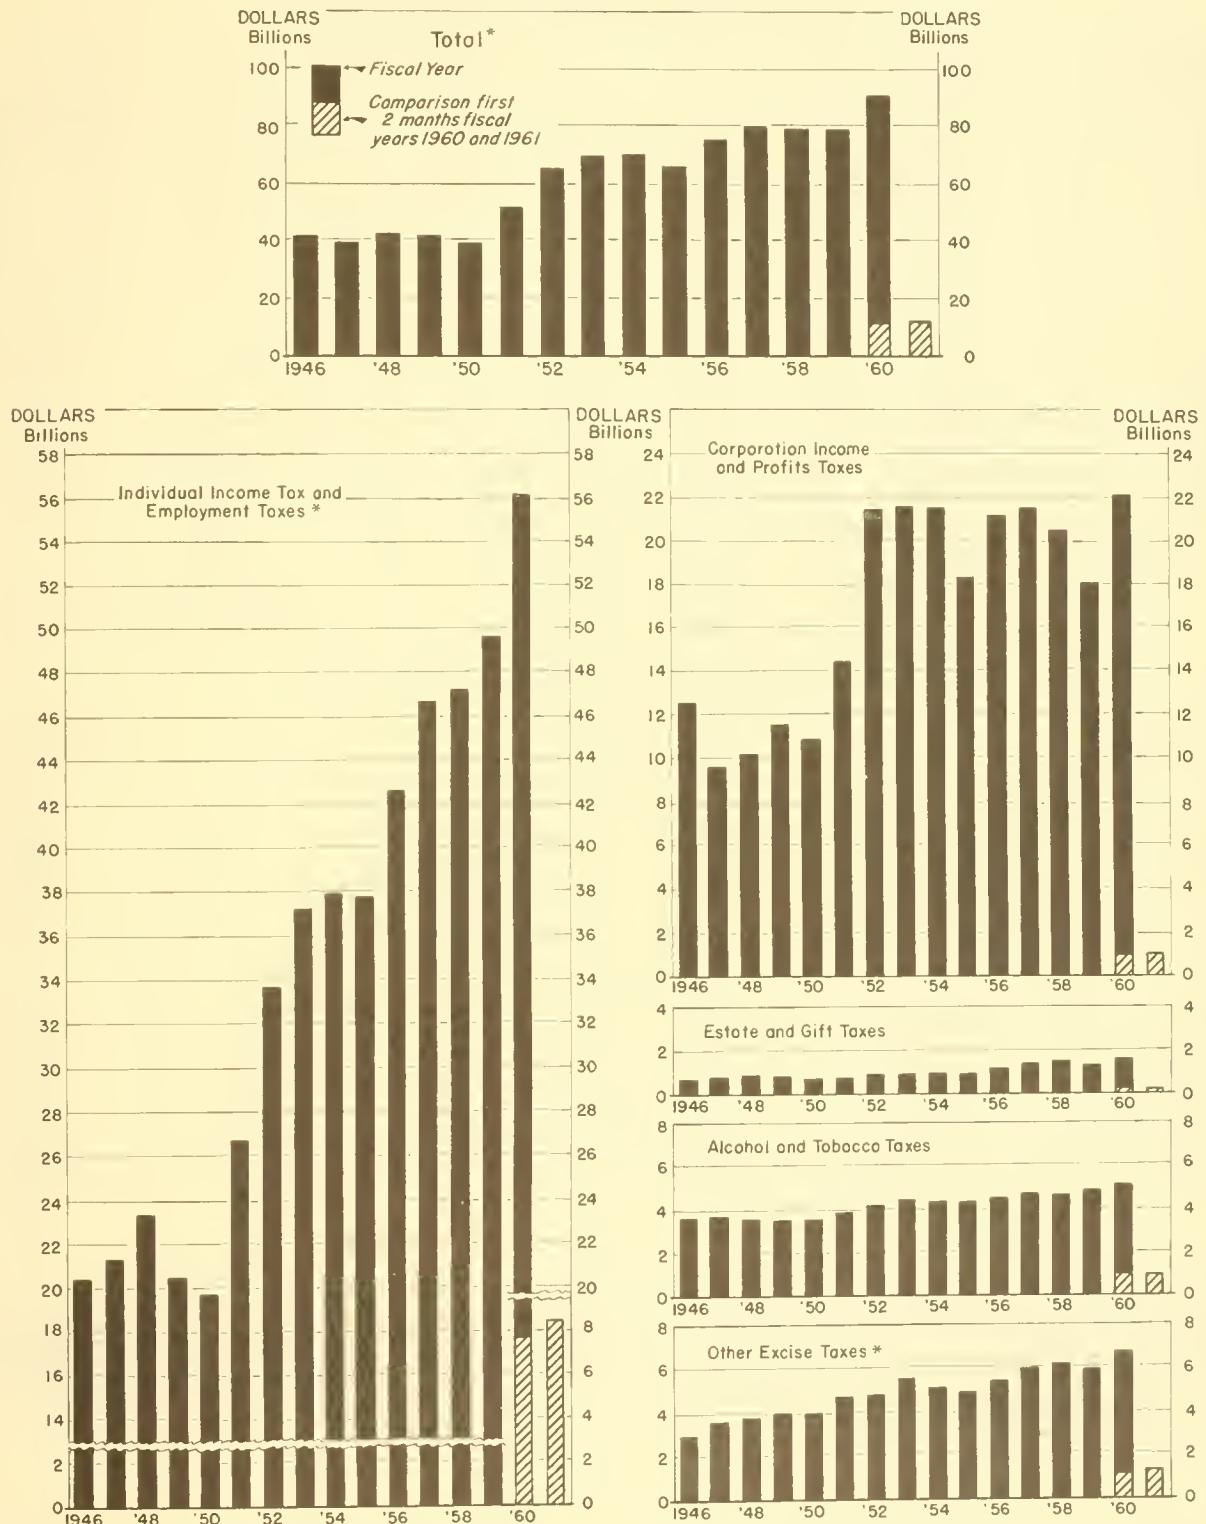

4/ Beginning with the fiscal year 1955, collections shown include undistributed depositary receipts and unapplied collections. For excise taxes these receipts are included in the total only. Total collections include "Taxes not otherwise classified."

5/ Budget receipts for 1956 were reduced by \$3,566 thousand representing tax collections transferred to the Government of Guam pursuant to the act approved August 1, 1950 (48 U.S.C. 1421 h), but this amount was included in collections reported by the Internal Revenue Service. Beginning with 1957, such collections are excluded also in Internal Revenue Service reports.

6/ Detail is reported by quarters beginning with the fiscal year 1956.

INTERNAL REVENUE COLLECTIONS BY PRINCIPAL SOURCES

* Beginning with the fiscal year 1955, includes undistributed depository receipts and unapplied collections. The whole amount of such receipts for excise taxes is included under "Other excise taxes."

1/ These items represent the difference between the cost value and the monetary value of silver bullion revalued and held to secure silver certificates.

2/ Total of seigniorage on coins and on newly mined silver, beginning

with that for July 1959, is included under coins; the breakdown is not available after June 1959.

3/ The figures in this column are not cumulative; as the amount of bullion held changes, the potential seigniorage thereon changes.

2/ Pursuant to Public Law 85-699, approved August 21, 1958 (72 Stat. 698) the \$11,753,246.03 unexpended balance of this allocation was covered into the Treasury as miscellaneous receipts; and the \$27,546,310.97

which had been advanced to the Federal Reserve Banks under this allocation was repaid into a special fund from which it was appropriated to the Small Business Administration. Under subsequent legislation (73 Stat. 209) the unused portion of this appropriation was rescinded and the balance, \$23,653,582.01, was covered into the Treasury.

CAPITAL MOVEMENTS

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information covering the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin." Supplementary information is published at less frequent intervals. Reports by banks, bankers, securities brokers and dealers, and industrial and commercial concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. Beginning April 1954, data reported by banks in the Territories and possessions of the United States are included in the published data.

The term "foreigner" as used in these reports covers all institutions and individuals domiciled outside the United States and its Territories and possessions, the official institutions of foreign countries, wherever such institutions may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 issue of the "Treasury Bulletin," pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously

published will be exactly comparable to those now presented

The first three sections which follow are published monthly. They provide summaries, by periods and by countries, of data on short-term banking liabilities to and claims on foreigners and transactions in long-term securities by foreigners, and present detailed breakdowns of the latest available preliminary data.

Section IV provides supplementary data in six tables which appear at less frequent intervals. Table 1, short-term foreign liabilities and claims reported by non-financial concerns, is published quarterly in the January, April, July, and October issues of the Bulletin. Table 2, long-term foreign liabilities and claims reported by banks and bankers, and Table 3, estimated gold reserves and dollar holdings of foreign countries and international institutions, are published quarterly in the March, June, September, and December issues. Table 4, foreign credit and debit balances in brokerage accounts, appears semi-annually in the March and September issues. Table 5, short-term liabilities to foreigners in countries and areas not regularly reported separately by banking institutions, is presented annually, appearing in the April issue through 1958 and in the March issue thereafter. Table 6, purchases and sales of long-term securities by foreigners during the preceding calendar year, also appears annually, beginning with the May 1959 issue.
