1/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national

bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

1/ These notes were originally designed to help taxpayers set aside funds with which to pay taxes and were known as Treasury tax savings notes. Series A notes were designed for the small and moderate taxpayer; series B and series C notes were intended for the large taxpayer. When the collection of taxes through withholding at the source commenced, the need for series A tax savings notes disappeared and their sale was discontinued. Redemption provisions on series A notes were relaxed to provide for the payment of interest on notes thereafter redeemed for cash (see footnote 2/). Sale of series C notes which were designed for the investment of idle cash reserves as well as the accumulation of tax reserve was continued and the notes were designated Treasury savings notes.

2/ Series A notes, which were sold from August 1, 1941 through June 22, 1943, yield approximately 1.92 percent per annum. The maximum amount which may be used in payment of each class

of tax (income, estate, or gift) by each taxpayer during each taxable year is limited to \$5,000 per year. Source: Daily Treasury Statements commencing November 1, 1942; prior thereto, Post Office Department.

1/ Figures for November 1942 and following months are not strictly comparable with earlier months because of the shift to a Daily Treasury Statement basis. Stamps sold prior to October 1, 1942 were known as postal savings stamps and were obligations of the Postal Savings System but subsequently became public debt obligations.

2/ Estimated on the basis of samples conducted by the Post Office Department.

3/ Includes minor amounts which were exchanged for postal savings

certificates prior to November 1, 1942. These did not aggregate in any one month more than \$26 thousands nor more than 0.9 percent of total redemptions.

4/ Sales and redemptions commence with May 1, 1941 when the special defense series of stamps went on sale. The amount of the old series of postal savings stamps outstanding on April 30, 1941 was \$150 thousands. Details not available for May, June, and July 1941.

5/ Net of sales less redemptions. See footnote 1/.

6/ Does not include amounts transferred from Postal Savings System to the Treasury to cover outstanding stamps.

**Summary Data from Treasury Survey of Ownership of Securities  
Issued or Guaranteed by the United States, July 31, 1943**

The following tables present summary data from the Treasury survey, as of July 31, 1943, of the ownership of securities issued or guaranteed by the United States. The large commercial and savings banks and insurance companies covered in the survey account for approximately 95 percent of the holdings of United States Government and Government-guaranteed securities held by all banks and insurance companies in the United States.

A regrouping of insurance companies was reflected for the first time in the Treasury survey as of June 30, 1943 which appeared in the August issue of the "Treasury Bulletin". Because of this regrouping, data as of June 30, and July 31, 1943 on life insurance companies and on fire, casualty, and marine insurance companies should not be compared with similar data for prior months. Revisions of the earlier figures will be published in a forthcoming issue of the "Treasury Bulletin".

- 1/ When the price of a security is such as to result in a negative yield, the excess of price over zero yield is given in the yield column in thirty-secondes.
- 2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market except that prices of Treasury, Federal Farm Mortgage Corporation, and Home Owners' Loan Corporation bonds for the period prior to October 1, 1939 represent closing prices on the New York Stock Exchange. "When issued" prices are included beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.
- 3/ Computed on mean price to call date when mean price is above par and to maturity date when mean price is below par.
- 4/ Included in average of long-term tax-exempt Treasury bonds shown later.

- 5/ Security is not transferable to commercial banks until ten years after issue date.
- 6/ Quoted on yield basis since November 12, 1942; prior price quotations have been converted to yields for back figures.
- 7/ Excludes Federal Housing Administration debentures and issues held entirely by government agencies.
- 8/ This security was issued in the amount of \$1,002 millions on September 2, 1943.
- 9/ Called on June 7, 1943 for redemption on October 15, 1943.
- 10/ Included in average of long-term partially tax-exempt Treasury bonds shown later in this chapter.
- 11/ Excludes postal savings bonds.

1/ When the price of a security is such as to result in a negative yield, the excess of price over zero yield is given in the yield column in thirty-secondes.

2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "When issued" prices are included beginning November 1, 1941. Dates of highs and lows, in case of recurrence, are the latest dates.

3/ Computed on mean price to call date when mean price is above par and to maturity date when mean price is below par.

4/ Excludes issues completely held by Farm Credit Administration agencies.

5/ Taxable issues.

**YIELDS OF TREASURY SECURITIES AUG. 31, 1943**  
 Based on Mean of Closing Bid and Asked Quotations

*Explanation: The points represent yields to call date when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.*

Basis of Computation: (1) Treasury bond yields are computed on the basis of the mean of bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. Back Figures: See "Treasury Bulletin" for July 1941, pages 21-26, and subsequent issues.

1/ Average of partially tax-exempt Treasury bonds neither due nor callable for twelve years. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax. (In addition, interest derived from \$5,000 aggregate principal amount of partially tax-exempt Treasury

bonds and United States savings bonds issued before March 1, 1941 is exempt from the surtax rates of the Federal income tax.)

2/ Average of taxable Treasury bonds neither due nor callable for twelve years. Bonds which may not be held by all classes of investors (the 2-1/2's of 1952-67, the 2-1/2's of 1963-68, and the 2-1/2's of 1964-69) are excluded from the average. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax. This average commenced October 20, 1941.

3/ For discussion of composition of high-grade corporate bond average, see "Treasury Bulletin" for April 1943, page 61.

4/ Monthly averages of daily figures. Prior to April 1, 1938, corporate bonds are averages of Saturday figures.

5/ On days when the exchanges are closed, the date and prices of the previous day are used.

6/ Indicates change in composition of the average.

Basis: Daily Treasury Statements.

1/ These items represent the difference between the cost value and the monetary value of silver bullion revalued and held to secure silver certificates.

2/ The figures in this column are not cumulative; as the amount of

bullion held changes, the potential seigniorage thereon changes.

3/ Increase due principally to cumulative adjustment in computing average cost per ounce.
