Treasury Financing Operations

March Certificate and Bond Maturities

On February 18, 1948, the Secretary of the Treasury announced the plans for refunding the \$4,481 million of certificates of indebtedness and Treasury bonds maturing and called for payment in March. These securities consisted of a one-year 7/8 percent certificate of indebtedness maturing March 1 in the amount of \$2,142 million, the 2 percent bonds of 1948-50 (dated March 15, 1941), outstanding in the amount of \$1,115 million, and the 2-3/4 percent bonds of 1948-51, outstanding in the amount of \$1,223 million. The bond issues previously had been called for redemption on March 15.

In exchange for these three issues, there was offered an issue of one-year certificates of indebtedness, dated March 1, 1948, and bearing interest from that date at the rate of 1-1/8 percent per annum, payable with the principal at maturity on March 1, 1949. In respect to the maturing certificates, exchanges were made par for par, and in respect to the called bonds, exchanges were made at par with an adjustment of interest as of March 15, 1948. The certificates were issued in bearer form only in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Reports to the Treasury on the ownership of Government securities indicate that on January 31, 1948, about 56 percent of the \$2,142 million of the maturing certificates, about 68 percent of the \$1,115 million of the 2 percent bonds of 1948-50 (dated March 15, 1941), and about 80 percent of the \$1,223 million of the 2-3/4 percent bonds of 1948-51 were owned by reporting commercial banks

and Federal Reserve Banks. In the aggregate, about 66 percent of the three issues were so owned. The ownership figures for January 31 are the latest which are available for holdings of commercial banks.

Subscription books were opened on February 18 and were closed at the close of business on February 20. Federal Reserve Bank holdings of the maturing and called securities, which totaled \$460.3 million, were redeemed in full for cash. For the three issues, exchanges totaled \$3,553 million, leaving \$467 million to be paid in cash to holders other than Federal Reserve Banks. Certificates of indebtedness subscribed for in exchange for the new certificates amounted to \$1,687 million, leaving \$454 million to be paid in cash. Exchange subscriptions of the 2 percent bonds amounted to \$899 million, leaving \$216 million to be paid in cash. Exchange subscriptions of the 2-3/4 percent bonds amounted to \$967 million, leaving \$257 million to be paid in cash.

Treasury Bill Retirement in February

A further and continuous redemption of outstanding Treasury bills was made in February. The four issues maturing during the month totaled \$4.4 billion and the amount refunded totaled \$4.0 billion. Each new weekly issue was \$100 million less than that maturing. The first maturity was for \$1.0 billion, the second and third for \$1.1 billion each, and the fourth for \$1.2 billion. The average rates of discount for the four offerings beginning with that dated February 5, were, respectively, 0.990 percent, 0.994 percent, 0.996 percent, and 0.997 percent.

See also Table 7, following. Figures were revised in the February 1948 issue of the "Treasury Bulletin" to reflect the present classification of certain expenditures reimbursed from the Federal Old-Age and Survivors Insurance Trust Fund.^{3/} Includes public works undertaken by the Veterans Administration.^{4/} For further detail, see tables under "Internal Revenue Collections".^{5/} Receipts of Victory taxes withheld pursuant to the Revenue Act of 1942 are classified as "Other" income and profits taxes.^{6/} Excludes railroad unemployment insurance contributions, which are included in "All other receipts".^{7/} At present consists largely of proceeds from the sale of surplus property; also includes deposits resulting from renegotiation of war contracts (for detail see "Treasury Bulletin" for February 1948, page 5), and recoveries of U. National defense and related activities of E.P.C. and its affiliates. After July 1, 1947, expenditures for these purposes were not segregated from the other expenditures of the Corporation and its affiliates, which are included under "Miscellaneous" expenditures in Table 5.^{11/} For detail prior to July 1, 1947, see "Treasury Bulletin" for February 1948, page 7. Current figures consist solely of Office of Selective Service Records.^{12/} Includes expenditures from prior year appropriations which are not shown separately in the Daily Treasury Statement but are included under the Department of the Army.^{13/} Department of Agriculture expenditures except those for UNRRA, surplus property disposal, other national defense and related activities prior to July 1947, foreign aid and relief, and forest roads and trails.^{14/} For more detail of these expenditures, see Tables 7, 8, and 9 following. 1/ Accrued discount on savings bonds and bills less interest paid on savings bonds and bills redeemed.

2/ Interest payments to wholly owned Government corporations are not deducted because they are treated as negative expenditures when received by corporations; hence payment and receipt offset each other in the expenditure series.

3/ Budget expenditures involving the issuance of Federal securities

are treated as noncash at the time of original payment and as cash expenditures at the time of redemption. The figures shown are net issuances, or net redemptions (-).

Accordingly, the figures in this column for those years will not agree with transfers to trust accounts shown in Table 3.

2/ Excludes clearing account for outstanding checks and telegraphic reports from Federal Reserve Banks.

^{3/} Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to a specified date.

1/ Original call and maturity dates are used.

2/ Prior to the refunding operation of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege of exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a

stated portion for cash retirement with the remainder covered by an offering of an exchange security.

3/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called securities would be presented for cash redemption.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issue for December 1947, page 31, and October 1935, pages A-4 and A-5. Sales and redemptions data by States are published at the end of each calendar and each fiscal year after June 30, 1947. Sales by denominations are also published semi-annually after December 31, 1947.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of Series G outstanding are quoted at par. Matured bonds which have been redeemed are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to

June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and small amounts also of unclassified F and G redemptions, beginning with June 1947.

1/ Not calculated for matured series.

TREASURY SAVINGS NOTES

Treasury savings notes have been issued in three series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; and Series C on continuous sale since September 14, 1942. For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series C notes, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For similar information regarding Series A and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220. For sales and redemptions of Series A and B notes by fiscal years

and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

Note: Beginning with this issue of the "Treasury Bulletin" date on ownership of Federal securities are presented on the basis of gross public debt and guaranteed obligations outstanding rather than interest-bearing debt. For all practical purposes the addition to the former series of matured debt and debt bearing no interest affects only the holdings by individuals and by "Other corporations and associations", since other investors hold negligible amounts of these securities.

^{1/} United States savings bonds, Series A-D, E, and F, are included at current redemption values.

^{2/} Includes all securities issued or guaranteed by the U. S. Government, but excludes guaranteed securities held by the Treasury; includes matured debt and debt bearing no interest, as well as interest-bearing debt.

^{3/} Consists of commercial banks, trust companies, and stock savings banks

in the United States and in Territories and insular possessions. Figures exclude securities held in trust departments.

^{4/} Includes partnerships and personal trust accounts.

^{5/} Includes savings and loan associations, dealers and brokers, and investments of foreign balances and international accounts in this country. Beginning with December 1946 figures include investments by the International Bank for Reconstruction and Development and International Monetary Fund in special noninterest-bearing notes issued by the U. S. Government.

^{6/} See footnote 2 to Table 1, preceding.

^{7/} Comprises trust, sinking, and investment funds of State and local governments and their agencies, and Territories and insular possessions.

TREASURY SURVEY OF OWNERSHIP, JANUARY 31, 1948

The Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey account for approximately 95 percent of such securities held by all banks and insurance companies in the United States.

Information on the distribution of ownership by types of banks and insurance companies is published each month. Additional information showing the holdings of commercial banks distributed according to Federal Reserve member-bank classes and nonmember banks has been published at less frequent intervals. Currently,

this information is published for June 30 and December 31. Figures for December 31, 1947, appear in the current issue of the "Treasury Bulletin".

The Survey began with data for March 31, 1941, which appeared in the "Treasury Bulletin" for May of that year. Revisions of data on insurance companies for May 31, 1943, and prior months appeared in the November 1943 issue; reclassification of data on banks for the period November 30, 1943, through February 29, 1944, appeared in the May 1944 issue; and revisions of data for September 30, 1944, appeared in the February 1945 issue.

TREASURY SURVEY - ANALYSIS OF BANK OWNERSHIP, DECEMBER 31, 1947

The tables which follow provide an analysis of the security holdings of commercial banks reporting in the Treasury survey of ownership of the securities issued by the United States Government and by Federal agencies. They show the total holdings distributed according to whether or not the banks owning them are members of the Federal Reserve System, and according to the class of

membership of the banks which are members of the System.

This analysis of bank ownership was first published in the March 1944 issue of the "Treasury Bulletin", based on the survey data for December 31, 1943. It has appeared at semiannual or quarterly intervals since that time. Currently, the analysis is published for the June 30 and December 31 survey data.

Note: The Treasury bond averages include only bonds which are neither due nor callable for fifteen years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 53; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1948, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the

New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

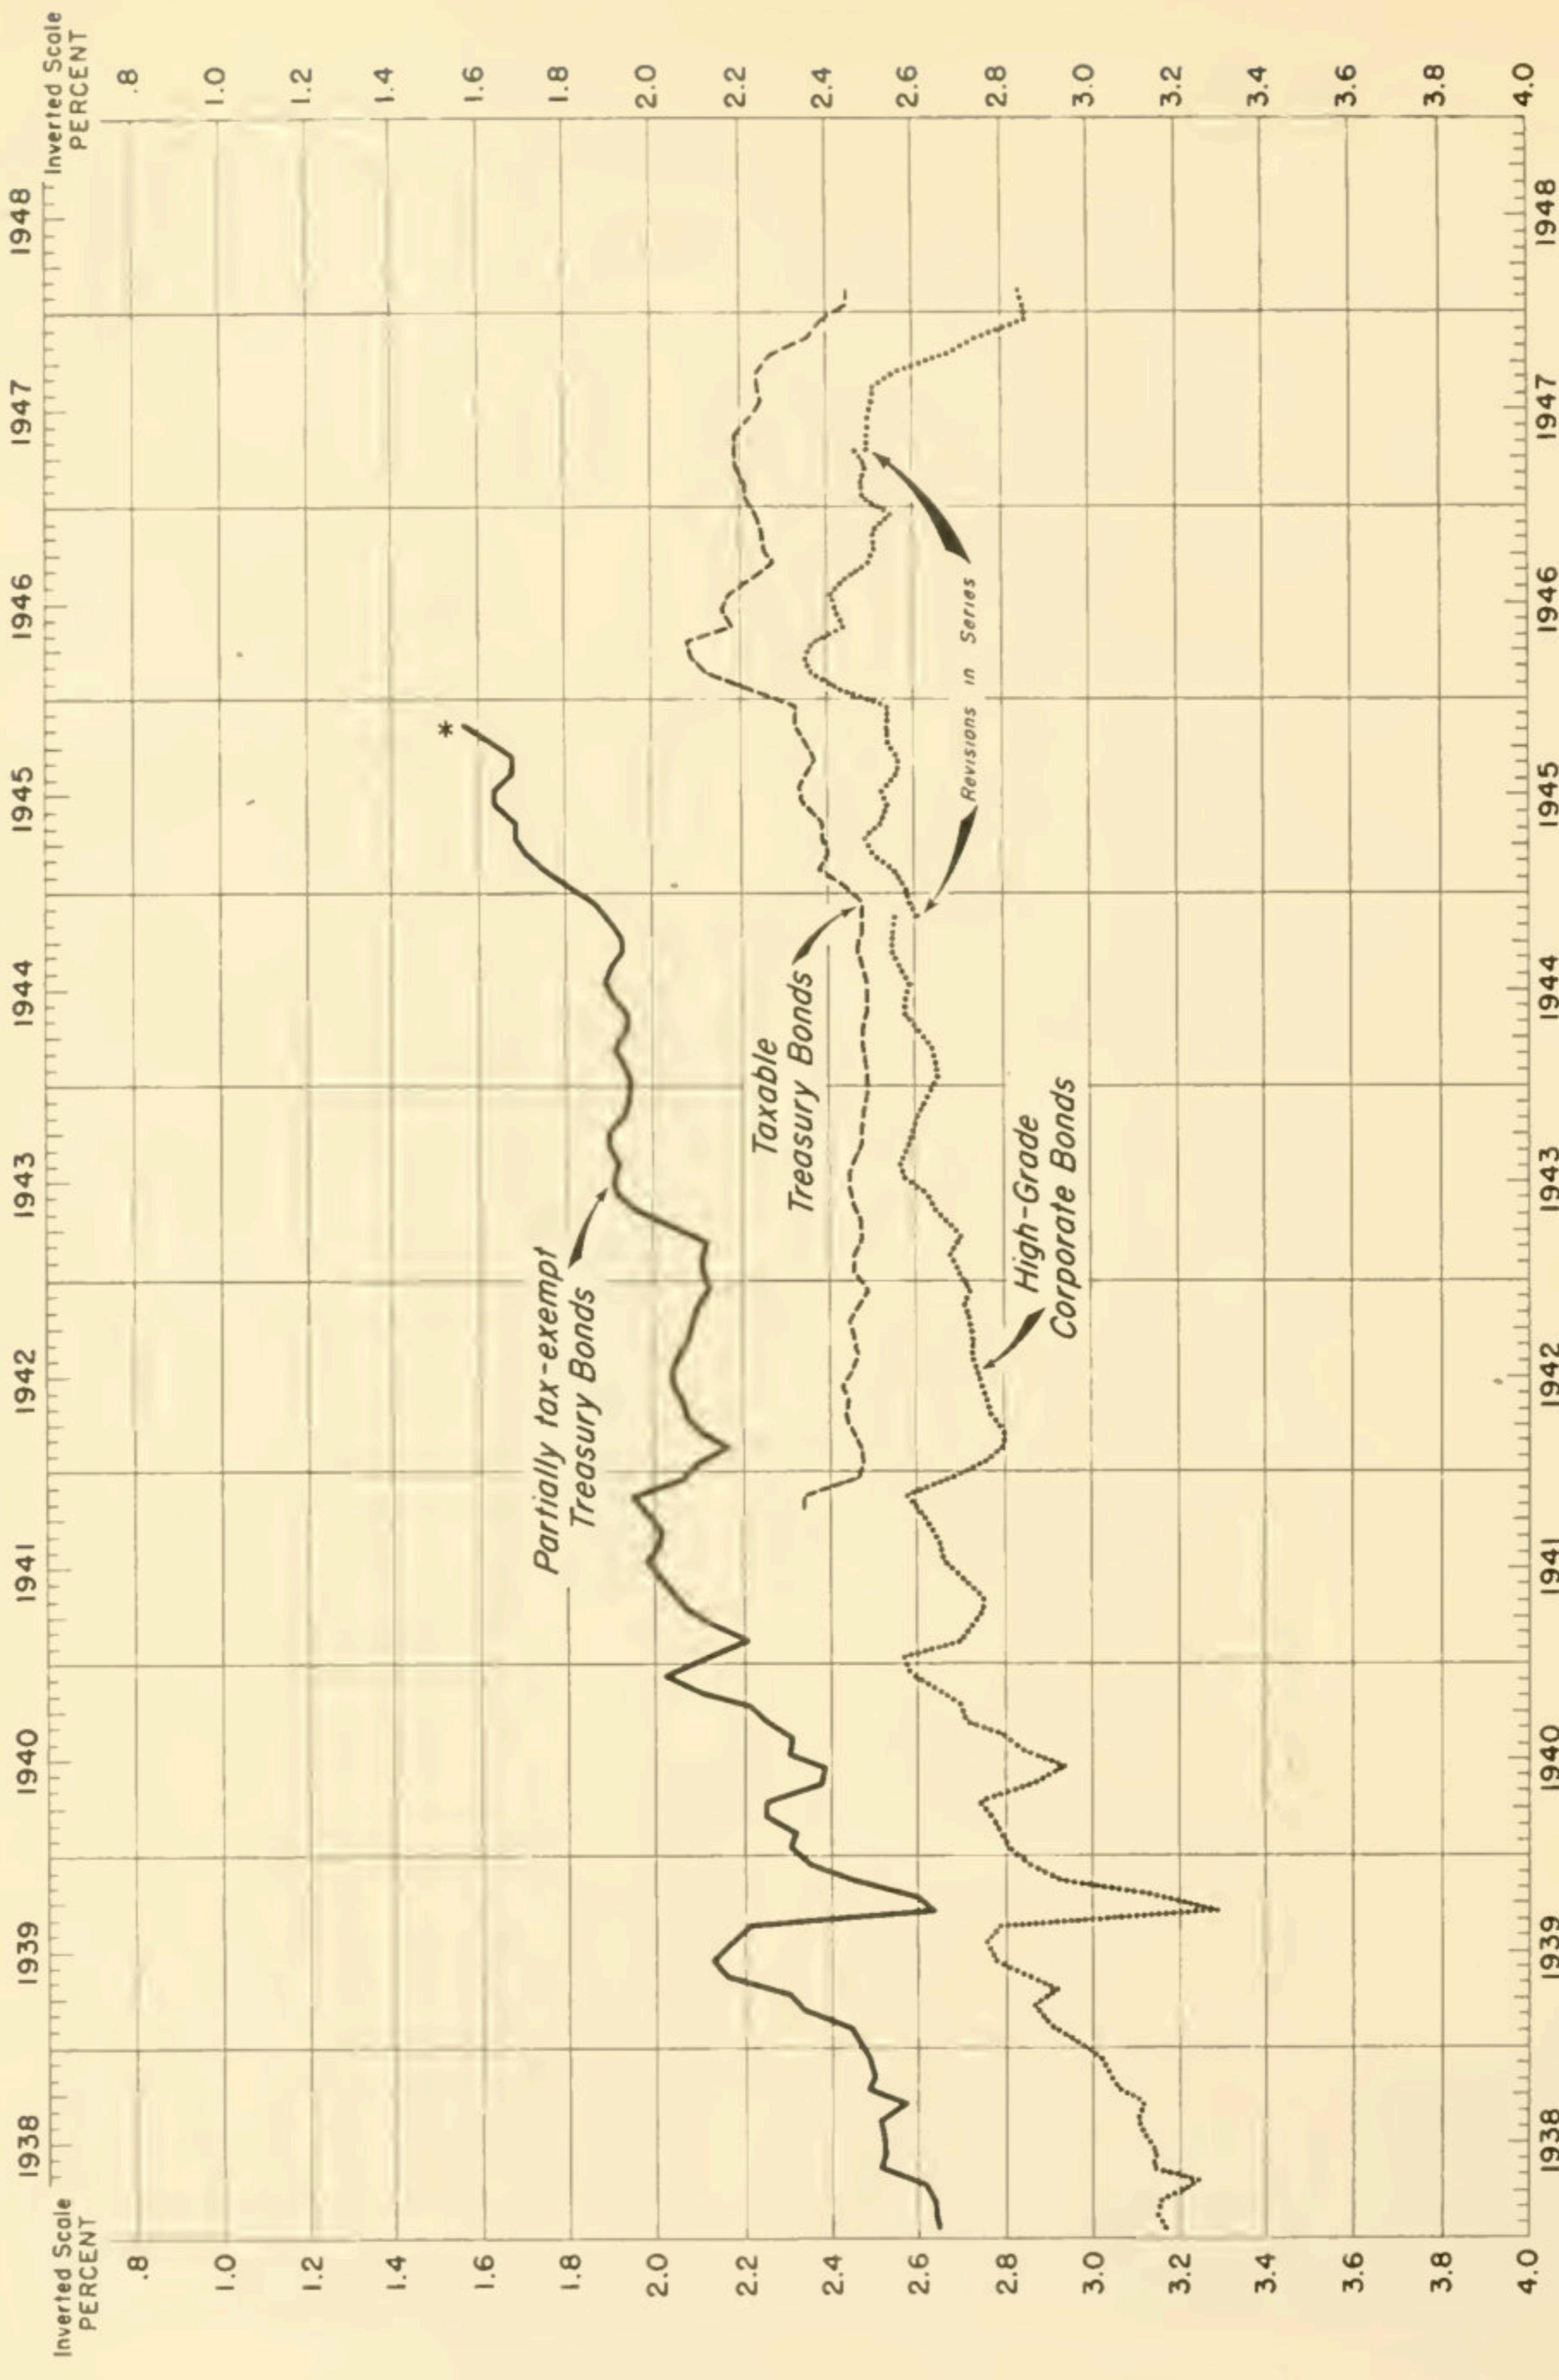

1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin". The partially tax-exempt series was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

2/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

3/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

4/ Market closed.

silver certificates.

2/ The figures in this column are not cumulative; as the amount of bullion held changes, the potential seigniorage thereon changes.

CAPITAL MOVEMENTS

Information relating to capital movements between the United States and foreign countries is presented in four sections. Section I contains the principal types of data on capital movements by years from 1935, and currently by months. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for recent months. The total capital movements are given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Details with respect to capital movements and short-term claims and liabilities are presented in Section III as of the latest month for which the data are available.

Section IV contains data for recent months on out-

standing contracts of banks for forward purchases and sales of foreign exchange.

These data relating to capital movements are based on reports filed each month by banks, bankers, and brokers throughout the United States. The reports are collected, checked and tabulated by the twelve Federal Reserve Banks. The totals are then forwarded to the Treasury Department for consolidation and publication.

Figures for previous periods may be obtained from the following sources:

"Treasury Bulletin", November 1945, for a summary of capital movements, and position in foreign currencies by months, 1942-1945.

Supplement to "Treasury Bulletin", November 1945, on "Capital Movements between the United States and Foreign Countries, January 1942 through April 1945", for details during that period.

"Treasury Bulletin", March 1942, and earlier issues, for details covering years back to January 2, 1935.

CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES

Data relating to corporations in which the United States Government has a proprietary interest, direct or indirect, and to certain other business-type activities of the United States Government are presented in a series of four tables. Table 1 gives a summary of loans outstanding, Table 2, balance sheet data, Table 3, income and expense, and Table 4, source and application of funds. Tables 1 and 2 are compiled from the mid-

month "Daily Treasury Statement", which contains greater detail than the summaries presented here. Tables 3 and 4 are compiled from reports of the agencies, adjusted by the Treasury Department. Loan and balance sheet data for December 31, 1947, are presented in this issue of the "Treasury Bulletin", and Tables 3 and 4 for that date will appear in a subsequent issue.
