**Statement by Secretary Snyder before the Ways and Means Committee
of the House of Representatives, May 19, 1947**

I am glad to have this opportunity to appear before the Ways and Means Committee in connection with its proposed examination of the whole tax system. This approach to the tax problem is in accord with the recommendation for a comprehensive study which I made in my recent appearance before this Committee and again before the Senate Finance Committee. Only by looking at the tax system as a whole is it possible to lay a sound foundation for future legislative action. The task confronting us is one of the greatest importance, because a soundly conceived and well-balanced tax system can make a significant contribution to the maintenance of prosperity.

The first requisite of such a tax system is that it should produce adequate revenue to balance the budget and to provide a substantial payment on the public debt, in order to sustain the confidence of the public in the integrity of the Government's obligations and its financial strength. As Secretary of the Treasury, I am responsible for the management of the public debt and I am keenly aware that the Federal Government's securities are an important part of the assets of banks, insurance companies, and other financial institutions that serve the public as the repositories of its savings. Moreover, tens of millions of persons are direct owners of Federal securities. We have a great responsibility to build a tax system which will preserve the fundamental soundness of our financial system.

As a first step towards the development of a postwar tax system, facts and evidence should be assembled for the consideration of both the executive and legislative branches of the Government. This information will come from the hearings that are being initiated today and also from the continuing technical research work of the tax staffs of the Treasury Department and the Joint Committee on Internal Revenue Taxation. Later, when this necessary information is at hand a sound tax program can be developed.

By beginning early, as the Committee has, we shall have time to make a thoroughgoing study of the present tax system, to consider carefully a large number of possible revisions, and to work out a well-balanced program. A program can be

outlined first in broad terms and the final details worked out as the budgetary and economic situation grows clearer. When the time comes to draft legislation, measures already agreed upon can be taken up in the order of their priority. It is highly unlikely that the fiscal and economic situation will warrant enactment of all the ultimately desirable revisions at the same time. But advance planning and study will make it possible to proceed in an orderly fashion without prejudicing any necessary part of the program and without the danger of reducing the revenues too rapidly.

With your permission, I should like to restate the principles that I believe should guide our studies and to call attention to a number of tax problems that need careful consideration. It is not my intention today to make recommendations on any specific tax question.

I believe that a sound tax system should meet the following essential tests. The tax system should produce adequate revenue. It should be equitable in its treatment of different groups. It should interfere as little as possible with incentives to work and to invest. It should help maintain the broad consumer markets that are essential for high-level production and employment. Taxes should be as simple to administer and as easy to comply with as possible. While the tax system should be flexible and change with changing economic conditions, it should be possible to achieve this flexibility without frequent revisions of the basic tax structure. A stable tax structure, with necessary flexibility confined largely to changes in tax rates and exemptions, will make it easier for business and Government to plan for the future.

Before going on to mention the areas that I believe need special study, I should like to repeat my firm conviction that at this time we have a unique opportunity to modernize the Federal tax system. We are nearing lower peacetime levels of Government expenditures and continuing high levels of national income and production. A period of tax reduction is approaching. But in order to take full advantage of our opportunity to modernize the tax system we must make careful

use of the available margins of surplus. The surplus must be divided judiciously between debt retirement and tax reduction. The tax reductions should be allocated carefully among rate reductions and a large number of structural revisions. The development of a modern tax system that will serve America best will require the cooperation of the legislative and executive branches of the Government and of the taxpayers and the public generally. We need also to enlist, and I am sure we shall get, the wholehearted cooperation of the States and localities.

In my appearances before your Committee and the Senate Finance Committee, I indicated that the technical staff of the Treasury Department has under way studies on some twenty major matters that will require attention in any comprehensive revision of the tax system. These include studies on business taxes, individual income taxes, excise taxes, estates and gift taxes, and social security taxes. If the Committee should so desire, I will submit these studies to it as they are completed. I again offer your Committee the cooperation of the entire tax staff of the Treasury Department in connection with the important task of developing a sound tax system that will make a major contribution to the future progress of this country.

I wish now to comment briefly on each of the major tax items under study in the Treasury Department.

Business Taxes

Revision in the business tax field should be designed to achieve the greatest feasible uniformity of treatment of different forms of business, to promote a sound competitive system, and to eliminate any barriers to a high level of investment. Among the important business tax matters being studied are the following:

1. Corporate rates. Both the level of corporation tax rates and the method and extent of graduation need to be carefully examined. Under present law the corporate income tax begins at a rate of 21% on net incomes of less than \$5,000 and is graduated to a rate of 38% on the entire income if in excess of \$50,000.

The level of corporate tax rates must be considered in the light of over-all revenue requirements and action taken on other major taxes, with due regard to any revisions in the structure of the corporation tax. The present method of

graduation imposes a high rate of 53% on income in the so-called notch area between \$25,000 and \$50,000, to bring the effective rate on the whole income up to 38% at \$50,000. One question that merits consideration is whether this method of graduation should be continued or whether the so-called notch rate should be eliminated and a system of bracket graduation similar to that used for the individual income tax substituted.

2. Taxation of dividends. Under present law a corporation pays an income tax on its entire net income and stockholders are taxed on their dividend income at the regular income tax rates. This system of taxing corporate profits has been widely criticized as involving double taxation. It is contended that this is both inequitable and damaging to investment incentives. This is a question about which there is no general agreement. An important issue in postwar tax policy relates to the extent of so-called double taxation of distributed corporate profits and the question of the desirability of reducing or eliminating any existing double taxation.

On the assumption that the corporation income tax rests at least in part on stockholders, a number of plans have been advanced for the reduction or elimination of double taxation. These plans are of three basic types. One approach would be to eliminate the corporate income tax and to tax stockholders, like partners, on their full portion of both corporate profits. A second approach would be to continue the corporate income tax but to grant corporations a tax credit or deduction for dividends paid. A third approach would be to continue the corporate income tax on both distributed and undistributed profits but to grant stockholders an allowance or credit with respect to dividends received. The Treasury Department has completed and released a technical study of a number of such plans for the taxation of corporate profits.

The taxation of corporate income raises important and exceedingly complex problems. The existing arrangements and alternative approaches need to be carefully analyzed to determine their advantages and disadvantages with respect to tax equity, economic effects, and administrative considerations.

3. Small business. The vital importance to the economic system of a vigorous and healthy group of small business enterprises makes it essential to consider carefully the impact of pres-

ent taxes on small business. Some spokesmen for small business believe that the present tax system discriminates against smaller enterprises and imposes unnecessary impediments to their establishment and growth. Others take the position that an attempt should be made to liberalize the tax system in order to provide special advantages for new and small enterprises. Among the proposals advanced for the tax relief of small business are suggestions for tax rate revisions, tax exemption for new enterprises, tax exemption or deduction for investment in small business, and more liberal treatment for operating losses and depreciation allowances. These and other proposals for the special benefit of both incorporated and unincorporated business firms raise difficult problems which merit extensive investigation.

4. Tax-exempt organizations. Because of the continued growth of the scope and volume of activities of tax-exempt organizations, there is need for reexamination of the tax status of these organizations. It has been charged that in some instances the present treatment discriminates unfairly against taxable enterprises.

5. Elimination of discrimination among various forms of doing business. In a free competitive economy business is conducted in a variety of forms. Sole proprietorships, partnerships, and corporations can all make a significant contribution to economic progress. It is important that taxes create no unnecessary obstacles to the carrying on of business in the forms best adapted to different situations. At the present time, there are significant differences in taxes on incorporated and unincorporated businesses, depending on the size of the business income, the other income of the business owners, and the portion of the profits retained in the business. While complete uniformity of tax treatment of proprietorships, partnerships, and corporations is impracticable, the present tax system needs careful examination to determine whether existing differences in treatment are justified.

6. Business loss offsets. Opportunities for offsetting business losses against taxable income are a significant factor in determining the attractiveness of risky investment and in arriving at an equitable basis of taxing fluctuating incomes. Under present law, net operating losses sustained in any one year may be carried back and applied against the income of the two preceding years and any balance not absorbed may be carried forward as a deduction from income of

the two years immediately following the year of loss. In connection with postwar tax revisions, it is important to consider whether the present loss offset period is long enough. Another important problem is to determine whether the present system of carrybacks and carryforwards is preferable to a system which relies solely on carryforwards.

7. Depreciation. The speed and certainty of recovery of capital invested in depreciable assets have an important bearing on the risks of investment. Consequently, it is necessary to give attention to present depreciation practices and to various proposals for their modification. Some taxpayers complain that the present system of depreciation allowances is too rigid and urge that they should be given more leeway in estimating the useful lives of their depreciable assets and more freedom of choice in selecting the method of taking depreciation. They contend that the individual taxpayer is in a better position than the tax administrator to estimate the life span of a particular asset.

Some advocate a change in the law that would arbitrarily shorten the write-off period so that the capital invested in depreciable assets will be recovered over a period which is less than their probable useful life. They assert that accelerated depreciation would reduce the risks of large capital expenditures in fixed assets. To the extent, however, that it understates income during periods when a taxpayer is increasing his capital investment, it would result in postponement of tax.

8. American business abroad. American corporations and individuals doing business in foreign countries are normally subject not only to American taxes but also to those of the foreign countries. Such individuals and enterprises, therefore, may become subject to excessive tax burdens unless some allowance is made in the American tax law for taxes paid abroad. In the past, American corporations have been allowed to credit against their American tax liabilities on income derived from business abroad the taxes which they have paid to foreign countries.

In addition, a number of special relief provisions have been enacted from time to time designed to meet particular problems arising in various foreign countries and areas. For example, domestic corporations qualifying as Western Hemisphere Corporations have since 1942 been

exempt from corporation surtax. Also, taxpayers doing business in the possessions of the United States have been exempted from Federal income taxes and a special type of exemption is provided for China Trade Act Corporations. Individuals resident abroad are allowed a complete exemption on their wages and salaries earned abroad and a partial exemption where their income is derived from operating a business.

American corporations and individuals doing business abroad should not be placed at a disadvantage in their competition with foreign firms. At the same time, so long as they are American citizens and businesses, they should bear their fair share of domestic tax burdens. It is, therefore, highly important that we analyze the combined effect of United States and foreign taxes with a view both to minimizing any existing discrimination and inequities and to ascertaining whether such taxpayers are bearing their fair share of taxes.

9. Intercorporate problems. Attention should be given to the desirability of the present 2-percent additional tax on consolidated corporate returns and the 85-percent credit for intercorporate dividends received. The special tax on consolidated returns was intended as an offset to the tax advantages accruing from the offsetting of losses of one corporation against the gains of another and the avoidance of the tax on intercorporate dividends which would otherwise have been paid on dividends received by one member of an affiliated group from another. The tax on intercorporate dividends was intended to prevent the evasion of the graduated corporate income tax by setting up a series of small corporations in order to obtain the lower rates applicable to small corporations. It is necessary to determine whether these taxes have achieved the purposes they were intended to serve and whether they should be retained in the postwar tax structure.

Individual Income Taxes

The individual income tax is, and should remain, the mainstay of the Federal revenue system. Hence, it is most important to achieve a fair and equitable distribution of the taxes while maintaining broad consumer markets and incentives to work and invest. Among the major tax problems in this field now under study in the Treasury Department are the following:

10. Individual rates. The financial de-

mands of the war forced us to raise individual income tax rates in all brackets to very high levels. The entire rate schedule should be reconstructed with a view to achieving an equitable distribution of taxes and maximum production under peacetime conditions. The rates must be re-examined to determine their effects on incentives to work and invest and their effects on living standards and purchasing power. Revision of the individual income tax rates should be coordinated with other changes in the income tax such as personal exemptions and the treatment of family income and with changes in other taxes.

11. Personal exemptions. As a part of the war finance program, personal exemptions under the individual income tax were sharply reduced. At the present time a taxpayer is allowed an exemption of \$500 for himself, for his wife, and for each of his dependents. Thus, a single person now has an exemption of \$500; in 1939 his exemption was \$1,000. A married couple without children now has an exemption of \$1,000 as compared with \$2,500 in 1939. While exemptions for single persons and married couples have been reduced, the allowance for dependents has been increased from \$400 in 1939 to the present level of \$500. War and postwar increases in the cost of living have further sharply reduced the real purchasing power represented by the personal exemptions.

The level of personal exemptions determines the coverage of the individual income tax and affects in an important way the role of the tax in the revenue system as a whole. Consideration needs to be given to the question whether an adjustment should be made to take account of higher living costs. It is also necessary to reexamine the alignment of exemptions as between single persons, married couples, and dependents.

12. Family income. Under present law there are inequalities in taxation of families arising out of the fact that couples in community property States are permitted to divide their community earned and investment income for Federal income tax purposes, thereby reducing their taxes under the progressive rate schedule. There are also inequalities arising out of the fact that in all States recipients of investment income have opportunities for splitting that income among members of the family, whereas in non-community property States earned income is taxed to the earner. The tax value of income splitting varies with size of income. Couples with not more than

\$2,000 of net income after exemptions can realize no tax benefit from income splitting, whereas under the graduated rates couples with large incomes may realize substantial benefits. These tax savings have created difficult administrative problems and endless litigation in the field of family trusts, family partnerships, and various other types of property assignments.

Over a period of years the Congress and the Treasury have both considered means of eliminating or reducing the resulting tax inequalities among similarly situated families, but no adequate solution of the problem has been adopted. One limited approach that has been considered in the past would be to eliminate the tax advantages of the community property system by taxing earned income to the earner and other community property income to the spouse who exercises management and control. A more comprehensive approach to the problem, which has also received Congressional attention in the past, would be to require joint tax returns by husbands and wives. Still another approach, which has only recently been given widespread attention, would be to eliminate tax differences resulting from income splitting between husbands and wives by granting couples in all States the option to divide their combined incomes for tax purposes.

The existing inequalities in taxes on family incomes are significant and call for careful consideration of this problem. It must be recognized that the various solutions that have been suggested would have different but important effects on the revenue yield of the income tax and on the distribution of taxes among different income groups and between married and single persons. It is, therefore, desirable to consider the family income problem in connection with any comprehensive revision of the individual tax.

13. Pensions and annuities. There are now several million persons who receive various forms of pensions and annuities. With the wartime reduction in personal exemptions and the recent increases in the cost of living, the tax treatment of pensions and annuities has become an increasingly important problem. Under existing law, social security and railroad retirement benefits and certain other kinds of pensions and annuities are excluded from taxable income. These exclusions raise important problems of tax equity. With respect to taxable annuities, there should be a reexamination of the present method of allowing the tax-free recovery of the annuitant's

capital contribution. The taxation of pensions and annuities is closely related to proposals for special treatment for aged persons under the individual income tax.

14. Averaging. Under graduated tax rates, taxpayers with widely fluctuating incomes are required to pay substantially larger amounts of tax than those with stable incomes totalling the same amount over a period of years. Moreover, many taxpayers lose the full benefit of their individual income tax exemptions because in some years they do not have income equal to the allowable exemptions. Such taxpayers are also taxed more heavily over a period of years than those with stable incomes. These inequalities in taxation raise the question whether it is desirable to adopt some method of averaging income over a period of years for purposes of the individual income tax. Averaging may have a significant bearing both on tax equity and on the effects of taxation on incentives to invest in risky business ventures. The adoption of averaging would result in a substantial loss of revenue, and the effects of such a loss in revenue must be compared with the effects of other tax revisions.

15. Credit for earned income. The Federal income tax has provided a credit for earned income during the years 1924-1931 inclusive and again in the years 1934-1943 inclusive. The earned income credit, however, was comparatively small in amount, and in the Revenue Act of 1943 it was eliminated, mainly on the grounds that the credit was not large enough to justify the complications that it introduced into the tax system. There have, however, been a number of proposals for reinstating a credit for earned income under the individual income tax. Some proponents of an earned income credit view it primarily as a means of reducing taxes on wage earners, whereas other advocates of an earned income credit are concerned primarily with its effects on the incentives of business executives.

16. Allowances for life insurance premiums and other savings. There have been proposals to allow a limited deduction under the individual income tax for life insurance premiums. Proposals have also been made to allow a deduction for a limited amount of earned income invested in Federal securities. If such allowances were granted it would probably be necessary to consider a corresponding general allowance for other forms of savings, in order to prevent unfair discrimination between individuals investing their

savings in different ways. These proposals for special allowances for saving raise basic equity questions and economic issues as to their effect on savings, investment, and consumption.

17. Capital gains and losses. Under present law gains on capital assets held by individuals and corporations over six months are taxed at rates which do not exceed a maximum of 25%. Losses on such assets are allowed only to the extent of capital gains, except in the case of individuals such losses may be offset against ordinary income to the extent of \$1,000 each year. A 5-year carryover of unabsorbed capital losses is allowed.

The tax treatment of capital gains and losses, it has been contended, has a considerable effect on the securities market and the supply of capital. A great many problems have arisen as the result of taxpayers' efforts to convert ordinary income into capital gains entitled to the lower tax rates. The basis for taxing capital gains at lower rates than other income and the limitation on the deductibility of capital losses should be reexamined.

Excises

18. Revision of excise taxes. The Federal Government now imposes excise taxes on more than 50 commodities or services, most of which were substantially increased or newly imposed to help in the financing of the war. The revision of the excise taxes raises the important policy issue of how large a portion of the total revenue should be raised from excise taxes. This question is closely related to such matters as the level of income tax exemptions. It is now appropriate to reexamine these excises with a view to fitting them together into a coherent system adaptable to our peacetime requirements. Each of the excises imposed should be carefully considered with a view to reducing or eliminating those which are extremely regressive, which enter into business costs, which are unduly burdensome on profits of particular industries, or which are unusually difficult to administer. Revisions of particular taxes will have to be studied in detail so that any changes made will be appropriate in light of the competitive conditions in the various industries.

19. Discrimination between domestic and imported goods. Last year your Committee gave consideration to the problem of making certain imported merchandise subject to the same internal revenue taxes as similar merchandise of domestic

origin and referred it for study to a group consisting of the Joint Committee on Internal Revenue Taxation, the State Department, the Tariff Commission, and the Treasury. Consideration of this problem has involved an analysis of the treatment of such imported products as beer, lubricating oil, and numerous products containing alcohol including medicinal preparations, toilet preparations, flavoring extracts, fruits and food colorings. Determining what constitutes discrimination is complicated by the nature of the tariff schedules which in some cases provide specific rates that may have been intended to compensate for the absence of excise taxes on imported products. The inter-relationship between excises and tariffs thus tends to raise questions involving this country's policies with respect to international trade agreements.

Estate and Gift Taxes

20. Revision of structure. In the estate and gift tax field there has long been a need for an intensive study and legislative revision of the basic structure, particularly with respect to the relationship between the two taxes and their mutual relationship to the income tax. For the past three years the Treasury Department, with the assistance of an Advisory Committee of prominent tax attorneys, has been exploring the problems in this field, with a view to preparing a comprehensive report for consideration by the Congress. This important task is nearing completion and the report is in the final stages of preparation. It will contain a detailed analysis of the problems involved and recommendations for a revision of the estate and gift taxes, the adoption of which, it is believed, would greatly increase the uniformity, simplicity, and equity of these taxes.

Social Security Taxes

21. Extension of coverage. The financing of social security and its coverage raise certain important problems which will need consideration in connection with the development of the postwar tax system. As a result of a request of July 27, 1946, from Mr. Doughton, then Chairman of this Committee, the Treasury Department has been carrying on a study of the problems that would be associated with the extension of coverage for old-age and survivors' insurance. Attention has been directed primarily to the difficult technical and administrative problems involved in developing feasible methods for covering self-employed persons and agricultural and domestic workers.

The problems raised in connection with the coverage of both of these groups differ substantially from those involved in the coverage of workers in industry and commerce. At present social security taxes are imposed on wages, the employer withholding the employee tax and remitting it together with the employer tax. In the case of the self-employed, this system is not applicable because there is no employer-employee relationship giving rise to wages, and it is necessary to establish the base on which the self-employed should be taxed and how the tax should be reported to the Bureau of Internal Revenue. Both of these problems raise numerous questions, particularly with respect to the self-employed having very low incomes who are not subject to income tax. While the employer-employee relationship generally exists in the case of agricultural and domestic workers, the majority of the employers either are not accustomed to filing tax returns or are not engaged in business. Moreover, employment generally is highly irregular, prevailing wages are much lower than in industry and may be paid partly in kind. As a result, provision may need to be made for different techniques in order to achieve adequate coverage of these groups. Substantial progress has been made towards recommendations for the solution of these problems.

Technical Matters

In addition to the tax matters of broad and general importance to which I have briefly referred, there are a substantial number of needed technical adjustments of considerable significance that have accumulated during the war years. The Revenue Act of 1942 was the last piece of major legislation in which the Congress undertook to go into such problems to any great extent. Many of these matters pose policy questions of some magnitude and their proper solution will frequently involve technical problems of considerable difficulty and complexity. Among the more important of these items are such matters as the treatment of (a) war losses, which involves primarily the treatment of recoveries of properties lost during the war; (b) cancellation of indebtedness, which is a matter requiring general reconsideration and overhauling; (c) certain types of recapitalizations and reorganizations, to which there appears to be increasing resort as a method of attempting to avoid tax on corporate distributions in situations where there are accumulated corporate earnings; (d) provisions of the tax law the operation of which is affected by the termination of hostilities and of the war; (e) occupational expenses, a problem which in-

volves primarily the difficulty of drawing satisfactory lines between the non-deductible personal expenses of individuals and their deductible business outlays; (f) research and development expenses, involving the question of permitting greater flexibility in the determination of whether such costs should be capitalized or deducted as current expenses; (g) capital gains and losses, in which the problem relates primarily to use of the present provisions, such as section 117(j), in certain instances for tax avoidance purposes; and (h) a number of administrative provisions which require amendment in order to facilitate the administrative operations of the Bureau of Internal Revenue and assist taxpayers, such as elimination of oath requirements on certain return forms, correction of certain statute of limitation provisions, elimination of burdensome and unnecessary reports of small refunds, elimination of irrevocability of the election of the taxpayer with respect to the standard deduction, improvement of the enforcement of reporting and paying by employers of tax collected from their employees under the withholding system, and similar matters.

These above items are illustrative of a number of pressing technical and administrative problems which the Treasury and the taxpayers have encountered in the operation of the Code.

In conclusion I believe that we should approach the important task of postwar tax revision with an open mind. We need to study and analyze all the major matters that I have mentioned and many more that will arise upon further exploration. We should scrutinize carefully all the present sources of revenue to ascertain whether they are in proper balance. We should also explore all possible sources of new taxes which upon investigation may prove meritorious, and which may relieve pressure in other areas.

The development of a sound postwar tax system constitutes one of the most important steps towards the assurance of continuing prosperity in this country. If production is to continue to increase, if the American standard of living is to improve in the future as it has in the past, the tax system must yield the needed revenue without impeding business and work incentives, without restricting investment and without weakening consumer markets. I wish again to express my pleasure in appearing before this Committee as the work is being initiated on a fundamental revision of the American tax system.

Assets and Liabilities of Commercial Banks and Mutual Savings Banks

December 31, 1939-1946

On May 8, 1947, the Comptroller of the Currency released the regular semi-annual report on assets and liabilities of all banks, commercial and mutual savings, in the United States and possessions as of December 31, 1946. The data, which cover 14,100 commercial banks and 533 mutual savings banks, were compiled from call reports of national banks and from information provided by State bank supervisory authorities on banks under their supervision. Historical data from previous semi-annual reports of the Comptroller of the Currency have been used in the preparation of this article.

The most recent report on bank assets and liabilities as of December 31, 1946 makes available data covering the first complete postwar year. During the calendar year 1946, significant changes occurred in the asset and liability structure of banks, particularly commercial banks. In 1946, the Treasury Department began a debt pay-off program as contrasted with the borrowing programs of the war period. This resulted in marked declines of commercial bank holdings of United States Government securities on the asset side of the balance sheet which were in part offset by substantial increases in commercial bank loans. Among commercial bank liabilities the debt retirement program was reflected in a sharp drop in United States Government deposits, but there were continued increases in other deposit items to partially offset this.

Mutual savings banks, on the other hand, showed almost negligible effects of the debt pay-off program, since they held only small amounts of retired securities. Changes did occur, however, in other items such as loans. This article presents a detailed discussion of the developments in bank assets and liabilities during the calendar year 1946 and the period from December 31, 1939 through 1946.

Commercial Banks

Assets

Decline in commercial bank assets during calendar year 1946 first since 1939. The data as of December 31, 1946 on bank assets and liabilities showed significant declines in commercial bank assets during 1946 after six years of sharp increases. The single most important factor leading to these declines was the Federal Government's debt pay-off program started on March 1, 1946. Oversubscriptions to the Victory Loan had built up the Treasury's cash balance, while the budgetary outlook of the Government reached a more favorable status than was expected at V-J

Day. The cash balance made available by this improved situation was used as the source of funds in the debt reduction program in 1946.

From December 31, 1945 through December 31, 1946, total assets of commercial banks declined from \$161.4 billion to \$150.7 billion, a decrease of \$10.6 billion or 7%. This decline in total assets reflected almost completely decreases in commercial bank holdings of Government securities offset in part by increases in loans.

Treasury's debt reduction program reflected in decline in Federal security holdings. The emphasis by the Treasury in its debt pay-off program has been on reducing bank-held debt just as during the war years borrowing from nonbank investors was stressed. For the calendar year 1946, therefore, a net decline in the outstanding public debt of \$19.2 billion was concentrated largely in reductions in commercial bank holdings of United States Government securities. From peak holdings of \$91.2 billion on December 31, 1945, Federal securities held by commercial banks declined to \$75.3 billion on December 31, 1946, a decline of \$15.9 billion or 17%. 1/

The reduction in United States security holdings reflected not only direct pay-offs to commercial banks on maturing debt held by them, but also sales by commercial banks of securities in the market to meet the withdrawals of United States Government deposits and the strain on bank reserves.

Other asset items also changed materially during the first complete postwar year. The following table presents a distribution of the various asset items for commercial banks as of December 31, 1945 and 1946.

1/ Figures in this article on commercial bank holdings of United States Government securities are at book value and therefore differ from the figures shown in the ownership section of the "Treasury Bulletin" on page 48, which are given at par.

Commercial bank assets	December 31		Change	
	1945	1946	Amount	Percent
(In billions of dollars)				
U. S. Government direct and guaranteed obligations.....	91.2	75.3	-15.9	-17
Loans and discounts....	26.2	31.3	+5.1	+20
Other securities.....	7.4	8.1	.8	+11
Cash and interbank and reserve balances.....	35.0	34.4	-.6	-2
Other assets.....	1.6	1.6	*	*
Total assets.....	161.4	150.7	-10.6	-7

* Less than \$50 million or 0.5%.

Commercial bank loans increased sharply during 1946. As the table shows, the year 1946 was marked by substantial changes in loans and discounts. From December 31, 1945 through December 31, 1946 loans and discounts increased by \$5.1 billion or 20%. Increases in commercial and industrial loans, real estate loans, and consumer loans to individuals of \$4.6 billion, \$2.5 billion, and \$1.7 billion, respectively, were partially offset by a decline of \$3.7 billion in loans to purchase or carry securities and loans to dealers and brokers in securities.

The increases outlined above reflected the return to more normal activity in the private sector of the economy as reconversion took place and the deferred demand for housing and other consumer goods began to be met. The decline in security loans accompanied the end of wartime Government financing when bank loans in large amounts were made in order to purchase United States Government securities during the war loans.

Other securities comprising state and local, corporate, and miscellaneous securities, which increased \$0.8 billion during the calendar year 1946, continued on an upward trend which started in 1944.

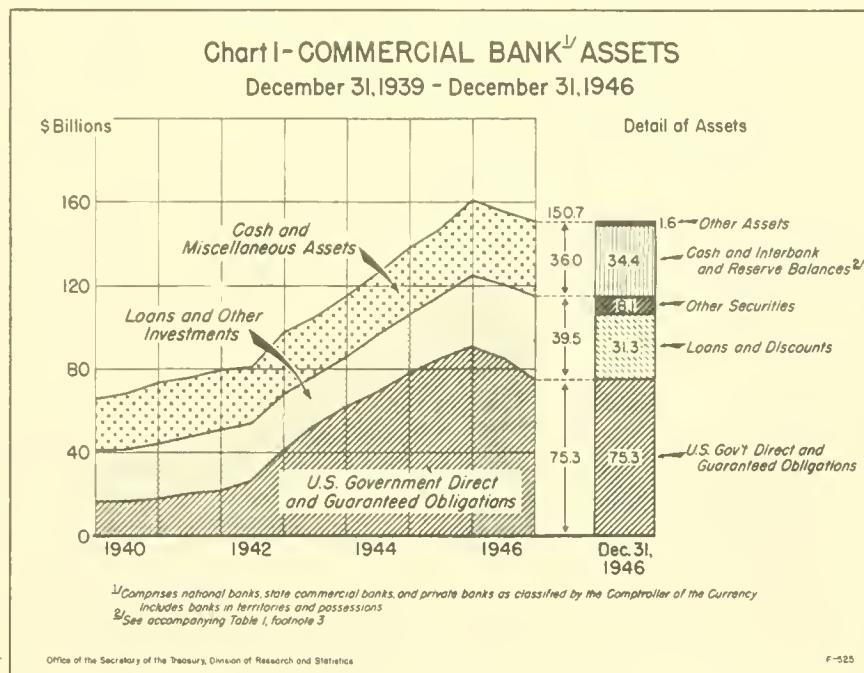

Commercial bank assets rose 129% in seven years since December 31, 1939. Despite the very sharp change in trend during the calendar year 1946 when commercial bank assets began to de-

cline, the increases which had occurred since December 31, 1939, were still not substantially affected on the full seven-year basis. From December 31, 1939 through December 31, 1946 total assets of commercial banks increased by \$85.0 billion on 129% from \$65.7 billion at the beginning to \$150.7 billion at the end of the period (Chart 1).

The table below shows the major asset items of commercial banks as of December 31, 1939 and December 31, 1946.

Commercial bank assets	December 31		Change	
	1939	1946	Amount	Percent
(In billions of dollars)				
U. S. Government direct and guaranteed obligations.....	16.3	75.3	+59.0	+361
Loans and discounts....	17.4	31.3	+13.9	+79
Other securities.....	7.2	8.1	+1.0	+14
Cash and interbank and reserve balances.....	22.6	34.4	+11.8	+52
Other assets.....	2.2	1.6	-.6	-29
Total assets.....	65.7	150.7	+85.0	+129

Increases for seven years primarily in Government securities. The major increases during the war period occurred in commercial bank holdings of United States Government securities. For the seven years from December 31, 1939 through

December 31, 1946, Federal securities increased from \$16.3 billion to \$75.3 billion (Chart 1). As a proportion of the increase of \$65.0 billion in total commercial bank assets, United States Government securities accounted for more than two-thirds. In relation to total assets United States Government securities rose from 25% on December 31, 1939 to 50% on December 31, 1946. Although still the most important single asset item at the end of the seven-year period, Federal securities declined as a percent of total assets in the last year from 57% to 50%.

Other asset items followed varied trends during the seven-year period from December 31, 1939 through December 31, 1946. Loans and discounts increased by \$13.9 billion or 79% with more than two-thirds of the increase occurring during 1945 and 1946. Loans and discounts accounted for 27% of total assets on December 31, 1939 and 21% on December 31, 1946.

State and local, corporate, and miscellaneous securities in commercial banks amounted to \$7.2 billion on December 31, 1939 and \$8.1 billion on December 31, 1946 an increase of almost \$1.0 billion. They started on a slight upward trend in 1944 after having declined some in the early defense and war years.

The rise of \$11.8 billion in cash for the seven years reflected primarily the growth in bank reserves during the war years.

Liabilities and capital accounts

Debt pay-off program during 1946 reflected primarily in decline of United States Government deposits. Among the liabilities of commercial banks, developments during the calendar year 1946 reflected for

the most part the Treasury's debt pay-off program. The most important change occurred in United States Government deposits in commercial banks, which from December 31, 1945 through December 31, 1946 declined from \$24.8 billion to \$3.2 billion. These deposits were withdrawn from commercial banks by the Federal Government to cover the costs of paying off maturing securities.

The following table presents the various liability items as of December 31, 1945 and 1946.

Chart 2-DEPOSITS OF INDIVIDUALS, PARTNERSHIPS,
AND CORPORATIONS IN COMMERCIAL BANKS^{1/}
December 31, 1939-December 31, 1946

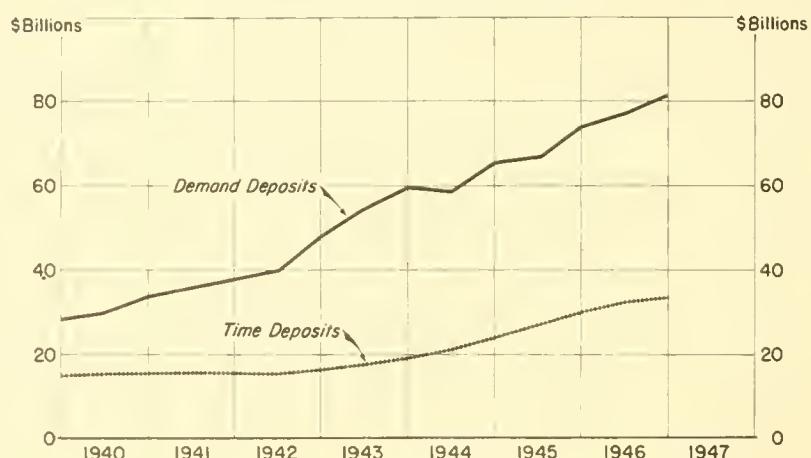

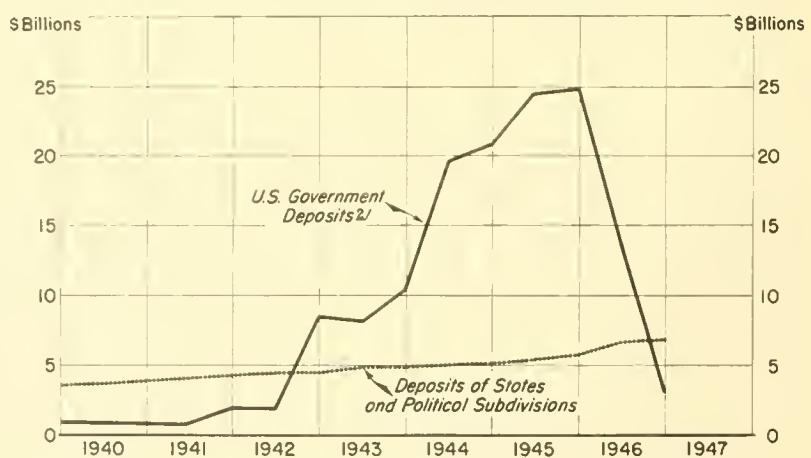

Chart 3-GOVERNMENTAL DEPOSITS IN COMMERCIAL BANKS^{1/}
December 31, 1939-December 31, 1946

^{1/}Comprises national banks, state commercial banks, and private banks as classified by the Comptroller of the Currency. Includes banks in territories and possessions.

^{2/}Includes postal savings deposits.

Commercial bank liabilities and capital accounts	December 31		Change	
	1945	1946	Amount	Percent
(In billions of dollars)				
Liabilities:				
Deposits of individuals, partnerships and corporations:				
Demand.....	73.9	81.3	+7.4	+10
Time.....	30.0	33.5	+3.5	+12
U. S. Government and postal savings deposits.....	24.8	3.2	-21.6	-87
Deposits of States and political subdivisions.....	5.8	6.9	+1.1	+19
Deposits of banks...	14.1	12.7	-1.4	-10
Other deposits and miscellaneous liabilities.....	3.8	3.5	-.3	-7
Total liabilities...	152.3	141.1	-11.3	-7
Capital accounts.....	9.0	9.7	.6	+7
Total liabilities and capital accounts.....	161.4	150.7	-10.6	-7

Deposits of individuals, partnerships, and corporations continued to increase. As the table shows, the decline in United States Government deposits was to a large extent offset by the rise in demand and time deposits of individuals, partnerships, and corporations in commercial banks. The cause of decline in one - the debt pay-off program - was responsible for some part of the increase in the other, since withdrawals of Federal deposits were distributed to other investors in the form of pay-offs and redeposited with commercial banks. The primary reason for the increase, however, was the fact that the growth of loans was accompanied by a comparable growth in deposits.

Major portion of total liability increase since December 31, 1939 concentrated in deposits of individuals, partnerships, and corporations. For the seven-year period from December 31, 1939 through December 31, 1946, the major portion of the \$85.0 billion increase on the liability side of the commercial bank balance sheet was concentrated in demand and time deposits of individuals, partnerships, and corporations (Chart 2). Demand deposits of individuals, partnerships, and corporations rose from \$28.2 billion to \$81.3 billion, an increase of \$53.1 billion, while time deposits increased from \$14.9 billion to \$33.5 billion or by \$18.6 billion.

The following table shows the major liabil-

ity items as of December 31, 1939 and 1946 and the change for the seven years.

Commercial bank liabilities and capital accounts	December 31		Change	
	1939	1946	Amount	Percent
(In billions of dollars)

The change in United States Government deposits for the seven-year period as a whole naturally obscures the variation of trend during the period. Chart 3 shows the way United States Government deposits grew during the war period when the Treasury's cash balance was built up during the war loan drives and the decline during the last year resulting from the debt reduction program.

The growth in deposits of States and political subdivisions since December 31, 1939 is also presented in Chart 3. The high revenues of State and local governments during the war built up their surplus funds, since public building programs, in the same way as private, were almost completely stopped during the war years.

Capital accounts followed slow upward trend. Capital accounts of commercial banks have followed a slow upward trend from December 31, 1939 through December 31, 1946. They increased from \$7.0 billion at the beginning of the period to \$9.7 billion at the end, a rise of 38%. Most of the increase occurred in surplus, undivided profits, and reserves.

Accordingly, the growth in capital accounts was substantially less than the growth in total

deposits. This is reflected in a decline in the ratio of capital accounts to total deposits - dropping from 12% at the end of 1939 to 7% as of December 31, 1946 (Chart 4, lower curve). On the other hand, there was, of course, a very sharp increase in the coverage of deposits in the form of cash and Federal securities as noted above. If the ratio is revised so as to include only deposits not covered by cash and Government securities most of the declining trend is eliminated. That is to say, capital accounts as a percentage of total deposits not covered by cash and Federal securities was 36% at the end of 1939 and 32% at the end of 1946. Chart 4 (upper curve) shows this ratio by semi-annual dates over the seven-year period.

The fluctuations over the period reflect the relative importance of the various causes of the growth of deposits. A faster relative growth for Federal securities than for other assets produces an upward tendency in the curve. A slower relative growth for holdings of Federal securities moves the curve downward. The last part of the curve shows the effect of the pay-off program in reducing Government securities while bank loans were increasing.

Table 1, at the end of the article, presents detailed data on commercial bank assets and liabilities for each year since December 31, 1939.

Mutual Savings Banks

Assets

Mutual savings bank assets continued to increase during the calendar year 1946. During the calendar year 1946, total assets of mutual savings banks continued to increase at a rate almost as high as that of the war period. Thus, for the year 1946, mutual savings bank assets increased by \$1.7 billion as compared with \$2.2 billion for the previous year.

The following table presents the major asset items of mutual savings banks as of December 31, 1945 and December 31, 1946.

Mutual savings bank assets	December 31		Change	
	1945	1946	Amount	Percent
(In billions of dollars)				
U. S. Government direct and guaranteed obliga- tions.....	10.7	11.8	+1.1	+10
Loans and discounts....	4.3	4.5	.2	+6
Other securities.....	1.2	1.4	.2	+13
Cash and interbank and reserve balances.....	.6	.8	.2	+34
Other assets.....	.2	.2	0	-13
Total assets.....	<u>17.0</u>	<u>18.7</u>	<u>+1.7</u>	<u>+10</u>

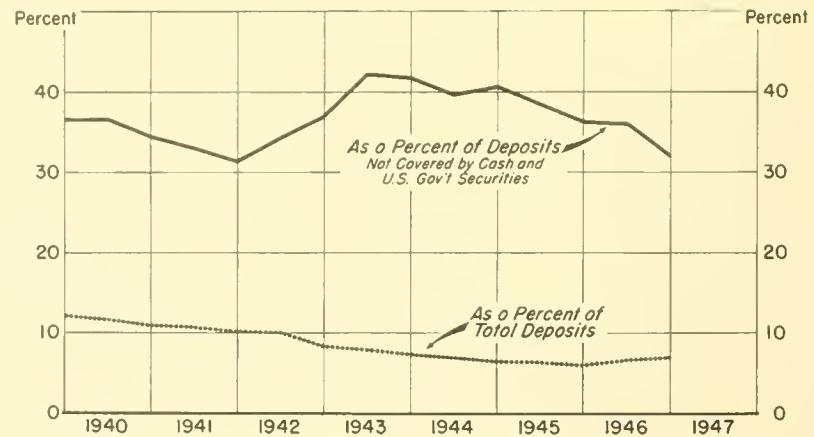

* Less than \$50 million.

Government securities accounted for most of the increase. The major portion of the rise in mutual savings bank assets was accounted for in their holdings of United States Government securities, which increased by \$1.1 billion during 1946. The Treasury's debt pay-off program had almost no effect upon these holdings, since mutual savings banks owned very small amounts of the securities which were paid off in cash. On the other hand, they continued to buy Government securities from other investors in the market, thereby showing an increase in their holdings for the year.

The remaining \$0.6 billion increase was distributed evenly between loans and discounts, other securities, and cash. The rise of \$0.2

Chart 4-CAPITAL ACCOUNTS AS A PERCENT OF DEPOSITS IN COMMERCIAL BANKS^y

December 31, 1939-December 31, 1946

^yComprises national banks, state commercial banks, and private banks as classified by the Comptroller of the Currency
Includes banks in territories and possessions

billion in loans and discounts, which in the case of mutual savings banks means real estate loans primarily, is important as an indication of a change in trend in this item. The increase in loans during the calendar year 1946 was the first sign of a rise since 1940.

Total mutual savings bank assets rose 57% since December 31, 1939. For the seven-year period from December 31, 1939 through December 31, 1946, total assets of mutual savings banks rose from \$11.9 billion to \$18.7 billion, an increase of \$6.8 billion or 57% (Chart 5).

The table below shows the major asset items as of December 31, 1939 and December 31, 1946, and the change over the seven-year period.

Mutual savings bank assets	December 31		Change	
	1939	1946	Amount	Percent
(In billions of dollars)				
U. S. Government direct and guaranteed obligations.....	3.1	11.8	+8.7	+279
Loans and discounts....	4.9	4.5	-.4	-8
Other securities.....	2.2	1.4	-.8	-36
Cash and interbank and reserve balances.....	.8	.8	*	*
Other assets.....	.8	.2	-.6	-79
Total assets.....	11.9	18.7	+6.8	+57

* Less than \$50 million or 0.5%.

As the table shows, the increase since December 31, 1939 in mutual savings bank holdings of United States Government securities was greater than the rise in total assets. A decline of \$1.5 billion in loans and discounts, other securities, cash, and other assets accounted for about one-fifth of the increase in Government securities held by mutual savings banks. In relation to total assets, Government securities accounted for 26% on December 31, 1939 and 63% on December 31, 1946.

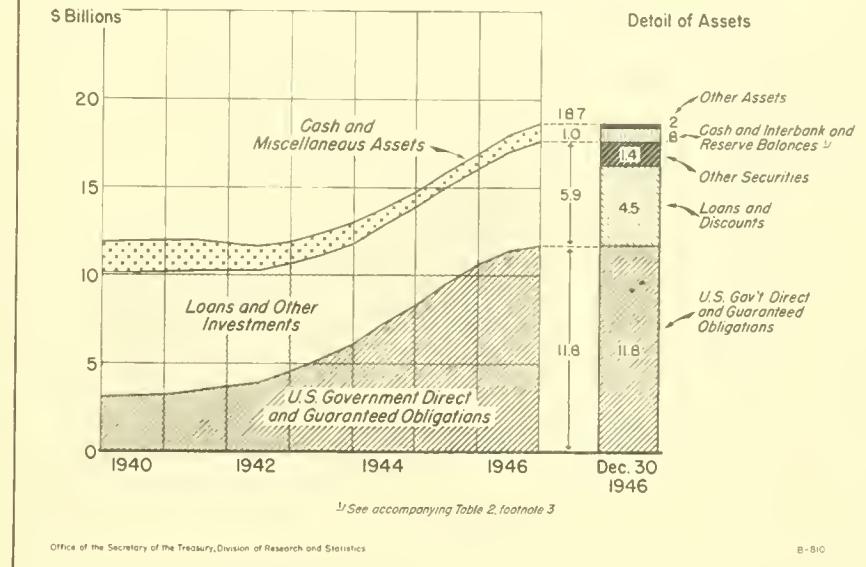

Liabilities and capital accounts

Mutual savings bank time

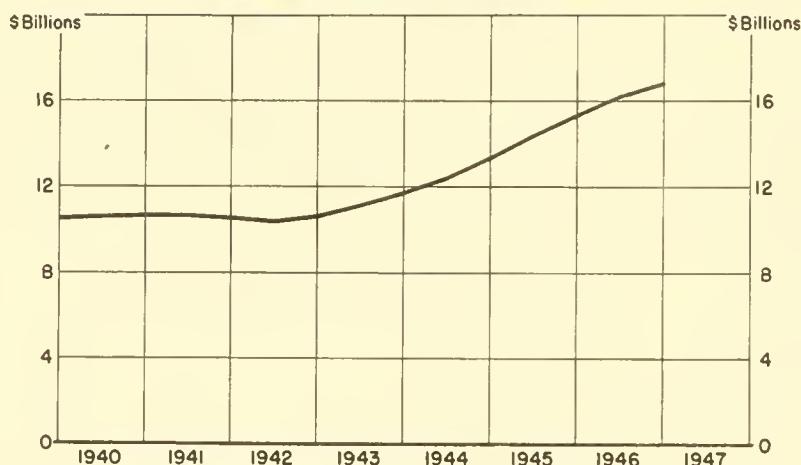

deposits show rate of increase similar to that of commercial banks. Liabilities of mutual savings banks are almost completely concentrated in time deposits of individuals, partnerships, and corporations, since mutual savings banks are permitted to hold time deposits only and other groups own only negligible amounts of these deposits. During the calendar year 1946, these deposits increased from \$15.3 billion to \$16.8 billion, an increase of \$1.5 billion or 10%. This increase was at a rate similar to that of commercial banks, which for the period from the end of 1939 through 1945 had been increasing at a sharply higher rate.

For the seven years from December 31, 1939 through 1946, deposits increased from \$10.5 billion to \$16.8 billion, or by \$6.3 billion (Chart 6). This was a percentage increase of 60% for the seven years, as compared with the increase of 125% for time deposits in commercial banks over the same period. The lag in deposit holdings of mutual savings banks reflects the geographical location of these banks in the northeastern part of the country. These States, although they expanded considerably, were nevertheless substantially less affected by wartime financial and industrial growth than other areas of the country. The data presented in the article "Geographic Distribution of Bank Deposits" in the May 1945 issue of the "Treas-

ury Bulletin" show the importance of location in bank deposit growth during the war years.

Capital accounts of mutual savings banks, which declined slightly in the early war years, showed a slow, upward trend since 1942. They rose from \$1.3 billion to \$1.8 billion for the seven-year period. Table 2 accompanying this article gives more detailed data for mutual savings banks for each year since December 31, 1939.

Source: Annual Reports of the Comptroller of the Currency.

^{1/} Comprise national banks, State commercial banks, and private banks as classified by the Comptroller of the Currency. Excludes assets and liabilities of private banks not reporting to State bank supervisors.^{2/} Includes territories and insular possessions. (Banks in Guam were excluded from December 31, 1942 through December 31, 1944 because of the war. Banks in the Philippines were excluded from December 31, 1942 through December 31, 1945 because of the war, and from then on because of the granting of independence.)^{3/} Beginning with December 31, 1942 reciprocal interbank demand balances with banks in the United States have been excluded. For December 31, 1941 and prior dates, demand balances were reported gross.^{4/} The Comptroller's figures did not separate demand and time deposits for these items. They were estimated on the basis of Federal Deposit Insurance Corporation data for insured commercial banks.^{5/} Postal savings figures were separated from U. S. Government time deposits on the basis of data in the "Federal Reserve Bulletin," table entitled "Postal Savings System."

Individual Income Tax Returns for 1944

Secretary of the Treasury Snyder recently made public data tabulated from individual income tax returns for the income year 1944. The complete tabulations will appear in "Statistics of Income for 1944, Part 1," which will be published at some future date. The data summarized in this article cover all returns filed in 1944 and supersede the preliminary tabulations from returns with adjusted gross income of less than \$25,000 published in the March and April 1946 issues of the "Treasury Bulletin." 1/ Tabulations from individual returns for 1943 were published in the June 1947 issue of the "Treasury Bulletin."

Changes in the Internal Revenue Code

The 1944 tabulations reflect, for the first time, the changes made for purposes of simplification under the Individual Income Tax Act of 1944. This Act introduced the concept of adjusted gross income and per capita exemptions, increased the standard deduction, broadened the scope of the Supplement T tax table, and simplified the tax return forms. 2/ A description of these important new features is given below.

Adjusted gross income. The breakdown by income classes in the attached tables is made on the basis of a new concept called "adjusted gross income." This concept is defined as gross income minus allowable business deductions, expenses of travel and lodging away from home, reimbursed expenses connected with employment, and deductions attributable to rents and royalties, etc. (See item 5 of facsimile of Form 1040 attached.) For example, the adjusted gross income of a wage earner generally is his total receipts from wages subject to withholding, while that of a businessman is his total sales minus cost of goods sold and other business deductions. Adjusted gross income provides a method of placing different

kinds of gross income substantially on a par, so that tax liabilities may be determined directly from a tax table without determining net income. About four-fifths of the taxpayers no longer determine their net income for tax purposes and, consequently, the income distributions will henceforth be by adjusted gross income classes as compared with the net income classes used in the past.

The per capita surtax exemption. Surtax exemptions of \$500 for the taxpayer, \$500 for his spouse and \$500 for each dependent were allowed as a credit against net income for the purpose of surtax. These per capita exemptions permitted the construction of a new simplified tax table. (See below.)

The standard deduction. To relieve more taxpayers of having to itemize personal deductions such as contributions, medical expenses, taxes, interest, and casualty losses, the standard deduction incorporated in the tax table was increased from about 6% to 10% and was made applicable to adjusted gross incomes of less than \$5,000. For taxpayers with adjusted gross income of \$5,000 or more, a flat \$500 standard deduction in lieu of itemized deductions was added.

The new Supplement T tax table. The scope of the Supplement T tax table, which provides a simple method of determining final tax liability, was broadened (a) by raising the upper limit of the table from \$3,000 to \$5,000, (b) by extending its use to taxpayers with all types of income, and (c) by incorporating a standard deduction of about 10%. In addition, the use of the table was simplified as a consequence of the per capita exemptions.

1/ For more detailed tabulations, see the Secretary's press release, Treasury Department Press Service No. S-366, dated June 25, 1947.

2/ Other changes in the Individual Income Tax Act of 1944 and the Revenue Act of 1943 affect the comparability of 1943 and 1944 data. For example, the definition of a dependent and the treatment of a dependent's income were simplified. A dependent was redefined as a close relative with income of less than \$500 who received more than one-half of his support from the taxpayer. Each person, including minors, who had \$500 or more gross income was required to file a return. A normal tax exemption of \$500 was allowed as a credit against

net income for the purpose of the normal tax; however, in the case of a joint return of husband and wife, the normal tax exemption was \$1,000 except that, if the adjusted gross income of one spouse was less than \$500, the normal tax exemption was \$500 plus the adjusted gross income of such spouse. The Victory tax and the earned income credit were repealed. The normal tax rate was reduced from 6% to 3% and the surtax rates were increased to 20% on surtax net income of less than \$2,000, rising to 91% on surtax net income of \$200,000 and over. A more complete description of the changes in the Internal Revenue Code is given in the Secretary's press release noted above.

Simplified tax forms. The old Form 1040A was discarded and a new Form 1040 was designed, which included a "short" form for persons using the tax table and a "long" form for persons making their own tax computations. In addition, wage earners with adjusted gross income of less than \$5,000, derived entirely from wages subject to withholding, and not more than \$100 of income from wages not subject to withholding, interest, and dividends, were permitted to elect to have their taxes computed by the collectors of internal revenue and to use their withholding receipt, Form W-2, as a final tax return. (See facsimile of Form W-2 attached.)

On the basis of these changes, the returns of taxpayers may be divided into the following three broad categories:

Form	Description
Form W-2	This form was filed by wage earners with adjusted gross incomes of less than \$5,000 (derived entirely from wages, interest, and dividends, including not more than \$100 from such sources not subject to withholding) and whose deductions were less than about 10% of adjusted gross income. These taxpayers had their final tax liabilities determined for them by the collectors of internal revenue on the basis of the Supplement T tax table.
Form 1040 (short)	This form was filed by taxpayers with adjusted gross incomes of less than \$5,000 from any source, who desired to determine their tax from the new Supplement T tax table incorporating the 10% standard deduction.
Form 1040 (long)	This form was filed by two types of taxpayers who continued to make detailed tax computations: (a) Those with adjusted gross incomes of \$5,000 or more. These taxpayers were given the option of claiming either the \$500 standard deduction or of continuing to itemize their actual deductions. (b) Those with adjusted gross incomes of less than \$5,000 who itemized their actual deductions.

1/ The individual income tax returns included in the 1944 tabulations were for (1) the calendar year 1944, (2) a fiscal year ending within the period July 1944 through June 1945, and (3) a part year with the greater part of the accounting period in 1944. The returns included Forms W-2 and 1040 filed by citizens and resident aliens and Forms 1040B filed by nonresident aliens having a business within the United States. Tentative returns were not included and amended returns were used only if the original returns were excluded. Statistics were taken from the returns as filed, prior to revisions that may have been made as a result of audit.

2/ Income for 1943 is total income as tabulated in "Sta-

Number of returns, adjusted gross income and taxes

For 1944, about 47 million individual income tax returns were filed. 1/ This was an increase of 3.4 million, or 8% over the number of returns filed for 1943. A distribution of the total number of returns filed for 1944 by type of return is presented in the following table:

Type of return	Number of returns (In thousands)
Form W-2.....	18,427
Form 1040 (short).....	18,943
Form 1040 (long).....	9,742
Total.....	47,111

Of the 47 million returns, 42 million were taxable and, of these taxable returns, 40 million, or 94%, reported adjusted gross incomes of less than \$5,000. The adjusted gross income reported on all taxable returns was \$115 billion, of which the returns under \$5,000 accounted for \$89 billion or 77%. The total tax liability was \$16 billion, and taxpayers under \$5,000 paid \$9 billion, or 54%. (See chart on page A-19.)

	1943	1944	Increase	
	(In thousands)			
Number of returns:				
Taxable returns...	40,240	42,354	2,114	5
Nontaxable returns	3,482	4,757	1,275	37
Total returns.....	43,722	47,111	3,389	8
	(In millions of dollars)			
Adjusted gross income: 2/				
Taxable returns...	104,446	114,761	10,316	10
Nontaxable returns 3/.....	1,416	1,704	287	20
Total adjusted gross income 3/..	105,862	116,465	10,603	10
Tax liability 4/.....	14,450	16,216	1,766	12

tistics of Income for 1943" adjusted by subtracting therefrom the net loss from sales of capital assets, net loss from sales of property other than capital assets, and net losses from business, from partnership, and from rents and royalties.

3/ Adjusted gross income less adjusted gross deficit.
4/ Tax liability after deducting tax credits relating to tax paid at source and to tax paid to a foreign country or United States possession. For 1943 the tax shown is the income and Victory tax on 1943 income and excludes additions to liability under the Current Tax Payment Act of 1943.

TAXABLE INDIVIDUAL INCOME TAX RETURNS IN 1944

Those under \$5,000 were 94% of number of returns, and accounted for 77% of income and 54% of tax

Note. Classification is by adjusted gross income

Office of the Secretary of the Treasury, Division of Research and Statistics

B-8

The total tax liability for 1944 of \$16 billion was an increase of almost \$2 billion over the income and Victory tax liability on 1943 incomes. The table on the preceding page presents a summary comparison of the number of returns, income, and tax liability for 1943 and 1944. The income figures for 1943 were adjusted to make them comparable with the new 1944 adjusted gross income concept.

More detailed data are shown in the three tables accompanying this article. Table 1 presents the number of returns, sources of income, adjusted gross income, exemptions, and tax liability for all returns by adjusted gross income classes. Table 2 presents the number of returns, adjusted gross income, deductions, and tax liability for returns with itemized deductions by adjusted gross income classes. Table 3 presents the number of returns, adjusted gross income, surtax exemptions, and tax liability for returns with adjusted gross income under \$5,000 and \$5,000 and over, by marital status and sex.

Description of the sample

The data in this article were derived from a basic sample of the individual income tax returns, consisting of 1% of Forms W-2, 1% of Forms 1040 with adjusted gross income of less than \$7,000, 10% of returns with adjusted gross income from \$7,000 to \$10,000, 20% of returns with adjusted gross income from \$10,000 to \$25,000, and 100% of returns with adjusted gross income of \$25,000 and over. Since the frequencies in the attached tables are estimated from a sample, they differ from actual frequencies which would be obtained if the entire universe were tabulated. For example, frequencies of the magnitude of 1 million or more in adjusted gross income classes under \$7,000 are subject to variation of less than 3%. At the other extreme, frequencies of 1,000 to 10,000 in this area are subject to a maximum variation between 100% and 30%. 1/

1/ For a more detailed description of the sample and reliability of the data, see the Secretary's press release referred to above.

Individual Income Tax Returns for 1944 - (Continued)

Footnotes

- * Less than \$50,000.
- 1/ Adjusted gross income classes are based on the amount of adjusted gross income (see note 12), regardless of the amount of net income or net deficit when computed; returns with adjusted gross deficit are designated no adjusted gross income and the size of the deficit is disregarded.
- 2/ Salaries and wages include annuities, pensions, and retirement pay not reported in the schedule for annuities and pensions, but exclude wages of less than \$100 per return from which no tax was withheld, reported on Form W-2. Such wages are tabulated with miscellaneous income. (See note 11.)
- 3/ Dividends, domestic and foreign, and interest before amortization of bond premium. This item includes both taxable and partially tax-exempt interest on Government obligations and dividends on share accounts in Federal savings and loan associations, but excludes dividends and interest not exceeding \$100 per return reported on Form W-2. Such dividends and interest are tabulated with miscellaneous income. (See note 11.)
- 4/ Income from annuities and pensions is only the taxable portion of amounts received during the year. Amounts received to the extent of 3 percent of the total cost of the annuity are reported as income for each taxable year, until the aggregate of amounts received and excluded from gross income in this and prior years equals the total cost. Thereafter, entire amounts received are taxable and must be included in adjusted gross income. Annuities, pensions, and retirement pay upon which tax is withheld may be reported in salaries and wages.
- 5/ Net profit from rents and royalties is the excess of gross rents received over deductions for depreciation, repairs, interest, taxes, and other expenses attributable to rent income; and the excess of gross royalties over depletion and other royalty expenses. Conversely, net loss from these sources is the excess of the respective expenses over gross income received.
- 6/ Net profit from business is the excess of gross receipts over deductions for business expenses and net operating loss deduction due to a net operating loss from business, partnership, and common trust funds for the preceding year or years. Conversely, net loss from business is the excess of business expenses and net operating loss deductions over the gross receipts from business.
- 7/ Partnership net profit or loss excludes partially tax-exempt interest on Government obligations, dividends on share accounts in Federal savings and loan associations issued prior to March 28, 1942, and net gain or loss from sales of capital assets. In computing partnership profit or loss, charitable contributions are not deductible nor is the net operating loss deduction allowed.
- 8/ Net gain from sales or exchanges of capital assets is the amount taken into account in computing adjusted gross income whether or not the alternative tax is imposed. Net loss from such sales is the amount reported as a deduction in computing adjusted gross income. Each is the result of combining net short- and long-term capital gain and loss and the net capital loss carried over from 1942 and/or 1943. Deduction for the loss, however, is limited to the amount of such loss, or to the net income (adjusted gross income if taxed under supplement T) computed without regard to gains and losses from sales of capital assets, or to \$1,000, whichever is smallest. Sales of capital assets include worthless stocks, worthless bonds if they are capital assets, nonbusiness bad debts, certain distributions from employees' trust plans, and each participant's share of net short- and long-term capital gain and loss to be taken into account from partnerships and common trust funds.
- 9/ Net gain or loss from sales or exchanges of property other than capital assets is that from the sales of (1) property used in trade or business of a character which is subject to the allowance for depreciation, (2) obligations of the United States or any of its possessions, a State or Territory or any political subdivision thereof, or the District of Columbia, issued on or after March 1, 1941, on a discount basis and payable without interest at a fixed maturity date not exceeding one year from date of issue, and (3) real property used in trade or business.
- 10/ Income from estates and trusts excludes partially tax-exempt interest on Government obligations, dividends on share accounts in Federal savings and loan associations issued prior to March 28,
- 1942, and net gain or loss from sales or exchanges of capital assets received from common trust funds. The net operating loss deduction is allowed to estates and trusts generally and is deducted in computing the income to be distributed. However, in the case of a common trust fund the net operating loss deduction is not allowable, but each participant's share of prior year income and losses of the fund is taken into account in determining his own net operating loss deduction.
- 11/ Miscellaneous income includes alimony received, prizes, rewards, sweepstakes winnings, gambling profits, recoveries of bad debts for which a deduction was taken in a prior year, and health and accident insurance received as reimbursement for medical expenses for which deduction was taken in a prior year. Also tabulated in miscellaneous income is \$45,873,383 of wages not subject to withholding, dividends, and interest, not exceeding in total \$100 per return, reported as other income on Form W-2.
- 12/ Adjusted gross income means gross income minus allowable trade and business deductions, expenses of travel and lodging in connection with employment, reimbursed expenses in connection with employment, deductions attributable to rents and royalties, certain deductions of life tenants and income beneficiaries of property held in trust, and allowable losses from sales or exchanges of property. Should these allowable deductions exceed the gross income, there is an adjusted gross deficit.
- 13/ Surtax exemption is \$500 for the taxpayer, \$500 for the taxpayer's spouse if not dependant upon another person, and \$500 for each dependent with respect to whom a surtax exemption may be claimed. Such dependents must have received from the taxpayer more than half their support for the year and must have had less than \$500 gross income during the year. Dependents include only close relatives which are specified by law.
- 14/ Tax liability after deducting tax credits relating to income tax paid at source on tax-free covenant bonds and to income tax paid to a foreign country or United States possession, allowed only on returns with itemized deductions.
- 15/ Payments on 1944 declaration of estimated tax include (1) the total amount of estimated tax reported on Form 1040-ES and (2) the credit for prior year overpayment if no Form 1040-ES was filed. (If Form 1040-ES was filed, prior year overpayment was credited against the total estimated tax.)
- 16/ Nontaxable returns are those with no adjusted gross income and returns with adjusted gross income which when reduced by deductions, standard or itemized, and exemptions result in no tax liability.
- 17/ The no adjusted gross income classification is for returns showing other loss on line 4, page 1, facsimile of Form 1040 attached, equal to or in excess of salaries, wages, dividends, and interest.
- 18/ Adjusted gross deficit.
- 19/ Adjusted gross income less deficit.
- 20/ Returns with itemized deductions are long-form returns, Form 1040, on which deductions are itemized; long-form returns, Form 1040, with no deductions filed by spouses of taxpayers who itemized deductions; and returns, Form 1040, with no adjusted gross income whether or not deductions are itemized.
- 21/ Joint returns of husbands and wives include all combined returns of husbands and wives, Form W-2, whether community or noncommunity income is reported, even though the tax is determined on the basis of separate incomes.
- 22/ Separate returns of husbands and wives exclude combined returns of husbands and wives, Form W-2, even though the tax is determined on the basis of separate incomes. The unequal number of returns for men and women is the result of (1) use of a sample as the basis of estimating data, (2) insufficient data to identify such returns, and (3) deferment of filing returns by men in service.
- 23/ Separate community property returns of husbands and wives exclude combined returns of husbands and wives, Form W-2, showing community property divided in accordance with State laws and tax determined on the basis of divided community income. The unequal number of returns for men and women is the result of (1) use of a sample as the basis of estimating data, (2) insufficient data to identify such returns, and (3) deferment of filing returns by men in service.

Treasury Market Financing

Historical details of Treasury market financing operations involving bonds, notes, and certificates of indebtedness, beginning with the Fifth War Loan, are published in the tables on pages 30 and 31. Details of weekly Treasury bill offerings are shown on pages 32 and 33.

June certificate maturity

On June 1, 1947, there was a maturity of an issue of 7/8% certificates of indebtedness outstanding in the amount of \$2,775 million. Secretary of the Treasury Snyder announced on May 21, 1947 an offering of a new, one-year 7/8% certificate issue in exchange, par for par, for about \$1.8 billion of the maturing certificates, with the remainder to be paid in cash. Subscriptions for the new issue were received subject to allotment to all holders on an equal percentage basis, except that subscriptions in amounts of \$25,000 or less were allotted in full. Cash subscriptions were not received.

The new certificates were dated June 1, 1947 and will mature June 1, 1948. They will bear interest at the rate of 7/8% per annum which will be subject to all Federal income taxes. Interest will be payable in full with the principal at maturity. The certificates were issued in bearer form only in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Subscription books were closed at the end of business on May 23, 1947. On May 26, 1947, Secretary Snyder announced that subscriptions for the new issue aggregated \$2,503 million. Subscriptions in amounts of \$25,000 or less were allotted in full in the amount of \$59 million. Subscriptions in amounts of over \$25,000 were allotted 70% on a straight percentage basis but not less than \$25,000 to any one subscriber, and with adjustment to the next highest thousand where necessary. Total allotments amounted to \$1,777 million, leaving \$998 million to be paid in cash.

Reports to the Treasury on the ownership of the debt indicate that about \$1.1 billion of the maturing certificates was owned by reporting commercial banks and the Federal Reserve Banks as of April 30, 1947. The ownership data as of April 30, are the latest available.

Treasury bill retirement in May

The retirement of maturing Treasury bills which was started by the Treasury in the middle of April was continued at a reduced pace in May.

Bills maturing in the amount of \$1.3 billion in each week in May were reduced by a total of \$0.6 billion, as follows:

Bills maturing	Amount retired
	(In billions of dollars)
May 1.....	0.2
May 8.....	0.2
May 15.....	0.1
May 22.....	0.1
May 29.....	-
Total.....	<u>0.6</u>

Treasury bills, which were outstanding in the amount of \$17.0 billion on April 17 when the bill retirement program began, were reduced to \$16.0 billion after the reductions in May. The decline of \$1.0 billion was accounted for by reductions of \$0.4 billion in April and \$0.6 billion in May.

Total debt retirement from March 1, 1946

From March 1, 1946, the beginning of the debt pay-off program, through June 2, 1947 cash payments on maturing securities aggregated \$30.9 billion. The pay-offs in 1946 and 1947 were distributed as follows among the various types of securities:

Cash Pay-Offs on Maturing Securities
March 1, 1946-June 2, 1947

	1946	1947	Total
	Mar. 1- Dec. 31	Jan. 1- June 2	
(In billions of dollars)			
Treasury bills.....	-	1.0	1.0
Certificates of in- debt and 0.90%			
Treasury notes... Other Treasury notes	16.3 4.6	4.7 1.9	21.0 6.5
Treasury bonds.....	2.3	* 1/	2.4 1/
Total.....	23.2	7.7	30.9

* Less than \$50 million.

1/ Includes \$13 million paid in cash for conversion bond which matured January 1, 1947.

Sources of funds for debt retirement

The funds used to retire the \$23.2 billion of debt in 1946 were derived from distinctly different sources from those used for retiring the \$7.7 billion in 1947. The following table pre-

sents the distribution of the sources of funds for the period March 1-December 31, 1946 as compared with January 1-June 2, 1947.

Sources of Funds for Debt Retirement
March 1, 1946-June 2, 1947

	1946	1947	Total
	Mar. 1- Deo. 31	Jan. 1- June 2	
(In billions of dollars)			
Reduction in cash balance.....	22.5	0.6	23.1
Net budgetary surplus.....	-1.7	0.6	-1.1
Net trust fund receipts.....	-.5	0.7	0.2
Increase in other debt:			
Savings bonds...	1.1	1.4	2.6
Special issues..	3.7	1.6	5.3
Other.....	-1.8	2.7	0.9
Total.....	23.2	7.7	30.9

As the table shows, the primary source for debt retirement in 1946 was the cash balance built up by oversubscriptions to the Victory Loan in December 1945. In 1947, on the other hand, other sources such as net surpluses in budgetary and trust fund activities, and a continued growth in other public debt items provided most of the funds for debt pay-offs.

On June 2, 1947 the total public debt ^{1/} was outstanding in the amount of \$257.6 billion. This was a net reduction of \$22.2 billion from the peak of \$279.8 billion on February 28, 1946, when the debt retirement program was started. The difference between the net decline in the debt and the total cash pay-offs of \$30.9 billion on marketable securities is accounted for by the increases in other public debt items outlined above. A more detailed discussion of the debt reduction program since it was started was published in the May 1947 issue of the "Treasury Bulletin."

Call of 4-1/4% Treasury bonds

On June 13, 1947, Secretary of the Treasury Snyder announced that the 4-1/4% Treasury bonds of 1947-52 were called for redemption on October 15, 1947 and would be paid in cash. These bonds were dated October 16, 1922. Their final maturity date was October 15, 1952 with the option to call for redemption by the Treasury, on four months' notice, on any interest payment date from October 15, 1947 to final maturity. There are outstanding \$759 million of these bonds. The issue is partially tax-exempt.

^{1/} Includes guaranteed obligations in the hands of the public.

July 1947

1

n.e. Not available.

* Less than \$500,000.

1/ Based upon the 1948 Budget document, Appendix 7, released in January 1947.

2/ The President released revised budget totals for the fiscal year 1947 on April 19, 1947; details for expenditures were released on April 22, 1947 by the Acting Assistant Director of the Budget in testimony before the Senate Finance Committee.

3/ Includes chiefly alcoholic beverages taxes, tobacco taxes, manufacturers' and retailers' excise taxes, and estate taxes.

4/ Includes deposits resulting from the renegotiation of war contracts. Information on the amount of such deposits is not available on the

basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1945, \$2,041 million and fiscal year 1946, \$1,063 million. Deposits are estimated at \$408 million for fiscal year 1947 and \$193 million for fiscal year 1948. These figures include so-called voluntary returns.

5/ Includes transfers to trust accounts, etc.

6/ Includes expenditures for public works undertaken by Veterans' Administration.

7/ Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Department of Labor, U. S. Employment Service (formerly Office for Emergency Management, War Manpower Commission, U. S. Employment Service), under authority of the Social Security Act.

Source: Daily Treasury Statement.

1/ Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc. under special provisions of law.

2/ For explanation see tables which follow entitled "Social Security Program."

3/ Net receipts less total expenditures.

4/ Includes recoveries of U. S. investments in capital funds. Such recoveries totaled \$54 million in the fiscal year 1940; \$319 million in the fiscal year 1941; \$18 million in the fiscal year 1942; and \$10 million in the fiscal year 1943.

5/ Receipts from reductions in capital stock and paid-in surplus available to be reissued under existing law are included as negative items under expenditures. Such reductions totaled \$315 million.

6/ Includes deposits resulting from the renegotiation of war contracts. Information on the amount of such deposits is not available on the basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1943, \$558 million; fiscal year 1944, \$2,235 million; fiscal year 1945, \$2,041 million, and fiscal year 1946, \$1,063 million. These figures include so-called voluntary returns.

Source: Daily Treasury Statement.

* Less than \$500,000.

1/ For further details, see chapter entitled "Internal Revenue Statistics."

2/ Excludes receipt of victory taxes withheld pursuant to the Revenue Act of 1942. Such receipts have been classified as "Other" income and profits taxes.

3/ Includes unjust enrichment tax.

4/ For the period prior to September 1939, the data in the columns entitled "Federal Insurance Contributions Act" and "Federal Unemployment Tax" represent collections under Titles VIII and IX, respectively, of the Social Security Act.

5/ Includes less than \$500,000 in receipts from "Agricultural Adjustment taxes."

Source: Daily Treasury Statement.

* Less than \$500,000.

^{1/} General expenditures now include expenditures for revolving funds; back figures have been revised accordingly.^{2/} Includes public works undertaken by the Veterans' Administration.^{3/} Does not include transfers to trust accounts, etc. These are shown in Table 5.^{4/} "Refunds of taxes" include amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and exclude refunds of taxes under the Social security program. Excess profits tax refund bonds were formerly issued to corporations entitling them to a post-war credit equal to 10% of the excess profits tax paid. The Tax Adjustment Act of 1945 reduced by 10% the amount of excess profits tax to be paid and abolished the post-war credit. For amounts of excess profits tax refund bonds issued, see the first table in chapter entitled "Public Debt and Guaranteed Obligations of the United States Government." Outstanding excess profits tax refund bonds may be redeemed at the option of the holder commencing January 1, 1946; when such redemptions occur, they will appear as retirements of public debt.^{5/} Consists of Department of Agriculture expenditures, except forest roads and trails which are included in Public works. Amounts for restoration of capital impairment of Commodity Credit Corporation are as follows: Fiscal year 1945, \$257 million; July 1946, \$921 million and May 1947, \$642 million.^{6/} Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Department of Labor, U. S. Employment Service (formerly Office for Emergency Management, War Manpower Commission, U. S. Employment Service), under authority of Social Security Act. For further details, see tables which follow on the Social security program.^{7/} Includes public buildings, public highways (including forest roads and trails), river and harbor work and flood control, Tennessee Valley Authority, Federal Public Housing Authority (formerly U. S. Housing Authority), reclamation projects and the Public Works Administration. Excludes certain expenditures for public works in connection with war activities by the Federal Works Agency, beginning July 1941.^{8/} Consists of payments under Bretton Woods Agreements Act - International Bank; credit to United Kingdom; and Export-Import Bank of Washington - capital stock.^{9/} Classified as Other expenditures commencing July 1, 1945. For additional information on Direct and work relief, see "Treasury Bulletin" for August 1945, page 6.^{10/} Gross expenditures have been reduced \$315 million representing the repayment of capital funds by certain United States Government agencies. For further details see "Treasury Bulletin" for June 1943, page 9, footnote 12.^{11/} Includes \$500 million for Commodity Credit Corporation - postwar price support of agriculture.

* Less than \$500,000.

1/ Administrative expenses in carrying out provisions of Act are included under War, Navy, and Treasury (Coast Guard) Departments.

2/ Includes war public housing functions.

2/ Includes war expenditures of Commerce, Justice, Interior, Labor, and State Departments; Civil Service Commission; Executive Office of the President (including Office for Emergency Management); Panama Canal; and capital stock of Smaller War Plants Corporation. Includes Defense Aid Special Fund through the fiscal year 1943; thereafter

such expenditures are reflected within the respective departments.

4/ Classification changed to reflect expenditures for the fiscal year 1946 under "War activities." Prior year expenditures are included under "General."

5/ Effective September 1, 1946, expenditures of the War Shipping Administration are included with the expenditures of the U. S. Maritime Commission to which all functions were transferred for the purpose of liquidation by December 31, 1946, pursuant to Sec. 202, public law 492, approved July 8, 1946.

• Less than \$500,000.

1/ Includes transactions on account of RFC Mortgage Company, Federal National Mortgage Association, Office of Metals Reserve, Office of Rubber Reserve, Office of Defense Plants, Office of Defense Supplies, U. S. Commercial Company, War Damage Corporation, and Rubber Development Corporation.

2/ Includes Federal Crop Insurance Corporation, Farm Security Administration, Federal Farm Mortgage Corporation, Federal Savings and Loan Insurance Corporation, Federal Intermediate Credit Banks - Production Credit Corporations, and Tennessee Valley Authority.

3/ Division between expenditures for National defense and related activities and other not available.

4/ Payments of \$957 million have been made during the fiscal year 1946 by the Agriculture Department (charged as war and defense activities)

to the Commodity Credit Corporation in reimbursement for agricultural commodities procured in connection with the lend-lease program and reflected in previous expenditures of the Commodity Credit Corporation. Similar payments during the fiscal year 1945 amounted to \$1,182 million.

5/ The act of July 20, 1946, authorised the Secretary of the Treasury to cancel notes of the Commodity Credit Corporation in the amount of \$921 million for the restoration of its capital impairment.

This amount is treated as a general expenditure with a corresponding credit under Government corporations (wholly owned), etc. (net).

6/ The act of May 26, 1947, authorized the Secretary of the Treasury to cancel notes of the Commodity Credit Corporation in the amount of \$642 million for the restoration of its capital impairment. This amount is treated as a general expenditure with a corresponding credit under Government corporations (wholly owned), etc. (net).

* Less than \$500,000.

1/ Includes Government Retirement funds, etc. (See footnote 2.)

2/ Comprises Public Works Administration revolving fund, special deposits (net), and, during the fiscal years 1940 through 1945,

transactions in commodity food stamps by the Department of Agriculture. Commencing July 1, 1945, such transactions are classified as "other trust accounts."

3/ Net receipts in this column constitute net sales, and net expenditures constitute net redemptions of obligations.

Source: Daily Treasury Statement.

* Less than \$50,000.

1/ Formerly Title VIII of the Social Security Act.

2/ Formerly Title II of the Social Security Act. Includes amounts equal to appropriations to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected with respect to the period from January 1936 to June 1939, inclusive, from employers subject to the Railroad Unemployment Insurance Act (see Table 3 of Section I).

3/ Prior to January 1, 1940, figures represent amounts transferred to the Old-Age Reserve Account. From January 1 to July 1, 1940 "Transfers" were made to the Federal Old-Age and Survivors Insurance Trust Fund. Subsequently receipts have been deposited in the General Fund of the Treasury and "appropriated" directly to the Federal Old-Age and Survivors Insurance Trust Fund. Amounts shown as transfers reflect deductions made for reimbursement to the General Fund account to cover administrative expenses, which are shown as expenditures in Section II, Table I.

4/ Includes an adjustment of \$3,879,000 on account of overstatement of reimbursements to General Fund in September.

5/ Includes only expenditures from appropriations made specifically for

administrative expenses relating to the Social Security Act; namely, Social Security Administration, Department of Commerce, and Department of Labor; and administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended. Beginning July 1, 1940, includes also administrative expense under the Wagner-Peyser Act. Excludes administrative expenses payable from other appropriations, principally for the following agencies: Bureau of Internal Revenue of the Treasury Department, and Public Health Service and Office of Education of the Federal Security Agency.

6/ Beginning July 1, 1945, payments previously made under the Social Security Act were discontinued, and thereafter made under provisions of the Public Health Service Act of 1944.

7/ Includes expenditures under Social Security Act by the Department of Labor through July 31, 1946.

8/ Classified as "Executive Office, Office for Emergency Management, War Manpower Commission" through July 31, 1946.

9/ Covered by appropriations by Congress.

10/ Second Deficiency Appropriation Act, fiscal year 1938, appropriated \$41 million for refunding to certain States portions of Federal Employers' tax for 1936 collected under the Social Security Act.

• Less than \$50,000.

1/ Operated as Railroad Unemployment Insurance Administration Fund.

2/ Represents 10% of contributions under the Railroad Unemployment Insurance Act; the remaining 90% is deposited in the Railroad Unemployment Insurance Account, Unemployment Trust Fund (See Section II, Table 3). Excludes amounts appropriated to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected for the period January 1936 through June 1939 from employers subject to the Railroad Unemployment Insurance Act. These amounts aggregated \$17.7 million and were distributed by calendar

years, as follows: 1936, \$2.7 million; 1937, \$5.3 million; 1938, \$6.8 million; and for the first six months of the calendar year 1939, \$2.9 million. These amounts are included in Table 1 under Federal Unemployment Tax Act (unemployment insurance).

3/ Includes only expenditures from appropriations made specifically for administrative expenses relating to the Railroad Unemployment Insurance Act.

4/ Represents excess funds of the Railroad Unemployment Insurance Administration Fund (under Act of Oct. 10, 1940).

5/ Covered by appropriations by Congress.

Source: Daily Treasury Statement.

1/ Excludes advance of \$15 million from the Treasury and subsequent repayment, both taking place in the fiscal year 1940.

2/ Represents 90% of contributions under the Railroad Unemployment Insurance Act; the remaining 10% is used for administrative expenses. (See Section 1, Table 3.)

3/ Represents amounts transferred from States to Railroad Unemployment

Insurance Account equivalent to amounts of taxes collected, with respect to period from January 1936 to June 1939, inclusive, from employees and employers who come within the purview of the Railroad Unemployment Insurance Act.

4/ Represents excess funds of the Railroad Unemployment Insurance Administration Fund (under Act of Oct. 10, 1940).

5/ For railroad unemployment benefits and refunds.

1/ These figures are not intended to reflect the budgetary position of the Government, and will not agree with budgetary figures on receipts, expenditures, and deficit such as those appearing in the Daily Treasury Statement and in other tables in the "Treasury Bulletin." For an explanation of the revisions made in Daily Treasury Statement figures to arrive at this cash series, see the "Treasury Bulletin," February 1939.

2/ Beginning October 1946, excludes bonds issued under Armed Forces Leave Act of 1946.

3/ Comprises Public Buildings Administration, Public Roads Administra-

tion, Public Works Administration, Federal Public Housing Authority, river and harbor work and flood control, Tennessee Valley Authority, forest roads and trails, and reclamation projects.

4/ Consists of Department of Agriculture expenditures, except forest roads and trails which are included in public works.

5/ Excludes accrued discount on United States savings bonds, and interest on trust fund investments.
6/ Revised to include "Work Projects Administration" and "Civilian Con-

revised to include "War Projects Administration" and "Civilian Conservation Corps," and to exclude "Surplus property disposal agencies" which, beginning July 1, 1945 are included in "War and defense activities" above.

Source: Daily Treasury Statement.

Note: Beginning with fiscal year 1945 certain revisions have been made in this table. See "Treasury Bulletin," September 1946, page 5.

* Less than \$500,000.

1/ This is the net budgetary deficit (-) or surplus. Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law and beginning with fiscal year 1945 includes Government corporations (wholly owned) etc. (net).

2/ Comprises Federal Old-Age and Survivors Insurance Trust Fund, National Service Life Insurance Fund, Unemployment Trust Fund, Railroad Retirement Account, Government insurance and retirement funds and other trust accounts. (See footnote 4.)

3/ Charges for retirement of national bank notes are reflected in this statement directly against increment on gold, in the years during which the retirements were actually made. (See footnote 8.)

4/ Comprises Public Works Administration revolving fund, special de-

positos (net), and, during the fiscal years 1940 through 1945, transactions in commodity food stamps by the Department of Agriculture. Commencing July 1, 1945, such transactions are classified in the column "Trust accounts".

5/ Beginning with fiscal year 1945 represents sales and redemptions of obligations of Government corporations, etc., in the market (net). 6/ Represents outstanding checks, see Note.

1/ Includes inactive gold in the amount of \$1,087 million.

8/ Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1937 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1937, \$99 million; 1938, \$51 million; and 1939, \$5 million. The increases in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.

Source: Daily Treasury Statement.

* Less than \$500,000.

1/ Guaranteed securities held by the Treasury and securities guaranteed as to interest only are not included in this table.

2/ Bank restricted issues are those which commercial banks (banks accepting demand deposits) are not permitted to acquire prior to a specified date, with three exceptions: (1) concurrently with the 4th, 5th and 6th War Loans and the Victory Loan, commercial banks were permitted to subscribe for limited investment of their savings deposits; (2) commercial banks may temporarily acquire such issues through forfeiture of collateral; (3) commercial banks may hold a limited amount of such issues for trading purposes. (See

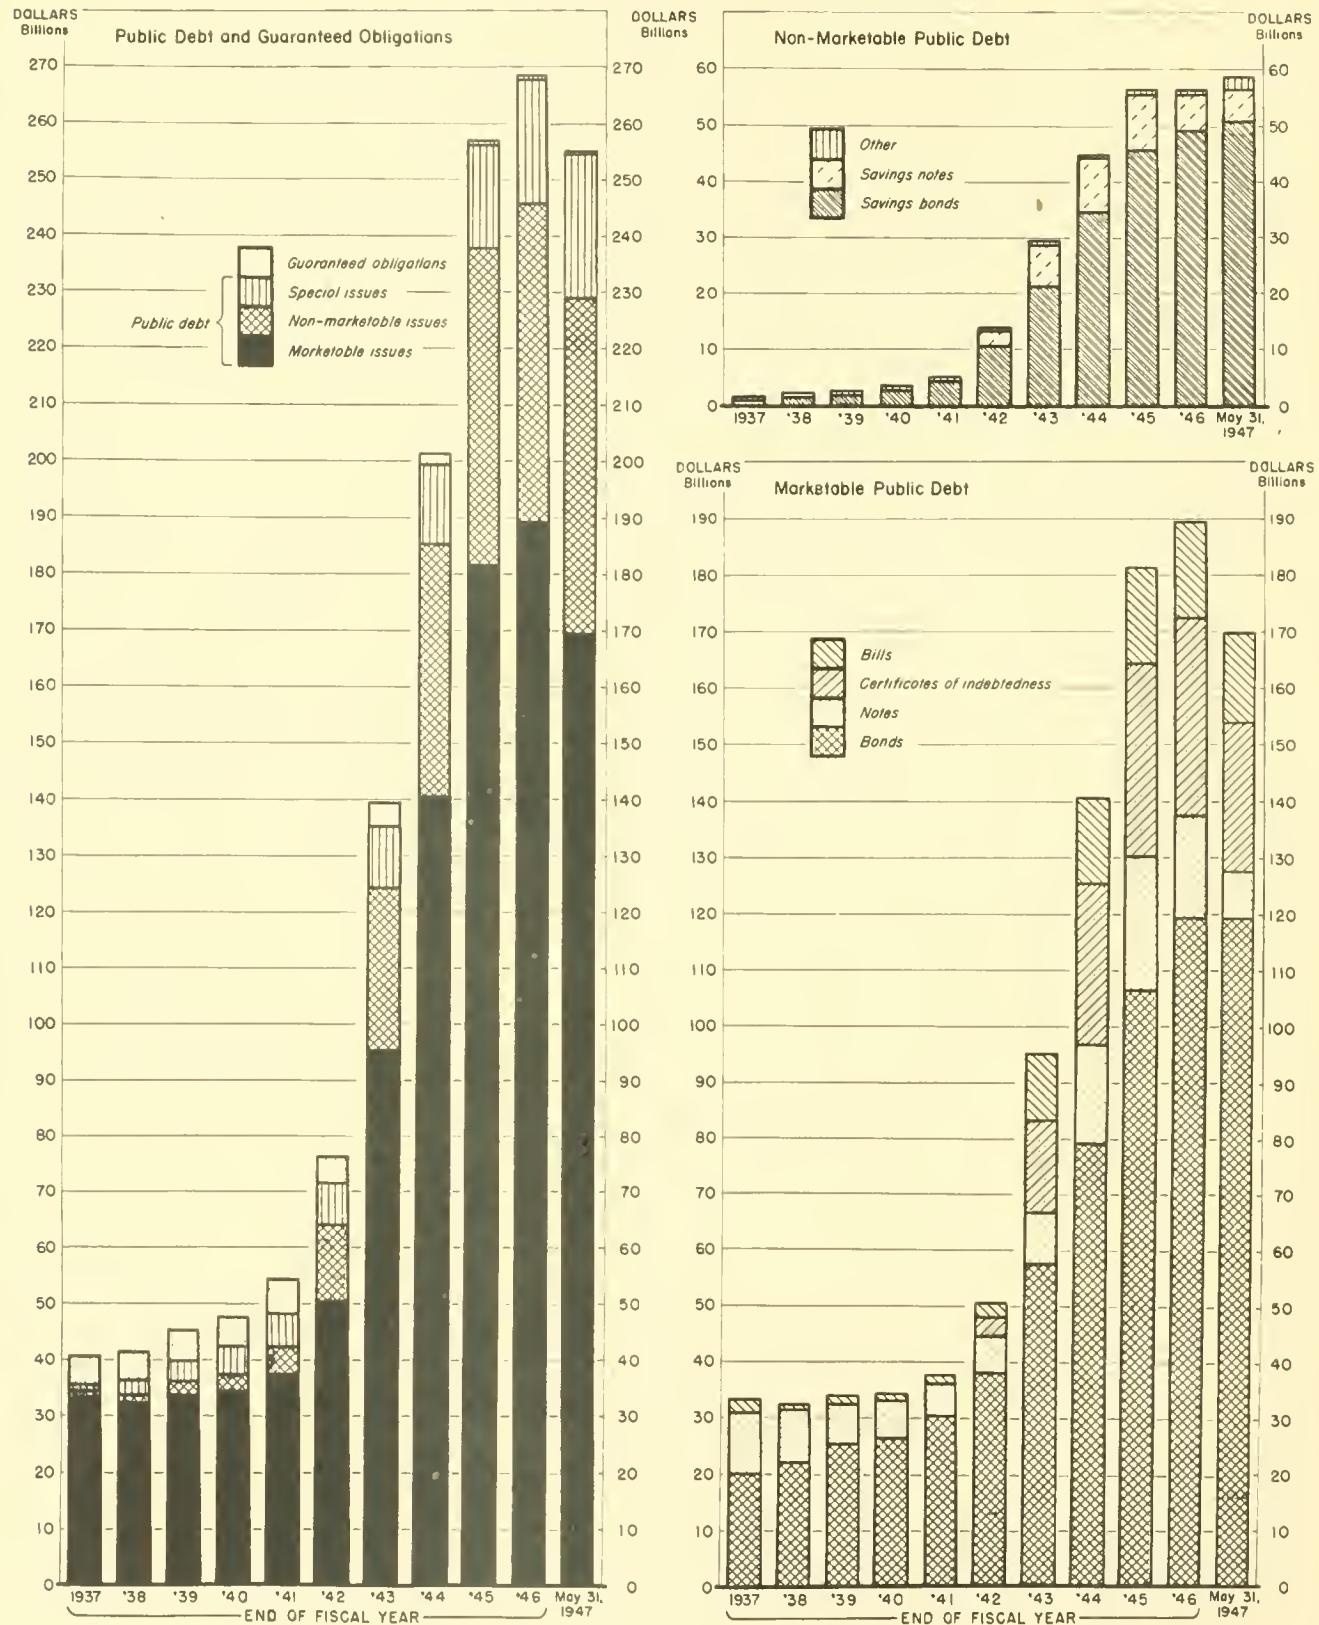

"Treasury Bulletin" July 1946, A-9, A-10.)

3/ The face value of any yearly series of United States savings bonds and Treasury savings notes maturing from month to month which are not currently presented for retirement are included in the interest-bearing debt until all the bonds or notes of the series have matured.

4/ Consists of demand obligations stated as of the close of the previous month, in accordance with the Daily Treasury Statement.

5/ Consists of Reconstruction Finance Corporation notes, Series X-A, X-B, and X-C, which were held by United States Government corporations and credit agencies.

Source: Daily Treasury Statement.

1/ Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rate of

interest on United States savings bonds, Series A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.53%.

2/ Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

Statutory Limitation on the Public Debt

Section 21 of the Second Liberty Bond Act, as amended, provides that the face amount of obligations issued under authority of that Act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury), shall not ex-

ceed in the aggregate \$275 billion outstanding at any one time. Obligations issued on a discount basis, and subject to redemption prior to maturity at the option of the owner, are included in the statutory debt limitation at current redemption values.

Table 1.- Condition as of May 31, 1947

(In millions of dollars)

Maximum amount of securities which may be outstanding at any one time, under limitations imposed by Section 21 of the Second Liberty Bond Act, as amended.....	275,000
Amount of securities outstanding subject to such statutory debt limitation 1/:	
U. S. Government securities issued under the Second Liberty Bond Act, as amended.....	257,451
Guaranteed securities 2/.....	177
Total amount of securities outstanding subject to statutory debt limitation.....	257,628
Balance issuable under such authority.....	17,372

Source: Daily Treasury Statement, and reports to the Treasury.

1/ Excludes (1) postal savings bonds and (2) Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).

2/ It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities.

3/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.

"Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

4/ Bank restricted issues may not be acquired by commercial banks (with minor exceptions) prior to a specified date. See footnote 2, page 21.

**Offerings of Marketable Issues of Treasury Bonds, Notes,
and Certificates of Indebtess**

Date terms of offering were announced	Date subscription books were opened	Description of security (Date of issue is shown in parentheses)	Period to maturity (Period to first call shown in parentheses) 1/	Amount of subscriptions tendered		Amount issued		Allot- ment ratio		
				Cash 2/	Exchange	For cash	In ex- change for other securities

Source: Bureau of the Public Debt. n.a. Not available. p Preliminary. 1/ In the case of the reopening of a previously offered security, the period to first call and to maturity are calculated from the date interest commences on the reopening. 2/ Consists of all public cash subscriptions and of subscriptions by U. S. Government agencies and trust funds. 3/ Figures on amount of War Loan securities issued consist both of amounts issued in connection with the Drive, and of amounts issued concurrently with Drive to commercial banks and Treasury invest-	meet accounts.									
	4/ Bank restricted issue. See preceding table (maturity schedule of interest-bearing public marketable securities) for earliest date on which commercial banks may acquire this issue.									
	5/ Reopening of previously offered security.									
	6/ Interest commenced on June 26, 1944. 7/ Interest commenced on September 15, 1944. 8/ This is the same security that was offered in the Sixth War Loan. 9/ Exchanged as of December 15, 1944 and accrued interest charged from December 1 to December 15.									

**Disposition of Matured Marketable Issues of Treasury Bonds, Notes, and Certificates
of Indebtedness and Securities Guaranteed by the United States**

p. Preliminary.

1/ Original call and maturity dates are used.

2/ Bank restricted issue.

2/ Prior to the refunding operation of March 1, 1946, maturing issues

were either paid off in full or the holders were given the privilege to exchange into another security in full. Beginning with the operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

Table 1.- Description of Treasury Bill Offerings and Amount of Maturities

Offerings and Maturities of Treasury Bills

(Amounts in millions of dollars)

Date of issue	Description of new issue							Amount of maturing issues (as of date shown in first column)	Total bills outstanding (as of date shown in first column)		
	Maturity date	Number of days to maturity	Amount of bids tendered	Amount of bids accepted							
				Total amount	Amount on competitive basis	Amount on fixed-price basis 1/	In exchange

3/ Except \$500,000 at 99.930.

Sales and Redemptions of United States Savings Bonds

United States savings bonds were first offered for sale in March 1935. Bonds of series A-D were sold between March 1935 and April 1941. Series E, F, and G bonds have been on sale since May 1, 1941.

Series A-E bonds are 10-year discount bonds sold at 75% of maturity value, and yield 2.90% per annum if held to maturity. Series F bonds are 12-year discount bonds sold at 74% of maturity value, and yield 2.53% per annum if held to maturity. Series G bonds are 12-year current income bonds, sold at par, bearing interest at 2-1/2% per annum, and redeemable at par at maturity or at stated prices less than par before maturity.

Purchases of series A-D bonds were limited to \$7,500 issue price in any one calendar year. These bonds were available to all subscribers prior to April 1, 1940, and to individuals only after that date. Purchases of series E bonds are limited to \$3,750 issue price in any one calendar year, and may be made only by individuals (defined as natural persons only). The limit for series F and G combined is \$100,000 issue price in any one calendar year (\$50,000 in calendar year 1941). Series F and G bonds are available to all

subscribers except commercial banks. Commercial banks, however, were permitted to purchase these bonds during certain periods and with certain restrictions. For details concerning these periods and restrictions see "Treasury Bulletin" for December 1944, page 36, footnote 9, and "Treasury Bulletin" for February 1946, page 37, footnote 9, and page A-22. For details concerning features, investment yields, and redemption values see "Treasury Bulletin" for October 1945, pages A-4 and A-5.

Series A bonds matured in 1945, and series B bonds in 1946. Series C bonds began to mature in January 1947. Matured bonds turned in for redemption are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of series G outstanding are quoted at par.

Table 1.- Summary of Sales and Redemptions, by Series, as of May 31, 1947

United States savings bonds	Sales	Accrued discount	Sales plus accrued discount	Redemptions	Amounts outstanding		Percent of redemptions to sales plus accrued discount

* Less than \$500.

1/ Monthly sales for Alaska are not available after March 1947.

2/ State figures exclude sales of Series F and G bonds to commercial banks. Commercial banks were permitted to purchase Series F and G

bonds under certain conditions during the calendar year 1944.

("Treasury Bulletin" for December 1944, page 36, footnote 9); from June 18 through June 30, 1945 ("Treasury Bulletin" for February 1945, page 37, footnote 9); and from December 3 through December 8, 1945 ("Treasury Bulletin" for February 1946, page A-22).

Sales and Redemptions of United States Savings Bonds - (Continued)

Table 7.- Redemptions of Series A through E Savings Bonds, Classified by States

(In thousands of dollars at current redemption values)

Note: It should be noted that State figures presented in this table are not necessarily comparable with sales data by States inasmuch as bonds which have been purchased in one State may have been redeemed

in another. Moreover, the figures shown in this table are based on current redemption values, whereas the sales figures are shown at issue price. Data on redemptions by States are not available prior to October 1944.

Sales and Redemptions of Treasury Savings Notes

Treasury savings notes were issued in three series, series A from August 1, 1941 through June 22, 1943, series B from August 1, 1941 through September 12, 1942, and series C which have been on continuous sale since September 14, 1942. All of series A and B and some of series C notes have matured.

Series C notes are sold at par, and accrue in value each month, yielding 1.07% per annum if held to maturity (3 years from date of issue). These notes may be used in payment of taxes any time after 2 months after issue, or may be redeemed for cash any time after 6 months after issue. For details concerning features, investment yields, and tax payment or redemption values, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning the features of series A

and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes turned in for redemption (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement. For sales and redemptions of series A and B notes by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

Table 1.- Summary of Sales and Redemptions, by Series, as of May 31, 1947

Source: Daily Treasury Statement.

Note: See "Treasury Bulletin," July 1946 for back figures.

1/ Stamps sold prior to October 1, 1942 were known as postal savings stamps and were obligations of the Postal Savings System but subsequently became public debt obligations.

2/ Estimated on the basis of samples made by the Post Office Department.

1/ Net of sales less redemptions. See footnote 1.

2/ Does not include amounts transferred from Postal Savings System to the Treasury to cover outstanding stamps.

3/ Includes minor amounts which were exchanged for postal savings certificates. These aggregated \$55,000 for the period July 1, 1942 through October 31, 1942.

Source: (1) Daily Treasury Statement for total amounts outstanding; (2) reports of agencies and trust funds for securities held by U. S. Government agencies and trust funds; and (3) Federal Reserve System for securities held by Federal Reserve Banks.

p Preliminary.

* Less than \$500,000.

1/ Excludes obligations held by the Treasury and matured securities.
2/ The total amount of securities held by private investors is calcu-

lated by deducting from the total amount of securities outstanding, the securities held by U. S. Government agencies and trust funds and by Federal Reserve Banks.

3/ Includes United States savings bonds, Series A-F, at maturity value. Consists of Commodity Credit Corporation demand obligations stated as of the close of the previous month, in accordance with the Daily Treasury Statement.

^{1/} Less than \$50,000.^{1/} Consists of purchases or sales made by the Treasury. Treasury investment accounts comprise (1) trust funds which by law are under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain

U. S. Government agencies whose investments are handled through the facilities of the Treasury Department. This table also includes purchases under Section 19 of the Second Liberty Bond Act, as amended, and excludes the Exchange Stabilization Fund.

**Treasury Survey of Ownership of Securities Issued by the United States
Government and by Federal Agencies, April 30, 1947**

The tables in Section I present summary data as of April 30, 1947 from the Treasury Survey of Ownership of Securities Issued or Guaranteed by the United States. The banks and insurance companies covered in the survey account for approximately 95 percent of the amount of

such securities owned by all banks and insurance companies in the United States.

Section II presents summary data on the ownership of Federal Land Bank bonds, Federal Intermediate Credit Bank debentures and Federal Home Loan Bank bonds.

Section I - Securities Issued or Guaranteed by the United States Government

Table 1.- Summary: All Interest-Bearing Securities

(In millions of dollars)

Classification	Total amount outstanding	Held by investors covered in Treasury Survey						Held by all other investors 3/

Note: The Treasury Survey commenced with data for March 31, 1941 and has been published regularly in the "Treasury Bulletin" since May 1941. Revisions of data for September 30, 1944 appeared in the February 1945 issue, page 53; reclassification of data on banks for the period November 1943 through February 1944 appeared in the May 1944 issue, pages 50-57; revisions of data on insurance companies for May 31, 1943 and prior months appeared in the November 1943 issue, page 52-63.

* Less than \$500,000 or less than .05%.

1/ Securities held in trust departments are excluded.

2/ Includes trust companies.

3/ This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See heading to this section.

4/ Issues which commercial banks may not acquire prior to a specified

date (with minor exceptions). See footnote 2, page 21.

5/ Guaranteed securities held by the Treasury are not included.

6/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rate except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

7/ Includes an estimated amount of Federal Housing Administration debentures.

8/ Actual figures by tax status are available only for total amount outstanding.

* Less than \$500,000.

1/ See footnote 6, page 52.

2/ Securities held in trust departments are excluded.

3/ Includes trust companies.

4/ This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See head-note to this section.

5/ United States savings bonds, Series C-D, E, and F are shown at cur-

rent redemption values. They were reported at maturity value by the banks and insurance companies covered in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

6/ Series C-D savings bonds sold prior to March 1, 1941 are partially tax-exempt; those sold on and after that date are taxable.

7/ Guaranteed securities held by the Treasury are not included.

8/ C.C.C. demand obligations in the amount of \$126 million held by all commercial banks are shown only in total amount outstanding.

- 1/ Excludes Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).
 2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.
 3/ Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

- b/ Included in the Average Yield of Long-Term Taxable Treasury Bonds. Issues which commercial banks may not acquire prior to a specified date (with minor exceptions).
 5/ Quoted on a yield basis.
 1/ Not quoted on May 29, 1947; quoted on a price basis at par from May 26, through May 28, 1947; prior thereto quoted on a yield basis.
 8/ For amount of this security issued on June 1, 1947, see table entitled "Offerings of Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness" in the section on the "Public Debt and Guaranteed Obligations of the United States Government."
 2/ Excludes postal savings bonds.

Over-the-Counter Closing Quotations on Public Marketable Securities Issued by the
United States Government and by Federal Agencies

1/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "When issued" prices for all securities except Federal Intermediate Credit Bank debentures are included. Dates of high and low, in case of recurrence, are the latest dates.

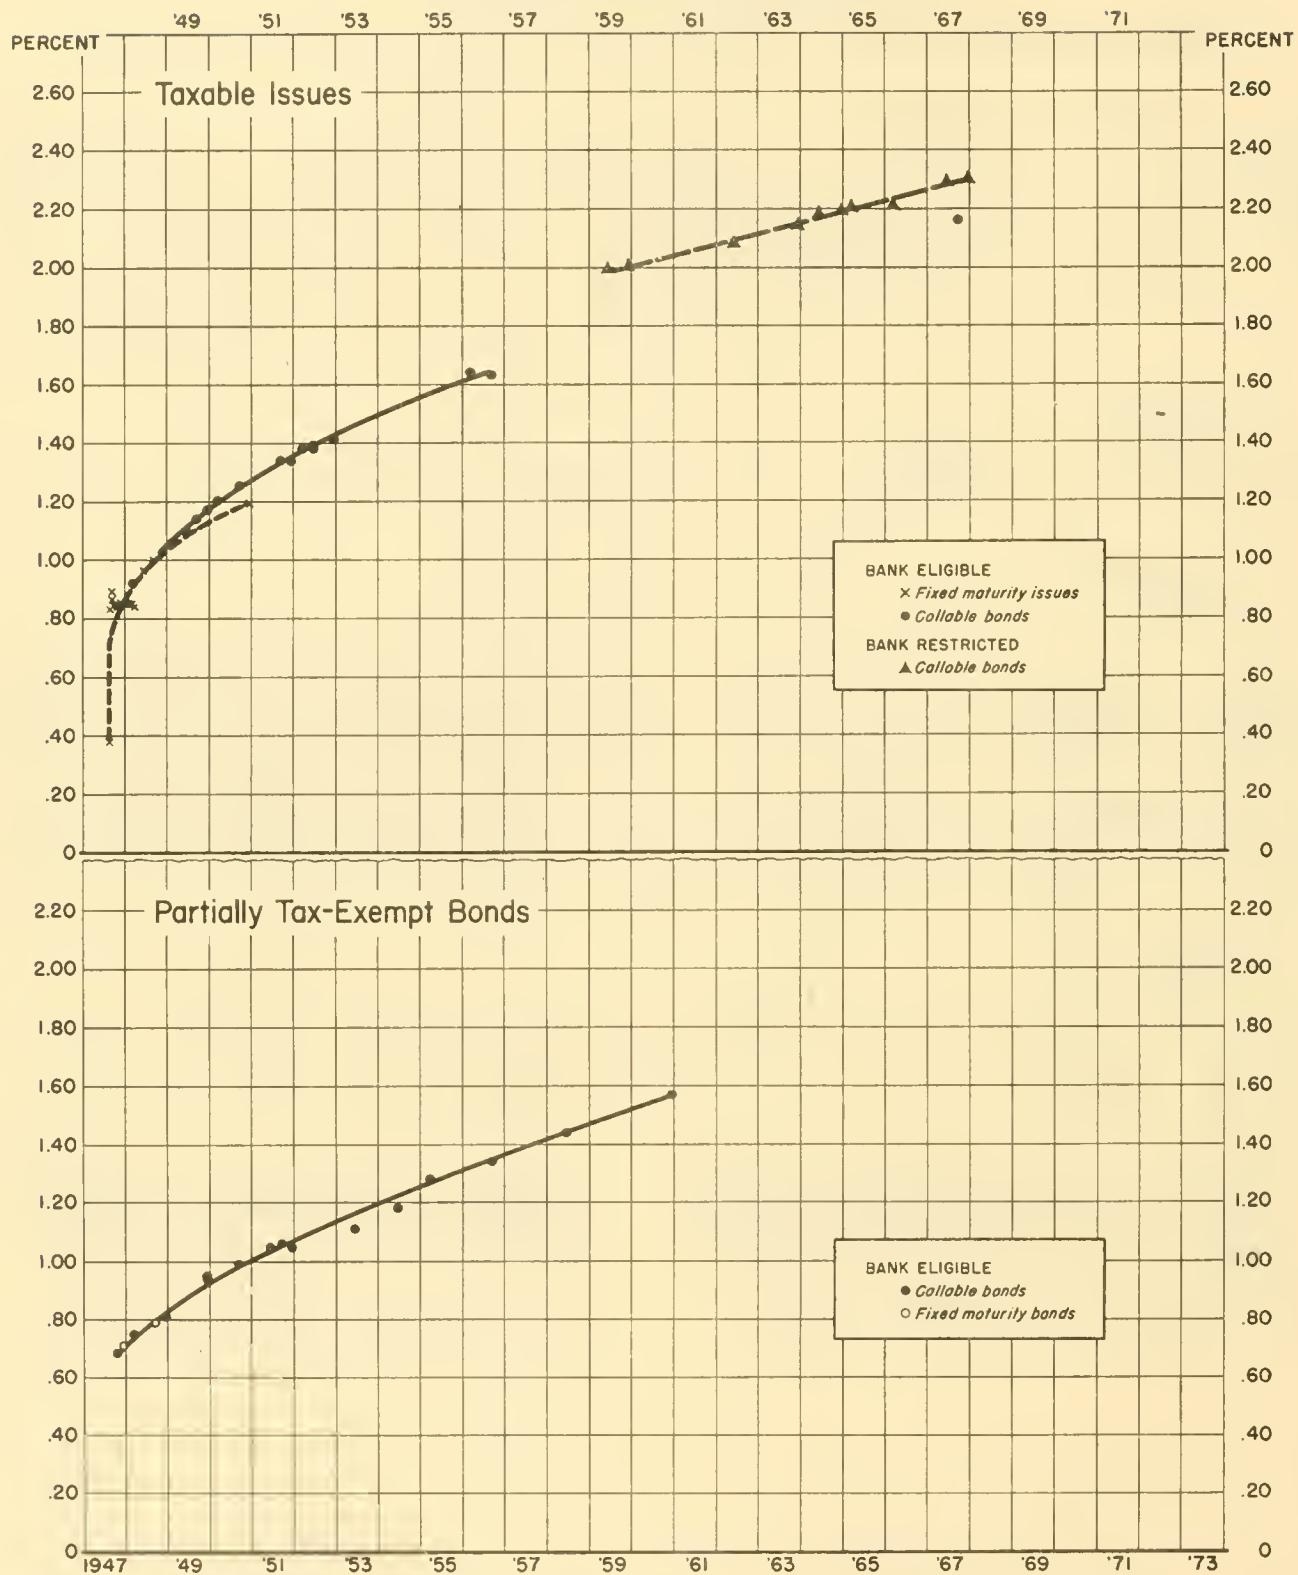

2/ Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to matu-

rity as more significant when an issue is selling at or below par. 3/ Prices quoted are subject to a dealer's commission. These securities are not shown until date of issue.

4/ Excludes issues completely held by Farm Credit Administration agencies.

YIELDS OF TREASURY SECURITIES MAY 29, 1947

Based on Mean of Closing Bid and Asked Quotations

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Revised Average of the Yields of High-Grade Corporate Bonds

The Treasury Department average of the yields of high-grade corporate bonds has been revised, beginning April 1, 1947, by the addition of six new bonds to the average and the removal of one bond from the average. Prices and yields as of April 1, 1947 (or last date traded prior to April 1) for the bond issues formerly included in the average and those now added to the average are shown in the following table.

Description	Price	Yield (Percent)
Bond removed:		
Consolidated Gas Electric Light and Power Co. of Baltimore, 2-3/4% of 1976.....	104-1/2	2.53
Bond retained:		
Boston Edison Company, 2-3/4% of 1970....	105-1/4	2.46
Illinois Bell Telephone Company, 2-3/4% of 1977/1981.....	104-1/2	2.53
Philadelphia Electric Company, 2-3/4% of 1970/1971.....	105-1/8	2.46
Standard Oil Company of California, 2-3/4% of 1965/1966.....	105-3/4	2.36
Bonds added:		
Cincinnati Gas and Electric Company, 2-3/4% of 1974/1975.....	105	2.50
Consolidated Gas Electric Light and Power Co. of Baltimore, 2-3/4% of 1981.....	105	2.53
Secony-Vacuum Oil Company, Incorporated, 2-1/2% of 1970/1976.....	100-1/8	2.49
Southwestern Bell Telephone Company, 2-3/4% of 1980/1985.....	103-3/8	2.60
Standard Oil Company (New Jersey), 2-3/8% of 1966/1971.....	99-1/8	2.42
Union Pacific Railroad Company, 2-1/2% of 1989/1991.....	98	2.58
Old high-grade corporate average.....		2.47
Revised high-grade corporate average.....		2.49

It was indicated at the time of the reduction of the number of bonds in the average from twenty to five - in 1939 - that the "number of bonds will be increased at some future date when additional issues suitable for inclusion in the index are available." The average has been revised twice since that time, but until now there have not been available sufficient bond issues with the appropriate technical qualifications to enlarge the coverage of the average. However, since the end of the war, the issuance of new high-grade corporate bonds has increased, and it is now possible to increase the number of bonds in the average to ten. The Consolidated Gas Electric Light and Power Co. of Baltimore 2-3/4% bonds of 1981 have been substituted for that company's 2-3/4% bonds of 1976 in the average, since the former bond issue is larger and trades more frequently.

Since November 1944, the Treasury Department's high-grade corporate average has included only bonds which are not due or callable at par for at least 15 years, and which bear coupons of 2-3/4% or less. All of the bonds included in the revised average have these same qualifications.

On April 1, 1947, the revised average was 2.49% as compared with 2.47% for the old average on the same date. Thus, there is only a slight break in the continuity of the series.

The following factors must be remembered when comparing the new high-grade corporate average with the long-term Treasury bond average:

- Pursuant to their terms, the bonds included in the high-grade corporate average

are callable at various premiums at frequent intervals. Treasury bonds included in the Treasury bond average are not at any time callable at premiums. (In computing the high-grade corporate average and the Treasury bond average, yields are calculated to the first date at which the bonds are callable at par when the bonds are selling above par, and to maturity date when the bonds are selling below par.)

2. All except one of the nine bonds in the taxable Treasury bond average are "bank restricted" - i.e., they contain provisions restricting their acquisition by commercial banks for a specified period after issuance. (These provisions have been modified in several minor respects, and as of March 31, 1947, only about \$1-1/2 billion out of a total of about \$49-1/2 billion of bank restricted issues outstanding were held by commercial banks.) No such restrictions exist with respect to the ownership by commercial banks of any of the bonds included in the high-grade corporate average.

The eight "bank restricted" issues included in the Treasury average are all acceptable at par and accrued interest in payment of the Federal estate tax when they comprise a part of the estate at time of death. No such privilege is attached to any of the bonds included in the high-grade corporate average.

3. The Treasury bonds included in the Treasury bond average are subject to all Federal taxes and to State inheritance, estate, gift, or other excise taxes. However, they are exempt from all other taxation imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. The corporate bonds included in the high-grade corporate average are, in general, subject to State and local, as well as Federal, taxation.

4. The average time to first call date at par, or to maturity, of the bonds in the revised high-grade corporate average on April 1, 1947, was slightly over twenty-eight years, while the corresponding figure for the bonds in the Treasury bond average was about eighteen and one-third years.

The following table shows the revised daily high-grade corporate average for April 1947. The revised weekly and monthly series for April 1947 and the daily, weekly, and monthly data for May 1947 may be found in the table on the next page.

April 1947	Revised high-grade corporate average (Percent)	April 1947	Revised high-grade corporate average (Percent)

Note: Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. Corporate bond yields are computed on the basis of closing price on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. Monthly and weekly (old series) data for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944, pages 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of average see "Treasury Bulletin" for March 1944, page 58. This partially tax-exempt series was discontinued on December 15, 1945 because there were no longer any bonds of this classification due or callable in 15 or more years. Partially tax-exempt bonds are those the interest on which is exempt

from the normal rates of the Federal income tax, except that in the case of partially tax-exempt Treasury and United States savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

2/ For discussion of present composition of high-grade corporate bond averages, see preceding page; for discussion of its previous composition, see "Treasury Bulletin" for January 1945, page 56.

3/ Average revised beginning July 1, 1941. Old average for July 1941 was also 2.66%.

4/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

5/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%; for week ended April 5, 2.47%. See footnote 2.

Corporations and Certain Other Agencies of the United States Government

Quarterly data relating to corporations in which the United States has a proprietary interest, direct or indirect, and certain other agencies are published in three sections. Section I contains data on combined balance sheet; section II, data on income and expense; and section III, data on sources and application of

funds.

The tables in section I are compiled from mid-month "Daily Treasury Statements." The tables in sections II and III are obtained from reports of the corporations and other agencies, adjusted by the Treasury Department.

Section I - Combined Balance Sheet as of March 31, 1947

Corporations and Certain Other Agencies of the United States Government - (Continued)

Footnotes to Section I

- r Revised.
 * Less than \$50 thousand.
^{1/} Excludes unexpended balances of appropriated funds.
^{2/} Includes notes for short-term borrowings.
^{3/} Includes Commodity Credit Corporation loans held by lending agencies.
^{4/} Includes \$168.1 million guaranteed loans held by lending agencies.
^{5/} As of November 1, 1946, the loans of Emergency Crop and Feed Loan Section and Farm Security Administration were transferred to Farmers' Home Administration.
^{6/} Created pursuant to Public Law 731, approved August 14, 1946.
^{7/} Puerto Rican Hurricane Relief Loan Section ceased to exist June 30, 1946.
^{8/} Consists of Bureau of Community Facilities and Public Works Administration.
^{9/} Consists of Federal Public Housing Authority - Farm Security Administration program, Homes conversion program, and Public war housing program; Federal Security Agency - loans to students; Navy Department - guaranteed loans (World War II); Treasury Department miscellaneous loans; and War Department - guaranteed loans (World War II).
^{10/} Includes participation by other agencies of \$7.0 million in loans of Export-Import Bank of Washington.
^{11/} Loan commitments amount to \$325.6 million against which advances of \$276.7 million have been made, leaving commitments to purchase loans of \$49.0 million.
^{12/} Includes the Federal Land Banks of Springfield, Mass., Baltimore, Md., Columbia, S. C., Louisville, Ky., New Orleans, La., St. Louis, Mo., Omaha, Nebr., Wichita, Kan., Houston, Tex., Berkeley, Calif., and Spokane, Wash., which have retired the capital stock and paid-in surplus previously held by the U. S. Government.
^{13/}
^{14/} Includes real estate sales contracts.
^{15/} The reserve for losses on loans receivable includes other loss reserves which cannot be distributed to the assets to which they apply.
^{16/} Represents excess of assets over liabilities transferred to R.F.C.
^{17/} Represents guaranteed obligations arising from drafts and invoices paid by commercial banks.
^{18/} Public Law 519, July 20, 1946, authorized the Secretary of the Treasury to cancel notes in the amount of \$921.5 million, pursuant to Act of March 8, 1938, as amended. Cancellation of this amount was effected on July 25, 1946.
^{19/} Consists of paid-in capital (U. S. owned), Treasury loans to Government corporations, and earned surplus or deficit (U. S. share).
^{20/} Figures are as of February 28, 1947, the latest available.
^{21/} Figures are as of December 31, 1946, the latest available, except with respect to certain interagency adjustments as of March 31, 1947 made by the Treasury Department.
^{22/} Consists of Institute of Inter-American Affairs, Institute of Inter-American Transportation, Inter-American Educational Foundation, Inc., Inter-American Navigation Corporation, (liquidated) and Precinradio, Inc.
^{23/} Corporation was dissolved by decree of the Superior Court of the State of Washington on December 12, 1946.
^{24/} Represents advances from R.F.C. for the payment of operating expenses.
^{25/} Net of return of excess funds pursuant to Public Law 301, approved February 18, 1946, and Public Law 301, approved May 27, 1946, and net of return of \$.1 million representing balance of funds of Inter-American Navigation Corporation upon liquidation as of February 25, 1947.
^{26/} Includes deficit resulting from administrative expenses in the amount of \$45.3 million.
^{27/} Sales contract in amount of \$.1 million transferred to War Department for liquidation and ultimate deposit of cash proceeds to Miscellaneous Receipts of the Treasury Department.
^{28/} The surplus is not available by law for dividend distribution and is considered by the corporation as a reserve for future deposit insurance losses and related expenses with respect to insured banks.
^{29/} Includes unreserved surplus of R.F.C., \$535.5 million, and deficit of merged war affiliates, \$5,560.5 million.
^{30/} Figures represent activities under U. S. Housing Act, as amended. War housing and other operations of the Authority are reflected in the classification "Other" in Table 5.
^{31/} The surplus is considered by the corporation as available for future insurance losses and related expenses with respect to insured institutions.
^{32/} Consists of Indian Loans, and Puerto Rico Reconstruction Administration. Puerto Rican Hurricane Relief Loan Section ceased to exist June 30, 1946. Collections of the unliquidated loan balances will be made by Puerto Rico Reconstruction Administration and deposited to Miscellaneous Receipts of the Treasury Department.
^{33/} Figures are as of February 28, 1947, with exception of those of lend-lease and UNRRA activities.
^{34/} Consists of Federal Public Housing Authority - Homes conversion program, Farm Security Administration program, Public war housing program, and Veterans' re-use housing program; Federal Security Agency - loans to students; Navy Department - guaranteed loans (World War II) and sale of surplus supplies (World War I); Treasury Department - miscellaneous loans and certain other assets; War Department - guaranteed loans (World War II); and Veterans' Canteen Service created pursuant to Public Law 636, approved August 7, 1946.
^{35/} Represents obligations of Government corporations as follows: Commodity Credit Corporation, \$830.0 million; Export-Import Bank of Washington, \$271.9 million; Federal Public Housing Authority, \$350.0 million; Home Owners' Loan Corporation, \$574.0 million; R.F.C., \$8,902.1 million; and Tennessee Valley Authority, \$56.5 million.
^{36/} Excludes the value of vessels and other expenses transferred to the War Shipping Administration for which no transfer of funds will be required under the authority of E. O. No. 9054, dated February 7, 1942, and War Shipping Administrator's Order No. 7, dated April 21, 1942.
^{37/} Includes the value of vessels and other expenses transferred from the U. S. Maritime Commission.
^{38/} Represents excess of expenditures incurred pursuant to legislation for such activities as: construction and operation of merchant marine fleet in interest of the war effort; relief to farmers; loans and grants for rural rehabilitation and subsistence homesteads; relief and rehabilitation in Puerto Rico; loans, grants, and relief in construction of housing, public works, and community facilities; and others.
^{39/} Includes \$85.3 million representing equity of mortgagors in earnings of group accounts of the Mutual Mortgage Insurance Fund.
^{40/} Consists of paid-in capital (U. S. owned), less Treasury loans to Government corporations, plus excess of income (or expense).

Source: (1) Total receipts from internal revenue: Daily Treasury Statement; (2) Detailed collections by type of tax: Reports of collections made by collectors of internal revenue.

1/ Excludes collections for credit to certain trust accounts for territories and insular possessions, etc.

2/ Includes collection of taxes withheld by employers pursuant to the Revenue Act of 1942 and the Current Tax Payment Act of 1943.

3/ Includes income tax collections on Alaskan Railroads. The excess profits tax included in this column is that imposed under the Second Revenue Act of 1940, as amended.

4/ Consists of the declared value excess profits tax, the profit limit-

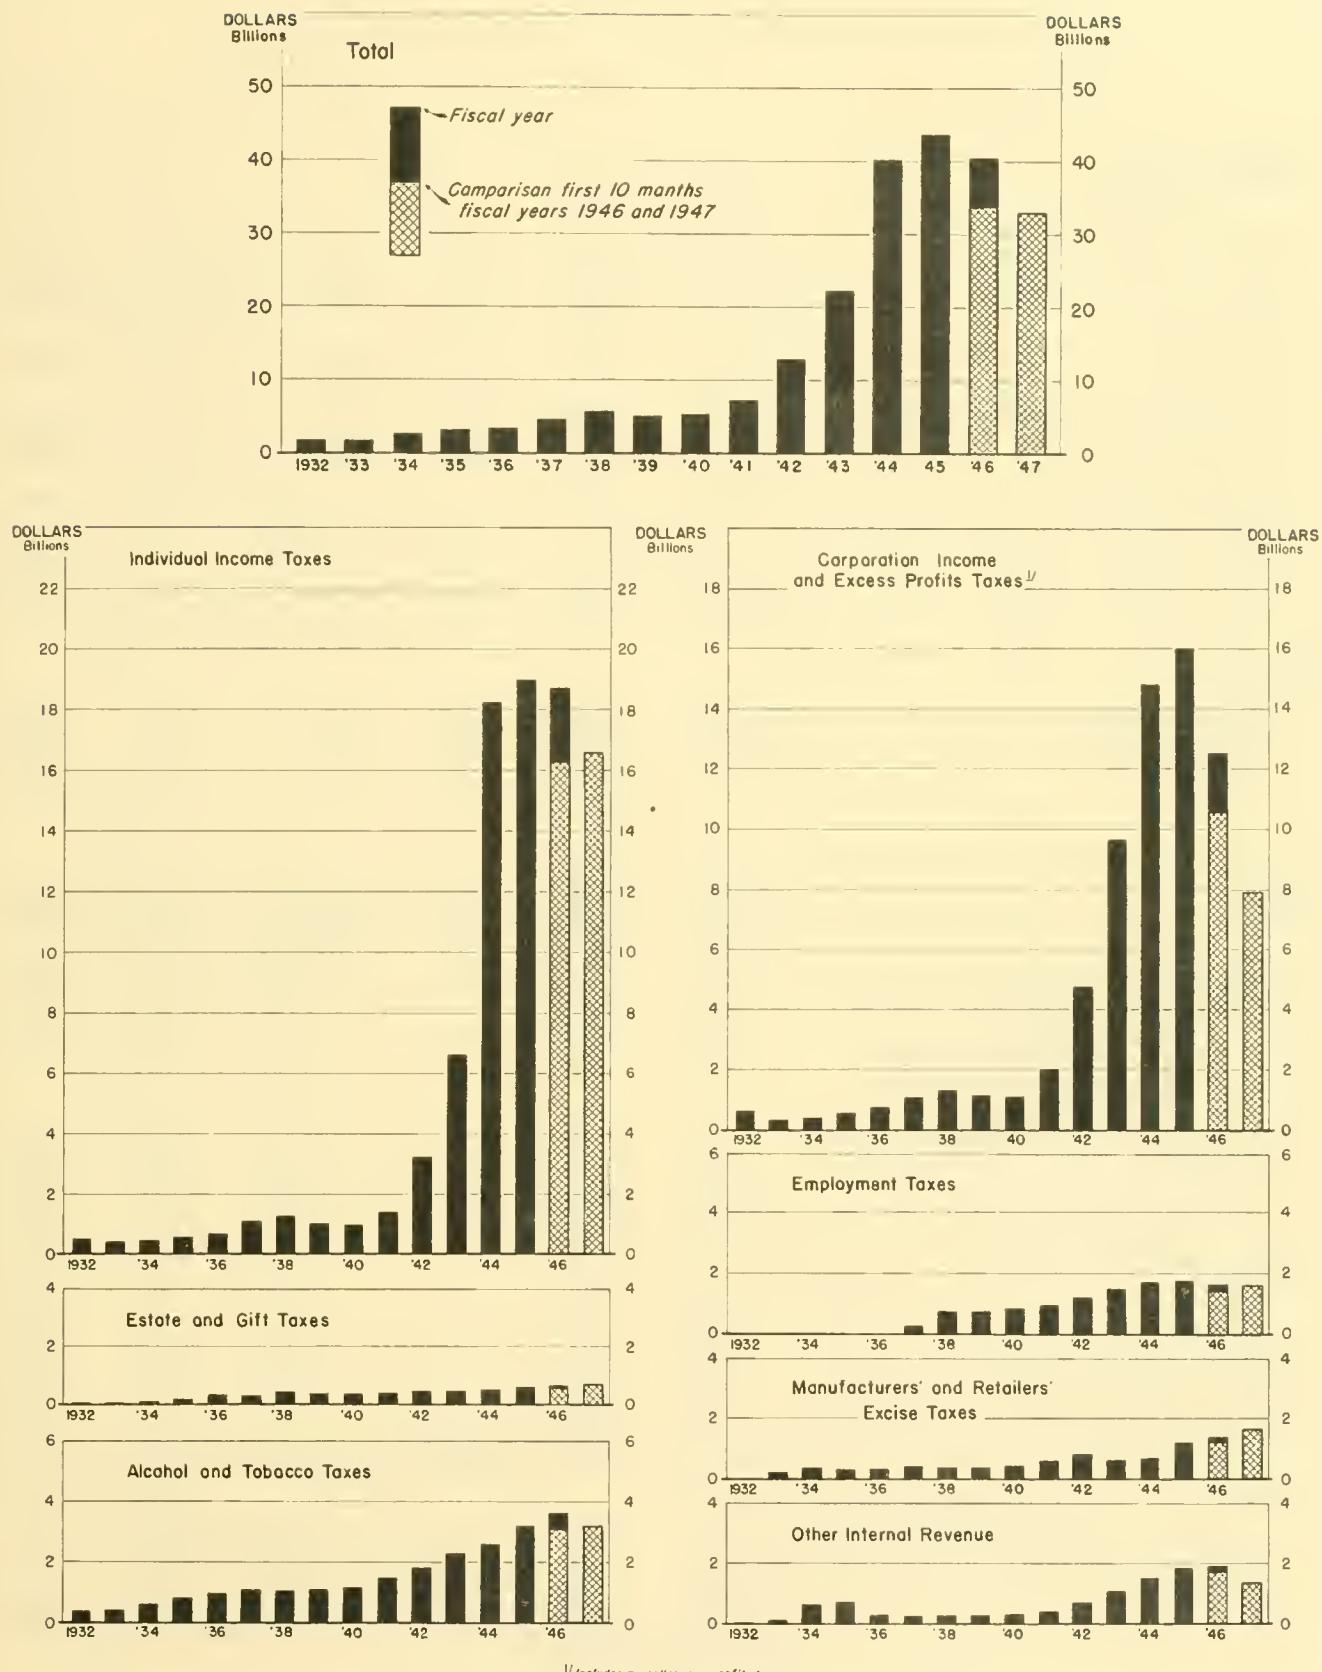

ing provisions of the Vinson Act, and the tax on unjust enrichment.

5/ Represents collections under the Federal Insurance Contributions Act commencing September 1939; prior thereto, collections under Title VIII of the Social Security Act.

6/ Represents collections under the Federal Unemployment Tax Act commencing September 1939; prior thereto, collections under Title IX of the Social Security Act.

7/ Represents collections under the Carriers Taxing Act of 1937. Includes tax collections under the Sugar Act of 1937 and under the dividends tax imposed by the Act of June 16, 1933.

Source: (1) Total receipts from internal revenue: Daily Treasury Statements; (2) Detailed collections by type of tax: Reports of collections made by collectors of internal revenue.

* Less than \$500.

1/ Excludes collections for credit to certain trust accounts for territories and insular possessions, etc.

2/ Collections under the Current Tax Payment Act of 1943 as shown in this table consist of those for which returns have been filed with the Collector of Internal Revenue; receipts under this act as shown in Daily Treasury Statements consist of withholding taxes deposited in Government depositories in addition to payments accompanying returns filed with the Collector of Internal Revenue.

3/ Current collections consist in general of taxes paid within twelve months after the close of the taxable year for which the return was filed.

4/ Current individual income tax collections for the fiscal year 1945 include payments on unforgiven portion of 1942 tax, due March 15, 1945, of \$308,605,000 for the period, January 1, 1945 through April 30, 1945.

5/ Represents collections under the Federal Insurance Contributions Act.

6/ Represents collections under the Federal Unemployment Tax Act.

7/ Represents collections under the Carriers' Taxing Act of 1937.

8/ Tax imposed upon the manufacture and sale of, and the occupational tax on, mixed flour repealed as of November 1, 1942.

Source: (1) Circulation Statement of United States Money; and (2) Annual Report of the Secretary of the Treasury for 1946, pages 623-627.

p Preliminary.

r Revised.

1/ Excludes (1) money held by the Treasury, (2) money held by or for the account of the Federal Reserve Banks and their agents, and (3) coin estimated to be held outside the continental limits of

the United States. Includes paper currency held outside the continental limits of the United States.

2/ Gold certificates and Treasury notes of 1890 in circulation are being canceled and retired upon receipt by the Treasury.

3/ Federal Reserve Bank notes and National bank notes are covered by deposits of lawful money and are in process of retirement.

CAPITAL MOVEMENTS BETWEEN THE UNITED STATES
AND FOREIGN COUNTRIES AND NET POSITION
IN FOREIGN CURRENCIES

Capital Movements Between the United States and Foreign Countries

This chapter on Capital Movements between the United States and Foreign Countries and Position in Foreign Currencies is divided into four main groups. Section I of Capital Movements, the Historical Summary, contains data regarding capital movements, by the principal types of data and by years, starting with 1935. The last thirteen months are also shown. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for the last thirteen months. The total capital movements are given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Details with respect to capital movements and short-term claims and liabilities are presented in Section III as of the latest month for which the data are

available.

The last group contains information regarding the net position in foreign currencies of United States banks and brokers, their outstanding foreign exchange contracts and purchases and sales of foreign exchange, both spot and forward. This section covers a twelve-month period.

Figures for previous periods may be obtained from the following sources:

Supplement to the "Treasury Bulletin" on "Capital Movements between the United States and Foreign Countries, January 1942 through April 1945", for details during that period.

"Treasury Bulletin", November 1945, for capital movements, and position in foreign currencies by months, 1942-1945.

"Treasury Bulletins", March 1942 and earlier, for details covering years back to January 2, 1935.

Section I - Historical Summary

Table 1.- Net Capital Movement

(In thousands of dollars; negative figures indicate a net outflow of capital from the United States)
