## New Provision for Redeeming United States Savings Bonds Through Banks

On August 29, 1944, it was announced that the Treasury Department had completed plans for simplifying the redemption of United States savings bonds of Series E, and the predecessor issues Series A to D. Beginning October 2, 1944, individual owners or co-owners of these securities can present them for redemption at any eligible bank or trust company which has qualified for this service. The bank will pay the redemption value of the bonds immediately, following satisfactory identification of the owners, and without charge to the bond owners. Previously it had been necessary to have requests for redemption certified by an authorized officer, and then forward the bonds to a Federal Reserve Bank or branch or to the Treasury for redemption, a process involving the lapse of several days before the bondholder received his money.

It is the purpose of the new arrangement to simplify payment of savings bonds for those holders who find it necessary to cash them prior to maturity. It is not to be assumed that the Treasury seeks to encourage or promote redemptions of savings bonds. On the contrary, there is some reason to believe that the new facilities will have a deterrent effect on redemptions, since a considerable number of bond owners in the past have cashed their bonds well in advance of expected financial needs, which actually never materialized, or have cashed bonds in larger amounts than, as later events developed, they actually needed. With the new method providing for immediate payment of eligible bonds upon their presentation to any qualified bank, it is believed that many redemptions, such as those

heretofore made in anticipation of emergency expenditures and later found unnecessary, will be avoided. It is also hoped that the new facilities may encourage the purchase of additional Series E United States savings bonds by persons who hitherto have been unwilling to buy such bonds to their full ability because of the possibility that they might not be able to liquidate their holdings quickly in an emergency.

The new redemption regulations are based on legislation which Congress enacted last year. They do not alter the requirement that such bonds must be held for 60 days from the date of issue before they become redeemable; nor do they affect the nontransferability of the bonds. The privilege of cashing savings bonds of Series A to E at banks and trust companies is available only to individuals. Series F and Series G savings bonds are not included in the new arrangements, but will continue to be redeemable by the old method of certification through presentation of the bonds to a Federal Reserve Bank or branch, or at the Treasury.

All incorporated banks and trust companies are eligible to apply for qualification as bond-paying agencies under the new arrangements and it is believed that a large majority of them will do so. As of September 26, more than 10,000 banks, or 70% of the eligible institutions, had qualified as redemption agents. The Treasury will compensate these banks at a rate of 15 cents each for the first 1,000 bonds redeemed, 12 cents each for the second 1,000, and 10 cents each for all in excess of 2,000 presented in any one calendar quarter.

## Treasury Market Financing: Refunding of Certificates and Treasury Notes

### Results of August Refunding Operations

On August 24, 1944, holders of the 7/8% Treasury certificates of indebtedness maturing September 1, 1944, were offered, in exchange, an issue of 7/8% Treasury certificates of indebtedness to mature September 1, 1945. Of the \$4,122 millions of outstanding certificates, \$3,694 millions were exchanged.

At the same time holders of the two issues of Treasury notes maturing on September 15, 1944, were offered, in exchange, an additional issue of 1% Treasury notes due March 15, 1946, which were originally issued on November 1, 1941. The results of the exchange are shown in the following table:

Maturing issue	Amount out- standing	Amount ex- changed	Percent ex- changed	(In millions of dollars)
3/4% Treasury note....(taxable)	635	602	95	
1% Treasury note..(tax-exempt)	283	185	65	
Total.....	918	788	86	

### September Refunding Offer

On September 20, 1944, the Treasury announced that there would be offered on September 25 to the holders of the \$3,519 millions of 7/8% certificates of indebtedness maturing on October 1, 1944, an opportunity to exchange these securities for a new issue of 7/8% certificates of indebtedness dated October 1, 1944, and maturing October 1, 1945. The subscription books opened on September 25 and closed on September 27 except for the receipt of subscriptions from holders of \$100,000 or less of the maturing certificates. The books closed for the receipt of subscriptions of the latter class on September 30.

• Less than \$500,000.

1/ This is the net budgetary deficit. Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law.

2/ This represents the increase in the gross public debt, except as noted. (See footnote 7.)

3/ Includes Federal Old-Age and Survivors Insurance Trust Fund, Unemployment Trust Fund, Railroad Retirement Account, Government insurance and retirement funds and other trust funds.

4/ Comprises Public Works Administration revolving fund and special deposits (net). Also includes Office of Distribution (formerly Agricultural Marketing Administration) commodity food stamp transactions.

5/ Includes expenditures for retirement of national bank notes. In the fiscal years 1935 and 1936, \$91 millions and \$554 millions were transferred from increase on gold to the working

balance for retirement of national bank notes. In this statement, however, charges for retirement of national bank notes are reflected directly against increase on gold. In the years during which the retirements were actually made, inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance general and special accounts for the purpose of this table.

6/ Expenditures for the retirement of national bank notes from increase on gold for the fiscal years 1935 to 1939 (as shown below) are not reflected here, but are reflected under increase on gold as follows: 1935 - \$91 millions, 1936 - \$397 millions, 1937 - \$99 millions, 1938 - \$51 millions, and 1939 - \$5 millions, total - \$645 millions. The increases in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.

<sup>1/</sup> Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the

annual interest charge and rate of interest on United States savings bonds, Series A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.53%.

<sup>2/</sup> Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

\* Less than \$50,000.

<sup>1/</sup> These notes were originally designed to help taxpayers set aside funds with which to pay taxes and were known as Treasury tax savings notes. Series A notes were designed for the small and moderate taxpayer; series B and series C notes were intended for the large taxpayer. When the collection of taxes through withholding at the source commenced, the need for series A tax savings notes disappeared and their sale was discontinued. Redemption provisions on series A notes were relaxed to provide for the payment of interest on notes thereafter redeemed for cash (see footnote 3). Sale of Series C notes, which were designed for the investment of idle cash reserves as well as for the accumulation of tax reserves, was continued and the notes were designated Treasury savings notes.

<sup>2/</sup> Includes matured Treasury savings notes.

<sup>3/</sup> Series A notes, which were sold from August 1, 1941 through June 22, 1943, yield approximately 1.92% per annum. Through June 22, 1943, the notes could be redeemed for cash only at the original purchase price; since that date, the notes have been redeemed for cash at

the tax payment value current at the time of presentation. (See also footnote 1.) Prior to October 4, 1943, the maximum amount which could be used in payment of each class of tax (income, estate, or gift) by each taxpayer during each taxable year was limited to \$5,000 par value; this limitation was removed as of that date.

<sup>4/</sup> Series B notes were sold from August 1, 1941 through September 12, 1942, to yield approximately 0.85% per annum. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash only at the original purchase price.

<sup>5/</sup> Series C notes went on sale September 14, 1942. Interest accrues each month on a graduated scale (see "Treasury Bulletin" for August 1943, page 4) to yield approximately 1.07% per annum if held to maturity. These notes may be used in payment of Federal taxes at any time two months after the date of issue. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash six months after the date of issue at the tax payment value current at the time of presentation. Prior to July 27, 1943, notice of 30 days was required for cash redemption. See also footnote 1.

ries of postal savings stamps outstanding on April 30, 1941 was \$150 thousands.

1/ Figures for periods prior to November 1, 1942 are not strictly comparable with subsequent data because of the shift to a Daily Treasury Statement basis. 4/ Details not available for May, June, and July 1941.

2/ Estimated on the basis of samples conducted by the Post Office Department.

5/ Includes minor amounts which were exchanged for postal savings certificates. These aggregated \$123 thousands for the period August 1, 1941 through June 30, 1942 and \$55 thousands for the period July 1, 1942 through October 31, 1942.

**Basis of Computations:** (1) Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

**Back Figures:** For monthly and weekly figures back to January 1933, see "Treasury Bulletin" for April 1944, pages 57-61.
