Source: Daily Treasury Statements, except as noted.

Note: This table has been revised to classify separately the Social Security program including railroad retirement and railroad unemployment activities, which were formerly shown partly as Grants to States under the Social Security Act and partly under other expenditures.

1/ Estimates of 1943 Budget.

2/ Includes unjust enrichment tax.

3/ Includes chiefly alcoholic beverage taxes, tobacco taxes, manufacturers' and retailers' excise taxes, and estate taxes.

4/ Beginning July 1940, amounts representing appropriations equal to collections of Social Security taxes under the Federal Insurance Contributions Act for old-age insurance (less reimbursements to the general fund for administrative expenses) have been deducted from total budget receipts in the Daily Treasury Statement to arrive at a figure called net receipts. Such deduction items are reflected under trust account receipts as net appropriations to the Federal Old-Age and Survivors Insurance Trust Fund. In the above statement, similar treatment has been accorded net transfers to the Federal Old-Age and Survivors Insurance Trust Fund (formerly Old-Age Reserve Account) made during the fiscal years 1936 to 1940, in order to facilitate comparison with the later periods.

5/ Excludes public debt retirements.

6/ These figures include supplemental items of estimated expenditures for national defense; for the fiscal year 1942, \$1,000,000,000 and for the fiscal year 1943, \$17,000,000,000.

7/ Additional expenditures attributable to national defense payable from funds which have supplemented regular appropriations of the civil establishment, are included in other categories below.

8/ Includes expenditures classified as Transfers to trust accounts, etc., for the Adjusted Service Certificate Fund.

9/ Includes Public Works transactions classified as Revolving Funds (net).

10/ Includes Aid to agriculture transactions classified as Revolving Funds (net), expenditures of the Department of Agriculture classified as Departmental in the Daily Treasury Statement, and Surplus Marketing Administration transactions classified as transfers to trust accounts, etc.

11/ Represents gross expenditures of \$1,252 millions less repayments of U. S. investments in capital funds aggregating \$315 millions.

12/ Estimate included with that given for Work Projects Administration and National Youth Administration.

13/ Includes departmental expenditures except for Department of Agriculture; and expenditures classified as Transfers to trust accounts, etc., for Government employee retirement and insurance funds.

14/ Receipts from proposed tax legislation estimated at 7 billion dollars would reduce this excess of expenditures to \$35,441 millions.

1/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

YIELDS OF TREASURY BONDS AND NOTES JAN. 15. 1942

Based on Mean of Closing Bid and Asked Quotations

Note Far-callable bonds yields are computed to and issue placed as of the earliest call date if the bond is selling above par, and as of the final maturity date if the bond is selling below par. The smooth curves are fitted by eye. Dollar amounts shown in descriptions of issues are in millions. Issues for which an exchange offer has been made and has expired are excluded. Curves reflect the yields of taxable and partially tax-exempt bonds respectively, and of wholly tax-exempt notes.
