Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Combined Statement of Receipts, Expenditures and Balances of the United States Government" and

for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1, 1948, and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown

Reporting Bases - (Continued)

in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury

Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions handled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

bearer form only, and in denominations of \$1,000, \$5,000, \$10,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value). Tenders are received at Federal Reserve banks and branches.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for \$200,000 or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, and one-year bills may not be made by credit in Treasury tax and loan accounts.

Foreign Series and Foreign Currency Series

In July the Treasury issued four certificates of indebtedness of the foreign series in the amount of \$185 million and two certificates of indebtedness of the foreign currency series equivalent to \$118 million. Retirements amounted to \$255 million for the foreign series securities and the equivalent of \$191 million for the foreign currency series.

The new foreign series certificates bear interest at the rate of 5% per annum and will mature in three months. As of July 31, the outstanding foreign series securities totaled \$747 million.

The new foreign currency series certificates are denominated in Swiss francs. One, equivalent to \$25 million, was issued July 1, bears interest at the rate of 4.99% per annum and matures June 30, 1967. The other, equivalent to \$93 million, was issued July 26, bears interest at the rate of 5% per annum and matures January 26, 1967. At the end of July foreign currency series securities outstanding totaled \$884 million and were denominated in Austrian schillings, Belgian francs, German marks, Italian lire and Swiss francs.

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates, including effect of proposed legislation, are from the 1967 Budget document released January 24, 1966.

Note: Agency shifts are shown in this table beginning with the period

of such shifts; figures prior to the shifts have not been adjusted. Therefore, some expenditures do not necessarily represent functions which are comparable over a period of time (for a more consistent basis, see Table 6).

1/ These figures, the latest available, are based on reports from the agencies and, as additional information is received, are subject to adjustment preparatory to the closing of the central accounts in the Treasury for the fiscal year 1966. Subject to adjustment are: Certain overseas transactions not yet included; the write-offs or withdrawals of unobligated balances no longer available, since agency reports covering these transactions are not required by law to be submitted until September 30; certain indefinite appropriations included on the basis of Budget estimates rather than final actual figures; other transactions, including those relating to (a) authorizations to expend from debt receipts, (b) restorations and reappropriations.

2/ Although not expended, a substantial portion of these amounts is obligated for payrolls, outstanding purchase orders and contracts for equipment and supplies, and similar items.

3/ Includes reappropriations.

4/ Consists of authorization by law for Government-owned enterprises to borrow (1) from the Treasury (to expend from public debt receipts), or (2) from the public (to expend from corporate debt receipts).

5/ Consists of new contract authorizations, established by law for the current fiscal year, net of current appropriations to liquidate either current or prior contract authorizations.

6/ Consists of appropriation transfers between agencies.

7/ Consists of transfers to, or restorations from (-), the surplus fund; rescissions, cancellations, or adjustments of borrowing authority and contract authority; transfers to miscellaneous receipts; and other adjustments.

8/ Public debt securities and certain guaranteed securities issued by Government enterprises.

9/ Represents the difference between this report based on accounts submitted by certain disbursing officers and corresponding preliminary data used in the monthly statement of receipts and expenditures of the Government.

* Less than \$500,000.

Footnotes to Table 10

- 1/ State unemployment funds; used for benefit payments mainly. Beginning August 1961, withdrawals by States have been reduced by reimbursements to State accounts from Federal Extended Compensation Account.
- 2/ Established by the Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101 (a)), into which are deposited tax receipts transferred in accordance with the act and from which are paid the administrative expenses of the employment security program and reimbursement for tax refunds. Receipts consist of appropriated and unappropriated transfers of tax collections.
- 3/ Net of repayments.
- 4/ Amounts represent excess of collections from Federal unemployment tax over expenditures for benefits and administrative expenses which excess was appropriated from the general fund to this account. (Includes amounts appropriated to the State Unemployment Accounts). Beginning 1961, such excess is transferred between book accounts within the Unemployment Trust Fund.
- 5/ Established by the act approved March 24, 1961 (42 U.S.C. 1105(a)), which provides for a temporary program of extended unemployment compensation payments.
- 6/ For payment of benefits and refunds (45 U.S.C. 360). Figures exclude interim advance of \$15 million from the Treasury and subsequent repayment, both in 1940.
- 7/ Contributions under the Railroad Unemployment Insurance Act of 1938, as amended (45 U.S.C. 360 (a)), in excess of the amount specified for administrative expenses. Through 1957, also includes transfers from the administration fund of excess amounts over the specified balance (45 U.S.C. 361 (d)).
- 8/ Temporary advances are made when the balance in the Railroad Unemployment Insurance Account is insufficient to meet payments of benefits and refunds due or to become due. Whenever the balance is sufficient to pay such benefits and refunds, repayments are made, plus interest at 3% per annum, pursuant to an act approved May 19, 1959 (45 U.S.C. 360 (d)).
- 9/ Consists of a specified proportion of contributions deposited in the fund to be available for administrative expenses. The Railroad Unemployment Insurance Administration Fund was established in the Unemployment Trust Fund pursuant to the amending act of September 6, 1958; before that the administration fund was a separate trust fund (45 U.S.C. 361).
- 10/ Total includes \$107.2 million transferred from State accounts to the Railroad Unemployment Insurance Account in connection with its establishment (45 U.S.C. 363).
- 11/ Beginning fiscal 1961 refunds of taxes (principal only) are reported as deductions from receipts. Interest paid on refunds of taxes is included under expenditures. See footnote 13.

CONSOLIDATED CASH TRANSACTIONS

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1967 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget documents as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated

from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Seasonally adjusted summary data are shown in table 3. The adjusted data have been derived by applying a seasonal adjustment formula developed by the Bureau of Census, Department of Commerce.

ACCOUNT OF THE TREASURER OF THE UNITED STATES

Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in

the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included

through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).

2/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.

3/ Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

1/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.

2/ Retirement plan bonds first offered for sale as of January 1, 1963.

3/ Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.

4/ Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of \$10,000 or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the periods of heavy tax payments.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual

interest charge for the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1/ Guaranteed securities included are those held outside the Treasury.

2/ Total includes "Other bonds" through 1960; see Table 3.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

1/ Does not include payments for accrued interest.

2/ The effective rate of interest on the new issue is the coupon rate adjusted for the amount paid by or to the Treasury as premium or discount on the new security exchanged for eligible securities originally issued at par. For eligible securities originally issued at prices other than par, the payment by or to the Treasury is applied to the price adjusted for the pro rata amortization of the original premium or discount to the date of the advance funding.

2/ Based on the mean of bid and asked prices of securities eligible for exchange (adjusted for payments on account of purchase price of securities issued) at noon on the day before announcement by the Treasury.

4/ Additional issue.

PUBLIC DEBT OPERATIONS

Footnotes to Table 7

Source: Daily Treasury statement; Bureau of the Public Debt.

- 1/ Original call and maturity dates are used.
- 2/ All by investors other than Federal Reserve Banks.
- 3/ Rolled over into a one-year bill (see Table 4).
- 4/ Holders of the maturing certificates were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 3-1/4% notes offered in the amount of around \$6.9 billion. For detail of offering, see Table 4.
- 5/ Excess of maturing 4-7/8% certificates over allotments of new securities on subscriptions from holders of those certificates (see Table 4, footnotes 6 and 7).
- 6/ Advance refunding offering. Pursuant to the provisions of section 1037 (a) of the Internal Revenue Code of 1954 as added by Public Law 86-346, approved September 22, 1959, the Secretary of the Treasury has declared that no gain or loss shall be recognized for Federal income tax purposes upon the exchange of the eligible outstanding securities solely for the new securities. For tax purposes, therefore, the investor will carry the new securities on his books at the same amount as he had been carrying the eligible securities exchanged. Gain or loss, if any, upon the securities surrendered in exchange will be taken into account upon the disposition or redemption of the new securities. See also Table 5.
- 7/ From March 20 through March 22, 1961, owners of 2-1/4% bonds of June 15, 1959-62, 2-1/4% bonds of December 15, 1959-62, 2-5/8% notes maturing February 15, 1963, and 2-1/2% bonds maturing August 15, 1963, were granted the option of exchanging their holdings. The first three were exchangeable for a new 3-5/8% bond due November 15, 1967, and the last for a new 3-3/8% bond due November 15, 1966. Exchanges were subject to allotment if subscriptions exceeded \$5 billion for the bonds of 1967 or \$3 billion for the bonds of 1966.
- 8/ Tax anticipation issue; for detail of offerings beginning 1961, see Table 4; for amounts redeemed for taxes and for cash see "Note" below.

For detail of offering, see Table 4.

For detail of offering, see Table 4.

Source: Daily Treasury statement; Office of Debt Analysis in the Office of the Secretary.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout.

Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table 3.

2/ Details by series on cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.

2/ Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the

method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.

4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.

5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.

6/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.

7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.

8/ Includes exchanges of Series 1950 F and G bonds for 3-7/8% marketable bonds of 1968.

9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.

10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

TREASURY SURVEY OF OWNERSHIP, JUNE 30, 1966

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for

corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

^{1/} Includes public debt not subject to statutory limitation. For amount subject to limitation, see page 1.^{2/} Excludes trust departments.^{3/} Includes trust companies and beginning with figures for July 1949, also includes stock savings banks. Previously, those banks were reported as a separate classification.^{4/} New series; see March 1964 Treasury Bulletin, page 70.^{5/} Included with all other investors are those banks, insurance companies, savings and loan associations, corporations, and State and local government funds not reporting in the Treasury Survey.^{6/} Consists of corporate pension trust funds and profit sharing plans which involve retirement benefits. The data are compiled from quarterly reports by trustees of funds which account for approximately 90 percent of United States Government securities held by all corporate pension trust funds. Since the data are not available each month, the regular monthly Survey includes holdings by these funds under "Held by all

other investors." The quarterly data are presented as supplemental information in a memorandum column accompanying the Survey for each reporting date, beginning with December 31, 1953.

^{7/} United States savings bonds, Series E and J, are reported to the Treasury Survey at maturity value but have been adjusted to current redemption value for use in this statement.^{8/} Includes \$19 million depositary bonds held by commercial banks not included in the Treasury Survey.^{9/} Guaranteed securities are those held outside the Treasury.^{10/} Holdings by reporting investors are not available.^{11/} Includes only publicly offered issues.^{12/} The proprietary interest of the United States in these banks ended in July 1951.^{13/} The proprietary interest of the United States in these banks ended in June 1947.

* Less than \$500,000.

TREASURY SURVEY - COMMERCIAL BANK OWNERSHIP, JUNE 30, 1966

The tables which follow provide an analysis of the security holdings of commercial banks reporting in the Treasury survey of ownership of securities issued by the United States Government and by Federal agencies. The figures show the total holdings distributed according to Federal Reserve member bank classes and nonmember banks.

This analysis of commercial bank ownership was first published in the May 1944 issue of the "Treasury Bulletin," based on the survey data for December 31, 1943. It has appeared at semiannual or quarterly intervals since that time, and is now being published for the June 30 and December 31 survey data.

Note: The United States also has a gold tranche position in the International Monetary Fund, amounting to \$642.2 million as of July 31, 1966. In accordance with Fund policies the United States has the right to draw foreign currencies equivalent to this amount from the Fund virtually automatically if needed. Under appropriate circumstances, the United States could draw additional amounts equal to the United States quota of \$5,160 million.

1/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, the proceeds of which are invested by the Fund in U.S. Government securities; as of July 31, 1966, this amounted to \$800 million. Of this amount, the United States purchased \$200 million in 1956, \$300 million in 1959, and \$300 million in 1960.

Beginning September 1965 includes gold deposited by the International Monetary Fund (\$182.7 million as of May 31, \$182.9 million as of June 30, 1966, and \$183.9 million as of July 31, 1966) for the purpose of mitigating the impact of gold payments to the Fund for quota increases by countries which purchased such gold from the United States. The United States has a corresponding gold liability to the Fund.

2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. (Data as of December 31, 1965 and earlier dates for Treasury gold stock taken from Circulation Statement of United States Money.)

CAPITAL MOVEMENTS

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is published monthly in the "Treasury Bulletin." Reports by banks, bankers, securities brokers and dealers, and nonbanking business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.^{1/} A detailed description of the content of the statistics, including the changes instituted, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterest-bearing special notes of the United States held by the Inter-American Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Government bonds and notes exclude non-marketable U.S. Treasury notes, foreign series, and non-marketable U.S. Treasury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Section IV presents supplementary data which are reported less frequently than monthly but which are published monthly.

^{1/} Copies of the reporting forms and instructions may be obtained from the Office of Balance of Payments Programs, Operations and Statistics, Office of the Assistant Secretary for International Affairs, Treasury Department, Washington, D.C. 20220 or from Federal Reserve Banks.

1/ For an explanation of statistical presentation and exclusions, see headnote on page 97.

2/ Through 1949, transactions in U.S. Government bonds and notes include transactions in domestic corporate bonds.

3/ Data below the line include changes in liabilities and claims reported by a number of banks included in the series beginning December 31, 1961.

4/ Change includes claims previously held but first reported as of May 31, 1963; as of that date such claims amounted to \$85.6 million. Also includes claims reported by banks for the first time as of December 31, 1963; as of that date such claims amounted to \$193.2 million, representing in part claims previously held by banks but not reported.

5/ Change in short-term liabilities includes a net increase of \$50.8 million as of December 31, 1964, arising from changes in reporting coverage.

6/ Data below the line on changes in claims reflect the exclusion from

the series beginning December 31, 1964 of short-term U.S. Government claims previously included; and the addition to the series of claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.

7/ Change in short-term liabilities excludes \$776.3 million representing letter of credit issued by the U.S. Treasury Department to the International Monetary Fund in payment of the dollar portion of the U.S. quota increase which became effective on February 23, 1966.

8/ Data below the line on changes in short-term claims reflect the addition to the series of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 1965, and short-time claims reported by banks reporting for the first time.

1/ For exclusions see footnote on page 97.

2/ Included with "Other foreigners."

3/ Included with "Other claims."

4/ Beginning in August 1956 and also in April 1957, certain accounts previously classified as "Foreign banks" are included with "Official institutions."

5/ Differs from 1961 end of year data on the preceding line by inclusion of liabilities and claims reported by a number of banks included in the series beginning December 31, 1961.

6/ Includes reported liabilities to foreign official institutions beginning October 1961. Figures for selected dates are as follows:

end 1961, \$46.3 million; end 1962, \$47.9 million; end 1963, \$30.1 million; end March 1966, \$317.2 million; end June 1966, \$367.2 million.

7/ Includes claims previously held but first reported as of May 31, 1963; as of that date such claims amounted to \$85.6 million. Also includes claims amounting to \$193.2 million reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported.

8/ Short-term liabilities include a net increase of \$50.8 million arising from changes in reporting coverage, distributed as follows:

"Official institutions" -\$4.0 million, "Foreign banks" +\$60.3 million,

"Other foreigners" +\$22.5 million, and "Payable in foreign currencies" -\$27.9 million.

9/ Data on claims below the line differ from claims above the line because of the exclusion as of December 31, 1964 of \$58.1 million of short-term U. S. Government claims previously included; and because of the addition of \$545.9 million of short-term claims and \$313.3 million of long-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.

See footnote 11.

10/ Data on claims below the line differ from claims above the line because of the addition of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 31, 1965, and short-term claims reported by banks reporting for the first time.

11/ Short-term liabilities exclude \$776.3 million letter of credit issued by the U. S. Treasury Department to the International Monetary Fund in payment of the dollar portion of the U.S. quota increase which became effective on February 23, 1966.

Note: Data represent estimated official and private holdings of U.S. Government securities with an original maturity of more than one year. (For exclusions see headnote on page 97.) Annual and monthly data are shown in this section beginning with the February 1964 issue of the Bulletin. For quarterly data see Section IV, Table 2, through the June 1964 issue; and "International Financial Statistics," Table 4, beginning with the September 1964 issue. Data as of December 31, 1962-63 are on the basis of a November 30, 1960 survey and regular monthly reports of securities transactions (see Table 4). Data for December 31, 1963, also are shown on the basis

of a July 31, 1963, survey and the monthly transactions reports. For statistical convenience, the new series is introduced as of December 31, 1963, rather than as of the survey date.

The variations between the two series are believed to result from omissions from, or errors in reporting, shifts in ownership not involving purchases or sales through U.S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates.

* Less than \$500,000.
