Treasury Financing Operations

October Certificate and Note Maturities

On September 20, 1948, in accordance with his statement on August 9, the Secretary of the Treasury announced the offering of a one-year 1-1/4 percent certificate of indebtedness to refund the \$6,913 million of 1 percent certificates and 1 percent notes maturing October 1. The maturing notes amounted to \$4,092 million, Series J-1948 certificates to \$1,354 million, and Series K-1948 certificates to \$1,467 million.

Subscription books were opened September 20 and were closed at the close of business on September 22. Exchanges were made par for par, and cash subscriptions were not received. The new certificates were dated October 1, 1948, and bear interest from that date at the rate of 1-1/4 percent per annum, payable with the principal at maturity on October 1, 1949. They were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Reports to the Treasury on the ownership of Government securities indicate that on August 31, 1948, about 61 percent of the maturing notes were owned by reporting commercial banks and Federal Reserve Banks, about 48 percent of the maturing Series J certificates were owned by reporting commercial banks and Federal Reserve Banks, and

about 51 percent of the maturing Series K certificates were owned by reporting commercial banks and Federal Reserve Banks. The ownership figures for August 31 are the latest available for holdings of commercial banks.

Subscriptions for the new certificates totaled \$6,535 million, leaving \$378 million to be paid in cash. Exchanges for the maturing notes amounted to \$3,912 million, leaving \$180 million to be paid in cash; exchanges for Series J certificates amounted to \$1,257 million, leaving \$97 million to be paid in cash, and exchanges for Series K certificates amounted to \$1,366 million, leaving \$101 million to be paid in cash.

Treasury Bills Retired and Refunded

Retirements of Treasury bills, which had been made weekly since the end of June, were continued in the first two weeks in September. The five issues maturing during the month totaled \$5.4 billion and the amount refunded was \$5.2 billion. The first three maturities and the fifth were \$1.1 billion each and the fourth was \$1.0 billion. Each of the first two new issues was \$100 million less than the amount of that maturing. The average rates of discount for the five September offerings, beginning with that dated September 2, were, in weekly order, 1.075 percent, 1.076 percent, 1.083 percent, 1.092 percent, and 1.109 percent.

Note: Historical details of Treasury market financing operations are shown in the tables on "Offerings" and "Disposition", respectively, of marketable issues of

bonds, notes, and certificates of indebtedness, and the table "Offerings of Treasury Bills", in this issue of the "Treasury Bulletin".

1/ The securities shown in this table were issued to the Treasury to finance Government corporations and certain other business-type activities of the Government, with the Treasury itself raising the necessary funds through public debt operations. To avoid duplication, these securities are not included in the guaranteed debt outstanding as shown in preceding tables.

2/ Total includes notes issued by the Virgin Island Company from September 1947 through June 1948 in the amount of \$250,000, in July \$350,000, and in August \$450,000, and in September \$550,000.

3/ Notes issued by the Reconstruction Finance Corporation and outstanding in the amount of \$9,314 million were canceled on June 30, 1949, pursuant to the Government Corporation Appropriation Act, 1949.

STATUTORY DEBT LIMITATION

Section 21 of the Second Liberty Bond Act, as amended, provides that the face amount of obligations issued under authority of that Act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury), shall not ex-

ceed in the aggregate \$275 billion outstanding at any one time. Obligations issued on a discount basis, and subject to redemption prior to maturity at the option of the owner, are included in the statutory debt limitation at current redemption values.

1/ Original call and maturity dates are used.

2/ Prior to the refunding operations of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege of exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering

of an exchange security.

3/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called securities would be presented for cash redemption.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31, and October 1935, pages A-4 and A-5. Sales and redemptions data by States are published at the end of each calendar and each fiscal year after June 30, 1947. Sales by denominations are also published semiannually after December 31, 1947.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of Series G outstanding are quoted at par. Matured bonds which have been redeemed are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to June 1947, it was possible to distribute by series all sales re-

ported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and small amounts also of unclassified F and G redemptions, beginning with June 1947.

3/ Not calculated for matured series.

n.a. Not available.

TREASURY SAVINGS NOTES

Treasury savings notes (originally designated tax savings notes) have been issued in four series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; Series C from September 14, 1942, through August 31, 1948; and Series D on continuous sale beginning September 1, 1948. Details concerning terms and conditions for purchase and redemption, and investment yields of Series D notes will be found on page A-1 of the October 1948 "Treasury Bulletin". For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946,

pages 42 and 43. Similar information concerning Series C notes will be found in the "Treasury Bulletin" for October 1945, pages A-4 and A-5.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

1/ United States savings bonds, Series A-D, E, and F, are included at current redemption values.

2/ Includes all securities issued or guaranteed by the U. S. Government, but excludes guaranteed securities held by the Treasury. In the April 1948 issue of the "Treasury Bulletin" figures in this table were revised to include matured debt and debt bearing no interest, as well as interest-bearing debt. For all practical purposes the addition of these items to the former series affects only the holdings by "Individuals" and by "Other corporations and associations", since other investors hold negligible amounts.

3/ Consists of commercial banks, trust companies, and stock savings banks in the United States and in Territories and insular possessions. Figures exclude securities held in trust departments.

4/ Includes partnerships and personal trust accounts.

2/ Includes savings and loan associations, dealers and brokers, and investments of foreign balances and international accounts in this country. Beginning with December 1946, figures include investments by the International Bank for Reconstruction and Development and International Monetary Fund in special noninterest-bearing notes issued by the U. S. Government.

6/ Holdings by Federal land banks are included under "Private Investors" instead of "U. S. Government agencies and trust funds" beginning with June 30, 1947, since the proprietary interest of the United States in these banks ended Jan 26, 1947.

7/ Comprises trust, sinking, and investment funds of State and local governments and their agencies, and Territories and insular possessions.

TREASURY SURVEY OF OWNERSHIP, AUGUST 31, 1948

The Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. 1/ Not quoted on September 30, 1948.

2/ Not issued until after September 30, 1948; for amount, see Table 3 under "Debt Operations".

3/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of high and low, in case of recurrence, are the latest dates.

4/ Included in the average yield of long-term taxable Treasury bonds as shown under "Yields of Treasury and Corporate Bonds".

5/ Issues which commercial banks may not acquire prior to a specified

date (with minor exceptions).

6/ All partially tax-exempt except Panama Canal bonds, which are wholly tax-exempt.

7/ Called on August 13, 1948, for redemption on December 15, 1948.

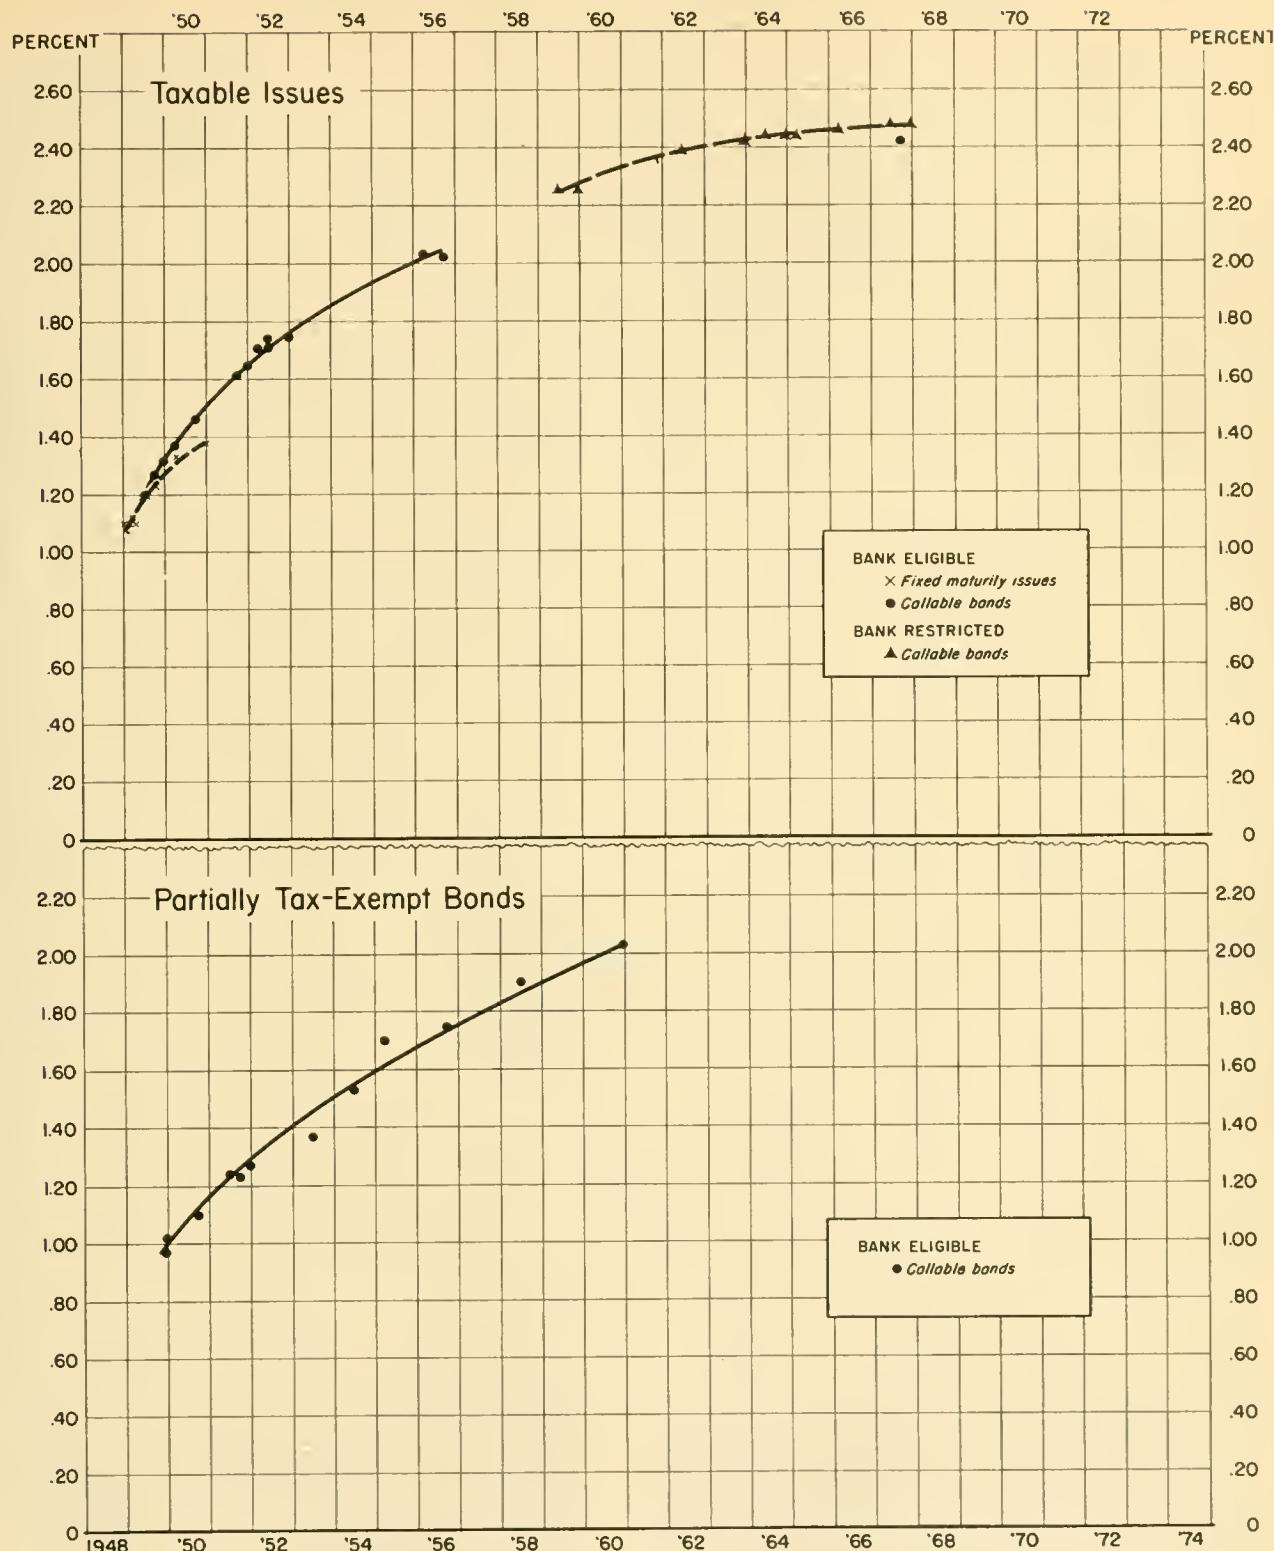

8/ These securities are not shown until date of issue.

9/ Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in the Federal land banks ceased on June 26, 1947.

10/ Yield to maturity. Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

YIELDS OF TREASURY SECURITIES SEPT. 30, 1948

Based on Mean of Closing Bid and Ask Quotations

Explanation. The points represent yields to call when prices are above par, and to maturity date when prices are at par or below.
The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or
which are due or callable in less than 3 months are excluded.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were either due or callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock

Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. 1/ For definitions of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin". The partially tax-exempt series was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

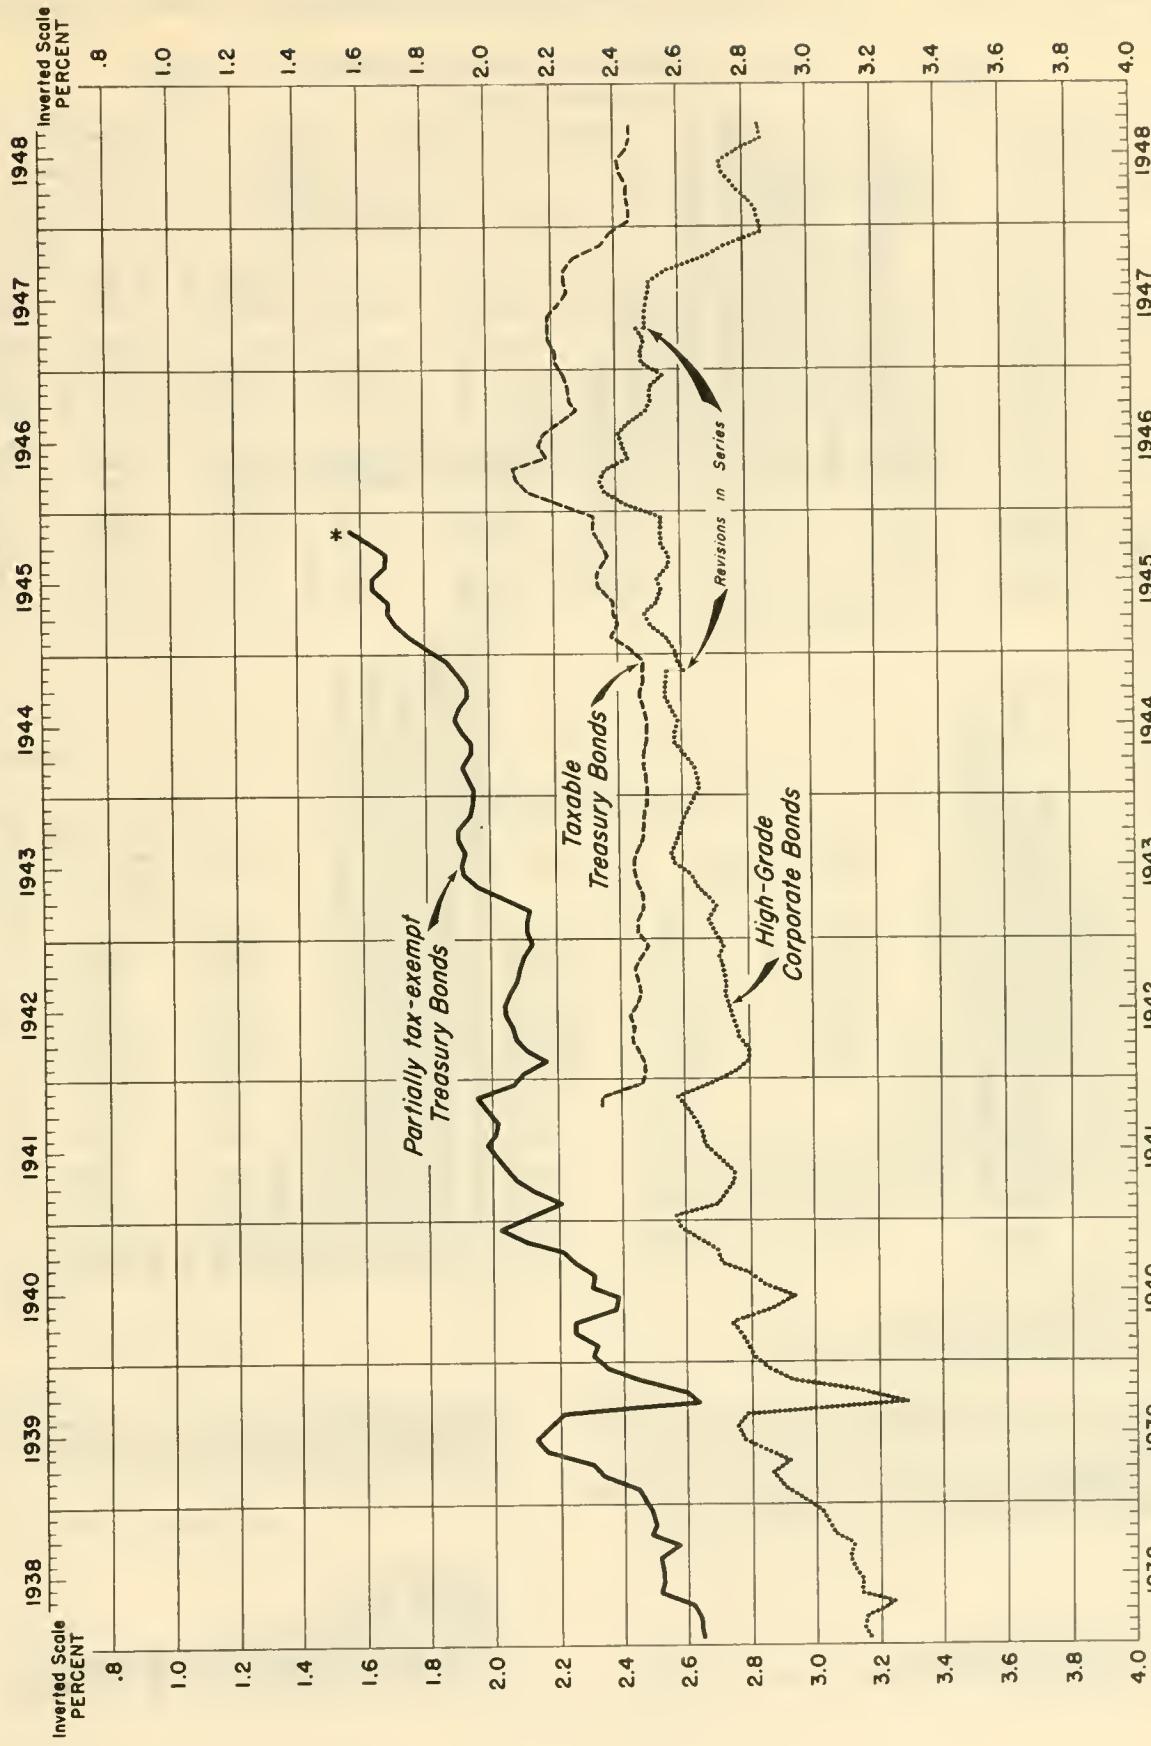

2/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

3/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

4/ Market closed.

AVERAGE YIELDS OF LONG-TERM TREASURY AND CORPORATE BONDS

Monthly Series^{1/}

^{1/} Monthly averages of daily figures. Prior to April 1938, corporate bonds are averages of Saturday figures.

CAPITAL MOVEMENTS

Information relating to capital movements between the United States and foreign countries is presented in four sections. Section I contains the principal types of data on capital movements by years from 1935, and currently by months. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for recent months. The total net capital movement is given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Section III presents details with respect to capital movements and short-term claims and liabilities as

of the latest month for which the data are available.

Section IV contains data for recent months on outstanding contracts of banks for forward purchases and sales of foreign exchange.

The data in these four sections are based on reports filed each month by banks, bankers, and brokers throughout the United States. The reports are collected, checked, and tabulated by the twelve Federal Reserve Banks. The totals are then forwarded to the Treasury Department for consolidation and publication.

Publication of detailed figures on capital movements was discontinued between the March 1942 and the November 1945 issues of the "Treasury Bulletin", but data omitted during that period were supplied in the November 1945 issue and supplement.

The latest available loan and balance sheet data are presented in this issue of the "Treasury Bulletin", and Tables 3 and 4 for the same date will appear in a subsequent issue.
