1/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges

for retirement of national bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

p Preliminary.

1/ Figures for November and following months are not strictly comparable with earlier months because of the shift to a Daily Treasury Statement basis. Stamps sold prior to October 1, 1942 were known

as postal savings stamps and were obligations of the Postal Savings System but subsequently became public debt obligations.

2/ Sales and redemptions commence with May 1, 1941. The amount of the old series of postal savings stamps outstanding on April 30, 1941 was \$150 thousands.

3/ Net change in amount outstanding as shown on Daily Treasury Statement. See footnote 1/.

1/ When the price of a security is such as to result in a negative yield, the excess of price over zero yield is given in the yield columns in thirty-seconds.

2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "When issued" prices are included beginning November 1, 1941. Dates of highs and lows, in case of recurrence, are the latest dates.

3/ Computed on mean price to call date when mean price is above par and to maturity date when mean price is below par.

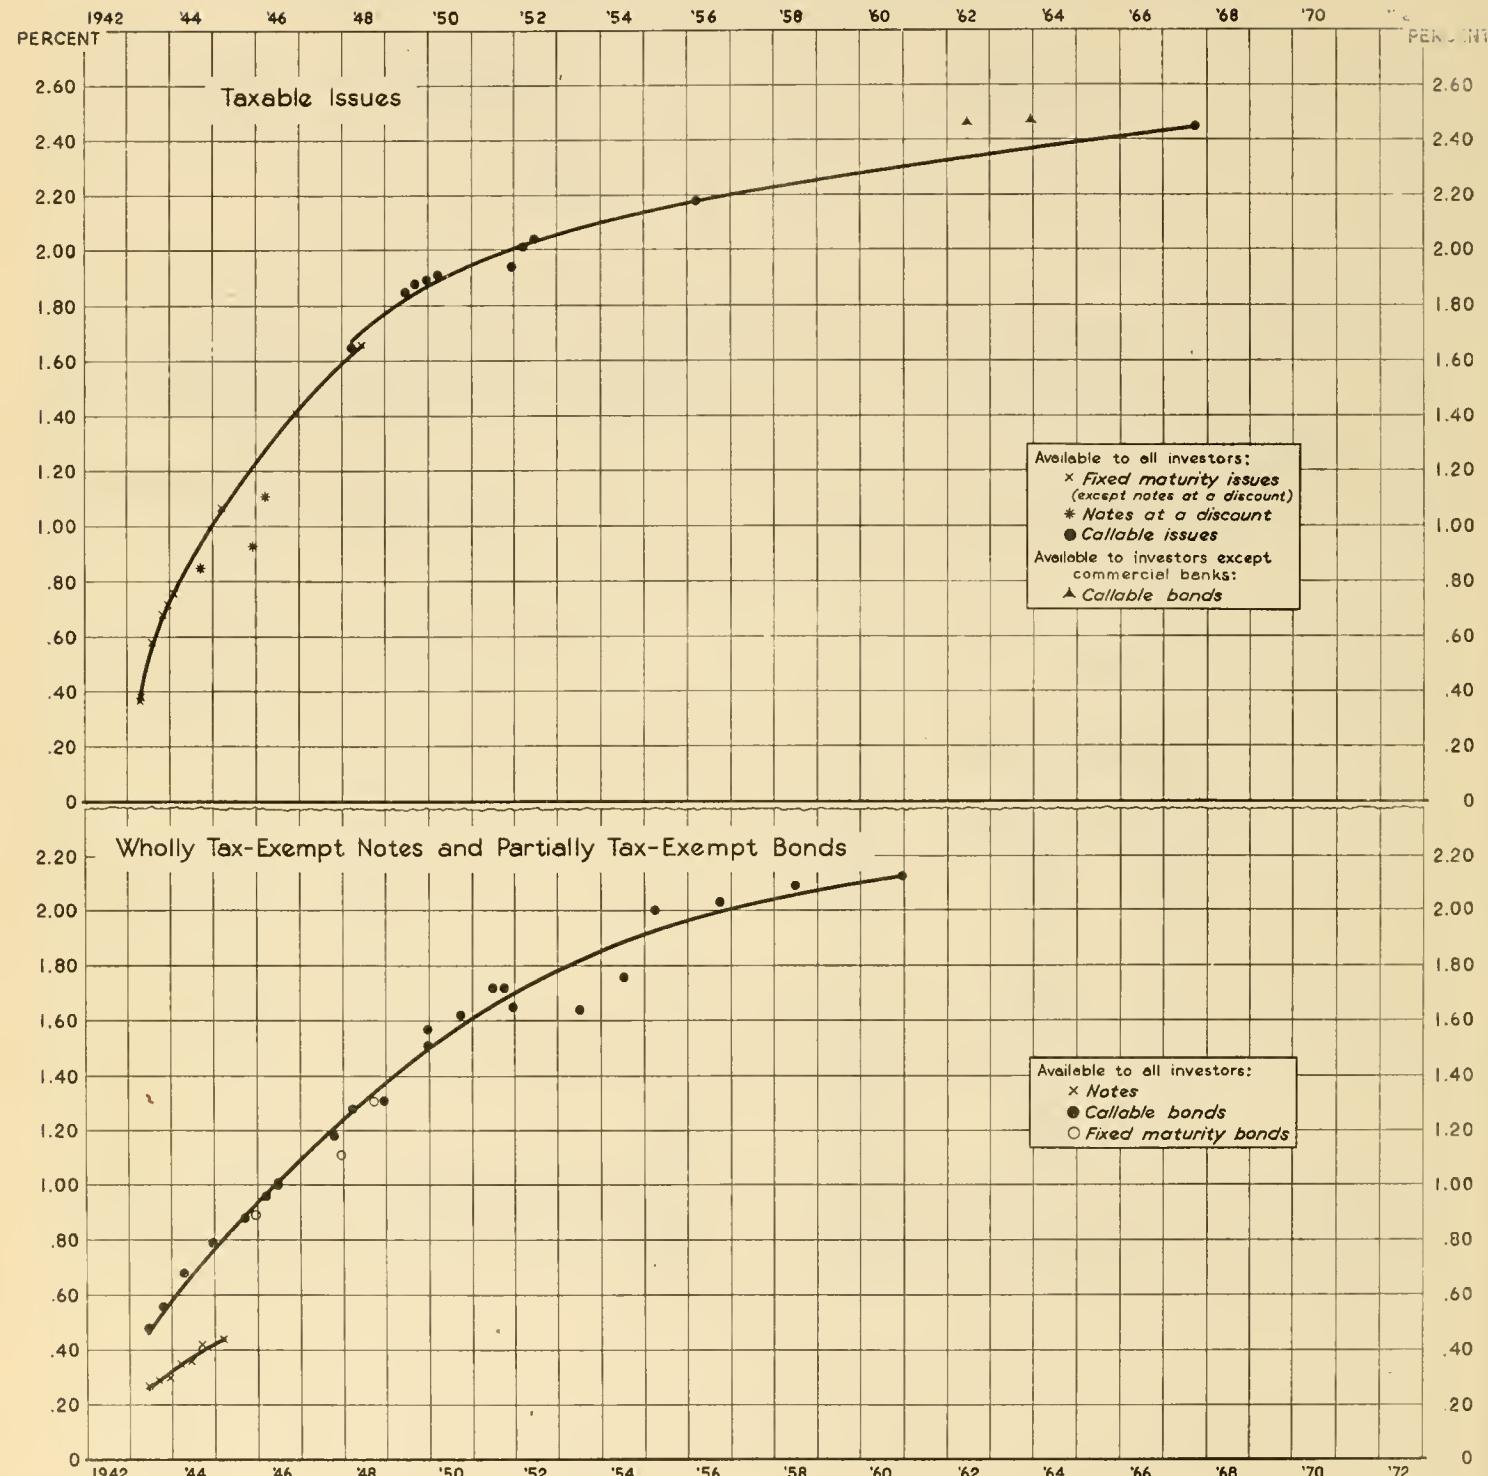

4/ Excludes issues completely held by Farm Credit Administration agencies.

5/ Callable on 30 days' notice at 100-1/2 on July 3, 1943. "Yield" is computed to maturity or call, depending on which date gives the lower yield.

6/ Taxable issues.

YIELDS OF TREASURY SECURITIES JAN. 30, 1943

Based on Mean of Closing Bid and Asked Quotations

Explanation: The points represent yields to call date when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Base of Computation: (1) Treasury bond yields are computed on the basis of the mean of bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Back Figures: See "Treasury Bulletin" for July 1941, pages 21-26, and subsequent issues.

Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax. (In addition, interest derived from \$5,000 aggregate principal amount of partially tax-exempt Treasury bonds

2/ Average of taxable Treasury bonds neither due nor callable for twelve years. The 2-1/2 percent bonds of 1962-67 and the 2-1/2 percent bonds of 1963-68, are excluded because of restrictions on their purchase and negotiability. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax. This average commenced October 20, 1941.

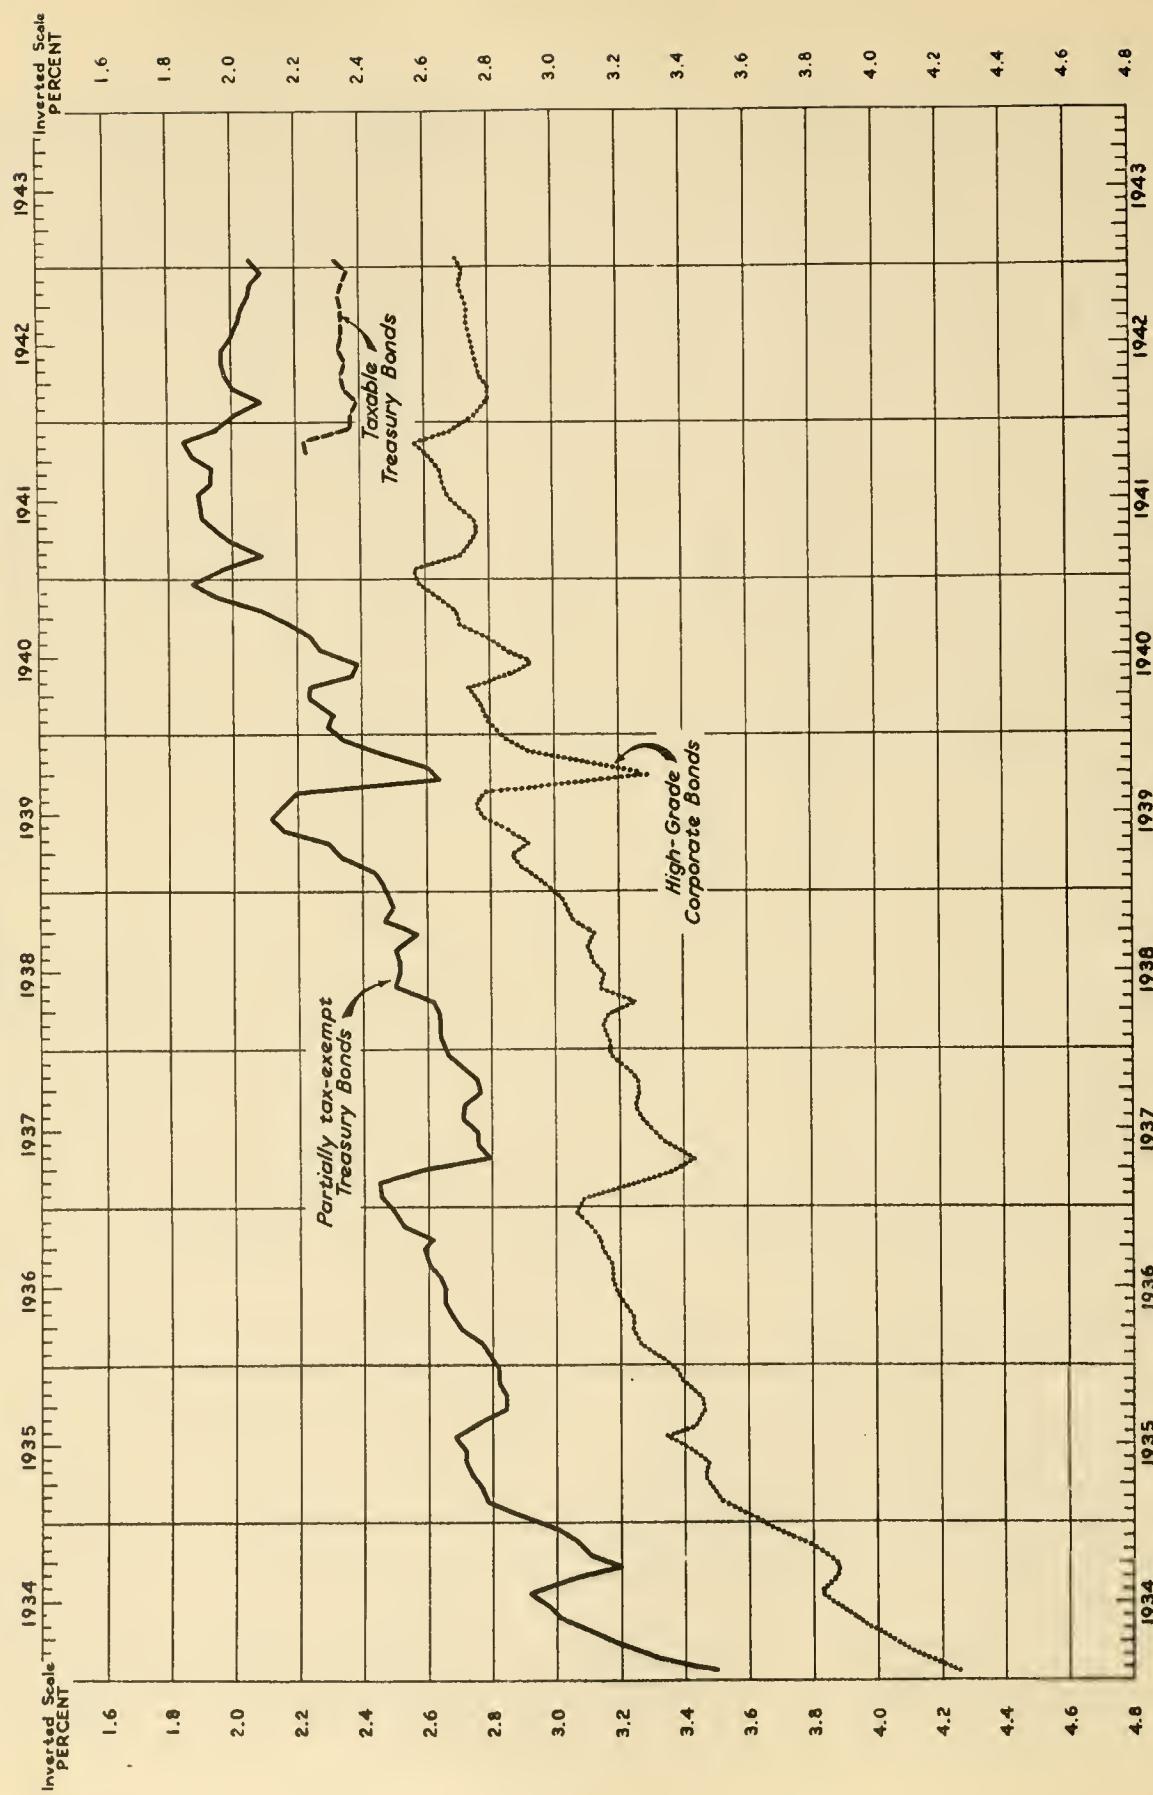

3/ Average of 9 bonds, January 6, 1933 through December 6, 1935; average of 15 bonds, December 7, 1935 through July 31, 1937; average of 20 bonds, August 1, 1937 through September 13, 1938; average of 5 bonds, September 14, 1938 to date.

4/ Monthly averages of daily figures. Prior to April 1, 1938, corporate bonds are averages of Saturday figures.

5/ On days when the exchanges are closed, the date and prices of the previous day are used.

6/ Holiday.
