Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Combined Statement of Receipts, Expenditures and Balances of the United States Government" and

for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1, 1948, and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuances and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown

Reporting Bases - (Continued)

in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury

Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions handled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

Treasury Financing Operations

May Refunding

On April 27, the Treasury announced an exchange offering of 4-7/8% Treasury Notes of Series F-1967, to be dated May 15, 1966, to mature November 15, 1967, at 99.85, to yield about 4.98%, for the following securities maturing May 15, 1966:

\$8,289 million of 4% Treasury Notes of Series D-1966, dated November 15, 1964; and
 \$1,028 million of 3-3/4% Treasury Bonds of 1966, dated November 15, 1960.

The public held \$2.5 billion of the maturing securities, and Federal Reserve and Government investment accounts held \$6.8 billion.

The subscription books were open from May 2 through May 4. Cash subscriptions were not received. Subscriptions accepted totaled about \$8,135 million, leaving about \$803 million of the 4% notes and \$379 million of the 3-3/4% bonds for cash redemption.

Payment for the new notes was to be made on May 16, 1966, in a like face amount of the maturing securities, with the May 15, 1966, coupons detached from bearer securities. A cash payment of \$1.50 per \$1,000 was made to subscribers.

Interest on the new notes is payable semiannually on November 15, 1966, and on May 15 and November 15, 1967. The notes are available in bearer and registered form in denominations of \$1,000, \$5,000, \$10,000, \$100,000, \$1,000,000, \$100,000,000, and \$500,000,000.

One-year Bills

On April 20 tenders were invited for \$1 billion, or thereabouts, of 365-day Treasury bills, to be dated April 30, 1966, to refund an equal amount of one-year bills maturing on that date.

Tenders were opened on April 26 and totaled \$1,834 million, of which \$1,001 million (including \$39 million of noncompetitive tenders) were accepted at the average discount rate of 4.773 percent.

13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in April totaled \$9.2 billion, replacing an equal amount of maturing bills. There were four 91-day issues of \$1.3 billion each and four

182-day issues of \$1.0 billion each. Average rates for the new issues are shown in the following table.

Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of \$1,000, \$5,000, \$10,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value). Tenders are received at Federal Reserve banks and branches.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for \$200,000 or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, and one-year bills may not be made by credit in Treasury tax and loan accounts.

Foreign Series and Foreign Currency Series

In April the Treasury issued one certificate of indebtedness of the foreign series in the amount of \$50 million and one certificate of indebtedness of the foreign currency series equivalent to \$93 million. Retirements amounted to \$140 million for the foreign series securities and the equivalent of \$168 million for the foreign currency series.

The new certificate of the foreign series, issued April 29, bears interest at the rate of 4.65 percent, and matures

July 29, 1966. As of April 30, the outstanding foreign series securities totaled \$949 million.

The new certificate of indebtedness of the foreign currency series, denominated in Swiss francs, was issued April 26, bears interest at the rate of 4.80 percent, and matures October 26, 1966. At the end of April foreign currency series securities outstanding totaled \$1,031 million and were denominated in Austrian schillings, Belgian francs, German marks, Italian lire, and Swiss francs.

Source: Expenditures for 1966 are from reports received from disbursing, collecting, and administrative agencies of the Government, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1967 Budget document, Table 19, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 19. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.

1/ Collections in the various States do not necessarily indicate the Federal tax burden of the respective States, since the taxes collected in one State are, in many instances, borne by residents of other States. For example, the withholding taxes reported by employers situated in metropolitan areas near State boundaries include amounts withheld from salaries of employees who reside in neighboring States.

2/ Includes old-age and disability insurance taxes on self-employment income.

3/ Includes tax on unrelated business income of exempt organizations.

4/ Consists of estate and gift taxes, and excise taxes; excise tax receipts deposited by postmasters from sales of documentary stamps; excise taxes on imported items deposited by collectors of customs;

and amounts collected on Puerto Rican products coming into the United States.

5/ Includes District of Columbia collections.

6/ Consists of collections from U. S. taxpayers in Puerto Rico, Canal Zone, etc., and in foreign countries.

7/ The amount of undistributed depositary receipts consists of all those issued during the calendar year minus those received with tax returns which are included in the State totals.

8/ Withheld taxes covered into the Treasury of Guam (48 U.S.C. 1421h).

9/ Net transactions in the clearing account on the central books of the Treasury for income taxes withheld from the salaries of Federal employees.

* Less than \$500.

- 2/ Established by the Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101 (a)), into which are deposited tax receipts transferred in accordance with the act and from which are paid the administrative expenses of the employment security program and reimbursement for tax refunds. Receipts consist of appropriated and unappropriated transfers of tax collections.
- 3/ Net of repayments.
- 4/ Amounts represent excess of collections from Federal unemployment tax over expenditures for benefits and administrative expenses which excess was appropriated from the general fund to this account. (Includes amounts appropriated to the State Unemployment Accounts). Beginning 1961, such excess is transferred between book accounts within the Unemployment Trust Fund.

CONSOLIDATED CASH TRANSACTIONS

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1967 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget documents as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from

both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

ACCOUNT OF THE TREASURER OF THE UNITED STATES

Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in

the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depository system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included

through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).

2/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.

3/ Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

1/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.

2/ Retirement plan bonds first offered for sale as of January 1, 1963.

3/ Taxes eligible for credit consist of those deposited by taxpayers in the depository banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.

4/ Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of \$10,000 or more drawn on a special depository bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the periods of heavy tax payments.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for

the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1/ Guaranteed securities included are those held outside the Treasury.

2/ Total includes "Other bonds" through 1960; see Table 3.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

1/ Does not include payments for accrued interest.

2/ The effective rate of interest on the new issue is the coupon rate adjusted for the amount paid by or to the Treasury as premium or discount on the new security exchanged for eligible securities originally issued at par. For eligible securities originally issued at prices other than par, the payment by or to the Treasury is applied to the price adjusted for the pro rata amortization of the original premium or discount to the date of the advance funding.

3/ Based on the mean of bid and asked prices of securities eligible for exchange (adjusted for payments on account of purchase price of securities issued) at noon on the day before announcement by the Treasury.

4/ Additional issue.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table 3.

2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.

3/ Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the

method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.

4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.

5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.

6/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.

7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.

8/ Includes exchanges of Series 1950 F and G bonds for 3-7/8% marketable bonds of 1968.

9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.

10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

TREASURY SURVEY OF OWNERSHIP, MARCH 31, 1966

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for

corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

1/ Includes public debt not subject to statutory limitation. For amount subject to limitation, see page 1.

2/ Excludes trust departments.

3/ Includes trust companies and beginning with figures for July 1949, also includes stock savings banks. Previously, those banks were reported as a separate classification.

4/ New series; see March 1964 Treasury Bulletin, page 70.

5/ Included with all other investors are those banks, insurance companies, savings and loan associations, corporations, and State and local government funds not reporting in the Treasury Survey.

6/ Consists of corporate pension trust funds and profit sharing plans which involve retirement benefits. The data are compiled from quarterly reports by trustees of funds which account for approximately 90 percent of United States Government securities held by all corporate pension trust funds. Since the data are not available each month, the regular monthly Survey includes holdings by these funds under "Held by all

other investors." The quarterly data are presented as supplemental information in a memorandum column accompanying the Survey for each reporting date, beginning with December 31, 1953.

7/ United States savings bonds, Series E and J, are reported to the Treasury Survey at maturity value but have been adjusted to current redemption value for use in this statement.

8/ Includes \$19 million depository bonds held by commercial banks not included in the Treasury Survey.

9/ Holdings by reporting investors are not available.

10/ Guaranteed securities are those held outside the Treasury.

11/ Includes only publicly offered issues.

12/ The proprietary interest of the United States in these banks ended in July 1951.

13/ The proprietary interest of the United States in these banks ended in June 1927. Less than \$500,000.

Note: The United States also has a gold tranche position in the International Monetary Fund, amounting to \$725.9 million as of April 30, 1966. In accordance with Fund policies the United States has the right to draw foreign currencies equivalent to this amount from the Fund virtually automatically if needed. Under appropriate circumstances, the United States could draw additional amounts equal to the United States quota of \$5,160 million.

1/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, the proceeds of which are invested by the Fund in U.S. Government securities; as of April 30, 1966, this amounted to \$800 million. Of this amount, the United States purchased \$200 million in 1956, \$300 million in 1959, and \$300 million

in 1960. Beginning September 1965 includes gold deposited by the International Monetary Fund (\$37.1 million as of February 28, \$164.9 million as of March 31, and \$181.0 million as of April 30, 1966) for the purpose of mitigating the impact of gold payments to the Fund for quota increases by countries which purchased such gold from the United States. The United States has a corresponding gold liability to the Fund.

2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. (Data as of December 31, 1965 and earlier dates for Treasury gold stock taken from Circulation Statement of United States Money.)

^{2/} The second column for 1964 differs from data in preceding column because of the exclusion as of December 31, 1964 of \$58.1 million of short-term U.S. Government claims previously included; and because of the addition of \$545.9 million of short-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.

^{3/} See footnote 4.

^{4/} The second column for December 1965 differs from data in preceding column because of the addition of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 31, 1965, and short-term claims reported by banks reporting for the first time.

Note: Data represent estimated official and private holdings of U.S. Government securities with an original maturity of more than one year. (For exclusions see headnote on page 90.) Annual and monthly data are shown in this section beginning with the February 1964 issue of the Bulletin. For quarterly data see Section IV, Table 2, through the June 1964 issue; and "International Financial Statistics," Table 4, beginning with the September 1964 issue. Data as of December 31, 1962-63 are on the basis of a November 30, 1960 survey and regular monthly reports of securities transactions (see Table 4). Data for December 31, 1963, also are shown on the basis

of a July 31, 1963, survey and the monthly transaction reports. For statistical convenience, the new series is introduced as of December 31, 1963, rather than as of the survey date.

The variations between the two series are believed to result from omissions from, or errors in reporting, shifts in ownership not involving purchases or sales through U.S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates.

* Less than \$500,000.

CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES

The financial statements of corporations and other business-type activities of the United States Government, which have appeared in the "Treasury Bulletin" since the August 1956 issue, are compiled from reports submitted to the Treasury under Department Circular No. 966, issued January 30, 1956, and Supplement No. 1, Revised, issued June 16, 1965. These regulations were issued pursuant to the Budget and Accounting Procedures Act of 1950. They superseded Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financial statements previously published in the Bulletin were submitted.

Department Circular No. 966 requires submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); and all other activities of the Government operating as revolving funds. Other activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments, and other recoverable assets, were brought under the regulations as the agency accounting systems were developed to where they were capable of furnishing the required financial reports.

Four kinds of financial statements are called for by Department Circular No. 966. They are statements of financial condition, income and expense, source and application of funds, and certain financial contingencies. The statements of financial condition are published quarterly and appear as Section I in the series of tables. The first statements of financial condition published under Circular 966 were as of March 31, 1956, and were presented in the August 1956 Bulletin. Statements of income and expense and source and application of funds

are published semiannually, for June 30 and December 31 reporting dates, and appear as Section II and III. The first of these statements under Circular 966 covered the fiscal year 1956, and were published in the January 1957 Bulletin. Within the sections, the agencies are grouped in separate tables by type, as follows: public enterprise revolving funds, intra-governmental revolving funds, certain other activities, deposit funds, and trust revolving funds.

Supplement No. 1, when originally issued in 1956, extended the coverage to include all executive agencies and activities not previously reporting under Circular 966, but required only a statement of financial condition annually as of June 30. These were activities which were not principally of a business-type nature. Those which had not yet developed formal accounting procedures to provide complete balance-sheet type statements were temporarily authorized to report only assets. Thus, the supplement rounded out provisions for information on properties and other assets, as well as liabilities, of the United States Government all of which is needed by Treasury for the compilation of complete Government-wide financial reports. The first comprehensive reporting under the original Supplement No. 1 was for June 30, 1957, and the data were published in the December 1957 Bulletin as Part B of Table 4 in Section I. The revision to Supplement No. 1 in 1965 made no basic change to the overall purpose of the originally issued supplement; it updated and consolidated all amendments to both the regulation and instructions which had been issued after June 30, 1956.

A summary of loans outstanding for a series of dates is included in Section I of the Bulletin presentation beginning with the June 1958 issue. Two classifications of the loans are shown, one by type and one by agency. Data prior to 1956 are based on the earlier reporting requirements, which provided for complete coverage of Government lending agencies.
