Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Money." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Combined Statement of Receipts, Expend-

itures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1, 1948, and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown

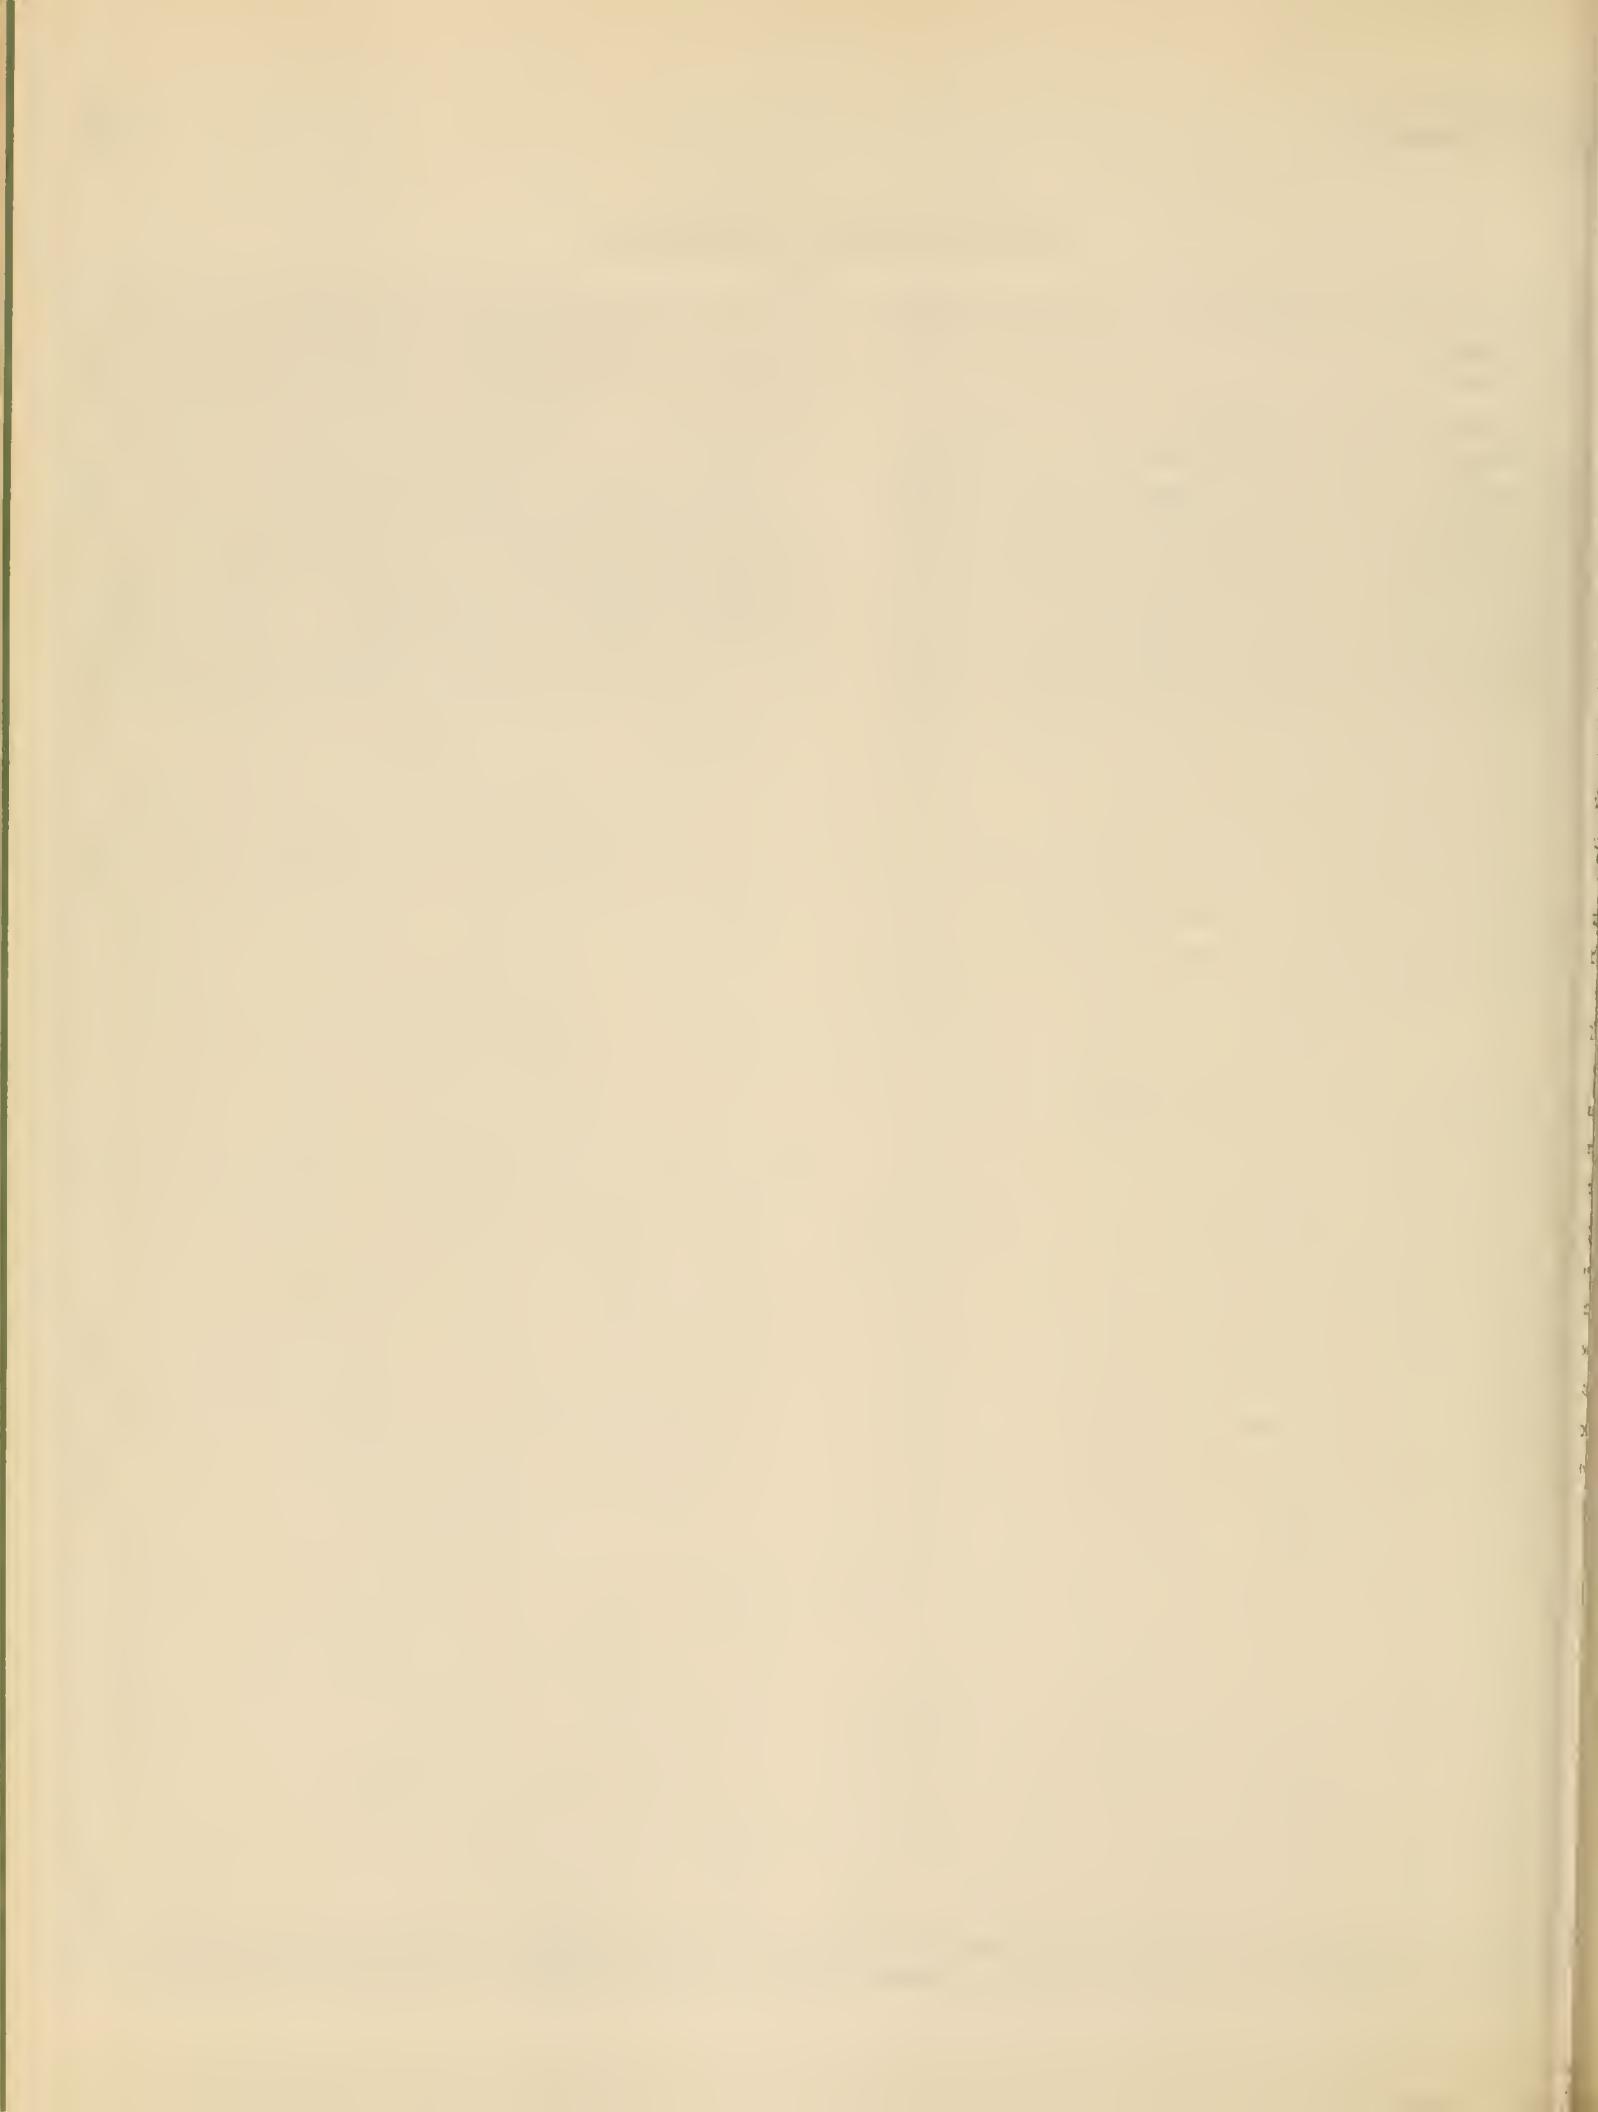

Reporting Bases - (Continued)

in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions han-

dled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the daily statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

Treasury Financing Operations

One-Year Bills

An offering on February 25, 1964, of 362-day Treasury bills for \$1 billion, or thereabouts, was announced by the Treasury on February 18. Tenders totaled \$2,412 million, of which \$1,001 million was accepted at the average bank discount rate of 3.765 percent. Noncompetitive tenders for \$200,000 or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids. These amounted to \$19 million.

The 362-day bills are dated March 3, 1964, and will mature February 28, 1965, when the face amount will be payable without interest. Issued in bearer form only, the bills are in denominations of \$1,000, \$5,000, \$10,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value).

Payment for accepted tenders in cash or other immediately available funds was required to be completed on March 3, 1964. Payment by credit in Treasury tax and loan accounts was not permitted. Banking institutions generally could submit tenders for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions were not permitted to submit tenders except for their own account. Tenders were received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others were required to be accompanied by payment of 2 percent

of the face amount of Treasury bills applied for, unless tenders were accompanied by an express guaranty of payment by an incorporated bank or trust company.

13-Week and 26-Week Bills

New issues of regular weekly Treasury bills in February totaled \$8.6 billion, refunding an equivalent amount maturing. Of the 91-day bills, those issued February 6 and 13 were for \$1.3 billion each and those issued February 20 and 27 were for \$1.2 billion each. The four 182-day issues were for \$0.9 billion each. Average rates of discount are shown in the table following.

Source: Actual figures through the fiscal year 1952 and the calendar year 1953 are from the daily Treasury statement, and thereafter from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the 1965 Budget document, released January 21, 1964, including effects of proposed legislation. More detail for data on this page will be found in succeeding tables.

1/ Fiscal year figures beginning with the September 1960 issue of the Treasury Bulletin, and calendar year figures beginning with the June 1961 issue exclude certain interfund transactions from both net budget receipts and budget expenditures (see pages, II, 2, and 5). Figures previously published for these series have been revised to the new reporting basis. The change does not affect the budget surplus or deficit.

2/ Excess of receipts, or expenditures (-). For detail, see pages 12-16.

3/ For checks outstanding and telegraphic reports from Federal Reserve banks; public debt interest accrued and unpaid beginning with June and the fiscal year 1955 (previously included from November 1947 as

interest checks and coupons outstanding); also deposits in transit and changes in cash held outside the Treasury and in certain other accounts beginning with the fiscal year 1954. Net increase, or decrease (-).

4/ For current month detail and list of acts, see section on "Statutory Debt Limitation" in each issue of the Bulletin. The limitations in effect during the period covered by this table and the date when each became effective are as follows: \$275 billion on June 26, 1946; \$281 billion on August 28, 1954; \$278 billion on July 1, 1956; \$275 billion on July 1, 1957; \$280 billion on February 26, 1958; \$288 billion on September 2, 1958; \$290 billion on June 30, 1959; \$295 billion on July 1, 1959; \$293 billion on July 1, 1960; \$298 billion on July 1, 1961; \$300 billion on March 13, 1962; \$308 billion on July 1, 1962; \$305 billion on April 1, 1963; \$307 billion on May 29, 1963; and \$309 billion on July 1, 1963. Under the act approved November 26, 1963, the limitation is \$315 billion from December 1, 1963, through June 29, 1964, and \$309 billion on June 30, 1964.

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases see page II); estimates are from the 1965 Budget document, released January 21, 1964, including effects of proposed legislation.

1/ The distribution of receipts between individual income taxes and old-age and disability insurance taxes is made in accordance with provisions of Sec. 201 of the Social Security Act, as amended (42 U.S.C. 401), for transfer to the Federal Old-Age and Survivors Insurance Trust Fund (see footnote 9), and also for transfer to the Federal Disability Insurance Trust Fund (see footnote 10).

2/ Taxes on employers and employees under the Federal Insurance Contributions Act, as amended (26 U.S.C. 3101-3125), and tax on self-employed individuals under the Self-Employment Contributions Act, as

amended (26 U.S.C. 1401-1403). The Social Security Act Amendments of 1956, approved August 1, 1956, increased the rates of tax applicable to wages paid and taxable years beginning after December 31, 1956, to provide for disability insurance.

3/ Taxes on carriers and their employees under the Railroad Retirement Tax Act, as amended (26 U.S.C. 3201-3233).

4/ Tax on employers of 4 or more under the Federal Unemployment Tax Act, as amended (26 U.S.C. 3301-3308); with respect to services performed before January 1, 1956, the tax was imposed on employers of 8 or more.

5/ Includes collections under increased rates in the Highway Revenue Act of 1956 (see footnote 13).

Source: Actual figures through 1961 are from reports to the Treasury Department by disbursing officers and administrative agencies, on the monthly statement reporting basis (see page II); and from the monthly statement of receipts and expenditures thereafter. Estimates are

from the 1965 Budget document, released January 21, 1964, including effect of proposed legislation.

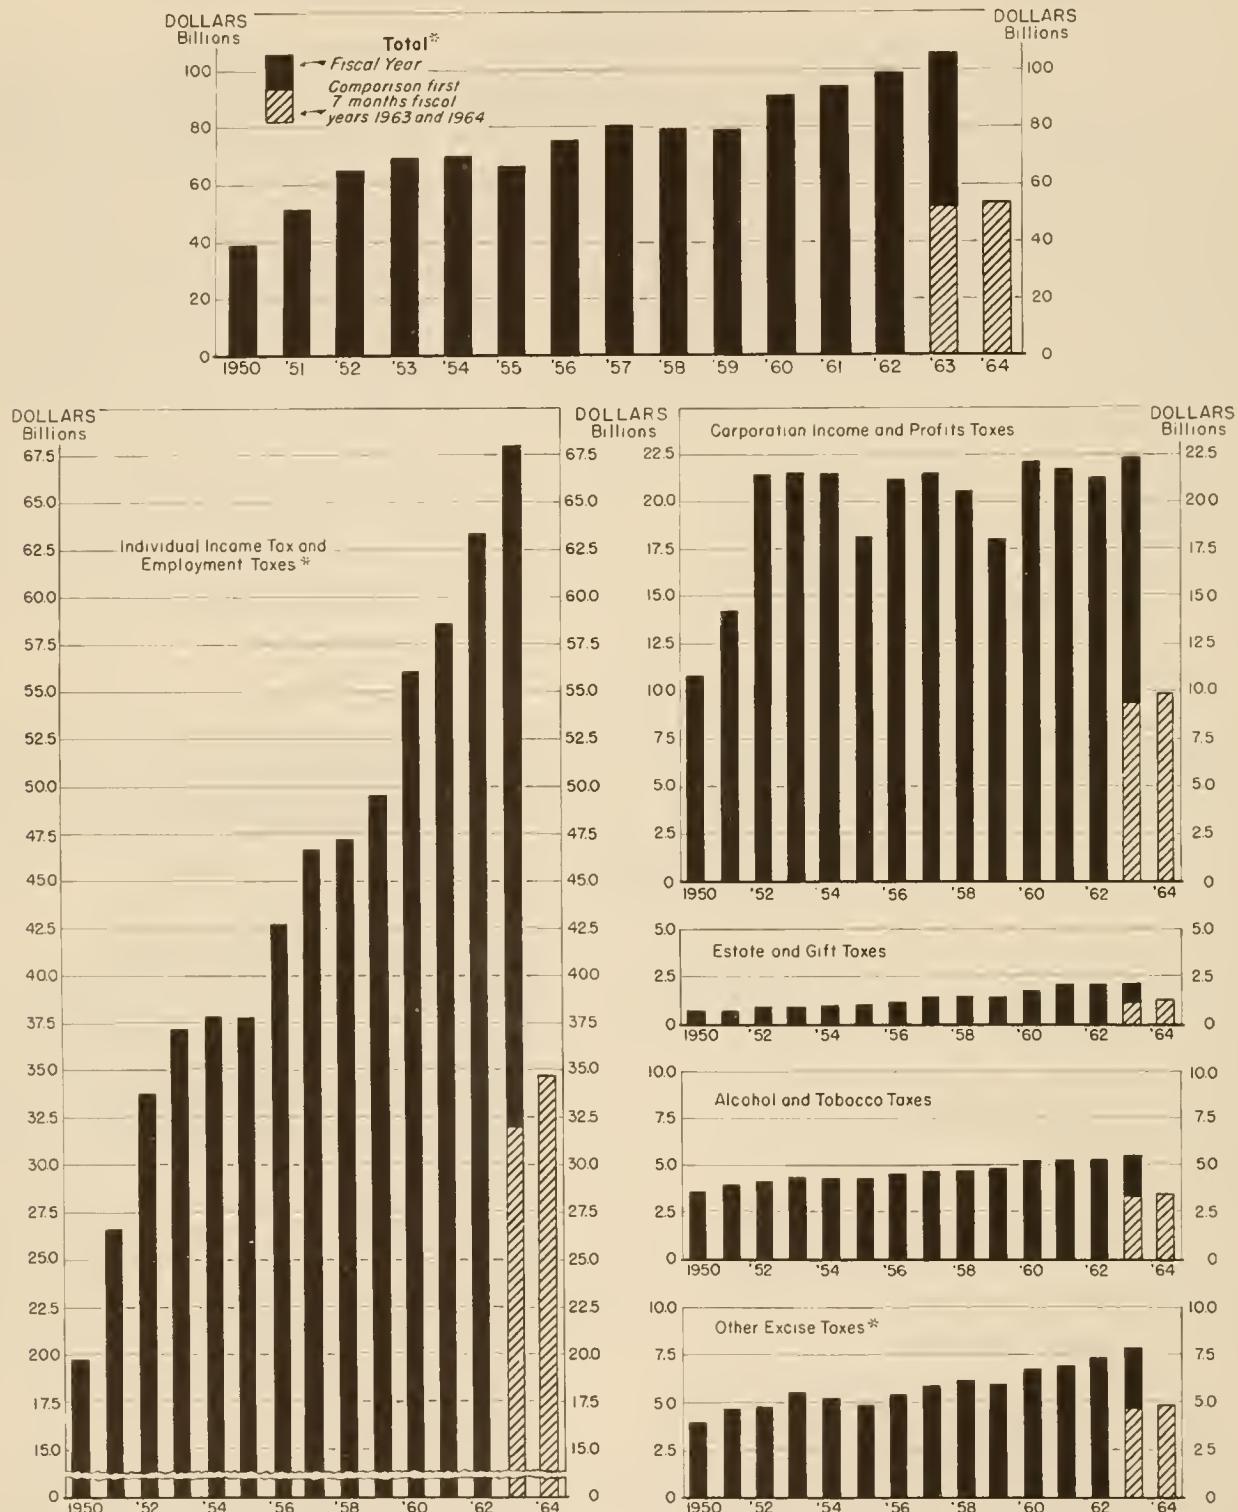

1/ Consists of miscellaneous taxes (principally the tonnage tax on foreign vessels entering U.S. ports), bullion charges, and gifts and contributions.

Footnotes to Table 1 - (Continued)

- 6/ Includes adjustments as follows for: Income taxes not withheld, September -\$3 million, and December -\$5 million; income taxes withheld, September +\$8 million, and December -\$316 million; transfers to Federal Old-Age and Survivors Insurance Trust Fund, September -\$10 million, and December +\$300 million; and transfers to Federal Disability Insurance Trust Fund, September +\$5 million, and December +\$21 million. See also footnote 9.
- 7/ Interest on refunds is included in expenditures in Table 3.
- 8/ The principal amounts for refunds of employment taxes and certain excise taxes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
- 9/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury (42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.
- 10/ The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 (42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
- 11/ Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited
- in the Treasury, less refunds, during each fiscal year (65 Stat. 222 and 66 Stat. 371) and transfers are made currently.
- 12/ The Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101), established in the Unemployment Trust Fund an administration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transferred currently on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account are to be paid the administrative expenses of the employment security program. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures.
- 13/ The Highway Revenue Act of 1956, as amended, (23 U.S.C. 120, note) established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expenditures after June 30, 1956, and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures.
- 14/ For content, see Table 4. These transactions are included in the detail of both budget receipts and expenditures but are deducted from the totals (see Reporting Bases, p. II).
- 15/ Figures in this column differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 14).
- * Less than \$500,000.

Source: Expenditures for 1964 are from reports received from disbursing, collecting, and administrative agencies of the Government, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1965 Budget document, Table 18, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 18. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.

1/ For expenditures by major functions for fiscal 1964 through February 1964, and fiscal 1963 through February 1963, see "Note" below. Details by functions are not available for publication in this issue but will appear in the April 1964 Bulletin.

CONSOLIDATED CASH TRANSACTIONS

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1965 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget documents as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from

both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

ACCOUNT OF THE TREASURER OF THE UNITED STATES

Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in

the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included

through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).

2/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.

3/ Amounts shown, beginning fiscal 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

1/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U. S. Government obligations purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.

2/ Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1951, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.

3/ Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of \$10,000 or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments. Less than \$500,000.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for

the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1/ Guaranteed securities included are those held outside the Treasury.

2/ Total includes "Other bonds" through 1960; see Table 3.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ On United States savings bonds the rate to maturity is applied against the present value.

1/ Consists of purchases or sales made by the Treasury of securities issued or guaranteed by the U. S. Government for (1) trust funds which by law are under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain U. S. Government agencies whose investments are handled through the facilities of the Treasury Department. It will be noted that these

transactions differ from those reflected in Table 1 because they exclude those Government investment accounts for which investments are not handled by the Treasury. Table 2 also includes purchases under Section 19 of the Second Liberty Bond Act, as amended (31 U.S.C. 754a), and excludes the Exchange Stabilization Fund.

TREASURY SURVEY OF OWNERSHIP, JANUARY 31, 1964

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for

corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

TREASURY SURVEY OF OWNERSHIP, JANUARY 31, 1964

In mid-1963 the Treasury expanded the coverage of the State and local portion of the Survey of Ownership, and has been receiving monthly reports from a number of important State and local authorities which were not included in the original series initiated in 1960 (see Treasury Bulletin, February 1962, page 67).

Beginning with this issue of the Treasury Bulletin the holdings of these funds, which collectively total over \$2.5 billion of Federal securities, have been added to the regular survey. The following tables present a summary of the State and local reports, on the basis of the newly-expanded series, as of the end of the month for July-December 1963.

1/ Includes approximately \$100 million issued for cash on October 28, 1963, as part of a "strip" of additional amounts of ten series of Treasury bills, maturing each week from February 6 to April 9, 1964.

2/ Amount issued on March 3, 1964, was \$1,000 million.

3/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices are included

in the history beginning October 1, 1939. Dates of highs and lows in case of recurrence are the latest dates.

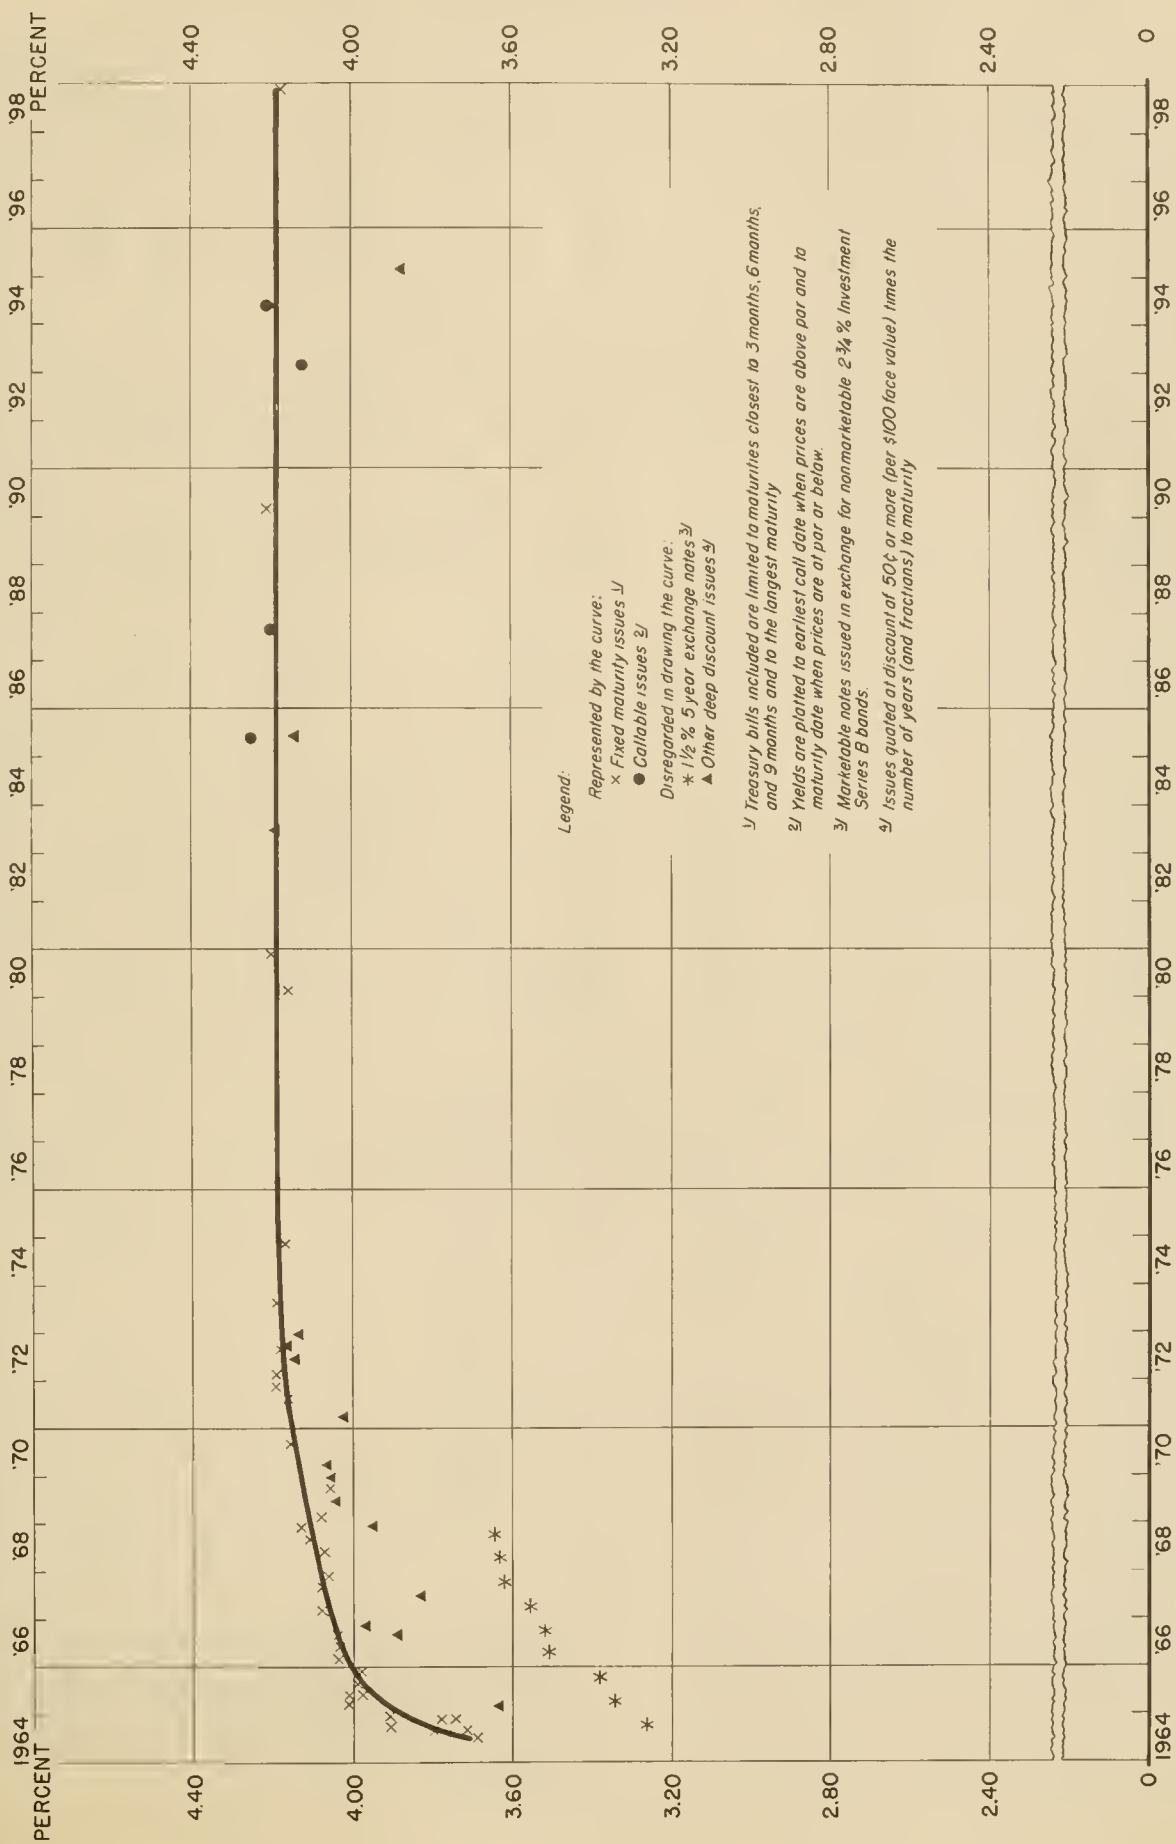

4/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.

5/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aaa corporate bonds.

1/ Series includes bonds on which the interest income is subject to normal tax and surtax and which are neither due nor callable before a

given number of years as follows: April 1953 to date, 10 years; April 1952 - March 1953, 12 years; October 1941 - March 1952, 15 years. For bonds currently in the series, see Table 4 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.

2/ One or more new long-term bonds added to the average (see footnote 1).

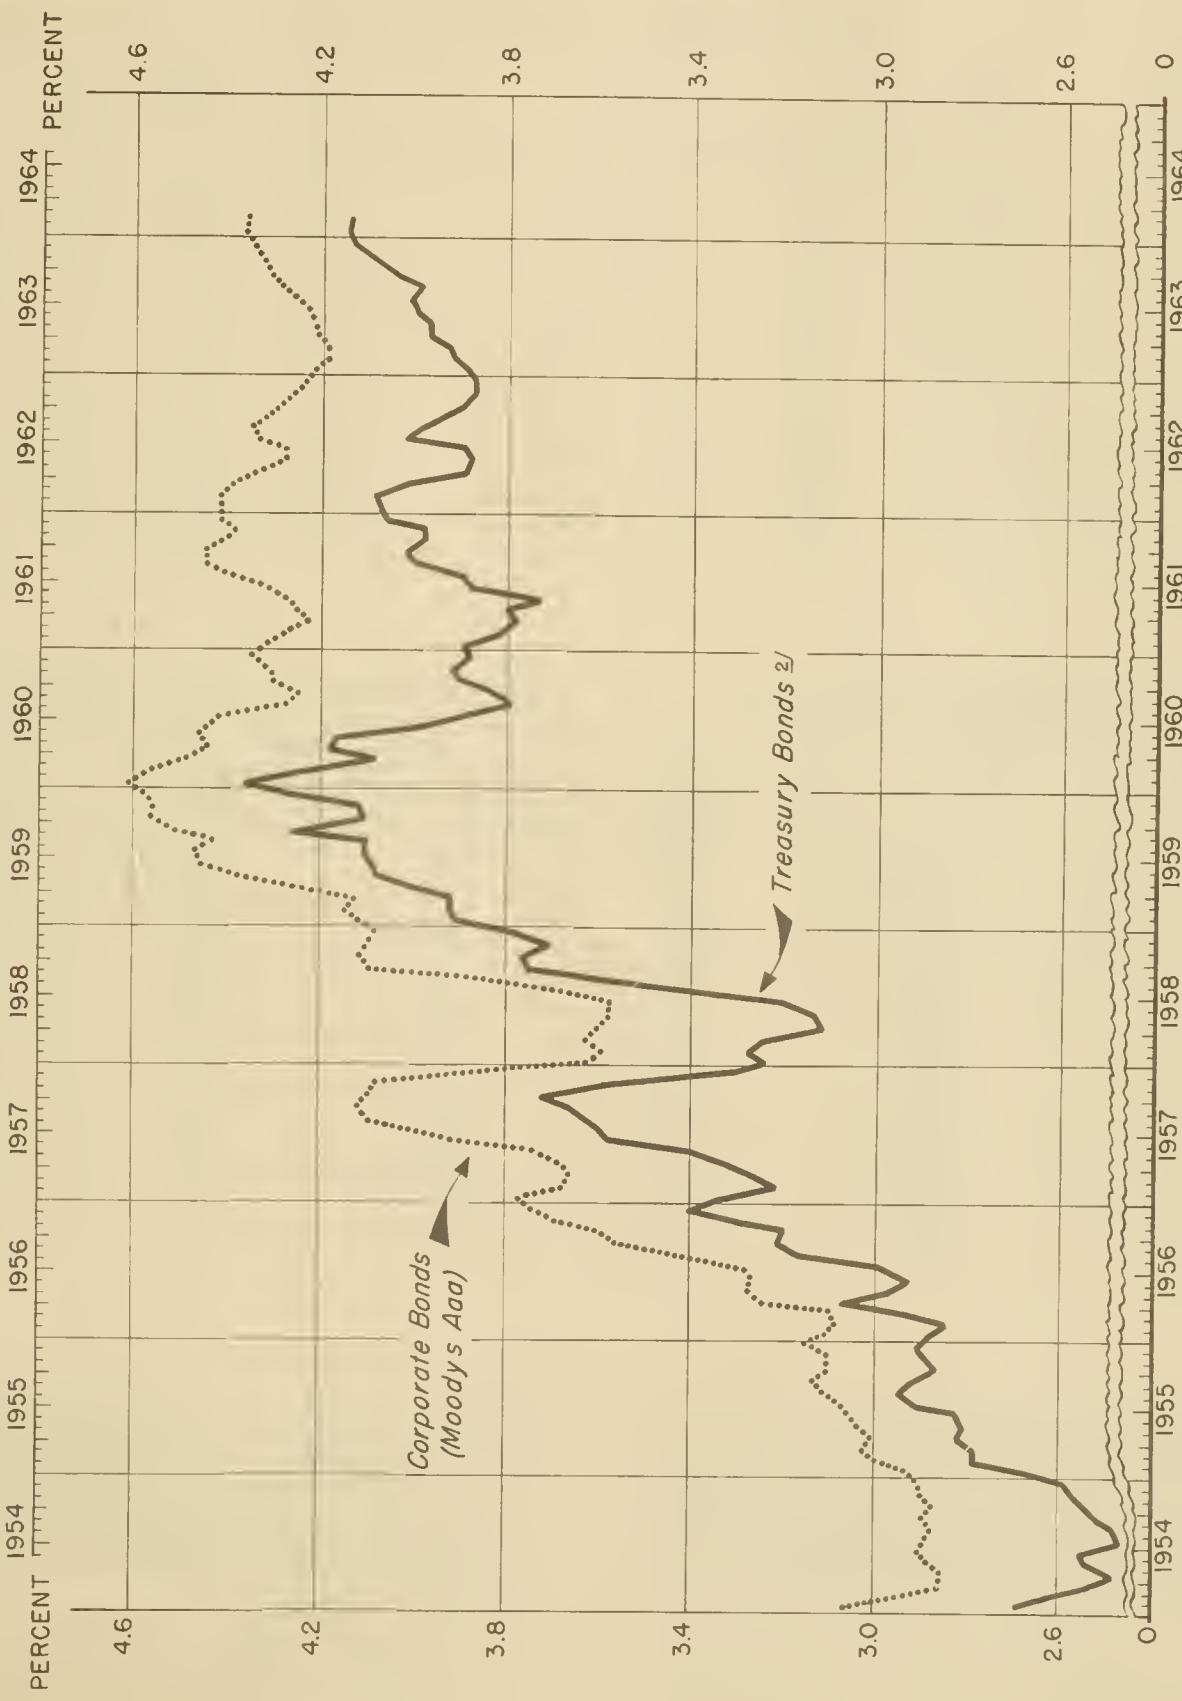

3/ An existing bond dropped from the average (see footnote 1).

4/ Change in series (see footnote 1).

5/ Market closed.

Source: Circulation Statement of United States Money.

1/ Excludes money held by the Treasury and money held by or for the account of the Federal Reserve Banks and agents.

2/ The following paper currencies are in process of retirement and are redeemable from the general fund of the Treasury: Gold certificates issued before January 30, 1934, silver certificates issued before July 1, 1929, Treasury notes of 1890, Federal Reserve notes issued before the series of 1928, Federal Reserve Bank notes, and national bank notes. The Treasury notes of 1890 have been in process of retirement since March 1900 (31 U.S.C. 411) upon receipt by the Treasury, the Federal Reserve Bank notes since June 12, 1945 (12 U.S.C. 445 note), and the national bank notes since December 23, 1915 (12 U.S.C. 441). Retirement of the others was authorized by the Old Series Currency Adjustment Act, approved June 30, 1961 (31 U.S.C. 912-916). The act authorizes the Secretary of the Treasury to determine from time to time the amount of currency of the following types which have been destroyed or lost, and to reduce the amounts thereof on the books of the Treasury: Gold certificates issued before January 30, 1934; silver certificates, United States notes, Federal Reserve Bank notes,

and national bank notes all issued before July 1, 1929; Federal Reserve notes issued prior to the series of 1928; and Treasury notes of 1890. Accordingly, the Secretary of the Treasury has determined that the following paper currencies have been destroyed or irretrievably lost and so will never be presented for redemption: On October 20, 1961, \$1 million of Treasury notes of 1890; and on August 27, 1962, \$9 million of gold certificates, \$15 million of silver certificates, \$18 million of Federal Reserve notes, \$1 million of Federal Reserve Bank notes, and \$15 million of national bank notes.

3/ Highest amount to date.

4/ Issued prior to January 30, 1934.

5/ Includes \$15 million issued before July 1, 1929.

6/ Includes \$18 million issued prior to the series of 1928.

7/ Based on the Bureau of the Census estimated population. Through fiscal 1958 the estimated population is for the conterminous United States (that is, exclusive of Alaska, Hawaii, and the outlying areas such as Puerto Rico, Guam, and the Virgin Islands). Beginning with fiscal 1959 the estimates include Alaska, and with fiscal 1960, Hawaii.

Note: The United States also has certain drawing rights on the International Monetary Fund, in which the United States has a quota of \$4,125 million. In accordance with Fund policies, these drawing rights include the right to draw virtually automatically an amount equal to the sum of the United States gold subscription to the Fund (\$1,031.2 million) and the Fund's net use of dollars; on February 29, 1964, these two amounts totaled \$905.5 million. Under appropriate circumstances the United States could draw an additional amount equal to the United States quota.

1/ Includes gold sold to the United States by the International Monetary

Fund with the right of repurchase, the proceeds of which are invested by the Fund in U. S. Government securities; as of February 29, 1964, this amounted to \$800 million. Of this amount, the United States purchased \$200 million in 1956, \$300 million in 1959, and \$300 million in 1960.

2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in "Circulation Statement of United States Money." See "Monetary Statistics," Table 3.

3/ Includes holdings of Treasury and Federal Reserve System.

CAPITAL MOVEMENTSBackground

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is reported monthly, and is published monthly in the "Treasury Bulletin." Supplementary information is published less frequently. Reports by banks, bankers, securities brokers and dealers, and nonfinancial business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.^{1/} A detailed description of the content of the statistics, including the changes instituted, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign

countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterest-bearing special notes of the United States held by the Inter-American Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Government bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Section IV presents supplementary data in five tables which appear less frequently than monthly. Table 1, short-term foreign liabilities and claims reported by nonfinancial concerns, is published quarterly in the February, May, August, and November issues of the Bulletin. Table 2, estimated gold reserves and dollar holdings of foreign countries and international institutions, is published quarterly in the March, June, September, and December issues. Table 3, foreign credit and debit balances in brokerage accounts, appears semiannually in the March and September issues. Table 4, short-term banking liabilities to foreigners in countries and areas not regularly reported separately, heretofore has been presented annually in the March issue, but beginning with the August 1963 issue is published twice a year, covering data as of April 30 and December 31. Table 5, purchases and sales of long-term securities by foreigners during the preceding calendar year, appears annually in the April issue.

^{1/} Copies of the reporting forms and instructions may be obtained from the Office of Balance of Payments, Office of International Affairs, Treasury Department, Washington 25, D. C., or from Federal Reserve Banks.
