Treasury Financing Operations

Call before Maturity

On May 14, 1956, the Treasury Department issued notice that the 2-3/4 percent Treasury bonds of 1956-59, dated September 15, 1936, due September 15, 1959, are called for redemption on September 15, 1956, when interest on these bonds will cease. There are \$982 million of the issue outstanding.

The announcement stated that holders may, in advance of the redemption date, be offered the privilege of exchanging all or any part of their called bonds for other interest-bearing obligations of the United States, in which event public notice will be given.

91-Day Bills Refunded

Four issues of weekly Treasury bills matured in April in the total of \$6.4 billion. They were refunded in full by new 91-day issues in the amounts of \$1.6 billion each, the approximate equivalents of those maturing. The average rates of discount on the new issues were 2.397 percent for April 5; 2.497 percent for April 12; 2.769 percent for April 19; and 2.788 percent for April 26.

Note: Details of Treasury market financing operations are shown elsewhere in this issue of the "Treasury Bulletin," in the tables on "Offerings" and "Disposition," respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills."

Source: Fiscal year figures by functions and 1957 estimated total are from the 1957 Budget document, released January 16, 1956, including effects of proposed legislation; 1956 estimated total is from the revised estimates released May 17, 1956; totals of actual expenditures for years prior to 1953 are from the old daily Treasury statement; beginning with 1953, they are from the Treasury's "Monthly Statement of Receipts and Expenditures of the United States Government." Figures by months are based on the monthly statement. Transactions by public enterprise funds are included on a net expenditure basis throughout. Net investment in United States securities is included in expenditures by functions through 1949 and in the total through 1950.

1/ As announced February 17, 1954; see page 1, footnote 6.

2/ Detailed estimates were not made in the release of May 17, 1956, on the basis of classifications in this table.

3/ Total includes reserve for contingencies amounting to \$225 million in 1957.

4/ Beginning July 1955 figures by month include undistributed foreign transactions by Air Force and Army.

5/ Effective June 30, 1955, interest on the public debt is reported on an accrual basis.

6/ Differs from figure in Budget document because total includes net investment in United States securities by wholly owned Government enterprises (see source note).

3/ Estimate for 1956 were not made in the release of May 17, 1956, on the

basis of classifications in this table.

5/ Beginning July 1955 figures by months include undistributed foreign transactions by Air Force and Army.

Footnotes to Table 1 - (Continued)

Footnotes 1 through 6 follow Table 1.

1/ Through 1953, contributions to the Railroad Unemployment Insurance Administration Fund were carried in the daily Treasury statement as miscellaneous receipts, while the 1957 Budget document includes them in employment taxes through 1952. This difference in classification accounts for the difference in figures from the two sources. Beginning 1954 the contributions are credited direct to the trust account. For amounts of the contributions included in budget receipts, see "Treasury Bulletin" for February 1954, page 7.

8/ As announced February 17, 1954; see page 1, footnote 6.

2/ In the 1957 Budget, internal revenue taxes not otherwise classified are included in miscellaneous receipts.

10/ Estimates in full detail for 1956 were not made in the release of May 17, 1956.

11/ Individual income taxes withheld have been increased by \$249 million representing adjustments to correct estimates for the quarter ended June 30, 1955, and prior quarters by \$149 million and for the quarter ended September 30, 1955, by \$100 million. Individual income taxes not withheld have been reduced by \$4 million representing adjustment to correct estimates for 1953 and prior calendar years. The old-age insurance taxes and the transfers to the trust fund have been reduced by the net of these adjustments or \$246 million. The adjustments were made pursuant to Sec. 109 (e)(2) of the Social Security Act Amendments of 1950.

12/ Includes proceeds from sale of surplus property and from Government-owned securities; seigniorage; deposits resulting from renegotiation of war contracts (see "Treasury Bulletin" for February 1948, page 5); and railroad unemployment insurance contributions for administrative expenses through 1953, after which they are carried as trust account receipts under the Railroad Retirement Board.

13/ Amounts appropriated to the Federal Old-Age and Survivors Insurance

Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance (42 U.S.C. 401 (a)). The Social Security Act Amendments of 1950 (approved August 28, 1950 (64 Stat. 477), changed in certain respects the basis of transferring the appropriated funds to the trust fund. Beginning January 1951, the amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury pursuant to the provisions of Sec. 109(e)(2) of the Amendments of 1950, and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration. The amount of old-age insurance tax refunds is paid from the trust fund as a reimbursement to the general fund.

14/ Excludes the Government's contribution for creditable military service under the act of April 8, 1942 (56 Stat. 204). Beginning 1952, amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscal year (65 Stat. 222 and 66 Stat. 371), and transfers are made currently. Previously, annual appropriations were based, in effect, on estimated tax collections, with any necessary adjustments made in succeeding appropriations.

15/ Interest on refunds is included in expenditures in Table 2. Reimbursement by Federal Old-Age and Survivors Insurance Trust Fund for refunds of taxes for the fiscal year (see footnote 13) is netted against internal revenue refunds for the month in which the reimbursement is made.

16/ Transfers for the fiscal year 1955 were reduced in February by \$300 million as an adjustment for excess transfers to the trust fund of \$90 million in 1952 and \$210 million in 1953, pursuant to Sec. 109 (e)(2) of the Social Security Act Amendments of 1950.

1/ Prior to 1951 net investment in public debt securities by certain trust accounts and by deposit fund accounts is included in trust and deposit fund account expenditures and excluded from net investment by Government agencies (see Tables 3 and 4); for treatment of security transactions of Government-sponsored enterprises beginning 1955, see footnote 4.

2/ Exclude Foreign Economic Cooperation Trust Fund (see page 1).

3/ As announced February 17, 1954; see page 1, footnote 6.

4/ Under a revised classification in the monthly statement, effective July 1, 1955, the security transactions of Government-sponsored enterprises are included in deposit fund account expenditures (net) and excluded from net investment by Government agencies in public debt securities (see Table 4) and from net redemption or sale of obligations of Government agencies in the market (see Table 5). Figures previously published for the fiscal year 1955 have been revised to the new classification basis.

5/ Guaranteed securities included beginning 1955 (see Table 4).

1/ Consists of Civil Service and Foreign Service retirement funds.

2/ Includes Adjusted Service Certificate Fund, District of Columbia, Indian tribal funds, increment resulting from reduction in the weight of the gold dollar, and through 1950 seigniorage on silver under the Silver Purchase Act of 1934. with the fiscal year 1954, the Railroad Unemployment Insurance Administration Fund is classified as a trust account, instead of being handled through budget accounts as formerly (see "Budget Receipts and Expenditures," Table 1, footnote 12).

3/ Excludes Foreign Economic Cooperation Trust Fund (see page 1).

CASH INCOME AND OUTGO

The cash income and outgo data appearing in the "Treasury Bulletin" have been revised, beginning with the February 1956 issue, to a basis consistent with receipts from and payments to the public as derived in the 1957 Budget of the United States, Special Analysis A. Reconciliation to cash deposits and withdrawals in the account of the Treasurer of the United States is shown on the same basis as in the Budget document. There is also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget classifications are made available month by month. Figures for back years have been revised where necessary in order to make them as nearly comparable with the 1957 Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in earlier Budget documents as well as in the Bulletin.

The Budget series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's account. Receipts and payments include transactions both in budget accounts and in trust and deposit fund accounts. Operations of Government-sponsored enterprises are included in payments on a net basis as reflected in Treasury reports. Major intragovernmental transactions which are reported as both expenditures and receipts are eliminated from both. Noncash items which represent accrued obligations of the Government to make payments in the future are also eliminated from expenditures but are added later when actual payments are made. Receipts from the exercise of monetary authority (mostly seigniorage on silver) are excluded as not

representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Cash transactions through the Treasurer's account are similar in general concept to those included in the Budget series, but are limited in coverage to transactions which affect the balance in that account. On the other hand, they include receipts from the exercise of monetary authority, which are excluded from receipts from the public in the Budget series.

Beginning with figures for the fiscal year 1953, the series of transactions with the public is based on the "Monthly Statement of Receipts and Expenditures of the United States Government," which is compiled from reports by all collecting and disbursing officers and includes those transactions not cleared through the Treasurer's account. Cash deposits and withdrawals in the Treasurer's account, beginning with the figures for the same year, are reported in daily Treasury statements. For those years prior to 1953 both cash transactions series are based on a single source, namely, the earlier basis of daily Treasury statements which reported separate classifications for budget results, trust account transactions, etc.

 3/ Treated as noncash refund deductions from receipts when issued and as cash refund deductions when redeemed.
 4/ Consists of seigniorage on silver and increment resulting from reduction in the weight of the gold dollar; excluded from receipts from the public

- but included in cash deposits in the Treasurer's account.
 5/ Total includes \$8 million of armed forces leave bonds redeemed for insurance premiums; after August 31, 1947, these bonds were redeemable for cash (see Tables 6 and 7).
 6/ As announced February 17, 1954; see page 1, footnote 6.
 * Less than \$500,000.

Footnotes to Table 4

- 1/ For further detail, see "Budget Receipts and Expenditures," Table 2.
 2/ For further detail, see "Trust Account and Other Transactions," Tables 3, 4, and 5. Includes net change in balances in Government-sponsored enterprise deposit fund accounts with the Treasurer of the United States.
 3/ Net operating expenditures, or receipts (-), as measured by funds provided by or applied to net security transactions reflected in Treasury reports (see Table 7). To a large extent, these Government-sponsored enterprises secure funds for their operations by direct borrowing from the public or by cashing Federal securities which they hold, and they apply the net income received from operations to repayment of borrowing from the public or to investment in Federal securities. On that basis, net ex-

pendeditures for operations are shown in this table in terms of the combined net of disinvestment in Federal securities and sale of agency obligations in the market, and net receipts from operations are shown in terms of the combined net of investment in Federal securities and redemption of agency obligations in the market.

- 4/ Not reported prior to 1954.
 5/ Consists of only those market transactions not cleared through the Treasurer's account.
 6/ As announced February 17, 1954; see page 1, footnote 6.
 7/ See Table 7, footnote 2.

Footnotes to Table 5

- 1/ Federal intermediate credit bank franchise tax and, beginning 1953, also reimbursement by Panama Canal Company for expenses and services.
 2/ Includes reimbursement by Federal Old-Age and Survivors Insurance Trust Fund for administrative expenses and, beginning fiscal year 1953, also for refunds of taxes (treated as an offset to refunds rather than being credited to receipts); reimbursement by the District of Columbia; and through 1949, proceeds of ship sales which had been carried in trust accounts pending allocation to budget receipts from sale of surplus property.
 3/ Consists of payment of earnings and repayment of capital stock to the Treasury through 1952, and beginning 1955, payment of franchise tax by banks for cooperatives.
 4/ Includes relatively small amounts of deductions from salaries paid by trust funds and Government-sponsored enterprises.

- 5/ Consists of United States and Government corporation shares of contributions to employees' retirement funds, and payments to the Railroad Retirement Account (for creditable military service), the Unemployment Trust Fund, veterans' life insurance funds, trust fund for technical services and other assistance under the agricultural conservation program, and District of Columbia.
 6/ Includes District of Columbia share of contributions to the Civil Service retirement fund, payments by Railroad Retirement Board to Federal Old-Age and Survivors Insurance Trust Fund, transfers from Civil Service retirement fund to Foreign Service retirement fund, and transfers from Railroad Unemployment Insurance Administration Fund to Unemployment Trust Fund.
 7/ As announced February 17, 1954; see page 1, footnote 6.
 * Less than \$500,000.

Footnotes to Table 6

- 1/ Accrued discount on savings bonds and bills less interest paid on savings bonds and bills redeemed.
 2/ Public debt interest accrued and unpaid beginning June 30, 1955, effective date of the change in accounting and reporting from a due and payable basis to an accrual basis; for 1954, consists only of public debt interest checks and coupons outstanding; net increase, or decrease (-). Not reported as a separate clearing account prior to 1954; interest reported when paid by Treasurer prior to November 1949.
 3/ Treated as noncash expenditures at the time of issuance of the securities and as cash expenditures at the time of their redemption; net issuance, or redemption (-).
 4/ Issued in 1936 in exchange for adjusted service certificates held by veterans of World War I. The bonds matured in 1945.
 5/ Issued in 1947 in payment for accumulated leave. Figure for 1948 excludes \$8 million redeemed for insurance premiums prior to August 31, 1947, which was included in trust account receipts (see Table 3),

- footnote 5); after that date they were redeemable for cash. The last of these bonds matured in 1951.
 6/ Part of the United States subscription to the capital of the International Bank for Reconstruction and Development and to the International Monetary Fund was paid in the form of noninterest-bearing, nonnegotiable notes payable on demand (see 1947 Annual Report of the Secretary of the Treasury, pages 48, 350, and 385). The last of the notes issued to the Bank was redeemed in 1950.
 7/ By wholly owned Government enterprises; beginning 1951, such net investments are reported separately and are not included in expenditures (see "Trust Account and Other Transactions," Table 4).
 8/ Checks outstanding less deposits in transit, and telegraphic reports from Federal Reserve Banks; increase, or decrease (-). For public debt interest included prior to 1954, see footnote 2.

In Table 4 under "Trust Account and Other Transactions," these amounts are included in trust and deposit fund account investment.
 3/ Accrued discount on savings bonds and bills, which is included in the principal of the public debt, less interest paid on savings bonds and bills redeemed.

- 4/ Treated as noncash transactions at the time of issuance and as cash transactions at the time of redemption; net issuance, or redemption (-).
 5/ Excluded from borrowing because the transactions are treated as expenditures in Table 6.
 6/ Excluded from borrowing because the transactions are treated as deductions from receipts in Table 3.
 7/ Market transactions in public debt securities and agency obligations.
 * Less than \$500,000.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date. The aggregate charge for all interest-bearing issues constitute the total computed annual interest charge. The average annual interest rate is computed

by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal amount.

1/ Excludes guaranteed securities held by the Treasury.

2/ Total includes "Other bonds"; see Table 2.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ The annual interest charge and annual interest rate on United States savings bonds are computed on the basis of the rate to maturity applied against the amount outstanding.

except that this amount was increased by \$6 billion beginning on August 28, 1954, and ending on June 30, 1956, by acts approved August 28, 1954, and June 30, 1955. UNITED STATES SAVINGS BONDS

United States savings bonds were first offered in March 1935 and began to mature in March 1945. Series A-D were sold between March 1935 and the end of April 1941, and Series E, F, and G were first offered in May 1941. When Series E began to mature on May 1, 1951, owners of the matured bonds were offered three options: To redeem the bonds in cash in accordance with the original terms; to retain them with an extended maturity of 10 years at specified rates of interest accrual; or to exchange them for Series G bonds. A number of changes became effective May 1, 1952. The principal ones were: The rate of interest accrual on Series E was increased, especially for the near term, with corresponding changes in extended Series E; and Series F and G were replaced by two new issues, Series J and K, also at higher interest rates. A new current-income bond, Series H, similar in interest return to Series E, was offered beginning June 1. For

details of these changes see "Treasury Bulletin" for May 1952, page A-1. Series F and G began to mature on May 1, 1953. For the exchange offering made to holders of these bonds maturing through December 31, 1953, see the May 1953 issue, page A-1. The Treasury invited holders of Series F and G which began to mature in January 1954 to reinvest the proceeds in other series of savings bonds. In the tables which follow, Series A-F and J sales are included at issue price and total redemptions and amounts outstanding at current redemption values. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured F and G bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the "Treasury Bulletin."

2/ Includes exchanges of matured Series E bonds for Series G bonds beginning May 1951 and for Series K bonds beginning May 1952.

3/ Includes both matured and unmatured bonds; see Table 4.

4/ Includes total value of redemptions not yet classified between matured and unmatured bonds.

5/ A change in procedure, beginning in June 1954, for processing redeemed savings bonds has resulted in a high level of redemptions not yet classified between matured and unmatured bonds. This increases temporarily obscures the relationship between the redemption columns showing sales price and accrued discount in Tables 2 through 4 and also the relationship between the matured and unmatured sections of Table 4. (See also footnote 4.) The subsequent distribution of this

high level of unclassified redemptions may be large enough in any month to show redemptions of matured bonds for a series in Table 4 which are greater than the total redemptions of that series as shown in Table 3, and to show a negative in the unmatured section of Table 4.

6/ Reductions were made in issues and redemptions of Series E, F, G, J, and K in July 1954 to compensate for the erroneous inclusion of reissue transactions in June 1954 as reported in the daily Treasury statement. The amounts involved were as follows: \$18 million for issues of Series E and H and \$17 million for issues of Series F, G, J, and K; and \$35 million for unclassified retirements.

7/ Sales began June 1, 1952.

8/ Comparable data are not available prior to January 1950.

9/ Includes exchanges of Series 1941 F and G savings bonds for Treasury 3-1/4% bonds of 1978-83.

* Less than \$500,000.

Details concerning terms and conditions for purchase and redemption and information on investment yields of Savings Series C appear in the October 1953 issue of the "Treasury Bulletin," page A-1.

Similar information with respect to the offering of the earlier series was published currently in the "Treasury Bulletin," and appears also in the "Annual Report of the Secretary of the Treasury" for appropriate years.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows in the case of recurrence are the latest dates.

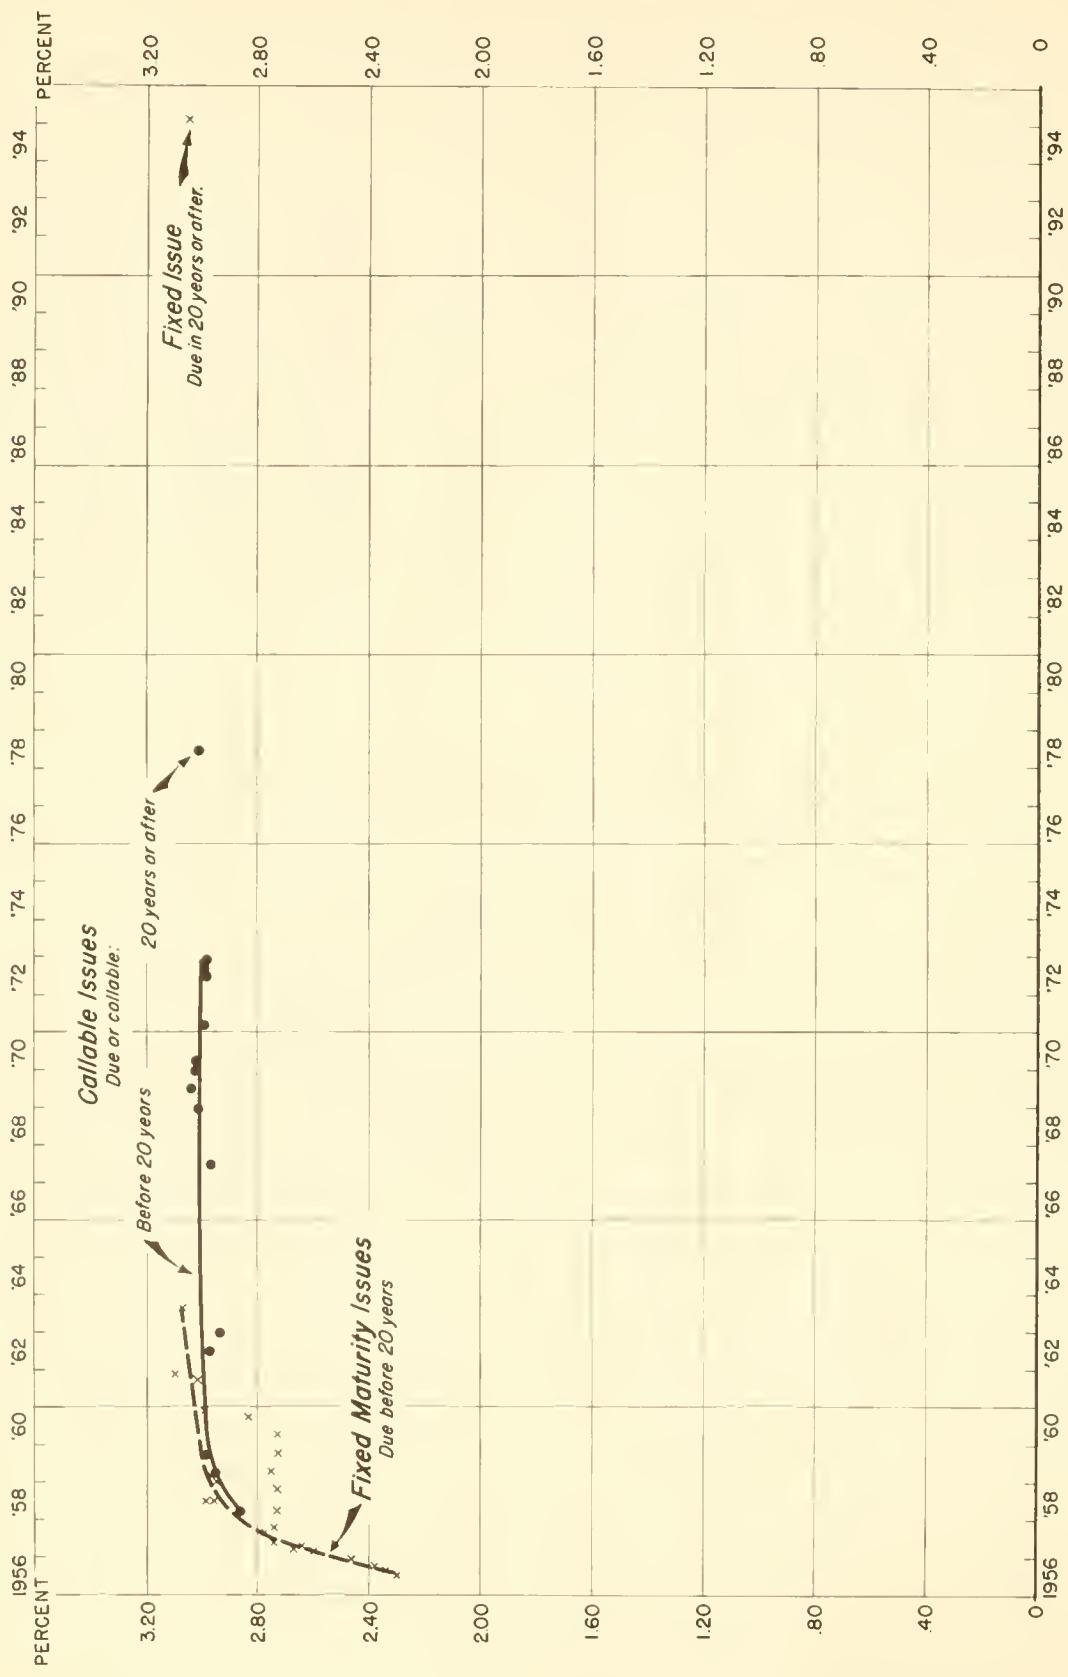

3/ Not quoted on March 29, 1956.

4/ Included in the average of taxable Treasury bonds due or callable from 10 to 20 years beginning April 1, 1953, as shown under "Average Yields of Long-Term Bonds."

5/ Included in the average of taxable Treasury bonds due or callable 20 years and after, as shown under "Average Yields of Long-Term Bonds."

6/ Yield to first call. Yields are computed to call date when the price is above par and to maturity when the price is at or below par.

Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. For definition of taxable bonds, see footnote to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin." Moody's Investor Service for average of Aaa corporate bonds.

1/ Prior to April 1953, the single series on long-term taxable Treasury bonds included the following: April 1952 through March 1953, bonds neither due nor callable for 12 years; October 1941 through March 1952, bonds neither due nor callable for 15 years. For a discussion of the composition of these Treasury bond averages, see the "Treasury Bulletin" for March 1944, page 58.

2/ The long-term taxable Treasury bond average was revised beginning April 1, 1952; see footnote 1. The old average for April 1952 was 2.62 percent.

3/ Beginning with the August 1955 issue of the "Treasury Bulletin" this average (bonds due or callable from 10-20 years) replaces the average of those due or callable from 12-20 years, previously shown in this column.

4/ Annual average is based on the single long-term series January through March (see footnote 1) and the 10-20 year series thereafter.

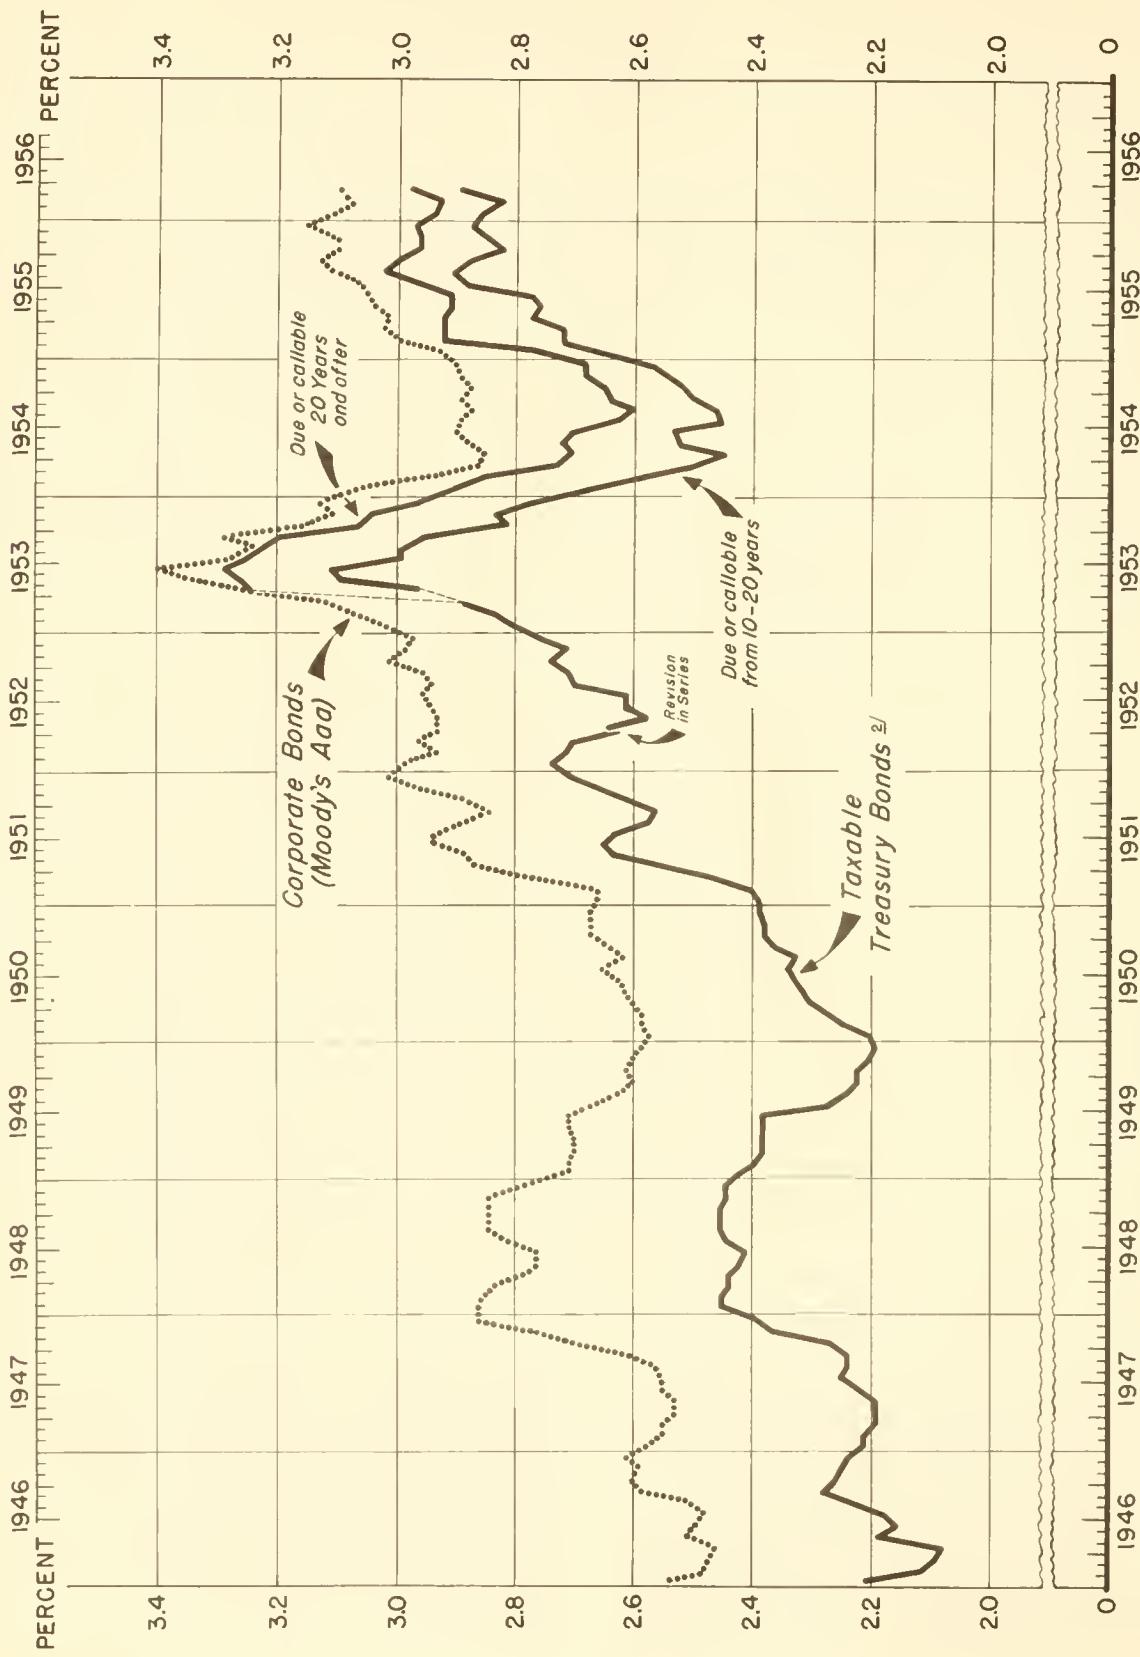

5/ Average covers 8-1/2 months beginning April 15, the inception date of this series.

6/ Includes the 3% bonds of February 15, 1955, first quoted on January 28, 1955.

Source: Internal Revenue Service reports for detail of collections by type of tax; daily Treasury statement for budget receipts from internal revenue through the fiscal year 1952, and the "Monthly Statement of Receipts and Expenditures of the United States Government" for receipts thereafter.

Certain detail by type of tax is available only on the basis of returns filed with the Internal Revenue Service. The figures shown include collections for credit to special accounts for certain island possessions, as reported by the Internal Revenue Service. Beginning with the fiscal year 1955, they include the amounts of tax collected in Puerto Rico upon articles of merchandise of Puerto Rican manufacture coming into the United States. Figures for 1954 have been revised to the same basis. Figures for previous years include only amounts collected at ports of entry into the United States.

1/ Differences between the amounts of internal revenue reported by the Internal Revenue Service as collections for given periods and the amounts reported in Treasury statements as budget receipts for the same periods arose because of differences in the time when payments are included in the respective reports. Tax payments are included in budget receipts when they are reported as credits to the account of the Treasurer of the United States. Prior to July 1954, they were included in Internal Revenue Service collection reports after the returns to which they applied had been received in internal revenue offices. Under procedure begun in 1950 with withheld income tax and old-age insurance taxes and later extended to railroad retirement taxes and many excises, these taxes are paid currently to Treasury depositaries and the depositary receipts, as evidence of such payment, are attached to quarterly returns to the Internal Revenue Service. Under this procedure, the payments are included in budget receipts in the month in which the depositary receipts are issued to the taxpayers. Revised accounting procedures effective

July 1, 1954, extended the same practice to Internal Revenue Service collection reports.

2/ Monthly figures include old-age insurance tax on self-employment income, which is levied and collected as part of the individual income tax beginning with the taxable year 1951. Fiscal year figures reflect this tax, on the basis of estimates beginning 1952 (see footnote 3), and it is included under "Old-age insurance taxes."

3/ Withheld income tax and old-age insurance taxes on employers and employees are paid into the Treasury in combined amounts beginning January 1951. In Internal Revenue Service reports, current collections have not been separated as to type of tax but the breakdown shown for fiscal years beginning 1951 is based on estimates made in accordance with provisions of Sec. 109 (e) (2) of the Social Security Act Amendments of 1950, for transfer of tax receipts to the Federal Old-Age and Survivors Insurance Trust Fund.

4/ New reporting basis beginning with the fiscal year 1953; for explanation, see footnote on page 1.

5/ Beginning with the fiscal year 1955, collections shown include undistributed depositary receipts (see Table 2). For excise taxes these receipts are included in the total only.

6/ Repealed for years ending after June 30, 1945. Beginning 1951, included under "Miscellaneous excise taxes."

7/ Detail is reported by quarters beginning with the fiscal year 1956. Revised.

1/ Includes old-age insurance tax on self-employment income, imposed by the Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950. The tax is levied and collected as part of the individual income tax. For estimated fiscal year breakdown, see Table 1.

2/ Withheld income tax and social security employment taxes on employees and employees are paid into the Treasury in combined amounts, pursuant to the Social Security Act Amendments of 1950. For estimated fiscal year breakdown, see Table 1.

3/ Under revised accounting procedures effective July 1, 1954, tax payments made to banks under the depositary receipts system are included in

Internal Revenue Service reports of collections in the month in which the depositary receipts are issued instead of the month in which tax returns supported by the depositary receipts are received in internal revenue offices, as was the previous practice. The "Undistributed depositary receipts" included in the collections represent the amount of depositary receipts issued during the period less the amount received with the returns. In the case of excise taxes, it is not possible to classify the depositary receipts by type of tax until the returns are received. Accordingly, the amount of such undistributed depositary receipts is included only in the total of excise taxes. Unclassified advance payments were included with undistributed depositary receipts prior to June and the fiscal year 1955.

4/ Includes \$16,116,000 advance payments of estate and gift taxes not further classified.

5/ Included with undistributed depositary receipts prior to June 1955.

6/ See Table 1, footnote 1.

CAPITAL MOVEMENTS

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information covering the principal types of data and the principal countries is reported monthly, and is published regularly in the "Treasury Bulletin." Supplementary information is published at less frequent intervals. Reports by banks, bankers, securities brokers and dealers, and industrial and commercial concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. Beginning April 1954, data reported by banks in the Territories and possessions of the United States are included in the published data.

The term "foreigner" as used in these reports covers all institutions and individuals domiciled outside the United States and its Territories and possessions, the official institutions of foreign countries, wherever such institutions may be located, and international organizations. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, statistical presentation, and definitions appeared in the June 1954 issue of the "Treasury Bulletin,"

pages 45-47. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

The first three sections which follow are published monthly. They provide summaries, by periods and by countries, of data on short-term banking liabilities to and claims on foreigners and transactions in long-term securities by foreigners, and present detailed breakdowns of the latest available preliminary data.

Section IV provides supplementary data in five tables which appear at less frequent intervals. Table 1, short-term foreign liabilities and claims reported by non-financial concerns, is published quarterly in the January, April, July, and October issues of the Bulletin. Table 2, long-term foreign liabilities and claims reported by banks and bankers, and Table 3, estimated gold reserves and dollar holdings of foreign countries and international institutions, are published quarterly in the March, June, September, and December issues. Table 4, foreign credit and debit balances in brokerage accounts, appears semi-annually in the March and September issues. Table 5, short-term liabilities to foreigners in countries and areas not regularly reported separately by banking institutions, is presented annually in the April issue.
