## Treasury Financing Operations

### April Certificate Maturity

A one-year issue of 7/8 percent certificates of indebtedness outstanding in the amount of \$1,321 million matured on April 1, 1948. On March 22, 1948, the subscription books were opened for a new one-year 1-1/8 percent certificate in exchange, par for par, for the maturing certificates. Cash subscriptions were not received. The new certificates are dated April 1, 1948, and bear interest from that date at the rate of 1-1/8 percent per annum, payable with the principal at maturity on April 1, 1949. The certificates were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Reports to the Treasury on the ownership of Government securities indicate that on February 29, 1948, about 43 percent of the \$1,321 million of maturing certificates were owned by Federal Reserve Banks and reporting commercial banks. The ownership figures for February 29 are the latest which are available for holdings of commercial banks.

Subscription books were closed at the close of business on March 24. Holdings of the maturing certificates of indebtedness by the Federal Reserve Banks, which totaled \$106 million on March 31, were redeemed in full for cash. Exchange subscriptions for the new issue amounted to \$1,054 million, leaving \$160 million to be paid to holders other than Federal Reserve Banks.

### Treasury Bill Retirement in March

A substantial retirement of outstanding Treasury bills was made in March. The four issues maturing during the month totaled \$4.8 billion and the amount refunded totaled \$4.3 billion. Each weekly issue exchanged for the bills dated March 4, March 11, and March 25 was \$100 million less than the amount maturing. The new issue dated March 18 was \$200 million less than that maturing. The first three issues of the month were \$1.1 billion each and the fourth, \$1.0 billion. The average rate of discount for each of the offerings of March 4 and March 11 was 0.997 percent and for each of the offerings of March 18 and March 25 was 0.996 percent.

1/ Accrued discount on savings bonds and bills less interest paid on savings bonds and bills redeemed.

2/ Interest payments to wholly owned Government corporations are not deducted because they are treated as negative expenditures when received by corporations; hence payment and receipt offset each other in the expenditure series.

3/ Budget expenditures involving the issuance of Federal securities

are treated as noncash at the time of original payment and as cash expenditures at the time of redemption. The figures shown are net issuances, or net redemptions (-).

Accordingly, the figures in this column for those years will not agree with transfers to trust accounts shown in Table 3.

1/ The securities shown in this table were issued to the Treasury to finance Government corporations and certain other business-type activities of the Government, with the Treasury itself raising the necessary funds through public debt operations.

To avoid duplication, these securities are not included in the guaranteed debt outstanding as shown in preceding tables.

2/ Total includes notes issued by the Virgin Islands Company in the amount of \$250,000.

## STATUTORY DEBT LIMITATION

Section 21 of the Second Liberty Bond Act, as amended, provides that the face amount of obligations issued under authority of that Act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury), shall not ex-

ceed in the aggregate \$275 billion outstanding at any one time. Obligations issued on a discount basis, and subject to redemption prior to maturity at the option of the owner, are included in the statutory debt limitation at current redemption values.

1/ Original call and maturity dates are used.

2/ Prior to the refunding operation of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege of exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a

stated portion for cash retirement with the remainder covered by an offering of an exchange security.

3/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called securities would be presented for cash redemption.

r Revised.

## UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31, and October 1935, pages A-4 and A-5. Sales and redemptions data by States are published at the end of each calendar and each fiscal year after June 30, 1947. Sales by denominations are also published semi-annually after December 31, 1947.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of Series G outstanding are quoted at par. Matured bonds which have been redeemed are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such

sales are included in this table according to series. Prior to June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and small amounts also of unclassified F and G redemptions, beginning with June 1947.

3/ Not calculated for matured series.

## TREASURY SAVINGS NOTES

Treasury savings notes have been issued in three series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; and Series C on continuous sale since September 14, 1942. For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series C notes, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For similar information regarding Series A and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220. For sales and redemptions of Series A and B notes by fiscal years

and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

1/ United States savings bonds, Series A-D, E, and F, are included at current redemption values.

2/ Includes all securities issued or guaranteed by the U. S. Government, but excludes guaranteed securities held by the Treasury. In the April 1948 issue of the "Treasury Bulletin" figures in this table were revised to include matured debt and debt bearing no interest, as well as interest-bearing debt. For all practical purposes the addition of these items to the former series affects only the holdings by "Individuals" and by "Other corporations and associations", since other investors hold negligible amounts.

3/ Consists of commercial banks, trust companies, and stock savings banks in the United States and in Territories and insular possessions. Figures exclude securities held in trust departments.

4/ Includes partnerships and personal trust accounts.

5/ Includes savings and loan associations, dealers and brokers, and investments of foreign balances and international accounts in this country. Beginning with December 1946, figures include investments by the International Bank for Reconstruction and Development and International Monetary Fund in special interest-bearing notes issued by the U. S. Government.

6/ Holdings by Federal land banks are included under "Private Investors" instead of "U. S. Government agencies and trust funds" beginning with June 30, 1947, since the proprietary interest of the United States in these banks ended June 26, 1947.

7/ Comprises trust, sinking, and investment funds of State and local governments and their agencies, and Territories and insular possessions.

## TREASURY SURVEY OF OWNERSHIP, FEBRUARY 29, 1948

The Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey account for approximately 95 percent of such securities held by all banks and insurance companies in the United States. Data were first published for March 31, 1941.

Information on the distribution of ownership by types of banks and insurance companies is published each month. Additional information showing the holdings of commercial banks distributed according to Federal Reserve member-bank classes and nonmember banks has been published at less frequent intervals. Currently, this information is published for June 30 and December 31.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock

Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin". The partially tax-exempt series was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

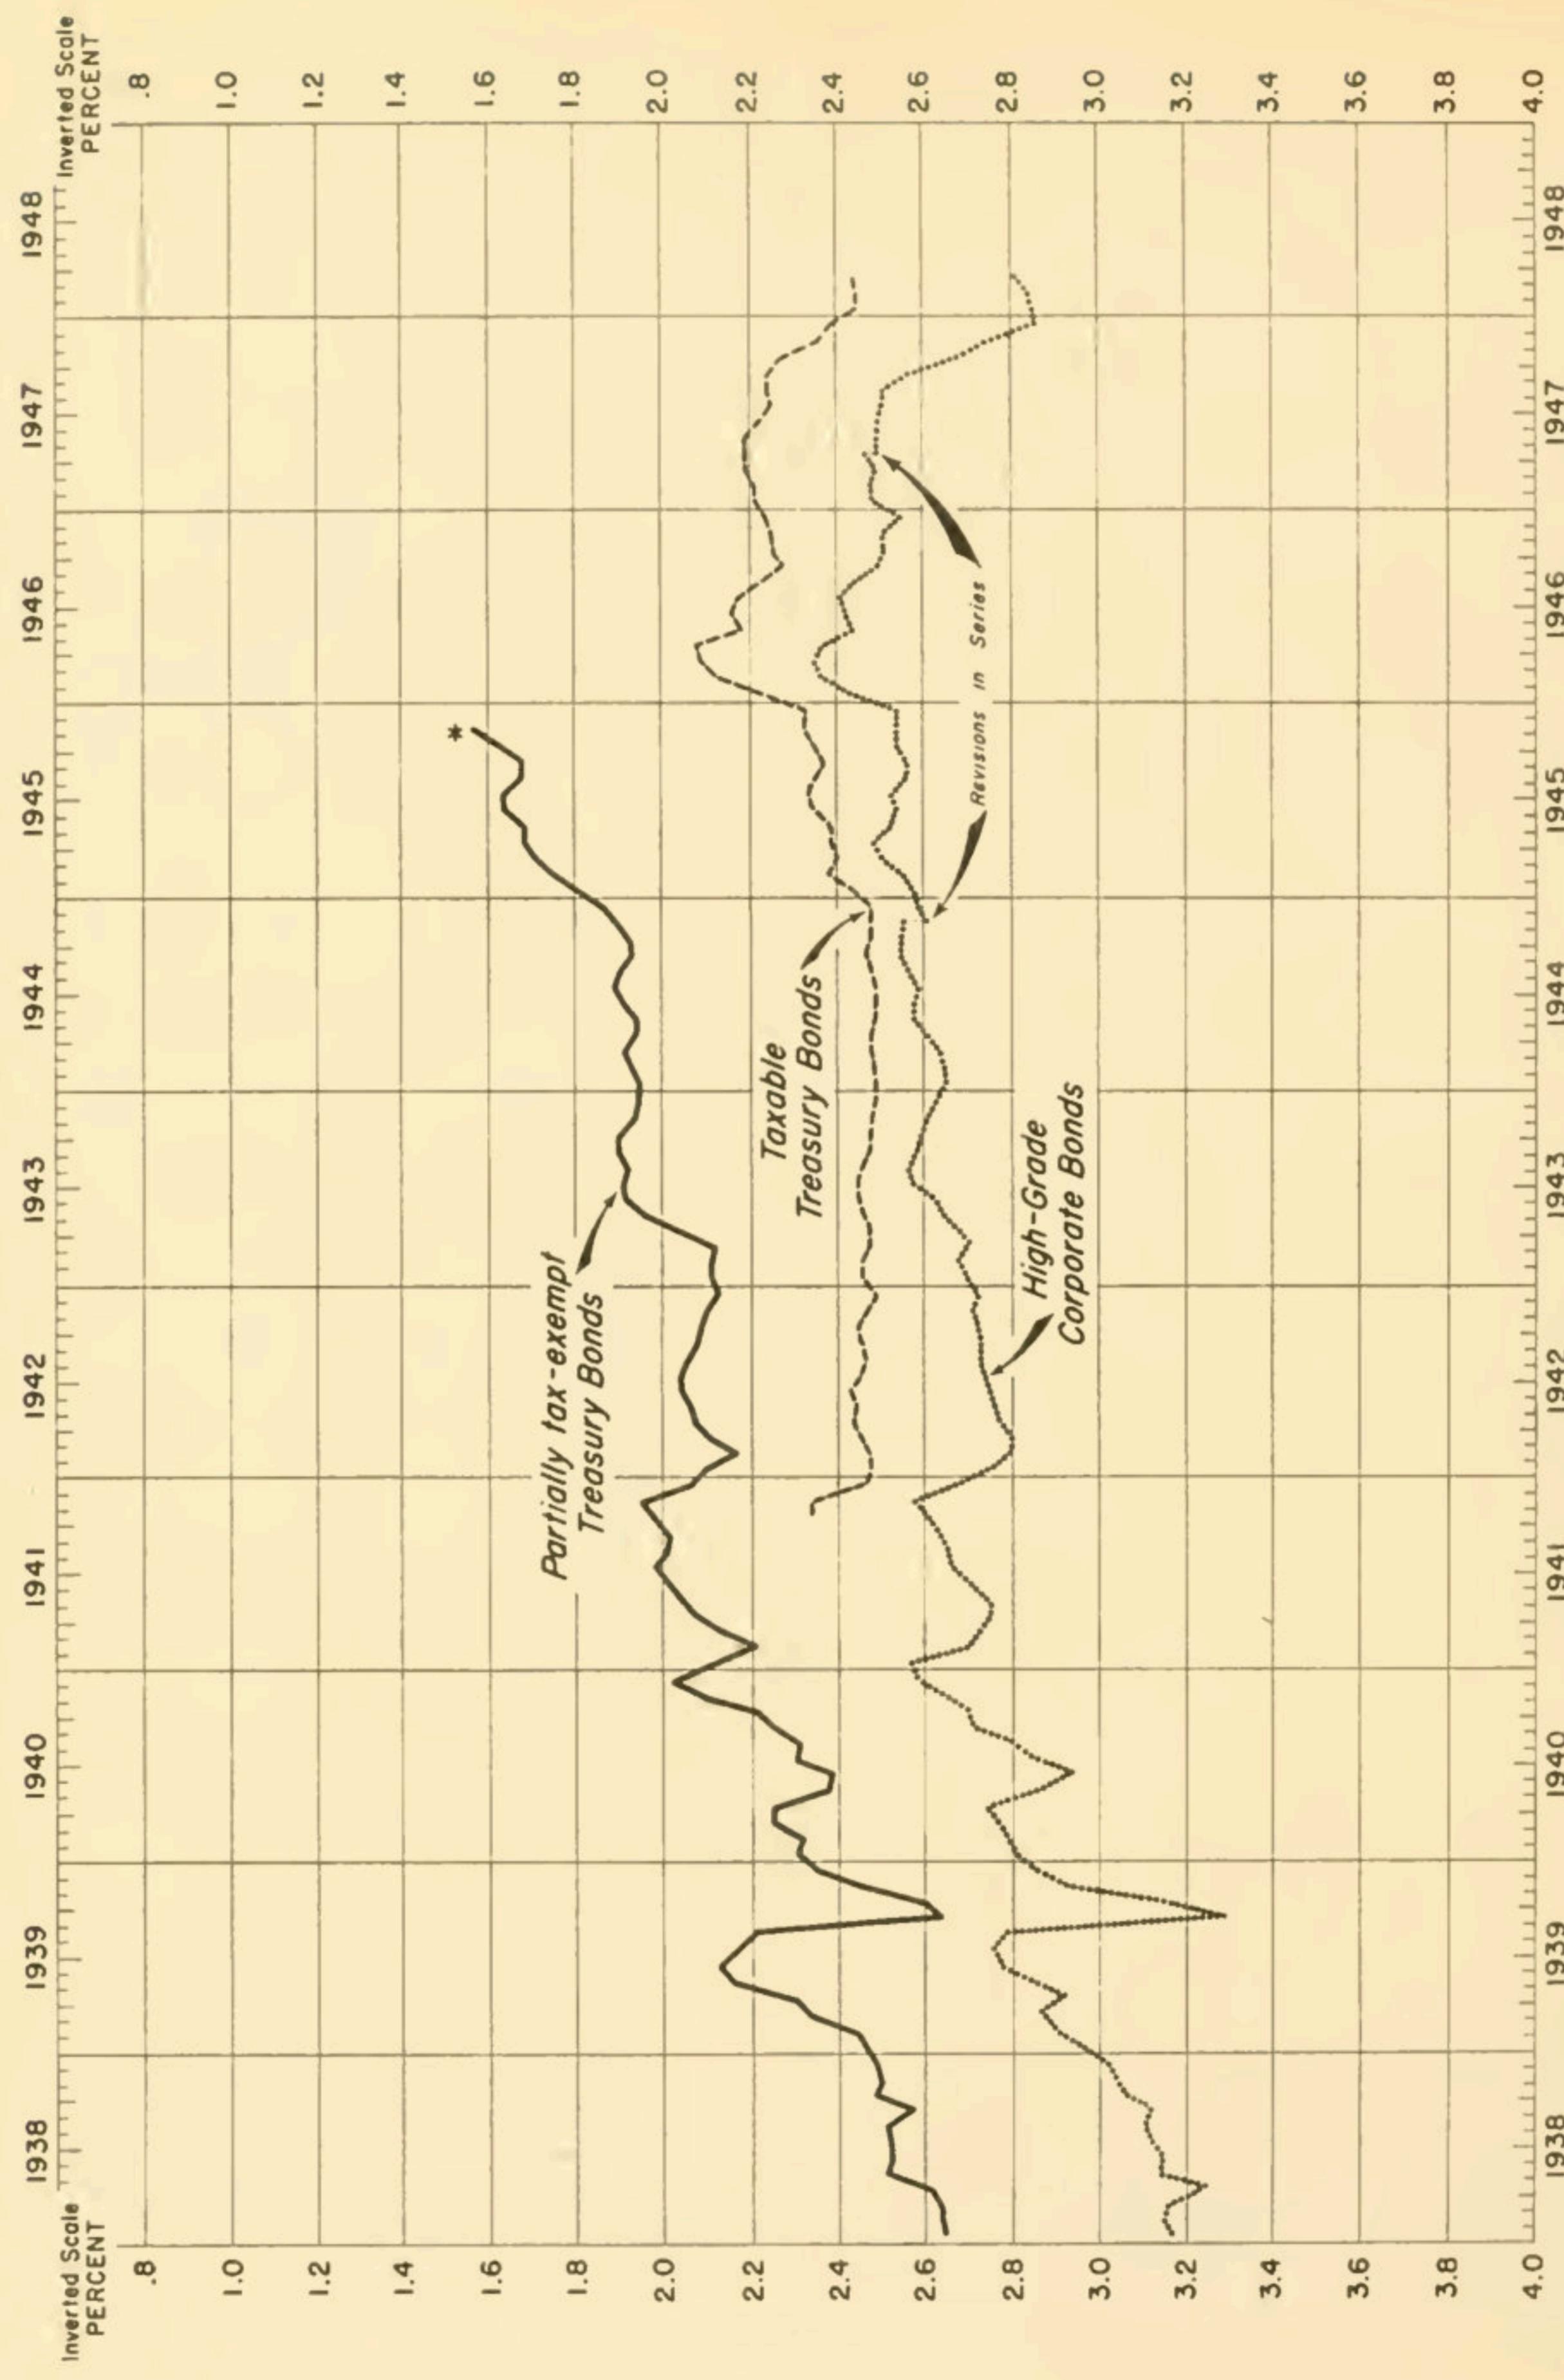

2/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

3/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

4/ Market closed.

## CAPITAL MOVEMENTS

Information relating to capital movements between the United States and foreign countries is presented in four sections. Section I contains the principal types of data on capital movements by years from 1935, and currently by months. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for recent months. The total net capital movement is given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Section III presents details with respect to capital movements and short-term claims and liabilities as

of the latest month for which the data are available.

Section IV contains data for recent months on outstanding contracts of banks for forward purchases and sales of foreign exchange.

The data in these four sections are based on reports filed each month by banks, bankers, and brokers throughout the United States. The reports are collected, checked, and tabulated by the twelve Federal Reserve Banks. The totals are then forwarded to the Treasury Department for consolidation and publication.

Publication of detailed figures on capital movements was discontinued between the March 1942 and the November 1945 issues of the "Treasury Bulletin", but data omitted during that period were supplied in the November 1945 issue and supplement.
