Treasury Financing Operations

November Refunding

On October 22 the Treasury announced an exchange offering of 7-1/4% Treasury Notes of Series D-1974, dated November 15, 1970, due May 15, 1974, at par, and an additional amount of 7-1/2% Treasury Notes of Series C-1976, dated October 1, 1969, due August 15, 1976, at 100.50 (to yield about 7.39%) and accrued interest from August 15 to November 15, 1970 (\$18.75 per \$1,000) to holders of the \$7.7 billion of 5% Treasury Notes of Series A-1970 maturing November 15, 1970. Subscribers for the 7-1/2% notes were to make a cash payment for the difference between the price of the notes and the par value of the maturing notes. The public held \$6.0 billion of the maturing notes.

Subscriptions accepted totaled about \$4,509 million for the 7-1/4% notes and \$2,512 million for the 7-1/2% notes, leaving about \$654 million of the maturing notes for cash redemption.

The subscription books were open until 8 p.m. local time, Thursday, October 29. To be timely subscriptions had to be received by a Federal Reserve Bank or Branch or the Office of the Treasurer of the United States by such time, except that subscriptions addressed to one of those agencies and post-marked before midnight Wednesday, October 28, were deemed to be timely. Cash subscriptions were not accepted. The payment and delivery date for the notes was Monday, November 16.

Coupons dated November 15, 1970, on notes tendered in exchange were to be detached and cashed when due. The November 15, 1970, interest due on registered notes was paid by issue of interest checks in regular course to holders of record on October 15, 1970, the date the transfer books closed.

Interest on the 7-1/4% notes is payable semiannually on May 15 and November 15. Interest on the 7-1/2% notes is payable semiannually on February 15 and August 15. The notes are available in registered and bearer form in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000. They are not callable.

Cash Offering

On October 30 the Treasury announced that it would sell at auction, under competitive and noncompetitive bidding, \$2.0 Billion of 6-3/4% Treasury Notes of Series D-1972, dated November 16, 1970, due May 15, 1972. Tenders were received

until 1:30 p.m., EST, November 5, at Federal Reserve Banks and Branches and at the Office of the Treasurer of the United States in Washington, D. C.

Tenders received totaled about \$5,254 million, of which about \$2,038 million was accepted at prices ranging from 100.93, yield 6.09%, down to 100.69, yield 6.26%. Noncompetitive tenders for \$200,000 or less were accepted in full at the average price of accepted tenders, 100.76, yield 6.21%. These totaled about \$537 million.

Interest is payable on the new notes on a semiannual basis on May 15 and November 15, 1971, and on May 15, 1972. Bearer notes, with interest coupons attached, and notes registered as to principal and interest were authorized to be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000. They are not callable.

Payment was required to be made or completed on or before November 16, 1970, in cash, 5% Treasury Notes of Series A-1970, maturing November 15, 1970, or other funds immediately available to the Treasury by the payment date.

Commercial banks could submit tenders for account of their customers provided the names of the customers were set forth in such tenders. Others than commercial banks were not permitted to enter tenders except for their own account.

Tenders were received without deposit from commercial banks for their own account, Federally-insured savings and loan associations, States, political subdivisions or instrumentalities thereof, public pension and retirement and other public funds, international organizations in which the United States holds membership, foreign central banks and foreign States, dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions with respect to Government securities and borrowings thereon, and Government accounts. Tenders from others were required to be accompanied by payment of 5 percent of the face amount of notes applied for.

All bidders were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of the notes bid for at a specific rate or price, until after 1:30 p.m., EST, November 5, 1970.

Commercial banks were prohibited from making unsecured

Treasury Financing Operations - (Continued)

loans, or loans collateralized in whole or in part by the notes bid for, to cover the deposits required to be paid when tenders were entered, and they were required to make a certification to that effect. Other lenders were requested to refrain from making such loans.

Tax Anticipation Bills

On October 8 tenders were invited for \$2,500 million, or thereabouts, of 244-day tax anticipation bills to be dated October 21, 1970, and to mature June 22, 1971. They will be acceptable at face value in payment of income taxes due June 15, 1971.

Tenders were opened on October 15 and totaled \$5,593 million, of which \$2,515 million was accepted. The average bank discount rate was 5.970 percent. The limit for noncompetitive tenders from any one bidder was \$400,000 and they totaled \$386 million.

All bidders were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of any bills of the issue at a specific rate or price, until after one-thirty p.m., Eastern daylight saving time, October 15, 1970.

Any qualified depositary was permitted to make settlement by credit in its Treasury tax and loan account for the amount of bills allotted to it for itself and its customers.

9-Month and One-year Bills

On October 20 tenders were invited for \$500 million, or thereabouts, of 271-day Treasury bills, representing an additional amount of bills dated July 31, 1970, maturing July 31, 1971, and for \$1.2 billion, or thereabouts, of 365-day Treasury bills to be dated October 31, 1970, to mature October 31, 1971, both series to be issued November 2. These issues were to refund \$1,504 million of bills maturing October 31. Tenders were opened on October 27.

Tenders received for the 271-day bills totaled \$1,222 million, of which \$501 million was accepted, including \$20 million of noncompetitive tenders. The average bank discount rate was 6.153 percent.

Tenders received for the 365-day bills totaled \$2,006 million, of which \$1,201 million was accepted, including \$65 million of noncompetitive tenders. The average bank discount rate was 6.072 percent.

13-week and 26-week Bills

Issues of regular weekly Treasury bills in October total \$16.0 billion, replacing \$15.5 billion of maturing bills. There were five 91-day issues of \$1.8 billion and five 182-day issues of \$1.4 billion. Average rates for the new issues are shown in the following table.

Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of \$10,000, \$15,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value). 2/ Tenders are received at Federal Reserve banks and branches. Each tender must be for a minimum of \$10,000. Tenders over \$10,000 must be in multiples of \$5,000.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for \$200,000 or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.

Treasury Financing Operations - (Continued)

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, 9-month, and one-year bills may not be made by credit in Treasury tax and loan accounts.

Foreign Series and Foreign Currency Series

Foreign series securities issued in October totaled \$941 million, consisting of twelve certificates of indebtedness and one note. Redemptions for the month totaled \$1,157 mil-

lion. At the end of October foreign series securities outstanding totaled \$3,755 million. (Details are shown on page 60.)

Foreign currency series securities issued in October consisted of two notes denominated in Swiss francs equivalent to \$155 million. Redemptions for the month totaled an equivalent of \$156 million. At the end of October foreign currency series securities outstanding totaled an equivalent of \$1,366 million and were denominated in German marks and Swiss francs. (Details are shown on page 62.)

Note: Details of Treasury market financing operations are shown elsewhere in tables on public debt operations.

1/ Bank discount basis.

2/ The \$15,000 denomination is not available for bills with issue dates prior to March 1970 (except for issue of December 31, 1969), but denominations of \$1,000 and \$5,000 are available for such bills.

Note: Net expenditures represent disbursements less proprietary receipts from the public and certain intrabudgetary transactions applicable to the expenditure account. Net lending represents loan disbursements less loan repayments. If only one column is shown for an agency the amounts represent net expenditures, unless otherwise noted. Agency shifts are shown in this table beginning with the period of such shifts, figures prior to the shifts have not been adjusted.

1/ Includes net lending.

2/ See footnote 5.

3/ Figures prior to fiscal 1967 represent expenditures for the Federal

Aviation Agency.

4/ Reported on an accrual basis.

5/ Beginning fiscal 1963 expenditures of Federal Old-Age and Survivors Insurance Trust Fund and Federal Disability Insurance Trust Fund are included under Health, Education, and Welfare Department and expenditures for the Unemployment Trust Fund under Labor Department.

6/ For content see Table FFO-4.

7/ Includes \$275 million estimate for distribution of Federal tax revenues to state and local governments, \$1,400 million for civilian and military pay raises and \$900 million for contingencies.

FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set

of categories which are based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies and firms often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In Table FO-1, obligations that are incurred within the Government are distinguished from those incurred outside the Government. Tables FO-2, 3, and 4 show only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury Bulletin and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 Bulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

This issue contains both the August
and September 1970 Obligation Data.

1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget

presentation and therefore may differ somewhat from the Budget document.)

1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget

presentation and therefore may differ somewhat from the Budget document.)

Gross obligations incurred (as above).....	\$64,370
Deduct:	
Advances, reimbursements, other income, etc.....	14,151
Offsetting receipts.....	2,356
Net obligations incurred.....

ACCOUNT OF THE TREASURER OF THE UNITED STATES**Source and Availability of the Balance in the Treasurer's Account**

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in the same bank. On occasions, to the extent authorized by the

Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, there-

fore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets.

2/ Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

1/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.

2/ United States savings notes first offered for sale as of May 1, 1967 and were discontinued after June 30, 1970.

3/ Retirement plan bonds first offered for sale as of January 1, 1963; tax and loss bonds first issued in March 1968.

4/ Taxes eligible for credit consist of those deposited by taxpayers in

the depository banks, as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; and all corporation income taxes due on or after March 15, 1968.

5/ Under a special procedure begun in March 1951, authorization was given during certain periods for income tax payments, or a portion of them made by checks of \$10,000 or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure was discontinued in April 1967.

Footnotes to Table FD-2

Source: On the basis of the daily Treasury statement.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average

annual interest rate is computed by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

2/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

1/ Original call and maturity dates are used.

2/ All by investors other than Federal Reserve banks.

3/ Rolled over into 9-month and one-year bills (see Table PDO-4).

4/ Holders of the maturing securities were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the new securities offered.

5/ Excess of maturing securities over allotments of new securities paid for with the maturing securities.

6/ Tax anticipation issue: for detail of offerings beginning July 1968, see Table PDO-4; for amounts redeemed for taxes and for cash see "Note" below.

- 7/ Of this amount \$909 million of the 5-5/8% notes and \$6,156 million of the 6-3/8% notes were submitted in payment for subscriptions allotted for the 7-3/4% Treasury Notes of Series G-1971 which were offered on a cash basis. Holders of the maturing notes were not offered preemptive rights to exchange their holdings for the new notes. (For detail of offering see Table PDO-4).
 8/ Of this amount \$10 million of the 6-3/8% notes and \$180 million of the 4% bonds were exchanged by Federal Reserve banks and Government accounts for 7 1/2% notes of Series C-1972. Other holders of the maturing securities were not given preemptive rights to exchange their holdings for the 7 1/2% notes.

Source: Daily Treasury statement; Office of Debt Analysis in the Office of the Secretary.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table SB-3.

2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.

3/ Because there is a normal lag in classifying redemptions, the distribution of redemption between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the

method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.

4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.

5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.

6/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.

7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.

8/ Includes exchanges of Series 1950 F and G bonds for 3-7/8% marketable bonds of 1968.

9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.

10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

* Less than \$500,000.

TREASURY SURVEY OF OWNERSHIP, SEPTEMBER 30, 1970

The monthly Treasury Survey of Ownership covers securities issued by the United States Government, Federal agencies, Federally-sponsored agencies, and the District of Columbia. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May

1941 Treasury Bulletin, for corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

- 1/ Securities issued by the Treasury and Government agencies that are classified as debt under the new unified budget concept. For debt subject to limitation, see Table FD-9.
- 2/ Excludes trust departments.
- 3/ Included with all other investors are those banks, insurance companies, savings and loan associations, corporations, and State and local government funds not reporting in the Treasury Survey. Also included are certain Government deposit accounts and Government-sponsored agencies.
- 4/ Consists of corporate pension trust funds and profit sharing plans which involve retirement benefits. The data are compiled from quarterly reports by bank trustees who report total number of funds administered and Public Debt and Agency Securities held. It is estimated that these funds account for approximately 90 percent of Federal Securities held by all corporate pension trust funds. Since the data are not available each month, the regular monthly Survey includes holdings by these funds under "Held by all other private investors."

The quarterly data are presented as supplemental information in a memorandum column accompanying the Survey for each reporting date, beginning with December 31, 1953.

- 5/ United States savings bonds, Series E, are reported to the Treasury Survey at maturity value but have been adjusted to current redemption value for use in this table.
- 6/ Includes \$12 million depository bonds held by commercial banks not included in the Treasury Survey.
- 7/ Includes Export-Import Bank and Government National Mortgage Association participation certificates.
- 8/ Includes matured securities outstanding on which interest has ceased.
- 9/ Includes securities issued for use as collateral for short-term borrowings.
- * Less than \$500,000.
- r Revised.

Current market quotations shown here are over-the-counter closing bid quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York.

The securities listed include all regularly quoted public marketable securities issued by the United States Treasury. Securities issued by Federal agencies and guaranteed by the United States Government are excluded.

1/ Beginning April 1953, prices are closing bid quotations in the over the counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrences are the latest dates.

2/ On callable issues market convention treats the yields to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.

3/ Included in the average yield of long term taxable Treasury Bonds as shown under "Average Yields of Long Term Bonds."

1/ Treasury bond yields are based on a composite of closing bid quotations in the over-the-counter market. Series includes bonds on which the interest income is subject to normal tax and surtax which are neither due nor callable before 10 years. For bonds currently in series, see Table MQ-3.

2/ Treasury series based on reoffering yields of new corporate bonds rated Aa by Moody's Investors Service. The series is calculated to reflect bonds with no call protection. Currently 5 years of call

protection is valued at 25 basis points.

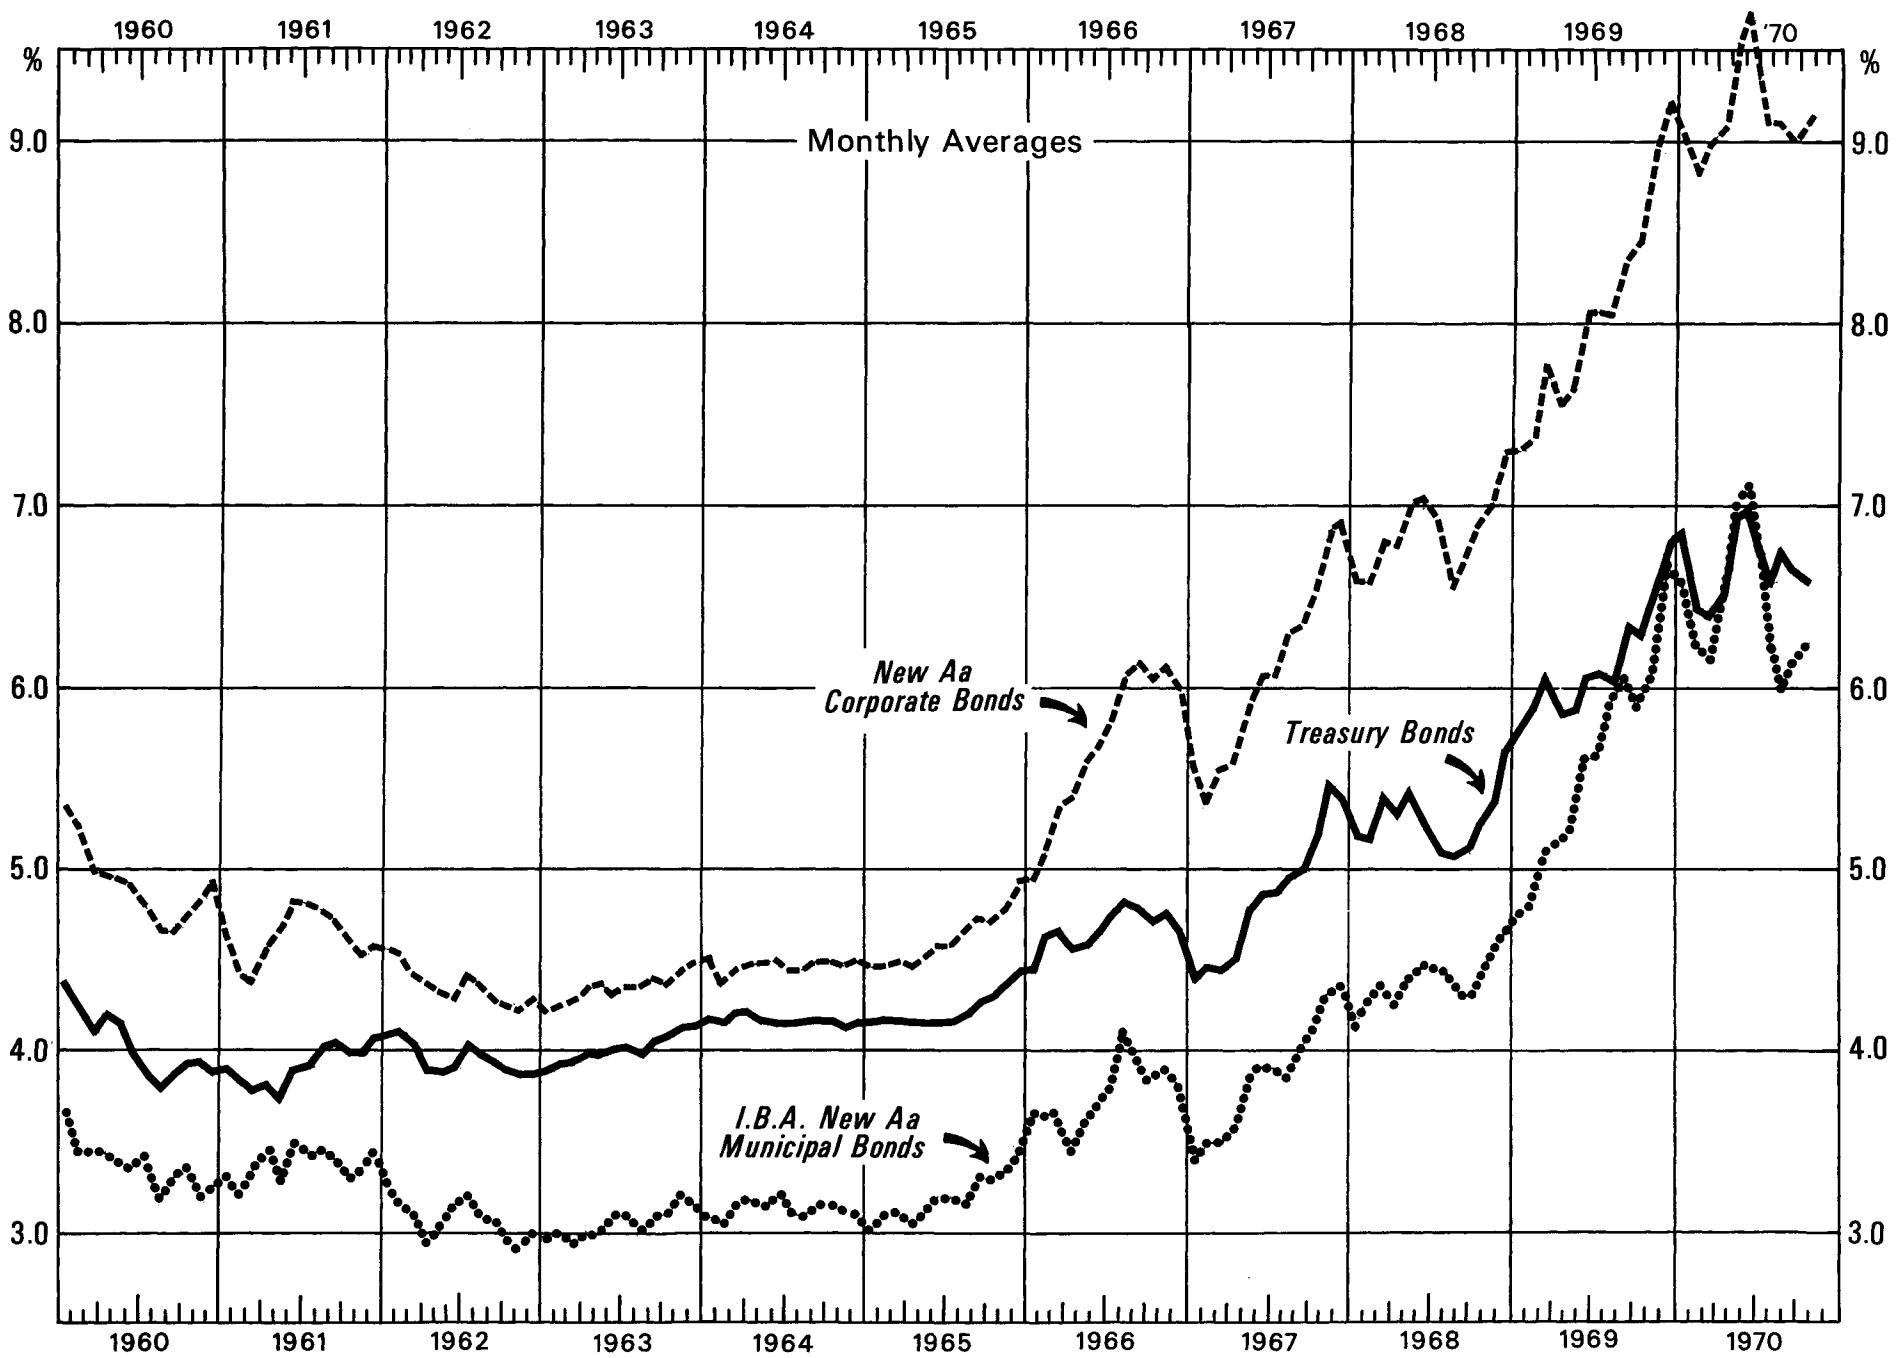

3/ Index of new issue reoffering yields on Aa 20 year general obligations compiled by Investment Bankers Association of America. Weekly series are not available prior to January 1970.

4/ One or more new long-term bonds added to the average.

5/ An existing bond dropped from the average.

n.a. Not available.

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on United States reserve assets and liabilities and other statistics related to the United States balance of payments and international financial position. A number of changes were introduced in the May 1967 Bulletin to increase the usefulness of this section.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together the various statistical components of the liabilities which enter into the United States balance of payments calculated on the liquidity basis. The inclusion of the United States reserve position in the International Monetary Fund in Table IFS-1 requires that the

"holdings of dollars" of the Fund be excluded from the data on liabilities to foreigners, in order to avoid double counting.

Table IFS-3 presents an area breakdown of United States liquid liabilities to official institutions of foreign countries.

Table IFS-4 shows United States Treasury nonmarketable bonds and notes issued to official institutions of foreign countries.

Table IFS-5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table IFS-6 presents United States net monetary gold transactions with foreign countries and international and regional organizations.

1/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, and gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases. For corresponding liabilities see Table IFS-2.

2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. See "Account of the Treasurer of the United States," Table TUS-4.

3/ Includes initial allocation on January 1, 1970, of \$867 million of special drawing rights (SDR) in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR since that time.

4/ Includes holdings of Treasury and Federal Reserve System.

5/ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts equal to the United States quota. See Table IFS-5.

6/ Reserve position includes, and gold stock excludes, \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

7/ Includes gain of \$67 million resulting from revaluation of the German mark in October 1969, of which \$13 million represents gain on German mark holdings at time of revaluation. See also footnotes 3 and 4, Table IFS-4.

Note: Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States. Data correspond to statistics following in this section and in the "Capital Movements" section, except for minor rounding differences. Table excludes International Monetary Fund "holdings of dollars," and holdings of U.S. Treasury letters of credit and nonnegotiable, non-interest-bearing special U.S. notes held by other international and regional organizations. The liabilities figures are used by the Department of Commerce in the statistics measuring the balance of international payments of the United States on the liquidity basis; however, the balance-of-payments statistics include certain adjustments to Treasury data prior to 1963 and some rounding differences, and may differ because of varying timing in incorporating revisions of Treasury data. The table does not include certain nonliquid liabilities to foreign official institutions which enter into the calculation of the official reserve transactions balance by the Department of Commerce.

1/ Represents liability on gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases.
2/ U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets. Upon termination of investment, the same quantity of gold can be

reacquired by the International Monetary Fund.

3/ Includes Bank for International Settlements and European Fund.

4/ Derived by applying reported transactions to benchmark data; breakdown of transactions by type of holder estimated 1960-1963. Includes securities issued by corporations and other agencies of the United States Government, which are guaranteed by the United States.

5/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank.

6/ Includes difference between cost value and face value of securities in IMF gold investment account. Liabilities data reported to the Treasury include the face value of these securities, but in this table the cost value of the securities is included under "Gold Investment." The difference, which amounted to \$43 million as of the end of 1969, is included in this column.

7/ Includes total foreign holdings of U.S. Government bonds and notes, for which breakdown by type of holder is not available.

8/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

9/ Data are comparable in coverage to those shown for the preceding date; for data comparable to those shown for the following date, see second line opposite December 1969.

10/ Includes \$17 million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in October 1969. Not available. p Preliminary.

Note: For further information, see "Public Debt Operations," Tables PDO-9 and 10.

1/ Includes bonds issued to the Government of Canada in connection with transactions under the Columbia River treaty. Amounts outstanding were \$204 million, September 1964 through October 1965; \$174 million, November 1965 through October 1966; \$144 million, November 1966 through October 1967; \$114 million, November 1967 through October 1968; \$84 million, November 1968 through September 1969; \$54 million, October 1969 through September 1970; and \$24 million, October 1970.

2/ Bonds issued to the Government of Italy in connection with military

purchases in the United States.

3/ In addition, nonmarketable Treasury notes amounting to \$125 million equivalent were issued to a group of German commercial banks in June 1968. The revaluation of the German mark in October 1969 increased the dollar value of these notes by \$10 million. See also footnote 7, Table IFS-1.

4/ Includes an increase in dollar value of \$101 million resulting from revaluation of the German mark in October 1969. See also footnote 7, Table IFS-1.

Note: The initial U. S. quota in the International Monetary Fund was \$2,750 million. The U.S. quota was increased to \$4,125 million in 1959, and to \$5,160 million in February 1966. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 percent in gold and 75 percent in dollars.

- 1/ Represents net Fund sales of gold to acquire U.S. dollars for use in Fund operations. Does not include transactions in gold relating to gold deposit or gold investment (see Table IFS-2).
 2/ Positive figures represent purchases from the Fund of currencies of other members for equivalent amounts of dollars; negative figures represent repurchases of dollars, including dollars derived from charges on purchases and from other net dollar income of the Fund. The United States has a commitment to repurchase within 3-5 years, but only to the extent that the Fund's holdings of dollars exceed 75 percent of the U.S. quota. Purchases of dollars by other countries reduce the U.S. commitment to

repurchase by an equivalent amount.

- 3/ Beginning January 1970, includes dollars obtained by countries other than the United States from sales of gold to the Fund.
 4/ Represents the United States gold tranche position in the Fund (the United States quota minus the Fund's holdings of dollars), which is the amount that the United States could purchase in foreign currencies automatically if needed. Under appropriate conditions, the United States could purchase additional amounts equal to the United States quota.
 5/ Includes \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.
 6/ Includes \$30 million of special drawing rights.

CAPITAL MOVEMENTS

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Statistics on the principal types of data and the principal countries are published monthly in the "Treasury Bulletin." Reports are filed with the Federal Reserve Banks by banks, securities brokers and dealers, and nonbanking concerns in the United States. These statistics are then consolidated, and are published by the Treasury as promptly as possible.

The report forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision of the report forms became effective with reports as of May 31, 1963. 1/

The present form of the published presentation of the "Capital Movements" statistics was introduced in the May 1969 issue of the "Bulletin." The principal changes were the rearrangement of the tables to bring together in separate sections all the data relevant to the same statistical series; the expansion of the time series on aggregate liabilities and claims reported by banks to show more detailed breakdowns by type of holder and type of liability and claim; and the presentation of statistics not previously published on the short-term liquid claims of large nonbanking concerns.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad, and the foreign branches, subsidiaries and offices of United States banks and business concerns; the central governments, central banks and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported generally in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Reporting coverage

Reports are required from banks, securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign firms. Institutions which have total reportable liabilities, claims or securities transactions below a specified exemption level, based on the average for the report dates during a six-month period, including the current report date, are exempt from reporting.

Banks file reports monthly covering their short-term and long-term liabilities to and claims on foreigners; an exemption of \$500,000 is applicable to reports in each of these categories. Twice a year they also report their short-term dollar liabilities to foreigners in countries not shown separately on the monthly report of liabilities. Banks, securities brokers and dealers, and in some instances, nonbanking concerns, report monthly their transactions in securities with foreigners; the applicable exemption level is \$100,000.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking firms if their liabilities or claims are \$500,000 or more. Such firms also report the liquid portion of their claims for each month-end when they have reportable claims of \$1 million or more. The foreign credit and debit balances of securities brokers and dealers are reported quarterly; the exemption level applicable to these reports is \$100,000.

Description of statistics

Data collected on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in six sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and the detailed breakdowns of the latest available data.

Section I covers the short-term and long-term liabilities to foreigners reported by banks in the United States. The data exclude the holdings of dollars of the International Monetary Fund derived from payments of the United States subscription and from the exchange transactions and other operations of the Fund. (Liabilities representing the "gold investment" of the Fund, however, are included.) The data also exclude U.S. Treasury letters of credit, and nonnegotiable, noninterest-bearing special notes of the United States held by international and regional organizations.

Section II presents the short-term and long-term claims on foreigners reported by banks in the United States, including claims held for their own account and for the account of their domestic customers. The data exclude convertible foreign currencies held by U.S. monetary authorities.

Sections III and IV show respectively the liabilities

to, and claims on, foreigners reported by exporters, importers, industrial and commercial firms, financial institutions other than banks and brokers, and other nonbanking concerns in the United States. The data exclude the intercompany accounts of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business firms to the Department of Commerce on its direct investment forms.) The data also exclude claims held through United States banks. Separate figures are shown in Section IV for the short-term liquid claims of large nonbanking concerns in the United States.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series, and non-marketable U.S. Treasury bonds and notes, foreign currency series, which are shown in "International Financial Statistics" section, Table IFS-4). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts. The data exclude securities issued abroad by foreign subsidiaries of U.S. corporations, some of which are treated in the balance of payments as issues of U.S. corporations.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with United States residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries. Beginning with data for 1969, transactions between foreigners in new issues not offered for sale to United States residents but managed by underwriters in the United States are excluded from the gross figures.

Section VI comprises two tables on the money credit and debit balances, as appearing on the books of reporting brokers and dealers in the United States, in accounts of foreigners with them, and in their accounts carried by foreigners.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the United States Government. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

1/ Copies of the reporting forms and instructions may be obtained from the Office of Balance of Payments Programs, Operations and Statistics, Office of the Assistant Secretary for International Affairs, Treasury Department, Washington, D.C. 20220 or from Federal Reserve Banks.

Note: Breaks in series arising from changes in reporting coverage which amount to \$5 million or less for any year are not shown; in such cases, only the figure comparable to that for the following date is shown.

1/ Data are shown for calendar year ends and for the most recent five quarter ends for which figures are available. Data are also shown for earlier quarter ends when the reporting coverage changed.

2/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

3/ Data in the second line include amounts reported by firms reporting for the first time as a result of a canvass of nonbanking business concerns in the United States. p Preliminary. r Revised.

Note: Data represent estimated official and private holdings of marketable U.S. Government securities with an original maturity of more than one year. Data shown as of end year 1966 through end year 1968 (first column) are based on July 31, 1963 benchmark survey of holdings and the regular monthly reports of securities transactions (see Table CM-V-3). Data shown for end year 1968 (second column) through latest date are based on a benchmark survey as of November 30, 1968, and the monthly transactions reports. For statistical convenience, the new series is introduced as of December 31, 1968, rather than as of the survey date.

The difference between the two series is believed to arise from errors in reporting during the period between the two benchmark surveys, from shifts in ownership not involving purchases or sales through U.S. banks and brokers, and from physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates.

1/ See Note above.

FOREIGN BRANCHES OF UNITED STATES COMMERCIAL BANKS

Background

In connection with the administration of the Interest Equalization Tax, U.S. commercial banks which maintained branch offices outside the United States were required to file monthly information returns on Treasury Form 3954 showing data on the assets and liabilities of their foreign branches. This reporting requirement began in February 1965, and ended after the filing of reports as of September 30, 1969. Since that date, the Treasury's need for information on foreign branches has been met by a new monthly Federal Reserve report of the assets and liabilities of foreign branches of member banks of the Federal Reserve System (Form F.R. 502), which provides essentially the same information as the reports on Form 3954.

Because of widespread interest in the activities of foreign branches of United States banks and the significance of these activities for the Eurodollar market and the U.S. balance of payments, the Treasury Department is publishing in this issue of the Treasury Bulletin a summary of the data reported on Form 3954, for the period June 30, 1965 to September 30, 1969.

Relationship to Capital Movements Statistics

The data reported on Form 3954 show the assets and liabilities of the foreign branches as carried on their own books. In the capital movements statistics, foreign branches of U.S. banks are considered to be "foreigners," since they are located outside of the United States. Therefore, only the items representing claims of the foreign branches on U.S. addressees, and liabilities of the foreign branches to U.S. addressees, are directly related to the capital movements statistics which appear in the preceding section. For example, foreign branch claims on the U.S. offices of their parent banks have their counterpart (apart from "float" and differences arising from differing reporting dates) in the liabilities of the parent banks to their foreign branches, which are included in the short-term liabilities to foreigners reported by banks, shown in the Capital Movements Section. Similarly, the counterpart of the deposit liabilities of the foreign branches to U.S. addressees (including their parent banks) is included in the short-term claims on foreigners reported by banks shown in the Capital Movements Section. The figures on foreign branch deposit liabilities to U.S. addressees other than their parent banks indicate the extent to which funds available to the branches were derived from outflows of U.S. capital, including funds borrowed abroad by U.S. corporations to finance direct investments abroad. Foreign branch dollar claims on U.S. parent banks, particularly claims of the United Kingdom branches, are relevant to analysis of the Eurodollar market, since they represent to a large extent Eurodollars acquired by U.S. head offices through their foreign branches.

Other items reported on Form 3954 show foreign branch claims on and liabilities to persons and institutions located outside the United States. These items are not directly related to the U.S. capital movements and balance-of-payments statistics, since they represent financial relationships among "foreigners." Some of these items, however, are useful in various types of analysis. For example, the branch claims on and liabilities to other foreign branches of the parent bank indicate the extent to which total foreign branch

assets and liabilities represent inter-branch transactions. The branch claims on and liabilities to other types of foreigners provide some indication of the structure of the portion of the Eurodollar market which is encompassed by the foreign branches of U.S. commercial banks.

Definitions

The term "foreign" is defined as meaning "other than United States," so that the liabilities of the foreign branches to "foreigners" and their claims on "foreigners" are consistent with U.S. balance-of-payments definitions.

The term "official institution" includes central governments of foreign countries and of their possessions, central banks of issue, stabilization funds, exchange control offices and fiscal agents of national governments, but does not include nationalized or other government-owned non-central banks or other instrumentalities.

The term "foreign bank" includes commercial banks, savings banks, discount houses, and other similar "foreign" institutions accepting deposits. Nationalized and other banking institutions owned by central governments are regarded as "foreign banks" if they are not functioning as central banks. The term "foreign bank" excludes foreign branches and foreign subsidiaries of the parent bank of the reporting branch, which are reported as a separate category, but includes foreign branches and foreign banking subsidiaries of other U.S. banks.

The term "U.S. offices of parent bank" means the head office of the parent bank and all of its U.S. branches, affiliates, and Edge Act corporate subsidiaries organized in the United States.

The term "other foreign branches" of parent bank means foreign branches and foreign subsidiaries of the parent bank located outside the United States other than the reporting foreign branch. The term includes branches and subsidiaries located in the country of domicile of the reporting foreign branch.

The term "United States" includes the 50 states, the District of Columbia, the Commonwealth of Puerto Rico, and the possessions of the United States.

Reporting Coverage

The information returns were filed by head offices of U.S. commercial banks on behalf of their foreign branches. In addition to member banks of the Federal Reserve System, several nonmember banks filed the returns, since they were "U.S. commercial banks" within the meaning of the Interest Equalization Tax. The data do not include the assets or liabilities of military banking facilities abroad, except to a minor extent during the period June 1965 to November 1966. All U.S. commercial banks having foreign branches were required to file the information returns; there was no exemption level prescribed for this reporting requirement.

Insofar as possible, the data reported represent the assets and liabilities carried on the books of the foreign branches at the close of the last business day of the busi-

FOREIGN BRANCHES OF UNITED STATES COMMERCIAL BANKS

ness month. For most of the foreign branches, the last business day of the business month corresponded to the last business day of the calendar month. In the case of the foreign branches of a few large banks, however, the last business day of the business month fell a week to 10 days earlier than the last business day of the calendar month. Consequently, the data presented do not consist entirely of end-of-month figures.

Small differences between the total assets and total liabilities of the branches as shown in the tables arose during the entire period from rounding of the reported figures and from differences in the totals reported by some branches due to variation in the rates used to convert foreign currency assets and liabilities to dollar equivalents. The somewhat larger differences shown for the period June - December 1965 arose in addition from misinterpretation by some foreign branches of certain details of the reporting instructions; these were corrected beginning with the reports for January 1966.

Description of Statistics

The data relating to the foreign branches of United States commercial banks for the period June 1965 to September 1969

are presented in 12 tables. The first six tables present aggregates of the reports of all foreign branches of United States commercial banks. The first three cover the assets of the foreign branches and the next three cover their liabilities.

The remaining six tables present aggregates of the reports of all branches located in the United Kingdom; these data represent a portion of the amounts shown in the first six tables. The first three cover the assets of the United Kingdom branches, and the last three cover their liabilities. No further geographic breakdown of the data was considered feasible.

In the tables, certain items which were reported separately on the information return have been combined with other items, in some cases because the amounts were so small as to be of little interest, and in other cases because combination of items was necessary to avoid disclosing the positions of individual reporting banks.

The data are presented in a form generally consistent with the data currently reported to the Federal Reserve Board on its monthly report of the assets and liabilities of the foreign branches.

FOREIGN CURRENCIES ACQUIRED BY THE U. S. WITHOUT PURCHASE WITH DOLLARS

Foreign currencies reported herein in United States dollar equivalents were acquired without payment of dollars, for the most part in connection with foreign assistance and agricultural trade development programs authorized by various provisions of law. The currencies are held in the custody of the Treasury Department until such time as they are either sold for dollars to Government agencies or transferred to Government agencies for expenditure without charge to appropriations, as specifically authorized by law.

Prior to July 1, 1953, foreign currencies acquired by Government agencies without payment of dollars generally were available to the collecting agencies to defray operating expenses and were not subject to the regular appropriation processes.

The act of July 15, 1952, Sec. 1415 (66 Stat. 662), provided that after June 30, 1953, United States agencies could no longer expend foreign currencies belonging to the United States except as provided annually in appropriation acts. Subsequent legislation required executive departments and agencies, with certain exceptions, to reimburse the Treasury in dollars for the foreign currencies used. Executive Orders No. 10488 dated September 23, 1953, and No. 10900 dated January 5, 1961, as amended, provided for the issuance of regulations by the Secretary of the Treasury governing the purchase, custody, transfer, or sale of foreign exchange by the United States.

Accordingly, Treasury Department Circular No. 930 was issued on October 19, 1953, effective December 1, 1953. These

regulations provided for the transfer of department and agency foreign currency balances as of November 30, 1953, into Treasury custody, and the flow of future collections through Treasury accounts; and established requirements with respect to withdrawals from Treasury accounts; limitations on purchases and amounts of holdings; the use of foreign depositaries; and accounting for the currencies. Department Circular No. 930 as revised October 20, 1961, added certain requirements governing foreign currency reporting and accounting.

Figures are stated in dollar equivalents, computed for reporting purposes, to provide a common denominator for the currencies of the many foreign countries involved. It should not be assumed that dollars, in amounts equal to the balances, are actually available for the general use of the United States Government, since most of the currencies are convertible and restricted as to uses by the terms of agreements between the United States and the foreign governments.

The tables exclude the counterpart funds owned by and held in accounts of the foreign governments. The use of such funds is subject to approval of the United States, and transactions therein are included in reports of the Agency for International Development. The tables also exclude the United States purchases of foreign currencies which are under dollar accountability and reported as dollar transactions.

Detailed data, by account, agency, program, foreign country, units of currency, and related dollar equivalents, are published annually in the Combined Statement of Receipts, Expenditures and Balances, beginning with fiscal 1958.

FINANCIAL OPERATIONS OF GOVERNMENT AGENCIES AND FUNDS

The financial statements of corporations and other business-type activities of the United States Government, which have appeared in the "Treasury Bulletin" since the August 1956 issue, are compiled from reports submitted to the Treasury under Department Circular No. 966, issued January 30, 1956, and Supplement No. 1, Revised, issued June 16, 1965. These regulations were issued pursuant to the Budget and Accounting Procedures Act of 1950. They superseded Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financial statements previously published in the Bulletin were submitted.

Department Circular No. 966 requires submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); and all other activities of the Government operating as revolving funds. Other activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments, and other recoverable assets, were brought under the regulations as the agency accounting systems were developed to where they were capable of furnishing the required financial reports.

Four kinds of financial statements are called for by Department Circular No. 966. They are statements of financial condition, income and expense, source and application of funds, and certain financial contingencies. The statements of financial condition are published quarterly and appear as Section I, Table GA-I-1. The first statements of financial condition published under Circular 966 were as of March 31, 1956, and

were presented in the August 1956 Bulletin. Loans shown on the statements of financial condition are classified by type and account in Section III, Table GA-III-2. Statements of income and expense and source and application of funds are published semianually, for June 30 and December 31 reporting dates, and appear as Section I, Tables GA-I-2 and GA-I-3. The first of these statements under Circular 966 covered the fiscal year 1956, and were published in the January 1957 Bulletin. All funds shown in the statements are noted to indicate whether they are public enterprise revolving funds, intragovernmental revolving funds, trust or trust revolving funds, or general and special funds.

Supplement No. 1, when originally issued in 1956, extended the coverage to include all executive agencies and activities not previously reporting under Circular 966, but required only a statement of financial condition annually as of June 30. These were activities which were not principally of a business-type nature. Those which had not yet developed formal accounting procedures to provide complete balance-sheet type statements were temporarily authorized to report only assets. Thus, the supplement rounded out provisions for information on properties and other assets, as well as liabilities, of the United States Government all of which is needed by Treasury for the compilation of complete Government-wide financial reports. The first comprehensive reporting under the original Supplement No. 1 was for June 30, 1957, and the data were published in the December 1957 Bulletin as Part B of Table 4 in Section I. Statements submitted under this supplement are now published annually in Section II, Table GA-II-1. The revision to Supplement No. 1 in 1965 made no basic change to the overall purpose of the originally issued supplement; it updated and consolidated all amendments to both the regulation and instructions.

FINANCIAL OPERATIONS OF GOVERNMENT AGENCIES AND FUNDS

Footnotes to Table GA-I-1

- (PE) Public enterprise revolving funds.
 (IR) Intragovernmental revolving funds.
 (TR) Trust revolving funds.
 (G&S) General and special funds (also includes loan accounts of enterprises in liquidation and foreign currency).
- 1/ Government corporations and business-type activities reporting on a quarterly basis.
- 2/ These amounts consist mainly of unexpended balances of general, special, and revolving fund accounts against which checks may be drawn to pay proper charges under these funds. The funds are considered as assets of the agencies, but are not assets of the United States Government since funds must be provided out of cash balances of the Treasurer of the United States and future receipts to take care of checks to be issued against the balances. Undeposited collections and unconfirmed deposits are included in Cash in banks, on hand, and in transit in these statements.
- 3/ Includes Federal home loan bank bonds and notes of \$3 million; Federal intermediate credit bank debentures of \$5 million; and Federal National Mortgage Association, secondary market operations fund debentures and discount notes of \$9 million.
- 4/ Includes foreign currency assets, representing loans and other receivables recoverable in foreign currency as well as balances of foreign currencies in United States depositaries, aggregating \$6,039 million in dollar equivalent. These currencies, acquired primarily without the payment of dollars, were generated under various Government programs, principally the Agricultural Trade Development and Assistance Act of 1954, as amended, and the Mutual Security Acts, as amended. Dollar equivalents are computed for reporting purposes, to provide a common denominator for the currencies of the many countries involved. Foreign currencies on hand and on deposit and loans under section 104 (e) of the Agricultural Trade Development and Assistance Act of 1954, as amended, are stated at the rates as of June 30, 1970, at which the United States could purchase currencies on the market for regular operating purposes. Other loans are stated at the rates at which they are to be repaid or at rates in effect when the loans are extended. Currencies that are dollar denominated or guaranteed as to rates of exchange are stated at rates specified in the agreements.
- 5/ Excludes personal property which had an original acquisition cost value of \$11 million accounted for by this fund (see Section II, Table GA-I-1, footnote 9).
- 6/ Represents collections of principal turned over to the Government National Mortgage Association, participation sales fund and held for redemption of participation certificates.
- 7/ Certain corporations and other business-type activities that have submitted statements of financial condition guarantee and insure loans made by private financial institutions and insure deposits in banks and savings and loan associations. These commitments are excluded from their balance sheets. The major agencies that have these items and the principal amounts thereof are as follows:
- | Activity | Amount
(In millions

| <u>8/</u> Represents the Cooley loan program established pursuant to the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704 (e)). | |
| <u>9/</u> Represents deferred income. | |
| <u>10/</u> Represents transfers of principal and interest to miscellaneous receipts of the United States Treasury Department. | |
| <u>11/</u> Consists of contingency fund, Inter-American social and economic program, and supporting assistance loans. | |
| <u>12/</u> Included beginning June 30, 1970. | |
| <u>13/</u> Included beginning June 30, 1970. This statement includes the Overseas Private Investment Corporation reserves fund. | |

- 14/ Includes \$20 million representing miscellaneous loan receipts to be used when issuing an equivalent amount of capital stock to the Secretary of the Treasury.
- 15/ Represents noninterest-bearing public debt borrowings from the United States Treasury Department pursuant to an act approved November 2, 1965 (79 Stat. 1178).
- 16/ Pursuant to an act approved December 24, 1969 (83 Stat. 399), the rural housing direct loan account, formerly shown under this heading, was abolished and all its assets, liabilities, and authorizations were transferred to the rural housing insurance fund as of the close of business June 30, 1970.
- 17/ Includes interest collections turned over to the Government National Mortgage Association, participation sales fund and held for payment of interest on participation certificates.
- 18/ Participation certificates, shown in the liability section of this statement, have been issued against certain of these loans under trust agreements with the Government National Mortgage Association participation sales fund.
- 19/ Includes assets in use, vessels, and other assets held primarily for mobilization, and vessels held for scrapping.
- 20/ Represents depreciation on assets in use and on mobilization assets, and allowance for losses on vessels held for scrapping.
- 21/ Excludes capital property such as land, structures, and equipment as follows: Air Force, \$3,177 million; Army, \$2,044 million; Marine Corps, \$23 million; Navy, \$4,769 million; and defense agencies \$6 million.
- 22/ Consists mainly of capital representing appropriations, reappropriations, capitalization of assets, and accumulated net income or deficit. Figures for each of these amounts were not shown separately on the report submitted by the fund.
- 23/ Represents reserve for equity of others.
- 24/ Includes the Defense Communications Agency.
- 25/ Includes Defense Atomic Support Agency and National Security Agency.
- 26/ Represents Consumer Protection and Environmental Health Service.
- 27/ Represents allowance for title and other contingencies.
- 28/ Includes construction work in progress and unclassified assets amounting to \$113 million.
- 29/ Includes interest accrued on investment in power facilities amounting to \$12 million.
- 30/ Represents interest on invested capital.
- 31/ Includes helium stored underground held for future use amounting to \$319 million.
- 32/ Includes construction work in progress amounting to \$160 million.
- 33/ Includes interest on invested capital.
- 34/ Represents the fund known as "Advances to employment security administration account, unemployment trust fund."
- 35/ Figures are preliminary. The cash and fund balances and receivables include sufficient funds to pay for resources on order of \$414 million. These resources on order are a part of the Government equity in the Postal Service. Contingent receivables of \$.2 million based on pending Civil Aeronautics Board orders and claims against contractors are not included.
- 36/ Valued at cost, estimated if not known.
- 37/ Represents judgments in favor of the United States. Does not include allowance for uncollectible items.
- 38/ Represents construction work in progress and in warehouse.
- 39/ Includes construction work in progress amounting to \$75 million.
- 40/ Liabilities do not include: (1) contingent liabilities of \$47.6 million for pending suits and damage claims; (2) postage in the hands of the public which, for practical considerations, has been accounted for as revenues when sold; (3) contingent liability on defaulted contracts in 1967 relating to mailster procurement, and (4) undetermined amounts for long-term leases.
- 41/ Represents accrued interest expense on borrowings from the United States Treasury Department on which payment has been deferred.
- 42/ Consists of stock of the Asian Development Bank amounting to \$80 million, stock of the International Bank for Reconstruction and Development amounting to \$635 million; and subscriptions to the International Finance Corporation, the Inter-American Development Bank, and the International Development Association amounting to \$35 million, \$1,950 million, and \$952 million, respectively.
- 43/ Includes lend-lease and surplus property balances amounting to \$1,176 million; and receivables from the District of Columbia, Greece, Japan, and the United Kingdom amounting to \$357 million; \$13 million; \$231 million; and \$2,965 million, respectively.
- 44/ Includes Public Works Administration (in liquidation) and strategic and critical materials.
- 45/ Includes buildings and land improvements, and construction work in progress amounting to \$620 million.
- 46/ Represents an accountable advance of \$213 million to General Services Administration for transfer of silver to strategic and critical materials inventories. The value of this silver is included in inventories.
- 47/ Includes construction work in progress amounting to \$85 million.
- 48/ Represents public debt borrowings transferred from the direct loans to veterans and reserves fund. These borrowings are noninterest-bearing as provided by acts of February 29, 1964 (78 Stat. 147), August 30, 1964 (78 Stat. 661), and September 6, 1966 (80 Stat. 679).
- 49/ Participation certificates, shown in the liability section of this statement, have been issued against certain of these loans.
- 50/ Represents primary and secondary reserves.
- 51/ The net income is not available by law for dividend distribution and is considered by the Corporation as a reserve for future deposit insurance losses and related expenses with respect to insured banks.
- 52/ Includes investigations and construction work in progress amounting to \$560 million.
- 53/ Consists of net income from power operations of \$661 million and net expense of nonrevenue-producing programs of \$454 million.

* Less than \$500.

p Preliminary.

Footnotes to Table GA-IV-6

- 1/ State unemployment funds; used for benefit payments. For the period August 1961 to February 1964, withdrawals by States were reduced by reimbursements to State accounts from the Federal Extended Compensation Account.
- 2/ Established by the Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101 (a)), into which are deposited tax receipts transferred in accordance with the act and from which are paid the administrative expenses of the employment security program and reimbursement for tax refunds. Receipts consist of appropriated and unappropriated transfers of tax collections.
- 3/ Net of repayments.
- 4/ Amounts represent excess of collections from Federal unemployment tax over expenditures for benefits and administrative expenses which excess was appropriated from the general fund to this account. (Includes amounts appropriated to the State Unemployment Accounts). Beginning 1961, such excess is transferred between book accounts within the Unemployment Trust Fund.
- 5/ Established by the act approved March 24, 1961 (42 U.S.C. 1105 (a)), which provides for a temporary program of extended unemployment compensation payments.
- 6/ For payment of benefits and refunds (45 U.S.C. 360). Figures exclude interim advance of \$15 million from the Treasury and subsequent repayment, both in 1940.
- 7/ Contributions under the Railroad Unemployment Insurance Act of 1938, as amended (45 U.S.C. 360 (a)), in excess of the amount specified for administrative expenses. Through 1957, also includes transfers from the administration fund of excess amounts over the specified balance (45 U.S.C. 361 (d)).
- 8/ Temporary advances are made when the balance in the Railroad Unemployment Insurance Account is insufficient to meet payments of benefits and refunds due or to become due. Whenever the balance is sufficient to pay such benefits and refund, repayments are made, plus interest at 3% per annum, pursuant to an act approved May 19, 1959 (45 U.S.C. 360 (d)).
- 9/ Consists of specified proportion of contributions deposited in the fund to be available for administrative expenses. The Railroad Unemployment Insurance Administration Fund was established in the Unemployment Trust Fund pursuant to the amending act of September 6, 1958; before that the administration fund was a separate trust fund (45 U.S.C. 361).
- 10/ Total includes \$107 million transferred from State accounts to the Railroad Unemployment Insurance Account in connection with its establishment (45 U.S.C. 363).
- 11/ Beginning fiscal 1961 refunds of taxes (principal only) are reported as deductions from receipts. Interest paid on refunds of taxes is included under expenditures. See footnote 14.
- 12/ Excludes transactions for investments of non-Federal securities.
- 13/ Includes \$5 million from Railroad Retirement Unemployment Insurance Account.
- 14/ Includes interest on refunds of taxes.
- 15/ Includes interest.
- 16/ Includes an adjustment of \$7 million pursuant to the act of September 6, 1958 (45 U.S.C. 361 (a)).
- 17/ Includes unappropriated receipts beginning September 1960.
- * Less than \$500,000.
