1/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes.

In this statement, however, charges for retirement of national bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

Basis of Computation: (1) Treasury bond yields are computed on the basis of the mean of bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.
