Treasury Financing Operations

Results of October 15 and November 1 Refundings

Subscriptions to the 1-7/8 percent Treasury certificates of indebtedness of Series E-1952, dated October 15, 1951, amounted to \$10,861 million, leaving \$333 million of the maturing issues to be paid in cash. Exchanges for the 1-1/4 percent notes, Series F-1951, which matured October 15 in the amount of \$5,941 million, were \$5,873 million. Exchanges for the 1-1/4 percent notes, Series G-1951, which matured November 1 in the amount of \$5,253 million, were \$4,988 million.

Subscription books for the certificates of Series E-1952 were opened on October 1, and were closed at the close of business on October 4. Exchanges were made par for par in the case of the notes of Series F-1951 and at par with an adjustment of interest as of October 15 in the case of the notes of Series G-1951. Cash subscriptions were not received. The certificates were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Reports to the Treasury on the ownership of Government securities indicate that on August 31, 1951, about 80 percent of Series F-1951 notes and 65 percent of Series G-1951 notes were owned by reporting commercial banks and the Federal Reserve Banks. The ownership figures for that date are the latest published for commercial banks.

Tax Anticipation Bills Offered

In accordance with his announcement on

October 10, 1951, the Secretary of the Treasury on the following day invited tenders for \$1,250 million, or thereabouts, of 144-day Treasury bills, Tax Anticipation Series. The offering was for cash, with the bills issued on a discount basis, as in the case of other bill series. The Tax Anticipation Series bills were dated October 23, 1951, and will mature March 15, 1952. They will be accepted in payment of income taxes due on March 15, 1952, and to the extent they are not presented for this purpose the face amount of these bills will be payable without interest at maturity. Tenders were received on October 17, 1951, and were accepted in the amount of \$1,233.5 million. The average rate of discount was 1.550 percent.

The Secretary also stated in his October 10 announcement that another offering of Treasury bills would be made within the next few weeks. These bills would mature on June 15, 1952, and would be acceptable in payment of income taxes due on that date. The amount probably would be in the neighborhood of \$1,000 million.

Maturing Treasury Bills Refunded

Treasury bills matured during October in the amount of \$1.2 billion in each of the four weeks, and new offerings were in the same amount. The average rates of discount on the successive weekly issues were 1.646 percent, 1.576 percent, 1.615 percent, and 1.593 percent.

Note: Details of Treasury market financing operations are shown elsewhere in this issue of the "Treasury Bulletin", in the tables on "Offerings" and "Dis-

position", respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills".

1/ Gross receipts less appropriations to the Federal Old-Age and Survivors Insurance Trust Fund and refunds of receipts.

2/ Transactions of the Foreign Economic Cooperation Trust Fund, established under Section 114 (f) of the Economic Cooperation Act of 1948 (62 Stat. 150), are consolidated with budget expenditures.

1/ Allows for deduction of appropriation of \$275 million for Medical Care Insurance Trust Fund, under proposed legislation.2/ The Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950, change the basis of appropriating social security employment taxes on employers and employees. Effective January 1, 1951, these taxes and withheld income taxes are paid into the Treasury in combined amounts without separation as to type of tax. The amounts of such taxes credited currently as appropriations to the Federal Old-Age and Survivors Insurance Trust Fund are based initially on estimates by the Secretary of the Treasury and are later adjusted on the basis of wage records maintained by the Social Security Administration. For the

purposes of this table, beginning January 1951, the same amount as is credited each month to the Trust Fund is included under "Employment taxes" as receipts for old-age insurance, and the balance of the combined receipts is shown under income tax as "Withheld by employers".

10/ For description of content, see Table 6, footnote 3.
Beginning November 1949, interest on the public debt is reported as an expenditure when such interest becomes due and payable, as distinguished from the previous practice of showing the expenditure on the basis of interest paid by the Treasurer of the United States.

11/ Includes public works undertaken by the Veterans' Administration.

12/ Includes transactions relating to the Foreign Economic Cooperation Trust Fund, see page 1.

1/ Through the fiscal year 1950, the totals differ from those shown in Table 2 because during that period appropriations were included in Table 6 when made but were included in Table 2 when amounts were transferred from the General Fund. Effective July 1951, pursuant to Public Law 134, approved August 31, 1951, the appropriation is equal to the amount of taxes deposited in the

Treasury (less refunds) under the Railroad Retirement Act, and these amounts are shown in both tables when they are transferred from the General Fund.

2/ Paid from the trust fund under Title IV, act of June 29, 1949 (63 Stat. 297).

Source: Actual figures are based on Daily Treasury Statement; estimates are based on the 1952 Budget document, including effect of proposed legislation as outlined in Budget detail. For June 28, 1951, revision of 1952 estimated net budget receipts and total budget expenditures, see page 1, footnote 5. 1/ The U. S. subscription to the capital of the International Monetary Fund was paid in part from the Exchange Stabilization Fund (see "Treasury Bulletin" for September 1947, page 17).

2/ Consists of seigniorage on silver and increment resulting from reduction in weight of the gold dollar. This item is part of the cash budget receipts shown in these tables, but is excluded from the 1952 Budget document figures for "Receipts from the public".

3/ In addition to this decrease in the General Fund balance, the Exchange Stabilization Fund was drawn down by \$1,800 million for subscription to the capital of the International Monetary Fund.

1/ Obligations issued by certain Government corporations and other agencies, which are guaranteed by the United States as to both principal and interest.

Such obligations were first authorized in 1932. Prior to September 1939, the figure represent principal shown as a contingent liability of the United States; beginning September 1939, they represent principal outstanding, both matured and unmatured. Guaranteed securities held by the Treasury are excluded.

STATUTORY DEBT LIMITATION

The Second Liberty Bond Act, as amended, (31 U.S.C. 757 b), provides that the face amount of obligations issued under authority of that act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury), shall not exceed in the

aggregate \$275 billion outstanding at any one time. Obligations issued on a discount basis, and subject to redemption prior to maturity at the option of the owner, are included in the statutory debt limitation at current redemption values.

1/ Original call and maturity dates are used.

2/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called securities would be presented for cash redemption.

3/ These nonmarketable bonds, dated April 1, 1951, and maturing April 1, 1980, are exchangeable for 1-1/2% marketable Treasury notes. See Table 3, footnote 2.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935 and began to mature in March 1945. Series A-D were sold from March 1935 to April 1941 and Series E, F, and G have been on sale since May 1, 1941. Beginning in May 1951, holders of maturing Series E bonds have three options: to redeem them in cash, to retain them with an extended maturity of 10 years at specified rates of interest accrual, or to exchange them for Series G bonds. Further information on these options will be found in the "Treasury Bulletin" issue for April 1951, page A-1, and information on the terms and conditions of the various series of savings bonds appears in the annual reports of the Secretary of the Treasury.

Series A-F sales are shown at issue price and total redemptions and amounts outstanding at current redemption values. Series G is shown at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured bonds outstanding of Series A-D were included in the interest-bearing debt until all bonds of the series matured, when they were transferred to matured debt upon which interest has ceased. Savings bonds data by denominations and the amounts of sales by States are published on a monthly basis but do not appear in each issue of the "Treasury Bulletin".

1/ Beginning with June 1947, Series E sales include unclassified sales consisting of Series E, F, and G. The amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include unclassified Series A-D redemptions beginning with October 1944, and also unclassified F and G redemptions, beginning with June 1947.

3/ Includes both matured and unmatured bonds; see Table 4.

4/ Sales of Series A-D after April 30, 1941, represent adjustments.

2/ Beginning May 1951, includes exchanges of matured Series E bonds for Series G bonds as shown in Table 4.

* Less than \$500,000.

TREASURY SAVINGS NOTES

Treasury tax and savings notes have been issued in five series: Tax Series A from August 1, 1941, through June 22, 1943; Tax Series B from August 1, 1941, through September 12, 1942; Savings Series C (originally designated Tax Series C) from September 14, 1942, through August 31, 1948; Savings Series D from September 1, 1948, through May 14, 1951; and Savings Series A beginning on May 15, 1951.

Details concerning terms and conditions for purchase and redemption and investment yields of Savings Series A appear in the June 1951 issue of the "Treasury Bulletin", page A-1. Similar information with respect to Savings Series D will be found in the October 1948 and September 1949 issues, and with respect to Savings Series C in the October 1945

issue. For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased.

^{1/} Exclude trust departments.^{2/} Includes trust companies and, beginning with figures for July 1949, also includes stock savings banks. Formerly these banks were shown as a separate classification, but they are no longer so reported.^{3/} Includes those banks and insurance companies not reporting in the Treasury Survey.^{4/} United States savings bonds, Series E and F, are shown at current redemption values. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption values for use in this statement.^{5/} Holdings by reporting agencies not available.^{6/} Excludes guaranteed securities held by the Treasury.^{7/} Issues which commercial banks may not acquire prior to specified dates (with minor exceptions); see "Debt Outstanding", Table 3, footnote 1.^{8/} Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly"

tax-exempt securities are those with the income exempt from both normal tax and surtax. "Partially" tax-exempt securities are those with the income exempt from the normal tax except that in the case of partially tax-exempt Treasury bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to normal tax and surtax.

^{9/} Includes F. H. A. debentures; see footnote 10.^{10/} A small indeterminate amount of these debentures is partially tax-exempt.^{11/} Includes \$65 million depositary bonds held by commercial banks not included in the Treasury Survey.^{12/} The proprietary interest of the United States in these banks ended on June 26, 1947.

* Less than \$500,000.

MARKET QUOTATIONS, SEPTEMBER 28, 1951

Current market quotations shown here are over-the-counter closing quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York. The securities listed in Section I include all public marketable securities issued or guaranteed by the United States Government except those not regularly quoted in the market. Section II lists the public marketable securities issued by Federal agencies but not guaranteed by the United States Government. Daily quotations for the securities listed in Sections I and II are published monthly in the Treasury Department statement, "Prices and Yields of Public Marketable Securities Issued by the United States Government and by Federal agencies".

MARKET QUOTATIONS, SEPTEMBER 28, 1951

YIELDS OF TREASURY SECURITIES, SEPT. 28, 1951
Based on Mean of Closing Bid and Ask Quotations

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market as reported to the Treasury by the Federal Reserve Bank of New York, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership", in this issue of the "Treasury Bulletin". The partially tax-exempt average was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

2/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

3/ As of December 21, 1949, the Consolidated Gas Electric Light and Power Company of Baltimore 2-3/4's of 1981 were dropped from the average, having been called.

4/ As of October 20, 1950, the Standard Oil Company of California 2-3/4's of 1965-66 were dropped from the average, having been called.

5/ Market closed.

Source: Daily Treasury Statement for total receipts from internal revenue; reports by collectors of internal revenue for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositaries; they do not coincide with amounts reported by collectors because of the lag in deposits of collections and because certain taxes are paid directly into the depositories.

1/ Excludes collections for credit to certain trust accounts for island possessions; includes corporation income tax on Alaska Railroad.

2/ Includes excess profits taxes formerly shown separately as follows: unjust enrichment through 1947 (thereafter these collections are included under "Miscellaneous"), declared value (repealed for years ending after

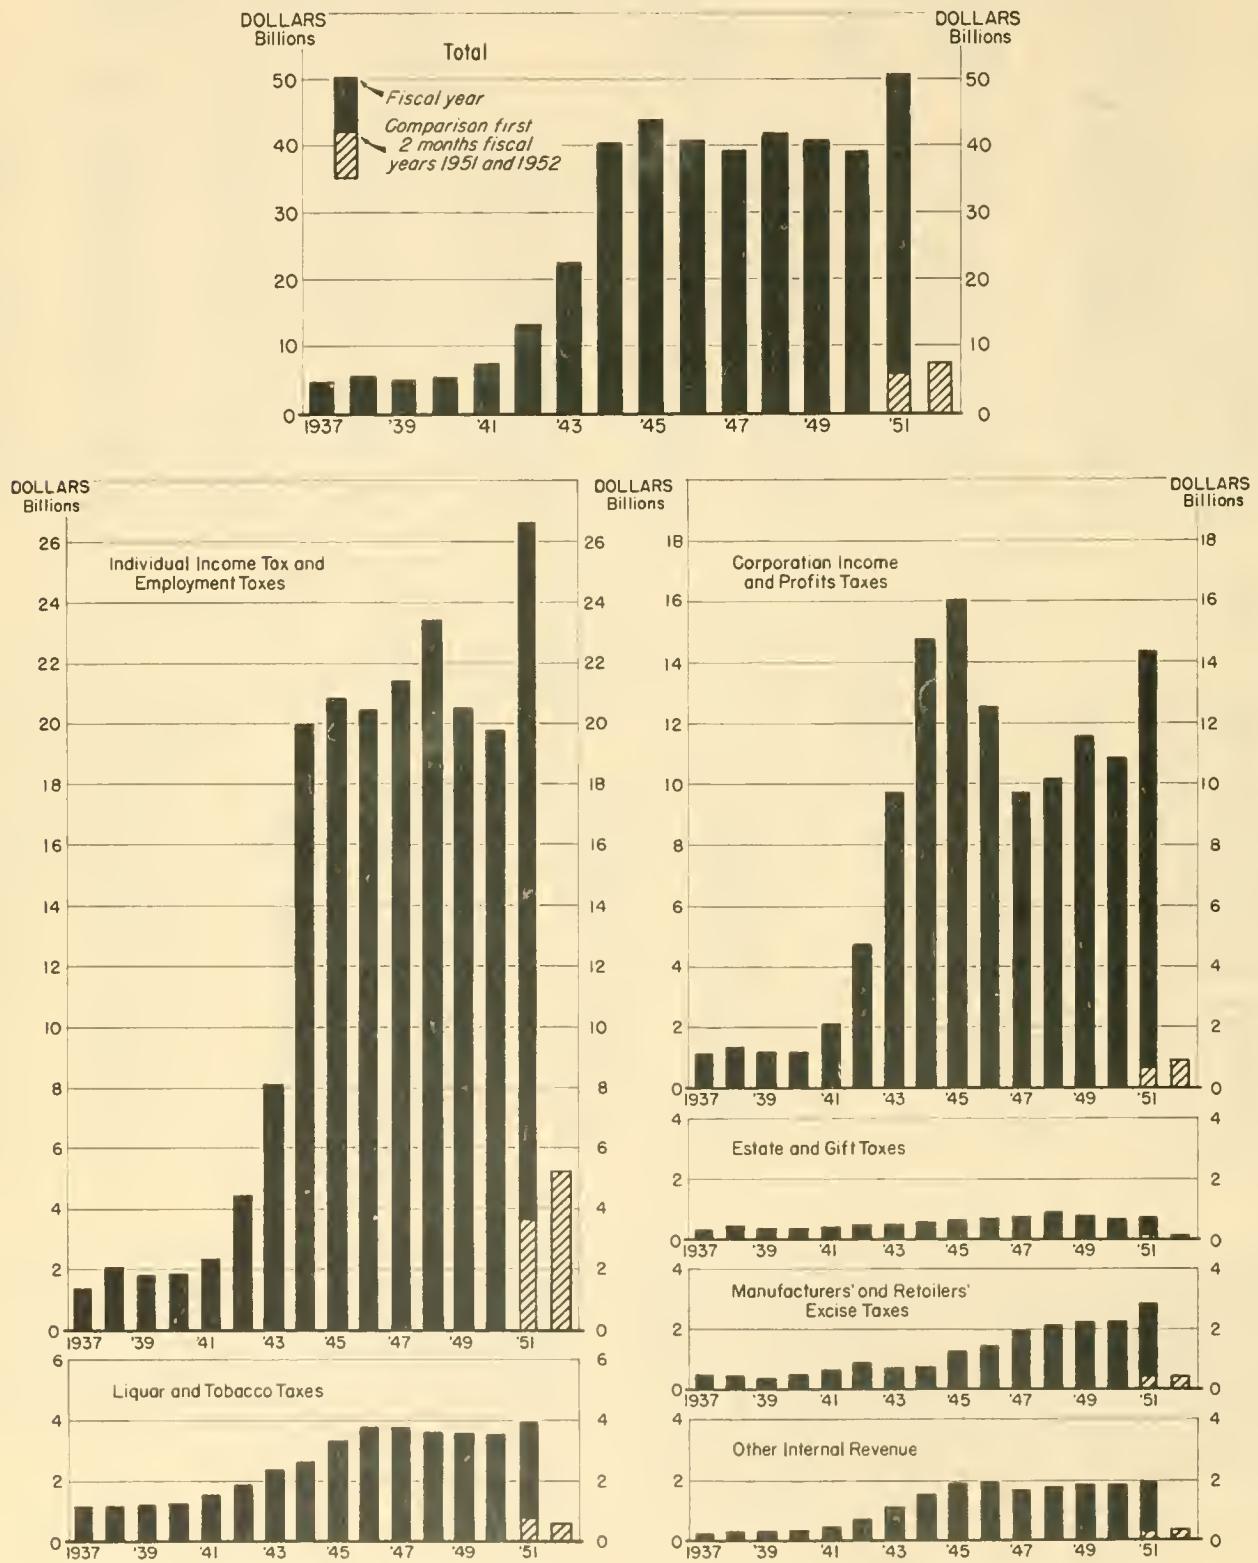

June 30, 1946), Excess Profits Tax Act of 1940 (Title II of the Second Revenue Act of 1940, which was repealed for years ending after December 31, 1945), and Vinson Act as amended (34 U.S.C. 496).

3/ Beginning January 1951, withheld income taxes and social security employment taxes on employees and employers are paid into the Treasury in combined amounts without separation as to type of tax. The figures for prior periods have been combined accordingly in this table for purposes of comparison, but are shown separately in the March 1951 and preceding issues of the "Treasury Bulletin".

4/ Repealed for years ending after June 30, 1945. Beginning July 1950, included under "Miscellaneous".

CAPITAL MOVEMENTS

Data relating to claims on foreigners and liabilities to foreigners, and capital movements between the United States and foreign countries, have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury regulations thereunder. Information covering the principal types of data and the principal countries is reported each month by banks and bankers and securities brokers and dealers in the United States. This information is published regularly in the "Treasury Bulletin". Supplementary information is published at less frequent intervals. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

The term "foreigners" as used in these reports covers all institutions and individuals (including United States citizens) domiciled outside the United States, as well as international organizations, wherever domiciled, created by treaty or convention between sovereign states. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, basis of reporting, and derivation of capital movements figures appeared in the April 1950 issue of the "Treasury Bulletin", pages 50-52. Revised report forms and regulations became effective with

the data for January 1950. Attention is called to the fact that although the grand total figures on the revised reporting basis are reasonably comparable with those for preceding months, data for individual countries in some instances are not comparable because of certain changes in coverage and geographical classification.

The supplementary information, contained in Section IV, is presented in three tables appearing at different times. Table 1 gives data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue of the "Treasury Bulletin" and begins with data for September 30, 1946. Table 2 supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. This table appeared for the first time in the December 1949 issue. Data are for the end of the calendar year beginning with 1942. Table 3 gives information on short-term liabilities to countries not regularly reported separately by banks and bankers. This table appeared for the first time in the April 1950 issue. The data have been requested at irregular intervals, the earliest date being October 1943.

Data relating to corporations in which the United States Government has a proprietary interest, direct or indirect, and to certain other business-type activities of the United States Government are presented in a series of four tables. Table 1 gives a summary of loans outstanding, Table 2, balance sheet data, Table 3, income and expense, and Table 4, source and application of funds. Tables 1 and 2 are compiled from the mid-month "Daily

Treasury Statement", which contains greater detail than the summaries presented here. Tables 3 and 4 are compiled from reports of the agencies, adjusted by the Treasury Department. The latest available loan and balance sheet data are presented in this issue of the "Treasury Bulletin", and Tables 3 and 4 for the same date will appear in a subsequent issue.
