Treasury Financing Operations

December-January Certificate, Note, and Bond Maturities

On November 16, the Secretary of the Treasury announced that holders of the Treasury 1-1/8 percent notes and the 1-1/8 percent certificates of indebtedness maturing on January 1, 1949, would be offered a one-year 1-1/4 percent certificate of indebtedness. The announcement stated further that holders of the 2 percent Treasury bonds of 1948-50, dated December 8, 1939, which had been called for redemption on December 15, 1948, would be offered a one-year 1-1/4 percent certificate of indebtedness.

Of the maturing and called issues, the certificates, Series A-1949, amounted to \$2,592 million; the notes, Series A-1949, amounted to \$3,535 million; and the issue of December 15, 1948-50 bonds, \$571 million.

Subscription books for the 1-1/4 percent certificates of indebtedness, Series H-1949, offered in exchange for the called bonds, were opened December 6 and were closed at the close of business on December 8. The new certificates were dated December 15, 1948, and bear interest from that date at the rate of 1-1/4 percent per annum, payable with the principal at maturity on December 15, 1949.

Subscription books for the 1-1/4 percent certificates of indebtedness, Series A-1950, offered in exchange for the maturing certificates and notes, were opened December 15 and were closed at the close of business on December 17. This new issue was dated January 1, 1949, and bears interest from that date at the rate of 1-1/4 percent per annum, payable with the principal at maturity on January 1, 1950.

With respect to both issues of new certificates, exchanges were made par for par, and cash subscriptions were not received. Both were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Reports to the Treasury on the ownership of Government securities indicate that on October 31, 1948, about 47 percent of the maturing certificates, about 37 percent of the maturing notes, and about 73 percent of the called bonds were owned by reporting commercial banks and Federal Reserve Banks. The ownership figures for October 31 are the latest available for holdings of commercial banks.

Subscriptions to the new certificates, Series H-1949, amounted to \$519 million, leaving \$52 million of the called bonds to be paid in cash. Subscriptions to the new certificates, Series A-1950, totaled \$5,695 million. Exchanges for the maturing certificates amounted to \$2,398 million, leaving \$194 million to be paid in cash; and exchanges for the maturing notes amounted to \$3,297 million, leaving \$238 million to be paid in cash.

Treasury Bills Retired and Refunded

Treasury bills maturing in November totaled \$3.6 billion, and the amount refunded totaled \$3.4 billion. The first two issues were refunded in full. The third and fourth issues were \$100 million less than the respective amounts maturing. The average rates of discount on the four November offerings, beginning with that dated November 4, were, in chronological order, 1.129 percent, 1.138 percent, 1.141 percent, and 1.147 percent.

Note: Historical details of Treasury market financing operations are shown in the tables on "Offerings" and "Disposition", respectively, of marketable issues of

bonds, notes, and certificates of indebtedness, and the table "Offerings of Treasury Bills", in this issue of the "Treasury Bulletin".

TREASURY CASH INCOME AND OUTGO

The present series of data on Treasury cash income and outgo was first published in the September 1947 issue of the "Treasury Bulletin". The nature of the changes from the preceding series was explained in an

accompanying note. Actual figures in these tables are based on the Daily Treasury Statement. Estimates are based on the review of the 1949 Budget released August 15, 1948.

1/ Includes transfer of \$3,000 million in June 1948 from General Fund to Foreign Economic Cooperation Trust Fund, expenditures from which are shown in Table 4 as cash expenditures of trust accounts in fiscal 1949.

2/ See footnote 3 to Table 5, following.

3/ Interest payments to wholly owned Government corporations are not deducted because they are treated as negative expenditures when received by corporations; hence payment and receipts offset each other.

4/ Budget expenditures involving the issuance of Federal securities are treated as noncash at the time of original payment and as cash expenditures at the time of redemption. The figures shown are net issuance, or net redemption (-).

^{1/} Original call and maturity dates are used.^{2/} Prior to the refunding operations of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege of exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated

portion for cash retirement with the remainder covered by an offering of an exchange security.

^{3/} Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called securities would be presented for cash redemption.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31, and October 1945, pages A-4 and A-5. Sales and redemptions data by States are published at the end of each calendar and each fiscal year after June 30, 1947. Sales by denominations are also published semiannually after December 31, 1947.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of Series G outstanding are quoted at par. Matured bonds which have been redeemed are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to June 1947, it was possible to distribute by series all sales re-

ported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and small amounts also of unclassified F and G redemptions, beginning with June 1947.

3/ Not calculated for matured series.

n.a. Not available.

TREASURY SAVINGS NOTES

Treasury savings notes (originally designated tax savings notes) have been issued in four series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; Series C from September 14, 1942, through August 31, 1948; and Series D on continuous sale beginning September 1, 1948. Details concerning terms and conditions for purchase and redemption, and investment yields of Series D notes will be found on page A-1 of the October 1948 "Treasury Bulletin". For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946,

pages 42 and 43. Similar information concerning Series C notes will be found in the "Treasury Bulletin" for October 1945, pages A-4 and A-5.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock

Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

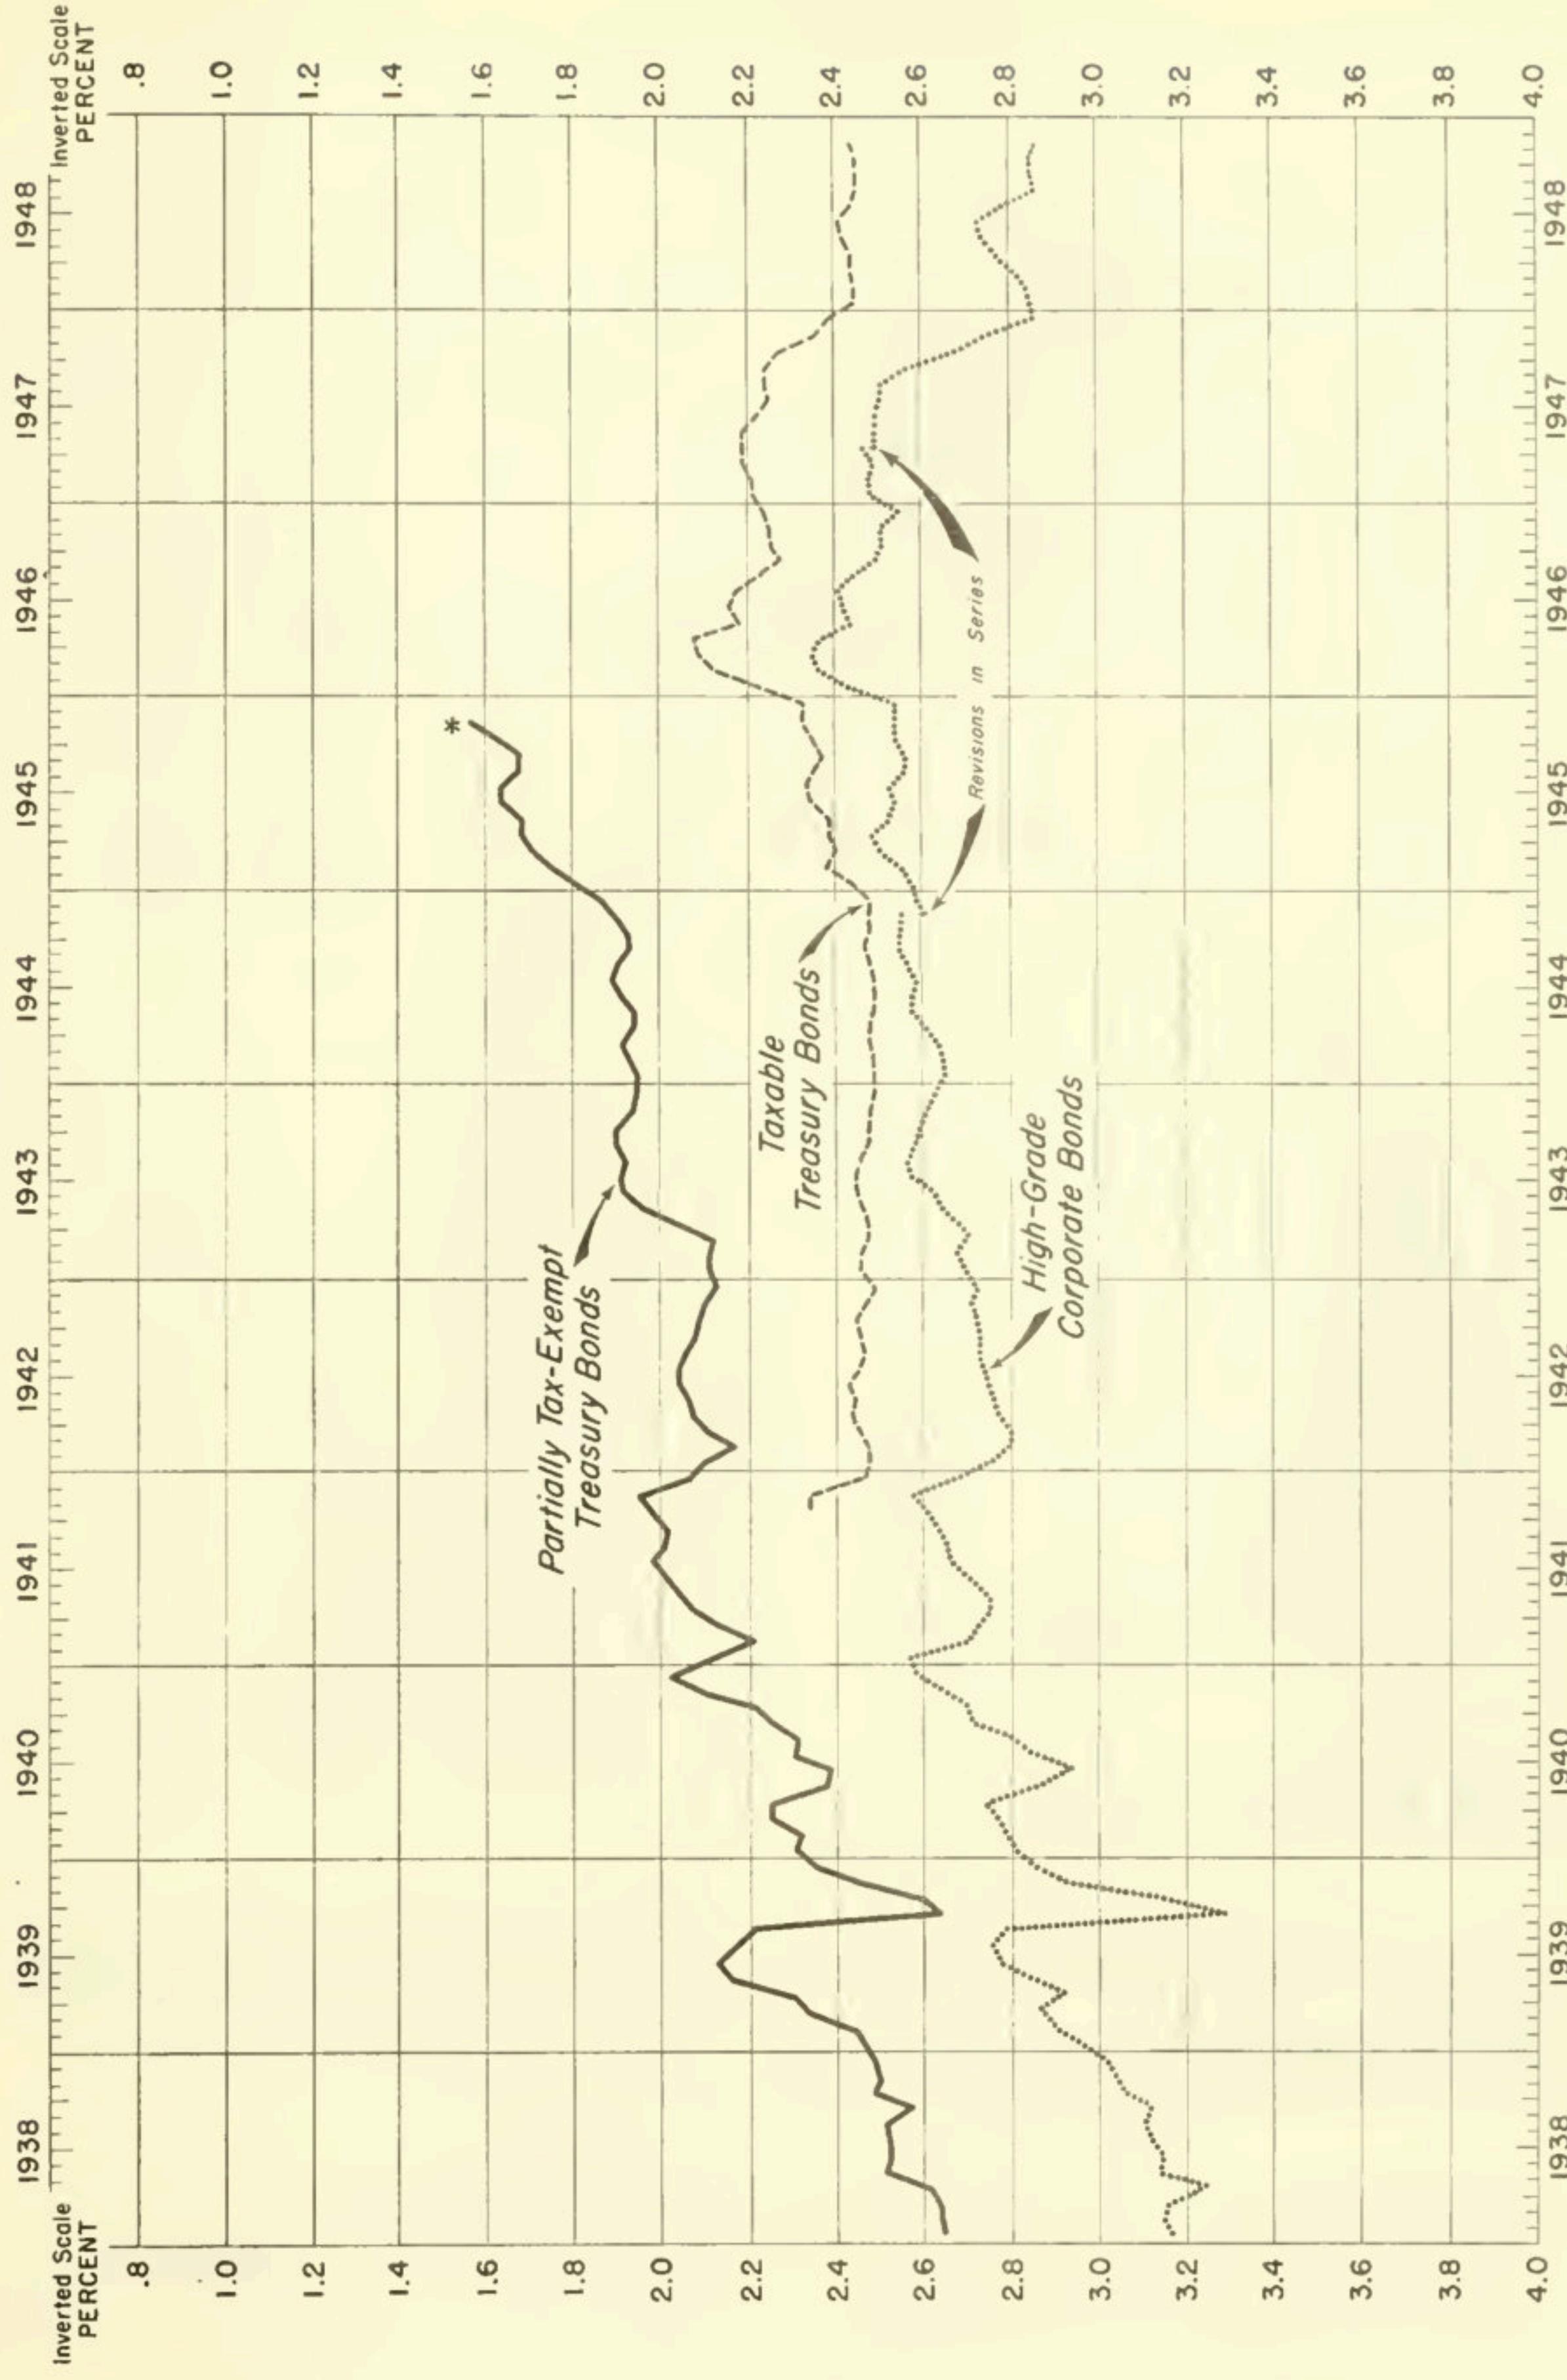

1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin". The partially tax-exempt series was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

2/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

3/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

4/ Market closed.

CAPITAL MOVEMENTS

Information relating to capital movements between the United States and foreign countries is presented in four sections. Section I contains the principal types of data on capital movements by years beginning with 1935, and currently by months. Each type of data is then broken down into its chief components in the same chronological detail.

Section II supplies a geographic breakdown by principal countries for recent months. The total net capital movement is given first and then the principal categories are shown separately. In addition, at this point, the total outstanding claims on and liabilities to foreign countries are each presented.

Section III presents details with respect to capital movements and short-term claims and liabilities as of the latest month for which the data are available.

Section IV contains data for recent months on outstanding contracts of banks for forward purchases and sales of foreign exchange.

The data in these four sections are based on reports filed each month by banks, bankers, and brokers throughout the United States. The reports are collected, checked, and tabulated by the twelve Federal Reserve Banks. The totals are then forwarded to the Treasury Department for consolidation and publication.

Publication of detailed figures on capital movements was discontinued between the March 1942 and the November 1945 issues of the "Treasury Bulletin", but data omitted during that period were supplied in the November 1945 issue and supplement.

Beginning with the December 1948 issue, publication of the data on capital movements was advanced two months by the use of preliminary reports. A comparison of preliminary and final data for past months indicates a difference of a maximum of one percent in the grand totale. Somewhat more significant changes in particular categories for individual countries may be necessary when the final reports are published, normally two months after the preliminary data.
