Profile of the Economy

[Source: Office of Economic Policy, Office of Financial Analysis]

Real gross domestic product

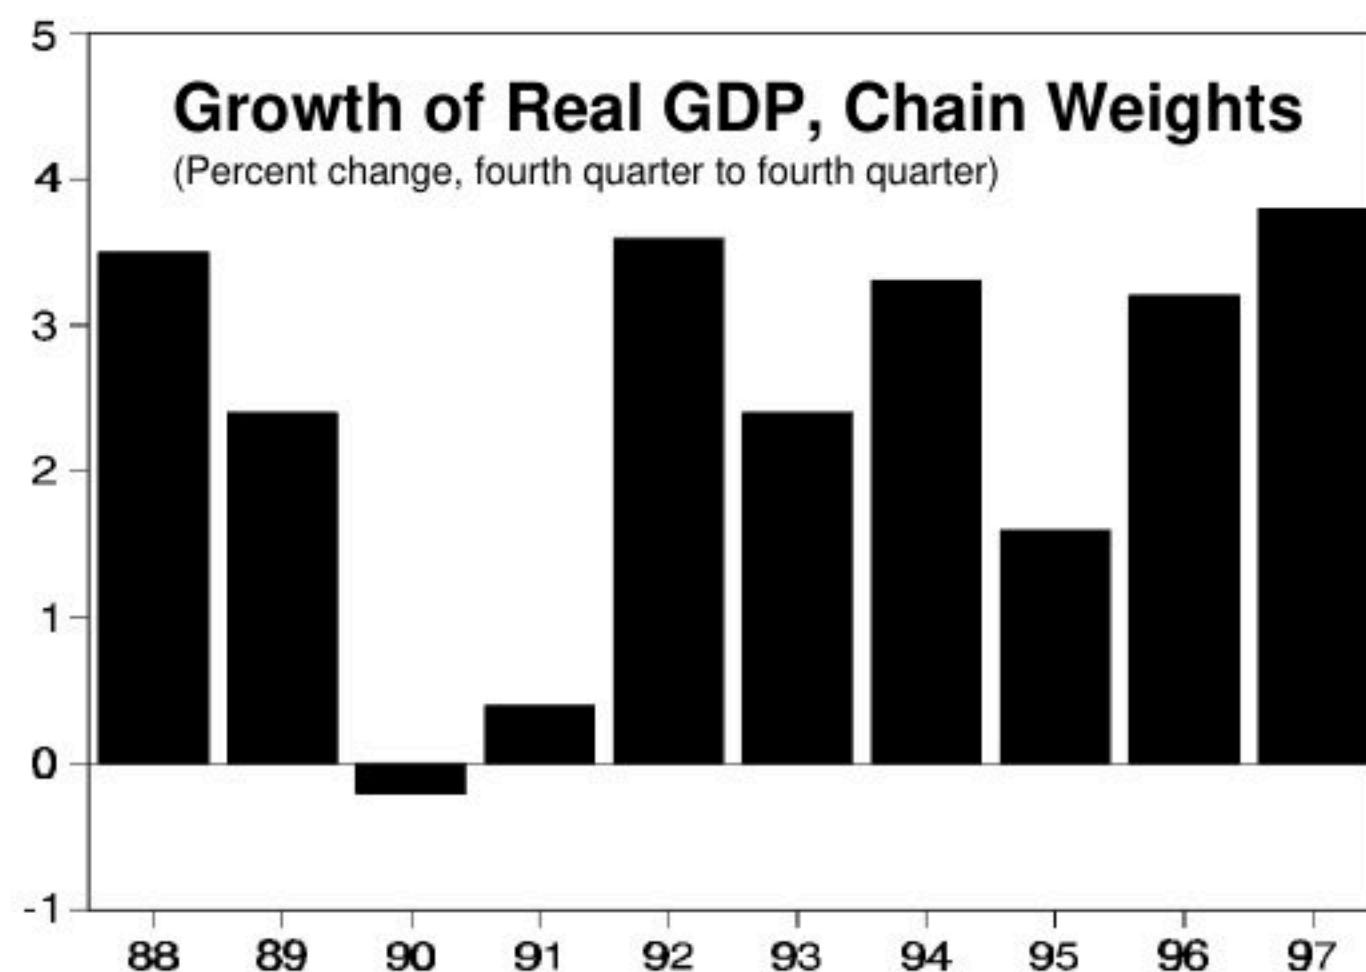

Growth in real GDP accelerated to a 3.9 percent annual rate in the fourth-quarter of 1997, capping a very strong year for the U.S. economy. Fourth-quarter growth exceeded the previous quarter's 3.1 percent pace and followed advances of 4.9 percent and 3.3 percent in the first and second quarters, respectively. The robust performance this year brought growth over the four quarters of the year to 3.8 percent, the largest such gain since 1987.

A speed up in inventory accumulation helped boost fourth-quarter growth after holding it down in the third quarter. In contrast, consumer spending slowed after posting a large 5.6 percent gain in the third quarter. The other major negative factor in the fourth quarter was a 3.5 percent decline in real business fixed investment, the first decline since 1991. Investment in equipment fell back after very strong gains of over 20 percent in each of the two previous quarters and investment in structures decreased at a 4.3 percent rate.

The broad measures of inflation carried in the national income accounts were very tame in the fourth quarter. The chain weighted GDP price index and the gross domestic purchases index (which subtracts exports and adds imports to get a measure of prices paid by U.S. residents) both rose at a 1.4 percent pace. Over the four quarters of 1997, the chain weighted GDP price index rose by 1.8 percent while the domestic purchases index increased by 1.4 percent, the smallest annual increases for both of these measures in more than three decades.

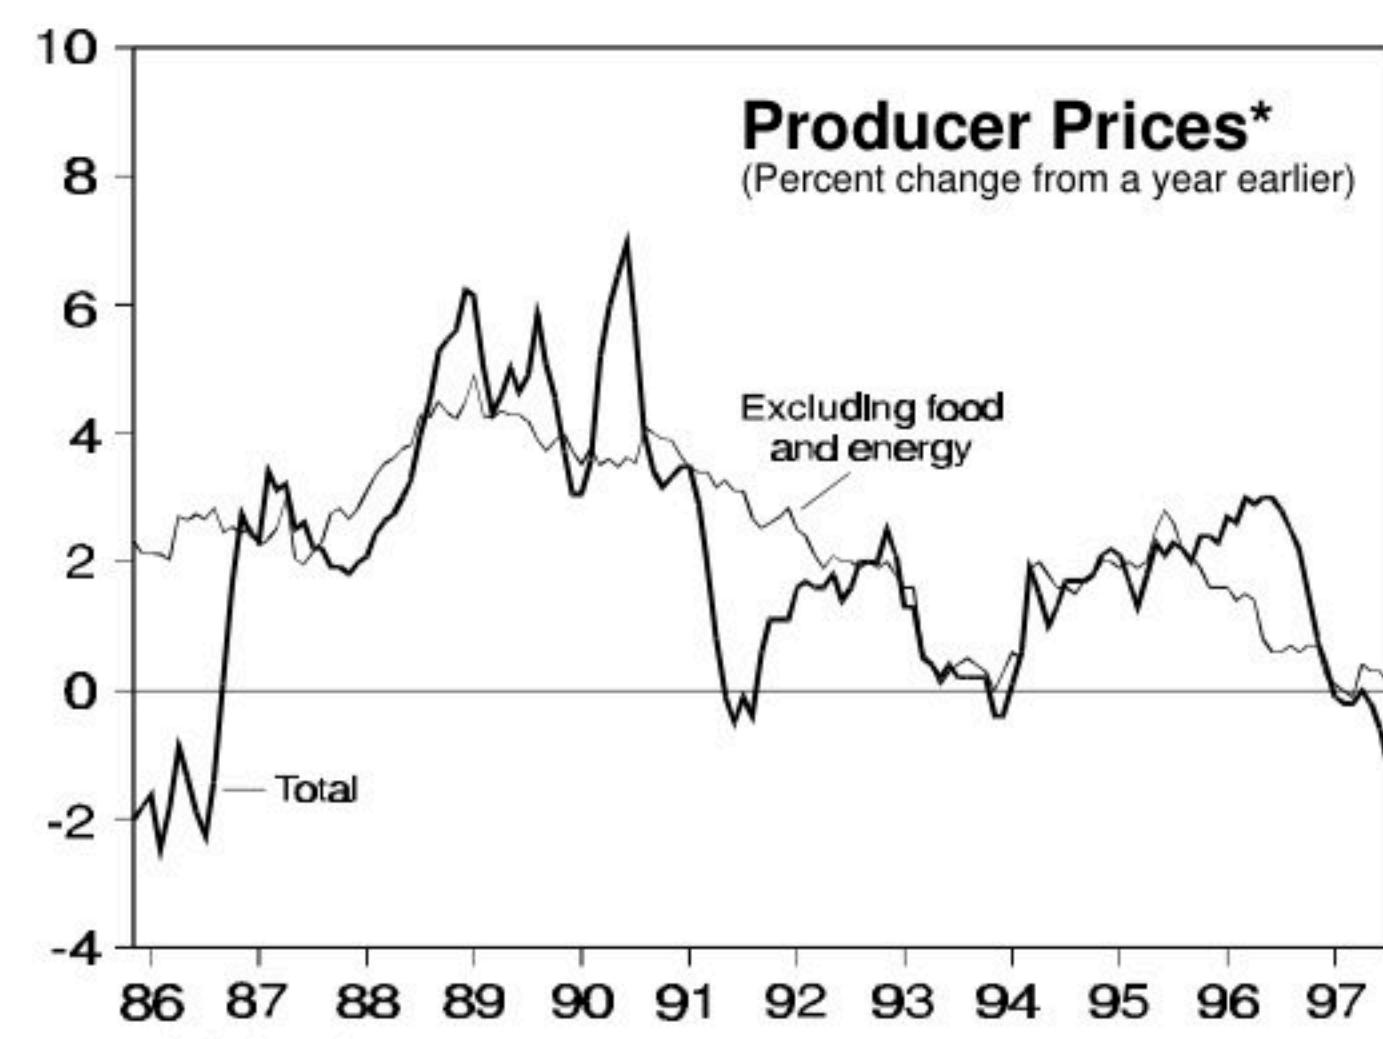

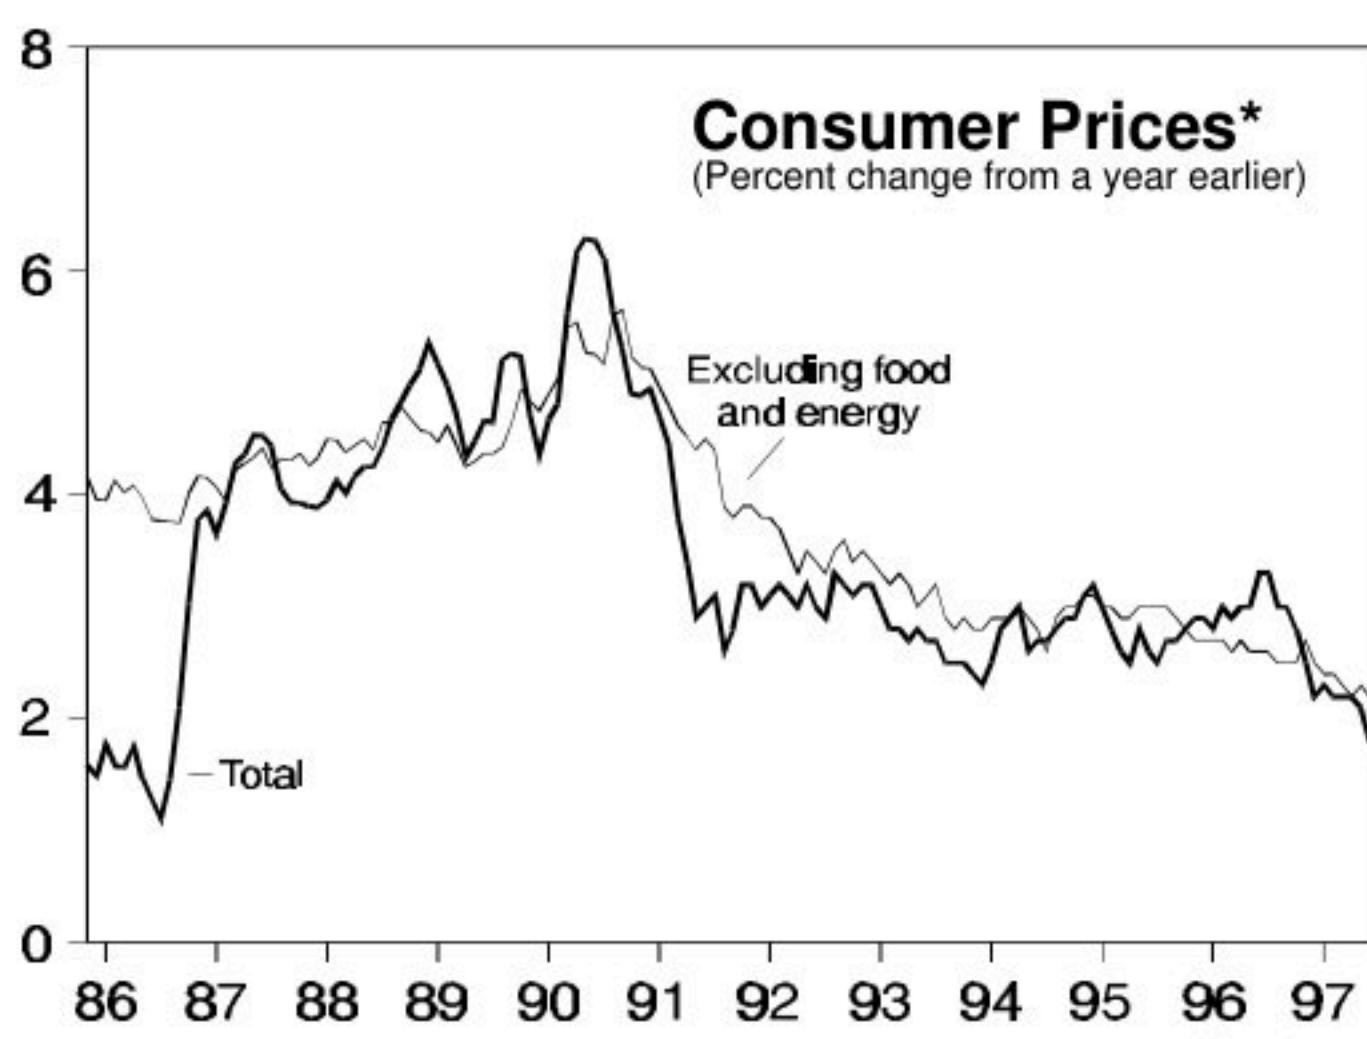

Inflation

Inflation and cost readings were very subdued in 1997. A sharp decline in energy prices and an easing in food prices were

important factors in keeping inflation contained. However, even "core" inflation, which excludes the volatile food and energy components, was well behaved and labor costs remained low despite rising wages.

For the entire year, the consumer price index (CPI) rose by only 1.7 percent, well below the 3.3 percent advance posted in 1996. This was the smallest increase since 1986, when a steep drop in energy prices held growth in the CPI to just 1.1 percent. Much of the deceleration was due to food and energy prices, but a widespread deceleration in other consumer prices and a slowdown in the growth of medical care costs also helped restrain the index in 1997. The core CPI advanced by 2.2 percent—the smallest increase since 1965 and well below the pace of the last several years.

*Year tick marks correspond with June data.

Declining food and energy prices at the producer level caused finished goods prices to fall in 9 out of 12 months of 1997, and led to a retreat in the producer price index. For the year as a whole, the index was down 1.2 percent after rising 2.8 percent in 1996. On a core basis, finished goods prices rose a scant 0.1 percent, the smallest annual increase on record for this series, which began in 1974.

The cost of compensating labor, which tends to increase when labor markets are tight, remained moderate in 1997. Wages started to rise but productivity growth more than offset gains in hourly compensation, leaving unit labor costs up only 1.8 percent in 1997 compared with gains of 2 percent or more in each of the past 4 years. The employment cost index climbed 3.3 percent over the 12 months ending in December, above the 2.9 percent increase posted over the same period in 1996 and the largest advance in 4 years. An increase in wage and salary costs was offset by a slowdown in growth of benefit costs.

Real disposable personal income and consumer spending

Real disposable (after-tax) personal income increased at a healthy 4.7 percent annual rate in the fourth quarter, the largest quarterly gain in 3 years. Growth during the entire year totaled 3.7 percent, up from 2 percent in 1996 and the highest in 5 years. Real income in 1997 was boosted by rapid growth in wages and salaries due to the expanding economy and rising wage rates. Real wages and salaries rose at a sharp 7.5 percent annual rate in the fourth quarter and by 5.5 percent over the four quarters of the year, the fastest yearly increase since 1984. (Personal income also includes such items as transfer payments, proprietors income, dividends and interest, but does not include capital gains.)

Real consumer spending slowed to a 3.2 percent annual rate increase in the final quarter of 1997 after soaring 5.6 percent in the previous quarter. A surge in motor vehicle purchases fueled much of the strong growth in third-quarter spending and this moderated in the fourth quarter. For the year, spending advanced by 3.8 percent, faster than the 2.7 percent increase recorded in 1996.

As income growth outpaced spending in the fourth quarter, the share of after-tax income devoted to personal saving rose to 3.9 percent from a very low 3.5 percent in the third quarter. The personal saving rate averaged only 3.8 percent for the year, down from 4.2 percent in 1996 and the lowest since 1939. This low rate may reflect increased net worth associated with rising stock prices, reducing the need for households to save out of current income.

Industrial production and capacity utilization

Industrial production in manufacturing, mining, and utilities was flat in January, pulled down by a sharp decline in utilities output because of unusually warm weather. Production grew 5.8 percent during the 12 months of 1997, compared with 4.7 percent during 1996 and 2.3 percent during 1995.

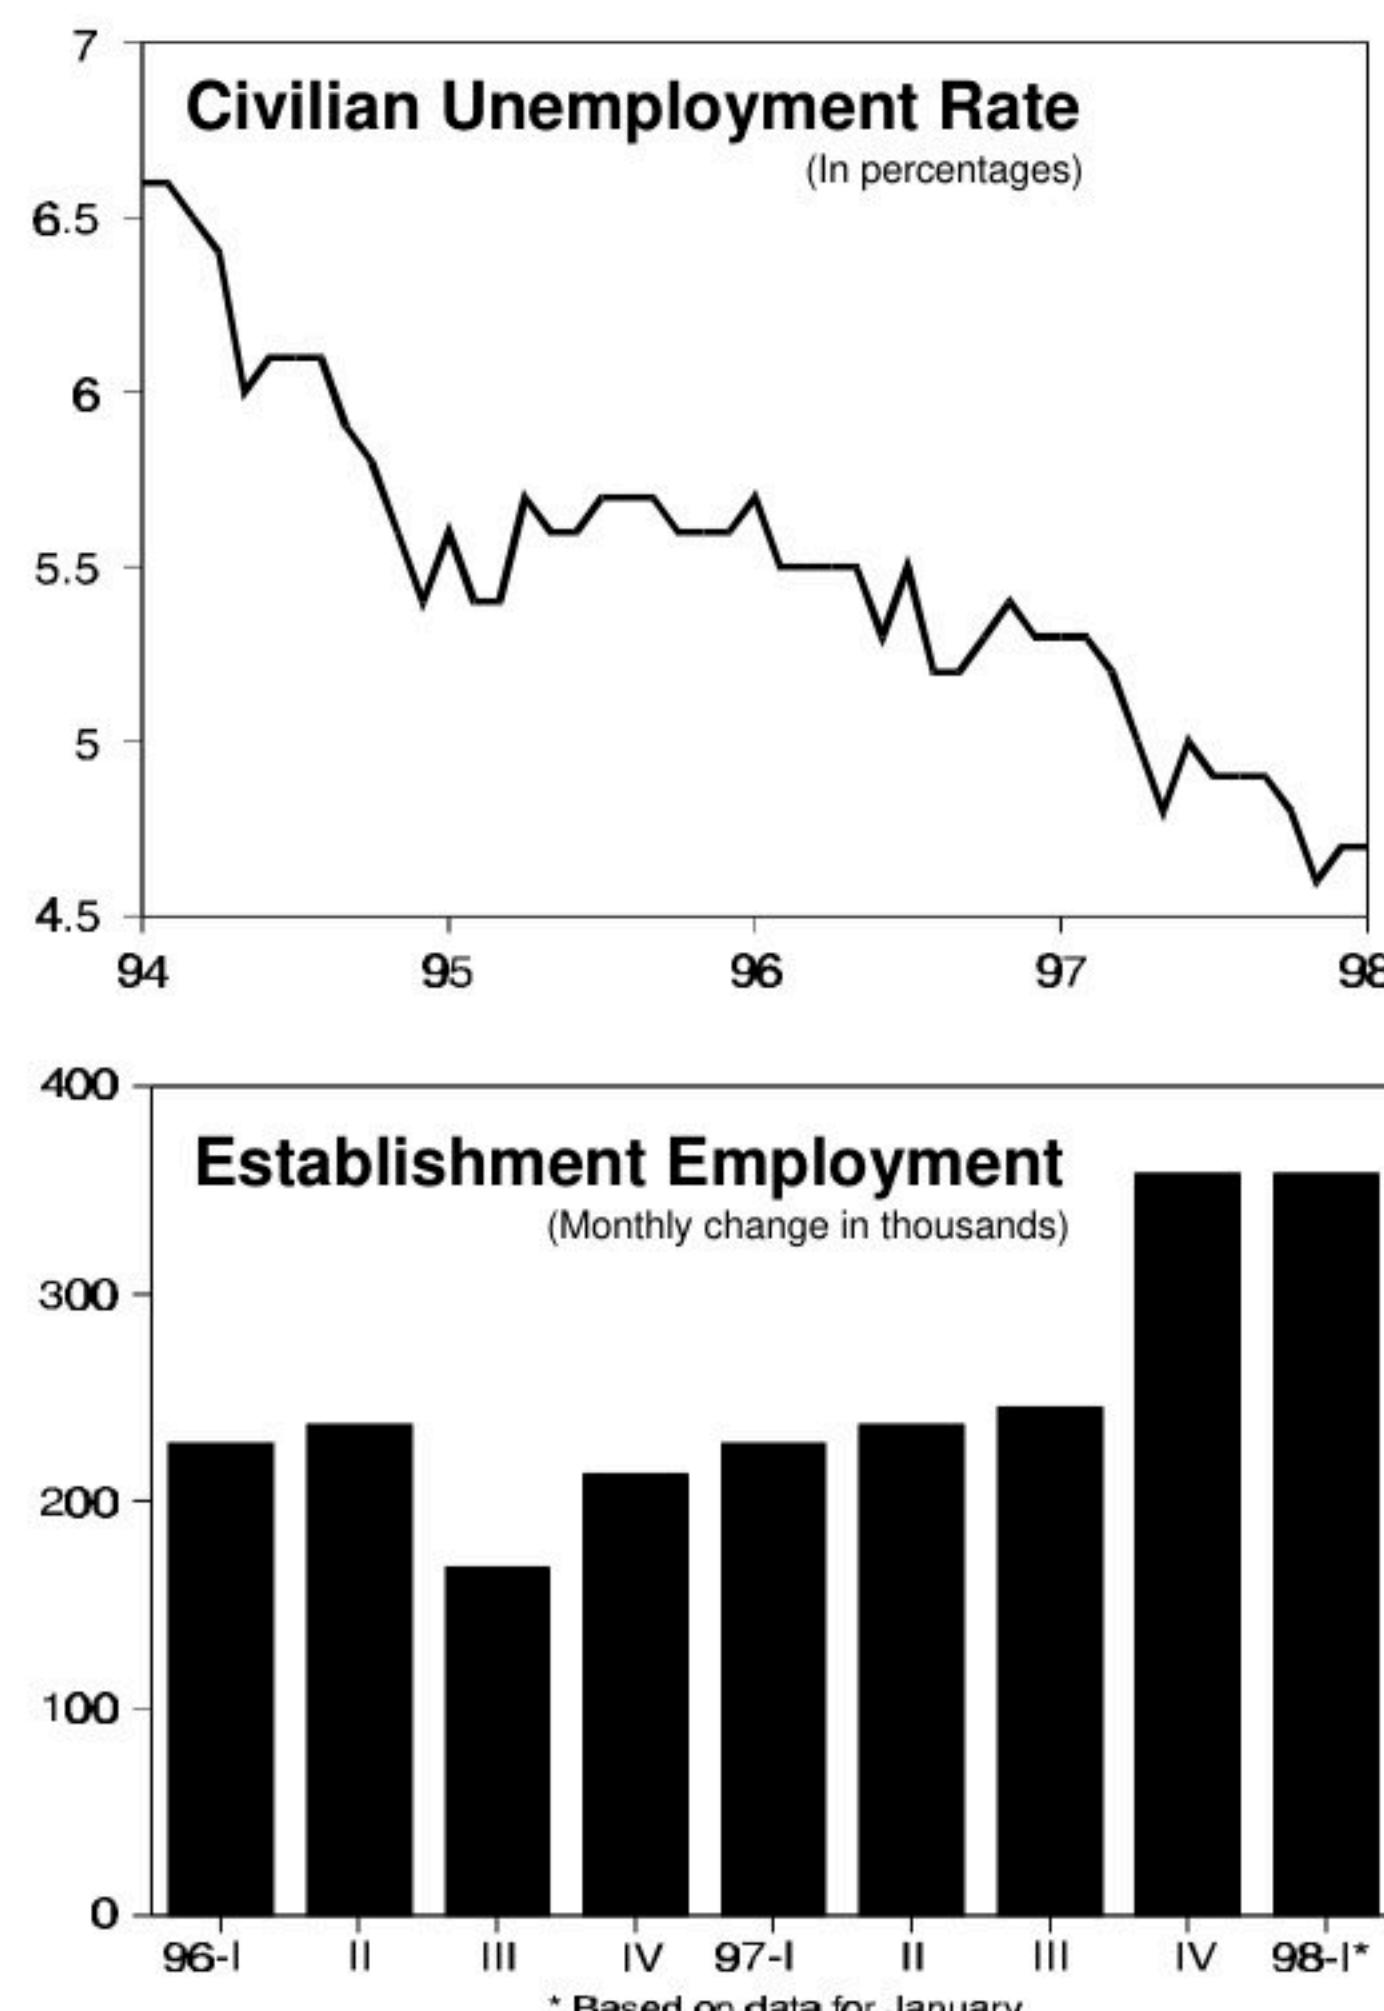

Manufacturing output, which accounts for about 86 percent of total industrial production, was up 0.3 percent in January, and rose at a big 6.3 percent rate last year. Manufacturing growth in 1997 was spurred by huge advances in computers and office equipment and semiconductors. Production of motor vehicles and parts also increased significantly last year.

The industrial capacity utilization rate fell to 83 percent in January from 83.3 percent in December. The utilization rate is currently about 1-1/2 percentage points below the 84.6 percent reached at the beginning of 1995, the peak for the current business cycle expansion, but it remains above its long-term average of 82.1 percent.

Employment and unemployment

Labor markets remained very strong at the start of the new year. Job growth maintained the rapid pace of the fourth quarter and the unemployment rate has held at levels not seen since 1973.

Increases in jobs on nonfarm payrolls accelerated over the course of last year, averaging 358,000 per month in the final 3 months of 1997. This was much faster than the average 237,000 pace over the first 9 months of last year and above the 212,000 per month averaged in 1996. Growth in January extended the rapid fourth-quarter pace, with payroll employment increasing

by another 358,000. The January gain was widespread, including continued increases in construction and manufacturing jobs.

The unemployment rate was unchanged at 4.7 percent in January and was near its lowest in 24 years. Labor force participation has been rising and the share of the working-age population that is employed increased to a new peak of 64.2 percent in January. These indicators show that the economy continues to operate at a very high level of labor utilization.

Average hourly earnings of production and other nonsupervisory workers rose to \$12.51 in January. Growth in hourly wages over the past 12 months was 3.8 percent in nominal terms. Slow growth in consumer prices last year contributed to an acceleration in growth of earnings in real terms, which rose by 2.1 percent over the year ending December 1997 compared with 0.7 percent over the year ending December 1996.

Nonfarm productivity and unit labor costs

Nonfarm business productivity (real output per hour worked) rose by 2.2 percent during the four quarters of 1997, following a 1.7 percent increase during all of 1996. These results exceeded the long-term trend growth rate of 1.1 percent per year, and they represent a marked improvement over the prior 3 years, when productivity was almost flat.

Hourly compensation costs in the nonfarm business sector rose by 4.1 percent during all of 1997. Labor costs per unit of output in the nonfarm business sector, which combine the impact of growth of compensation with that of productivity, were up at a 1.8 percent rate during the four quarters of 1997, compared to an increase of 2.2 percent during all of 1996. The 1997 rate of advance suggests that inflationary pressures remain contained.

Productivity in manufacturing grew at a 4.8 percent rate during all of 1997, after a 4.4 percent increase during 1996. Unit labor costs in manufacturing declined by 0.7 percent during 1997, following a 1.3 percent decline during 1996.

Current account balance

The current account is a summary of U.S. international transactions, measuring trade in goods and services as well as the flow of investment income on assets. On an annual basis, the current account has been in deficit since the early 1980's.

The current account deficit was roughly \$40 billion in each of the first three quarters of 1997, an annual rate of \$160 billion. This represents a substantial widening from a recent low of \$6 billion in 1991. The faster pace of U.S. economic growth since then compared with that of our major trading partners has brought in imports at a more rapid rate than exports. In addition, what had been a positive balance on investment income shifted to negative in 1997 as the inflow of capital into the United States boosted payments of earnings and interest to foreigners.

The current account deficit so far in 1997, though large, is still \$8 billion below the all-time peak deficit in 1987. The deficit relative to GDP has improved, dropping from 3.6 per-

cent as a share of GDP in 1987 to about 2.2 percent in the first three quarters of 1997.

The widening deficit in 1997 mainly reflected the swing from surplus to deficit on investment income, primarily interest payments on the rapidly growing foreign holdings of U. S. Treasury securities. The balance on trade in goods also deteriorated in 1997 but the surplus in services improved.

Exchange rate of the dollar

The appreciation of the dollar, which began in the middle of 1995, accelerated in 1997 and continued through early 1998. Based on the Federal Reserve Board's trade-weighted index of the dollar against the currencies of other G-10 industrialized nations, the dollar rose by 11 percent over the course of 1997, more than the 4.9 percent increase recorded in 1996. In January 1998, the dollar rose a further 1.4 percent, reaching its highest mark on this basis since 1987 but holding well below the peak recorded in 1985.

Among the G-10 currencies, the dollar's appreciation has been greatest against the yen and the deutschemark, although the pattern has been erratic recently. Since the dollar's recent low in April 1995, the dollar appreciated by a total of 50 percent through the end of 1997 against the yen and by 29 percent against the deutschemark. In the first month of 1998, the dollar dipped back against the yen but appreciated slightly further against the deutschemark.

Financial crises in several newly industrialized Asian countries in 1997 led in some cases to currency devaluation, raising the dollar's value against those currencies. One result was to make imports from those countries cheaper in dollar terms, a factor that contributed to the low U.S. inflation performance last year. Another result was to raise the relative price of U.S. exports, which is expected to act as a drag on U.S. export growth in 1998.

Interest rates

Short-term market interest rates have been somewhat volatile in the fourth quarter and so far in 1998. After dipping to 4.9 percent in late September and early October, the rate on the 3-month bill moved up to 5.3 percent by the end of December. Since then it has dipped back again, to about 5.1 percent in January.

The Federal Reserve Board has not altered monetary policy since raising the Federal funds rate target by one-quarter of a point in March 1997, to 5.50 percent. The discount rate was left unchanged at 5 percent, where it has been since January 1996. At recent meetings the Board has decided to continue to leave monetary policy unchanged, partly because of the uncertainties surrounding the potential effects on the U.S. economy of the Asian financial crisis.

Long-term interest rates have been falling since last spring. The yield on the 30-year Treasury bond declined from over 7 percent in April 1997 to 5.8 percent by January. Mortgage rates have followed suit, falling from above 8 percent in April for a conventional 30-year fixed-rate loan to near 7 percent recently. These low rates have spurred a new wave of mortgage refinancings and have helped stimulate further growth in the housing market.

Net national saving and investment

Net national saving, which excludes depreciation to replace worn-out or obsolete equipment and structures used in production, rose to 7.2 percent of net national product (NNP) in the first three quarters of 1997 from 6.4 percent in 1996 and a weak 3.4 percent in 1992. Despite the progress, net saving remains well below the 12.1 percent of NNP averaged in the 1950's and 1960's.

Recent improvement is almost entirely the result of the significant narrowing of the Federal deficit, which has cut Government dissaving from a large 4.7 percent of NNP in 1992 to zero in 1997. Private saving (of households and businesses) has declined over that period, as increased wealth generated by a rising stock market appears to have reduced households' desire to save. Gains in corporate profits have led to somewhat higher business saving.

Net domestic investment equaled 8.3 percent of NNP in the three quarters of 1997. This was up from a low 4.9 percent in 1991 and was the first time since the late 1980's that domestic investment has topped 8 percent. About one-quarter of investment in 1997 was financed by foreign inflows, which were equivalent to 2.2 percent of NNP. U.S. sources provided investment equal to 6.1 percent of NNP, only about half as much as averaged in the 1950's and 1960's.

Housing

Housing activity was very strong in 1997. Robust job and income growth, high levels of consumer confidence and relatively low mortgage rates supported the housing sector throughout the year and suggest continued upward momentum in the housing market in the months ahead.

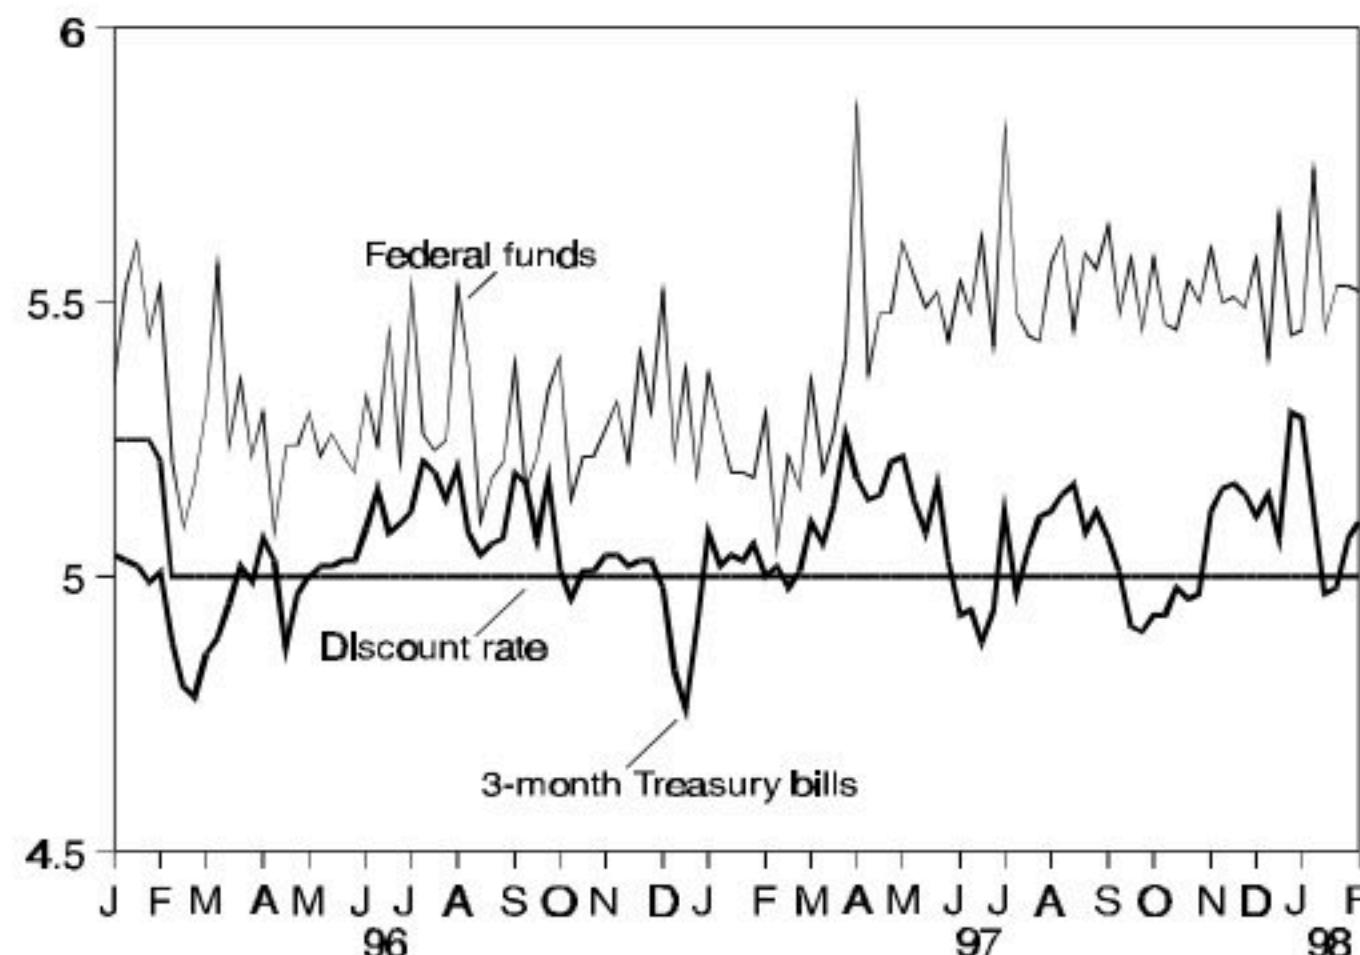

Starts of new homes totaled 1.476 million units in 1997, just slightly under the 1996 total, which was the highest since 1988. The high level of starts in 1997 was supported by the market for multi-family homes. In contrast, starts of new single-family homes were 2.4 percent lower than the previous year.

Sales of single-family homes outpaced new single-family starts, leaving the inventory of unsold new homes very tight at

the end of 1997. For the year as a whole, sales of new homes climbed to 800,000 units, well above the 1996 total of 757,000 and the highest since 1978. At 4.21 million units, resales of existing homes were also very strong last year, setting a new record for this series which began in 1968.

The rapid growth in home sales pushed the home ownership rate to its highest level since data were first collected in 1965, reaching 65.7 percent for the year.

Short-term Interest Rates

*Average for week ending Friday; Federal funds ending Wednesday.

Federal budget

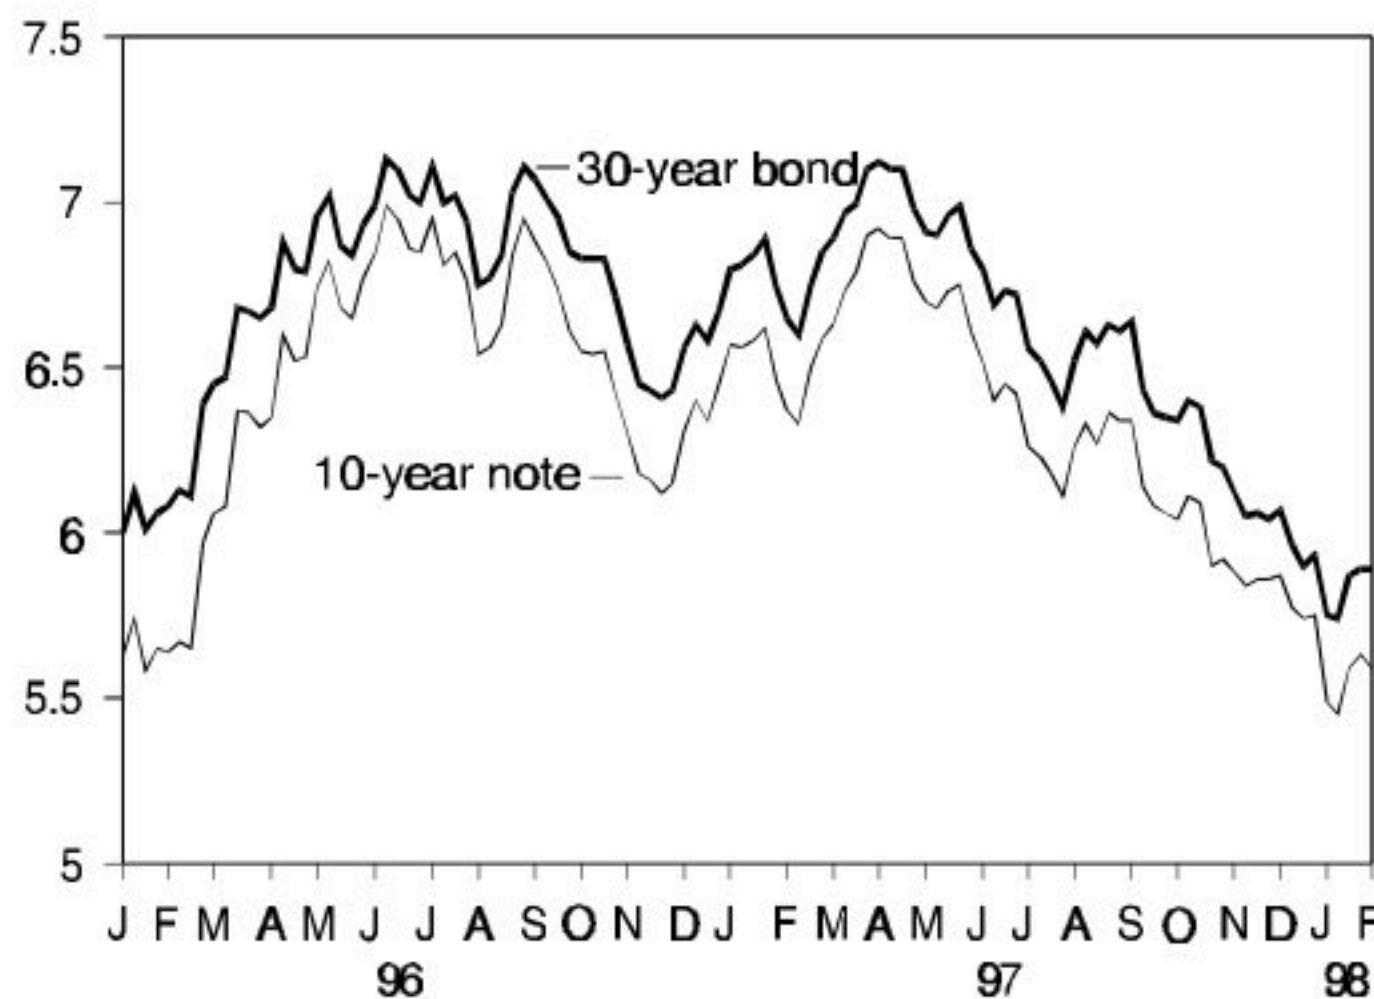

The Federal budget deficit is expected to fall to a low \$10 billion in fiscal 1998 and to show a surplus of \$9.5 billion in fiscal 1999. That would be the first Federal budget surplus since 1969 and only the ninth since World War II. Surpluses are projected for each year thereafter through the forecast period ending in 2003.

Strong economic growth and passage of deficit reduction programs have placed the deficit on its downward course since 1992. Since the all-time high of \$290 billion in that year, the deficit fell to \$22 billion in fiscal 1997. The large 1992 deficit represented 4.7 percent of GDP, while the \$10 billion deficit projected for the current fiscal year would represent just 0.1 percent of GDP. Surpluses are expected to grow from the \$9.5 billion projected in fiscal 1999 to about \$83 billion in fiscal 2003.

Growth in receipts has been very strong over the past 4 years, boosted by expansion in jobs and income, rising corporate profits, and stock market gains. In fiscal 1997, receipts rose by 8.7 percent, with an especially notable jump for nonwithheld individual income taxes, up more than 16 percent over the year.

Growth in Federal spending was held to a moderate 2.6 percent in fiscal 1997. Slower growth in outlays was aided by large spectrum auction proceeds and asset sales in the deposit insurance account, both of which are treated as negative outlays in budget accounting. Excluding these components, outlay growth was about 4 percent in fiscal 1997, still much lower than the growth in receipts.

Long-term Interest Rates

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow *obligations* to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash--*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from

governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts which include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions--payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions--payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions--payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 U.S.C. 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays, and deficit of the Government.

Tables **FFO-1**, **FFO-2**, and **FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the Federal Reserve banks. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the

"Monthly Treasury Statement of Receipts and Outlays of the United States Government."

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.

- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.

- Table **FFO-3** details on- and off-budget outlays by agency.

- Table **FFO-4** summarizes internal revenue collections by States and other areas and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax

liability years because they consist of prepayments (i.e., estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), of payments made with tax returns, and of subsequent payments made after tax returns are due or are filed (i.e., payments with delinquent returns or on delinquent accounts).

It is important to note that these data do not necessarily reflect the Federal tax burden of individual States. Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the State where such a corporation reported its taxes from a principal office rather than other States where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one State and work in another.

Budget Results and Financing of the U.S. Government and Fourth-Quarter Receipts by Source

Fourth-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the fourth quarter of fiscal 1997 supplements fiscal data reported in the December issue of the "Treasury Bulletin." At the time of that issue's release, not enough data were available to analyze adequately collections for the quarter.

Individual income taxes—Individual income tax receipts were \$177.7 billion for the fourth quarter of fiscal 1997. This is an increase of \$13.1 billion over the comparable prior year quarter. Withheld receipts increased by \$8.0 billion and non-withheld receipts increased by \$6.2 billion during this period. Refunds increased by \$1.0 billion over the comparable fiscal 1996 quarter. There was an increase of \$1.4 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal 1996.

Corporation income taxes—Net corporate income tax receipts were \$43.3 billion for the fourth quarter of fiscal 1997. Gross receipts were \$2.7 billion higher and refunds were \$2.5 billion higher than the comparable prior year quarter, resulting in net increase of \$0.2 billion.

Employment taxes and contributions—Employment taxes and contributions receipts for the July-September 1997 quarter were \$127.0 billion, an increase of \$10.7 billion over the comparable prior year quarter. Receipts to the Old-Age Survivors Insurance and Hospital Insurance trust funds increased \$9.0 billion and \$1.5 billion, respectively. Receipts to the Disability Insurance and Hospital Insurance trust funds increased negligibly. There was a -\$0.3 billion accounting adjustment for prior years' employment tax liabilities made in

the fourth quarter of fiscal 1997, while there was a \$1.1 billion adjustment made in the fourth quarter of fiscal 1996.

Unemployment insurance—Unemployment insurance receipts for the fourth quarter of fiscal 1997 were \$6.3 billion, which is a \$0.2 billion increase over the comparable quarter of fiscal 1996. State taxes deposited in the U.S. Treasury increased by \$0.2 billion. Federal Unemployment Tax Act (FUTA) receipts and Railroad Unemployment tax receipts increased negligibly from the comparable quarter of fiscal 1996.

Contributions for other insurance and retirement—Contributions for other retirement were \$1.1 billion for the fourth quarter of fiscal 1997. There was a negligible decrease over receipts from the comparable quarter of fiscal 1996. The growth in contributions will remain flat over the next few years as the number of employees covered by the Federal employees' retirement system (FERS) grows slowly relative to those covered under the civil service retirement system (CSRS).

Excise taxes—Net excise tax receipts for the fourth quarter of fiscal 1997 were \$15.7 billion, an increase of \$1.8 billion over the comparable prior year quarter. Total excise tax refunds for the quarter were \$0.8 billion, a decrease of \$0.3 billion over the comparable prior year quarter.

Estate and gift taxes—Net estate and gift tax receipts were \$5.1 billion for the July through September quarter of fiscal 1997. These receipts are a decrease of \$1.2 billion over the previous quarter and an increase of \$0.5 billion over the same quarter in fiscal 1996.

Budget Results and Financing of the U.S. Government and Fourth-Quarter Receipts by Source, con.

Customs duties—Customs receipts net of refunds were \$5.2 billion for the fourth quarter of fiscal 1997. This is approximately the same amount as the customs duties received in the Treasury from the comparable prior year quarter.

Miscellaneous receipts—Net miscellaneous receipts for the fourth quarter of fiscal 1997 were \$6.1 billion, a decrease of \$0.5 billion over the comparable prior year quarter. Deposits of earnings by Federal Reserve banks decreased by \$0.9 billion over the comparable prior year quarter. ◇

INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Treasury's operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include the Daily Balance Wire received from the FRBs and branches, and electronic transfers through the Letter of Credit Payment, Fedline Payment, and Fedwire Deposit Systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147, Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax and loan accounts in interest-bearing obligations participate under the

Note Option. The program permits Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury's account at FRBs do so under the Remittance Option.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments, which the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

¹ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.

² Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

³ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan

depositories as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970, and individual estimated income taxes beginning October 1988.

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the "Treasury Bulletin" reflect the total. Further detailed information is published in the "Monthly Statement of the Public Debt of the United States." Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount are also listed by total Federal securities, securities held by Government accounts, and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)

- Table **FD-2** categorizes by type interest-bearing marketable and nonmarketable Treasury securities. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities--that is, unredeemed securities that have matured and are no longer accruing interest. Because the Federal Financing Bank is under the supervision of Treasury, its securities are held by a U.S. Government account.

- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in *par value* special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.

- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the

"Monthly Treasury Statement of Receipts and Outlays of the United States Government.")

- Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

The average length hit a low of 2 years 5 months in December 1975. The length then increased gradually until it reached a high of 6 years, 4 months in May 1991. Since then, the average length decreased. For example, during most of 1996 the average length was at 5 years, 3 months.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 percent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity for Treasury bills, notes, and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the Federal Reserve banks.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling. Changes in the non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, which can be redeemed on the next business day.

- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

¹ Beginning September 1976, the maturity distribution and average length was calculated on the interest-bearing marketable debt privately held. Inflation-indexed notes (first offered in 1997) are excluded from the average length calculation. Published data was changed for the

end of the fiscal years back through 1967.

² Consists of guaranteed debt issued by the Federal Housing Administration.

CHARTS FD-A.--Average Length of Privately Held Marketable Debt

[Charts are plotted from figures provided by the Office of Market Finance. See Table FD-5.]

INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of the Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each marketable security is listed in the "Monthly Statement of the Public Debt of the United States." The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities, current bills, notes, and bonds.

- Table **PDO-1** provides a maturity schedule of interest-bearing marketable public debt securities other than regular weekly and 52-week bills. All unmatured Treasury notes and bonds are listed in maturity order, from earliest to latest. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks, so that the "all other investors" category includes all private holdings.
- Table **PDO-2** presents the results of weekly auctions of 13- and 26-week bills, as well as auctions of 52-week bills, which are held every 4 weeks. Treasury bills mature each Thursday. New issues of 13-week bills are *reopenings* of 26-week bills. The 26-week bill issued every fourth week to

mature on the same Thursday as an existing 52-week bill is a reopening of the existing 52-week bill. New issues of *cash management bills* are also presented. High, low, and average yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive basis.

Treasury accepts noncompetitive tenders of up to \$1 million for bills and \$5 million for notes and bonds in each auction of securities to encourage participation of individuals and smaller institutions.

- Table **PDO-3** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years. Included are: notes and bonds from table PDO-1; 52-week bills from table PDO-2, and data for cash management bills.
- Table **PDO-4** indicates the total amount of marketable securities allotted to each class of investor. The Federal Reserve banks tally into investor classes the tenders in each auction of marketable securities other than weekly auctions of 13- and 26-week bills.

TREASURY FINANCING: OCTOBER-DECEMBER

[Source: Bureau of the Public Debt, Office of Financing]

OCTOBER

Auction of 4-3/4-Year Inflation-Indexed Notes

October 1, 1997, Treasury announced it would auction \$8,000 million of 4-3/4-year 3-5/8 percent inflation-indexed notes of Series J-2002 to raise cash. This was an additional issue of notes dated July 15, 1997, due July 15, 2002, with interest payable January 15 and July 15 until maturity. Adjusted accrued interest of \$9.08969 per \$1,000, covering the period from July 15 to October 15, 1997, was payable with each accepted tender.

Tenders were received prior to 12 noon e.d.s.t. for non-competitive tenders and prior to 1 p.m. e.d.s.t. for competitive tenders on October 8, and totaled \$28,552 million, of which \$8,012 million was accepted. All competitive tenders at yields lower than 3.600 percent were accepted in full. Tenders at 3.600 percent were allotted 15 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.600 percent with an equivalent adjusted price of 100.400. The median yield was 3.580 percent, and the low yield was 3.499 percent. Noncompetitive tenders totaled \$33 million. Competitive tenders accepted from private investors totaled \$7,979 million.

In addition to the \$8,012 million of tenders accepted in the auction process, \$400 million was accepted from Federal Reserve banks for their own accounts.

The notes of Series J-2002 may be held in STRIPS form. The minimum par amount required is \$1,600,000.

Auction of 2-Year and 5-Year Notes

October 22 Treasury announced it would auction \$15,000 million of 2-year notes of Series AL-1999 and \$11,000 million of 5-year notes of Series N-2002 to refund \$29,356 million of securities maturing October 31 and to pay down about \$3,350 million.

The notes of Series AL-1999 were dated October 31, 1997, due October 31, 1999, with interest payable April 30 and October 31 until maturity. An interest rate of 5-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon e.s.t. for non-competitive tenders and prior to 1 p.m. e.s.t. for competitive tenders October 28, and totaled \$34,308 million, of which \$15,003 million was accepted. All competitive tenders at yields lower than 5.720 percent were accepted in full. Tenders at 5.720 percent were allotted 2 percent. All noncompetitive and successful competitive bidders were allotted securities at the high

TREASURY FINANCING: OCTOBER-DECEMBER, con.

yield of 5.720 percent with an equivalent price of 99.823. The median yield was 5.690 percent, and the low yield was 5.640 percent. Noncompetitive tenders totaled \$828 million. Competitive tenders accepted from private investors totaled \$14,175 million.

In addition to the \$15,003 million of tenders accepted in the auction process, \$1,280 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$502 million was accepted from Federal Reserve banks for their own accounts.

As Treasury announced on September 17, all new Treasury marketable fixed-rate notes and bonds issued on and after September 30, 1997, would be eligible for the Separate Trading of Registered Interest and Principal Securities (STRIPS) program. (Notes and bonds issued prior to September 30, 1997, that were not already eligible for the STRIPS program were not made eligible for stripping at that time.) The notes of Series AL-1999 may be held in STRIPS form. The minimum par amount required is \$320,000.

The notes of Series N-2002 were dated October 31, 1997, due October 31, 2002, with interest payable April 30 and October 31 until maturity. An interest rate of 5-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders October 29, and totaled \$24,741 million, of which \$11,003 million was accepted. All competitive tenders at yields lower than 5.830 percent were accepted in full. Tenders at 5.830 were allotted 2 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 5.830 percent with an equivalent price of 99.657. The median yield was 5.791 percent, and the low yield was 5.750 percent. Noncompetitive tenders totaled \$312 million. Competitive tenders accepted from private investors totaled \$10,691 million.

In addition to the \$11,003 million of tenders accepted in the auction process, \$350 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$365 million was accepted from Federal Reserve banks for their own accounts.

The notes of Series N-2002 may be held in STRIPS form. The minimum par amount required is \$800,000.

52-Week Bills

October 3 tenders were invited for approximately \$12,500 million of 364-day Treasury bills to be dated October 16, 1997, and to mature October 15, 1998. The issue was to refund \$14,181 million of maturing 52-week bills and to pay down about \$1,675 million. The bills were auctioned October 9. Tenders totaled \$54,235 million, of which \$12,710 million was accepted, including \$772 million of noncompetitive tenders from the public and \$1,227 million of the bills issued to Federal Reserve banks as agents for foreign and international monetary

authorities. An additional \$33 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. In addition, \$6,010 million was awarded to the Federal Reserve banks for their own accounts. The average bank discount rate was 5.20 percent.

Cash Management Bills

October 28 tenders were invited for approximately \$21,000 million of 80-day bills to be issued November 3, 1997, representing an additional amount of bills dated July 24, 1997, maturing January 22, 1998. The issue was to raise new cash. Tenders were opened October 30. They totaled \$66,320 million, of which \$21,139 million was accepted. The average bank discount rate was 5.18 percent.

NOVEMBER

November Quarterly Financing

October 29 Treasury announced it would auction \$14,000 million of 3-year notes of Series X-2000, \$11,000 million of 9-3/4-year 6-1/8 percent notes of Series D-2007, and \$10,000 million of 30-year bonds of November 2027 to refund \$26,543 million of Treasury securities maturing November 15 and to raise about \$8,450 million new cash.

The notes of Series X-2000 were dated November 15, 1997, issued November 17, 1997, due November 15, 2000, with interest payable May 15 and November 15 until maturity. An interest rate of 5-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis. Accrued interest of \$0.31768 per \$1,000, covering the period from November 15 to November 17, 1997, was payable with each accepted tender.

Tenders were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders November 4, and totaled \$34,641 million, of which \$14,014 million was accepted at yields ranging from 5.755 percent, price 99.986, up to 5.768 percent, price 99.950. Tenders at the high yield were allotted 92 percent. Noncompetitive tenders were accepted in full at the average yield, 5.762 percent, price 99.967. These totaled \$623 million. Competitive tenders accepted from private investors totaled \$13,391 million.

In addition to the \$14,014 million of tenders accepted in the auction process, \$342 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,651 million was accepted from Federal Reserve banks for their own accounts.

The notes of Series X-2000 may be held in STRIPS form. The minimum par amount required is \$800,000.

The 6-1/8 percent notes of Series D-2007 were an additional issue of notes dated August 15, 1997, due August 15, 2007, with interest payable February 15 and August 15 until maturity. Accrued interest of \$15.64538 per \$1,000, covering the period from August 15 to November 17, 1997, was payable with each accepted tender.

TREASURY FINANCING: OCTOBER-DECEMBER, con.

Tenders were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on November 5, and totaled \$26,803 million, of which \$11,003 million was accepted at yields ranging from 5.941 percent, price 101.324, up to 5.967 percent, price 101.133. Tenders at the high yield were allotted 30 percent. Noncompetitive tenders were accepted in full at the average yield, 5.955 percent, price 101.221. These totaled \$331 million. Competitive tenders accepted from private investors totaled \$10,672 million.

In addition to the \$11,003 million of tenders accepted in the auction process, \$300 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,295 million was accepted from Federal Reserve banks for their own account.

The notes of Series D-2007 may be held in STRIPS form. The minimum par amount required is \$1,600,000.

The bonds of November 2027 were dated November 15, 1997, issued November 17, 1997, due November 15, 2027, with interest payable May 15 and November 15 until maturity. An interest rate of 6-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis. Accrued interest of \$0.33840 per \$1,000, covering the period from November 15 to November 17, 1997, was payable with each accepted tender.

Tenders for the bonds were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders November 6, and totaled \$28,173 million, of which \$10,003 million was accepted at yields ranging from 6.198 percent, price 99.010, up to 6.207 percent, price 98.889. Tenders at the high yield were allotted 44 percent. Noncompetitive tenders were accepted in full at the average yield, 6.201 percent, price 98.970. These totaled \$293 million. Competitive tenders accepted from private investors totaled \$9,710 million.

In addition to the \$10,003 million of tenders accepted in the auction process, \$1,180 million was accepted from Federal Reserve banks for their own account.

The bonds of November 2027 may be held in STRIPS form. The minimum par amount required is \$1,600,000.

Auction of 2-Year and 5-Year Notes

November 19 Treasury announced it would auction \$15,000 million of 2-year notes of Series AM-1999 and \$11,000 million of 5-year notes of Series P-2002 to refund \$29,266 million of securities maturing November 30 and to pay down about \$3,275 million.

The notes of Series AM-1999 were dated November 30, 1997, issued December 1, 1997, due November 30, 1999, with interest payable May 31 and November 30 until maturity. An interest rate of 5-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis. Accrued interest of \$0.15453 per \$1,000, covering the period from November 30 to December 1, 1997, was payable with each accepted tender.

Tenders were received prior to 11 a.m. e.s.t. for noncompetitive tenders and prior to 11:30 a.m. e.s.t. for competitive tenders November 24, and totaled \$39,935 million, of which \$15,008 million was accepted. All competitive tenders at yields lower than 5.700 percent were accepted in full. Tenders at 5.700 percent were allotted 40 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 5.700 percent with an equivalent price of 99.860. The median yield was 5.680 percent, and the low yield was 5.630 percent. Noncompetitive tenders totaled \$729 million. Competitive tenders accepted from private investors totaled \$14,279 million.

In addition to the \$15,008 million of tenders accepted in the auction process, \$1,420 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$548 million was accepted from Federal Reserve banks for their own accounts.

The notes of Series AM-1999 may be held in STRIPS form. The minimum par amount required is \$320,000.

The notes of Series P-2002 were dated November 30, 1997, issued December 1, 1997, due November 30, 2002, with interest payable May 31 and November 30 until maturity. An interest rate of 5-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis. Accrued interest of \$0.15797 per \$1,000, covering the period from November 30 to December 1, 1997, was payable with each accepted tender.

Tenders were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders November 25, and totaled \$32,775 million, of which \$11,003 million was accepted. All competitive tenders at yields lower than 5.769 percent were accepted in full. Tenders at 5.769 percent were allotted 40 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 5.769 percent with an equivalent price of 99.918. The median yield was 5.760 percent, and the low yield was 5.730 percent. Noncompetitive tenders totaled \$311 million. Competitive tenders accepted from private investors totaled \$10,692 million.

In addition to the \$11,003 million of tenders accepted in the auction process, \$700 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$400 million was accepted from Federal Reserve banks for their own accounts.

The notes of Series P-2002 may be held in STRIPS form. The minimum par amount required is \$800,000.

52-Week Bills

October 31 tenders were invited for approximately \$12,000 million of 364-day Treasury bills to be dated November 13, 1997, and to mature November 12, 1998. The issue was to refund \$14,767 million of maturing 52-week bills and to pay down about \$2,775 million. The bills were auctioned November 6. Tenders totaled \$79,482 million, of which \$12,337

TREASURY FINANCING: OCTOBER-DECEMBER, con.

million was accepted, including \$713 million of noncompetitive tenders from the public and \$734 million of the bills issued to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$716 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. In addition, \$5,375 million was awarded to the Federal Reserve banks for their own accounts. The average bank discount rate was 5.14 percent.

Cash Management Bills

November 21 tenders were invited for approximately \$35,000 million of 15-day bills to be dated December 1, 1997, and to mature December 16, 1997. The issue was to raise new cash. Tenders were opened November 25. They totaled \$89,907 million, of which \$35,209 million was accepted, including \$50 million of the bills issued to Federal Reserve banks as agents for foreign and international monetary authorities. The average bank discount rate was 5.56 percent.

DECEMBER

Auction of 2-Year and 5-Year Notes

December 17 Treasury announced it would auction \$15,000 million of 2-year notes of Series AN-1999 and \$11,000 million of 5-year notes of Series Q-2002 to refund \$29,946 million of securities maturing December 31 and to pay down about \$3,950 million.

The notes of Series AN-1999 were dated December 31, 1997, due December 31, 1999, with interest payable June 30 and December 31 until maturity. An interest rate of 5-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 11 a.m. e.s.t. for noncompetitive tenders and prior to 11:30 a.m. e.s.t. for competitive tenders December 22, and totaled \$34,133 million, of which \$15,003 million was accepted. All competitive tenders at yields lower than 5.690 percent were accepted in full. Tenders at 5.690 percent were allotted 33 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 5.690 percent with an equivalent price of 99.879. The median yield was 5.670 percent, and the low yield was 5.630 percent. Noncompetitive tenders totaled \$725 million. Competitive tenders accepted from private investors totaled \$14,277 million.

In addition to the \$15,003 million of tenders accepted in the auction process, \$900 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$796 million was accepted from Federal Reserve banks for their own accounts.

The notes of Series AN-1999 may be held in STRIPS form. The minimum par amount required is \$320,000.

The notes of Series Q-2002 were dated December 31, 1997, due December 31, 2002, with interest payable June 30

and December 31 until maturity. An interest rate of 5-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders December 23, and totaled \$28,898 million, of which \$11,002 million was accepted. All competitive tenders at yields lower than 5.685 percent were accepted in full. Tenders at 5.685 percent were allotted 87 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 5.685 percent with an equivalent price of 99.742. The median yield was 5.669 percent, and the low yield was 5.600 percent. Noncompetitive tenders totaled \$293 million. Competitive tenders accepted from private investors totaled \$10,709 million.

In addition to the \$11,002 million of tenders accepted in the auction process, \$450 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$585 million was accepted from Federal Reserve banks for their own accounts.

The notes of Series Q-2002 may be held in STRIPS form. The minimum par amount required is \$320,000.

Treasury Announces Changes in Bill Auction Regulations

November 4, 1997, Treasury announced that, beginning with the weekly bills to be auctioned on November 10, 1997, competitive bids in all 13-, 26-, and 52-week bill auctions must be expressed as a discount rate with three decimals in increments of .005 percent, e.g., 7.100 percent, 7.105 percent, etc. Competitive bids in cash management bill auctions are still to be expressed as a discount rate with two decimals, e.g., 7.53 percent. Also beginning with the November 10 auction and applying to all Treasury bill auctions, including cash management bills, the net long position reporting threshold was reduced from \$2 billion to \$1 billion.

52-Week Bills

November 26 tenders were invited for approximately \$12,000 million of 364-day Treasury bills to be dated December 11, 1997, and to mature December 10, 1998. The issue was to refund \$14,882 million of maturing 52-week bills and to pay down about \$2,875 million. The bills were auctioned on December 4. Tenders totaled \$40,322 million, of which \$12,029 million was accepted including \$829 million of noncompetitive tenders from the public and \$1,201 million of the bills issued to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$304 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. In addition, \$5,660 million was awarded to the Federal Reserve banks for their own accounts. The average bank discount rate was 5.180 percent.

**TABLE PDO-3.--Public Offerings of Marketable Securities
Other than Regular Weekly Treasury Bills, con.**

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the average bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-2.	⁴⁵ Accepted yields ranged up to 6.325% (price 99.683) in this single-price auction.
² From date of additional issue in case of a reopening.	⁴⁶ Accepted yields ranged up to 3.449% (adjusted price 99.482) in this single-price auction of an inflation-indexed note.
³ In reopenings the amount issued is in addition to the amount of original offerings.	⁴⁷ Yields accepted ranged from 5.990% (price 99.689) up to 6.005% (price 99.649) with the average at 5.997% (price 99.670).
⁴ Includes securities issued to U.S. Government accounts and Federal Reserve banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.	⁴⁸ Yields accepted ranged from 6.354% (price 99.238) up to 6.399% (price 98.911) with the average at 6.374% (price 99.092).
⁵ Eligible for STRIPS.	⁴⁹ Yields accepted ranged from 6.625% (price 99.998) up to 6.660% (price 99.546) with the average at 6.640% (price 99.804).
⁶ Interest began to accrue before the issue date (settlement date) of this loan.	⁵⁰ Accepted yields ranged up to 5.885% (price 99.981) in this single-price auction.
⁷ Accepted yields ranged up to 5.068% (price 99.872) in this single-price auction.	⁵¹ Accepted yields ranged up to 6.359% (price 99.539) in this single-price auction.
⁸ Accepted yields ranged up to 5.360% (price 99.523) in this single-price auction.	⁵² Accepted yields ranged up to 6.270% (price 99.963) in this single-price auction.
⁹ Yields accepted ranged from 5.037% (price 99.898) up to 5.046% (price 99.873) with the average at 5.043% (price 99.882).	⁵³ Accepted yields ranged up to 6.660% (price 99.853) in this single-price auction.
¹⁰ Yields accepted ranged from 5.639% (price 99.894) up to 5.660% (price 99.736) with the average at 5.649% (price 99.819).	⁵⁴ Accepted yields ranged up to 3.650% (adjusted price 98.307) in this single-price auction of an inflation-indexed note.
¹¹ Yields accepted ranged from 6.110% (price 98.496) up to 6.130% (price 98.226) with the average at 6.119% (price 98.374).	⁵⁵ Accepted yields ranged up to 6.460% (price 99.843) in this single-price auction.
¹² Accepted yields ranged up to 5.235% (price 99.794) in this single-price auction.	⁵⁶ Accepted yields ranged up to 6.745% (price 99.498) in this single-price auction.
¹³ Accepted yields ranged up to 5.680% (price 99.763) in this single-price auction.	⁵⁷ Yields accepted ranged from 6.430% (price 99.852) up to 6.449% (price 99.801) with the average at 6.438% (price 99.831).
¹⁴ Accepted yields ranged up to 6.144% (price 99.965) in this single-price auction.	⁵⁸ Yields accepted ranged from 6.716% (price 99.345) up to 6.759% (price 99.037) with the average at 6.740% (price 99.173).
¹⁵ Accepted yields ranged up to 6.415% (price 99.832) in this single-price auction.	⁵⁹ Accepted yields ranged up to 6.328% (price 99.856) in this single-price auction.
¹⁶ Accepted yields ranged up to 5.939% (price 99.881) in this single-price auction.	⁶⁰ Accepted yields ranged up to 6.616% (price 99.513) in this single-price auction.
¹⁷ Accepted yields ranged up to 6.279% (price 99.877) in this single-price auction.	⁶¹ Accepted yields ranged up to 6.027% (price 99.950) in this single-price auction.
¹⁸ Yields accepted ranged from 6.350% (price 100.067) up to 6.400% (price 99.933) with the average at 6.390% (price 99.960).	⁶² Accepted yields ranged up to 6.298% (price 99.797) in this single-price auction.
¹⁹ Yields accepted ranged from 6.890% (price 99.893) up to 6.906% (price 99.779) with the average at 6.902% (price 99.807).	⁶³ Accepted yields ranged up to 3.744% (adjusted price 99.462) in this single-price auction of an inflation-indexed note.
²⁰ Accepted yields ranged up to 6.053% (price 99.902) in this single-price auction.	⁶⁴ Accepted yields ranged up to 5.930% (price 99.898) in this single-price auction.
²¹ Accepted yields ranged up to 6.565% (price 99.727) in this single-price auction.	⁶⁵ Accepted yields ranged up to 6.024% (price 99.898) in this single-price auction.
²² Accepted yields ranged up to 6.300% (price 99.908) in this single-price auction.	⁶⁶ Yields accepted ranged from 6.034% (price 99.908) up to 6.047% (price 99.873) with the average at 6.041% (price 99.889).
²³ Accepted yields ranged up to 6.674% (price 99.795) in this single-price auction.	⁶⁷ Yields accepted ranged from 6.195% (price 99.484) up to 6.218% (price 99.315) with the average at 6.205% (price 99.411).
²⁴ Yields accepted ranged from 7.005% (price 99.964) up to 7.019% (price 99.865) with the average at 7.016% (price 99.886).	⁶⁸ Yields accepted ranged from 6.435% (price 99.207) up to 6.452% (price 98.984) with the average at 6.445% (price 99.076).
²⁵ Accepted yields ranged up to 6.288% (price 99.930) in this single-price auction.	⁶⁹ Accepted yields ranged up to 5.998% (price 99.772) in this single-price auction.
²⁶ Accepted yields ranged up to 6.625% (price 100.000) in this single-price auction.	⁷⁰ Accepted yields ranged up to 6.253% (price 99.987) in this single-price auction.
²⁷ Yields accepted ranged from 6.110% (price 99.703) up to 6.124% (price 99.665) with the average at 6.118% (price 99.681).	⁷¹ Accepted yields ranged up to 5.794% (price 99.918) in this single-price auction.
²⁸ Yields accepted ranged from 6.514% (price 103.494) up to 6.553% (price 103.207) with the average at 6.535% (price 103.339).	⁷² Accepted yields ranged up to 5.960% (price 99.637) in this single-price auction.
²⁹ Yields accepted ranged from 6.764% (price 99.821) up to 6.778% (price 99.643) with the average at 6.768% (price 99.770).	⁷³ Accepted yields ranged up to 3.600% (adjusted price 100.400) in this single-price auction of an inflation-indexed note.
³⁰ Accepted yields ranged up to 6.170% (price 99.917) in this single-price auction.	⁷⁴ Accepted yields ranged up to 5.720% (price 99.823) in this single-price auction.
³¹ Accepted yields ranged up to 6.568% (price 99.715) in this single-price auction.	⁷⁵ Accepted yields ranged up to 5.830% (price 99.657) in this single-price auction.
³² Accepted yields ranged up to 6.080% (price 99.851) in this single-price auction.	⁷⁶ Yields accepted ranged from 5.755% (price 99.986) up to 5.768% (price 99.950) with the average at 5.762% (price 99.967).
³³ Accepted yields ranged up to 6.409% (price 99.856) in this single-price auction.	⁷⁷ Yields accepted ranged from 5.941% (price 101.324) up to 5.967% (price 101.133) with the average at 5.955% (price 101.221).
³⁴ Yields accepted ranged from 6.494% (price 100.044) up to 6.510% (price 99.927) with the average at 6.502% (price 99.985).	⁷⁸ Yields accepted ranged from 6.198% (price 99.010) up to 6.207% (price 98.889) with the average at 6.201% (price 98.970).
³⁵ Accepted yields ranged up to 5.930% (price 99.898) in this single-price auction.	⁷⁹ Accepted yields ranged up to 5.700% (price 99.860) in this single-price auction.
³⁶ Accepted yields ranged up to 6.325% (price 99.683) in this single-price auction.	⁸⁰ Accepted yields ranged up to 5.769% (price 99.918) in this single-price auction.
³⁷ Yields accepted ranged from 5.872% (price 100.008) up to 5.889% (price 99.962) with the average at 5.879% (price 99.989).	⁸¹ Accepted yields ranged up to 5.690% (price 99.879) in this single-price auction.
³⁸ Yields accepted ranged from 6.260% (price 101.739) up to 6.283% (price 101.570) with the average at 6.273% (price 101.643).	⁸² Accepted yields ranged up to 5.685% (price 99.742) in this single-price auction.
³⁹ Yields accepted ranged from 6.618% (price 98.470) up to 6.625% (price 98.380, with the average at 6.619% (price 98.457).	
⁴⁰ Accepted yields ranged up to 5.662% (price 99.931) in this single-price auction.	
⁴¹ Accepted yields ranged up to 5.950% (price 99.680) in this single-price auction.	
⁴² Accepted yields ranged up to 5.874% (price 99.769) in this single-price auction.	
⁴³ Accepted yields ranged up to 6.165% (price 99.830) in this single-price auction.	
⁴⁴ Accepted yields ranged up to 5.984% (price 99.797) in this single-price auction.	

Note.--All notes and bonds, except for foreign-targeted issues, were sold at auction through competitive and noncompetitive bidding. Foreign-targeted issues were sold at auction through competitive bidding only.

*As of October 1, 1997, all Treasury issues of notes and bonds are eligible for STRIPS.

¹ Exclusive of banks and insurance companies.

² Included with "All other" investors are certain Government deposit accounts and Government-sponsored agencies, formerly included with Government accounts.

Note.--For detail of offerings, see table PDO-3.

INTRODUCTION: Savings Bonds and Notes

Series EE bonds, on sale since January 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for Series E and EE savings bonds and savings notes. Series A-D were sold from March 1, 1935, through April 30, 1941. Series E was on sale from May 1, 1941, through December 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through April 30, 1952. Series H was sold from June 1, 1952, through December 31, 1979. Series HH bonds were sold for cash from January 1, 1980, through October 31, 1982. Series J and K were sold from

May 1, 1952, through April 30, 1957. U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds.

The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the "Treasury Bulletins" of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal 1974.

TABLE SBN-1.--Sales and Redemptions by Series, Cumulative through Dec. 31, 1997

[In millions of dollars. Source: "Monthly Statement of the Public Debt of the United States;" Bureau of the Public Debt, Office of Public Debt Accounting]

Series	Sales ¹ (1)	Accrued discount (2)	Sales plus accrued discount (3)		Redemptions ¹ (4)	Amount outstanding	
			Redemptions ¹ (4)	Interest- bearing debt (5)		Matured non-interest- bearing debt (6)	
Savings bonds:

Note.--Series E and EE include U.S. savings notes (Freedom Shares) on sale from May 1, 1967, through June 30, 1970, to E bond buyers.

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes, and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

• Table **OFS-1** presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the Federal Reserve banks, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The Federal Reserve banks acquire Treasury securities in the market as a means of executing monetary policy.

• Table **OFS-2** presents the estimated amount of public debt securities held by private investors. Information is obtained from sources such as the Federal financial institution regulatory agencies. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

TABLE OFS-1.--Distribution of Federal Securities by Class of Investors and Type of Issues

¹ U.S. savings bonds, series A-F and J, are included at current redemption value.² Includes domestically chartered banks, U.S. branches and agencies of foreign banks, New York investment companies majority owned by foreign banks, and Edge Act corporations owned by domestically chartered and foreign banks.³ Includes partnerships and personal trust accounts.⁴ Includes U.S. savings notes. Sales began May 1, 1967, and were discontinued June 30, 1970.⁵ Exclusive of banks and insurance companies.⁶ The "State and local governments" category has been redefined to include its fully defeased

debt that is backed by nonmarketable Federal securities. Includes State and local pension funds.

⁷ Consists of the investments of foreign and international accounts (both official and private) in United States public debt issues. Estimates reflect 1978 benchmark to December 1984; the 1984 benchmark to December 1989; and the 1989 benchmark to date.⁸ Includes savings and loan associations, credit unions, nonprofit institutions, mutual savings banks, corporate pension trust funds, dealers and brokers, certain Government deposit accounts, and Government-sponsored enterprises.

INTRODUCTION: Market Yields

The tables and charts in this section present yields on Treasury marketable securities, and compare long-term yields on Treasury securities with yields on long-term corporate and municipal securities.

- Table **MY-1** lists Treasury market bid yields at constant maturities for bills, notes, and bonds. The Treasury yield curve in the accompanying chart is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. on the last business day of the calendar quarter.

The Treasury uses quotations obtained by the Federal Reserve Bank of New York to derive the yield curve, based on semiannual interest payments and read at constant maturity points to develop a consistent data series. Yields on Treasury bills are coupon equivalent yields of bank *discount rates* at

which Treasury bills trade in the market. The Board of Governors of the Federal Reserve System publishes the Treasury constant maturity data series in its weekly H.15 press release.

- Table **MY-2** shows average yields of long-term Treasury, corporate, and municipal bonds. The long-term Treasury average yield is the 30-year constant maturity yield. The corporate bond average yield is developed by Treasury by calculating reoffering yields on new long-term securities maturing in at least 20 years and rated Aa by Moody's Investors Service. The municipal bond average yield prior to 1991 was compiled by Treasury. Beginning with January 1991, the average yield is the "Municipal Bond Yield Average," published by Moody's Investors Service for 20-year reoffering yields on selected Aa-rated general obligations. See the footnotes for further explanation.

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation, and includes some old and current rare issues that do not circulate, or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, various U.S. Mint offices, the Federal Reserve banks, and the Federal Reserve Board.

INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on the U.S. Government's reserve assets, liabilities to *foreigners*, and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table IFS-1 shows reserve assets of the United States, including its gold stock, *special drawing rights* held in the Special Drawing Account in the *International Monetary Fund (IMF)*, holdings of convertible foreign currencies, and reserve position in the IMF.

- Table IFS-2 contains statistics on liabilities to *foreign official institutions*, and selected liabilities to all other *foreigners*, which are used in the U.S. balance of payments statistics.

- Table IFS-3 shows nonmarketable bonds and notes that the Treasury issues to official institutions and other residents of foreign countries.

Dec.....	69,954	11,047	10,027	30,809	18,071
1998 - Jan.....	70,003	11,046	9,998	30,920	18,039

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

² Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 U.S.C. 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs.

⁴ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions.

⁵ The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

¹ Includes Bank for International Settlements.² Derived by applying reported transactions to benchmark data.³ Includes current value of zero-coupon Treasury bond issues to foreign governments as follows: Mexico, beginning March 1988, 20-year maturity issue and beginning March 1990, 30-year maturity issue; Venezuela, beginning December 1990, 30-year maturity issue; Argentina, beginning April 1993, 30-year maturity issue. Also, see footnotes to table IFS-3.⁴ Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.⁵ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."⁶ Includes marketable U.S. Government bonds and notes held by foreign banks.⁷ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.

Note.—Table is based on Department of Treasury data and on data reported to the Department of Treasury by banks, other depository institutions, and brokers in the United States. Data correspond generally to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

¹ Beginning April 1993, includes current value (principal and accrued interest) of zero-coupon, 30-year maturity Treasury bond issue to the government of Argentina. Face value of the issue is \$6,685 million.

with remaining face value of \$20,412 million.

² Includes current value of the following zero-coupon Treasury bond issues to the government of Mexico: Beginning March 1988, 20-year maturity issue with remaining face value of \$1,058 million that was retired in full in April 1997; and beginning March 1990, 30-year maturity issue

³ Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Remaining face value of the issue is \$7,162 million.

INTRODUCTION: Capital Movements

Treasury collects information about the transference of financial assets and other portfolio capital movements between the United States and foreigners, and has since 1935. Commercial banks and other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States file capital movement reports with district Federal Reserve banks.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System, and in consultation with representatives of banks, securities firms, and nonbanking enterprises. Copies of the reporting forms and instructions may be obtained from the Office of International Financial Analysis, Office of the Assistant Secretary for Economic Policy, Department of the Treasury, Washington, D.C., 20220, or from district Federal Reserve banks.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. However, information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records, and so may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any country, but are accounted for in regional groupings of such organizations. The only exception is information pertaining to the Bank for International Settlements, which is reported opposite 'Other Europe.'

Banks and other depository institutions, bank holding companies, International Banking Facilities (IBFs), securities brokers and dealers, and nonbanking enterprises in the United States must file reports. These enterprises include the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Those with liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks and other depository institutions, and some brokers and dealers, file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, June 30 and December 31, they also report the same liabilities and claims items attributed to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed for liabilities and claims denominated in foreign currencies. The exemption level applicable to these banking reports is \$15 million.

Banks and other depository institutions, securities brokers and dealers, and other enterprises report monthly their transactions with foreigners in long-term securities. They must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$2 million during the covered month.

Exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and brokers), and other nonbanking enterprises must file reports quarterly if liabilities to, or claims on, unaffiliated foreigners amount to \$10 million or more at the end of the covered quarter.

Nonbanking enterprises also report each month their aggregate U.S. dollar denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices), and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

- **Section I** presents liabilities to foreigners reported by U.S. banks and other depository institutions, as well as brokers and dealers. Dollar liabilities are reported monthly; those denominated in foreign currencies are reported quarterly. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners.

- **Section II** presents claims on foreigners reported by U.S. banks and other depository institutions, brokers, and dealers. Data on banks' claims held for their own account are collected monthly. Information on claims held for their domestic customers as well as on foreign currency claims, is collected on a quarterly basis only. Maturity data are reported according to time remaining to maturity. Reporting also covers certain items held by brokers and dealers in the United States.

- **Section III** contains supplementary data on dollar liabilities to, and dollar claims on, countries not listed separately on the monthly reports submitted by banks, other depository institutions, brokers and dealers in the United States. The supplementary reports are filed semiannually as of the end of June and December.

- **Section IV** shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and brokers), and other nonbanking enterprises in the United States. Information does not include accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. These are reported by business enterprises to the Department of Commerce on its direct investment forms. Data exclude claims on foreigners held through banks in the United States.

- **Section V** contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, brokers, and other entities in the United

States. The data cover transactions executed in the United States for the accounts of foreigners, and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly issued securities as well as transactions in, and redemptions of, outstanding issues. However, the data do not include nonmarketable Treasury bonds and notes shown in table IFS-3.

The geographical breakdown of the transactions data does not necessarily reflect the domicile of the ultimate owners of, or the original issuers of, the securities. This is because the path

of a security is not tracked prior to its being purchased from, or after it is sold to, a foreigner in a reportable transaction. That is, before it enters and after it departs the reporting system, ownership of a security may be transferred between foreigners of different countries. Such transfers may occur any number of times and are concealed among the net figures for U.S. transactions opposite individual countries. Hence, the geographical breakdown shows only the country of domicile of the foreign buyers and sellers of securities in a particular round of transactions.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

³ Includes Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates (Trucial States).

⁴ Includes Algeria, Gabon, Libya, and Nigeria.

* Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.

INTRODUCTION: Foreign Currency Positions

The “Treasury Bulletin” publishes series on foreign currency holdings of large foreign exchange market participants. The series provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, German mark, Japanese yen, Swiss franc, and pound sterling). U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 U.S.C. 5315; 31 C.F.R. 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold. Exemptions from filing the monthly report are given to banking institutions that file the Federal Financial Institution Examination Council (FFIEC) 035 report (“Monthly Consolidated Foreign Currency Report”).

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$1 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December). Exemptions from filing the quarterly report are given to major nonbank market participants that file weekly and monthly reports, and banking institutions that file FFIEC 035 reports.

This information is published in five sections corresponding to each of the major currencies covered by the reports. Tables I-1 through V-1 present the foreign currency data reported weekly by major market participants. Tables I-2 through V-2 present more detailed currency data of major market participants, based on monthly Treasury and FFIEC 035 reports. Tables I-3 through V-3 present quarterly consolidated foreign currency data reported by large market participants and FFIEC reporters which do not file weekly reports.

Principal exchanged under cross currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal is also separately noted on monthly and quarterly reports. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option’s value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established under the Gold Reserve Act of January 30, 1934 (31 U.S.C. 5302), which authorized establishment of a Treasury Department fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *special drawing rights* (*SDRs*), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

- Table **ESF-1** presents the assets, liabilities, and *capital* of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the *IMF*. Gains and losses are reflected in the cumulative net income (+) or loss (-) account.

- Table **ESF-2** shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (+) or loss (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of *SDR holdings and allocations*" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

TABLE ESF-2.--Income and Expense

[In thousands of dollars. Source: Office of the Assistant Secretary of the Treasury for Management]

	Current quarter June 30, 1997, through Sept. 30, 1997	Fiscal year to date Oct. 1, 1996, through Sept. 30, 1997
Income and expense		
Profit (+) or loss (-) on:		
Foreign exchange	-538,442	-1,612,722
Adjustment for change in valuation of SDR holdings and allocations ¹	-53,076	-163,044
Interest (+) or net charges (-) on:		
Special drawing rights	33,098	125,025
U.S. Government securities	211,914	768,502
Foreign exchange	48,231	294,058
Income from operations	-298,275	-588,181
Net income (+) or loss (-)	-298,275	-588,181

¹ Beginning July 1974, the International Monetary Fund adopted a technique for valuing the special drawing rights (SDRs) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

² Excludes foreign exchange transactions for future and spot delivery.

Note.--Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception to September 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

¹ This is a revised fiscal 1996 amount obtained from "Schedule 1-U.S. Summary General Ledger Account Balances, 1997 Annual Report-Appendix."

² Figures include both public and Federal accounts.

³ Revised fiscal 1996 amount.

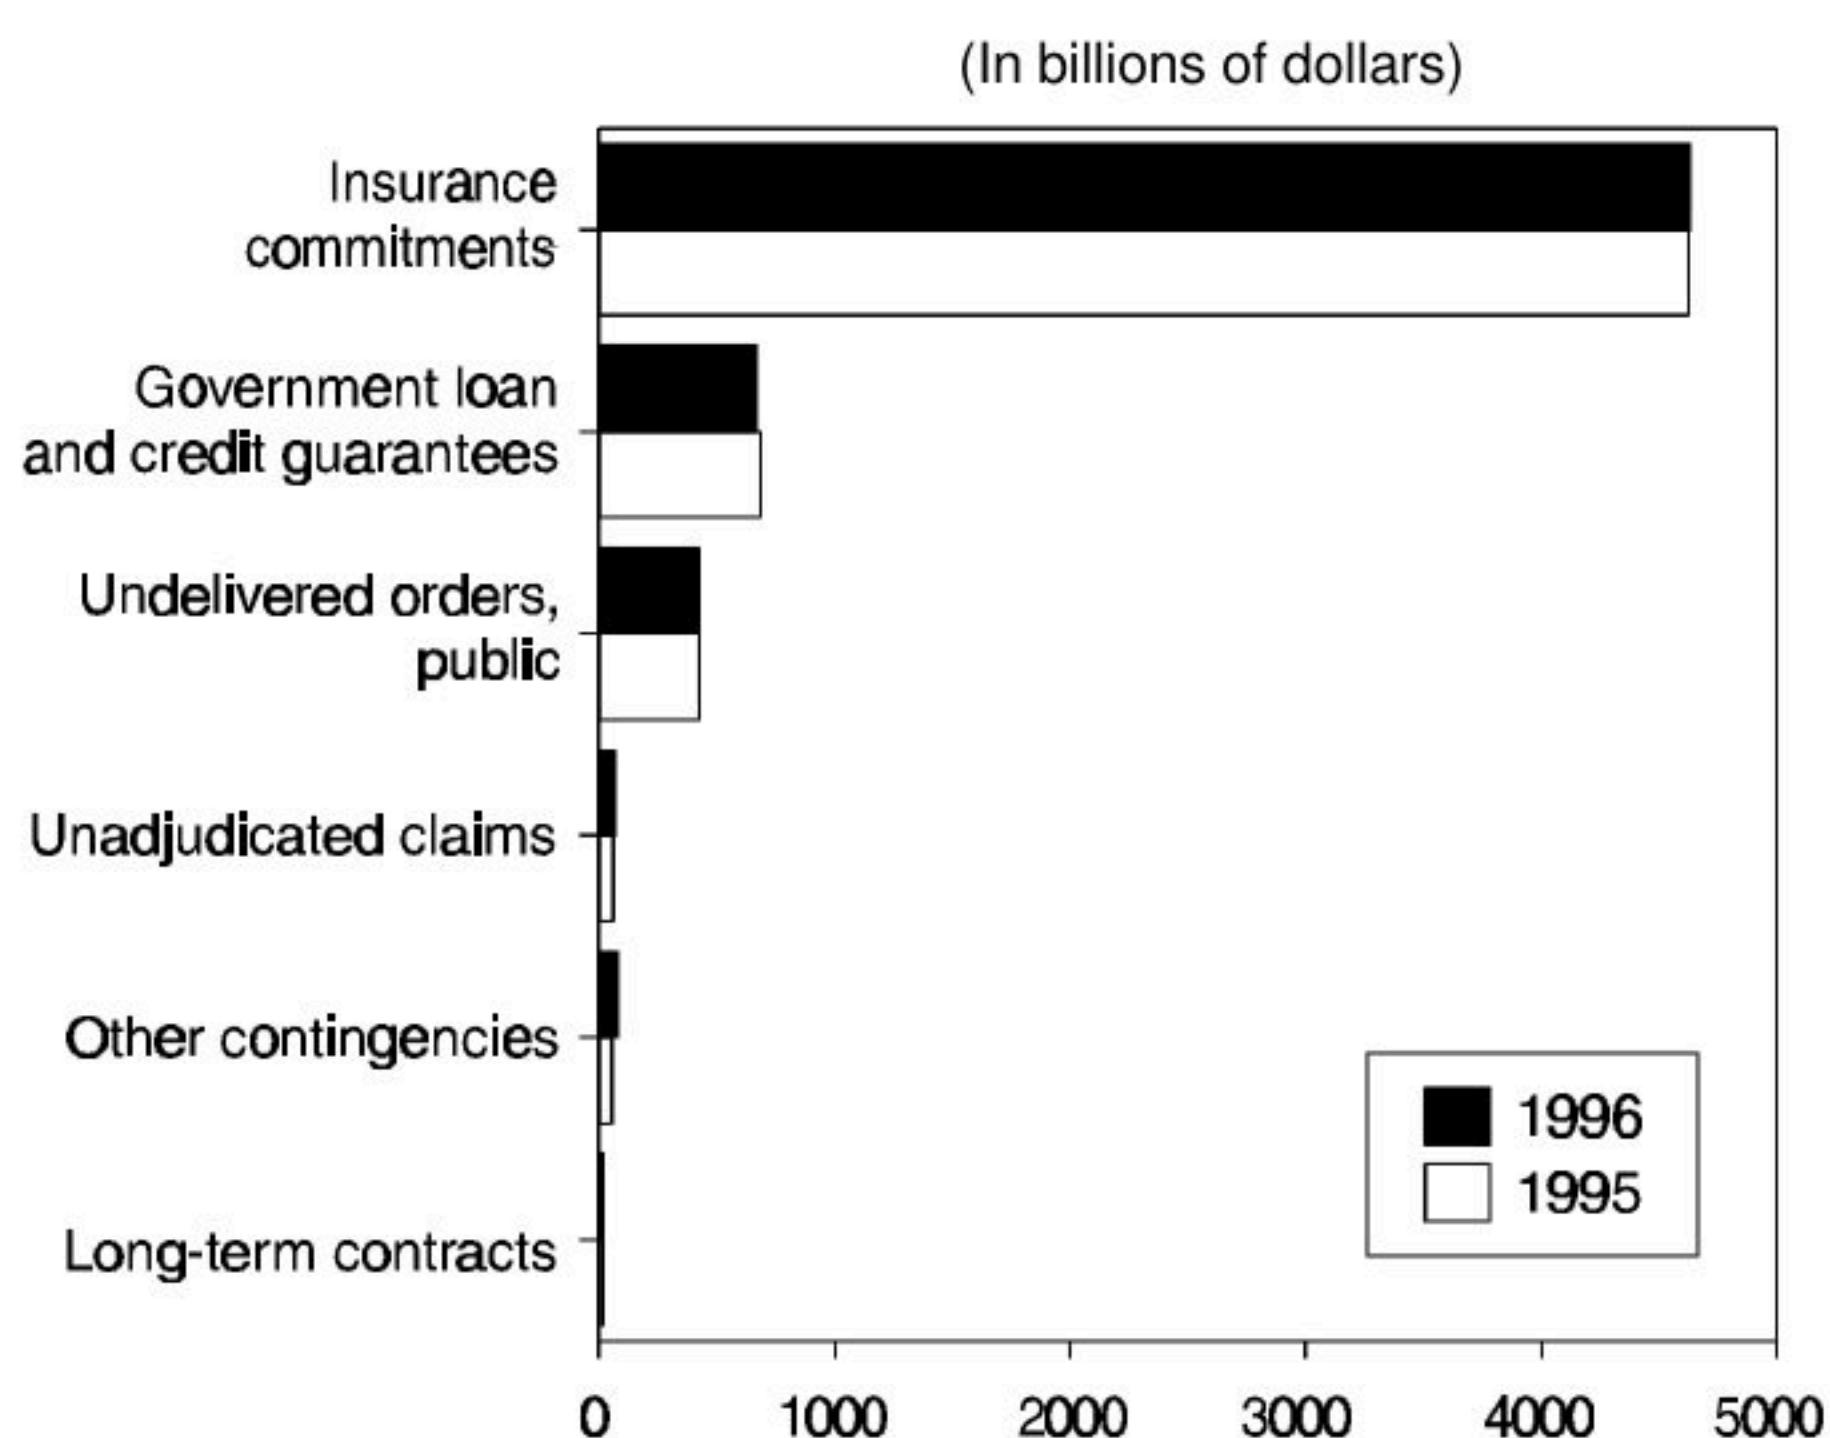

CHART SLOFC-A-- Commitments and Contingencies

This report contains totals for commitments of the Government that represent the value of goods and services ordered and obligated but not yet received. It also includes other commitments against appropriations, all pursuant to section 1311 of the Supplemental Appropriation Act of 1955 (31 U.S.C. 200). Contingencies represent conditional commitments that may become liabilities due to events beyond the control of the Government. The amounts are agency projections stated in terms of maximum theoretical risk exposure. The data for commitments and contingencies come from agency notes reports that were submitted to the Financial Management Service.

Note.--Financial Management Service (FMS) expects to compile 1997 contingencies data by May 31, 1998. A copy of the detailed schedules can be obtained from the Financial Reports Branch (202) 874-9910. Amounts presented in Chart SLOFC-A were compiled from reports submitted by the agencies in accordance with vol. I, part 2, chapter 4000 of the "Treasury Financial Manual" (Transmittal Letter No. 565). The information furnished by some reporting agencies was based on estimates. Amounts presented in Table SLOFC-1 were compiled from "Schedule 1-U.S. General Ledger Account Balances, 1997 Annual Report-Appendix" and Treasury internal documents.

INTRODUCTION: Airport and Airway Trust Fund

The Airport and Airway Trust Fund (AATF) was established on the books of the Treasury in fiscal 1971, according to provisions of the Airport and Airway Revenue Act of 1970 [49 U.S.C. 1742 (a)]. The trust fund was re-established in the Internal Revenue Code (26 U.S.C. 9502) as a result of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248, dated September 3, 1982), effective September 1, 1982.

Amounts equivalent to the taxes received in the Treasury on transportation of persons and property by air, gasoline and jet fuel used in noncommercial aircraft, and an international departure tax are appropriated from the general fund of the Treasury to the trust fund. The Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508, dated November 5, 1990) increased rates for the excise taxes transferred to the fund.

These transfers are made based on estimates from the Secretary of the Treasury, subject to adjustments in later transfers in the amount of actual tax receipts.

On January 1, 1996, authority to collect these taxes and to transfer them from the general fund to the trust fund (26 U.S.C. 9502) expired. Public Law 104-188, the Small Business Job Protection Act of 1996, reinstated this authority as of August 27, 1996. The taxes and transfer authority expired again on January 1, 1997. The authority to collect the taxes was reinstated on March 7, 1997, through September 30, 1997.

The Taxpayers Relief Act of 1997 (Public Law 105-34), effective October 1, 1997, extends the aviation excise taxes for

10 years and includes the following key provisions: (1) retains existing freight weighbill, general aviation fuel/gas taxes, and \$6 departure tax on domestic flights to and from Alaska and Hawaii; (2) converts the 10 percent ad valorem tax on domestic passenger tickets to a combination of ad valorem/flight segment tax over 3 years beginning October 1, 1997; (3) imposes a new 7.5 percent tax on payments to airlines for frequent flyer and similar awards by banks and credit card companies, merchants, frequent flyer program partners (i.e., other airlines, hotels, or rental car companies), and other businesses; (4) increases the current \$6 international departure tax to \$12 per passenger and adds a \$12 international arrival tax; (5) lowers tax rates on flights to certain rural airports to 7.5 percent without flight segment component; and (6) transfers revenues from the 4.3 cents-per-gallon aviation fuel tax currently dedicated to reduce the national U.S. deficit from the General Fund to the AATF.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities with the interest credited to the fund. Additional sums from the general fund also are credited as authorized and made available by law, if necessary, to meet outlay requirements.

Amounts required for outlays to carry out the airport and airway program are made available to the Federal Aviation Administration, Department of Transportation (DOT).

Other charges to the trust fund are made by the Secretary of the Treasury for transfers of certain refunds of taxes under section 34 of the Internal Revenue Code of 1986.

INTRODUCTION: Uranium Enrichment Decontamination and Decommissioning Fund

The Uranium Enrichment Decontamination and Decommissioning Fund was established on the books of the Treasury in fiscal 1993, according to provisions of the Energy Policy Act of 1992 [42 U.S.C. 2297 (g)]. Receipts represent (1) fees collected from domestic public utilities based on their pro rata share of purchases of separative work units from the Department of Energy (DOE) and (2) appropriations toward the Government contribution based on the balance of separative work unit purchases.

Expenditures from the fund are for the purpose of (1) decontamination and decommissioning of the three gaseous diffusion plants, (2) remedial actions and related environmental restoration costs at the gaseous diffusion plants, and (3) reimbursement to uranium/thorium producers for the costs of decontamination, decommissioning, reclamation, and remedial action of uranium/thorium sites that are incident to sales to the U.S. Government. Amounts available in the fund exceeding current needs may be invested by the Secretary of the Treasury in obligations of the United States (1) having maturities congruent with the needs of the fund, and (2) bearing interest at rates determined appropriate, taking into consideration the

current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to these investments.

The Secretary of the Treasury is required by 42 U.S.C. 2297 (g) to provide an annual report to Congress, after consultation with the Secretary of Energy. This report must present the financial condition and the results of operations of the fund during the preceding fiscal year.

The Energy Policy Act of 1992 [42 U.S.C. 2297 (g)(1)] authorizes funding to ensure annual deposits to the fund of \$480 million before adjustments for inflation. The Act stipulates that the annual deposit amount, adjusted for inflation, is to be comprised of \$330 million in Government contributions and \$150 million in domestic public utility assessments. Between the fiscal years of 1993 and 1997, the total Government contribution amount authorized by the Act was \$1,746.0 million. During that time span, only \$1,057.6 million was contributed by the Government to the fund. The resulting shortfall in authorized Government contributions is therefore \$688.4 million.

INTRODUCTION: Black Lung Disability Trust Fund

The Black Lung Disability Trust Fund was established on the books of the Treasury in fiscal 1978 according to the Black Lung Benefits Revenue Act of 1977 (Public Law 95-227). The Black Lung Benefits Revenue Act of 1981 (Public Law 97-119), re-established the fund in the Internal Revenue Code, 26 U.S.C. 9501.

The Consolidated Omnibus Budget Reconciliation Act of 1985 (Public Law 99-272), enacted April 7, 1986, provided for an increase in the coal tax effective April 1, 1986, through December 31, 1995, and a 5-year forgiveness of interest retroactive to October 1, 1985. The 5-year moratorium on interest payments ended on September 30, 1990. Payment of interest on advances resumed in fiscal 1991. The Omnibus Budget Reconciliation Act of 1987 (Public Law 100-203), signed December 22, 1987, extends the temporary increase in the coal tax through December 31, 2013.

The Code designates the following receipts to be appropriated and transferred from the general fund of the Treasury to the trust fund: excise taxes on mined coal, taxable expenditures of self-dealing by, and excess contributions to, private black lung benefit trusts; reimbursements by responsible mine operators; and related fines, penalties, and interest charges.

Estimates made by the Secretary of the Treasury determine monthly transfers of amounts for excise taxes to the trust

fund subject to adjustments in later transfers to actual tax receipts.

After retirement of the current indebtedness, amounts available in the fund exceeding current expenditure requirements will be invested by the Secretary of the Treasury in interest-bearing public debt securities. Any interest earned will be credited to the fund. Also credited, if necessary, will be repayable advances from the general fund to meet outlay requirements exceeding available revenues.

To carry out the program, amounts are made available to the Department of Labor (DOL). Also charged to the fund are administrative expenses incurred by the Department of Health and Human Services and the Department of the Treasury, repayments of advances from the general fund and interest on advances.

The Code requires the Secretary of the Treasury to submit an annual report to Congress after consultation with the Secretary of Labor and the Secretary of Health and Human Services [26 U.S.C. 9602(a)]. The report must present the financial condition and results of operations of the fund during the past fiscal year and the expected condition and operations of the fund during the next 5 fiscal years.

INTRODUCTION: Harbor Maintenance Trust Fund

The Harbor Maintenance Trust Fund was established on the books of the Treasury on April 1, 1987, according to the Water Resources Development Act of 1986 (Public Law 99-962, November 17, 1986) (26 U.S.C. 9505).

Amounts in the Harbor Maintenance Trust Fund are available as provided by appropriation acts for making expenditures to carry out section 210 (a) of the Water Resources Development Act of 1986. The appropriations act for the Department of Transportation (DOT) for fiscal 1995 (Public Law 103-331, September 28, 1994), section 13, waived collection of charges or tolls on the Saint Lawrence Seaway in accordance with section 13 (b) of the Act of May 13, 1954 (as in effect on April 1, 1987). Legislation was passed in the North American Free Trade Agreement (NAFTA) Implementation Act of 1994 (Public Law 103-182, Sec. 683), which amends paragraph (3) of section 9505 (c) of the Internal Revenue Code of 1986, to authorize payment of up to \$5 million annually to the Department of the Treasury, for all expenses of administration incurred by the Department of the Treasury, the U.S. Army Corps of Engineers, and the Department of Commerce related to the administration of subchapter A of chapter 36 (relating to harbor maintenance tax). Section 201 of the Water Re-

sources Development Act (WRDA) 1996, authorizes use of the Harbor Maintenance Trust Fund for construction of dredged material disposal facilities associated with the operation and maintenance of Federal navigation projects for commercial navigation.

A summary judgment issued October 25, 1995, by the United States Court of International Trade in the case United States Shoe Corp. v. United States (Court No. 94-11-00668) found the Harbor Maintenance fee unconstitutional under the Export Clause of the Constitution (Article I, Section 9, clause 5), and enjoined the Customs Service from collecting the fee. However, a motion to stay the execution of the judgment pending appeal was granted and the fee is being collected. The case is under appeal at the Supreme Court. Oral arguments are set for March 4, 1998, with a decision expected later in the year.

Annual reports to Congress are required by Section 330 of the Water Resources Development Act of 1992, (Public Law 102-580). These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and its expected condition and operations during the next 5 fiscal years.

INTRODUCTION: Hazardous Substance Superfund

The Hazardous Substance Response Trust Fund was established on the books of the Treasury in fiscal 1981, in accordance with provisions of the Hazardous Substance Response Revenue Act of 1980 [42 U.S.C. 9631 (a)]. Effective fiscal 1987, the trust fund was re-established as the Hazardous Substance Superfund (Superfund) in accordance with provisions of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (Public Law 96-510), as amended by the Superfund Amendments and Re-authorization Act (SARA) of 1986 (Public Law 99-499, dated October 17, 1986).

The Internal Revenue Service collects excise taxes on petroleum and chemicals, and an environmental tax from all corporations with modified alternative minimum taxable income in excess of \$2 million. In addition, the Superfund is authorized to be appropriated general revenues from the general fund not otherwise appropriated. Cost recoveries, and other miscellaneous receipts (e.g. interest revenue) are deposited directly to the Superfund. Also appropriated to the Super-

fund, if required, are repayable advances from the general fund to meet outlay requirements in excess of available revenues. Amounts available in the Superfund, in excess of current expenditure requirements, are invested by the Secretary of the Treasury in interest-bearing Government securities (e.g., Treasury bills). All interest earned is credited directly to the Superfund.

To carry out the Superfund program, amounts are appropriated from the Superfund to the Environmental Protection Agency (EPA) for programmatic and administrative expenses, repayment of advances to the general fund, and interest expense associated with outstanding advances from the general fund.

An annual report to Congress by the Secretary of Treasury is required by section 9633 (b) (1) of CERCLA, as amended. These reports present the financial condition of the Superfund and the results of operation for the past fiscal year, and its expected condition and operations during the next 5 years.

¹ Forecasts for these fiscal years assume reauthorization of the Superfund by Congress.

² On January 1, 1998, the corporate environmental tax expires unless reauthorized by Congress. The estimate includes only the first quarter fiscal 1998 corporate collections.

INTRODUCTION: Highway Trust Fund

The Highway Trust Fund was established on the books of the Treasury in fiscal 1957, according to provisions of the Highway Revenue Act of 1956. It has been amended and extended by various highway and surface transportation acts since 1959. The Intermodal Surface Transportation Efficiency Act of 1991 extended the Highway Trust Fund and its taxes through September 30, 1999. It has also been modified by the Deficit Reduction Act of 1984, the Omnibus Budget Reconciliation Act of 1990, and the Omnibus Budget Reconciliation Act of 1993. Amounts equivalent to taxes on gasoline, diesel fuel, special motor fuels, certain tires, vehicles, and truck use, are designated by the Act to be appropriated and transferred from the general fund of the Treasury to the trust fund. These transfers are made monthly based on estimates by the Secretary of the Treasury, subject to adjustments in later transfers to the amount of actual tax receipts. Amounts available in the fund exceeding outlay requirements are invested in public debt securities and interest is credited to the fund.

Within the fund is a mass transit account, funded by a portion of the excise tax collections under sections 4041, 4081, and 4091 of the Internal Revenue Code (26 U.S.C.). The funds

from this account are used for expenditures according to section 21 (a) (2) of the Urban Mass Transportation Act of 1964 or the Intermodal Surface Transportation Efficiency Act of 1991. The remaining excise taxes collected are included in a higher account within the trust fund, and expenditures from this account are made according to the provisions of various transportation Acts.

Amounts required for outlays to carry out the Federal Highway program are made available to the Federal Highway Administration, Department of Transportation. Other charges to the trust fund are made by the Secretary of the Treasury for transfer of certain taxes to the land and water conservation fund and to the Aquatic Resources Trust Fund and refunds of certain taxes.

Annual reports to Congress are required by 26 U.S.C. 9602 (a) Internal Revenue Code as amended, to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Transportation. These reports cover the financial condition and results of operations of the fund for the past fiscal year and expected condition and operations during the next 5 fiscal years.

TABLE TF-15A.--Highway Trust Fund

The following information is released according to the provisions of the Byrd Amendment to the Intermodal Surface Transportation Efficiency Act of 1991 and represents data concerning the Highway Trust Fund. The figure described as "unfunded authorizations" is the latest estimate received from three Department of Transportation for fiscal 1996. The 24-

and 12-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from the Department of Treasury's Office of Tax Analysis for excise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal 1996.

INTRODUCTION: Inland Waterways Trust Fund

The Inland Waterways Trust Fund was established by the Treasury in fiscal 1984, according to provisions of the Inland Waterways Revenue Act of 1978 (Public Law 95-502) and continued according to the Water Resources Development Act of 1986 (26 U.S.C. 9506). Amounts determined by the Secretary of the Treasury section 4042 of the Internal Revenue Code of 1986 (relating to tax on fuel used in commercial transportation on Inland Waterways) shall be appropriated to the trust fund.

The Technical and Miscellaneous Revenue Act of 1988 (Public Law 100-647, approved November 10, 1988) increased the tax each year, 1990 through 1995. These amounts are transferred quarterly from the general fund based on estimates made by the Secretary, subject to adjustments in later transfers to the amounts of actual tax receipts.

The Secretary of the Treasury invests in interest-bearing obligations of the United States that portion of the trust fund,

in his judgment, not required to meet current withdrawals. The interest on, and proceeds from the sale or redemption of, any obligation held in the trust fund is credited to the trust fund. The Inland Waterways Revenue Act of 1978 provides that amounts in the trust fund shall be available, by appropriations acts, for construction and rehabilitation expenditures for navigation on the inland and intracoastal waterways of the United States described in 33 U.S.C. 1804. Expenditures must be otherwise authorized by law.

Annual reports to Congress are required by 26 U.S.C. 9602 to be submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and its expected condition and operations during the next 5 fiscal years.

INTRODUCTION: Leaking Underground Storage Tank Trust Fund

The Leaking Underground Storage Tank (LUST) Trust Fund was established in fiscal 1981 according to provisions of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (Public Law 96-510), as amended by the Superfund Amendments and Re-authorization Act (SARA) of 1986 (Public Law 99-499, dated October 17, 1986) and the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508, dated November 5, 1990).

The LUST Trust Fund is financed by taxes collected on gasoline, diesel fuels, special motor fuels, aviation fuels, and fuels used in commercial transportation on inland waterways. Amounts available in the LUST Trust Fund, exceeding current

expenditure requirements, are invested by the Secretary of the Treasury in interest-bearing Government securities (e.g., Treasury bills). All interest earned is credited directly to the LUST Trust Fund.

To carry out the LUST program, amounts are appropriated for the LUST Trust Fund to the Environmental Protection Agency (EPA) for programmatic and administrative expenses.

An annual report to Congress by the Secretary of the Treasury is required by 26 U.S.C. 9602 (a). These reports present the financial condition of the LUST Trust Fund and results of operations for the past fiscal year, and its expected condition and operations during the next 5 fiscal years.

INTRODUCTION: Nuclear Waste Fund

The Nuclear Waste Fund was established on the books of the Treasury in fiscal 1983, according to provisions of the Nuclear Waste Policy Act of 1982 [42 U.S.C. 10222 (c)]. Receipts represent fees collected from public utilities based on electricity generated by nuclear power reactors and spent nuclear fuel. Expenditures from the fund are for purposes of radioactive waste disposal activities.

Amounts available in the fund exceeding current needs may be invested by the Secretary of the Treasury in obligations of the United States (1) having maturities in tandem with the needs of the waste fund, and (2) bearing interest at rates

determined appropriate, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

An annual report to Congress by the Secretary of the Treasury, after consultation with the Secretary of Energy, is required by 42 U.S.C. 10222 (e) (1). This report must present the financial condition and the results of operations of the waste fund during the preceding fiscal year.

INTRODUCTION: Reforestation Trust Fund

The Reforestation Trust Fund was established on the books of the Treasury in fiscal 1981 to continue through September 30, 1985, according to provisions of Title III--Reforestation, of the Recreational Boating Safety and Facilities Improvement Act of 1980 [16 U.S.C. 1606a (a)].

The act provides that the Secretary of the Treasury shall transfer to the trust fund tariffs, limited to not more than \$30 million for any fiscal year, received in the Treasury from October 1, 1979, through September 30, 1985, on (1) rough and primary wood products and wood waste; (2) lumber, flooring, and moldings; and (3) wood veneers, plywood, other wood-veneer assemblies, and building boards. Public Law 99-190 extended the receipts for the trust fund. Amounts available in the reforestation trust fund exceeding current withdrawals are invested in interest-bearing obligations of the

United States or in obligations guaranteed as to both principal and interest by the United States. The interest on, and the proceeds from the sale or redemption of, any obligations are credited to the trust fund.

The Secretary of Agriculture is authorized to obligate available sums in the trust fund (including any amounts not obligated in previous years) for (1) reforestation and timber stand improvement and (2) administrative costs of the Government for these activities.

Annual reports are required by 16 U.S.C. 1606 a (c) (1) to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Agriculture, on the financial condition and the results of the operations of the trust fund during the past fiscal year and on its expected condition and operations during the next fiscal year.

INTRODUCTION: Aquatic Resources Trust Fund

Aquatic Resources Trust Fund was established on the books of the Treasury pursuant to the Deficit Reduction Act of 1984 (Public Law 98-369, approved July 18, 1984). The fund consists of two accounts: the Sport Fish Restoration Account and Boat Safety Account.

Motorboat fuel taxes are transferred, in amounts up to \$70 million per fiscal year, from the Highway Trust Fund to the Boat Safety Account. Authority for such transfers expired on October 1, 1997.

Amounts equivalent to the excise taxes received on sport fishing equipment and import duties on fishing tackle, yachts, and pleasure craft are appropriated into the Sport Fish Restoration Account. Motorboat fuel taxes not transferred to the Boat Safety Account or to the Land and Water Conservation Fund are transferred from the Highway Trust Fund to the Sport Fish Restoration Account. Transfers of motorboat fuel taxes from the Highway Trust Fund to the Land and Water Conservation Fund are limited to \$1 million per fiscal year. In addition, pursuant to the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508), small engine gasoline taxes are transferred to the Sport Fish Restoration Account.

Amounts in the Sport Fish Restoration Account are used, as provided by appropriation acts, for the purposes of carrying out "An Act to provide that the United States shall aid the States in fish restoration and management projects, and for other purposes," approved August 9, 1950 (as in effect on October 1, 1988) and the Coastal Wetlands Planning, Protection and Restoration Act, as in effect on November 29, 1990.

Amounts in the Boat Safety Account, as provided by appropriations acts are available to carry out the purposes of Public Law 92-75 related to recreational boating safety assistance.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the two accounts exceeding outlay requirements are invested in public debt securities with the interest credited to the respective accounts.

Annual reports to Congress, required by 26 U.S.C. 9602 (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: Oil Spill Liability Trust Fund

The Oil Spill Liability Trust Fund was established on the books of the Treasury by the Omnibus Budget Reconciliation Act 1986 (Public Law 99-509). It was made effective on January 1, 1990, by the Omnibus Budget Reconciliation Act of 1989 (Public Law 101-239), and amended by the Oil Pollution Act of 1990 (Public Law 101-380).

Amounts equivalent to the taxes received from the environmental tax on petroleum, but only to the extent of the Oil Spill Liability Trust Fund rate, are appropriated to the fund. The tax is not applied during any calendar quarter if the Secretary of the Treasury estimates that, as of the close of the preceding calendar quarter, the unobligated balance in the fund exceeds \$1 billion.

Certain amounts were transferred from other funds and were appropriated to the Oil Spill Liability Trust Fund as

provided by U.S.C. 26 9509 (b). certain paid penalties and amounts recovered for damages are also appropriated to the fund.

Amounts in the fund are available for oil spill cleanup costs and certain other related purposes as provided by appropriations acts or section 6002 (b) of the Oil Pollution Act of 1990.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities. Interest is credited to the fund.

Annual reports to Congress, required by 26 U.S.C. (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: Vaccine Injury Compensation Trust Fund

The Vaccine Injury Compensation Trust Fund (VICTF) was created on the books of the Treasury by the Revenue Act of 1987 (Public Law 100-203, approved December 22, 1987). Excise taxes on DPT, DT, MMR and polio vaccines (26 U.S.C. 4131) are appropriated into the fund which serves as a source of funds to pay claims for compensation for vaccine-related injury or death occurring after October 1, 1988.

Annual reports to Congress, required by 26 U.S.C. (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: National Recreational Trails Trust Fund

Provisions relating to a National Recreational Trails Trust Fund were enacted as part of the Intermodal Surface Transportation Efficiency Act of 1991 (Public Law 102-240, approved December 18, 1991). The Act provides that amounts equivalent to the taxes imposed on fuel used in vehicles on recreational trails or back country terrain and in camp stoves and other non-engine uses in outdoor recreational equipment shall be paid from the Highway Trust Fund to the National Recreational Trails Trust Fund [26 U.S.C. 9503 (c) (6)]. Transfers to the fund are limited to amounts obligated under section 1302 of the Act. Obligated amounts cannot exceed \$30 million per fiscal year over the 1992-97 period. Obligations cannot be

made until amounts are appropriated; there have not yet been appropriations to the fund.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities with the interest credited to the fund.

Annual reports to Congress, required by 26 U.S.C. 9602 (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

Note.-- No current figures or future projections are available from the Department of the Treasury because funds have yet to be appropriated to the fund.

Glossary

With References to Applicable Sections and Tables

Source: Financial Management Service

Accrued discount (SBN-1, -2, -3)—Interest that accumulates on savings bonds from the date of purchase until the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, and J are discount or accrual type bonds—meaning principal and interest are paid when bonds are redeemed. Series G, H, HH, and K are current-income bonds, and the semiannual interest paid to their holders is not included in accrued discount.

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-2, -3)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority (“Federal Fiscal Operations”)—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority may also be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-2)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders (“Treasury Financing Operations”)—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Coupon issue—The issue of bonds or notes (public debt).

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Current income bonds (“U.S. Savings Bonds and Notes”)—Bonds paying semiannual interest to holders. Interest is not included in accrued discount.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by

Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of December 1997, the debt limit was \$5,950,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury’s public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-2)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 U.S.C. 1441b).

Federal intrafund transactions (“Federal Fiscal Operations”)—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item “Federal Reserve notes—amounts outstanding” consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

Foreign (“Foreign Currency Positions,” IFS-2, -3)—Locations other than those included under the definition of the United States. (See United States.)

Foreigner (“Capital Movements,” IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States, and international and regional organizations, wherever located. Also, refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions (“Capital Movements”)—Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those

Glossary

of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower (“Capital Movements”)—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-1, -3)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-age and Survivors Insurance Trust Fund; the civil service retirement and disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions (“Federal Fiscal Operations”)—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

International Monetary Fund (“Exchange Stabilization Fund,” IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions (“Federal Fiscal Operations”)—These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Matured non-interest-bearing debt (SBN-1, -2, -3)—The value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Includes all Series A-D, F, G, J, and K bonds. Series E bonds (issued between May 1941 and November 1965), Series EE (issued since January 1980), Series H (issued from June 1952 through December 1979), and savings notes issued between May 1967 and October 1970 have a final maturity of 30 years. Series HH bonds (issued since January 1980) mature after 20 years.

Noncompetitive tenders (“Treasury Financing Operations”)—Offers by an investor to purchase Treasury securities at the price equivalent to the weighted average discount rate or yield of accepted competitive tenders in a Treasury auction. Noncompetitive tenders are always accepted in full.

Off-budget Federal entities (“Federal Fiscal Operations”)—Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.

Outlays (“Federal Fiscal Operations”)—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Own foreign offices (“Capital Movements”)—Refers to U.S. reporting institutions’ parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value—The face value of bonds or notes, including interest.

Quarterly financing (“Treasury Financing Operations”)—Treasury has historically offered packages of several “coupon” security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

Receipts (“Federal Fiscal Operations”)—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-3, -4)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

Special drawing rights (“Exchange Stabilization Fund,” IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members’ quotas in IMF. Although shown in exchange stabilization fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot (“Foreign Currency Positions”)—Due for receipt or delivery within 2 workdays.

State and local government series (FD-2)—(SLUGs) Special nonmarketable certificates, notes, and bonds offered to State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities

Glossary

comply with IRS arbitrage provisions. SLUGs are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-1, -3)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as

\$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), they are sold at a discount.

Trust fund transaction (“Federal Fiscal Operations”)—An intra-budgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.

U.S. notes (USCC)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
