1/ Allows for deduction of appropriation of \$275 million for Medical Care Insurance Trust Fund, under proposed legislation.

g/ The Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950, change the basis of appropriating social security employment taxes and employee contributions. Effective January 1, 1951, these taxes are withheld income taxes paid into the trust fund in combined amounts without separation as to type of tax. The amounts of such taxes credited currently as appropriations to the Federal Old-Age and Survivors' Insurance Trust Fund are based initially on estimates by the Secretary of the Treasury and are later adjusted on the basis of wage records maintained by the Social Security Administration. For the purposes

of this table, beginning January 1951, the same amount as is credited each month to the Trust Fund is imputed under "Employment taxes" as receipts for old-age insurance, and the balance of the combined receipts for old-age insurance and medical care is shown as "Withheld by employers".

For description of contents see Table 6, Footnote 3.

2/ Beginning October 1949, interest on unpaid principal debt is reported as an expenditure when such interest becomes due and payable, as distinguished from the previous practice of showing the expenditure on the basis of interest paid by the Treasurer of the United States.

11/ Includes public works undertaken by the Veterans' Administration. Transactions relating to the Foreign Economic Cooperation Trust Fund, established under Section 114 (f) of the Economic Cooperation Act of 1948 (62 Stat. 150), are consolidated with budget expenditures.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935 and began to mature in March 1945. Series A-D were sold from March 1935 to April 1941 and Series E, F, and G have been on sale since May 1, 1941. Beginning in May 1951, holders of maturing Series E bonds have three options: to redeem them in cash, to retain them with an extended maturity of 10 years at specified rates of interest accrual, or to exchange them for Series G bonds. Further information on these options will be found in the "Treasury Bulletin" issue for April 1951, page A-1, and information on the terms and conditions of the various series of savings bonds appear in the annual reports of the Secretary of the Treasury.

Series A-F sales are shown at issue price and total redemptions and amounts outstanding at current redemption values. Series G is shown at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured bonds outstanding of Series A-D were included in the interest-bearing debt until all bonds of the series matured, when they were transferred to matured debt upon which interest has ceased. Savings bonds data by denominations and the amounts of sales by States are published on a monthly basis but do not appear in each issue of the "Treasury Bulletin".

1/ Beginning with June 1947, Series E sales include unclassified sales consisting of Series E, F, and G. The amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include unclassified Series A-D redemptions beginning with October 1944, and also unclassified F and G redemptions,

beginning with June 1947.

3/ Includes both matured and unmatured bonds; see Table 4.

4/ Includes sales resulting from special offering of Series F and Series G to certain classes of institutional investors in excess of regular limitations. For further information on this offering, see "Treasury Bulletin" for September 1950, page A-1; for the amount of sales, see the issue for February 1951, page 29.

5/ Sales figures after April 30, 1941, represent adjustments.

Beginning May 1951, includes exchanges of matured Series E bonds for Series G bonds as shown in Table 4.

1/ Beginning with June 1947, Series E sales include unclassified sales consisting of Series A, F, and G. These amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement.

The greater part of this item consists of sales for which information is available as to the series but not the year of issuance. On the basis of that information such sales are included in this table according to series. Prior to June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include unclassified Series A-D redemptions beginning with October 1944, and also unclassified Series F and G redemptions,

beginning with June 1947.

3/ Includes both matured and unmatured bonds; see Table 4.

4/ Includes sales resulting from special offering of Series F and Series G to certain classes of institutional investors in excess of regular limitations. For further information on this offering, see "Treasury Bulletin" for September 1950, page A-1; for the amount of sales, see the issue for February 1951, page 29.

5/ Sales figures after April 30, 1941, represent adjustments.

6/ Beginning May 1951, includes exchange of matured Series E bonds for Series G bonds as shown in Table 4.

TREASURY SAVINGS NOTES

Treasury tax and savings notes have been issued in five series: Tax Series A from August 1, 1941, through June 22, 1943; Tax Series B from August 1, 1941, through September 12, 1942; Savings Series C (originally designated Tax Series C) from September 14, 1942, through August 31, 1948; Savings Series D from September 1, 1948, through May 14, 1951; and Savings Series A beginning on May 15, 1951.

Details concerning terms and conditions for purchase and redemption and investment yields of Savings Series A appear in the June 1951 issue of the "Treasury Bulletin", page A-1. Similar information with respect to Savings Series D will be found in the October 1948 and September 1949 issues, and with respect to Savings Series C in the October 1945

issue. For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Excludes trust departments.

2/ Includes trust companies and, beginning with figures for July 1949, also includes stock savings banks. Formerly these banks were shown as a separate classification, but they are no longer so reported.

3/ Includes those banks and insurance companies not reporting in the Treasury Survey.

4/ United States savings bonds, Series E and F, are shown at current redemption values. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

5/ C. C. C. demand obligations in the amount of \$102 thousand, all held by commercial banks, are not included in the total amount outstanding; holdings by reporting banks are not available.

6/ Holdings by reporting agencies not available.

7/ Excludes guaranteed securities held by the Treasury.

8/ Issues which commercial banks may not acquire prior to specified dates

(with minor exceptions); see "Debt Outstanding", Table 3, footnote 1.
 9/ Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly" tax-exempt securities are those with the income exempt from both normal tax and surtax. "Partially" tax-exempt securities are those with the income exempt from the normal tax except that in the case of partially tax-exempt treasury bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to normal tax and surtax.

10/ Includes F. H. A. debentures; see footnote 11.

11/ A small indeterminate amount of these debentures is partially tax-exempt.

12/ The proprietary interest of the United States in these banks ended on June 26, 1947.

* Less than \$500,000.

MARKET QUOTATIONS, MAY 31, 1951

Market quotations shown here are over-the-counter closing quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York. The securities listed in Section I include all public marketable securities issued or guaranteed by the United States Government except those not regularly quoted in the market. The issues excluded are postal savings bonds and Federal Housing Administration debentures. The latter are

the only public marketable interest-bearing guaranteed securities outstanding. Section II lists the public marketable securities issued by Federal agencies but not guaranteed by the United States Government. Daily quotations for the securities listed in Sections I and II are published monthly in the Treasury Department statement, "Prices and Yields of Public Marketable Securities Issued by the United States Government and by Federal Agencies".

1/ Excess of price over zero yield price computed to June 15, 1951.

2/ Quoted on a yield basis.

3/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of high and low, in case of re-currency, are the latest dates.

4/ For short-term Treasury notes, see Table 2.

5/ Quoted on a yield basis beginning March 7, 1951; the 2% taxable issue of September 15, 1951-53 returned to price basis on April 9, 1951. This issue is callable on 4 months' notice on March 15, 1952. Yields are converted to prices (to the nearest quarter of a thirty-second) in the price range. The 2-3-1/4% partially tax-exempt issue of June 15, 1951-54 was called on February 14, 1951, for redemption on June 15, 1952. This issue returned to a price basis on May 29, 1951. The 3% partially tax-exempt issue of September 15, 1951-55 was called on May 14, 1951, for redemption on September 15, 1951.

6/ Yield to maturity. Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

7/ Included in the average yield of long-term taxable Treasury bonds as shown under "Yields of Treasury and Corporate Bonds".

8/ For definition see "Debt Outstanding", Table 3, footnotes 1.

9/ All partially tax-exempt except Panama Canal bonds, which are wholly tax-exempt.

10/ Not quoted on May 31, 1951.

11/ Amount issued on June 1, 1951, was \$35 million.

12/ Amount issued on June 1, 1951, was \$76 million.

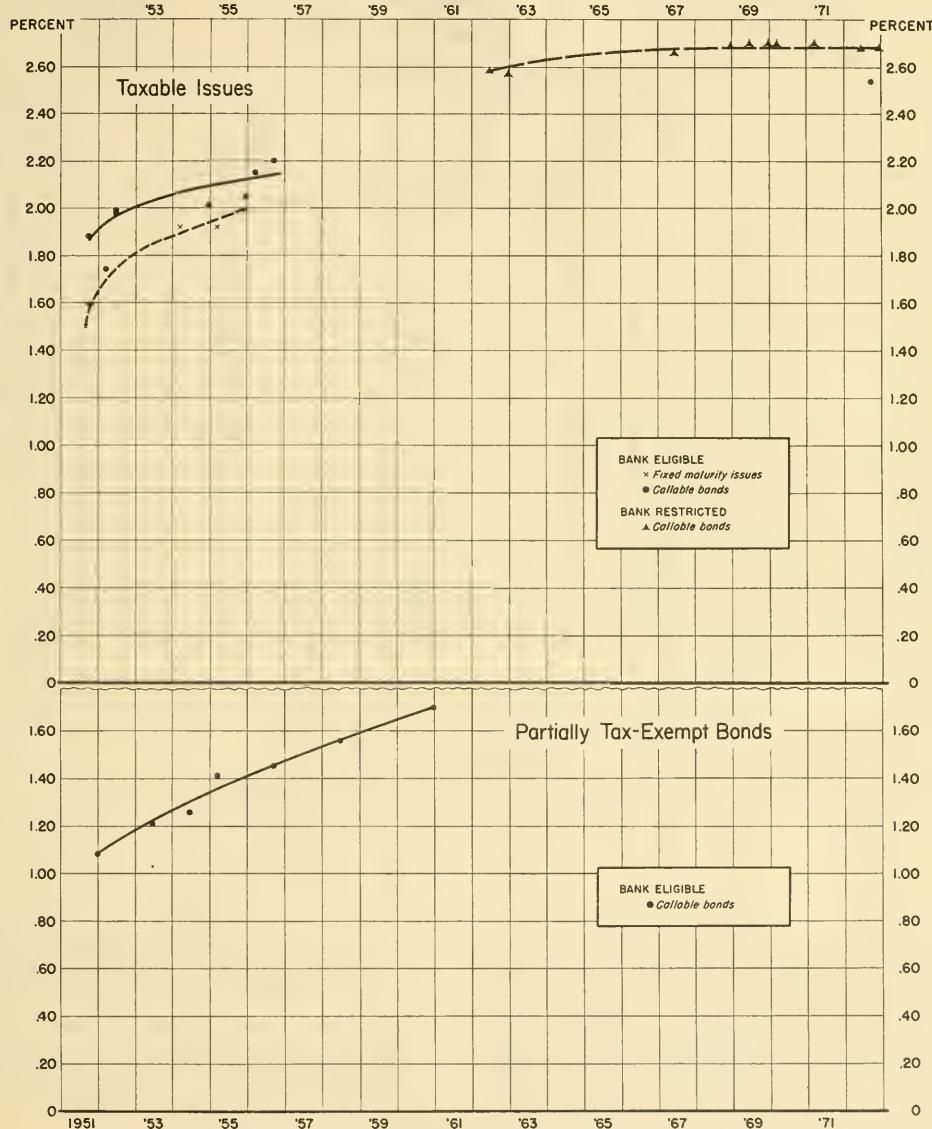

13/ Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in the Federal land banks ceased on June 26, 1947.

14/ Callable on 15 days' notice on November 1, 1951.

15/ Callable on 15 days' notice on July 1, 1951.

YIELDS OF TREASURY SECURITIES, MAY 31, 1951
 Based on Mean of Closing Bid and Ask Quotations

Explanation: The points represent yields to call when prices are above par and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1947, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market as reported to the Treasury by the Federal Reserve Bank of New York, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership", in this issue of the "Treasury Bulletin". The partially tax-exempt average was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

2/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

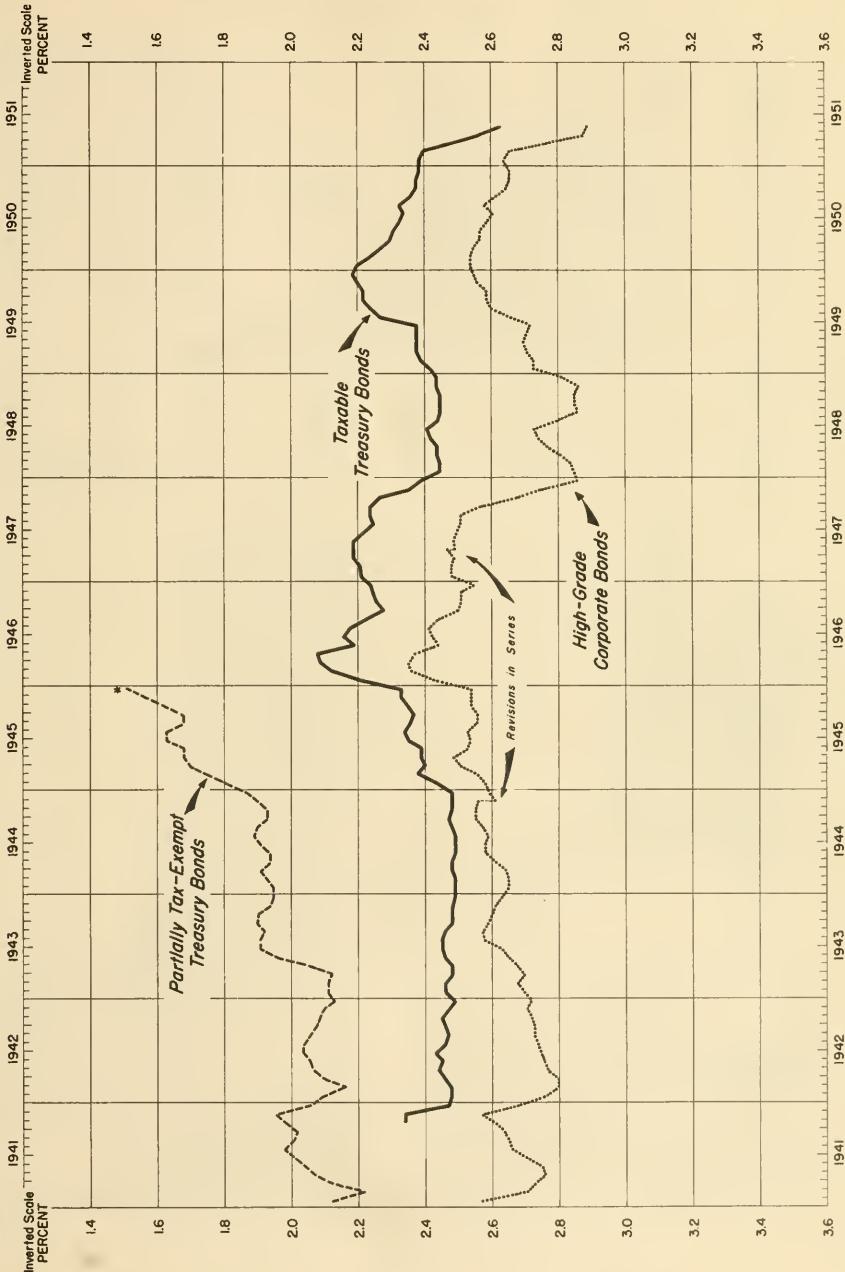

3/ As of December 21, 1949, the Consolidated Gas Electric Light and Power Company of Baltimore 2-3/4's of 1981 were dropped from the average, having been called.

4/ As of October 20, 1950, the Standard Oil Company of California 2-3/4's of 1965-66 were dropped from the average, having been called.

5/ Market closed.

Sources: Daily Treasury Statement for total receipts from internal revenue; reports by collectors of internal revenue for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositories; they do not coincide with amounts reported by collectors because of the lag in deposits of collections and because certain taxes are paid directly into the depositories.

1/ Excludes collections for credit to certain trust accounts for island possessions; includes corporation income tax on Alaska Railroad.

2/ Includes excess profits taxes formerly shown separately as follows: unjust enrichment through 1947 (thereafter these collections are included under "Miscellaneous"), declared value (repealed for years ending after

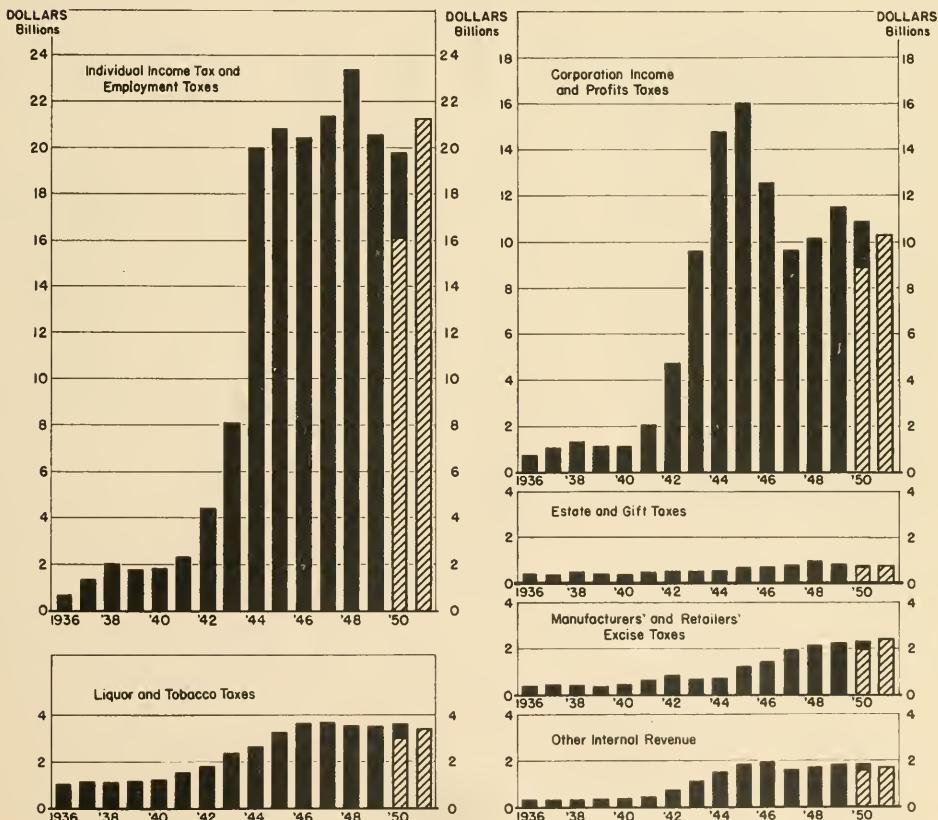

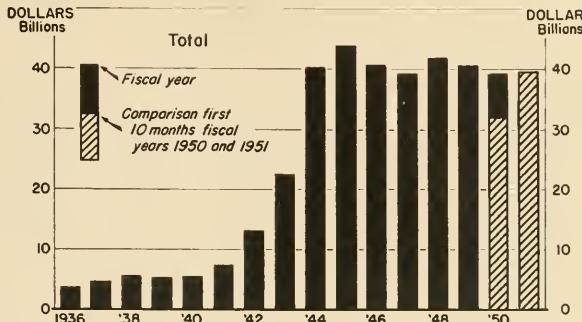

June 30, 1946), Excess Profits Tax Act of 1940 (Title II of the Second Revenue Act of 1940, which was repealed for years ending after December 31, 1945), and Vinson Act as amended (34 U.S.C. 496).

3/ Beginning January 1951, withheld income taxes and social security employment taxes on employees and employers are paid into the Treasury in combined amounts without separation as to type of tax. The figures for prior periods have been combined accordingly in this table for purposes of comparison, but are shown separately in the March 1951 and preceding issues of the "Treasury Bulletin".

4/ Repealed for years ending after June 30, 1945. Beginning with July 1950, included under "Miscellaneous".

CAPITAL MOVEMENTS

Data relating to claims on foreigners and liabilities to foreigners, and capital movements between the United States and foreign countries, have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury regulations thereunder. Information covering the principal types of data and the principal countries is reported each month by banks and bankers and securities brokers and dealers in the United States. This information is published regularly in the "Treasury Bulletin". Supplementary information is published at less frequent intervals. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

The term "foreigners" as used in these reports covers all institutions and individuals (including United States citizens) domiciled outside the United States, as well as international organizations, wherever domiciled, created by treaty or convention between sovereign states. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, basis of reporting, and derivation of capital movements figures appeared in the April 1950 issue of the "Treasury Bulletin", pages 50-52. Revised report forms and regulations became effective with

the data for January 1950. Attention is called to the fact that although the grand total figures on the revised reporting basis are reasonably comparable with those for preceding months, data for individual countries in some instances are not comparable because of certain changes in coverage and geographical classification.

The supplementary information, contained in Section IV, is presented in three tables appearing at different times. Table 1 gives data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue of the "Treasury Bulletin" and begins with data for September 30, 1946. Table 2 supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. This table appeared for the first time in the December 1949 issue. Data are for the end of the calendar year beginning with 1942. Table 3 gives information on short-term liabilities to countries not regularly reported separately by banks and bankers. This table appeared for the first time in the April 1950 issue. The data have been requested at irregular intervals, the earliest date being October 1943.
