Leading the Way to Enduring Peace and Prosperity

The following address of Secretary Vinson was delivered before the Tri-State Bankers' meeting (Tennessee, Mississippi, and Arkansas) at Memphis, Tennessee on May 23, 1946. It was delivered by Assistant Secretary Foley on behalf of Secretary Vinson who was unable to attend because of official duties.

Our country is the most influential nation in the world. That is a basic fact. It is recognized by the peoples and governments of other nations. Whatever doubt exists arises not as to whether we are the most influential nation, but as to whether we fully realize the import of this basic fact and are ready to accept the leadership and to assume the responsibility that it entails. We must tackle this job in such way that these doubts vanish. We must accept fully the leadership and responsibility that now rest upon our shoulders, and this job is one that requires our attention and effort day in and day out.

In exercising our leadership and assuming our responsibility, we must first set a good example in our own country. We must continue to be the most freedom-loving and freedom-having people in the world. We must continue to show the world that democracy works, and works well, and that it is the best political system that man has established to govern his relationships with other men. We must continue to be the exemplars of living under justice, law, and order. We have lived through prosperity, depression and war under justice, law, and order, and it is our duty to keep this record unblotted so that all nations may be inspired to live in justice, order, and security.

Our laws so far as possible are broad principles and our laws are applicable to all. And so, our laws are respected and are effective. The men who make, execute, implement and interpret our laws are public servants and have the public interest as their guiding principle. And thus, equity, humanitarianism, and life are added to our system. To say that our government is either a government of laws or a government of men, is to me a false dichotomy. Ours is a government both of laws and of men.

We must not only set a good example politically, socially, and culturally, but also economically. This requires the maintenance of a sound, expansive economy in our nation. A sound economy means an economy that affords full production and a high national income. A sound economy means an economy that affords work for those who want to work, at a decent return for that work, whether it be as an employee, an

employer or a farmer. In short, a sound economy means that all forms of business activity are going in high gear.

The basic principle underlying that sound economy will be our principle of free enterprise. Our system of free enterprise has built us a great nation. It will build us a greater nation. We must show the world that it is possible for all groups within a nation to have economic security and a full opportunity to reap just rewards for initiative, talent, and industry.

That, in summary, is what we must do in our own country. But we must do a second job in order to discharge our duty of leadership, and that is to be the world's best proponent of international cooperation. This, too, means attention and work on many fronts. We must do everything in our power to achieve genuine cooperation in the political field. The institution of the United Nations must succeed.

We must lead the way in setting a new standard of international law and justice. This includes making the International Court of Justice a respected and meritorious tribunal like our own Supreme Court. In this country we have long accepted the fundamental principle that a man may not be the final judge of his own cause. Gradually this concept must be accepted by the peoples of all the world.

We must lead the way in international co-operation on economic matters. This includes making the International Monetary Fund and the International Bank for Reconstruction and Development effective institutions.

Building the kind of nation and world we want requires constant vigilance and unstinted effort in all of these fields. Tonight, I shall speak chiefly on the economic situation in our country and among nations.

We have had our share of irritations and disappointments since VJ-Day, nine months ago. Not all of our kinsfolk and friends could return immediately to be with us. Our responsibility for world order continued beyond the day that actual warfare ceased. Automobiles, refrigerators,

and nylons did not appear in our stores overnight. A production machine had to be changed over from the ways of war to the ways of peace. Transportation was not always available. Our distribution system could not recover automatically from the strains of war. Many have been restive as a result of wage, price, or raw material problems. Some days it seemed that we solved one problem only to be confronted with another, or two others.

If we step back and view the over-all situation in perspective, however, we readily realize that we have made much progress in the short period of nine months since VJ-Day. Our reconversion is well along. Nearly one hundred thousand war contracts were cancelled overnight when Japan surrendered. More than five million men were discharged from military service by the end of the year. These plants and men have gone back to peace. In fact, our production of peacetime goods reached an all-time high by March. This is difficult to believe, for we do not see it in our stores. Nonetheless, it is a fact, and we shall see the results when the supply lines have been filled.

Our national income is at a high level. Not nearly so many have become unemployed as was expected. While the pressures of inflation have been terrific, a remarkable job has been done. Our values, therefore, are not distorted as we swing into this peacetime high-level economy. While we have had our headaches, we are in a much better position than we were after the first world war. This time we have a fighting chance to do the job right, at home and abroad.

One of the best evidences that we are in good shape is that we are well on our way to balancing the budget, and have already made substantial reductions in the public debt. While our receipts have remained high, our expenditures have been cut in rapid fashion.

The Federal Government spent \$9.7 billion last June against \$4.2 billion in April, and that rapid decline will continue for some time to come. Contrary to the impression that many like to hold, Washington has made a wholehearted effort to put its budget on a peacetime basis.

We often spend today to save tomorrow. Rapid settlement of war contracts, for example, increases the Government's immediate expendi-

tures, but speeds reconversion to put our economy and the Government's finances in a sounder position for the long haul. Contract settlements have been very rapid; they will be practically completed by the end of this fiscal year. In view of the speed of demobilization and reconversion, and the pushing forward of expenditures which it has involved, I feel that our record of reducing the current rate of total expenditures by over 50 percent since VE-Day is remarkable.

Meanwhile our receipts have been well maintained. During the first ten months of this fiscal year, July 1, 1945, through April 30, 1946, our net receipts were less than 5 percent below the corresponding period the previous year when we were at total war. Unless our receipts and expenditures picture is significantly altered, and the prevention of that includes doing our job in maintaining a sound and expansive economy at home, and doing our part in re-establishing production and trade among the nations, it now appears that we can have a balanced budget by the end of our next fiscal year, June 30, 1947.

In view of the fact that our position is better than we expected, that is, our expenditures are much less, and our receipts are much higher, we are using some of the money on hand to reduce the public debt. By June 15, the debt will be more than \$10 billion below its peak reached in February. That is a sizable reduction, and we had no significant reduction before this for 16 years.

We have made a start on the road of high production and income. We should not lose the advantage of this good beginning. We will be helped tremendously in maintaining this high level economy by the fact that we have developed a large reservoir of demand. All through the war, we have done without many consumer goods that we want. We want to improve our standard of living. And we now have what we have not always had - the means to do it. This accumulated demand can, barring inflation, be the flywheel of our production system for a long time to come. All Americans can be more optimistic, with justification, about their future than at any previous time in our history.

This American prosperity which we have, and shall continue to have, is an important factor in the assurance of a stable world economy. It is often said that we cannot have prosperity in

America if the world is in an unhealthy economic condition. With that I do not disagree, but I emphasize the converse, that the world does not stand a chance of having a sound, stable economy unless we are a prosperous nation.

This is simply one of the corollaries to the basic fact that we are today the most influential nation in the world. We are going to contribute and contribute greatly, to a world that is stable, politically and economically, by having a sound, expansive economy at home.

There are, however, other things we must do to improve the economic situation among the nations. We want high levels of production not only in America, but throughout the world. We want the goods that are created to flow freely among the nations.

Our goal, then, is more production and more trade throughout the world. To accomplish this, we must work to remove the discriminations and restrictions that hamper production and trade. The removal of such economic barriers is, by the very nature of the problem, a joint undertaking. No one nation, no matter how big or strong it may be, can successfully solve a problem wherein the very essence of the problem is the relationship between nations. No one nation can meet an international problem.

The way to solve international problems is to obtain cooperation among the nations. The United States has long advocated this policy of international cooperation. With us, it has been more than a high principle. We have done something about it. We have done something about it, for example, through the Reciprocal Trade Agreements, the Export-Import Bank, the United Nations Relief and Rehabilitation Administration, the International Food and Agricultural Organization, the Social and Economic Council of the United Nations, and the International Monetary Fund and the International Bank for Reconstruction and Development.

I wish to place particular emphasis upon the last two, the World Fund and Bank. At Bretton Woods, representatives of more than 40 countries agreed upon the basic principles that should govern these two institutions. Bretton Woods is perhaps the best example that we have seen of so many nations getting together and working together to solve their common problems in the

interests of bettering the economic relationships among all nations, as well as in their own self-interest.

By the end of 1945, more than enough countries had ratified this work of their representatives so that the organizations could be established. This spring in Savannah, Georgia, there was held the inaugural meeting of the World Fund and Bank. At this meeting there was further implementation of the basic principles which had been agreed to at Bretton Woods. More important, at this meeting there was a re-dedication to the proposition that the nations could live and work together in peace and prosperity. Our faith in the future was refreshed.

These two institutions will go far in removing economic problems that often lead to economic warfare, which usually leads in the end to actual shooting. These institutions are cooperative enterprises of governments. As such they must not become just two more financial institutions.

It is rather difficult for us in America to realize the physical devastation that was caused in many lands by the war. These nations must reconstruct in order that they can produce and take their part in a sound world economy. The International Bank will offer aid to these countries in the reconstruction of their economy, aid which could be secured in no other way. This supplementary aid is to be given on terms fair to both the lender and the borrower. The capital of the Bank will be primarily a surety fund. The loans will be financed almost entirely by private investors.

In the past we have often found nations interfering with the flow of trade between nations. We had many forms of economic warfare in the '30's which included devices such as currency depreciation. Through the International Monetary Fund, the member nations will remove monetary restrictions and substitute fair standards of currency exchange. This will greatly aid in creating a volume of world trade far greater than we have ever had before.

We have, then, developed many concrete, practical measures to wipe out international economic diseases, and are developing more. There are many harmful trade and monetary restrictions existing that are not wanted, but which may be considered necessary until a clear alternative

can be seen and followed. These other restrictive trade measures should be alleviated or abolished. The United States has proposed that there be established an international trade organization to meet many of these problems. Britain, at the time of the American-British financial agreement, agreed with us on all of the main principles to guide a proposed International Trade Organization.

The financial agreement, moreover, meets directly several of the most important trade and currency obstacles that now exist. Basically, the agreement is a contract between our two countries on trade and currency policies. It has two major aspects. First, it provides that Britain will abolish trade and currency restrictions and discriminations that were in effect during the war and which would be substantial obstacles to peacetime world trade. Second, it provides the financial wherewithal that makes it possible for Britain to remove these restrictions and it requires the repayment of that financial aid.

The underlying purpose of this financial agreement between Britain and the United States is to make it possible to follow the principle of fair and full world trade. A large volume of trade between countries benefits America, benefits Britain, and benefits the whole world.

Our export trade is a vital link in American prosperity. Even when our foreign trade was severely reduced during the '30's, our exports were some 7 or 8 percent of our agricultural and industrial production. Foreign trade meant the difference between prosperity and depression for many of our producers in the factories and on the farms. Of all our foreign trades, no part was more important than that with the British Empire.

It is a noble attribute to learn from experience, and it is a very costly characteristic not to do so. We must not forget the lesson of the decade before the war when our industry and agriculture suffered from trade and currency restrictions. The exports of the United States were harder hit by these devices than those of any other country. In 1928, our share of world exports was 15.8 percent of the world total of \$32.5 billion. By 1934, our share of world exports was 11.5 percent of the world total of \$18.5 billion. This drastic decline made a large contribution to the severe depression in industry

and the collapse in agriculture that we experienced.

Particularly hard hit were our exports of wheat, cotton, tobacco and lard. From 1925 to 1928, we sold abroad an annual average of more than \$1,250 million of these four products. From 1931 to 1934, our annual average was less than \$500 million on these four items. The lack of markets abroad for our agricultural products was an important factor in the decline of nearly 60 percent in farm prices in the four years between 1928 and 1932.

Our foreign trade cannot reach the level necessary for American prosperity if the world again resorts to currency and trade restrictions. Unless our producers and exporters have access to world markets on fair and equal terms, we will not be able to maintain our production in those fields in which we have long specialized, fields such as raising cotton, tobacco and wheat, making automobiles, machinery and equipment. We must have a high level of foreign trade to have high levels of production, employment and national income in America. All sectors of our economy, all sections of our country, are directly or indirectly dependent upon that foreign trade.

International economic cooperation and the expansion of trade among all the nations are definitely in the interests of each country and of all countries. When countries exchange their surplus products, they all gain. It means more production and a higher level of income in the country which sells, and it means more goods and a better standard of living in the country which buys.

During the war, Britain adopted certain currency and trade controls. These controls are still in effect. American business cannot afford to see these controls continued.

These wartime controls bring to mind such terms as sterling area, blocked sterling, and the dollar pool. What do these terms mean?

Living in the United States, we are accustomed to money in the form of dollars and cents. We earn dollars and we spend dollars.

Outside of this country, there are other currencies. There are a few currencies of inter-

country application, but the world-wide currencies are primarily the dollar and the pound sterling. If someone abroad wants to buy your cotton, tobacco, wheat, lard, machine tools, or automobiles, he has to have dollars or be able to change his money into dollars.

In converting money from one form to another, restrictions and obstacles can grow up or be imposed. If there is not free convertibility, there is a brake on trade between the nations that use different forms of currency.

When we speak of the sterling area, we are referring to the countries that use the pound sterling form of currency. These are the countries of the British Empire, except Canada, and some European countries who keep their monetary reserves in the form of sterling in London. Australia, for example, keeps its reserves on deposit in England's banks.

Before the war, the sterling area countries could draw on these reserves to buy goods anywhere in the world. If an Australian firm wanted to buy American cotton, it sold sterling for dollars. During the war, however, Britain had to stop this convertibility of sterling. That meant that sterling was blocked. Its use was restricted. Britain had to say to the countries of the sterling area, to Egypt, India, Australia, and all the rest, your sterling reserves cannot be converted into dollars. You can use your sterling for making payments to each other, but not to outsiders.

The primary reason for restricting the convertibility of sterling was that England did not have enough dollars and gold. During the war, Britain sold \$4.5 billion worth of her foreign investments to finance her expenditures. Moreover, she incurred the enormous foreign debt of \$13 billion in the form of sterling balances in London banks, and sterling securities in the British Treasury. Britain could not convert such large amounts into dollars or other currencies. She had to block sterling.

Britain had to do more than block sterling. She had to mobilize all of her dollar resources to pay for war needs. This was done through the so-called dollar pool. The dollar pool worked as follows:

When an Egyptian exporter sold goods in the

United States, he turned over the dollars he received to the National Bank of Egypt and received Egyptian pounds. The National Bank of Egypt sold these dollars to the British Treasury for sterling. The dollar receipts of the sterling area were in this way pooled in London. If dollars were needed in the sterling area, application was made to London for an allocation. London allocated the dollars on the basis of the most essential needs. In order to conserve dollars, London made no allocation to buy goods in America if they could be secured from any one of the sterling area countries. This device really puts a brake on buying American goods.

Along with these financial controls there were established direct controls on imports in all sterling area countries. These controls, such as import licenses, are used to keep out goods that must be paid for in foreign money. In practice, this meant keeping to a minimum imports from countries that had to be paid for in money other than sterling.

These restrictions are still in effect. They were necessary during the war. They helped Britain in mobilizing her resources and devoting them to war purposes. These devices, however, are dangerous in peace. They restrict trade. To restrict trade in time of peace is to force poverty on the world.

England and the other sterling area countries, as well as ourselves, do not wish these restrictions to be continued. Nonetheless, they might have to be. Britain must find some means to pay for her imports.

Britain, as an island nation, relies heavily upon foreign trade. During the war, what she shipped in and bought and what she shipped out and sold was thrown out of kilter. In 1944, she exported only 30 percent of what she did in 1938. Her export industries were converted to war production. She lost a large part of her merchant fleet. Her income from foreign banking and insurance services declined. She sold many of her most marketable foreign investments and has lost the income from them.

Britain must somehow make good the fall in her foreign income, because she must import heavily to feed her people and her factories. Her exports are off, yet she must import a tremendous volume to live. She does not have the

dollars to pay for these imports. Moreover, her shortage of dollars means that she cannot make sterling convertible into dollars until the blocked sterling balances are settled. It means that she cannot permit the sterling she pays for her imports to be used freely in any country, and particularly in the United States. It means that she must continue the dollar pool.

To remove Britain's shortage of dollars and to eliminate these obstacles to trade is a major international economic problem. The solution definitely depends upon what America and Britain do. America is the largest exporting country in the world; England is the largest importing country in the world. Between us and the countries in our trading areas, 75 percent of the world trade is done.

A loan to Britain will help balance the difference between what she must buy abroad and what she sells, until she reestablishes a full flow of exports. During this transition period her imports will far exceed her exports. It must be added, however, that though her imports will be large, her resulting standard of living will not be much different from the austere levels she had during the war.

The American-British financial agreement goes directly to the two basic problems of eliminating Britain's shortages of dollars and of removing the currency and trade restrictions. The loan part of this financial agreement opens a line of credit of \$3-3/4 billion. This line of credit is a loan, not a gift. The principal must be repaid. It is, moreover, an interest-bearing loan. The interest rate of 2 percent, beginning in 1951, is not a nominal rate, for it is quite comparable to what it costs your government to borrow money.

The agreement provides that this interest will be paid, except under certain temporary depressed conditions which are objectively defined in the agreement. In case of such depressed conditions, it is thought to be far better to waive the interest for that temporary period than to force a default on the entire amount of the loan.

In consideration for the use of the money in the loan, which is to be repaid with interest, Britain promises to remove within a year, unless we agree to a temporary extension, her wartime trade and currency controls.

This means:

1. All countries of the sterling area will be allowed to use the proceeds of their exports to England to buy goods in any other country, including the United States. Sterling arising from current trade will be made fully convertible.
2. All countries of the sterling area will be able to use the dollars they acquire from their trade to make purchases in the United States. The sterling area dollar pool, a most restrictive device, will be dissolved.
3. England's import controls will be administered in a manner that is not discriminatory against American goods. Any export from the United States to England will be paid for in dollars or in sterling that is convertible.
4. England will settle the blocked sterling obligations out of her own resources, not out of the loan. The funds that are released in settling these balances, whether now or later, will be available for purchases in any country, including the United States.
5. England will support the American proposal for the establishment of an international trade organization for the reduction of trade barriers and for the elimination of trade discrimination.

In addition to the fact that the financial aid is a repayable loan, and that Britain will remove the trade and currency controls which I have just discussed, it should be remembered that the bulk of the dollars will be spent in the United States, and those that are not so spent in the first instance, will eventually find their way here. This will increase the business of our industry and agriculture.

This agreement is a big step in preventing economic warfare. It is a big step in creating a world in which countries live and work together in peace and prosperity. For England, it means a chance to feed her people and reconstruct her industries in a world of expanding trade. For the United States, it means the opening of the markets of our best customers to the products of our

factories and farms. It means a larger American share in a larger world trade.

The alternative is as unhappy as it is clear. The great danger before us is the division of the world into conflicting blocs. We are trying to meet the economic part of this problem through cooperation in the World Fund and Bank. That has been and will be the policy of the United States. Russia has not yet joined the Fund and Bank. It is hoped that she will become convinced of the advantages of full participation. If we make it possible through the financial agreement for England to adopt the fair currency and trade practices we advocate, there is every prospect that the Fund and Bank will succeed in their work and that all countries will find it advantageous to be in rather than outside these institutions.

If England finds it necessary, however, to keep her wartime currency and trade restrictions,

it will result in a British bloc, an American bloc, and a Russian bloc. Such a development would probably be an unsurmountable obstacle to peace and prosperity. No country wants that kind of a world, and no country can afford that kind of a world.

Two world wars and a world-wide depression have taught this generation the bitter lesson that the only road to peace and world prosperity is through international cooperation. The political and economic problems of the world cannot continue to be solved by force. That road leads to destruction.

The political and economic problems of the world can and must be solved by international cooperation. We are on our way on this road. It requires hard work, constant attention, and true devotion. But the road leads to the greatest goal that mankind has ever set - enduring prosperity and peace.

Treasury Market Financing in May

Historical details of Treasury market financing operations involving bonds, notes, and certificates of indebtedness, beginning with the Fourth War Loan, are published in the tables on pages 32 and 33. Details of weekly Treasury bill offerings are shown on pages 34 and 35.

Refunding and Cash Payment

On May 20, 1946, Secretary of the Treasury Vinson announced that payment would be made in cash for the 3% Treasury bonds of 1946-48 and the 3-1/8% Treasury bonds of 1946-49 called for redemption on June 15, 1946, as well as for about \$2 billion of the \$4.8 billion of the 7/8% certificates of indebtedness maturing on June 1, 1946. For the remaining \$2.6 billion of maturing certificates, Secretary Vinson announced the offering, on an exchange basis, par for par, of a new issue of one-year 7/8% certificates. Cash subscriptions were not received. Altogether, the maturities in June aggregated \$6.7 billion of which \$3.9 billion was paid off in cash.

Maturing issues. Details of the three issues maturing in June are shown in the following table:

Maturing issues	Amount out-standing	Tax status 1/
(In millions of dollars)		
7/8% certificates of indebtedness due 6/1/46.....	4,799	Taxable
3% Treasury bonds of 1946-48 called for redemption 6/15/46.....	1,036	Partially exempt
3-1/8% Treasury bonds of 1946-49 called for redemption 6/15/46.....	819	Partially exempt
Total.....	6,654	

An analysis of the Treasury reports on ownership of Government securities indicates that on April 30, 1946, about 46% of the maturing issues were owned by reporting commercial banks and Federal Reserve Banks. It will be remembered that the maturing certificates were sold in the Seventh War Loan and were thus more widely held by commercial and industrial business firms than most certificates. Many of these holdings had been liquidated in the market to raise funds for reconversion purposes and some of the cash obtained from the present pay-off will be so used. The table below summarizes the ownership figures of the three maturing securities as reported to

1/ For definitions of tax status, see p. 31.

the Treasury Survey of Ownership of Securities Issued by the United States Government and by Federal Agencies, April 30, 1946.

Maturing issues	Total out-standing	Held by	
		Reporting banks 2/	All others
(In millions of dollars)			
7/8% certificates of indebtedness due 6/1/46.....	4,799	1,937	2,863
3% Treasury bonds of 1946-48 called for redemption 6/15/46.....	1,036	626	410
3-1/8% Treasury bonds of 1946-49 called for redemption 6/15/46.....	819	472	346
Total.....	6,654	3,035	3,619
(In percent)			
7/8% certificates of indebtedness due 6/1/46.....	100	40	60
3% Treasury bonds of 1946-48 called for redemption 6/15/46.....	100	60	40
3-1/8% Treasury bonds of 1946-49 called for redemption 6/15/46.....	100	58	42
Total.....	100	46	54

The figures for April 30 are the latest available. It should be noted that shifts in ownership after that date probably resulted in some increase in the amounts held by banks.

New issue. Since the new one-year certificates were offered in exchange for only \$2.6 billion of the \$4.8 billion of maturing certificates outstanding, subscriptions were received subject to allotment to all holders on an equal percentage basis, except that subscriptions in amounts up to \$25,000 were allotted in full. On May 31, 1946, Secretary Vinson announced that subscriptions for the new offering aggregated \$4,166 million. Subscriptions in amounts of \$25,000 or less were allotted in full in an amount of \$63 million. Subscriptions in amounts of over \$25,000 were allotted 66% on a straight

2/ Includes (1) 7,371 commercial banks holding approximately 95% of the United States Government obligations held by all commercial banks in the United States, and (2) Federal Reserve Banks.

percentage basis but not less than \$25,000 to any one subscriber and with adjustments to the next highest thousand where necessary. Total allotments amounted to \$2,775 million leaving \$2,025 million to be paid off in cash.

The new certificates were dated June 1, 1946 and will mature June 1, 1947. Interest at the rate of 7 1/8% per annum will be payable semi-annually on December 1, 1946 and June 1, 1947,

and is subject to all Federal income taxes.

The certificates were issued in bearer form only in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000. The exchange was on a par for par basis. Subscription books closed at the end of business on May 22, except for the receipt of subscriptions from holders of \$25,000 or less of the maturing certificates for which they were held open through May 24.

Bank Purchases of Restricted Treasury Bonds

On May 17, 1946, Secretary of the Treasury Vinson announced that he had amended Treasury regulations to permit commercial banks to hold a limited amount of restricted Treasury bonds for trading purposes. He stated that the new arrangement was designed to enable banks to render better service to individuals and corporations wishing to trade in restricted bonds.

The limit on commercial bank holdings of all the restricted issues combined is 1% of demand deposits (excluding war loan deposits and interbank deposits) or \$500,000, whichever is less. The bonds so held shall be in addition to and shall be kept in separate accounts from restricted bonds which were acquired in other ways.

Restricted Treasury bonds are those which, with minor exceptions, may not be owned by commercial banks prior to designated dates. The exceptions have been (1) purchases by commercial banks which were permitted concurrently with the 4th, 5th, and 6th War Loans and the Victory Loan for the limited investment of their savings deposits, and (2) temporary acquisitions by commercial banks of restricted issues through forfeiture of collateral. The new arrangement provides for a third exception.

Restrictions on bank ownership of securities were instituted early in the war period, even before the 1st War Loan, as a part of the Treasury Department's program of combating inflation. The primary objective of this program was to emphasize nonbank purchases of U. S. Government securities. The sale of bank restricted issues was one of the important techniques used in carrying out this policy.

The restricted issues of Treasury bonds to which the new regulation refers are outstanding in the amount of \$53.5 billion. Of the \$53.5 billion, all issues except one are restricted from commercial bank ownership before 1952. The one exception is the issue of 2-1/4% Treasury bonds of 1956-59 outstanding in the amount of \$3.8 billion, which becomes eligible for commercial bank ownership in 1946. There remain \$49.6 billion which do not become eligible to commercial banks until sometime in the years 1952 to 1962, or from 6 to 16 years from now. The table below presents a list of the restricted securities classified by the earliest dates upon which commercial banks can own them.

Bank Restricted Treasury Bonds Classified
by Earliest Date Eligible for Ownership
by Commercial Banks

Year issue becomes bank eligible	Description of issue	Amount out- standing (In billions of dollars)
1946.....	2-1/4% - 9/15/56-59..	3.8
1952.....	2-1/4% - 6/15/59-62.. 2-1/4% - 12/15/59-62.. 2-1/2% - 6/15/62-67.. 2-1/2% - 12/15/63-68..	5.3 3.5 2.1 2.6
	Subtotal.....	13.7
1953.....	2-1/2% - 6/15/64-69.. 2-1/2% - 12/15/64-69..	3.8 3.8
	Subtotal.....	7.6
1954.....	2-1/2% - 3/15/65-70.. 2-1/2% - 3/15/66-71..	5.2 3.5
	Subtotal.....	8.7
1962.....	2-1/2% - 6/15/67-72.. 2-1/2% - 12/15/67-72..	8.0 11.7
	Subtotal.....	19.7
	Grand total.....	53.5

As already noted, some of these restricted Treasury bonds were sold to commercial banks concurrently with several of the loans, namely, the 4th, 5th, and 6th War Loans and the Victory Loan. Bank purchases of all the securities made available to them at these times, including the restricted issues, were limited by formulas based upon a specified percentage of commercial bank holdings of savings deposits with a top limit ranging from \$200,000 in the 4th War Loan to \$500,000 in the 6th War Loan and the Victory Loan. The table below shows the amounts of restricted issues which the commercial banks purchased concurrently with the various loans.

	Amount
	(In millions of dollars)
4th War Loan.....	349
5th War Loan.....	53
6th War Loan.....	72
Victory Loan.....	<u>1,276</u>
Total.....	<u>1,750</u>

The effect of the new regulation will be small in relation to the total of \$53.5 billion of restricted issues outstanding since maximum bank holdings under the new arrangement are estimated at around \$400 million. Combined with restricted issues acquired previously, about \$2 billion or only 4% of the total may thus be held by commercial banks at any time. The new

arrangement will, however, have the advantage of facilitating trading in these securities by small investors.

The table below classifies restricted issues outstanding by sales in the various war loans and other sales.

	Amount
	(In billions of dollars)
Sales to nonbank investors:	
In War Loans:	
1st War Loan.....	2.8
2nd War Loan.....	3.8
3rd War Loan.....	3.8
4th War Loan.....	5.3
5th War Loan.....	2.3
6th War Loan.....	2.7
7th War Loan.....	12.2
Victory Loan.....	<u>12.9</u>
Total.....	<u>45.6</u>
To Treasury investment ac- counts 1/.....	<u>3.7</u>
Other 2/.....	<u>2.4</u>
Total nonbank investors.....	<u>51.7</u>
Sales to commercial banks con- currently with loans (limited by formula).....	<u>1.8</u>
Total sales of restricted issues.	<u>53.5</u>

1/ Comprises purchases by Treasury investment accounts concurrently with the war loans beginning with the Fourth War Loan. In the first three loans such purchases were included as part of the loan.

2/ Includes sales of one issue before the 1st War Loan and several exchanges for maturing securities.

Assets and Liabilities of All Active Banks in the United States
December 31, 1939 through December 31, 1945

On May 23, 1946 the Comptroller of the Currency released the regular semi-annual report on assets and liabilities of all active banks in the United States and possessions as of December 31, 1945. The data were compiled from call reports of national banks and from information provided by State bank supervisory authorities on banks under their supervision. The report covers a total of 14,598 banks. Comparable data from earlier reports, starting with December 31, 1939, have been used in the preparation of the accompanying tables.

The highlights of the changes in the banking structure for the six-year period from December 31, 1939 through December 31, 1945, may be summarized as follows:

- (1) The asset position of all active banks reached new heights as of December 31, 1945. At the end of the six-year period, total assets aggregated \$178.4 billion, more than \$100 billion greater than on December 31, 1939.
- (2) For the year ending December 31, 1945, total assets showed a greater increase than during any of the preceding war years. This occurred despite the end of the two front war by the end of August of 1945.
- (3) During the six-year period, U. S. Government securities held by all active banks increased at a far greater rate than any other asset item. They increased in relation to total assets from 1/4 to more than 1/2.
- (4) For the calendar year 1945, however, the increase in holdings of Government securities began to level off noticeably, reflecting in part the fact that the Treasury borrowed considerably less in 1945 than in either 1944 or 1943.
- (5) For the first time since the beginning of the war period, loans showed a substantial increase, over \$4 billion, during the year ending December 31, 1945. Part of this growth was the result of

the impetus to private borrowing due to the war's end and part resulted from an expansion of loans to carry securities, mostly in connection with the 7th War Loan and the Victory Loan.

- (6) For the year ending December 31, 1945, time deposits showed about the same dollar increase as demand deposits. This contrasts with the situation in the early war years when increases in time deposits lagged far behind demand deposits.
- (7) The ratio of capital accounts to total deposits has declined during the period from December 31, 1939 through December 31, 1945. The ratio of capital accounts to deposits minus cash and U.S. Government securities, however, has risen.
- (8) The two classes of commercial banks - national banks and State commercial banks - have had increases in assets (and liabilities) which were far greater than those of mutual savings banks for the six-year period. This difference in growth between commercial banks and mutual savings banks was a result primarily of two factors: (a) mutual savings banks hold virtually no demand deposits, which accounted for the major increases in commercial bank totals during the period, and (b) the concentration of mutual savings banks in the northeastern part of the country where industrial expansion was not as rapid as in other areas.

The remainder of this article presents a more detailed description of the bank assets and liabilities during the six-year period from December 31, 1939 through 1945.

Summary by Classes of Banks

The latest report on bank assets and liabilities indicates that the growth in bank assets during recent years continued during 1945 despite the end of the war in Europe in May and the complete termination of the war by the end of

August. For the year ending December 31, 1945, total assets of all banks increased by \$25.4 billion or 17%, with about 60% of the rise occurring in the last half of the year. Assets held by each of the three major classes of banks - national banks, State commercial banks, and mutual savings banks - showed similar percentage increases during the year. As of December 31, 1945, national banks held about half of total bank assets, while State commercial banks accounted for about 40% and mutual savings banks about 10%.

For the six-year period from December 31, 1939 through 1945 total assets of all active banks increased by over \$100 billion. They rose from \$77.6 billion at the beginning of the period to \$178.4 billion at the end, a total percentage increase of 130%. The table below presents the distribution of total assets (or liabilities) by classes of banks as of December 31, 1939 and December 31, 1945.

Class of banks	Total assets (or liabilities)		Increase	
	Dec. 31, 1939	Dec. 31, 1945	Amount	Percent
	(In billions of dollars)			
National banks.	35.3	90.5	+55.2	+156
State commercial banks...	29.5	70.6	+41.0	+139
Mutual savings banks.....	11.9	17.0	+5.1	+43
Private banks..	0.9	0.3	-0.6	-68
Total.....	77.6	178.4	+100.8	+130

As the table shows, the most significant increases in assets, both actually and in percentages, occurred in holdings of the two classes of commercial banks - national banks and State commercial banks. The increases of over 130% in the holdings of these two classes of banks are largely a reflection of the rise in demand deposits over the period, since commercial banks hold almost all the demand deposits.

Mutual savings banks, on the other hand, had an increase in assets of only 43%. This was due mostly to the fact that the deposits held by this class of bank are almost exclusively time deposits, which increased at a materially slower rate than demand deposits over the six-year period.

The decline in assets of private banks resulted primarily from a decrease in the number of banks in that class as some of the larger ones shifted into the commercial bank category.

Assets

During the year ending December 31, 1945, the various asset items continued along a course similar to that established in the war period. Thus, despite the termination of the war on both fronts during the calendar year 1945, assets of all active banks were still reflecting primarily the Government's need for funds to finance the war, which had not yet slackened greatly by the end of the year.

Bank holdings of U. S. Government securities were still increasing during the year, but the rate of increase declined. For the year ending December 31, 1945, Government security holdings rose by \$15.5 billion as compared with an increase of \$20.2 billion for the previous year. Further evidence that the increases in Federal securities had become somewhat less significant than in earlier years, is indicated in the relationship of the increase in Government securities to the total increase in assets for various periods. The increases in these securities which had been accounting for over 75% of the total assets increases during each of the war years, dropped to 61% of the total increase for the calendar year 1945 and to only 50% for the half-year between June 30, 1945 and December 31, 1945. The following table presents a distribution of total assets by assets items as of December 31, 1944, June 30, 1945, and December 31, 1945.

Assets	Dec. 31, 1944	June 30, 1945	Dec. 31, 1945
	(In billions of dollars)		
U. S. Government direct and guaranteed obligations.....	86.4	94.2	101.9
Loans and discounts..	26.1	28.1	30.5
Other securities....	7.6	8.0	8.6
Interbank and reserve balances.....	29.2	29.2	33.6
Other assets.....	3.7	3.4	3.8
Total assets.....	152.9	163.0	178.4

Loans and discounts, which showed no consistent trend in the early part of the war period, have been increasing steadily during 1944 and 1945. In the calendar year 1945, they rose by \$4.4 billion, a substantially greater increase than had occurred during the previous year. The rise in loans for the year showed up most significantly in four specific types of loans. These were: (1) commercial and industrial loans - \$1.6 billion, (2) loans to brokers and dealers in securities - \$0.9 billion, (3) other loans for the

purchase or carrying of securities - \$1.3 billion, and (4) consumer loans to individuals - \$0.5 billion. Part of these loan increases can be considered the first indication of the changing situation due to the war's end, when private borrowing for purposes of investment and consumer's purchases will take the place of the leavening effects of a war economy. A large part of the increase is due also to loans made to carry securities purchased in the 7th War Loan and the Victory Loan.

Other securities, comprising State and local and miscellaneous securities, during the year ending December 31, 1945 also showed a new growth after having declined during most of the war years. For the calendar year 1945 they had an increase of \$1.0 billion or 13%. Another asset item which had a substantial rise during the year was interbank and reserve balances, which increased by \$4.4 billion, indicating heavy interbank transactions in process at the end of the year.

Over the six-year period, December 31, 1939 to December 31, 1945, the asset item which showed the most significant change was United States Government securities. Federal securities held by all active banks increased by \$82.5 billion or 424% during the period. Of the increase of \$100.8 billion in total assets, U. S. Government securities made up 82%. This compares with 88% for the 5-1/2 year period ending June 30, 1945. As a proportion of total assets of all active banks, Federal securities rose from 25% on December 31, 1939 to 57% on December 31, 1945. The following table presents the major assets items as of December 31, 1939 and December 31, 1945, and the change over the period.

Assets	Dec. 31,	Dec. 31,	Increase	
	1939	1945	Amount	Per-cent
(In billions of dollars)				
U. S. Government direct and guaranteed obligations.	19.4	101.9	+82.5	+424.0
Loans and discounts	22.4	30.5	+8.1	+36.2
Other securities...	9.3	8.6	-0.7	-7.9
Interbank and reserve balances...	22.2	33.6	+11.4	+51.3
Other assets.....	4.2	3.8	-0.4	-10.2
Total assets.....	77.6	178.4	+100.8	+129.9

Of the other asset items, loans and discounts of all active banks showed an increase of \$8.1 billion or 36% over the six-year period. In relation to total assets, loans and discounts ac-

counted for 17% at the end of the period as compared with 29% at the beginning.

State and local, corporate and other securities declined by \$0.7 billion or 8%. They made up 12% of total assets as of December 31, 1939 and dropped to 5% as of December 31, 1945.

Interbank and reserve balances increased by 51% while as a proportion of total assets they dropped from 29% to 19% over the six-year period.

U. S. Government securities held by the two classes of commercial banks, national banks and State commercial banks, showed similar growth and corresponding relationships to their whole asset structure during the period from December 31, 1939 through December 31, 1945. Thus, the almost parallel increases were 467% and 483% for national banks and State commercial banks, respectively. Federal securities accounted for 77% of the total increase in national bank assets and for State commercial banks this ratio was 80%. As a proportion of total assets of each of these classes of banks, U. S. Government security holdings again showed corresponding changes for the six-year period. In the case of national banks, Government securities rose from 26% to 57% of total assets from December 31, 1939 through 1945, while in the case of State commercial banks this relationship was 23% at the beginning and 56% at the end of the period.

Mutual savings bank holdings of U. S. Government securities showed a greater increase over the period than occurred in their total assets (\$7.6 billion as against \$5.1 billion). A decline of \$2.4 billion in the other assets items held by mutual savings banks accounted for about 1/3 of the growth in Government securities. As a proportion of total mutual savings bank assets, Federal securities accounted for 26% as of December 31, 1939 and 63% as of December 31, 1945.

It is interesting to note that the Federal securities held by mutual savings banks as a proportion of total assets have continued on their upward trend from 56% on December 31, 1944 to 60% on June 30, 1945, and 63% on December 31, 1945. National bank and State commercial bank holdings, on the other hand, have shown almost no variation.

More detailed data on assets are given in Tables 1, 2, and 3 at the end of this article.

Liabilities and Capital Accounts

During the year ending December 31, 1945, the liability side of the balance sheet showed similar dollar increases in both time and demand deposits of individuals, partnerships, and corporations. The almost corresponding increases of \$8.1 billion in time deposits and \$8.6 billion in demand deposits meant that time deposits, which had lagged behind demand deposits during the early war years, had reached the same level of growth as demand deposits.

The distribution of the major liability items as of December 31, 1944, June 30, 1945, and December 31, 1945 is shown in the following table.

Liabilities and capital accounts	Dec. 31, 1944	June 30, 1945	Dec. 31, 1945
(In billions of dollars)			
Liabilities:			
Deposits of individuals, partnerships, and corporations:			
Demand.....	65.3	66.7	73.9
Time.....	37.2	41.3	45.3
U. S. Government and postal savings deposits.....	20.9	24.5	24.5
Interbank and other deposits and miscellaneous liabilities.....	19.7	20.3	23.7
Total liabilities...	143.3	152.9	167.7
Capital accounts.....	9.7	10.2	10.6
Total liabilities and capital accounts....	152.9	163.0	178.4

The table shows U. S. Government deposits between \$20 and \$25 billion on each of the three dates covered. These are peak Government balances, reflecting the fact that a war loan was just ending in each case. Between loans these deposits are drawn on, and on net balance result in a transfer of deposits from the Government to private accounts.

For the six-year period from December 31, 1939 through December 31, 1945, the \$100.8 billion increase in assets and liabilities was concentrated primarily among liabilities in the growth of deposits. Demand deposits of individuals, partnerships, and corporations rose from \$25.2 billion at the beginning of the period to \$73.9 billion at the end, an increase of \$45.7 billion or 162%. This compares with time deposits which rose from \$25.4 billion to \$45.3 billion, an increase of \$19.9 billion or 78%.

The greatest relative increase among liability items during the six-year period occurred in U. S. Government and postal savings deposits, reflecting the Government's need for a large working balance to meet heavy war expenditures, and the effect of the timing of war loans as discussed above.

Liabilities and capital accounts	Dec. 31, 1939	Dec. 31, 1945	Increase Amount	Increase Percent
(In billions of dollars)				
Liabilities:				
Deposits of individuals, partnerships, and corporations:				
Demand.....	28.2	73.9	+45.7	+162
Time.....	25.4	45.3	+19.9	+78
U. S. Government and postal savings deposits..	0.9	24.8	+23.9	+2,624
Interbank and other deposits and miscellaneous liabilities.....	14.6	23.7	+9.0	+61
Total liabilities	69.3	167.7	+98.5	+142
Capital accounts...	8.3	10.6	+2.3	+28
Total liabilities and capital accounts.....	77.6	178.4	+100.8	+130

As noted above, national banks and State commercial banks hold practically all the demand deposits in the country. During the period from December 31, 1939 through December 31, 1945, national banks accounted for 57% of the total increase in demand deposits and State commercial banks made up the remainder.

The proportion of time deposits held by the three major classes of banks, national banks, State commercial banks, and mutual savings banks, changed significantly over the period. On December 31, 1939 national banks held 30% of total time deposits, State commercial banks held 28%, and mutual savings banks held 41%. These percentages changed to 35%, 31%, and 34%, respectively, by December 31, 1945. The total increase of time deposits over the six-year period was divided as follows: (1) 41% to national banks; (2) 34% to State commercial banks; and (3) 24% to mutual savings banks. This may be explained largely by the fact that savings banks are concentrated in the northeastern part of the country which felt the industrial expansion due to the war less than most areas. 1/

It is interesting to note, however, that the relationship between the three major classes of banks in their holdings of time deposits seems to have reached a leveling off point. In the six-month period since June 30, 1945, the time deposits of each class of bank in relation to total time deposits have remained the same. Moreover, the distribution of the total increase in time deposits among the three classes of banks has also shown no change.

Table 3 at the end of this article shows liabilities by classes of banks as of December 31, 1939 and December 31, 1945.

Capital accounts showed a small but steady growth throughout the six-year period from December 31, 1939 to December 31, 1945. They increased from \$8.3 billion at the beginning of the

period to \$10.6 billion at the end, a rise of 28%. Of the capital stock items, capital notes and decentures and preferred stock declined \$0.3 billion, whereas common stock showed an increase of \$0.3 billion. Surplus, undivided profits, and reserves increased \$2.3 billion over the period. The ratio of capital accounts to total deposits was 1 to 8.27 on December 31, 1939 and 1 to 15.69 on December 31, 1945. If cash and U. S. Government securities are deducted from total deposits, the ratio of capital to remaining deposits becomes 1 to 3.10 and 1 to 2.73 on December 31, 1939 and December 31, 1945, respectively.

The accompanying Tables 1, 2, and 3 give more detailed data on liabilities and capital accounts.

1/ Data on the "Geographic Distribution of Bank Deposits" as of December 31, 1944 were published in an article in the May 1945 issue of the "Treasury Bulletin".

Source: Daily Treasury Statement, except as noted.

* Less than \$500,000.

n.e. Not available.

1/ Based upon the President's Budget Statement of April 11, 1946.

2/ Based upon the 1947 Budget released in January; no revision of these figures was made in the President's Budget Statement of April 11.

3/ Includes chiefly alcoholic beverage taxes, tobacco taxes, manufacturers' and retailers' excise taxes, and estate taxes.

4/ Includes deposits resulting from the renegotiation of war contracts. Information on the amount of such deposits is not available on the basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1943, \$558 million; fiscal year 1944, \$2,235 million; and fiscal year 1945, \$2,041 million. These figures include so-called voluntary returns.

5/ Classification changed to reflect expenditures of surplus property

disposal agencies for the fiscal years 1946 and 1947. Prior year expenditures are included under "Other".

6/ Includes transfers to trust accounts, etc.

7/ Includes expenditures for public works undertaken by Veterans' Adminstration.

8/ "Refunds of taxes" include amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and exclude refunds of taxes under the social security program. For discussion of excess profits tax refund bonds, see following chapter, Table 3.

9/ Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Office for Emergency Management, War Manpower Commission (U. S. Employment Service) under authority of the Social Security Act.

Source: Daily Treasury Statement.

* Less than \$500,000.

1/ Excludes amounts for public debt retirements which are chargeable to the sinking fund, etc. under special provisions of law.

2/ For further details, see Table 2.

3/ For explanation see tables which follow entitled "Social Security Program".

4/ For further details, see Table 3.

5/ For further details, see Table 4.

6/ For further details, see Table 5.

7/ Total expenditures less net receipts.

8/ Represents expenditures for public debt retirements which are chargeable to the sinking fund, etc. under special provisions of law.

9/ Includes recoveries in capital funds. Such re-

coveries totaled \$56 million in the fiscal year 1940; \$319 million in the fiscal year 1941; \$12 million in the fiscal year 1942; and \$10 million in the fiscal year 1943.

10/ Receipts from reductions in capital stock and paid-in surplus available to be released under existing law are included as negative items under expenditures. Such reductions totaled \$315 million.

11/ Includes deposits resulting from the renegotiation of war contracts. Information on the amount of such deposits is not available on the basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1943, \$558 million; fiscal year 1944, \$2,255 million; and fiscal year 1945, \$2,041 million. These figures include so-called voluntary returns.

Source: Daily Treasury Statement.

* Less than \$500,000.

1/ General expenditures now include expenditures for revolving funds; back figures have been revised accordingly.

2/ Includes public works undertaken by the Veterans' Administration.

3/ Does not include transfers to trust accounts, etc. These are shown in Table 5.

4/ "Refunds of taxes" include amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and exclude refunds of taxes under the Social security program. Excess profits tax refund bonds were formerly issued to corporations entitling them to a post-war credit equal to 10% of the excess profits tax paid. The Tax Adjustment Act of 1945 reduced by 10% the amount of excess profits tax to be paid and abolished the post-war credit. For amounts of excess profits tax refund bonds issued, see the first table in chapter entitled "Public Debt and Guaranteed Obligations of the United States Government". Outstanding excess profits tax refund bonds may be redeemed at the option of the holder during January, February, March, April, and May. Such redemptions occur, they will appear as retirements of public debt.

5/ Consists of Administration of Sugar Act of 1937, Agricultural Adjustment Agency, exportation and domestic consumption of agricultural commodities, Farm Credit Administration, Farm Security Administration, Federal Farm Mortgage Corporation, Federal land banks, Rural Electrification Administration, Soil Conservation and Extension Service, Department of Agriculture departmental expenditures, and other.

6/ Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Office for Emergency Management, War Manpower Commission (U. S. Employment Service) under authority of Social Security Act. For further details, see tables which follow on the Social security program.

7/ Includes public buildings, public highways (including forest roads and trails), river and harbor work and flood control, Tennessee Valley Authority, Federal Public Housing Authority (formerly U. S. Housing Authority), reclamation projects and the Public Works Administration. Excludes certain expenditures for public works in connection with war activities by the Federal Works Agency, beginning July 1, 1941.

8/ Excludes expenditures for the U. S. Maritime Commission, departmental expenditures under the Social security program and the Department of Agriculture departmental expenditures.

9/ For additional information, see "Treasury Bulletin" for August 1945, page 6.

10/ Includes expenditures for the following: Office of Education, and Public Health Service of the Federal Security Agency; Post Office Department postal deficiencies; Federal Housing Administration; Treasury Department investments in Federal savings and loan associations; certain expenditures of the Panama Canal and capital stock of the Federal Deposit Insurance Corporation; Home Owners' Loan Corporation; Federal Home Loan Banks, and Home Owners' Loan Corporation; Federal Home Loan Bank Board, and National Home Bank Association.

11/ Excess expenditures have been reduced \$314 million representing the repayment of capital funds by certain United States Government agencies. For further details see "Treasury Bulletin" for June 1943, page 9, footnote 12.

12/ Includes \$257 million for restoration of capital impairment of Commodity Credit Corporation applicable to fiscal years 1943 and 1944.

13/ Classified as miscellaneous expenditures commencing July 1, 1945.

14/ Expenditures during October 1945 include \$174 million and during March and April, 1946, \$100 million each for Export-Import Bank of Washington - capital stock.

15/ Includes \$500 million for Commodity Credit Corporation - postwar price support of agriculture.

Source: Daily Treasury Statement.

Less than \$500,000.

1/ Includes economic "leasing functions".

2/ Similar items for periods prior to fiscal year 1940 are classified under "Other departmental" and "Other general expenditures" in Table 3. Includes war expenditures of Commodity, Justice, Interior, Labor, and State Departments; Civil Service Commission; Executive Office of the President (including Office for Emergency Management); Panama Canal; and capital stock of Smaller War Plants Corporation. Includes Defense Aid Special Fund through the fiscal year 1943; thereafter such expenditures are reflected within the respective

departments.

3/ Classification changed to reflect expenditures for the fiscal year 1946 under "War activities". Prior year expenditures are included under "Other".

4/ Payment of \$370,236,918 was made on Dec. 29, 1945, by the Federal Surplus Commodities Corporation of the Department of Agriculture to the Commodity Credit Corporation in reimbursement for agricultural commodities procured in connection with the lend-lease program and reflected in previous expenditures by the Commodity Credit Corporation.

Sources: Daily Treasury Statement.

1/ Formerly Title XI of the Social Security Act.

2/ Formerly Title IX of the Social Security Act. Includes amounts equal to appropriations to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected with respect to the period from January 1936 to June 1939, inclusive, from employers subject to the Railroad Unemployment Insurance Act (See Table 3 of Section I).

3/ Prior to January 1, 1940, figures represent amounts transferred to the Old-Age Reserve Account. From January 1 to July 1, 1940 "Transfers" were made to the Federal Old-Age and Survivors Insurance Trust Fund. Subsequently receipts have been deposited in the General Fund of the Treasury and "appropriated" directly to the Federal Old-Age and Survivors Insurance Trust Fund. Amounts shown as transfers reflect deductions made for reimbursement to the General Fund account to cover administrative expenses, which are shown as expenditures in Section II, Table 1.

4/ Includes only expenditures from appropriations made specifically for administrative expenses relating to the Social Security Act; namely, Social Security Board, Department of Commerce, and Department of Labor, and administrative expenses disbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended. Beginning July 1, 1940, includes also administrative expenses payable from other appropriations, principally for the following agencies: Bureau of Internal Revenue of the Treasury Department, and Public Health Service and Office of Education of the Federal Security Agency.

5/ Beginning July 1, 1945, payments previously made under the Social Security Act were discontinued, and thereafter made under provisions of the Public Health Service Act of 1944.

6/ Covered by appropriations by Congress.

7/ Second Deficiency Appropriation Act, fiscal year 1938, appropriated \$41 million for refunding to certain States portions of Federal players' tax for 1936 collected under the Social Security Act.

* Less than \$50,000.

1/ Operated as Railroad Unemployment Insurance Administration Fund.

2/ Represents 10% of contributions under the Railroad Unemployment Insurance Act; the remaining 90% is deposited in the Railroad Unemployment Insurance Account, Unemployment Trust Fund (See Section II, Table 3). Excludes amounts appropriated to Railroad Unemployment Insurance Fund equivalent to amounts of taxes collected for the period January 1936 through June 1939 from employers subject to the Railroad Unemployment Insurance Act. These amounts aggregated \$15.0 million and were distributed by calendar

years, as follows: 1937, \$5.3 million; 1938, \$6.6 million; and for the first six months of the calendar year 1939, \$2.9 million. These amounts are included in Table I under Federal Unemployment Tax Act (unemployment insurance).

3/ Includes only expenditures from appropriations made specifically for administrative expenses relating to the Railroad Unemployment Insurance Act.

4/ Represents excess funds of the Railroad Unemployment Insurance Administration Fund (under Act of Oct. 10, 1940).

5/ Covered by appropriations by Congress.

Total rescinded			-\$6,981,053,301	-\$8,970,793,604
Total pending (79th Congress, Second Session).....			4,374,308,000	-
Liquidations of 1940 and prior contract authorizations			-467,872,846	-
Total approved, rescinded, pending appropriations or rescissions, and net contract authorizations ^{12/}			\$ 360,224,729,037	\$ 7,005,639,477

^{1/} Consists of appropriations and net contract authorizations available on and after July 1, 1940. Excludes: (1) appropriations of the Reconstruction Finance Corporation and its affiliates for war purposes, and (2) unexpended balances of appropriations on June 30, 1940 (except immediately available funds from fiscal year 1941 appropriations), available for expenditure in the fiscal year 1941.

^{2/} Contract authorizations have been reduced by later appropriations which were earmarked in authorizing acts for this purpose.

^{3/} Includes appropriations made available for prior years. For amounts see appropriate footnotes in "Treasury Bulletin" for July, 1945, page 16.

^{4/} Unappropriated contract authorizations for the naval expansion program are as follows:

Public Law No. 441.....	\$2,257,137,102
Public Law No. 204 (Estimated by Navy Department) 2,407,905,021	
Public Law No. 315.....	55,913,179,984

Public Law No. 375 (Estimated by Navy Department) 1,825,000,000	
Public Law No. 529.....	60,000,000

^{5/} The amounts of appropriations repealed by Congress and carried to the surplus fund in accordance with the provisions of this act are shown separately below.

^{6/} Includes \$180,000,000 for the fiscal year 1945.

^{7/} Includes rescission of the unbudgeted portion of the contract authorization under Aviation, Navy.

^{8/} Includes rescission of the United States Maritime Commission in the amount of \$460,000,000.

^{9/} Pending appropriations, as used herein, represent appropriation bills reported from the Committee on Appropriations to the House, or in subsequent stages of Congressional action before Presidential approval. Estimates of appropriations for national defense purposes reported by the President to Congress and submitted to the Committee on Appropriations, amounting to \$8,400,533,952, are not included.

^{10/} For details of appropriations made by the 76th Congress, Third Session and 77th Congress, First Session, see "Treasury Bulletin" for March, 1944, page 5.

^{11/} Includes amounts received such as war contributions under authority of the Second War Powers Act, deposits of advance payments made by foreign governments to the Defense Aid Special Fund for the procurement of defense articles, and transfers from other than war activities appropriations reduced by transfers to other than war activities appropriations.

* Less than \$500,000

- 1) These figures are not intended to reflect the budgetary position of the Government, and will not agree with budgetary figures on receipts, expenditures, and deficit such as those appearing in the Daily Treasury Statement and in other tables in the "Treasury Bulletin". For an explanation of the revisions made in Daily Treasury Statement figures to arrive at this cash series, see the "Treasury Bulletin", February 1935.
 - 2) Comprises Public Buildings Administration, Public Roads Administration, Public Works Administration, Federal Public Housing Authority, river and harbor work and flood control, Tennessee Valley Authority, forest roads and trails, and reclamation projects.
 - 3) Consists of Farm Credit Administration, Federal Farm Mortgage Cor-

poration, Federal land banks, Rural Electrification Administration, Administration of the Sugar Act of 1937, Exportation and domestic consumption of agricultural commodities, Agricultural Adjustment Agency, Farm Security Administration, Soil Conservation and Extension Service, Department of Agriculture departmental expenditures, and Other.

4/ Excludes transactions under transfers to trust accounts, etc.
5/ Excludes accrued discount on United States savings bonds, and in
most instances funds deposited in trust accounts.

6) Revised to include "Work Projects Administration" and "Civilian Conservation Corps", and to exclude "Surplus property disposal agencies" which, beginning July 1, 1945 are included in "War activities" above.

* Less than \$500,000.

1/ This is the net budgetary deficit (-) or surplus. Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law.

2/ Comprises Federal Old-Age and Survivors Insurance Trust Fund, National Service Life Insurance Fund, Unemployment Trust Fund, Railroad Retirement Account, Government insurance and retirement funds and other trust accounts. (See footnote 4.)

3/ Charges for retirement of national bank notes are reflected in this statement directly against increment on gold, in the years during which the retirements were annually made. (See footnote 5.)

4/ Comprises Public Works Administration revolving fund, special de-

posits (net), and, during the fiscal years 1940 through 1945, transactions in commodity food stamps by the Department of Agriculture. Commencing July 1, 1945, such transactions are classified in the column "Trust accounts".

5/ Expenditures for the retirement of national bank notes from increments on gold for the fiscal years 1936 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1936, \$37 million; 1937, \$99 million; 1938, \$51 million; and 1939, \$5 million. The increases in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.

6/ Includes inactive gold in the amount of \$1,087 million.

PUBLIC DEBT AND GUARANTEED OBLIGATIONS
OF THE UNITED STATES GOVERNMENT

Sources: Daily Treasury Statement.

* Less than \$500,000.

1/ Guaranteed securities held by the Treasury and securities guaranteed as to interest only are not included in this table.

2/ Bank restricted issues are those which commercial banks (banks accepting demand deposits) are not permitted to acquire prior to a specified date, with two exceptions: (1) concurrently with the 4th, 5th and 6th War Loans and the Victory Loan, commercial banks were permitted to subscribe for limited investment of their savings deposits; (2) commercial banks may temporarily acquire such issues through forfeiture of collateral.

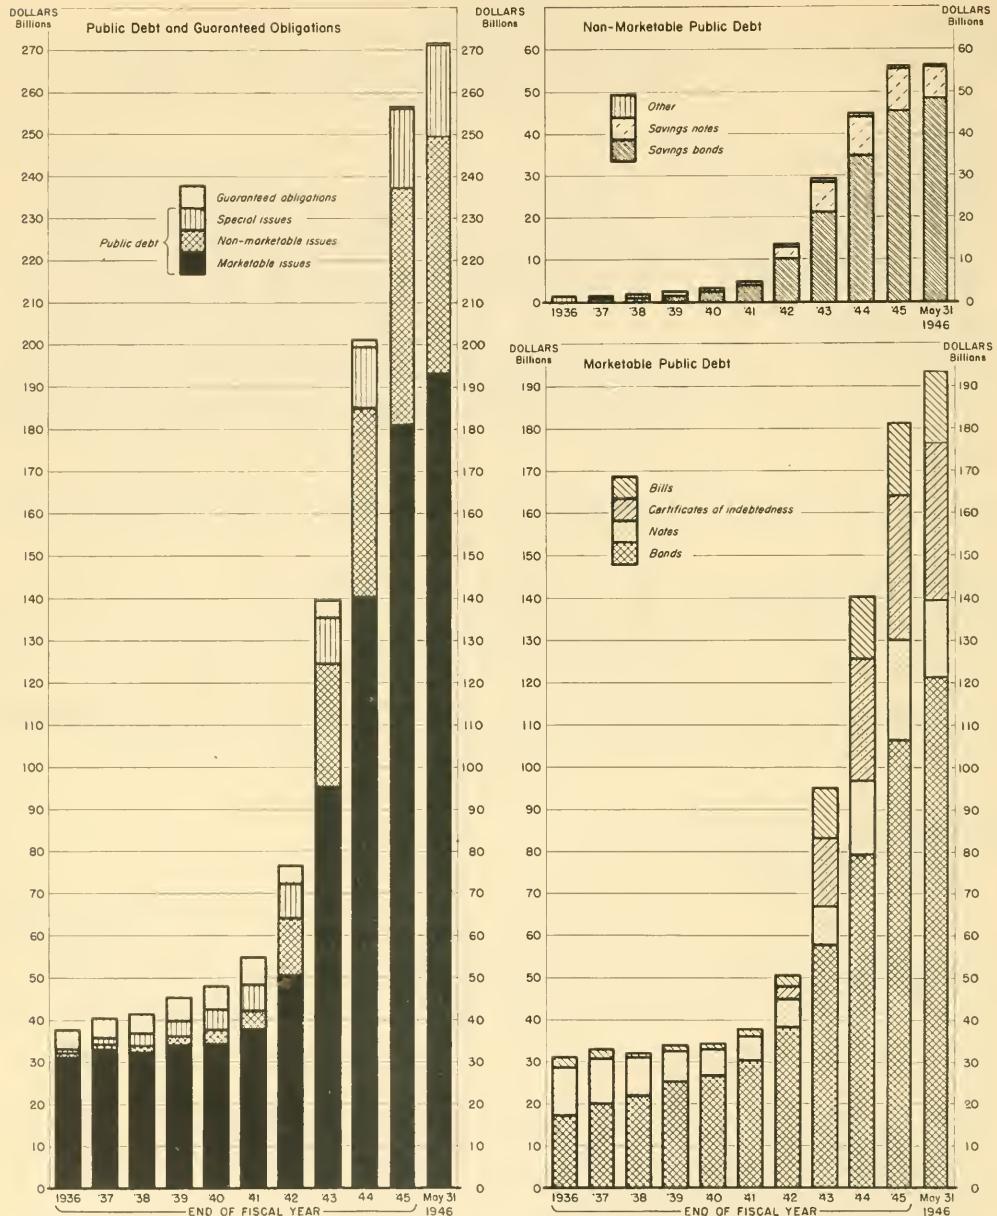

3/ The face value of any yearly series of United States savings bonds and Treasury savings notes maturing from month to month which are not currently presented for retirement are included in the interest-bearing debt until all the bonds or notes of the series have matured.

4/ Deemed obligations stated as of the previous month to agree with the Contingent Liability Statement in the Daily Treasury Statement.

5/ Consists of Reconstruction Finance Corporation notes, Series X-A, I-B, and X-C, which were held by United States Government corporations and credit agencies.

6/ Includes prepayments on securities.

Source: Daily Treasury Statement.

1/ Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rate of

interest on United States savings bonds, Series A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.53%.

2/ Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

Sources: Daily Treasury Statement, and reports to the Treasury.

^{1/} Excludes (1) postal savings bonds and (2) Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).^{2/} It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which no definite notice of call has been made, however, are listed as fixed maturities.^{3/} Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.

"Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Callable" securities are subject to both normal and surtax rates.

Banks restricted issues may not be acquired by commercial banks (with minor exceptions) prior to a specified date. See footnote 2, page 25.

**Offerings of Marketable Issues of Treasury Bonds, Notes,
and Certificates of Indebtedness**

e.a. Not available.

r. Revised.

1/ In the case of the reopening of a previously offered security, the period to first call and to maturity are calculated from the date interest commences on the reopening.

2/ Consists of all public cash subscriptions and of subscriptions by U. S. Government agencies and trust funds.

3/ Figures on amount of War Loan securities issued consist both of amounts issued in connection with the Drive, and of amounts issued concurrently with Drive to commercial banks and Treasury invest-

ment accounts.

4/ Bank restricted issue. See preceding table (maturity schedule of interest-bearing public marketable securities) for earliest date on which commercial banks may acquire this issue.

5/ Reopening of previously offered security.

6/ Interest commenced on March 15, 1944.

7/ Interest commenced on June 26, 1944.

8/ Interest commenced on September 15, 1944.

9/ This is the same security that was offered in the Sixth War Loan.

10/ Exchanged as of December 15, 1944 and accrued interest charged from December 1 to December 15.

p Preliminary.

n.a. Not available.

1/ Original call and maturity dates are used.

2/ Bank restricted issue.

3/ Prior to the refunding operation of March 1, 1946, maturing in-

sue were either paid off in full or the holders were given the privilege to exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

Offerings and Maturities of Treasury Bills

Table 1.- Description of Treasury Bill Offerings and Amount of Maturities
(Amounts in millions of dollars)

Date of issue	Maturity date	Description of new issue			Amount of bids accepted			Amount of maturing issues (as of date shown in first column)	Total bills outstanding (as of date shown in first column)		
		Number of days to maturity	Amount of bids tendered	Amount of bids accepted							
				Total amount	Amount on competitive basis	Amount on fixed-price basis 1/

Note: See Annual Reports of the Secretary of the Treasury for back figures.

Sales and Redemptions of United States Savings Bonds

United States savings bonds were first offered for sale in March 1935. Bonds of series A-D were sold between March 1935 and April 1941. Series E, F, and G bonds have been on sale since May 1, 1941.

Series A-E bonds are 10-year discount bonds sold at 7½% of maturity value, and yield 2.90% per annum if held to maturity. Series F bonds are 12-year discount bonds sold at 7¼% of maturity value, and yield 2.53% per annum if held to maturity. Series G bonds are 12-year current income bonds, sold at par, bearing interest at 2 1/2% per annum, and redeemable at par at maturity or at stated prices less than par before maturity.

Purchases of series A-D bonds were limited to \$7,500 issue price in any one calendar year. These bonds were available to all subscribers prior to April 1, 1940, and to individuals only after that date. Purchases of series E bonds are limited to \$3,750 issue price in any one calendar year, and may be made only by individuals (defined as natural persons only). The limit for series F and G combined is \$100,000 issue price in any one calendar year (\$50,000 in calendar year 1941). Series F and G bonds are available to all

subscribers except commercial banks. Commercial banks, however, were permitted to purchase these bonds during certain periods and with certain restrictions. For details concerning these periods and restrictions see "Treasury Bulletin" for December 1944, page 36, footnote 9, and "Treasury Bulletin" for February 1946, page 37, footnote 9, and page A-22. For details concerning features, investment yields, and redemption values see "Treasury Bulletin" for October 1945, pages A-4 and A-5.

Series A bonds matured in 1945, and bonds of series B began to mature in January 1946. Matured bonds turned in for redemption are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of series G outstanding are quoted at par.

Table 1.- Summary of Sales and Redemptions, by Series, as of May 31, 1946

^a Preliminary.^b Less than \$500.^{1/} State figures exclude sales of Series F and G bonds to commercial banks. Commercial banks were permitted to purchase Series F and G

bonds under certain conditions during the calendar year 1944.

(*Treasury Bulletin* for December 1944, page 36, footnotes 9);

from June 18 through June 30, 1945 (*Treasury Bulletin* for February 1946, page 37, footnotes 9); and from December 3 through December 8, 1945 (*Treasury Bulletin* for February 1946, page A-22).

Sales and Redemptions of United States Savings Bonds - (Continued)

Note: It should be noted that State figures presented in this table are not necessarily comparable with sales data by States inasmuch as bonds which have been purchased in one State may have been redeemed in another. Moreover, the figures shown in this table are based on

current redemption values, whereas the sales figures are shown at issue price. Data on redemptions by States are not available prior to October 1944.

* Less than \$500.

Sales and Redemptions of Treasury Savings Notes

Treasury savings notes were issued in three series, series A from August 1, 1941 through June 22, 1943, series B from August 1, 1941 through September 12, 1942, and series C which have been on continuous sale since September 14, 1942. All of series A and B and some of series C notes have matured.

Series C notes are sold at par, and accrue in value each month, yielding 1.07% per annum if held to maturity (5 years from date of issue). These notes may be used in payment of taxes any time after 2 months after issue, or may be redeemed for cash any time after 6 months after issue. For details concerning features, investment yields, and tax payment or redemption values, see "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning the features of series A

and B notes, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes turned in for redemption (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement. For sales and redemptions of series A and B notes by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

Table 1.- Summary of Sales and Redemptions, by Series, as of May 31, 1946

Source: Daily Treasury Statement commencing November 1, 1942; prior thereto, Post Office Department.

1/ Stamps sold prior to October 1, 1942 were known as postal savings stamps and were obligations of the Postal Savings System but subsequently became public debt obligations.

2/ Estimated on the basis of samples made by the Post Office Department.

3/ Details not available for May, June, and July 1941.

4/ Includes minor amounts which were exchanged for postal savings certificates. These aggregated \$123 thousand for the period August 1, 1941 through June 30, 1942 and \$55 thousand for the period July 1, 1942 through October 31, 1942.

5/ Net of sales less redemptions. See footnote 1.

6/ Does not include amounts transferred from Postal Savings System to the Treasury to cover outstanding stamps.

* Less than \$50,000.

1/ Consists of purchases or sales made by the Treasury. Treasury investment accounts comprise (1) trust funds which by law are under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain

U. S. Government agencies whose investments are handled through the facilities of the Treasury Department. This table also includes purchases under Section 19 of the Second Liberty Bond Act, as amended, and excludes the Exchange Stabilization Fund.

Treasury Survey of Ownership of Securities Issued by the United States Government and by Federal Agencies, April 30, 1946

The tables in Section I present summary data as of April 30, 1946 from the Treasury Survey of Ownership of Securities Issued or Guaranteed by the United States. The banks and insurance companies covered in the survey account for approximately 95 percent of the amount of

such securities owned by all banks and insurance companies in the United States.

Section II presents summary data on the ownership of Federal land bank bonds, Federal intermediate credit bank debentures and Federal home loan bank debentures.

Section I - Securities Issued or Guaranteed by the United States Government

Note: The Treasury Survey commenced with date for March 31, 1941 and has been published regularly in the "Treasury Bulletin" since May 1941. Earlier editions of data for September 30, 1940 appeared in the February 1945 issue, page 53; reclassification of data on banks for the period November 1941 through February 1944 appeared in the May 1944 issue, page 52-57; revisions of data on insurance companies for May 31, 1943 and prior dates appeared in the November 1945 issue, pages 52-53.

Less than \$500,000 or less than

1/ Securities held in trust depart

2/ Securities held in trust departments are excluded.
3/ Includes trust companies.
4/ This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See head-note to this section.

4) Issues which commercial banks may not acquire prior to a specified

data (with minor exceptions). See footnotes 2, page 25.

5/ Guaranteed securities held by the Treasury are not included.

b Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rate but not from that part of partially tax-exempt security interest which is derived from principal amount owned by any one holder in excess of \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

11) Includes an estimated amount of Federal Housing Administration debentures.

8/ Actual figures by tax status are available only for total amount outstanding.

* Less than \$500,000.

1/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom.

"Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

2/ Securities held in trust departments are excluded.

3/ Includes trust companies.

4/ This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See head-note to this section.

5/ United States savings bonds, Series E-D, E, and F are shown at current redemption value. They were reported at maturity value by the banks and insurance companies covered in the Treasury Survey, but have been converted to current redemption value for use in this statement.

6/ Series E-D savings bonds sold prior to March 1, 1946 are partially tax-exempt; those sold on and after that date are taxable.

7/ Guaranteed securities held by the Treasury are not included.

C.C.C. demand obligations in the amount of \$492 million held by all commercial banks are shown only in total amount outstanding.

Section II - Interest-Bearing Securities Issued by Federal Agencies
But not Guaranteed by the United States

1/ Excludes Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).
 2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of reissues, are the latest dates.
 Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

1/ Included in the Averages Yield of Long-Term Taxable Treasury Bonds. Issues which commercial banks may not acquire prior to a specified date (with minor exceptions). See footnote 2, page 25.
 2/ Quoted on a yield basis.
 3/ Not quoted on May 31, 1946.
 4/ For amount of this security issued on June 1, 1946, see table on "Offerings of Marketable Issues of Treasury Bonds, Notes, and Certificates of Indebtedness" on page 32.
 5/ Called on February 11, for redemption on June 15, 1946.
 10/ Exclude postal savings bonds.

1/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "Newly issued" prices for all securities except Federal Intermediate Credit Bank debentures are included beginning November 1, 1944. Dates of highs and lows, in case of recurrence, are the latest dates.

2/ Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to matu-

rity as more significant when an issue is selling at or below par. 3/ Quoted on a yield basis.

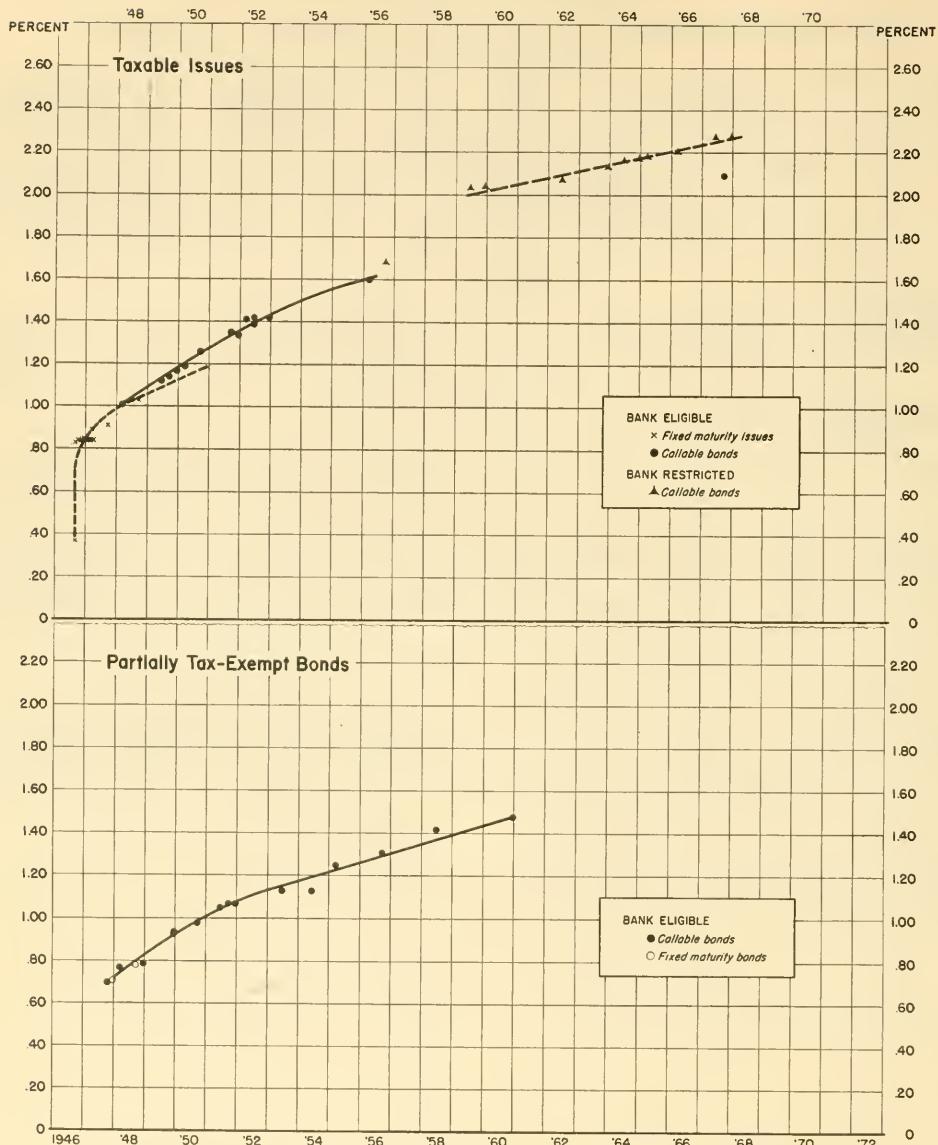

4/ Price quotations subject to a dealer's commission. These securities are not shown until date of issue.

5/ Not quoted on May 31, 1946.

Excludes issues completely held by Farm Credit Administration agencies.

YIELDS OF TREASURY SECURITIES MAY 31, 1946

Based on Mean of Closing Bid and Asked Quotations

Explanation. The points represent yields to call date when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Note: Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used. Monthly and weekly data for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944, page 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion and composition of average see "Treasury Bulletin" for March 1944, page 52. The partially tax-exempt series was discontinued on December 15, 1945 because there were no longer any bonds of this classification due or callable in 15 or more years. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax, except that in the

case of partially tax-exempt Treasury and United States savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

2/ For discussion of present composition of high-grade corporate bond average, see "Treasury Bulletin" for January 1945, page 56; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treasury Bulletin" for April 1942, page 61.

3/ Monthly averages of daily figures. Prior to April 1, 1934, corporate bonds are averages of Saturday figures.

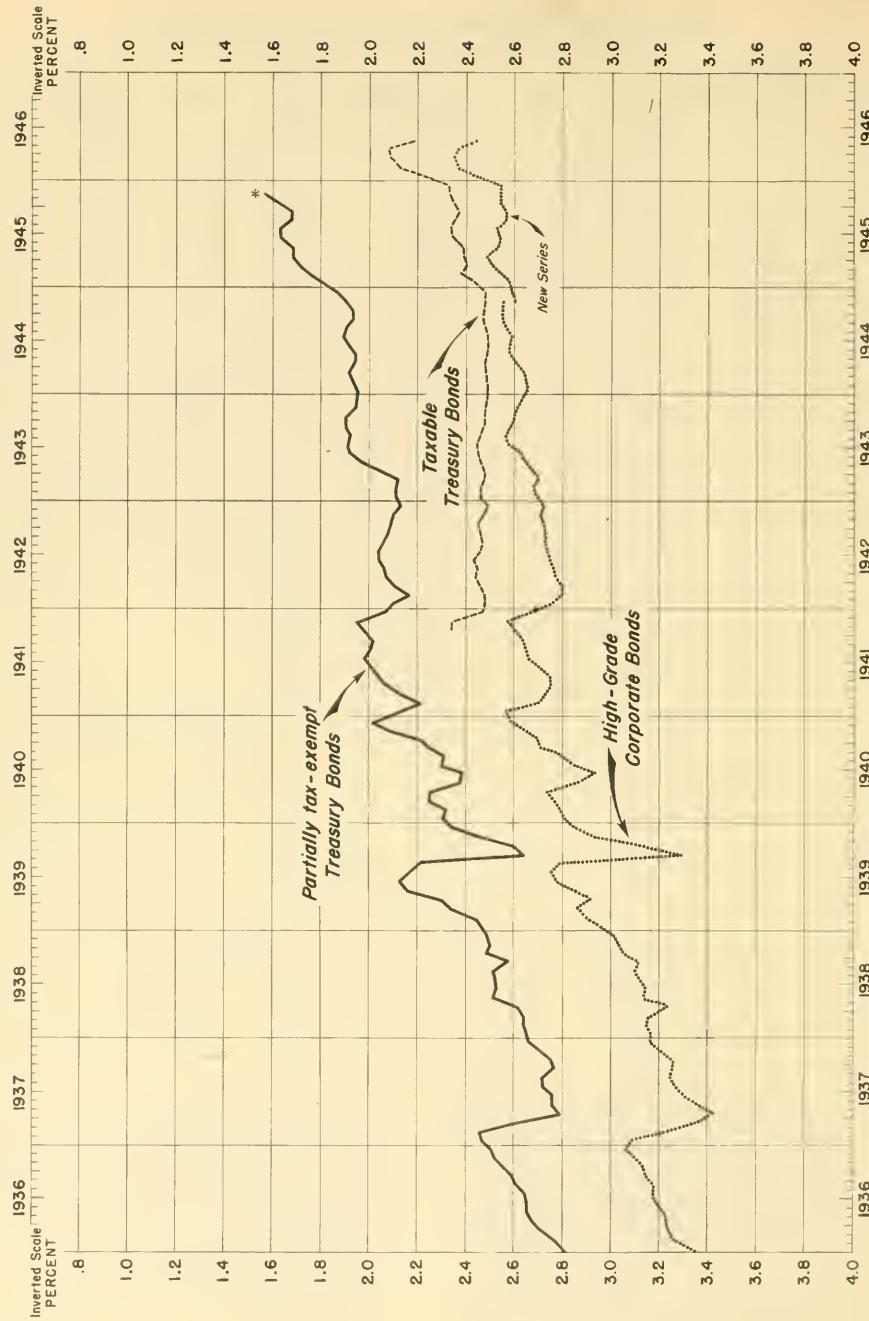

4/ The composition of the high-grade corporate bond average was revalued beginning with November 1, 1944. The old average for November 1944 was 2.56%. See footnote 2.

5/ On days when the exchanges are closed, the date and prices of the previous day are used.

6/ Market close.

7/ Holiday.

Corporations and Certain Other Agencies of the United States Government

Quarterly data relating to corporations in which the United States has a proprietary interest, direct or indirect, and certain other agencies are published in three sections. Section I appears in the March, June, September, and December issues of the "Treasury Bulletin", and contains data on assets, liabilities, and capital. These tables are compiled from the February, May, August, and November mid-month "Daily Treasury

Statements".

Sections II and III appear in the January, April, July, and October issues of the "Treasury Bulletin". Section II contains information on income and expense, and section III, on sources and application of funds. The data for sections II and III are obtained from reports of the corporations and other agencies, adjusted by the Treasury Department.

Section II - Income and Expense for the Nine Months Ended March 31, 1946

Table 1.- Summary

(In thousands of dollars)

	Total	Corporations	Certain other agencies
<u>Operating income and expense</u>			
<u>Operating income</u>			
Interest on loans.....	146,671	119,732	25,910
Interest or dividends on investments.....	124,466	36,119	92,189

Note: See page 76 for footnotes.

Corporations and Certain Other Agencies of the United States Government - (Continued)

Footnotes to Sections II and III

- ^r Revised.
^s Less than \$500.
- ^{1/} Represents excess of expenses and includes surplus reserves as well as unreserved surplus or deficit.
- ^{2/} This balance differs from that shown in the assets, liabilities, and capital section published in the June 1946 "Treasury Bulletin", because the income and expense statement for Smaller War Plants Corporation was not available for the period ending March 31, 1946.
- ^{3/} Consists of Institute of Inter-American Affairs, Institute of Inter-American Transportation, Inter-American Educational Foundation, Inc., Inter-American Navigation Corporation, and Pan-American Life Insurance Company.
- ^{4/} Figures are as of December 31, 1945, the latest available.
- ^{5/} Includes the Federal Land Banks of Springfield, Mass., Baltimore, Md., Louisville, Ky., New Orleans, La., St. Louis, Mo., Omaha, Nebr., Wichita, Kans., Houston, Tex., Berkeley, Calif., and Spokane, Wash., which have retired the capital stock and paid-in surplus previously held by the United States Government, and the Federal Land Bank of Columbia, S. C., which has retired the capital stock previously held by the United States Government.
- ^{6/} Includes indirect grants, subsidies, and contributions.
- ^{7/} Figures are for the eight months ended February 28, 1946, and include Warrior River Terminal Company, Inc., a wholly owned subsidiary.
- ^{8/} Represents administrative expenses paid from General Fund Appropriations.
- ^{9/} Depreciation charges for the period included within various operating expense accounts.
- ^{10/} Effective July 1, 1945, pursuant to Public Law 109 approved June 30, 1945, Defense Plant Corporation, Defense Supplies Corporation, Metals Reserve Company, Rubber Reserve Company, and Disaster Loan Corporation were dissolved and merged within the Reconstruction Finance Corporation.
- ^{11/} Includes War Assets Corporation (formerly Petroleum Reserves Corporation), Rubber Development Corporation, and U. S. Commercial
- Company, which were transferred to the Reconstruction Finance Corporation from the Foreign Economic Administration under E. O. No. 9630, and War Damage Corporation.
- ^{12/} The total surplus is shown as liability reserves to cover possible insurance losses.
- ^{13/} Figures represent activities under the U. S. Housing Act, as amended. War Housing and other operations of the Authority are reflected in the classification "Other" in Table 3.
- ^{14/} Total income from power operations has been reduced by the net outlay for non-revenue producing programs such as flood control, navigation, and experimental projects.
- ^{15/} Figures are for the eight months ended February 28, 1946 with the exception of Land-Lease and U.N.R.R.A. activities.
- ^{16/} Consists of Agricultural Marketing Act Revolving Fund and Emergency Crop and Feed Loans.
- ^{17/} Consists of Indian Loans, Puerto Rican Hurricane Relief Loan Section, and Puerto Rico Reconstruction Administration.
- ^{18/} Consists of Public Works Administration and War Public Works, community facilities.
- ^{19/} Consists of Navy Department, sale of surplus supplies (World War I), and guaranteed loans (World War II); War Department, guaranteed loans (World War II); Federal Public Housing Authority, war housing, subsistence homesteads and greattown, veterans' housing, and conversion programs; Federal Security Agency, loans to students; and Treasury Department, miscellaneous loans and certain other assets.
- ^{20/} Figures are shown net.
- ^{21/} Excluded loans made by commercial banks on behalf of the Export-Import Bank under agency agreements.
- ^{22/} Includes \$492,474 thousand from transfers, rentals, and sales of surplus property to the War Assets Corporation.
- ^{23/} Represents \$334,120 thousand of surplus property transferred to the War Assets Administration, \$32,400 thousand in settlements with owning agencies, and \$125,901 thousand deposited in the U. S. Treasury by War Assets Corporation.

Source: (1) Total receipts from internal revenue: Daily Treasury Statement; (2) Detailed collections by type of tax: Reports of collections made by collectors of internal revenue.

* Less than \$500.

1/ Excludes collections for credit to certain trust accounts for territories and insular possessions, etc.

2/ Consists only of collections for which returns have been filed with the Collector of Internal Revenue. Collections under this act as shown in Daily Treasury Statement consist of withholdings deposited in Government depositories in addition to payments accompanying returns filed with the Collector of Internal Revenue. Current collections consist in general of taxes paid within twelve

months after the close of the taxable year for which the return was filed.

3/ Current individual income tax collections for the fiscal year 1945 include payments on unrefunded portion of 1942 tax, due March 15, 1945, of \$308,605 thousand for the period January 1, 1945 through April 30, 1945.

4/ Represents collections under the Federal Insurance Contributions Act.

5/ Represents collections under the Federal Unemployment Tax Act.

6/ Represents collections under the Carriers' Taxing Act of 1937.

7/ Tax imposed upon the manufacture and sale of, and the occupational tax on, mixed flour repealed as of November 1, 1942.

Source: Daily Treasury Statement.

1/ These items represent the difference between the cost value and the monetary value of silver bullion revalued and held to secure

silver certificates.

2/ The figures in this column are not cumulative; as the amount of bullion held changes, the potential seigniorage thereon changes.

r Revised.

Note: Starting with January 1946, the balances in the Philippine Govern-

ment accounts with the United States Treasury are added to the de-
posit liabilities to foreigners as reported by banks and brokers

(Continued on following page)

Capital Movements Between the United States and Foreign Countries - (Continued)**Section I - Summary - (Continued)****Table 1.- Summary of Net Capital Movement 1935 - 1946 - (Continued)**

in the United States. For comparative purposes, the amounts in those accounts as of earlier dates are shown below. The yearly capital movement figures for the period Jan. 2, 1935-Dec. 31, 1945

have been revised to include these changes. Monthly figures for this period have not been adjusted to include the Philippine balances.
