Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Money." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Combined Statement of Receipts, Expend-

itures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1, 1948, and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown

Reporting Bases - (Continued)

in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions han-

dled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the daily statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

September Advance Refunding

On September 4, 1963, the Treasury announced an offering to holders of seven Treasury securities, outstanding in the amount of \$32.1 billion, to exchange them in advance of their maturities for issues at attractive rates. Offered in exchange, as of September 15, 1963, were new 5-year 2-month 3-7/8 percent bonds, new 9-year 11-month 4 percent bonds, and an additional amount of the 4-1/8 percent bonds of 1989-94. The offering combined a junior advance refund-

The exchange of \$6.5 billion of the \$23.0 billion of publicly held eligible securities equaled 28.4 percent. In the prerefunding portion of the operation, public holders exchanged 48.1 percent of the \$8.0 billion held. For the junior advance refunding portion, 17.9 percent of \$15.0 billion held was exchanged by these investors. Details of the various eligible securities exchanged for the new issues are shown in the following table.

Treasury Financing Operations - (Continued)

This advance refunding was another part of the continuing debt management program designed to finance the Government's requirements at the lowest practicable cost while also furthering the growth and expansion of the American economy, helping to restore balance-of-payments equilibrium, and developing a maturity structure of the debt itself that will contribute to flexible operations at minimum cost in the future. By offering holders of outstanding issues with coupons of 3-1/4 percent to 4-3/4 percent an opportunity to invest for longer periods at coupon yields of 3-7/8 percent to 4-1/8 percent, the Treasury will accomplish further needed restructuring of the outstanding debt as a coordinate part of its program for carrying out these inter-related objectives.

Typically, advance refundings have involved the exchange of outstanding securities for new issues carrying higher coupon rates of interest. As advance refunding continues to evolve as a debt management tool, there will be occasions, however, in which holders of outstanding high-coupon securities will be offered exchange options involving new issues with lower coupon rates of interest. It is important, therefore, that investors become fully aware of the advantages which can accrue to them in an advance refunding exchange of relatively high-coupon issues for issues carrying lower coupons.

In this advance refunding, holders of the 4-3/4 percent notes of May 1964, for example, are being offered an attractive opportunity to exchange their holdings for longer-term securities bearing lower coupon rates of interest ranging from 3-7/8 percent for the 1968 maturity to 4-1/8 percent for the 1989-94 maturity. The financial advantage accruing to holders of the 4-3/4 percent notes making this exchange is as great however, as the financial advantage offered to holders of the lower coupon eligible issues maturing in May 1964, the 3-1/4 percent certificates and the 3-3/4 percent notes. This comparability among the

various options is accomplished by the establishment of different adjustment payments to be paid by the Treasury. Full allowance has been made for the differences in interest over the period from September 15, 1963, until next May as between the 4-3/4 percent issue and any of the 3-7/8 percent, 4 percent, and 4-1/8 percent issues offered in exchange. These adjustments are based on the differences between the current market values of the eligible securities and the indicated current market values of those offered in exchange. In addition, the adjustment payment also includes an amount sufficient to improve substantially the effective yield on the new issues over the current market level of yields for the maturities involved.

For example, holders of the 4-3/4 percent notes of May 1964 who exercise the option to exchange into the 4 percent bonds of August 1973 will receive, in the form of an immediate payment from the Treasury, not only the full value of the coupon difference from September 15, 1963, until maturity of the 4-3/4 percent notes next May, but, in addition, an investment yield of more than 4-1/8 percent on a security which will mature in 9 years and 11 months.

In the prerefunding portion of this operation, the Treasury sought to reduce the total size of the security issues maturing on May 15, 1964, of which \$8.0 billion are held by the public. This was a larger quarterly maturity than any other outstanding. The junior advance refunding, by reducing the amount of debt maturing in 1966 and 1967, will help to simplify the Treasury's problems of refunding maturing obligations in the years immediately ahead.

As a result of the refunding, the average maturity of the marketable portion of the public debt at the end of September, was lengthened by approximately four months to more than five years and three months, the longest since July 1956. The extension of maturity effected by the various exchanges is shown in the accompanying table.

Options of the holders.-- A holder of the outstanding eligible securities had the option of accepting the Treasury's exchange offer or of holding them to maturity. Consequently he could compare his return resulting from the exchange with the return that he might obtain by reinvesting the proceeds of the eligible securities at maturity. The income before tax for making the extension through exchange is the coupon rates plus (or minus) any payment on the new issues. If a holder of the eligible securities did not make the exchange, he will receive the coupon rates on the eligible issues to their maturity and will have to reinvest at that time at a rate equal to that shown in the succeeding table for the remaining terms of the issues offered in order to equal the return (including any payment) he will receive by accepting the exchange offer. For example, if the 3-3/4 percent bonds of May 15, 1966, were exchanged for the 4 percent bonds of August 15, 1973, the investor receives interest at the rate of 4 percent for the entire nine years and eleven months plus \$1.15 (per \$100 face value) immediately. If the exchange was not made, a 3-3/4 percent rate will be received until May 15, 1966, requiring reinvestment of the proceeds of the 3-3/4s of 1966 at that time at a rate of at least 4.32 percent for the remaining seven years and three months, all at compound interest, to average out to a 4 percent rate for nine years and eleven months plus the \$1.15 immediate payment. This minimum reinvestment rate for the extension period is shown in the table following, as are the minimum reinvestment rates for the other issues included in the exchange.

recognized for Federal income tax purposes solely on account of the exchange of the securities. Section 1031 (b) of the Code, however, requires recognition of any gain realized on the exchange to the extent that money (other than interest) is received by the security holder in connection with the exchange.

Accordingly, if the fair market value (the mean of bid and asked quotations on the date subscriptions are submitted) of the new securities plus the amount paid to the investor (discount) exceeded the investor's cost basis of the old securities, the gain, but not to exceed the amount of the payment must be recognized and accounted for as gain for the taxable year of exchange. The investor will carry the new securities on his books at the same amount as he carried the old securities except that he will reduce the cost basis by the amount of the payment and increase it by the amount of the gain recognized. If the fair market value of the new securities plus the amount of the payment did not exceed the cost basis of the old securities, the basis in the new securities is the cost basis in the old securities reduced by the amount of the payment. Gain to the extent not recognized, or loss, if any, upon the old securities surrendered in exchange will be taken into account upon the disposition or redemption of the new securities.

The 4-1/8 percent bonds of 1989-94 will be redeemable at par and accrued interest prior to maturity for the purpose of using the proceeds in payment of Federal estate

Banks under the supervision of the Office of the Comptroller of the Currency, Board of Governors of the Federal Reserve System, and the Federal Deposit Insurance Corporation were permitted to place the new bonds received in exchange on their books at the amount at which the eligible securities surrendered were carried, plus the amount of premium, if any, paid on the new securities, or reduced by the amount of discount, if any, received and increased by the amount of gain recognized, if any.

Terms of payment.-- Exchanges were made on the basis of par for par with accrued interest adjustments as of September 15, 1963, and with cash payments to subscribers which approximately equalized current market values among eligible issues having different coupons and maturities, and provided an attractive exchange value for each of the issues offered. The amount of the offering was limited to the amount of securities accepted in exchange. Cash subscriptions were not invited. Banking institutions generally could submit subscriptions for account of customers. Subscribers requesting registered securities had to furnish appropriate identifying numbers as required on tax returns and other documents submitted to the Internal Revenue Service. Completion of payment was required by September 18. Of the securities surrendered in exchange, coupons for November 15, 1963, and all subsequent dates were required to be attached.

Amounts to equalize the current market values among the eligible issues and the accrued interest paid to or by subscribers are shown in the following table.

Description of bonds offered.-- The two new Treasury securities, the 3-7/8 percent bonds of 1968 and the 4 percent bonds of 1973, are dated September 15, 1963, and bear interest from that date payable on a semiannual basis. Interest on the 3-7/8 percent bonds will be paid on May 15 and November 15, 1964, and thereafter on May 15 and November 15 in each year until their maturity November 15, 1968. On the 4 percent bonds interest will be paid on February 15 and August 15, 1964, and thereafter on February 15 and August 15 in each year until their maturity on August 15, 1973. The additional amount of the reopened 4-1/8 percent bonds of 1989-94 form part of their original issue and are freely interchangeable therewith. They are dated April 18, 1963, and the interest, accruing from September 15, 1963, is payable on a semiannual basis on November 15, 1963, and thereafter on May 15 and November 15 in each year until the principal amount becomes payable. They will mature May 15, 1994, but may be called for redemption at the option of the United States on and after May 15, 1989, at par and accrued interest, on any interest day, on four months' notice of redemption. All of the bonds were issued in bearer form with interest coupons attached or registered as to principal and interest. Denominations of the bonds are \$500, \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

One-Year Bills

On August 21, 1963, the Treasury announced the first offering on August 27 of a new series of one-year Treasury bills for \$1 billion or thereabouts. The new 363-day bills are dated September 3, 1963, and will mature August 31, 1964, when the face amount will be payable without interest.

The announcement stated that, henceforth, the one-year bills will be offered on a monthly basis rather than quarterly and a further statement that,

"The amounts of each subsequent issue are expected to be in the general magnitude of \$1 billion, rather than the magnitudes of \$2.0-\$2.5 billion that have been used in the quarterly issues of similar bills.

"On July 15, 1963, the Treasury announced that it was giving consideration to the establishment of monthly auctions of one-year Treasury bills, in the interest of a more orderly scheduling of its short-term maturities, and requested comments on the proposal from members of the financial community and other interested parties. On the basis of the many responses received from the public and its own studies, the Treasury concluded that a program of monthly auctions of one-year bills was not only feasible but also likely to meet a market need which is not currently being adequately met by other short-term money market instruments.

"The Treasury does not undertake, by this action, necessarily to auction a one-year bill every month, nor is it committed to the \$1 billion amount, but a pattern of this sort is likely to develop as opportunities continue to arise to replace the outstanding quarterly issues with those issued monthly."

Issued in bearer form only, the new one-year bills are in denominations of \$1,000, \$5,000, \$10,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value).

Tenders for the bills totaled \$2,631 million, of which \$1,001 million was accepted at the average rate of discount of 3.575 percent. Acceptances included \$64 million of non-competitive tenders for \$200,000 or less (without stated price) from any one bidder. The noncompetitive tenders were accepted in full at the average price for accepted competitive bids.

Payment for accepted tenders was required to be made or completed on September 3, 1963, in cash or other immediately available funds. Payment by credit in Treasury tax and loan accounts was not permitted. Banking institutions generally could submit tenders for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions were not permitted to submit tenders except for their own account. Tenders were received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others were required

to be accompanied by payment of 2 percent of the face amount of Treasury bills applied for, or by an express guaranty of payment by an incorporated bank or trust company.

13-Week and 26-Week Bills

August issues of regular weekly Treasury bills totaled \$10.5 billion, refunding an equivalent amount of bills maturing. The new bill issues consisted of five 13-week issues of \$1.3 billion each and five 26-week bills of \$0.8 billion each. Except for the 13-week bills issued on August 31, which mature in 92 days, all the issues have 91-day or 182-day maturities. Average rates of discount are shown in the following table.

Foreign Series and Foreign Currency Series

In August the Treasury issued several foreign series certificates of indebtedness and one foreign currency series bond.

Two of the certificates issued during the month were outstanding on August 31. The August 2 issue for \$5 million bears interest at 2.75 percent. The August 26 issue for \$25 million, of which \$9.5 million was outstanding at the end of August, bears interest at 3.40 percent. As of August 31, the outstanding foreign series securities totaled \$505 million.

The foreign currency series two-year bond issued on August 28, bearing interest at 3.66 percent, was denominated in German marks equivalent to \$50 million. In addition to German marks, the foreign currency series outstanding are denominated in Austrian schillings, Belgian francs, Italian lire, and Swiss francs. Foreign currency series securities outstanding August 31, 1963, aggregated \$705 million.

Source: Actual figures through the fiscal year 1952 and the calendar year 1953 are from the daily Treasury statement, and thereafter from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the 1964 Budget document, released January 17, 1963, including effects of proposed legislation. More detail for data on this page will be found in succeeding tables.

1/ Fiscal year figures beginning with the September 1960 issue of the Treasury Bulletin, and calendar year figures beginning with the June 1961 issue exclude certain interfund transactions from both net budget receipts and budget expenditures (see page II, 2, and 5). Figures previously published for these series have been revised to the new reporting basis. The change does not affect the budget surplus or deficit.

2/ Excess of receipts, or expenditures (-). For detail, see pages 10-14.

2/ For checks outstanding and telegraphic reports from Federal Reserve banks; public debt interest accrued and unpaid beginning with June

and the fiscal year 1955 (previously included from November 1949 as interest checks and coupons outstanding); also deposits in transit and changes in cash held outside the Treasury and in certain other accounts beginning with the fiscal year 1954. Net increase, or decrease (-).

4/ For current month detail and list of acts, see section on "Statutory Debt Limitation" in each issue of the Bulletin. The limitations in effect during the period covered by this table and the date when each became effective are as follows: \$275 billion on June 26, 1946; \$281 billion on August 28, 1954; \$278 billion on July 1, 1956; \$275 billion on July 1, 1957; \$280 billion on February 26, 1958; \$280 billion on September 2, 1958; \$290 billion on June 30, 1959; \$295 billion on July 1, 1959; \$293 billion on July 1, 1960; \$298 billion on July 1, 1961; \$300 billion on March 13, 1962; \$308 billion on July 1, 1962; \$305 billion on April 1, 1963; and \$307 billion on May 29, 1963. Under the acts approved July 1, 1962, May 29, 1963, and August 27, 1963, the limitation is \$309 billion from July 1 through November 30, 1963. p Preliminary.

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases see page II); estimates are from the 1964 Budget document, released January 17, 1963, including effects of proposed legislation.

1/ The distribution of receipts between individual income taxes and old-age and disability insurance taxes is made in accordance with provisions of Sec. 201 of the Social Security Act, as amended (26 U.S.C. 401), for transfer to the Federal Old-Age and Survivors Insurance Trust Fund (see footnote 9), and also for transfer to the Federal Disability Insurance Trust Fund (see footnote 10).

2/ Taxes on employers and employees under the Federal Insurance Contributions Act, as amended (26 U.S.C. 3101-3125), and tax on self-employed individuals under the Self-Employment Contributions Act, as

amended (26 U.S.C. 1401-1403). The Social Security Act Amendments of 1956, approved August 1, 1956, increased the rates of tax applicable to wages paid and taxable years beginning after December 31, 1956, to provide for disability insurance.

3/ Taxes on carriers and their employees under the Railroad Retirement Tax Act, as amended (26 U.S.C. 3201-3233).

4/ Tax on employers of 4 or more under the Federal Unemployment Tax Act, as amended (26 U.S.C. 3301-3308); with respect to services performed before January 1, 1956, the tax was imposed on employers of 8 or more.

5/ Beginning 1957, includes collections under increased rates in the Highway Revenue Act of 1956 (see footnote 13).

Source: Actual figures through 1961 are from reports to the Treasury Department by disbursing officers and administrative agencies, on the monthly statement reporting basis (see page II); and from the monthly statement of receipts and expenditures thereafter. Estimates are from the 1964 Budget document, released January 17, 1963, including effect of proposed legislation.

1/ Consists of miscellaneous taxes (principally the tonnage tax on

foreign vessels entering U. S. ports), bullion charges, and gifts and contributions.

2/ Includes \$375 million for repayment of advances from Federal extended compensation account (Temporary Extended Unemployment Compensation Act of 1961, approved March 24, 1961) and a decrease of \$93 million for transfer of receipts to Commodity Credit Corporation fund.

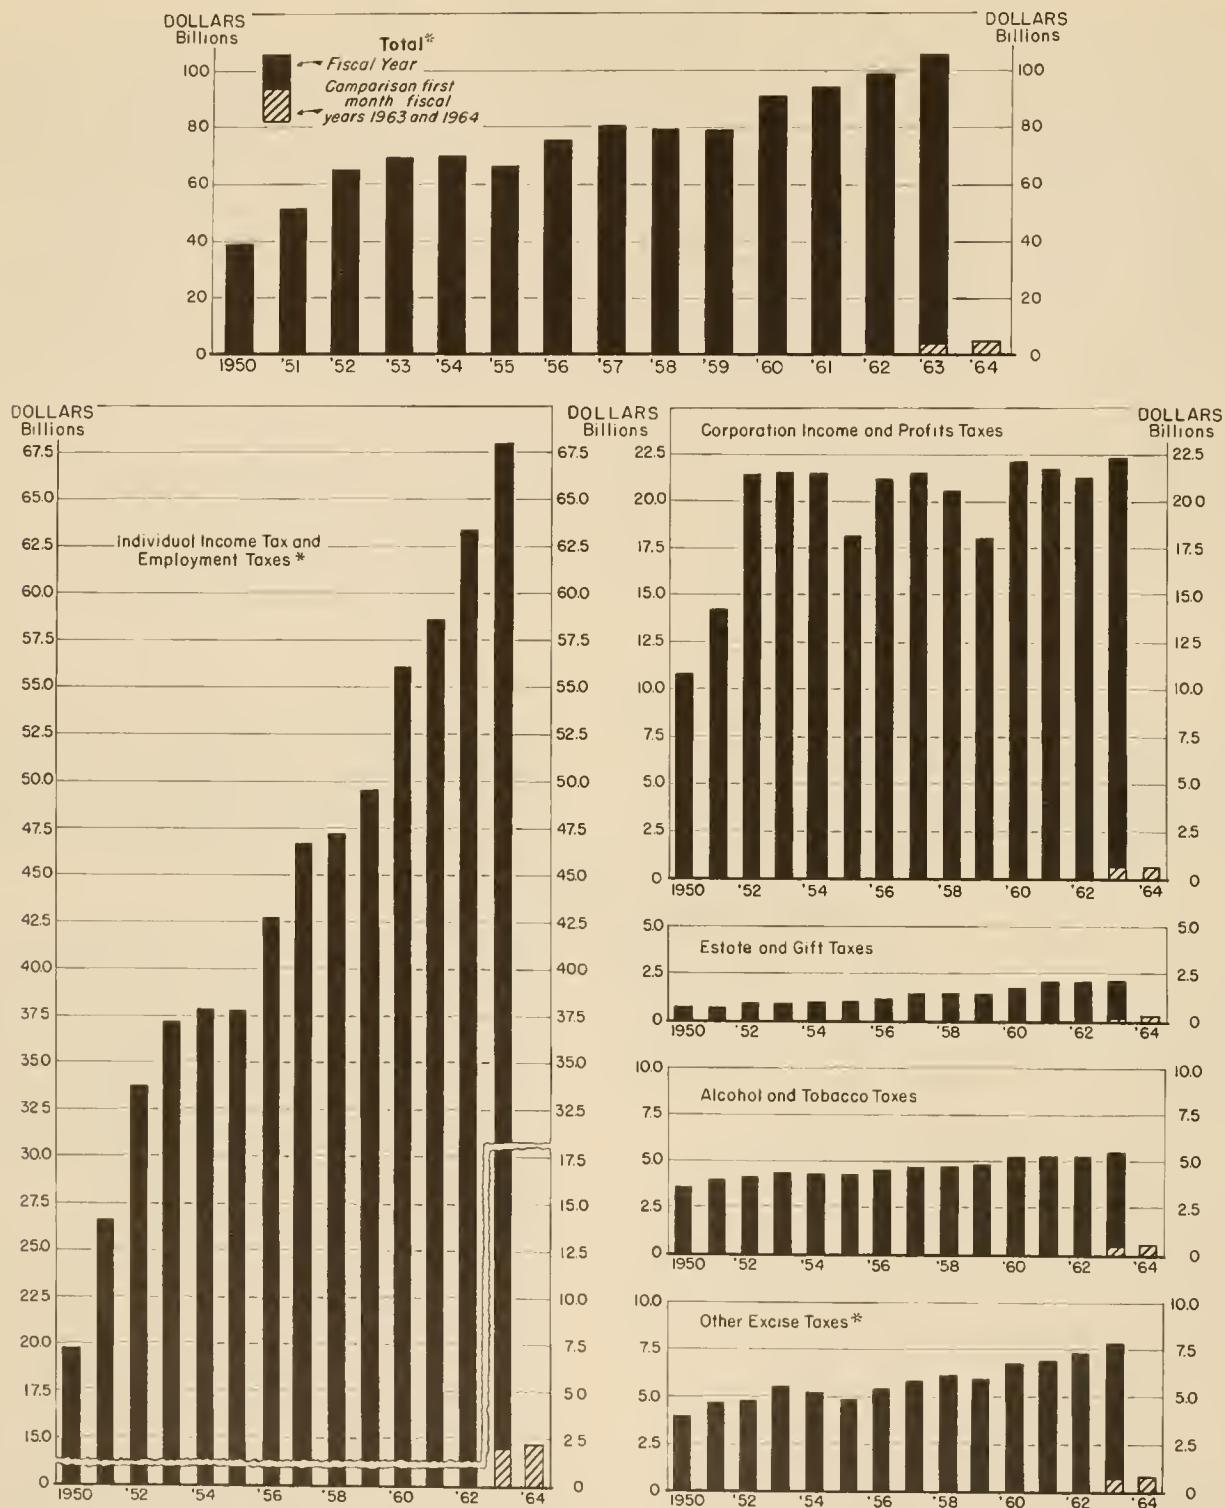

p Preliminary.

Footnotes to Table 1 - (Continued)

- 6/ Includes adjustments as follows for: Income taxes not withheld, October -\$4 million, January -\$4 million, March -\$2 million, and June +\$58 million; income taxes withheld, October -\$142 million, January -\$67 million, March -\$14 million, and June -\$8 million; transfers to Federal Old-Age and Survivors Insurance Trust Fund, October +\$134 million, January +\$62 million, March +\$19 million, and June -\$47 million; and transfers to Federal Disability Insurance Trust Fund, October +\$12 million, January +\$9 million, March -\$2 million, and June -\$3 million. See also footnote 9.
- 7/ Interest on refunds is included in expenditures in Table 3.
- 8/ The principal amounts for refunds of employment taxes and certain excise taxes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
- 9/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury (42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.
- 10/ The Federal Disability insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 (42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
- 11/ Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited
- in the Treasury, less refunds, during each fiscal year (65 Stat. 222 and 66 Stat. 371) and transfers are made currently.
- 12/ The Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101), established in the Unemployment Trust Fund an administration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transferred currently on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account are to be paid the administrative expenses of the employment security program. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures.
- 13/ The Highway Revenue Act of 1956, as amended, (23 U.S.C. 120, note) established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expenditures after June 30, 1956, and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures.
- 14/ For content, see Table 4. These transactions are included in the detail of both budget receipts and expenditures but are deducted from the totals (see Reporting Bases, p. II).
- 15/ Figures in this column differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 14).
- * Less than \$500,000.

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the 1964 Budget document, released January 17, 1963, including effects of proposed legislation.

Note: Figures in this table are for agencies as constituted at the time the expenditures were made, and therefore do not necessarily represent functions which are comparable over a period of time. For expenditures by functions on a consistent basis, see Table 6. Agency shifts are reflected in this table as follows: Beginning 1957, Alaska Road Construction from "Interior Department" to "Commerce Department," and Federal intermediate credit banks and production credit corporations as indicated in footnote 12; beginning 1958, Federal Facilities Corporation (remaining functions) from "Treasury Department" to "General Services Administration," and Informational Media Guaranty Fund from "Funds appropriated to the President" to "Independent agencies"; beginning 1959, Federal Civil Defense Administration from "Independent

agencies" to "Executive Office of the President," Civil Aeronautics Board from "Commerce Department" to "Independent agencies," Civil Aeronautics Administration from "Commerce Department" and Airways Modernization Board from "Independent agencies" to the "Federal Aviation Agency," National Advisory Commission for Aeronautics from "Independent agencies" to "National Aeronautics and Space Administration"; from fiscal 1960 through November 1962, military assistance from "Funds appropriated to the President" to "Defense Department, military," and thereafter under "Funds appropriated to the President" to "Treasury Department" to "Funds appropriated to the President."

1/ Consists of net expenditures of the Postal Fund, reflecting the change in classification of Post Office transactions to a public enterprise revolving fund basis, and beginning fiscal 1960 payment for public services.

4/ Beginning with fiscal 1961, administrative expenses of the employment security program are handled as trust account expenditures rather than Budget expenditures, pursuant to the Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101); see Table 1, footnote 12.

5/ Reported on an accrual basis effective June 30, 1955.

6/ Includes Reconstruction Finance Corporation except beginning July 1, 1954, certain functions transferred: Under Reorganization Plan No. 2 of 1954 (15 U.S.C. 609, note) to the Export-Import Bank, the Federal National Mortgage Association, and the Small Business Administration; and under Executive Order 10539, as amended, (15 U.S.C. 603, note) to the General Services Administration. The corporation was abolished at the close of June 30, 1957, by Reorganization Plan No. 1 of 1957, and its remaining functions were transferred to the Housing and Home Finance Administrator, Administrator of General Services, Administrator of Small Business Administration, and Secretary of the Treasury.

7/ Established pursuant to the Federal Aviation Act of 1958 (49 U.S.C. 1341 (a)), approved August 23, 1958.

8/ Established pursuant to the National Aeronautics and Space Act of 1958 (42 U.S.C. 2472 (a)), approved July 29, 1958.

9/ Consists of Federal payment and loans and advances.

10/ For content, see Table 4. These transactions are included in the

detail of both budget receipts and budget expenditures, but are deducted from the totals (see Reporting Bases, p. II).

11/ Figures in this column differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 10).

12/ Effective January 1, 1957, the production credit corporations were merged in the Federal intermediate credit banks, pursuant to the Farm Credit Act of 1956, approved July 26, 1956 (12 U.S.C. 1027), and operations of the merged agencies (as mixed-ownership corporations) were classified as trust enterprise funds (see "Trust Account and Other Transactions," Table 3); previously the operations of the banks and the corporations, respectively, were classified as public enterprise funds and were included net in budget expenditures.

13/ Includes \$1,375 million paid to the International Monetary Fund for the additional United States subscription, authorized by an act approved June 17, 1959, consisting of \$344 million in gold (see "Monetary Statistics," Table 3) and \$1,031 million in special notes. The special notes of the United States issued to international institutions are nonnegotiable and noninterest-bearing and are payable on demand. See also "Cash Income and Outgo," Table 5 and "Debt Outstanding," Table 1. Totals include \$175 million allowance for contingencies and \$200 million for comparability pay adjustment.

* Less than \$500,000.

Source: Expenditures for 1963 and 1964 are from reports received from disbursing, collecting, and administrative agencies of the Government, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1964 Budget document, Table 18, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 18. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.

1/ For expenditures by major functions for fiscal 1964 through August 1963, and fiscal 1963 through August 1962, see "Note" below. Details by functions are not available for publication in this issue but will appear in the October 1963 Bulletin.

2/ See footnote 3.

2/ Expenditures for 1963 and 1964 include those for grants of commodities for famine relief applicable to functional code 152; loans for conservation applicable to functional code 354; and for special milk program applicable to functional code 655. These expenditures were made from "Commodity Credit Corporation Capital Fund" and "Expenses, Public Law 480, Foreign Assistance Programs."

4/ See footnote 5.

5/ Expenditures for 1963 and 1964 include those for assistance for elementary and secondary education applicable to functional code 701 and other aids to education applicable to functional code 704. These expenditures were made from "Defense Educational Activities, Office of Education."

6/ Expenditures for 1963 and 1964 include those for veterans' nonservice-connected pensions applicable to functional code 802 and other

veterans' benefits and services applicable to functional code 805. These expenditures were made from "Compensation and Pensions, Veterans Administration."

Source: Internal Revenue Service reports. The figures shown include collections for credit to special accounts for certain island possessions. Floor stocks taxes are included with the related classes of tax.

1/ Full detail on a monthly basis is available from the Internal Revenue Service.

2/ Beginning October 1, 1961, the Bureau of Customs was authorized to accept and deposit payments of internal revenue taxes on tobacco items imported or brought into the United States (26 C.F.R. 275.62). Collections of this type by Customs during October 1961 were included with reporting on class E cigars.

3/ Taxes on issuance and transfers of capital stock and of corporate securities (bonds, debentures, etc.) deeds of conveyance, and policies issued by foreign insurers.

4/ Beginning with the fiscal year 1957, collections reflect the provisions

of the Highway Revenue Act of 1956, approved June 29, 1956 (23 U.S.C. 120 note).

5/ Repealed effective August 1, 1958, by an act approved June 30, 1958 (26 U.S.C. 4292 note).

CASH INCOME AND OUTGO

The cash income and outgo data appearing in the Treasury Bulletin, beginning with the February 1956 issue, are on a basis consistent with receipts from and payments to the public as derived in the 1957 and subsequent Budgets of the United States (in the Budget for 1963 in Special Analysis 3). Reconciliation to cash deposits and withdrawals in the account of the Treasurer of the United States is shown on the same basis as in the Budget documents. There is also shown the amount of net cash borrowing from, or repayment of borrowing to, the public. By these arrangements, data in accordance with the Budget classifications are made available month by month. Figures for back years have been revised where necessary in order to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in earlier Budget documents as well as in the Bulletin.

The Bureau of the Budget series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the Treasurer's account. Receipts and payments include transactions both in budget accounts and in trust and deposit fund accounts. Operations of Government-sponsored enterprises are included in payments on a net basis as reflected in Treasury reports. Major intragovernmental trans-

actions which are reported as both expenditures and receipts are excluded from both. Noncash items representing the obligation of the Government to make payments in the future also are eliminated from expenditures but are added later when actual payments are made. These items consist of certain interest accrued on the public debt, expenditures involving the issuance of a few special public debt securities, and clearing accounts. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Cash transactions through the Treasurer's account are similar in general concept to those included in the Bureau of the Budget series, but are limited in coverage to transactions which affect the balance in that account. On the other hand, they include receipts from the exercise of monetary authority, which are excluded from receipts from the public in the Bureau of the Budget series.

- ^{1/} Previously published figures were revised in the September 1960 Bulletin to take account of the deduction of certain interfund transactions from both net budget receipts and budget expenditures; they were further revised in the July 1961 issue for deductions of certain inter-trust fund transactions from both trust account receipts and trust account expenditures. Formerly such transactions were included in the intragovernmental transactions which were deducted in deriving receipts from and payments to the public.
- ^{2/} Revised beginning with the February 1963 Bulletin to include principal amounts of refunds of taxes as deductions from trust account receipts. Previously such amounts were included with trust account expenditures.

^{3/} Treated as noncash refund deductions from receipts when issued and as cash refund deductions when redeemed.

^{4/} Consists of seigniorage and the increment resulting from reduction in the weight of the gold dollar; excluded from receipts from the public but included in cash deposits in the Treasurer's account.

^{5/} Beginning fiscal 1961, figures have been revised for reclassification of receipts for the food stamp program, Department of Agriculture. Such receipts are included as deductions from expenditures in Table 3.

2/ Fiscal year figures beginning with the August 1963 Bulletin and calendar year figures beginning with the September issue have been revised to take account of certain changes in classification. See "Trust and Other Transactions," Table 1, Note.

3/ Includes Government-sponsored enterprise net operating expenditures, or receipts (-), as measured by funds provided by or applied to net security transactions reflected in Treasury reports (see Table 6). To a large extent, these Government-sponsored enterprises secure funds for their operations by direct borrowing from the public or by cashing Federal securities which they hold, and they apply the net income received from operations to repayment of borrowing from the public or

to investment in Federal securities. On that basis, net expenditures for operations are shown in this table in terms of the combined net of disinvestment in Federal securities and sale of agency securities in the market. Net receipts from operations are shown in terms of the combined net of investment in Federal securities and redemption of agency securities in the market.

4/ Previously included under cash withdrawals. See footnote 7.

5/ Figures have been revised to exclude transactions of clearing accounts beginning with the February 1963 Bulletin, as shown in the daily Treasury statement beginning January 2, 1963.

6/ Does not include revolving fund receipts representing acquired securities amounting to \$1,643,070 (par value).

ACCOUNT OF THE TREASURER OF THE UNITED STATES

Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in

the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included

through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).

2/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.

3/ Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

1/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U. S. Government obligations purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.

2/ Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act Beginning July 1951; and a number of excise taxes beginning July 1953.

3/ Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of \$10,000 or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for

the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1/ Guaranteed securities included are those held outside the Treasury.

2/ Total includes "Other bonds" through 1960; see Table 3.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

STATUTORY DEBT LIMITATION

The Second Liberty Bond Act (31 U.S.C. 757b), as amended by an act approved June 30, 1959, provides that the face amount of obligations issued under authority of that act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury) shall not exceed in the aggregate \$285 billion outstanding at any one time. The corresponding limitation in effect under the act of June 26, 1946, was \$275 billion and that under the act of September 2, 1958, was \$283 billion. In addition, temporary increases have been authorized as follows: \$6 billion from August 28, 1954, through June 30, 1956 (acts of August 28, 1954, and June 30, 1955); \$3 billion from July 1, 1956, through June 30, 1957 (act of July 9, 1956); \$5 billion from February 26, 1958, through

June 30, 1959 (act of February 26, 1958); \$10 billion from July 1, 1959, through June 30, 1960 (act of June 30, 1959); \$8 billion from July 1, 1960, through June 30, 1961 (act of June 30, 1960); \$13 billion from July 1, 1961, through March 12, 1962, and \$15 billion from March 13 through June 30, 1962 (acts of June 30, 1961, and March 13, 1962); \$23 billion from July 1, 1962, through March 31, 1963, \$20 billion from April 1 through May 28, 1963, \$22 billion from May 29 through June 30, 1963, and \$24 billion from July 1 through November 30, 1963, (acts of July 1, 1962, May 29, 1963, and August 27, 1963). Obligations issued on a discount basis redeemable before maturity at the option of the owner are included in the statutory debt limitation at current redemption values.

Source: Based on subscription and allotment reports. For detail of offerings see Table 4.

1/ Excludes 1-1/2% Treasury notes issued in exchange to holders of non-marketable 2-3/4% Treasury bonds, Investment Series B-1973-80.

2/ Includes trust companies and stock savings banks.

3/ Includes partnerships and personal trust accounts.

4/ Exclusive of banks and insurance companies.

5/ Consists of trust, sinking, and investment funds of State and local governments and their agencies.

6/ Includes savings and loan associations, nonprofit institutions, and investments of foreign balances and international accounts in this country.

7/ Tax anticipation security.

8/ Issued as a rollover of bills maturing January 16, 1957, and February 15, 1957, respectively.

9/ Reopening of earlier issue.

10/ Issued in special allotment to Government investment accounts.

11/ Issued as a rollover of one-year bills.

12/ Offerings of these securities, subject to allotments, were made for the purpose of paying off maturing securities in cash. Holders of the maturing securities were not offered preemptive rights to exchange their holdings but were permitted to present them in payment or exchange, in whole or in part, for the new issues.

13/ Offerings consist of an additional \$100 million each of outstanding weekly bills issued in "strip" form; 18 series were included in the June 14, 1961 offering; 8 series in the November 15, 1961 offering; and 10 series in the November 15, 1962 offering.

14/ Sold at competitive bidding with allotment distribution based on sales reported by syndicate members.

* Less than \$500,000.

Source: Bureau of the Public Debt. Preliminary figures are from subscription and allotment reports; final figures are on "clearance basis" in daily Treasury statement.

1/ Original call and maturity dates are used.

2/ All by investors other than Federal Reserve Banks.

2/ Two issues of bills, maturing January 16, 1957, and February 15, 1957 respectively, were rolled over into two issues of tax anticipation bills, both maturing June 24, 1957.

4/ Tax anticipation issue; for detail of offerings beginning 1957, see Table 4; for amounts redeemed for taxes and for cash see "Nota" below.

5/ During June and July 1958, \$491 million of the 2-5/8% Treasury bonds of 1965 was purchased by the Treasury for retirement under section 19 of the Second Liberty Bond Act, as amended (31 U.S.C. 754a).

6/ Called on May 14, 1958, for redemption on September 15, 1958.

7/ Represents amount which owners exercised the option to redeem on August 1, 1959 (see Table 4, footnote 9).

8/ Holders of the 4% notes, who had the option to redeem at par on February 15, 1960, by giving notice not later than November 16, 1959, were permitted to exchange their holdings on November 15, 1959, for the 4-7/8% notas.

9/ Rolled over into a one-year bill (see Table 4).

10/ Amount which owners exercised the option to redeem on February 15, 1960 (see Table 4, footnote 11).

11/ Advance refunding offering. Pursuant to the provisions of section 1037 (a) of the Internal Revenue Code of 1954 as added by Public Law 86-346, approved September 22, 1959, the Secretary of the Treasury has declared that no gain or loss shall be recognized for Federal income tax purposes upon the exchange of the eligible outstanding securities solely for the new securities. For tax purposes, therefore, the investor will carry the new securities on his books at the same amount as he had been carrying the eligible securities exchanged. Gain or loss, if any, upon the obligations surrendered in exchange

will be taken into account upon the disposition or redemption of the new obligations. See also Table 5.

12/ Holders of 2-1/2% Treasury bonds maturing November 15, 1961, were offered the option to exchange the bonds during the period from June 8, 1960, to June 13, 1960, inclusive, subject to allotment if subscriptions exceeded by 10 percent the offering limits of \$3.5 billion for the notes and \$1.5 billion for the bonds.

13/ Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 3-1/8% certificates or the 3-7/8% bonds, which were offered in an aggregate of around \$8-3/4 billion. For detail of offering, see Table 4.

14/ Excess of maturing 4-3/4% Treasury notes over allotments of new securities on subscriptions from holders of those notes (see Table 4, footnotes 32 and 34).

15/ Reopening of an earlier issue.

16/ Holders of 2-1/2% Treasury bonds maturing June 15, 1967, December 15, 1968, June 15, 1969, and December 15, 1969, were offered the option to exchange the bonds during the period from September 12, 1960, to September 20, 1960, inclusive, the first for 3-1/2% bonds of 1980, the second for 3-1/2% bonds of 1990, and the other two for 3-1/2% bonds of 1998, subject to allotment if the combined total of subscriptions for the bonds of 1990 and 1998 exceeded an outside limit of \$4.5 billion.

17/ Holders of the maturing certificates were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 3-1/4% notes offered in the amount of around \$6.9 billion. For detail of offering, see Table 4.

18/ Excess of maturing 4-7/8% certificates over allotments of new securities on subscriptions from holders of those certificates (see Table 4, footnotes 39 and 40).

PUBLIC DEBT OPERATIONS

Footnotes to Table 7 -(Continued)

- 19/ From March 20 through March 22, 1961, owners of 2-1/4% bonds of June 15, 1959-62, 2-1/4% bonds of December 15, 1959-62, 2-5/8% notes maturing February 15, 1963, and 2-1/2% bonds maturing August 15, 1963, were granted the option of exchanging their holdings. The first three were exchangeable for a new 3-5/8% bond due November 15, 1967, and the last for a new 3-3/8% bond due November 15, 1966. Exchanges were subject to allotment if subscriptions exceeded \$5 billion for the bonds of 1967 or \$3 billion for the bonds of 1966.
- 20/ Holders of the maturing certificates and notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the \$5,250 million offering of 3% certificates or the \$2,500 million offering of 3-1/4% notes. For detail of offering, see Table 4.
- 21/ Excess of maturing 4-3/8% certificates and 3-5/8% notes over allotments of new securities on subscriptions from holders of those certificates and notes (see Table 4, footnotes 43 and 44).
- 22/ \$1,569 million were redeemed for cash and \$168 million were exchanged for the tax anticipation bills dated March 23, 1962 (see Table 4).

Source: Daily Treasury statement; Office of Debt Analysis in the Office of the Secretary.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured F and G bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt upon which interest has ceased.

1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series I bonds for Series H bonds, which are reported in Table 3.

2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.

3/ Because there is a normal lag in classifying redemptions the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the

method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.

4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.

5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.

6/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.

7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.

8/ Includes exchanges of Series 1950 F and G bonds for 3-7/8% marketable bonds of 1968.

9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.

10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues. * Less than \$500,000.

Source: Daily Treasury statement for total amounts outstanding; reports from agencies and trust funds for securities held by U. S. Government investment accounts; and reports from Federal Reserve System for securities held by Federal Reserve Banks.

1/ Includes certain obligations not subject to statutory limitation. For amounts subject to limitation, see page 1.

2/ Includes accounts under the control of certain U. S. Government agencies whose investments are handled outside the Treasury.

3/ The total amount of interest-bearing securities held by private investors is calculated by deducting from the total amount outstanding the amount held by U. S. Government investment accounts and Federal Reserve Banks.

4/ Consists of guaranteed securities held outside the Treasury. All are public marketable issues.

1/ Consists of purchases or sales made by the Treasury of securities issued or guaranteed by the U. S. Government for (1) trust funds which by law are under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain U. S. Government agencies whose investments are handled through the facilities of the Treasury Department. It will be noted that these

transactions differ from those reflected in Table 1 because they exclude those Government investment accounts for which investments are not handled by the Treasury. Table 2 also includes purchases under Section 19 of the Second Liberty Bond Act, as amended (31 U.S.C. 754a), and excludes the Exchange Stabilization Fund.

TREASURY SURVEY OF OWNERSHIP, JULY 31, 1963

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 60 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for

corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

1/ Amount issued on September 3, 1963, was \$1,001 million.

2/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices are included in the history beginning October 1, 1939. Dates of highs and lows in case of recurrence are the latest dates.

3/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.

4/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

MARKET QUOTATIONS ON TREASURY SECURITIES, AUGUST 30, 1963

YIELDS OF TAXABLE TREASURY SECURITIES, AUG. 30, 1963
Based on Closing Bid Quotations

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the two classes of points are fitted by eye. Market yields on regular weekly bills other than those offered the latest week and on maturing coupon issues for which an exchange offer has been made and on only issues which are due in less than 3 months are excluded.

Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aaa corporate bonds.

1/ Series includes bonds on which the interest income is subject to normal tax and surtax and which are neither due nor callable before a

given number of years as follows: April 1953 to date, 10 years; April 1952 - March 1953, 12 years; October 1941 - March 1952, 15 years. For bonds currently in the series, see Table 4 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.

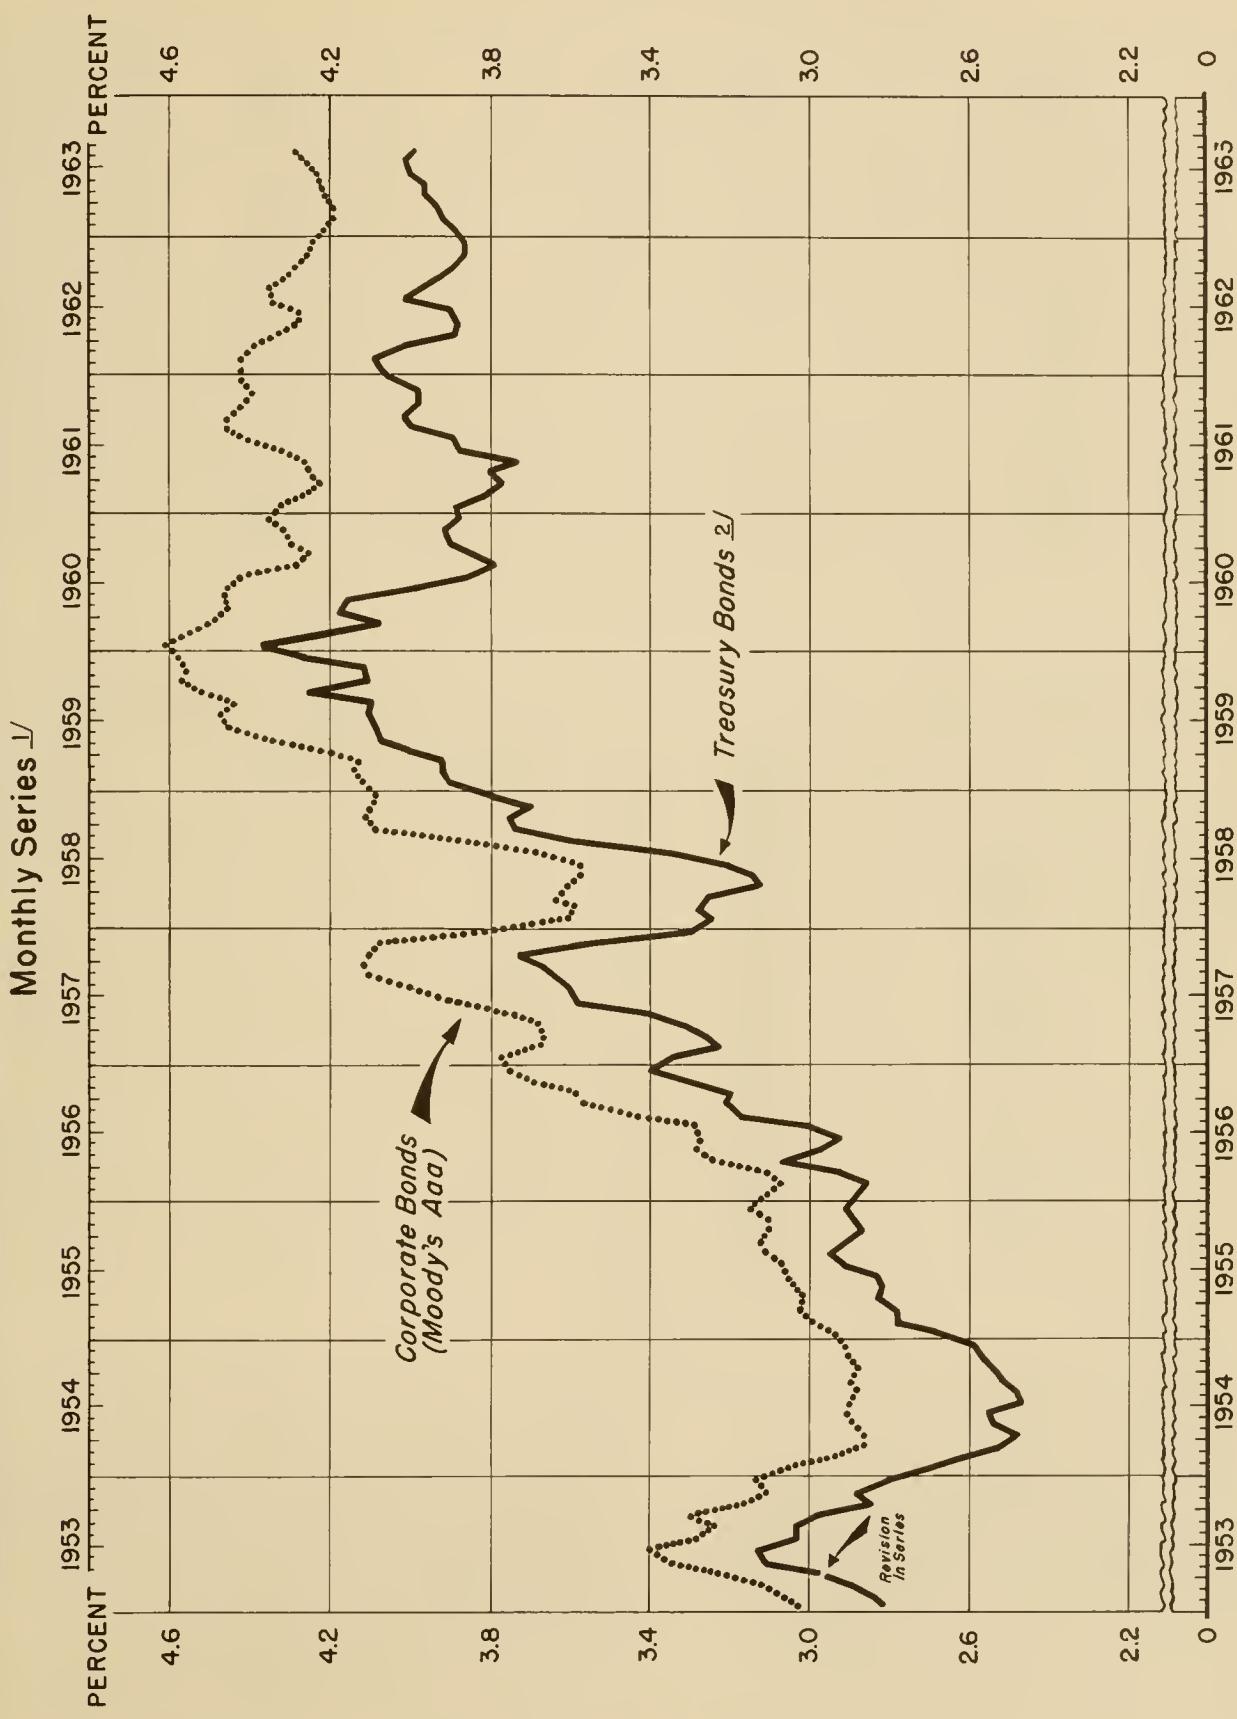

2/ One or more new long-term bonds added to the average (see footnote 1).

3/ An existing bond dropped from the average (see footnote 1).

4/ Change in series (see footnote 1).

1/ Excludes money held by the Treasury and money held by or for the account of the Federal Reserve Banks and agents.

2/ The following paper currencies are in process of retirement and are redeemable from the general fund of the Treasury: Gold certificates issued before January 30, 1934, silver certificates issued before July 1, 1929, Treasury notes of 1890, Federal Reserve notes issued before the series of 1928, Federal Reserve Bank notes, and national bank notes. The Treasury notes of 1890 have been in process of retirement since March 1900 (31 U.S.C. 411) upon receipt by the Treasury, the Federal Reserve Bank notes since June 12, 1945 (12 U.S.C. 445 note), and the national bank notes since December 23, 1915 (12 U.S.C. 441). Retirement of the others was authorized by the Old Series Currency Adjustment Act, approved June 30, 1961 (31 U.S.C. 912-916). The act authorizes the Secretary of the Treasury to determine from time to time the amount of currency of the following types which have been destroyed or lost, and to reduce the amounts thereof on the books of the Treasury: Gold certificates issued before January 30, 1934; silver certificates, United States notes, Federal Reserve Bank

notes, and national bank notes all issued before July 1, 1929; Federal Reserve notes issued prior to the series of 1928; and Treasury notes of 1890. Accordingly, the Secretary of the Treasury has determined that the following paper currencies have been destroyed or irretrievably lost and so will never be presented for redemption: On October 20, 1961, \$1 million of Treasury notes of 1890; and on August 27, 1962, \$9 million of gold certificates, \$15 million of silver certificates, \$18 million of Federal Reserve notes, \$1 million of Federal Reserve Bank notes, and \$15 million of national bank notes.

3/ Highest amount to date.

4/ Issued prior to January 30, 1934.

5/ Includes \$15 million issued before July 1, 1929.

6/ Includes \$18 million issued prior to the series of 1928.

7/ Based on the Bureau of the Census estimated population. Through fiscal 1958 the estimated population is for the conterminous United States (that is, exclusive of Alaska, Hawaii, and the outlying areas such as Puerto Rico, Guam, and the Virgin Islands). Beginning with fiscal 1959 the estimates include Alaska, and with fiscal 1960, Hawaii.

* Less than \$500,000.

2/ Total of seigniorage on coins and on newly mined silver, beginning

with that for July 1959, is included under coins; the breakdown is not available after June 1959.

3/ The figures in this column are not cumulative; as the amount of bullion held changes, the potential seigniorage thereon changes.

Note: The United States also has certain drawing rights on the International Monetary Fund, in which the United States has a quota of \$4,125 million. In accordance with Fund policies, these drawing rights include the right to draw virtually automatically an amount equal to the sum of the United States gold subscription to the Fund (\$1,031.2 million) and the Fund's net use of dollars; on August 31, 1963, these two amounts totaled \$1,048.9 million. Under appropriate circumstances the United States could draw an additional amount equal to the United States quota.

1/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, the proceeds of which are invested by the Fund in U. S. Government securities; as of August 31, 1963, this amounted to \$800 million.

2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in "Circulation Statement of United States Money." See "Monetary Statistics," Table 3.

CAPITAL MOVEMENTSBackground

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is reported monthly, and is published monthly in the "Treasury Bulletin." Supplementary information is published less frequently. Reports by banks, bankers, securities brokers and dealers, and nonfinancial business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.^{1/} A detailed description of the content of the statistics, including the changes instituted, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterest-bearing special notes of the United States held by the Inter-American Development Bank and the International Development Association.

The securities transactions data exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Section IV presents supplementary data in five tables which appear less frequently than monthly. Table 1, short-term foreign liabilities and claims reported by nonfinancial concerns, is published quarterly in the February, May, August, and November issues of the Bulletin. Table 2, estimated gold reserves and dollar holdings of foreign countries and international institutions, is published quarterly in the March, June, September, and December issues. Table 3, foreign credit and debit balances in brokerage accounts, appears semiannually in the March and September issues. Table 4, short-term banking liabilities to foreigners in countries and areas not regularly reported separately, heretofore has been presented annually in the March issue, but beginning with the August 1963 issue is published twice a year, covering data as of April 30 and December 31. Table 5, purchases and sales of long-term securities by foreigners during the preceding calendar year, appears annually in the April issue.

^{1/} Copies of the reporting forms and instructions may be obtained from the Office of Balance of Payments, Office of International Affairs, Treasury Department, Washington 25, D. C., or from Federal Reserve Banks.

1/ "Gold and short-term dollars" represent reported and estimated official gold reserves, and official and private short-term dollar holdings reported by banks in the U. S. "U. S. Government bonds and notes" represent estimated official and private holdings of U. S. Government securities with an original maturity of more than one year, except for nonmarketable U. S. Treasury notes, foreign series, and U. S. Treasury bonds, foreign currency series, which are excluded. Gold reserves of U.S.S.R., other Eastern European countries, and China Mainland are excluded.

2/ Includes holdings of other Western European countries, the Bank for International Settlements and the European Fund, gold to be distributed by the Tripartite Commission for the Restitution of Monetary Gold, and unpublished gold reserves of certain Western European countries. The figures included for the gold reserves of the B. I. S. represent the Bank's net gold assets.

3/ Data for Latin American regional organizations and (after June 1962)

data for European regional organizations other than the Bank for International Settlements and the European Fund are reclassified from "Other Europe" and "Other Latin America" to "International and regional." Data for short-term dollars exclude nonnegotiable, non-interest-bearing special U. S. notes held by the Inter-American Development Bank and the International Development Association.

4/ Total short-term dollars include \$82 million reported by banks included in the series beginning December 31, 1961. Of this total, holdings of Japan amount to \$81 million.

5/ Through March 1963, "Other Africa" and "Total Africa" may include short-term dollars of some countries in the "Other" category.

6/ Includes countries in Oceania and Eastern Europe, and Western European dependencies in Latin America.

* Less than \$500,000.
