Treasury Financing Operations

June Offering of Certificates of Indebtedness

On May 28, the Secretary of the Treasury announced the offering on June 4, 1951, of a new issue of 9-1/2 month 1-7/8 percent certificates of indebtedness. The offering was made to owners of the 2-3/4 percent Treasury bonds of 1951-54, dated June 15, 1936, previously called for redemption on June 15, 1951, and to owners of the three issues of 1-1/4 percent Treasury notes, Series B-1951, dated March 1, 1950, Series C-1951, dated April 1, 1950, and Series D-1951, dated June 1, 1950, all maturing July 1, 1951. The called bonds were outstanding in the amount of \$1,627 million and the three issues of notes in the total of \$8,445 million.

Subscription books were opened June 4 and were closed at the close of business on June 7. The certificates, designated Series A-1952, were exchanged par for par for the called bonds and at par with an adjustment of interest as of June 15, 1951, for the three series of notes. Cash subscriptions were not received.

The new certificates, which are dated June 15, 1951, will bear interest from that date at the rate of one and seven-eighths percent per annum, payable with the principal at maturity on April 1, 1952. They are issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Announcement on Callable Treasury Bonds and New Savings Notes

On May 8, 1951, the Secretary of the Treasury announced that on May 14, 1951, the 3 percent Treasury bonds of September 15, 1951-55, outstanding in the amount of \$755 million, would be called for redemption on September 15. He also announced that the 2 percent Treasury bonds of 1951-53, which also were callable on September 15, 1951, and which are outstanding in the amount of \$7,986 million, would not be called for redemption on that date.

In addition, the Secretary of the Treasury announced the continuous offering of a new series of Treasury savings notes to begin on May 15, 1951. The announcement stated that these notes would be similar to the series (D) then on sale, except that the interest return would range from 1.44 percent if the notes are held for six months or less, to 1.88 percent if held for the full three-year term.

Call of 3 Percent Treasury Bonds of 1951-55

Formal notice on May 14 of the redemption call on September 15, 1951, of all outstanding 3 percent

Note: Details of Treasury market financing operations are shown elsewhere in this issue of the "Treasury Bulletin", in the tables on "Offerings and Disposition", respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills".

Treasury bonds of 1951-55, dated September 15, 1931, gave supplementary information. The notice stated that interest on the bonds will cease on September 15, 1951, and that before that date holders may be offered the privilege of exchanging all or part of their called bonds for other interest-bearing obligations of the United States, in which event public notice will be given. Full information on the presentation and surrender of the bonds for cash redemption under this call, the notice pointed out, is contained in Department Circular No. 666, dated July 21, 1941.

Treasury Bills Refunded

Treasury bills maturing in May totaled \$5.5 billion. Each weekly offering of \$1.1 billion equaled the amount maturing. The average rates of discount on the five new offerings were 1.508 percent for May 3, 1.566 percent for May 10, 1.626 percent for May 17, 1.591 percent for May 24, and 1.600 percent for May 31.

Treasury Savings Notes, Series A

Details of the terms of the new Treasury savings notes were announced on May 14. Sale of Series D savings notes was discontinued at the close of business May 14. The new Series A notes are issued at par and will mature three years from issue date. The notes are issued in denominations of \$100, \$500, \$1,000, \$5,000, \$10,000, \$100,000, \$500,000, and \$1,000,000.

Series A savings notes are dated as of the fifteenth of each calendar month. The issue date is determined by the day of the month on which payment at par and accrued interest, if any, is received and credited. For example, payment received and credited on any day during the period from and including May 15, 1951, to and including June 14, 1951, results in the issue of notes dated May 15, 1951.

Interest on the notes accrues monthly on the fifteenth calendar day of each month after the issue date on a graduated scale as follows:

Half-year periods after month of issue	Interest accrued each month per \$1,000
First 6 months	\$1.20
7th through 12th month	\$1.50
13th through 18th month	\$1.60
19th through 24th month	\$1.70
25th through 36th month	\$1.80

The table at the end of this section shows for the \$1,000 denomination the tax payment or redemption values and investment yields monthly. The official circular, No. 889, dated May 10, 1951, carries a table showing these data for each denomination, and gives the terms of the offering in full.

sition", respectively, of marketable issues of bonds, notes, and certificates of indebtedness, and in the table "Offerings of Treasury Bills".

Series A savings notes may be used in payment of Federal income, estate, and gift taxes assessed against the owner of the notes or his estate at par and accrued interest, at any time after two months from the issue date. If not presented in payment of taxes, and except for notes in the names of banks that accept demand deposits, Series A notes will be

redeemable for cash at par and accrued interest at any time after four months from the issue date. If inscribed in the name of a bank that accepts demand deposits, the notes will be accepted at par and accrued interest in payment of taxes, but will be redeemed for cash at or before maturity only at the purchase price, or par.

5/ In testimony before the Ways and Means Committee of the House of Representatives on April 2, 1951, Secretary Snyder estimated that 1951 net receipts would be about \$2.7 billion higher than anticipated in the Budget document and expenditures would be about \$3 billion lower, with a resulting surplus for the year of about \$3 billion. The Secretary indicated further that net receipts for 1952 are at present estimated to be about \$3 billion higher than shown in the Budget document.

6/ Beginning November 1950, investments of wholly owned Government corporations in public debt securities are excluded from budget expenditures and included with other such investments under "Trust account and other transactions".

1/ Allows for deduction of appropriation of \$275 million for Medical Care Insurance Trust Fund, under proposed legislation.

2/ The Social Security Act Amendments of 1950 (Public Law 734), approved August 28, 1950, change the basis of appropriating social security employment taxes on employers and employees. Effective January 1, 1951, these taxes and withheld income taxes are paid into the Treasury in combined amounts without separation as to type of tax. The amounts of such taxes credited currently as appropriations to the Federal Old-Age and Survivors Insurance Trust Fund are based initially on estimates by the Secretary of the Treasury and are later adjusted on the basis of wage records maintained by the Social Security Administration. For the purposes

of this table, beginning January 1951, the same amount as is credited each month to the Trust Fund is included under "Employment taxes" as receipts for old-age insurance, and the balance of the combined receipts is shown under income tax as "Withheld by employers".

See Table 6, footnote 3.

Beginning November 1949, interest on the public debt is reported as an expenditure when such interest becomes due and payable, as distinguished from the previous practice of showing the expenditure on the basis of interest paid by the Treasurer of the United States.

Includes public works undertaken by the Veterans' Administration.

Transactions relating to the Foreign Economic Cooperation Trust Fund, established under Section 114 (f) of the Economic Cooperation Act of 1948 (62 Stat. 150), are consolidated with budget expenditures.

Source: Daily Treasury Statement; Office of the Treasurer of the United States; for guaranteed securities prior to July 1942, Statement of Contingent Liabilities.

1/ Obligations issued by certain Government corporations and other agencies, which are guaranteed by the United States as to both principal and interest.

Such obligations were first authorized in 1932. Prior to September 1939, the figures represent principal shown as a contingent liability of the United States; beginning September 1939, they represent principal outstanding, both matured and unmatured. Guaranteed securities held by the Treasury are excluded.

STATUTORY DEBT LIMITATION

The Second Liberty Bond Act, as amended, (31 U.S.C. 757 b), provides that the face amount of obligations issued under authority of that act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury), shall not exceed in the

aggregate \$275 billion outstanding at any one time. Obligations issued on a discount basis, and subject to redemption prior to maturity at the option of the owner, are included in the statutory debt limitation at current redemption values.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935 and began to mature in March 1945. Series A-D were sold from March 1935 to April 1941. Series E, F, and G have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31 and October 1945, pages A-4 and A-5.

In addition to the information on savings bonds operations which appears each month, data by denominations

and dollar sales by States are published at less frequent intervals but are shown on a monthly basis.

Series A-F sales are shown at issue price and total redemptions and amounts outstanding at current redemption values. Series G is shown at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured bonds outstanding are included in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include unclassified sales consisting of Series E, F, and G. The amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include unclassified Series A-D redemptions beginning with October 1944, and also unclassified F and G redemptions, beginning with June 1947.

3/ Includes both matured and unmatured bonds; see Table 4.

4/ Includes sales resulting from special offering of Series F and Series G

to certain classes of institutional investors in excess of regular limitations (see "Treasury Bulletin" for September 1950, page A-1). These sales were as follows (in millions of dollars):

	Oct. 2-10	Nov. 1-10	Dec. 1-11
Series F.....	135	27	46
Series G.....	486	104	131
Total.....	621	131	177

* Less than \$500,000.

TREASURY SAVINGS NOTES

Treasury tax and savings notes have been issued in five series: Tax Series A from August 1, 1941, through June 22, 1943; Tax Series B from August 1, 1941, through September 12, 1942; Savings Series C (originally designated Tax Series C) from September 14, 1942, through August 31, 1948; Savings Series D from September 1, 1948, through May 14, 1951; and Savings Series A beginning on May 15, 1951.

Details concerning terms and conditions for purchase and redemption and investment yields of Savings Series A appears in the June 1951 issue of the "Treasury Bulletin", page A-1. Similar information with respect to Savings Series D will be found in the October 1948 and September 1949 issues, and with respect to Savings Series C in the October 1945

issue. For details concerning terms and conditions, investment yields, and tax payment or redemption values of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased.

4/ United States savings bonds, Series D-1941 (March and April), E, and F, are shown at current redemption values. 1/ Amount issued on May 3 was \$1,100 million.

2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing price on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

3/ For short-term Treasury notes, see Table 2.

4/ Quoted on a yield basis beginning March 7, 1951; the 2% taxable issue of September 15, 1951-53 returned to price basis on April 9, 1951. Yields are converted to prices (to the nearest quarter of a thirty-second) in the price range. The 2-3/4% partially tax-exempt issue of June 15, 1951-54 was called on February 14, 1951, for redemption on June 15, 1951.

5/ Yield to maturity. Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield

to maturity as more significant when an issue is selling at or below par.

6/ Included in the average yield of long-term taxable Treasury bonds as shown under "Yields of Treasury and Corporate Bonds".

7/ For definition see "Debt Outstanding", Table 3, footnote 1.

8/ All partially tax-exempt except Panama Canal bonds, which are wholly tax-exempt.

9/ Not quoted on April 30, 1951.

10/ Amount issued on May 1, 1951 was \$30 million.

11/ Amount issued on May 1, 1951, was \$60 million.

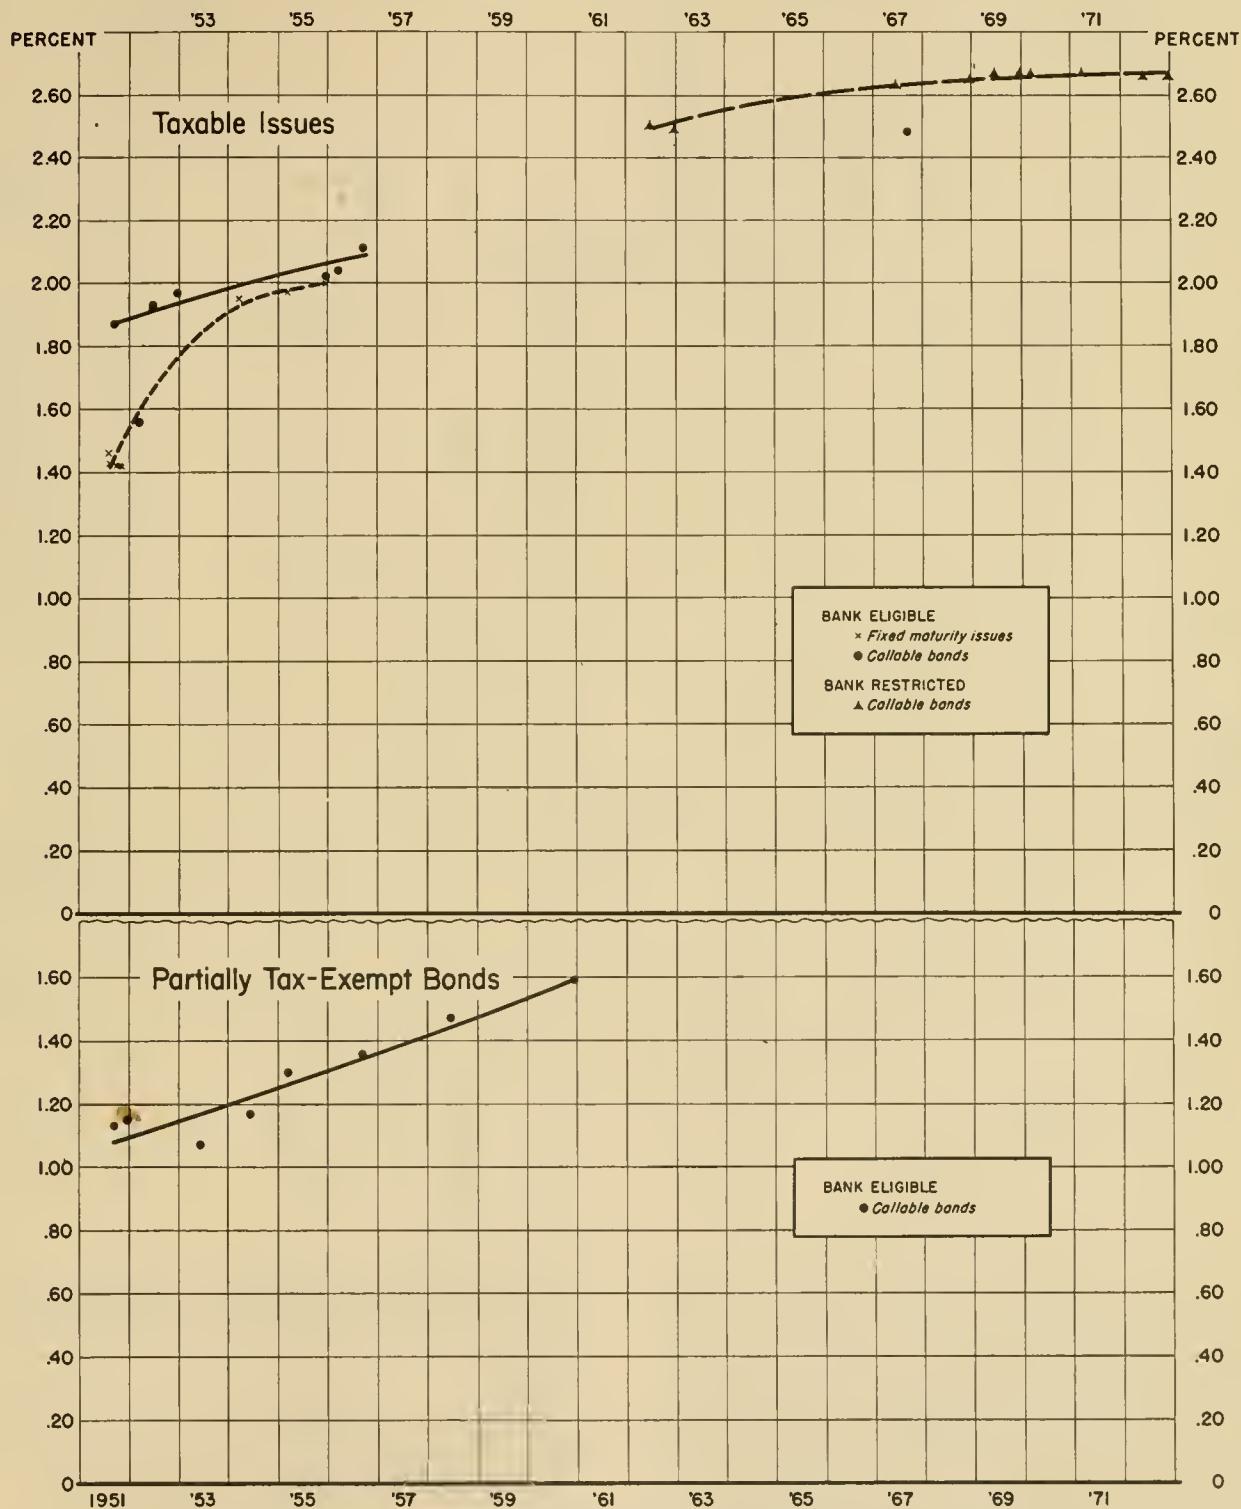

12/ Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in the Federal land banks ceased on June 26, 1947.

13/ Callable on 15 days' notice on November 1, 1951.

14/ Callable on 15 days' notice on July 1, 1951.

MARKET QUOTATIONS, APRIL 30, 1951

YIELDS OF TREASURY SECURITIES, APR. 30, 1951
 Based on Mean of Closing Bid and Ask Quotations

Explanation: The points represent yields to call when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market as reported to the Treasury by the Federal Reserve Bank of New York, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership", in this issue of the "Treasury Bulletin". The partially tax-exempt average was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

2/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

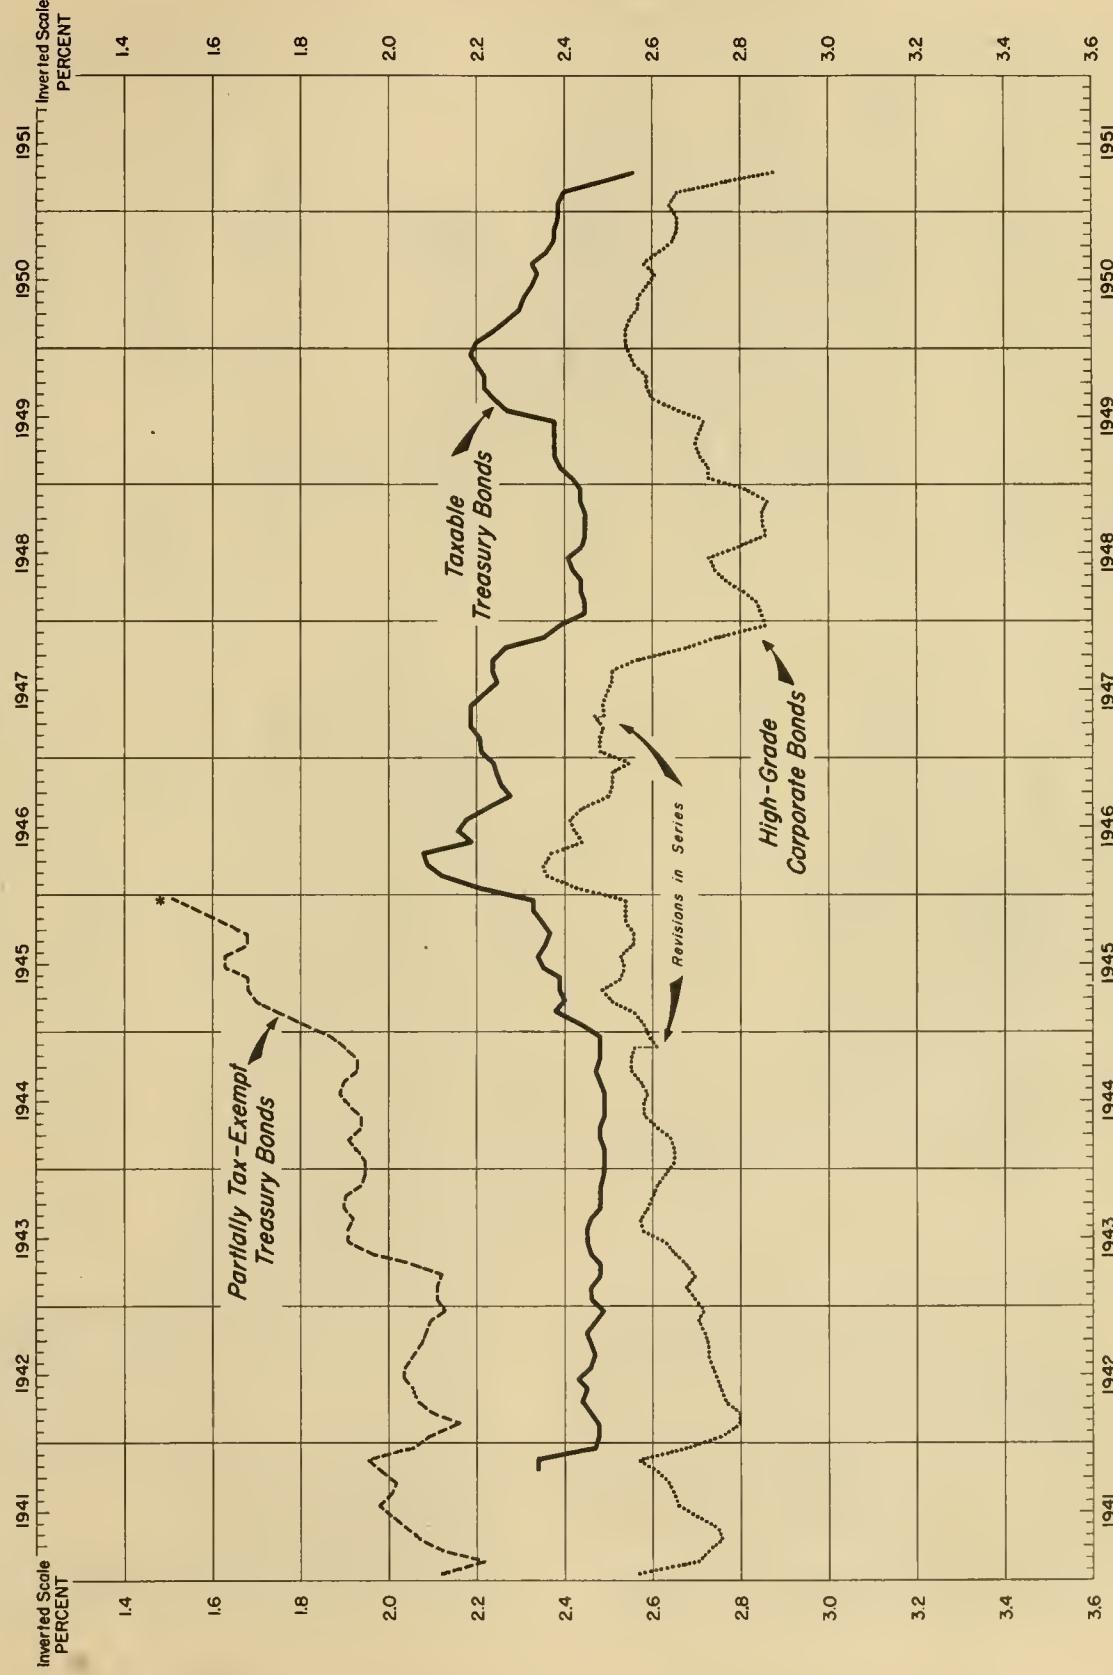

3/ As of December 21, 1949, the Consolidated Gas Electric Light and Power Company of Baltimore 2-3/4's of 1981 were dropped from the average, having been called.

4/ As of October 20, 1950, the Standard Oil Company of California 2-3/4's of 1965-66 were dropped from the average, having been called.

5/ Market closed.

Source: Daily Treasury Statement for total receipts from internal revenue; reports by collectors of internal revenue for collections by type of tax. Detail by type of tax is available only on a collection basis. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositories; they do not coincide with amounts reported by collectors because of the lag in deposits of collections and because certain taxes are paid directly into the depositories.

1/ Excludes collections for credit to certain trust accounts for island possessions; includes corporation income tax on Alaska Railroad.

2/ Includes excess profits taxes formerly shown separately as follows: unjust enrichment through 1947 (thereafter these collections are included under "Miscellaneous"), declared value (repealed for years ending after

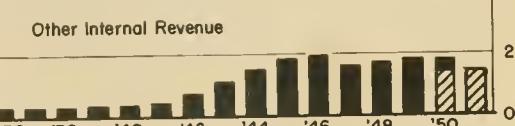

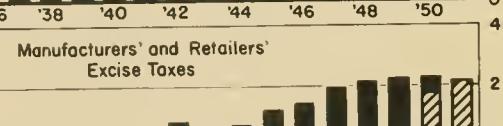

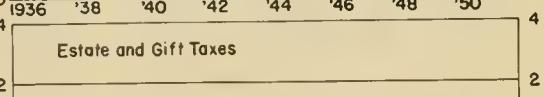

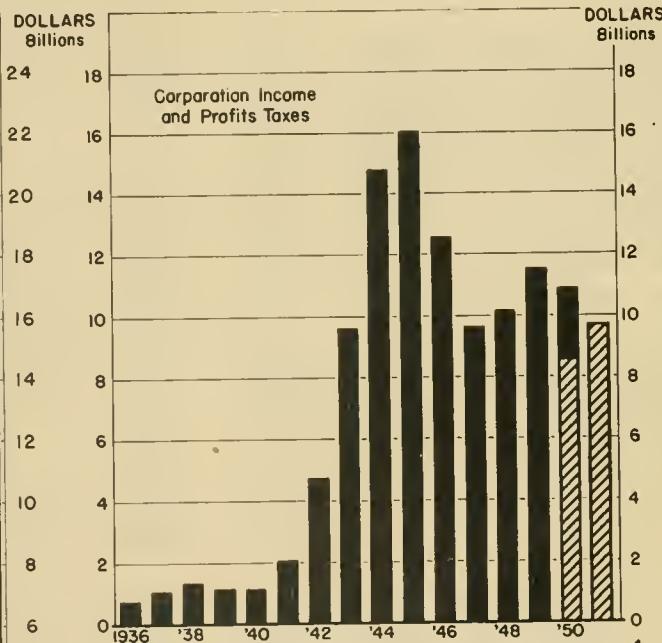

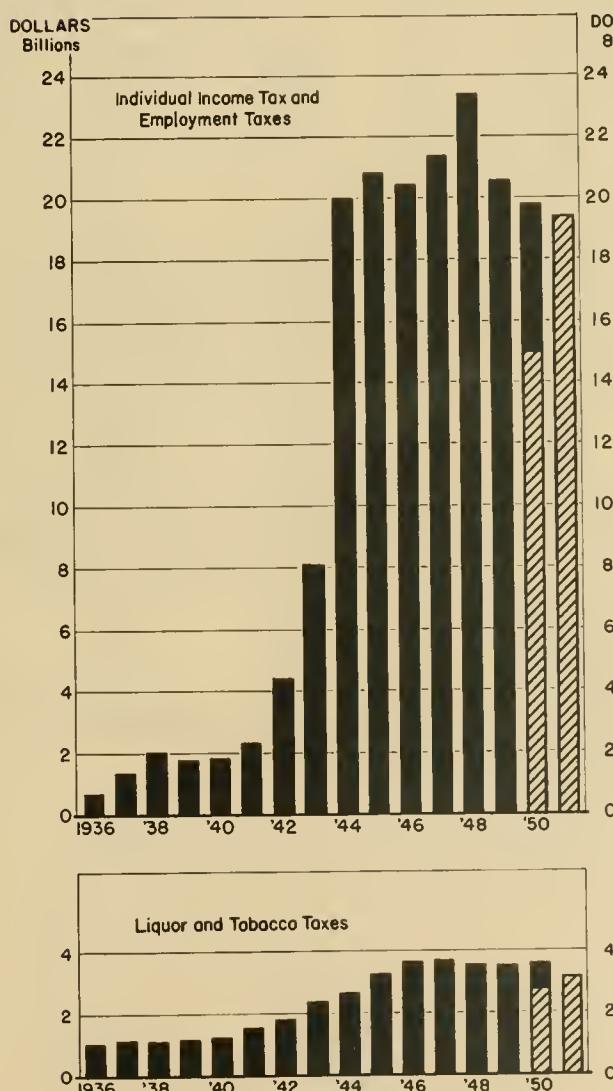

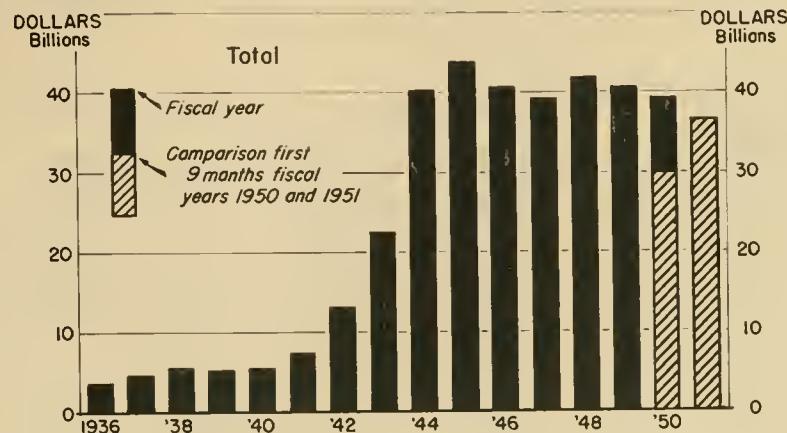

June 30, 1946), Excess Profits Tax Act of 1940 (Title II of the Second Revenue Act of 1940, which was repealed for years ending after December 31, 1945), and Vinson Act as amended (4 U.S.C. 496).

3/ Beginning January 1951, withheld income taxes and social security employment taxes on employees and employers are paid into the Treasury in combined amounts without separation as to type of tax. The figures for prior periods have been combined accordingly in this table for purposes of comparison, but are shown separately in the March 1951 and preceding issues of the "Treasury Bulletin".

4/ Repealed for years ending after June 30, 1945. Beginning with July 1950, included under "Miscellaneous".

Source: Daily Treasury Statement for total receipts from internal revenue; reports by collectors of internal revenue for collections by type of tax. Receipts on the Daily Treasury Statement basis are compiled from the latest daily reports from Government depositories; they do not coincide with amounts reported by collectors because of the lag in deposits of collections and because certain taxes are paid directly into the depositories.

CAPITAL MOVEMENTS

Data relating to claims on foreigners and liabilities to foreigners, and capital movements between the United States and foreign countries, have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, and Treasury regulations thereunder. Information covering the principal types of data and the principal countries is reported each month by banks and bankers and securities brokers and dealers in the United States. This information is published regularly in the "Treasury Bulletin". Supplementary information is published at less frequent intervals. All reports are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury.

The term "foreigners" as used in these reports covers all institutions and individuals (including United States citizens) domiciled outside the United States, as well as international organizations, wherever domiciled, created by treaty or convention between sovereign states. "Short-term" refers to original maturities of one year or less, and "long-term" refers to all other maturities. A detailed discussion of the reporting coverage, basis of reporting, and derivation of capital movements figures appeared in the April 1950 issue of the "Treasury Bulletin", pages 50-52. Revised report forms and regulations became effective with

the data for January 1950. Attention is called to the fact that although the grand total figures on the revised reporting basis are reasonably comparable with those for preceding months, data for individual countries in some instances are not comparable because of certain changes in coverage and geographical classification.

The supplementary information, contained in Section IV, is presented in three tables appearing at different times. Table 1 gives data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information was published for the first time in the October 1949 issue of the "Treasury Bulletin" and begins with data for September 30, 1946. Table 2 supplies information by countries on long-term claims on and liabilities to foreigners as reported by banks and bankers in the United States. This table appeared for the first time in the December 1949 issue. Data are for the end of the calendar year beginning with 1942. Table 3 gives information on short-term liabilities to countries not regularly reported separately by banks and bankers. This table appeared for the first time in the April 1950 issue. The data have been requested at irregular intervals, the earliest date being October 1943.
