Treasury Financing Operations

September-October Bond and Certificate Maturities

On August 31, 1949, pursuant to his statement on August 22, the Secretary of the Treasury announced the offering of a one-year 1-1/8 percent certificate of indebtedness to refund the \$1,292 million of 2 percent Treasury bonds of 1949-51, which had been called on May 13, 1949, for redemption on September 15, 1949.

Subscription books for the new certificates, Series G-1950, offered in exchange for the called bonds, were opened on August 31 and were closed at the close of business on September 3. The certificates were dated September 15, 1949, and bear interest from that date at the rate of 1-1/8 percent per annum. They are payable with the principal at maturity on September 15, 1950.

In further pursuance to his statement on August 22, the Secretary announced on September 16 that holders of the 1-1/4 percent certificates of indebtedness, Series G-1949, maturing October 1, 1949, would be offered in exchange a one-year 1-1/8 percent certificate of indebtedness. The maturing certificates totaled \$6,535 million.

Subscription books for the 1-1/8 percent certificates, Series H-1950, offered in exchange for the maturing certificates, were opened September 21 and were closed at the close of business on September 24. The new certificates were dated October 1, 1949, and bear interest from that date at the rate of 1-1/8 percent per annum, payable with the principal at maturity on October 1, 1950.

Note: Details of Treasury market financing operations are shown in the tables on "Offerings" and "Disposition", respectively, of marketable issues of bonds, notes,

With respect to both issues of new certificates, exchanges were made par for par, and cash subscriptions were not received. Both were issued in bearer form only, in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Reports to the Treasury on the ownership of Government securities indicate that on July 31, 1949, about 79 percent of the called bonds and about 57 percent of the maturing certificates were owned by reporting commercial banks and Federal Reserve Banks. The ownership figures for July 31 are the latest available for holdings of commercial banks.

Subscriptions to the new certificates of Series G-1950 amounted to \$1,197 million, leaving \$96 million of the called bonds to be paid in cash. Subscriptions to the new certificates of Series H-1950, on the basis of preliminary figures, amounted to \$6,247 million, leaving \$288 million to be paid in cash.

Treasury Bills Refunded and Increased

Treasury bills matured in September in the amount of \$4.5 billion, and new offerings totaled \$4.7 billion. Each of the five maturing issues amounted to \$900 million. The first two new offerings were for \$1.0 billion each, and the last three offerings were for \$900 million each. The successive average rates of discount on the five September offerings, beginning with that dated September 1, were 1.054 percent, 1.056 percent, 1.059 percent, 1.061 percent, and 1.076 percent.

Source: Actual figures in these tables are based on the Daily Treasury Statement; estimates are based on the 1950 Budget document, including effect of proposed legislation as outlined in Budget detail.

1/ Expenditures from the Foreign Economic Cooperation Trust Fund (all of which occurred in the fiscal year 1949) are treated in this series of tables as cash trust account expenditures rather than as cash budget expenditures.

2/ The U. S. subscription to the capital of the International Monetary Fund was paid in part from the Exchange Stabilization Fund (see "Treasury Bulletin" for September 1947, page 17).

3/ Consists of seigniorage on silver and increment resulting from reduction in weight of the gold dollar. This item is part of the cash budget receipts of the Treasury shown in these tables, but is excluded from the 1950 Budget document figures for "Receipts from the public".

4/ In addition to this decrease in the General Fund balance, the Exchange Stabilization Fund was drawn down by \$1,800 million for subscription to the capital of the International Monetary Fund (see footnote 2).

* Less than \$500,000.

1/ Original call and maturity dates are used.

2/ Prior to the refunding operations of March 1, 1946, maturing issues were either paid off in full or the holders were given the privilege of exchange into another security in full. Beginning with that operation, some maturities have been split by the Treasury into a stated portion for cash retirement with the remainder covered by an offering of an exchange security.

3/ Beginning with the November 1947 operation, arrangements were made between the Treasury and the Federal Reserve System whereby all or a part of the System's holdings of certain maturing and called securities would be presented for cash redemption.

UNITED STATES SAVINGS BONDS

United States savings bonds were first offered for sale in March 1935. Series A-D were sold from March 1935 to April 1941. Series E, F, and G bonds have been on sale since May 1, 1941. For information on the terms and conditions of these bonds, see "Treasury Bulletin" issues for December 1947, page 31, and October 1945, pages A-4 and A-5. Sales and redemptions data by States are published at the end of each calendar and each fiscal year after June 30, 1947. Sales by denominations are also published semiannually after December 31, 1947.

In the following tables sales figures are quoted at issue price, and redemptions and amounts outstanding at current redemption values. Amounts of Series G outstanding are quoted at par. Matured bonds which have been redeemed are included in the figures on redemptions. Matured bonds outstanding are reflected in the interest-bearing debt until all bonds of the series have matured, when they are transferred to matured debt upon which interest has ceased.

1/ Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than the sales reported as unclassified in the Daily Treasury Statement. The greater part of that item consists of sales for which information is available as to the series but not the year of issue. On the basis of that information such sales are included in this table according to series. Prior to

June 1947, it was possible to distribute by series all sales reported as unclassified in the Daily Treasury Statement.

2/ Series E redemptions include small amounts of unclassified Series A-D redemptions beginning with October 1944, and small amounts also of unclassified F and G redemptions, beginning with June 1947.

* Less than \$500,000.

TREASURY SAVINGS NOTES

Treasury savings notes (originally designated tax savings notes) have been issued in four series: Series A from August 1, 1941, through June 22, 1943; Series B from August 1, 1941, through September 12, 1942; Series C from September 14, 1942, through August 31, 1948; and Series D on continuous sale beginning September 1, 1948. Details concerning terms and conditions for purchase and redemption, and investment yields of Series D notes will be found in the "Treasury Bulletin" for October 1948, page A-1. Similar information concerning Series C notes will be found in the "Treasury Bulletin" for October 1945, pages A-4 and A-5. For details concerning terms and conditions, investment yields, and tax payment or redemption values

of Series A and B, see "Annual Report of the Secretary of the Treasury" for 1942, pages 207 and 220, and for sales and redemptions by fiscal years and months, see "Treasury Bulletin" for February 1946, pages 42 and 43.

In the following tables sales and redemptions of Treasury savings notes are shown at par value. Matured notes redeemed (either for cash or for tax payment) are included in the figures on redemptions. Matured notes outstanding are reflected in the interest-bearing debt until all notes of the series have matured, when they are transferred to matured debt upon which interest has ceased, in accordance with the practice of the Daily Treasury Statement.

1/ Excludes trust departments.

2/ Includes trust companies and, beginning with figures for July 1949, also includes stock savings banks. Formerly these banks were shown as a separate classification, but they are no longer so reported.

3/ Includes those banks and insurance companies not reporting in the Treasury Survey.

4/ United States savings bonds, Series D, E, and F, are shown at current redemption value. They were reported at maturity value by the banks and insurance companies included in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

5/ C. C. C. demand obligations in the amount of \$9 million, all held by commercial banks, are shown only in the total amount outstanding; holdings by reporting banks are not available.

6/ Holdings by reporting agencies not available.

7/ Excludes guaranteed securities held by the Treasury.

8/ Issues which commercial banks may not acquire prior to specified dates (with minor exceptions); see "Debt Outstanding", Table 3, footnote 3.

9/ Federal securities fall into three broad classes with respect to the imposition of Federal income taxes on income derived from them. "Wholly" tax-exempt securities are those with the income exempt from both normal tax and surtax. "Partially" tax-exempt securities are those with the income exempt from the normal tax except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax. "Taxable" securities are those with the income subject to normal tax and surtax.

10/ Includes F. H. A. debentures; see footnote 11.

11/ A small indeterminate amount of these debentures is partially tax-exempt.

12/ United States savings bonds sold prior to March 1, 1941, are partially tax-exempt; those sold on and after that date are taxable.

13/ The proprietary interest of the United States in these banks ended on June 26, 1947.

* Less than \$500,000.

MARKET QUOTATIONS, AUGUST 31, 1949

Market quotations shown here are over-the-counter closing quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York. The securities listed in Section I include all public marketable securities issued or guaranteed by the United States Government except those not regularly quoted in the market. The issues excluded are postal savings bonds and Federal Housing Administration debentures. The latter are

the only public marketable interest-bearing guaranteed securities outstanding. Section II lists the public marketable securities issued by Federal agencies but not guaranteed by the United States Government. Daily quotations for the securities listed in Sections I and II are published monthly in the Treasury Department statement, "Prices and Yields of Public Marketable Securities Issued by the United States Government and by Federal Agencies".

1/ Not quoted on August 31, 1949.

2/ Issued after August 31, 1949; for amount, see "Debt Operations", Tables 2 and 3.

3/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market, except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included in history beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

4/ Called on May 13, 1949, for redemption on September 15, 1949. Quoted on a yield basis beginning August 30, 1949. Prices history ends August 29, 1949.

5/ Called on August 12, 1949, for redemption on December 15, 1949.

6/ Included in the average yield of long-term taxable Treasury bonds

as shown under "Yields of Treasury and Corporate Bonds".

7/ Issues which commercial banks may not acquire prior to specified dates (with minor exceptions); see "Debt Operations", Table 1, for eligibility dates.

8/ All partially tax-exempt except Panama Canal bonds, which are wholly tax-exempt.

9/ These securities are not shown until date of issue.

10/ Not quoted since date of issue.

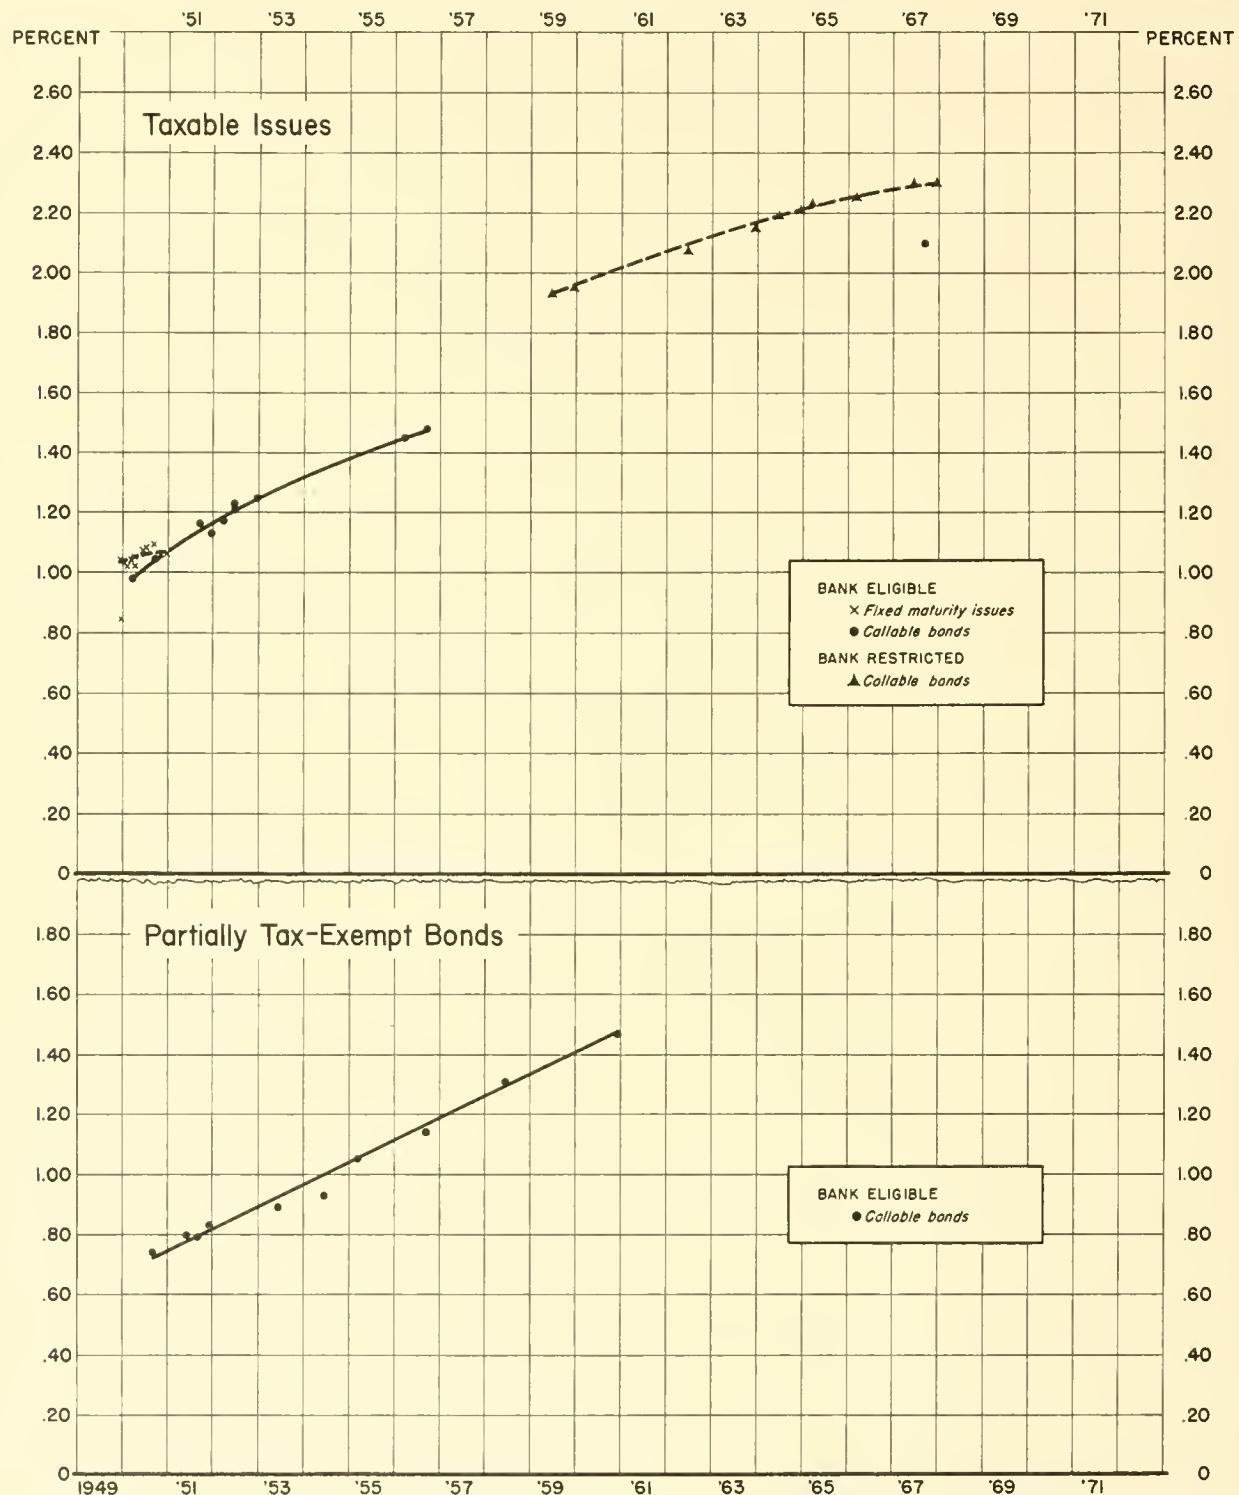

11/ Excludes issues completely held by Farm Credit Administration agencies. The proprietary interest of the United States in the Federal land banks ceased on June 26, 1947.

12/ Yield to maturity. Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.

r Revised.

Note: Treasury bonds included in the averages, beginning with December 1935, are those neither due nor callable for fifteen years. Prior to that time, for years shown in this table, the bonds included were neither due nor callable for twelve years. For a discussion of the composition of these averages, see the "Treasury Bulletin" for March 1944, page 58; for the composition of the high-grade corporate bond average, see the "Treasury Bulletin" for July 1947, page 59, and January 1945, page 56. Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market as reported to the Treasury by the Federal Reserve Bank of New York, beginning September 2, 1941. Prior to that time, yields were computed on the basis of closing prices on the New York Stock Exchange, except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Exchange. Corporate bond yields are computed on the

basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

1/ For definition of taxable and partially tax-exempt bonds, see footnotes to the "Treasury Survey of Ownership" in this issue of the "Treasury Bulletin". The partially tax-exempt average was discontinued on December 15, 1945, because there were no longer any bonds in this category with fifteen or more years to maturity or first call.

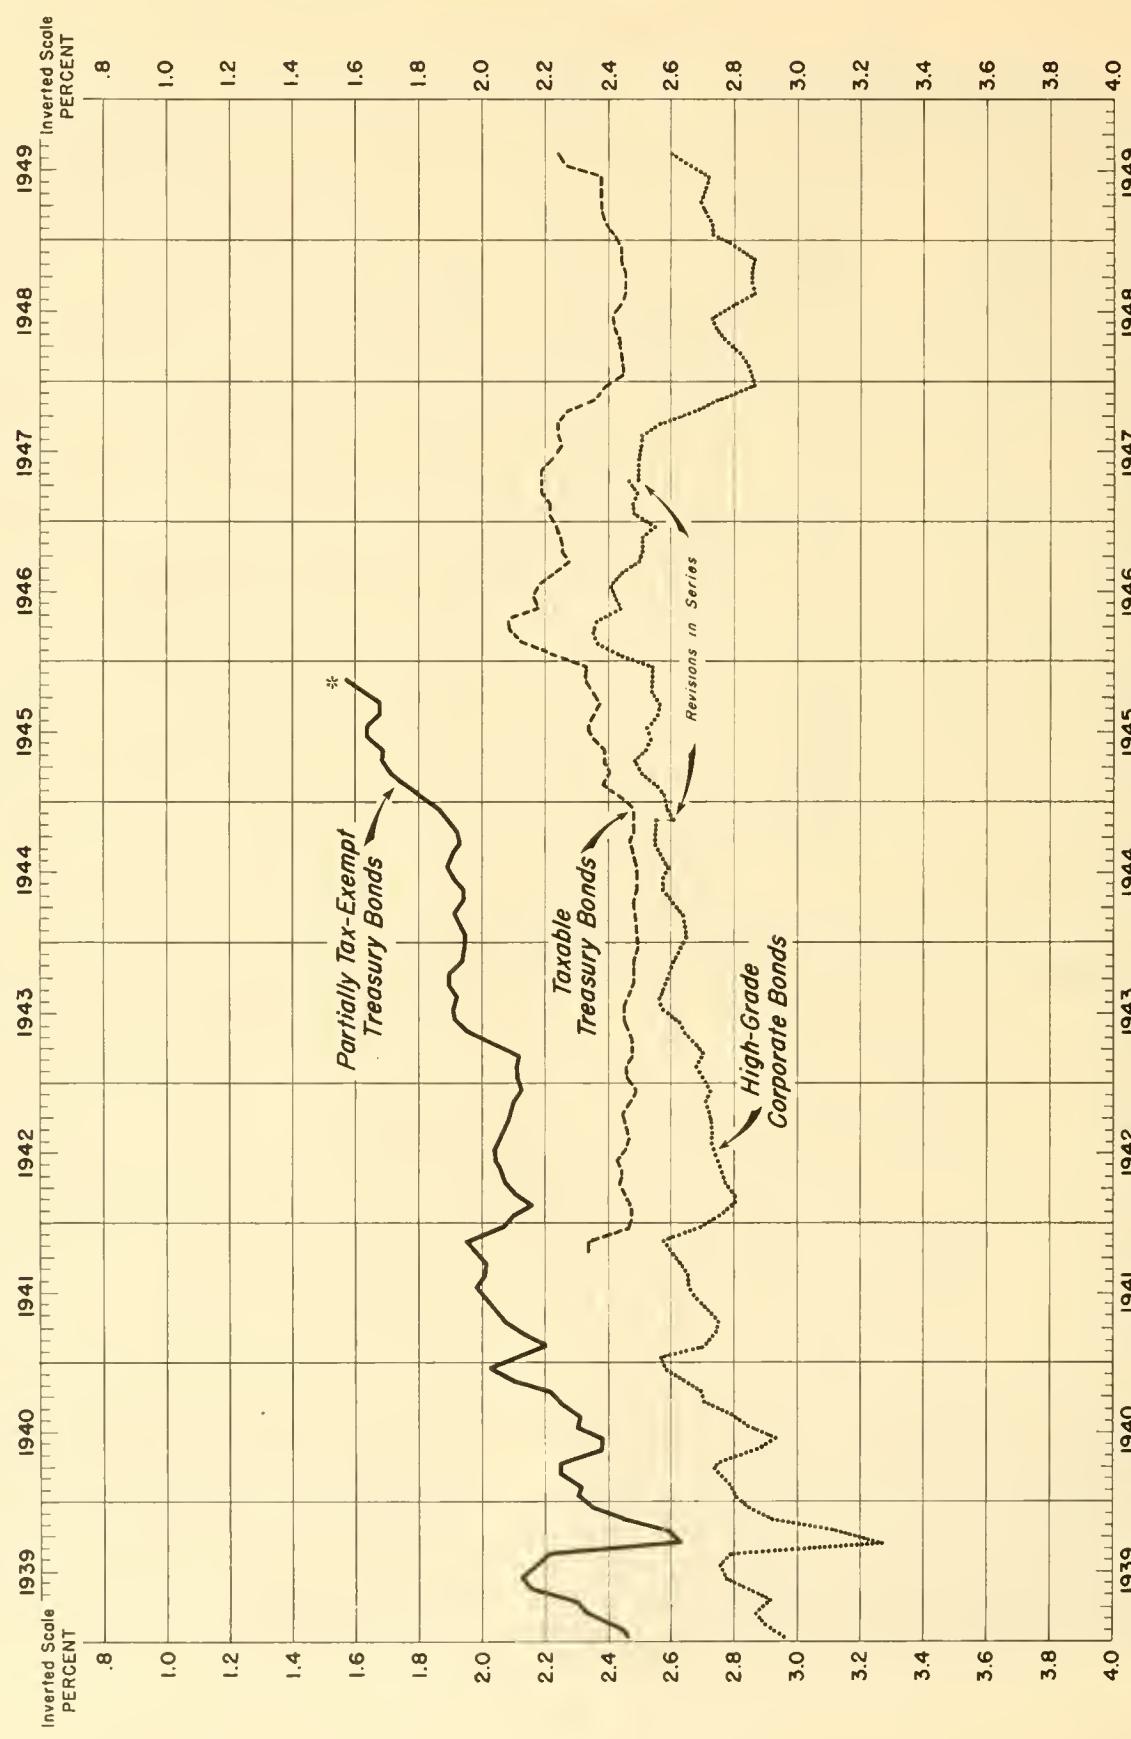

2/ Average revised beginning November 1, 1944. Old average for November 1944 was 2.56%.

3/ Average revised beginning April 1, 1947. Old average for April 1947 was 2.47%.

4/ Market closed.

CAPITAL MOVEMENTS

Monthly data relating to capital movements between the United States and foreign countries as reported by banks, bankers, and brokers throughout the United States are published regularly in the "Treasury Bulletin". These appear in the first four sections of "Capital Movements". Supplementary data are presented from time to time in Section V.

Section I contains the historical summary of principal types of monthly data on capital movements, beginning with 1935 when the information was first compiled. Each type is then broken down into its chief components in the same chronological detail. Section II supplies a summary by countries, showing a geographic breakdown for recent months of the same principal series and most of the same components. Foreign debit and credit balances in brokerage accounts also are shown by countries.

Section III presents data by countries for certain components of total short-term claims and liabilities and total long-term security transactions. This information is given for the latest month for which final figures are available. Similar information for the latest month for which preliminary figures are available is presented in Section III A. Section IV contains data for recent months on outstanding contracts of banks for forward purchases and sales of foreign exchange.

Section V presents, in Table 1, data by countries on short-term claims on and liabilities to foreigners as reported quarterly by exporters, importers, and industrial and commercial concerns in the United States. This information is published for the first time in the

current issue of the "Treasury Bulletin", and the figures shown cover the period by quarters from September 30, 1946, through December 31, 1948. Later information will appear at intervals in subsequent issues.

Transactions of these nonfinancial concerns represent a minor part of the total flow of short-term capital between the United States and foreign countries. The data relating to them are not included in the monthly series appearing in the "Treasury Bulletin", but have been used regularly by the Department of Commerce in the balance of international transactions of the United States, which is compiled on a quarterly and annual basis. This series of data comprises principally accounts, notes, and drafts receivable and payable but includes also deposits with banks abroad in the reporter's own name and other claims on and liabilities to foreigners maturing in one year or less. Excluded from these reports are the claims on and liabilities to "allied organizations" abroad, for which reports are made to the Department of Commerce.

Reports both from the banks, bankers, and brokers and from the nonfinancial concerns are collected, checked, and tabulated by the twelve Federal Reserve Banks. The totals are then forwarded to the Treasury Department for consolidation and publication.

Publication of detailed figures in the monthly series on capital movements was discontinued between the March 1942 and the November 1945 issues of the "Treasury Bulletin", but data omitted during that period were supplied in the November 1945 issue and supplement.
